

# THE PLAINVIEW EVENING HERALD

TWICE-A-WEEK

VOLUME 28, NUMBER 13

PLAINVIEW, TEXAS, TUESDAY, FEBRUARY 13, 1917

## AMENDED WEST-TEXAS A. & M. BILL IS PASSED BY SENATE NINETEEN TO FIVE

BILL WITH CHANGES TO COME UP IN HOUSE SOON, AND IT IS EXPECTED THAT IT WILL CONCUR—PROVIDES MONEY FOR BUYING SITE.

(Special to The Herald.)

AUSTIN, TEXAS, FEB. 12.—THE AMENDED WEST TEXAS A. & M. COLLEGE BILL PASSED THE SENATE THIS AFTERNOON, NINETEEN TO FIVE.

IMMEDIATELY AFTER THE MORNING HOUR SENATOR HUDSPETH CALLED UP THE HOUSE BILL NUMBER FORTY-SIX, THE WEST TEXAS A. & M. BILL, AND OFFERED AN AMENDMENT THAT THE LOCATING COMMITTEE, COMPOSED OF THE GOVERNOR, LIEUTENANT GOVERNOR, SPEAKER OF THE HOUSE, COMMISSIONER OF AGRICULTURE AND THE SUPERINTENDENT OF PUBLIC INSTRUCTION, COULD CONSIDER AN OFFER OF NOT LESS THAN TWO THOUSAND ACRES OF LAND, IN ONE BODY, NOT TO COST OVER \$50,000.00. THIS AMENDMENT WAS ADOPTED.

AN AMENDMENT WAS ALSO ADOPTED LEAVING TO THE DISCRETION OF THE LOCATING COMMITTEE QUESTIONS OF SITE OFFERS, BUILDINGS, ETC.

SENATOR HALL, OF GUADALUPE COUNTY, INTRODUCED AN AMENDMENT MAKING THE NEW SCHOOL A JUNIOR COLLEGE. THIS ACTION PRECIPITATED A DEBATE ON THE WHOLE QUESTION OF THE BILL. SENATORS HUDSPETH, JOHNSON, BEE AND GIBSON MADE PLEAS FOR THE BILL, AND HALL AND DECHERD OPPOSED IT. THE BILL WAS ENGROSSED, AND WITH THE RULE SUSPENDED IT FINALLY PASSED, NINETEEN TO FIVE.

IT IS EXPECTED THAT THE AMENDMENT WILL BE CONSIDERED IN BY THE HOUSE.

The bill carries with it the appropriation of \$500,000.00 for construction of buildings and purchase of land. It provides that the school is to be governed by the board of regents of the A. & M. College of Texas. A full four-year curriculum is to be maintained. The school is to be located north of the thirtieth parallel and west of the ninety-eighth meridian. It must be accessible to one or more railways.

The passage of the A. & M. College Bill comes in response to the demands of West Texas, which has been solidly aligned to force the passage of the bill. There have been many proponents of the measure who live in East Texas, however, who have supported the measure on its merits. The West Texas A. & M. Campaign Association, of which Dr. P. C. Coleman, of Colorado, is president, and T. F. Hodge, of Sweetwater, secretary, has been very aggressive in their campaign. The towns of the area asking for the school have contributed liberally in an unselfish effort to secure the school. A gentlemen's agreement was entered into by the various co-operating towns that no town would seek the location of the school until after the bill had been successfully negotiated, and the towns have kept their word remarkably well.

It is understood that Plainview, Amarillo, Sweetwater and Lubbock have aspirations for the school, and will soon begin work on plans to present the claims of the respective towns for the location.

## COUNTY AGENT PETITION IS TABLED BY COMMISSIONERS

Third National Bank Is Made Depository for Funds of Hale County.

The Commissioners' Court has been in session since yesterday morning. Most of the time has been taken up with examination of jury of view reports and road matters. Several new roads have been ordered and petitions have been filed for new roads.

### Third National Gets Funds.

The Third National Bank was made county depository. Its bid for the county's funds was seven and one-eighth per cent interest on daily balances. The First National bid four and seven-eighths per cent.

### Table County Agent Petition.

The Commissioners voted to table a petition for the re-establishment of the office of county agent. The petition was signed by more than a hundred farmers of the county.

Tomorrow the court will appoint road overseers and will pass on bills and claims.

## AUTOMOBILE LICENSES ISSUED.

During the past week County Clerk J. W. Wayland has issued automobile licenses to the following: Jack Alley, Runningwater, Chevrolet, No. 1193; C. M. Watson, Ford, No. 1194; E. E. Moran, Maxwell, No. 1195; J. W. McCain, Ford, No. 1196; A. J. Baker, Hale Center, Oakland, No. 1197; Harry Hyde, Ford, No. 1198; Ira Hammer, Olton, Ford, No. 1199; Elmer F. Sansom, Hupp, No. 1200; W. M. Wilson, Ford, No. 1201; L. L. Nicholas, Maxwell, No. 1202; E. G. Pearce, Hale Center, Hupp, No. 1203.

## MARRIAGE LICENSE ISSUED.

County Clerk J. W. Wayland has issued a marriage license to H. D. Mitchell, of Kress, and Miss Anna West.

Rev. J. F. Nix, formerly a citizen of Plainview, having removed to New Mexico twenty months ago, has been appointed State Evangelist of that State by the Baptist State Board.

## SOUTH PLAINS MAY BECOME MARKET FOR DAIRY CATTLE

Texas Industrial Congress Co-operates With Extension Service to Ask for Apportionment for County Agent.

"All of Texas is becoming interested in the dairy industry," said H. A. Clapp, president of the Texas Dairy Congress and field worker for the Texas Industrial Congress yesterday, "but in the Coast country we are handicapped by the tick. We are now working to eradicate the tick, and when we have accomplished this we will be ready to embark in the dairy business in earnest. By that time those in this section who have dairy cows will probably have a number of bulls ready for the market, and probably a few cows. It will be to our interest, of course, to buy from you people rather than to go to Michigan or Wisconsin, where your Holsteins came from."

Mr. Clapp is here as a representative of the Texas Industrial Congress, and was here at their expense to present the Extension Service's plan for a farm demonstrator for Hale County. In that capacity he appeared before the Commissioners' Court yesterday afternoon, together with a committee from the South Plains Dairy Association, J. F. Garstang, L. L. Wheeler and C. Q. Thompson.

## ABRAHAM'S COMRADES FIRED THE SALUTE TO PERSHING.

Thos. G. Abraham, nineteen-year-old son of Mr. and Mrs. Thos. Abraham, of Plainview, is a member of Battery A of the United States Army, from Roswell, N. M. In a letter to his father, he states that the border States' militia only is being retained on the border, the other guards having been called to the North and to their homes. He also states that by reason of passing in good inspection his battery was chosen to fire the salute to General Pershing when he arrived at El Paso in his retirement from Mexico. The men of Battery A made a better showing in inspection than the regulars.

## BUY GORDON GROCERY.

John Dalrymple, of Lexington, Texas, and C. D. Boyd, of Plainview, have purchased the grocery stock in the Dorsett Building from T. L. Gordon, and will conduct it under the firm name of the Dalrymple Grocery Co. The new firm is arranging for several improvements in the interior of the building.

## TO REPRESENT SOUTHWESTERN LIFE INSURANCE CO. HERE.

J. E. Majure, special agent of the Southwestern Life Insurance Co., of Dallas, has arrived in Plainview to make his home. He has the territory surrounding Plainview.

## URGES BRICK AS MATERIAL FOR PAVING OUR STREETS.

C. C. Gardiner, of Fort Worth, who is a representative of the Paving Brick Manufacturers' Association, was in Plainview this week in the interest of his association. He urges brick as the best material for paving the streets of Plainview. He states that the old prejudice against brick for noise is dying out, for the brick now manufactured are practically noiseless and most vehicles have rubber tires. He believes the Thurbur brick, a made-in-Texas product, is an excellent paving material. He argues that the cost of maintenance on a brick pavement is less than on almost any other kind, although the initial cost is higher.

## BUICK SEDAN IS A TYPICAL CITY CAR—COST IS \$1,800.

E. E. Roos, Buick distributor, has just received from Flint, Mich., a Buick Sedan, a strictly town car, of beautiful design. It has a Buick Six motor and the interior of the roomy, seven-passenger body is upholstered in leather, with heavy seat covers. The curtains of the tonneau are of silk.

## OBSERVED LINCOLN'S BIRTHDAY.

Observing Lincoln's birthday, the banks and post office were closed yesterday.

Mr. and Mrs. T. B. Irwin have gone to San Antonio, where they will spend some time for Mr. Irwin's health.

## UNCLE SAM WILL NOT TALK PEACE TERMS WITH GERMANY

As Long as Ruthless Sub Warfare Is Carried On U. S. Will Not Negotiate.

WASHINGTON, D. C., Feb. 12.—The United States has flatly rejected Germany's offer to discuss differences between the two countries while the ruthless submarine campaign is in progress.

In a note today to the Swiss minister, who on Saturday presented orally the German proposal, Secretary Lansing said the United States does not feel it can enter into any discussion with the German Government concerning the policy of submarine warfare against neutrals which it is now pursuing, unless the German Government renew its assurances of the fourth of May (the Sussex note), and acts upon the assurances.

The State Department made public the Secretary's reply, together with a memorandum which at Mr. Lansing's suggestion Dr. Ritter, the Swiss minister, had prepared last night, setting down in writing the suggestion originally transmitted orally. Previously officials had declined to confirm the announcement by the Associated Press Saturday afternoon that such a proposal had been delivered by Dr. Ritter.

In view of the fact that the United States has taken the most vigorous course possible short of war to denounce the ruthless submarine warfare, officials of the Government regard the German proposal to negotiate while the campaign is in progress as utterly insincere. From the first, the move has been looked upon and resented as a piece of propaganda designed to becloud the issue and put the United States into a false position of belligerency.

The question of whether navy guns shall be provided for American ship owners against the arm their vessels for defense against submarines has been submitted to President Wilson by the State and Navy Departments. It is understood that the State Department, the Government's spokesman on international problems, has recommended that the guns be provided.

There is said to be no authority under which the Navy Department can actually supply guns, though there are precedents for the loaning of weapons, under bond for their return. Under existing law only condemned guns and stores can be sold by the navy.

## LAMB COUNTY GIVES ITS FUNDS TO LITTLEFIELD STATE BANK.

County Pays Bounty on Fifty-Eight Coyotes and More Than Fifteen Hundred Rabbits.

Yesterday the Commissioners' Court of Lamb County designated the Littlefield State Bank as the depository for the county's funds. Six per cent on daily balances is to be paid. The Commissioners considered only bids of banks in their county, as advertised.

The Commissioners paid bounties for the month of January for coyote pelts and rabbit ears. They had authorized an announced payment of \$1.00 for coyotes and five cents for rabbits, fifty-eight coyote pelts and 1,525 pair of rabbit ears were paid for, the total amount paid out being \$134.20.

## LADIES WILL FURNISH BANQUET ROOM OF PRESBYTERIAN CHURCH.

The Ladies' Aid Society of the Presbyterian Church met at the home of Mrs. Fred L. Brown Monday afternoon.

Mrs. S. W. Meharg presided, in the absence of the president. The Scripture lesson was read by Mrs. Meharg. Prayer was led by Mrs. Brown.

A resolution of regret at the departure of Mrs. J. D. Hanby was adopted.

It was decided that the Aid would have tables made for the banquet room of the new church.

The latter part of the afternoon was spent in discussing plans for the Sunday School banquet to be held March 1.

There were twelve members present. The next meeting, annual election of officers, will be with Mrs. George Doubleday.

## SPANELL TRIAL IS SET.

The case of Harry J. Spanell, charged with killing Lieutenant-Colonel M. C. Butler, of the U. S. A., at Alpine, last July, has been set for trial on April 9, at Coleman.

## Lincoln's Gettysburg Address

Fourscore and seven years ago our fathers brought forth on this continent a new Nation, conceived in liberty, and dedicated to the proposition that all men are created equal.

Now we are engaged in a great civil war, testing whether that Nation, or any nation so conceived and so dedicated, can long endure.

We are met on a great battlefield of that war. We have come to dedicate a portion of that field as a final resting place for those who gave their lives that that Nation might live. It is altogether fitting and proper that we should do this. But, in a larger sense, we can not dedicate, we can not consecrate, we can not hallow, this ground. The brave men living and dead who struggled here have consecrated it far about our poor power to add or detract. The world will little note nor long remember what we say here, but it can never forget what they did here. It is for us, the living, rather, to be dedicated here to the unfinished work which they who fought here have thus far so nobly advanced. It is rather for us to be here dedicated to the great task remaining before us—that from these honored dead we take increased devotion to that cause for which they gave the last full measure of devotion; that we here highly resolve that these dead shall not have died in vain; that this Nation, under God, shall have a new birth of freedom; and that Government of the people, by the people, for the people, shall not perish from the earth.

ABRAHAM LINCOLN.

Gettysburg, November 19, 1863.

## Bryant Jury Fails to Agree; Judgment for McQuillen Granted

In the case of the State of Texas vs. Oscar Bryant, charging perjury, the jury in the District Court could not agree. It is understood that three were for acquittal and nine for conviction.

A judgment for the plaintiff was entered in the case of Robt. McQuillen vs. C. C. Slaughter Co., of Dallas. McQuillen prayed for specific performance.

## TRIP FOR PURCHASING CATTLE IS ARRANGED.

L. L. Johnson, agricultural manager for the Santa Fe System, will leave for Wisconsin and Michigan on or about March 1st to purchase about four hundred head of Holstein dairy cows. Purchases for towns will be as follows:

Post City Dairy Association, five carloads.

Abernathy Community Dairy Movement, two carloads.

Kress Dairymen's Association, one carload.

Panhandle Dairy Association, Amarillo and vicinity, two carloads.

It is also possible that Hereford, Tulsa, and Canadian, Texas, and Woodward, Okla., will add their quota. Never before in the history of Texas has a movement gained such momentum. Lubbock is now prepared to ship in this summer 400 additional Holsteins; Plainview, 300; Littlefield, 150; Hartley, 100; and the movement will swing down the Denver Railway early in March, when Director Short of the Denver will commence the campaign in that territory.

C. D. Morrell, assistant cashier of the First National Bank of Post City, will accompany Manager Johnson for the Post City Association and Carl Goodman will accompany him, representing the Abernathy Association. No representatives have yet been selected for the other points.—Amarillo News.

## NO WAR UNTIL AN AMERICAN RIGHT HAS BEEN VIOLATED.

WASHINGTON, D. C., Feb. 9.—The course to be taken by the United States if Germany compels the use of force to safeguard American lives and rights has been determined. It was learned authoritatively after today's Cabinet meeting that in the event President Wilson goes before Congress again it will not be to ask for a declaration of war, but to follow literally the words of the address in which he announced the break of diplomatic relations and requested authority to use means deemed necessary to protect American seamen and people.

The President, it was stated, is as anxious as ever to avoid war with Germany, but also is as determined as ever that American citizens and ships shall be free to travel the high seas unmolested. His next step, if taken, will be to enforce that right, and even then the issue of war or peace will be with Germany. Any hostile action will have to come in the form of an interference with an American right.

Details of the Government's plans are not discussed. It is known, however, that conveying and arming of merchant ships are being considered.

Rev. W. C. Carver, of the Wainwright College faculty, preached in Tulsa Sunday.

## BOY SCOUTS' ANNIVERSARY SERVICES WERE IMPRESSIVE

Occasional Special Music Was Above the Ordinary—Collection Amounted to \$12.30.

The anniversary services of the Plainview troop of Boy Scouts of America were held Sunday evening, at the First Methodist Church. The invocation was by Rev. J. W. Story. Rev. Henry Hagemeier, pastor of the First Christian Church and an assistant scoutmaster, gave a short address on the history and origin of the Boy Scout movement and the aims and purposes of the organization. The anniversary sermon was preached by Rev. T. B. Haynie, pastor of the First Presbyterian Church. He addressed his sermon primarily to the Scouts, who attended in uniform and occupied special pews.

The musical program was exceptionally good. It was directed by Prof. Herbert Reed, choir director and organist of the Methodist Church. The numbers and artists follow:

Organ Prelude, "Fantasia in A-Minor"—Professor Reed.

Lyric Ladies' Quartet, "Day Is Dying in the West"—Mesdames Meyers, Pipkin and Clark and Miss Story.

Bass Solo, "Lay Thy Hand Upon Me"—Rev. Henry Hagemeier.

Choir, "Holy Art Thou" (Handel's Largo). Miss Carrie Bier at Piano.

Offertory, "Venetian Boat Song"—Professor Reed.

Lyric Ladies' Quartet, "Be Faithful." Postlude, "Soldiers' Chorus"—Professor Reed.

The evening's offering went to the Scout fund amounted to \$12.30.

## STROKE OF PARALYSIS IS FATAL TO WM. MCGILL MILLEN.

Yesterday the body of William McGill Millen, who died Saturday at Olton, was shipped to the old family home, in Iowa, accompanied by Miss Doris Millen, a daughter of the deceased.

The funeral services were conducted yesterday by Revs. S. J. Upton and G. I. Britain, in the Olton church. Arrangements for the funeral and for shipping the corpse were made by W. F. Garner, of Plainview.

Mr. Millen was sixty-seven years of age, and was a native of Illinois. For the past eight years he has been in Texas. Death resulted from a stroke of paralysis twelve days prior to his death. He leaves four daughters, three of whom live in Iowa and one, Mrs. Raymond Branson, who lives at Olton.

## BENEVOLENT LEAGUE WOULD PROVIDE PLAY INSTRUCTOR.

The executive committee of the Benevolent League met Friday afternoon, at the Central School Building. Mrs. C. W. Tandy acted as treasurer, in the absence of Mrs. A. C. Hatchell. It was reported that several calls had been made.

Among the topics discussed was the establishment of a play room for boys and young men with a paid instructor to teach them how to play baseball and basketball. But the League feels financially unable to undertake this alone, so it has appealed to the benevolent citizens of Plainview to assist them.

Q. E. Brown, of Silvertown, is here today.

**Community Correspondence**

**THE PUPILS OF PETERSBURG SCHOOLS ARE ENTERTAINED.**

PETERSBURG, Texas, Feb. 5.—There are solemn faces in our community since Germany has cancelled all former pledges, and the President had to sever diplomatic relations with the Central Empires. Americanism has heretofore meant loyalty. To go forward is the theory of government, and while we hope for peace, war may come. We do believe our people are awake to the full force of the strength lying within them, and we shall see them triumphant.

Mrs. N. E. Greer entertained the young people of town and the high school pupils Friday night, with a macquerade party. She was assisted by Mesdames Marcus Gregory, Allan Waddill and Ed Reagan. The young folks met in the Ed C. Reagan home. The girls masked and enveloped in sheets. The boys escorted them over to the Greer home, and then had to guess who their partners were. Most of them failed to recognize the "spooks," and paid ten cents' assessment. When refreshments were served, the boys were to keep silent or pay a forfeit—a penny for each word. Most of them talked, and had a jolly, good time. Proceeds go to the basketball team.

On the same night, the home of L. C. Claitor was thrown open to the pupils of the school in a similar entertainment. The pupils met with Professor and Mrs. Bull, and came to the Claitor home. Quite a few of the younger boys guessed exactly who their partners were. They had fun, anyway. Refreshments were served by Mrs. Claitor, assisted by Mesdames Wiese, Bull, Lyon and Gartin.

Mr. Pinkard, from Weatherford, is prospecting in our midst with a view of settling here. While in town he is the guest of L. C. Claitor.

John Hegl, Sr., has gone to Kansas City and Leavenworth to visit relatives.

Chas. Schuler shipped a carload of sheep and hogs to Kansas City Saturday.

E. C. Dean is in New Mexico, prospecting.

Mrs. J. R. Brown, from Ralls, is visiting her daughter, Mrs. Robert Gregory.

Miss Ada Darby spent the week end with her mother, in Lubbock.

Miss Lester Jones has been out of school several days with measles.

Miss Bertie Lee Allen and her father, from Halfway, visited with the Tabor family, near town, Sunday. They came by to see Misses Hughes and Claitor for a short while, as they were returning home. Miss Bertie Lee is quite a favorite of these two young ladies, who were her teachers last year.

Mrs. L. M. Faulkner has returned from Baltimore, Md., where she visited with her niece.

**HOW WE RAISE OUR CALVES.**

By J. W. RIDGWAY,  
Professor of Dairy Husbandry, Texas A. and M. College.

Some one has wisely said that the proper raising of a calf should begin before the calf is born, meaning that it is necessary to give the calf's mother careful attention before its birth. To that end, it is our aim to keep our pregnant cows, and in fact, our entire breeding herd, in the very best of physical condition, so as to give the young calf a good start at birth.

Our plan is not to allow the calf to remain with its mother longer than 24 hours, or just long enough to allow it to get two or three nursings. Some argue that it is better to extend this time two or three days, but our experience would not seem to warrant such a practice. In the first place, the quicker the calf is removed, the quieter the mother will become, and the easier the calf may be taught to drink. Besides, when a calf is allowed to remain with its mother for two or three days, there is danger of its getting overfed, indigestion resulting.

For the first week or ten days the calf is fed its mother's milk, the quantity varying in proportion to the size of the calf. This period, judging from our experience, is the most delicate time in the life of the calf. Usually, if you succeed in getting him safely past this period, or until he has reached the age of ten days or two weeks, there is not nearly so much danger of scours. Our experience would indicate that overfeeding at this time is most likely and is largely responsible for the digestive disturbances so common in young calves. For this reason, we follow the practice of feeding only 3 to 3½ pounds of milk, twice daily (we have never obtained any better results by feeding three times daily), although the usual recommendation is from 4 to 5 pounds daily.

Milk from cows that are known to have an unusually high percentage of fat should be diluted by the addition of a quart of skim milk to the gallon.

After the first ten days we begin feeding the regular herd milk, and usually increase the quantity to about 4 pounds at a feed, especially if the calf is a big, vigorous fellow, and is growing off nicely. This matter is left to the judgment of the feeder, and in this connection it is appropriate to remark that the successful raising of calves depends altogether on the feeder, and therefore the most reliable and responsible man in the barn should be given the job. We have long since decided that the feeding of our calves should be done by the

herdsman personally, and in nearly every instance when we have to employ a substitute, trouble results.

The amount of milk is held fairly constant at 4 pounds until the substitution of skim milk is begun, at the age of from four to six weeks, depending on the progress of the calf. This substitution is, of course, made gradually, requiring about one week to complete the change, at which time the calf is close to two months of age. During this time the calf will begin to eat hay and some grain. In fact, we have noticed this tendency developed at as early an age as three or four weeks. We find it quite an advantage to have one or two older calves with the young calves, as the little fellows will learn to eat much quicker.

As a concentrated feed, we use a mixture of 2 parts corn chops and 1 part wheat bran. This mixture has given us the best results, although we very often use the ground kafir or milo maize in place of the corn without a noticeable difference. A small quantity of wheat bran in the ration has a tendency to tone up the system, and I think, is generally advisable. At this age we feed all the grain that the calves will clean up well between feedings, our plan being not to have any grain left over in the trough, as this has a tendency to make it distasteful. For hay we prefer either Johnson grass, sudan grass, or Bermuda, and have never gotten good results from feeding alfalfa to young calves. When alfalfa is used there seems to be a greater danger of over-feeding, because of its palatability, and as alfalfa is very laxative in character, scours are sure to result. With the coarser and somewhat less palatable hays, the racks can be kept filled before the calves at all times without danger of over-feeding.

Beginning with 5 pounds of skim milk at a feed at the age of two months, the milk is gradually increased as follows:

- 6 pounds at a feed when 9 weeks of age;
- 7 pounds at a feed when 10 weeks of age;
- 8 pounds at a feed when 12 weeks of age.

It is perfectly safe to feed a larger quantity of skim milk than 8 pounds at a feed as the calf grows older. At times, when we have had an abundance of skim milk, we have fed as much as 12 pounds of skim milk at a feed to calves between 5 and 6 months of age, that we were anxious to develop rapidly, but I am inclined to think that such heavy feeding is not an economical practice, and just as good results can be gotten by holding the skim milk at 8 pounds, and increasing the grain and hay.

I believe that the biggest mistakes that occur in the raising of calves are due to the general impression that a

calf will thrive well on good pasture at the age of 6 months, without any other feed. It has been our experience that it is not good practice to depend exclusively on pasture, and that it is well to feed some grain, regardless of the condition of the pasture. Two pounds daily of a grain mixture of 1 part cotton-seed meal and 2 parts corn meal or kafir meal, is an excellent substitute for calves on pasture, and insures a good growth and a much more rapid development.

We find in the South that it is much easier and much cheaper to raise calves dropped in the fall, as compared with calves dropped in the spring. The difference in development is quite noticeable, even after they have reached the age of 16 or 18 months.

In conclusion, I would like to emphasize the importance of giving the calves proper care. To my way of thinking, there is no more important piece of work in connection with the dairy than the rearing of the calves, as the foundation of the business is based directly on their proper development.

Mrs. T. A. Duke and baby are visiting relatives in Synder.

Mrs. E. S. Shelly is visiting her son in Menard, Texas.

**Tractor Fuel Economy**

**Fill These Tanks with KEROSENE AVERY FUEL SYSTEM**

**A Wonderful Invention—Avery Duplex Gasifier—Turns Kerosene Into Gas**

We have discovered the way to burn kerosene more successfully than it has ever been before.

We burn the kerosene that builders of so-called kerosene tractors admit they waste.

We use the lubricating oil over and over again that others use only once and then waste on the ground.

We get as much power out of a gallon of kerosene as the old style so-called kerosene burning tractors get out of a gallon of gasoline.

We burn kerosene without the troubles previously experienced in burning this fuel, such as fouled spark plugs, pitted valves, carbon in the cylinder, pre-ignition, etc.

We burn kerosene so successfully that

we are able to use a closed crank case and gear pump oiling system, which is much superior to the mechanical oilers which builders of so-called kerosene tractors use to prevent the kerosene which passes their piston rings diluting the oil and causing the crankshaft bearings to be cut out.

We burn kerosene successfully with a long manifold so that we are able to use an opposed perfectly balanced motor while others are forced to use unbalanced twin motors with short manifolds in order to burn kerosene even as well as they do.

The secret of all these wonderful results is found in the Avery Fuel System, consisting of our double carburetor, duplex gasifier and auxiliary air inlet fuel system.

**How Avery Tractors Burn Kerosene**

All Avery Tractors are equipped with double carburetors. One bowl is for gasoline and the other for kerosene. The motor is started on gasoline and when it warms up you pull the lever and instantaneously switch over to kerosene without having to make a single adjustment of any kind. This double carburetor is the first special feature of the Avery fuel system.

But while a carburetor will mix gasoline with air and form a gas which burns readily in the cylinder, no carburetor has yet been designed which alone will successfully handle kerosene. In the Avery fuel system we accordingly place between the carburetor and the cylinder our duplex gasifier, which takes the mixture of kerosene and air as it comes from the carburetor and further reduces the particles of kerosene and mixes them with the air in such a way as to form a gas that burns more successfully than kerosene has ever been burned before.

We then use an auxiliary air inlet, which tempers this gas to the proper degree to get the most power out of it.

The Avery Company has originated and made it possible for buyers of tractors to have the advantages of many valuable tractor features, such as a sliding tractor frame, renewable inner cylinder walls, simple two-speed double drive spur gear transmission and other features, but nothing which we have ever done is more important than the invention of the double carburetor and the duplex gasifier that turns kerosene into gas. With this Avery fuel system an owner of an Avery Tractor can burn kerosene so successfully that he is forever free from any concern as to any change that may take place in the prices of fuel from year to year in the future—a thing he can never determine in advance. He can use either gasoline or kerosene at will, depending only upon whichever fuel is the cheapest in his locality.

## Billy Sunday in Boston

From The Literary Digest.

Billy Sunday in Boston seems to have broken most previous records. The Congregationalist, representing an evangelical Church, speaks of "the greatest, best-advertised, most discussed, most comprehensive and the costliest campaign which New England has ever known." And it has no hesitation in adding that "the results already attained more than justify the time, energy, and money expended." This paper is willing to stand on the results even after making such abatements as are usually urged against the Sunday campaigns. "Discount liberally the figures given, allow—as in all revivals since Pentecost—for many backsliders, regret as you may and as we do, certain platform utterances and methods employed, and there remains a substantial body of results, deep and far-reaching, to gladden the heart of every one who longs to have Christ's kingdom triumph over all its foes."

Zion's Herald (Methodist, Boston) gives some comparative figures, though pointing out that it is too early to give in any detail the results of the campaign:

"A few figures tell the story in the large. The attendance during the ten weeks was 1,478,000. The responses to the invitation totaled 63,716. The offering for Mr. Sunday on the last day of the campaign figured \$50,828. When taken in comparison with other cities, these figures are even more interesting. The six cities that come next in order after Boston as to responses to the invitation and offerings are as follows:

City	Invitation	Offerings
Boston	63,716	\$50,828.64
Philadelphia	41,724	51,136.85
Detroit	27,192	46,097.38
Pittsburg	25,797	46,000.00
Baltimore	23,085	49,274.44
Syracuse	21,155	23,358.03
Kansas City	20,646	32,000.00

"It will be seen by these that Philadelphia, which is next to Boston, had 22,000 fewer responses. Its total offering compared with the offering received on Sunday is about \$300 ahead of that of Boston, but the Boston offering, in the nature of the case, will go much ahead of the Philadelphia when it is all collected, which is it not at this writing.

"While these figures are to a certain extent a criterion by which to estimate the results of this campaign, they are by no means its final measure. That 60,000 persons should have responded to the invitation as extended by Mr. Sunday is something not lightly to be passed over, even if in that number there were many whose names were already on the church roll, and many others went forward more to take Mr. Sunday by the hand than because of depth of conviction. The names themselves handed to the pastors and active workers in the churches are an opportunity, secured in an unusual way, for religious conversation with those who have for the first time taken their stand for Christian things, and an opportunity for the intensification of religious life and activity on the part of those who already as church members have signed these cards. Moreover, the whole campaign has served to draw particular attention to the church and its place in the community and to lay emphasis upon the things for which the Church stands."

The final scene of the last service, described by Dr. J. K. Wilson, of The Watchman-Examiner (Boston), gives an aspect of things not usually associated with Boston:

"After the sermon, and after the last 'trill-bitter' had reached the platform, the immense congregation held its place, singing over and over again the familiar songs, unwilling to say the final word of farewell. The least hint or incident was sufficient to start the singing off on a new line. 'The Old-Time Religion' was sung with gusto through its almost interminable applications. 'It was good enough for mother,' 'father,' and all the rest; when some bright genius interjected the name of Billy. 'It is good enough for Billy,' and off it went again; then 'Rody,' and 'Ma,' and 'Brewster,' and so on. And there's no telling but the crowd would be there yet and still singing had not Mr. Sunday lifted his hand for silence, offered a brief prayer, dove into his big coat, and with Ma 'beat it' for the door of his automobile. A few hours later, at 12:30 A. M., they left the South Station, and the great Sunday campaign in Boston was a matter of history."

In a symposium of personal impressions contributed by Boston pastors to The Watchman-Examiner, the Rev. Nathan R. Wood, Dean of the Gordon Bible College, writes:

"Infinite variety, first of all! He is many evangelists in one. The mil-

litant fervor of Peter the Hermit, the hypnotic influence Bernard, all the white-hot indignation of Savonarola against the sins of the day, the broad Scriptural, emotional power of Moody, a touch of the seraphic appeal of Whitefield or Gypsy Smith, the 'chain-lightning' of Finney's logic, the slang, the humor, the 'straight from the shoulder' of Sam Jones, all by turns in different sermons, or even in one sermon. Billy Sunday and his message are one. \* \* \* One likes Billy Sunday. I think, unless one is a saloon-keeper, a Christian Scientist, or a drifter from the Cross and the Word, one can not help loving him. For many years we shall seem to see and hear him, shouting titanically from the top of his pulpit like a Roman captain to his legions, or wrestling all over his platform in desperate conflict with sin, or talking in easy good-fellowship with 17,000 people, or pleading, tears in his eyes and in his voice, with sinners to come to Christ."

The Christian Endeavor World (Boston) see "a Sunday campaign as a magnificent justification of the Christian Endeavor Committee system"— "A Chinese worker once said to a friend whom he was inviting to the society gathering, 'You've got to come, for we have a committee to fetch you.' Billy Sunday has committees to fetch people. He believes in hard committee work. His associates are organizers of committees to reach all classes, business men, business women, nurses, servant-maids, students, boys, and girls. The committees, each under a local church-worker, cover the whole city, and through the committees the leaders are able to accomplish an amazing amount of work."

Opposition was voiced against Sunday by Roman Catholics of Boston, the resident Cardinal issuing a mandate forbidding attendance at the meetings. The Pilot, the Catholic paper, echoes Cardinal O'Connell in declaring that "Catholics are not al-

lowed to take part in these revival meetings, and if they do they commit sin." The Rev. Joseph H. McMahon, speaking before the Catholic Library Association in New York, brings forward the criticism that the Brooklyn Eagle recommends to the attention of protestants. Thus:

"There is strong evidence that Sunday deliberately makes himself an instrument of capitalists for the purpose of keeping working people contented and submissive under injustice. There was never a word of comfort or encouragement for the workingman in his struggle for fair treatment."

At the same time the priest points out that prototypes of Sunday's sensationalism are to be found in the history of his own Church. As The Eagle reports and comments on Father McMahon:

"Most of us did not recall that about five hundred years ago St. Vincent Ferrer, born in Valencia, evangelized Provence and then Lombardy, speaking in squares and open places, and followed from town to town by hundreds of penitents; or that Bernardino, of Sienna, of a little later period, though born only thirty years after St. Vincent, preached through the rich and luxurious cities of north Italy in public market-places, that penitents 'flocked to confession like ants,' and that bonfires were started into which the rich flung the vanities of life. And, as Rector McMahon said, the Jesuits 'were glad to be considered fools and jesters that, by their play, they could attract crowds to whom they could then speak their hearts upon religion.' The clergyman added: 'Nay, right down to the beginning of the present war, Catholic priests in England rang bells on the street, carried banners and did sensational things in Hyde Park in order to gather audiences.'"

"Waiving, then, the issue about sensationalism, the priest was free to compliment Sunday on his knowledge of the psychology of a crowd, on his business management, on his system, at the same time that he declared him to be primarily the spokesman of the rich, accused him of denying the

teaching of Christ, and said, 'the suspicions that gather round him of being a mere money-gatherer impair the usefulness of this man, who assuredly is a phenomenon.'

"We are glad to see criticism taking such a form. Primarily, Billy Sunday is not using his movement as a propaganda to convert, or prevent, Roman Catholics. We doubt whether the movement has had such an effect in its working out anywhere. Hence the view of a broad Roman Catholic think-

er is not affected by apprehension and is more or less free from prejudice for or against Sundayism. Such a view is well worth Protestant consideration. It compels the attention of thinking people."

## GOOD ROADS SAVE IN TRANSPORTATION COST.

We know that good roads make rural life less narrow. We know that they enhance property values; but the exact relation of good roads to cost of transportation is a matter difficult to ascertain. According to George P. Coleman, state highway commissioner of Virginia, transportation costs have been lowered in one county forty per cent by the construction of good roads. Before the roads of one of the counties of that State had been improved, the largest amount of farm and forest products shipped out of the county in any one year was 49,000 tons. In 1909, the amount of dairy products shipped was 115,000 pounds. During that year 40 miles of road were improved, at an expense of \$100,000.

In 1911, two years after the improvement, 75,000 tons of farm and forest products and 273,000 pounds of dairy products were shipped.

The increase was 45 and 140 per cent, respectively, in these two classes of products. The increase in wheat shipments was 59 per cent, in tobacco 31 per cent, and in lumber and other farm products 48 per cent over the best records made before the roads were improved.

This is by no means all of the direct result of having good roads for marketing. Careful studies of traffic in the county were made by Commissioner Coleman for two years, which showed that it cost at least 20 cents to haul a ton a mile on unimproved roads and 12 cents a ton on improved roads.

The records showed that the average haul of 65,000 tons of products was eight miles. Consequently the improvement of the roads over which the hauling was done saved the farmers \$41,600 in marketing 65,000 tons of products.

## IS THE SPIRIT OF VANDALISM INHERENT?

Is the spirit of vandalism inherent in boys? Advocates of the recapitulation theory promulgated by Professor Hall would have us believe that in every boy's life there is a reduplication of the successive stages of development in the civilization of the species; that there is a time when he has instincts corresponding with the desires of the cave man. During this period he wants to live in the open, and the instinct among boys to dig caves and otherwise prepare out-door play places has been cited as one of the stages. At certain times of life, according to the theory, he has instincts to become a vandal. He destroys for the sheer fun of doing it. At this age he breaks window panes, tears pickets from fences and in other ways makes himself a nuisance in the neighborhood.

Another instinct of man, we are told, is to record on tablets of rocks, on trees and on other immovable objects the things he has done. In this way history has been preserved. Probably the instinct to make records has been inherited by the modern boy. Probably this is what makes him plant his foot in a newly constructed sidewalk, carve his name or initials on the walls of outbuildings, mark his name on bridges or on fences, sink his initials into soft concrete or scratch mortar out of buildings.

Be that as it may, some instinct prompted some boy or girl to scratch his initials in the newly constructed walk at the Presbyterian Church, that new structure of which Plainview is proud. Another, or probably the same, youngster planted his foot in the plastic concrete and left its print. That youngster didn't think. Boys and girls don't act much as the result of mature thought or deliberation. They act often on impulse, regretting oftentimes the moment they have acted, their erratic deeds; ready for laughing retrospection of their work, with tears of regret only surface deep.

And the youngsters are not the only ones who are vandals. There are others than LITTLE vandals. Many a grown-up thoughtlessly destroys public property—there is little vandalism in private grounds or property. A boat lying idle on the lake is a good target for rocks. That it is valuable and that its utility for the public is destroyed by their thoughtless acts, never occurs to a perpetrator. He would probably condemn himself for his act if brought face to face with it.

Is the spirit of vandalism inherent? With the State Dairy Congress, Panhandle Swine Breeders' Association and State Y. M. B. L. in Plainview this coming year the old town is hitting her former stride in the way of entertaining conventions.

## Food For Thought

"The wisdom of the wise and experience of the ages may be preserved by quotation."—Benjamin Disraeli.

Great revolutions, whatever may be their causes, are not lightly commenced, and are not concluded without precipitation.—Disraeli.

Revenge is a kind of wild justice, which the more man's nature runs to, the more ought law to weed it out.—Bacon.

## APPARENT FAILURE.

(By Robert Browning.)  
It's wiser being good than bad;  
It's safer being meek than fierce;  
It's fitter being sane than mad.  
My own hope is, a sun will pierce  
The thickest cloud earth ever stretched;  
That after last, returns the first,  
Though a wide compass round be fetched;  
That what began best, can't end worst,  
Nor what God blessed once, prove accurst.

## ROUGHAGE FOR COWS.

Discussing the roughage problem of feeding dairy cows, C. C. Hayden, in a monthly bulletin of the Ohio Station, says:

"Relatively, the roughages, such as the hays, stover, etc., are much cheaper than the grains. This is due mainly to the large hay crop and the small demand for it.

"Hay is of unusually good quality. Since this is true, the roughages should be used to the limit of the capacity of the animal to be fed. That statement is not meant to imply that roughages should be fed exclusively. Exclusive feeding of timothy hay and corn is likely to lead to compaction and death even in dry cows and heifers. What is meant is that they should be used as far as possible within the limits of 'safety first' and profit. A further word of caution is needed

here. Many farmers, with a few cows and limited means, feed their cows through the winter on timothy hay, stover and soft corn, or 'nubbins.' This is not economy. If the only grain fed is corn the roughage should consist of alfalfa hay, soy-bean hay or a combination of one of these with clover hay.

"Lucky is the man who has the legumes or can buy them at present farm prices. Choice alfalfa hay at \$20 per ton is much cheaper than bran at \$30 per ton. There are experiments on record which show a production of 3,000 to 9,000 pounds of milk per cow annually, with large cows, on corn silage or green corn and alfalfa hay. Soy-bean hay comes in the same class with alfalfa, and clover comes next in the list. With corn at \$1 per bushel, choice clover hay should be worth about \$20 per ton, or at least \$5 per ton more than is at present quoted on

the market, and twice as much as is being paid to the farmers for it. (This ratio may be changed by the time this article reaches the reader.) These statements do not mean that clover is equal in value to alfalfa hay; with farm grains, alfalfa is worth 20 per cent more.

"Although, in the past, the use of timothy hay has not been recommended for milking cows, it can be used to reduce the amount of such grain as corn and hominy feed, which are now nearly or quite as high as the high-protein grains which must be used with timothy. Recently a farmer delivered a load of mixed hay in Wooster for which he said he was to receive \$5 per ton. This is an absurdly low price, even at the farm barn. It is almost worth that for fertilizer, and probably cost the larger part or all of it for labor and land rental. The price of hay this year is a good example of what an over-production does to the price of any commodity. While it is good for those who must buy it, it is not good for those who must sell. Hay costs less than last year, in the face of the great advance in the prices of other feeds.

"No man can plan his crops to meet all emergencies that may arise, but, if we practice looking ahead and even guessing what the conditions will be, many rough places can be smoothed over."

## RADIATOR CURTAIN FOR WINTER.

During the winter months the motorist will find his car much easier to start if a radiator curtain is provided. Keeping the motor reasonably hot will also add to the fuel economy. A convenient curtain may be constructed as follows: Take a strip of lumber a half inch thick and two inches wide, and as long as the width of the radiator. Near each end mount a shade-roller bracket. Cut a curtain roller to fit the brackets and fasten the curtain to it. Attach the strip near the bottom of the radiator with two small bolts. Fasten a strong cord to edge of curtain and run through radiator under hood and pass through a hole in the dash. Now fasten a small ring in the end of cord. To provide for different adjustments, screw several hooks into the dash at intervals, over which the ring may be slipped. When going toward a brisk wind the curtain may be set to shut out most of the air.

H. G. O. Lindsay, of Eaton, Colorado, brother of Dr. A. H. Lindsay, who has been in the South, prospecting, left this morning for his home.

Mrs. J. Wilson Boyle, left this morning for Hereford, where she will visit Mrs. J. C. Murphy.

Jack Alley, of Runningwater, is here today on business.

Despite the fire which destroyed their printing plant, the Avalanche Publishing Co., of Lubbock, mailed their usual edition on time this week, the printing being done in the plant of The Tulia Herald.

## RESOLUTION OF RESPECT.

Plainview, Texas,  
February 1st, 1917.

The Plainview Bar Association met in called session on the above date to honor the memory of their late associate, Judge J. E. Lancaster; Judge R. C. Joiner presiding. Whereupon a committee to draft resolutions of respect was appointed by the chair, which committee presented to the meeting the following resolutions: "WHEREAS the all-wise Creator, in His infinite wisdom, has decreed that our brother, Judge J. E. Lancaster, be with us on earth no more; "BE IT RESOLVED, that we have

lost a true and high-minded advocate, and that society and the State has lost a most worthy member and citizen.

"We tender our heart-felt sympathy to his bereaved relatives and join them and his friends in mourning his loss.

"Realizing we have lost a man among men and one whose place cannot be filled, we offer this our farewell tribute to his memory:

"Y. W. HOLMES,  
"P. B. RANDOLPH,  
"W. B. LEWIS,  
"Committee."

Whereupon, by motion duly made and seconded, the foregoing resolution was unanimously adopted, and it was ordered that a copy be furnished papers in Plainview and Waxahachie; and that same be spread upon the Minutes of the District Court of Hale County.

R. C. JOINER, Chairman;  
Y. W. HOLMES, Secretary.

## DYE DRUG COMPANY

Phone 23 THE REXALL STORE West Side Square

Price of this Chalmers today, \$1090  
Price beginning March 1st, \$1250  
Net Saving, \$160

## YES, THIS IS THE CAR

A 5-passenger beauty, saves you \$160, if bought today

Not all people prefer this kind of car. Perhaps only eight out of ten people do.

To make sure that it will suit you and yours, come and let an experienced and highly intelligent man show you some of the many things that stand out and make a Chalmers a Chalmers.

### Take the Motor, for Example

It is the most famous and most used of all Chalmers motors. It has high power capacity.

That, certainly, is a logical and extremely sensible type of motor to own. It is never under a strain. At 45 and 50 miles an hour it is using only a part of its power.

### It Saves Itself

And in so doing, saves many a dollar. Conservation of energy means conservation of fuel.

Watch your gasoline bills go down when you drive this Chalmers!

Better see the motor first. It is the most important thing. But in your enthusiasm, don't miss one other feature:—the dimensions of the body. There are four inches more room in the

front compartment than you really need, and eight inches surplus leg room in the rear compartment.

Note the rear seat cushion. It is three inches wider than it needs to be. Every dimension in the body seems decidedly generous.

### These Are Mere Hints, However

It would be quite impossible to describe the 6-30 5-passenger Chalmers, and you have no way of knowing whether this Chalmers suits you without seeing it.

That makes necessary a trip to the Chalmers salesroom!

If this Chalmers does suit you, then you won't have to be reminded of the \$160 saving—the item is far too important.

The 2-passenger Chalmers roadster, built on the same chassis, advances, in price \$180 on March 1.

### Present Prices

Five-Passenger Touring	- \$1096	Seven-Passenger Sedan	- \$1850
Two " Roadster	- 1070	Seven " Limousine	- 2550
Seven " Touring	- 1350	Seven " Town Car	- 2550

(All f. o. b. Detroit)

## CONNELL MOTOR CO.

W. W. CONNELL, Manager  
North Room Donohoo-Ware Hardware Co. Bldg.

Telephone 113

# SOCIETY

Telephone Number 72

## ANNOUNCEMENTS.

Services will be held at the Catholic Church Sunday, February 18.

The Wednesday Bridge Club will meet Wednesday with Misses Marie and Daisy Gidney.

Thursday evening Miss Della Ansley will entertain the Wesley Philathea Class, at her home, 612 West Eighth Street.

## WORKING WOMAN'S CLUB.

The Working Woman's Club met Friday afternoon at four o'clock, in the Central School Building.

Miss Clara Hooper, assisted by Miss Mary Gilbert, gave a lesson and lecture. Her lecture was on proteins. She illustrated the lecture with preparation of eggs and milk.

The members of the club talked about organizing a sewing class for young girls. Cocoa was served.

## DAISY CLUB HAS MEETING.

Mrs. A. E. Harp entertained the Daisy Club Saturday afternoon, at her home, 710 West Eleventh St.

Five Hundred was played during the afternoon.

Besides the club members, the Misses Daisy Gidney, Louise Donohoo, Madge May and Eula Mae Peace were present.

A salad course was served.

## METHODIST MISSIONARY SOCIETY PROGRAM FOR WEDNESDAY.

The following program will be rendered by the Woman's Missionary Society at the Methodist Church Wednesday, February 14, at 2:30 p. m.:

- Song.
- Prayer.
- Business session (30 minutes).
- Subject—"Women of Japan."
- Scripture—Matt. 16:24-25; Luke 18:28-30.
- 1. "Does Japan Need Missionaries?"—Mrs. McDonald.
- 2. "Evangelistic Women Workers in Japan"—Mrs. Pickett.
- 3. "Self-Support in Japan"—Mrs. Hunter.
- 4. "Japanese Bible Women and Their Work"—Mother Harp.
- 5. "Signs of the Coming Kingdom in Japan"—Mrs. Lamb.
- 6. "Desperate Need of Re-enforcements"—Mrs. Jordan.
- 7. "The Hindered Christ"—Mrs. Clark.

## WILLIAMS-BAIN.

On Saturday evening promptly at eight o'clock, at the First Baptist Church, Miss Ethelyn Lee Williams was united in marriage to Mr. Frank P. Bain, of Silverton. Simple decorations of ferns and pot plants adorned the church, where a few relatives and immediate friends had been invited to witness the ceremony.

Mrs. E. R. Williams accompanied on the piano and Mr. Rupert A. Crabb on the violin as Mr. Geo. Hutchings sang "O Promise Me." Then a professional Lohengrin wedding chorus was sung by a double quartette, composed of Misses Ophelia Donnell, Ethel Thomas, Kathryn Powell and Lena Williams and Messrs. Ernest Fowler, Geo. Hutchings, T. Stockton and W. A. Todd. These preceded the bridal couple and grouped at the side of the altar.

The bride and groom entered together and were unattended. Rev. J. E. Gates met them at the altar and said the ring ceremony, at the conclusion of which the young couple knelt for his prayer. Mr. Crabb and Mrs. Williams softly played "The Song of the Evening Star," from "Thanhauser," during the ceremony, and Mendelssohn's "Wedding March" as a recessional.

The bride is the younger daughter of Dr. and Mrs. Geo. J. Williams, and has spent her young womanhood in this city. She is a graduate of Plainview High School, and further pursued her course of study in Canyon Normal and Chicago University.

The groom is the son of Mr. and Mrs. J. A. Bain, of Silverton, and is assistant cashier of the First National Bank of Silverton.

Mr. and Mrs. Frank Bain left immediately after the ceremony for their new home, in Silverton.

The bride's wedding gown was of silver cloth with overdress of tulle, embroidered in silver. She wore a short veil caught with orange blossoms and carried an arm bouquet of white Killarney roses. Her going-away suit was dark blue French serge with stitchings and trimming of white, and hat, boots and gloves to match.

The young ladies in the chorus wore white evening dresses of tulle, trimmed in brilliants and silver.

The out-of-town guests were: Mr. and Mrs. J. A. Bain, parents of the groom, and son, Walter Lee Bain; Mr. and Mrs. Turner Stevenson, Mr. and Mrs. Earl Cowart, all of Silverton; Miss Lula Goode, Tulsa; Miss Ethel Thomas, Scranton; Austin F. Anderson, Ralls, and Charlie Spencer, Floydada.

## HINES-BURKETT.

Miss Mae Hines, of Dallas, Texas, and Jake Burkett, of this city, met at Sweetwater Thursday evening and were married there at 11:20 o'clock. They returned to Plainview and will make their home here. Mr. Burkett is in the tailoring business.

## CENTRAL MOTHERS' CLUB PROGRAM FOR FEBRUARY 23.

The Central Mothers' Club will meet at the Central School Building Friday afternoon, February 23, at three o'clock. The week following this meeting has been set apart as a "National Week of Song," and the pupils are preparing the following program of old and national songs for the club:

- Song—"America."
  - "Talk on the National Week of Song"—Mrs. S. W. Meharg.
  - American Folk Songs and Negro Melodies—By 6th and 7th Grades.
  - "Auld Lang Syne" and "Annie Laurie"—By 6th Grade Girls in Scotch Costume.
  - "The Star-Spangled Banner," "Battle Hymn of the Republic" and "Tramp, Tramp, Tramp"—4th and 5th Grades.
  - "Columbia the Gem of the Ocean" and "Home, Sweet Home"—By Primary Grades.
  - Social Hour.
  - Business.
- Most of the playground equipment provided for by the Mothers' Club is being used now, and every mother and patron is urged to be on the ground during the recess from 2:30 to 3 o'clock Friday and observe a "practical demonstration" of the apparatus.

## JUNIORS HAVE PARTY.

The Junior Class enjoyed the evening Friday at the A. F. Quisenberry home. Contests and music were enjoyed. Punch and cake were served to the forty boys and girls present.

P. L. Hancock, of Silverton, was here yesterday on business.  
H. A. Ciapp, of Collegeport, Texas, is here on business.

## LAMAR MOTHERS' CLUB.

At a well attended and interesting meeting of the Lamar Mothers' Club Friday, February 9, Mrs. Taylor, Mrs. Hunter and J. W. Campbell made good talks on relation of home and school, in addition to the regular program.

After the program the regular business was taken up. It was decided to have a school program for the 22nd of February. The first four grades are to have one program; then the three higher grades are to have one. It was further decided to charge for these two programs—adults ten cents and children five cents for each program. After the programs there is to be a tree planted, with proper ceremonies, by the whole school. The mothers are also going to sell candy on this occasion. All the money made on this day is to go for playground equipment.

The club also decided to buy for the school a "Garden City Model" Playground Slide. This slide is to be seven feet high, fourteen feet long and weigh two hundred pounds. This one is to be tried out, and if it is liked others will follow soon.

The next meeting will be on the second Friday in March.

## WAYLAND COLLEGE NOTES.

The violin recital given in the College chapel Friday evening by Professor Crabb, assisted by Miss Ophelia Donnell, was a pronounced success. Every number on the program was rendered to the pleasure and entertainment of all. Lovers of music who were present say this was a treat, and that those who were not in attendance certainly missed a rare treat. We welcome such recitals, and hope these teachers will favor us again soon.

President R. E. L. Farmer filled his regular appointment Sunday at Kress. He reports that that church has subscribed over \$500. to the Wayland College fund. Brother Farmer was on the job early Monday morning. He does not expect to slight anyone who ought to contribute.

The Wayland basketball team leaves today for Abilene. They will play four games in that city—two with Simmons College and two with the Abilene Christian College. On their return home they will play the Post City team.

Prof. J. E. Willis and Prof. J. E. Watson went to Whitfield Sunday in the interest of the College. Professor Willis spoke there Sunday morning at eleven on Christian Education. They report a good collection for Wayland.

There is to be a students' recital in the College chapel Friday evening.

## TEXAS RICE AS GOOD AS FOREIGN PRODUCT.

The College of Industrial Arts' Foods and Cookery and Dormitory Dietetic Departments, according to a news note from Denton, have been experimenting with Texas rice the past two weeks, and have made some very interesting tests in common recipes, using both the South Texas rice and the foreign brand, in order to observe the different results obtained. Of interest, in connection with the State-wide "Buy-It-Made-in-Texas" movement is the college announcement concerning these observations:

"Miss Ingram, State Dormitory Dietitian, states that the foreign rice is of a more symmetrical shape, the Texas rice being shorter and slightly more unevenly formed. The home product, however, she states, is of a better flavor. It absorbs more water in the cooking, but this does not seem to affect the dish when prepared."

The announcement adds that rice, served in many savory recipes, is a favorite dish at the dormitory, being eaten with a relish once or twice or oftener each week. It is cooked in combination with meat, cheese, tomatoes, stewed apples and cream, and in puddings. One of the favorite dishes with the students is Turkish Pilaf, made by the following recipe:

"Wash and drain half a cup of rice; brown in a tablespoon of butter; add a cupful of hot water, and steam until water is absorbed. Then add one and three-fourths cupfuls of hot stewed tomatoes, cooking until the rice is soft. Season with pepper and salt. A bit of onion cooked with it adds to the flavor."

A. B. Spencer, of Crosbyton, was here Saturday on business.

Barnett O'Bryan, of Hale Center, was here on business yesterday.

Dudley Kennedy, Jr., representing the West-Cullum Paper Co., of Dallas, was in Plainview on business yesterday.

Mr. and Mrs. R. S. Beard, of Littlefield, are visiting W. L. Harrington and family for a short time.

D. C. Lowe was in Silverton on business Saturday.

**EFFICIENCY OF MODERN AUTO FACTORY IS MARVELLOUS.**

Parts Manufactured and Tested by Automatic Machinery With Lightning Rapidity.

"There was a wonderful collection of cars at the Automobile Show in Chicago," said T. B. Carter, who, in company with Mrs. Carter, attended the national show and visited the Dodge Brothers plant while in Detroit, Mich. "The biggest sensation of the show was the Doble Steam Car. It is certainly a novelty in automobile construction. It will not be placed on the market for a year yet. Its general principles are somewhat in keeping with those of the White and the Stanley steam cars. The power plant is connected directly with the rear axle. It is generally understood that the car will sell for about \$2,500 when placed on the market.

"The disappearing top and concealed spare tires of the Pathfinder, the novel spring suspension of the Marmon, the double power-range of the Peerless, the Owen magnetic-drive car, the Woods gas-electric cars and one or two cars having a double set of valves as used in the racing cars were interesting things seen at the show. Probably the most pronounced tendency in car construction is the leaning toward battery ignition.

"I was surprised to learn that the Dodge Brothers Company have advanced from sixth to third place in the automobile industry during the last quarter of 1916."

Mr. Carter visited the Dodge Brothers factory while away. "The automatic machinery in this great plant is marvellous," he said. "Great bars of vanadium steel are placed in the machines and at the other end perfected parts of all kinds are delivered. The efficiency of the thundering machines, moving with lightning-like rapidity, is wonderful."

**SELF PRESCRIBER OF DIET OFTEN HAS FOOL FOR A PATIENT.**

"Pray, Mr. Abernethy, what is a cure for gout?" was the question of an indolent and luxurious citizen.

"Live upon sixpence a day, and earn it," was the cogent reply.

John Abernethy, second son of a Scotch-Irish family, born April 3, 1764, a physician of rare discernment, a surgeon of great skill, a lecturer, and teacher of dramatic magnetism, never said a better thing in his life. It is particularly apt in this country, where the sin of overeating is far more common than the sin of overdrinking. Gluttony, always a fault, is all the more glaring in a land where a plentiful food supply permits it to be more general. The sallow, fat cheeks, the aching joints and irascible temper of the prosperous over-fed are far too common. Abernethy said to one such, the Duke of York, by the way, "Cut off the supplies as the Duke of Wellington did in his campaigns, and the enemy will leave the citadel."

Diet, however, is a really serious matter, and many people suffer as much from dietary eccentricities and food fads as from actual disease. The average individual can eat good, plain, wholesome food in moderation all his life without ever being aware that he

has a digestive apparatus. Starvation to cure a fancied ailment or to reduce an expansive waist line has shortened many lives, just as indiscretion in the opposite direction. Certain diseases do require a particular diet, but this should be chosen by a physician of skill and not self prescribed. The self prescriber often has a fool for a patient.

Abernethy was married on January 9, 1800, to a lady whom he met at the house of a patient. A brief courtship was followed by a proposal by letter, giving the lady a fortnight in which to make up her mind and deprecating any "dangling." He was not as temperate with regard to work as he was to food. He did not even interrupt his lectures for his wedding, and died at the age of 67, completely worn out, a victim of his gluttony for work.

**NOTICE OF SALE OF REAL ESTATE**

Notice is hereby given that, whereas, on the 2nd day of January, A. D. 1917, in the suit of Texas Moline Plow Company vs. W. A. Miller and wife, Mrs. N. J. Miller, and Lee Dye, No. 23183-B, on the docket of the District Court of Dallas County for the 44th Judicial District of Texas, the Texas Moline Plow Company, a corporation, recovered a personal judgment against W. A. Miller for the sum of \$2,938.89, with interest at ten per cent per annum from January 2, 1917, and costs of suit; and,

WHEREAS said Texas Moline Plow Company, in said suit, also recovered a judgment against W. A. Miller, his wife, Mrs. N. J. Miller, and Lee Dye, foreclosing a deed of trust lien as it existed on the 15th day of December, 1914, and on all days thereafter, on the following described property as the property of W. A. Miller and Mrs. N. J. Miller, namely:

An undivided one-fourth interest in parts of lots Nine and Ten, in Block Thirty, in the town of Plainview, Hale County, Texas, as shown by map of said town, recorded in Book IHE, pages 372-374, deed records of said county, beginning at a point in the south line of lot 9, 56 feet east of the southwest corner; thence north across lots 9 and 10, 100 feet to a point in the north line of lot 10; thence east with said north line 29 1/2 feet; thence south 100 feet to a point in the south line of lot 9; thence west with said south line to the place of beginning, together with all improvements on said land, and the fixtures contained in and attached to the building located thereon, including all the seats in said building; and

WHEREAS an order of sale issued out of said District Court of Dallas County on the 30th day of January, A. D. 1917, commanding the sheriff or any constable of Hale County to seize and sell the above-described property, and apply the proceeds of the sale to the payment of said judgment in favor of the Texas Moline Plow Company;

NOW, THEREFORE, I, J. C. Terry, sheriff of Hale County, Texas, have seized said above described property by virtue of said order of sale, and will offer said property for sale at the Court House door in Hale County on the 6th day of March, A. D. 1917, same being the first Tuesday in said month, between the hours of ten o'clock a. m. and four o'clock p. m. on said day, at public auction, for cash in hand, and

will apply the proceeds of said sale to the payment of said judgment, interest and costs, and will place the purchaser or purchasers of said property in possession thereof.

Witness my hand this 5th day of February, A. D. 1917.

J. C. TERRY,  
Sheriff of Hale County, Texas.

**ANNOUNCEMENTS.**

I hereby call a meeting of the Ex-Students of the University of Texas of Hale County for Saturday afternoon at two o'clock, at my office, in the Grant Building. The purpose of this meeting is to arrange for the annual March 2 banquet.

H. C. RANDOLPH,  
President.

**VALENTINE BOX SUPPER.**

Friday night, February 16, at the City Hall, by the young ladies of the Christian Church. Living Valentines and a box of lunch with each will be auctioned. No box over seventy-five cents. Hot chocolate served. Everybody cordially invited to come and have a good time. From eight to ten o'clock. Adv. 1t-pd.

**ANNOUNCEMENT**

WE are pleased to announce to the public of the Plainview trade territory that we have purchased the Gordon Grocery Co. stock and will continue the business of selling groceries at low prices at the old stand in the Dorsett building. We earnestly solicit the continued patronage of Mr. Gordon's former customers and trust that we will be able to attract others thru fair dealing, good goods, and prices that are right. Come in, let us meet you, and show you what we are offering.

**Dalrymple Grocery Co.**

**Announcement**

We have established an automobile repair shop in the building formerly occupied by the Plainview Planing Mill, one door west of Waller Tailoring Co. In so doing we invite your patronage and assure you that you may expect expert repair work.

We will also have in stock a complete assortment of approved automobile supplies and accessories, and will appreciate your inspection of our stock and facilities.

We are exclusive agents for the Inland Leak-Proof Piston Rings and Master Carburetors.

Mrs. Mais will be in charge of our office and we will be pleased to meet and get acquainted with all automobile owners.

**J. A. MAIS COMPANY**

**The New SERIES 18 Studebaker Cars—FOURS and SIXES**

Studebaker has centered its great resources and experience on ONE BASIC DESIGN, with all parts interchangeable for both the FOUR and SIX, except the motor. One equipment of machinery, tools, character of manufacturing operations and quality of material suffices for both models.

No revolutionary changes have been made in the basic Studebaker design for four years. The same group of EMINENT ENGINEERS AND DESIGNERS are responsible for the evolution of the new Series 18 models, yet the many improvements and refinements adopted as the result of our experience have made these new models decidedly the best cars we have ever produced. They are sold with our guarantee of prompt and efficient service and the replacement without charge for defective parts, if any are developed, within one year from date of sale. We guarantee our cars to give absolute satisfaction, provided they receive the care a highly developed piece of machinery should receive.

The Series 18 cars are leaders in the industry, history makers, which put Studebaker in the lead with new and greater values at popular prices. Studebaker has led the way in nearly every forward step in automobile construction in which the owner profited. STUDEBAKER WAS THE FIRST.

- to produce a six-cylinder car selling for less than \$2000;
- to produce a 50-horsepower car selling for less than \$2000;
- to produce a seven-passenger car selling for less than \$1000;
- to establish a uniform, international service system for owners;
- to produce the now popular crown fenders;
- and, finally, Studebaker was the first manufacturer of FINE CARS to offer its product at medium prices, thus leading the way to greater values and compelling other manufacturers to increase values and reduce prices.

Studebaker has \$13,000,000 invested in the most efficient and modern plants in which it manufactures all of its engines, axles, transmissions, differentials, bodies and tops. Middlemen's profits (parts makers) included in the price of assembled cars and small manufacturers' cars are almost entirely eliminated in Studebaker selling prices. It is necessary to pay from 50 per cent to 100 percent more than Studebaker prices for cars of corresponding value.

I will soon be located in new brick third door north of Plainview Machine and Auto Shop. WILL TRADE NEW CARS FOR LIVESTOCK

Established in 1852  
South Bend, Ind. Detroit, Mich. Walkerville, Ont.

**This Is the Chalmers 5-Passenger 6-30**

Needless to ask you what price you want to pay for this attractive car. You very much prefer the present price, \$1090. For beginning March 1, the price will be \$1250. \$160 is a good saving—certainly enough to make any man accelerate his purchase on such an attractive value as the Chalmers. Well balanced. Easy to drive. Easy on tires. Economical of gasoline and oil. Big. Comfortable. Roomy. Sound. Good from end to end.

On the 2-passenger roadster there is a saving of \$180. The present price, \$1070, becomes \$1250 on March 1.

Present Prices			
5-passenger Touring	\$1090	7-passenger Sedan	\$1850
2 " Roadster	1070	7 " Limousine	2550
7 " Touring	1350	7 " Tows Car	2550

**Why Not Let Herald Want Ads Work For You?**

Here is what Mrs. Austin Vaughn of Abernathy, Texas, says of a want ad which cost her 69c:

"Abernathy, Texas, February 9th, 1917. Plainview Evening Herald:

I had such good results from the ad I put in your paper about my chickens am sending another. I sold all I had to spare through the ad. I want these two put in two weeks each. They come to 46c each insertion and two publications of each will be 92c. Am enclosing check for same, and oblige.

MRS. AUSTIN VAUGHN."

Ask anyone who has used Herald want ads what he thinks about their pulling power. The fact that you see the same advertisers coming back with more want ads is a mighty good indication.

**GOOD MILK COWS**

For sale, at my farm, east of Plainview. Can show them any time. Any one desiring to buy cows would save money by seeing me. W. C. CLEMENTS. *4t.*

**EVER SALIVATED BY CALOMEL? HORRIBLE!**  
Calomel is Quicksilver and Acts Like Dynamite on Your Liver.  
Calomel loses you a day! You know what calomel is. It's mercury; quicksilver. Calomel is dangerous. It crashes into your bile like dynamite, cramping and sickening you. Calomel attacks the bones, and should never be put into your system.

When you feel bilious, sluggish, constipated and all knocked out and believe you need a dose of dangerous calomel, just remember that your druggist sells for 50 cents a large bottle of perfectly harmless and doesn't gripe. Dodson's Liver Tonic, which is entirely vegetable and pleasant to take and is a perfect substitute for calomel. It is guaranteed to start your liver without stirring up your inside, and can no salivate.  
Don't take calomel! It makes you sick the next day; it loses you a day's work. Dodson's Liver Tonic straightens you right up and you feel great. Give it to the children, because it is perfectly harmless and doesn't gripe.

Whenever You Need a General Tonic Take Grove's  
The Old Standard Grove's Tasteless chill Tonic is equally valuable as a General Tonic because it contains the well known tonic properties of QUININE and IRON. It acts on the Liver, Drives out Malaria, Enriches the Blood and Builds up the Whole System. 50 cents.

**YES! LIFT A CORN OFF WITHOUT PAIN!**  
Cincinnati Authority Tells How to Dry Up a Corn or Callus So It Lifts Off With Fingers.  
You corn-pestered men and women need suffer no longer. Wear the shoes that nearly killed you before, says this Cincinnati authority, because a few drops of freezone applied directly on a tender, aching corn or callus stops soreness at once and soon the corn or hardened callus loosens so it can be lifted out, root and all, without pain.  
A small bottle of freezone costs very little at any drug store, but will positively take off every hard or soft corn or callus. This should be tried, as it is inexpensive and is said not to irritate the surrounding skin.  
If your druggist hasn't any freezone tell him to get a small bottle for you from his wholesale drug house. It is fine stuff and acts like a charm every time.—Adv.

**The Quinine That Does Not Cause Nervousness or Ringing in Head**  
Because of its Tonic and Laxative effect, LAXATIVE BROMO QUININE can be taken by anyone without causing nervousness or ringing in the head. It removes the cause of Colds, Grip and Headache. Used whenever Quinine is needed.  
—but remember there is Only One  
**"Bromo Quinine"**  
That is the Original  
**Laxative Bromo Quinine**  
This Signature on Every Box  
**E. W. Grove**  
Used the World Over to Cure a Cold in One Day. 25c.  
Maker also of the Old Standard Grove's Tasteless Chill Tonic

**Cold Days Require Coal**  
Why is it that some folks always delay their coal buying and the installing of their stoves until the last minute when every member of the family has run the risk of serious cold or pneumonia and until all of the coal and stove dealers are so busy they cannot give the best service? Surely the wise man will not be caught in a blizzard with his coal supply not yet laid in.  
We have the supply of coal, we have the prompt service, and the prices are lower now than they will be when winter gets here. Isn't it good health insurance, isn't it good business, isn't it the sensible thing to do to place your order now?  
Just phone us at 162 and we will do the rest.

# More White Things, More Fashions, More Fabrics, More 1917 Cheeriness and Sunshine All Over the Store

## NEW FASHION FEATURES OF THE Suits, Dresses and Coats

Oddly set-in sleeves and yokes in the Sport Dresses.

Shirred belts and a great deal of hemstitching.

Full sleeves with flaring turned-back cuffs, and long sleeves which are distinctly Medieval, and bell sleeves.

Dangling buttons and tassels, close braiding forming heavy borders.

Tiny buttons used as decoration. Chain girdles.

Delicate colors — gold, gray, blue, beige and maize; and besides these, the strongest, most vivid colors imaginable.

Full pockets in the Sport Suits. Tiny sashes-like straps, beaded or fringed.

Coarse, creamy laces, and some of filet.

Waist lines high and low—MOSTLY LOW.

Ladies' Coat Suits, \$16.75, \$25.00, \$39.75 up to \$65.00.

Ladies' Dresses, \$15.00 to \$35.00.

Ladies' Coats, of Wool and Silk Jerseys and Fancy Sport Colors, \$15.00, \$17.50, \$18.75 up to \$30.00.

## Gayer and Gayer Grow the Sport Skirts for Women

They actually are fairly startling until one remembers the still brighter colors. They cost from \$10.00 to \$30.00, and include Vecuna Block with Velour Stripes in green and black.

Prunella Cloth with gold, blue and navy stripes, cut horizontally and vertically.  
Vart-colored Plaid Serges.  
Solid-colored Velours in pastel shades and with huge sport pockets.  
Paisley in the rainbow of colors.

Black-and-white Plaids with white inside pockets.  
Pastel Plaids in Velour.  
Roman-striped Prunella Cloth.  
Wool Jersey Skirts in pastel colors — some with contrasting shades in their pipings.

There are spots of new beauty all over the store—rays of Southern sunshine—new Sports, Silks and Spring Cottons; distinguished new High and Low Shoes; new Spring Outfits for Children; Men's Shirting and light-weight Suiting ready to be made up for Spring wear.

## Women Who Wear Gossard Corsets Will Wear Them Always

Gossard Corsets are true exponents of art as applied to the human form. They confine the hips and preserve the long, slender lines from the waist to the knee. They give the low, gradual slope to the bust line which is so essential with the present fashions. Just the Corset every fashionable woman desires. Prices, \$2.00 to \$10.00.

## Hatching Next Winter's Layers

From an Article Written by T. J. Conway, Assistant Professor, Poultry Husbandry, Agricultural and Mechanical College of Texas.

The poultryman and farmer must depend on pullets for their winter supply of eggs. These should be matured and in good condition before the beginning of cold weather to obtain best results, and must be obtained from chicks hatched in March and April, which have been properly reared, while good stock and carefully selected eggs are all important. Hens laying large eggs are preferable, although overly large ones are not desirable. The size of the egg determines the size of the chick and the size of the egg it will lay; the shape has a pronounced effect on the developing embryo, while color is an inherited characteristic of the breed and affects hatching; therefore, select large eggs, of uniform size and shape, and all of the same color, with shells of good texture. Brown

eggs hatch from twelve to twenty-four hours later than the white, so it is not advisable to mix them. Eggs with shells that are pebbled should be culled, and thin-shell eggs should be avoided, as they break easily when turned, while evaporation takes place faster and poor hatches result.

Rigid and constant selection of hatching eggs along the above lines will result in uniformly good chicks and a large number of them, and since these characteristics are inherent, a flock will be developed in a few years in which the hens will lay uniformly large, well shaped, evenly colored eggs of strong shell texture, while culling will be reduced to a minimum. Every increase for more desirable products means increased profits for the owner, as the markets are paying a premium for large, uniform eggs.

### THE DIFFERENCE.

Kansas City Star: "To The Star: A good many people seeking to justify in their own minds President Wilson's action in breaking with Germany over her sea policy are finding a stumbling block in his acceptance of Britain's blockade. Hasn't Britain marked off a war zone, too, and doesn't she seize every American ship that invades it? Britain's blockade has cut our commerce with Holland, Sweden and Denmark one-half, and we have scarcely even protested. But when Germany attempts to retaliate against Britain's starvation blockade with the same weapon the United States sends her Ambassador home. Is this totting fair between the combatants? E. R. G."

The difference between the British and German blockades is easily stated and in few words. The British blockade is physical and effective, and therefore valid under international law; it is directed against contraband cargoes, and not against the lives of neutrals, and it is conducted under the legal sanction of prize courts. The German blockade, or rather its declaration of intention to blockade, makes no pretense to observe the rules prescribed in the Declaration of Paris, to which Prussia was a subscriber in 1856. It proposes not to establish a cordon around British ports and seize and condemn as prizes ships that try

to enter with contraband cargoes, but to loose submarines over wide areas of the high seas and sink indiscriminately and without warning the ships of all nations found within such zones. The crews of such vessels are to have no chance for their lives and their owners no chance to establish their rights in prize court.

The German declaration is recent enough to be remembered. It is summed up in one sentence, "All ships met within the zone will be sunk." The British declaration of blockade made in a note to the Government March 15, 1915, probably is not so well remembered, particularly in minds "seeking to justify" the American course, and it may be well to repeat its terms. Sir Edward Grey wrote: "The Government of Great Britain has frankly declared, in concert with the Government of France, its intention to meet the German attempt to stop all supplies of every kind from leaving or entering British or French ports by themselves stopping supplies going to or from Germany. For this purpose the British fleet has instituted a blockade, effectively controlling by cruiser cordon all passages to or from Germany by sea. The difference between the two policies is, however, that, while our object is the same as that of Germany, we propose to attain it without sacrificing neutral ships or noncombatant lives or inflicting upon

neutrals the damage that must be entailed when a vessel and its cargo are sunk without notice, examination or trial. I must emphasize again that this measure is a natural and necessary consequence of the unprecedented methods, repugnant to all law and morality, which have been described above, and which Germany began to adopt at the very outset of the war, and the effects of which have been constantly accumulating."

Germany's methods of blockade never had the shadow of validity, and as much was tacitly admitted when the German Government announced that it would abandon them after the sinking of the Sussex. The American Government had then notified the German Government that the continuance of diplomatic relations was dependent upon that abandonment. Now, after nearly a year, the German Government serves notice of the withdrawal of its pledges and its purpose to resume, without restriction, its illegal and inhuman methods of sea warfare. The United States took the only action it could take under its former notice, and is not only totting fair as between the combatants, but with its own citizens, whose lives and property were threatened.

### ADDED EVIDENCE OF PROSPERITY

Every day brings evidence that the American public are willing to pay for the things the people really want.

For many months newspaper and magazine publishers have been hard pressed, because of the tremendous increase in the price of white paper. In many cities one-cent newspapers have raised their price to two cents, without any appreciable falling off of circulation, but the most striking example of the public's willingness to pay an increased price for a better product occurred last month, when the publishers of Cosmopolitan, America's Greatest Magazine, determined that, instead of cutting the quality of the magazine, they would print an even better magazine and increase the price.

Over a million people have been buying Cosmopolitan for many years at 15c a copy, and, with the greatly improved February issue more paid 25c for Cosmopolitan than had ever in its history purchased the magazine at 15c.

How such a magazine can be produced, sold for 20c and pay a profit to the producers is a modern industrial problem, especially when the editor has among his writers Gouverneur Morris, Robert W. Chambers, John

Galsworthy, Jack London, Edith Wharton, Owen Johnson, Elizabeth Robins, Amelie Rives and Elinor Glyn. The magazine is profusely illustrated by the greatest of modern artists, and its tremendous sale is only added proof of the American public's thorough appreciation of a quality product at any price.—Adv.

### KANSAS CITY STOCK MARKET IN DETAIL.

KANSAS CITY STOCK YARDS, Feb. 9.—Cattle sold a little higher Monday, but steers lost their gain, butcher grades firm, stockers and feeders 15 to 30 cents lower than the best time. Receipts for the week are 36,000, a small increase over last week and 5,000 more than same week last year. Hogs are 30 to 40 cents higher for the week, notwithstanding a break early yesterday, which has more than been recovered, receipts 62,000, 5,000 more than last week, but 13,000 less than same week last year, top today \$12.40, highest price ever paid here. Sheep receipts were 34,000, a small increase over both last week and same week last year, sheep 15 to 25 cents higher for the week, lambs 10 cents lower for the week, and 30 cents under best time, top for the week \$14.70.

### Beef Cattle.

Prime steers sold at \$12.00, and a fair number of sales at \$11.00 to \$11.35 were made, short-fed cattle at \$9.50 to \$12.50. Numerous shipments of pulp-fed cattle arrived, including steers at \$10.10 to \$11.00, bulls at \$8.00 and \$8.25, cows \$8.50, some beet-top steers at \$9.60. Several shipments of short-fed Oklahoma steers arrived and sold at \$9.25 to \$9.50, weights around 1,050 pounds. Butcher grades continue firm, extreme high price on bulls \$9.25, cows \$9.50, heifers \$11.00, the general run of butcher stock 50 cents to a dollar under these figures. Veal calves sold up to \$13.25.

### Stockers and Feeders.

Not as much competition from packers on feeding steers was in evidence this week, and country buyers got steers a little cheaper, the best feeders selling around \$9.75, others downwards to \$8.25, stock steers \$7.00 to \$8.90, with a few lots of common dogs as low as \$6.00. Stock cows and heifers are in good demand at \$6.00 to \$7.50, a few fancy heifers at \$8.00 to \$8.75.

### Hogs.

Hog scarcity in Kansas City territory is very evident, although quality continues pretty good. The market suffered a temporary break yesterday, but packers repaired all the damage

themselves, without competition from order buyers, who were not very strong yesterday. The incident shows the urgent need of packers for hogs. The market was 5 to 10 cents higher today, a load of choice hogs from Caldwell County, Missouri, selling at \$12.40, 286 pounds average, a new high top here, bulk of sales \$11.90 to \$12.30. Light receipts and keen competition here keep local prices highest on the Missouri River by a good margin.

### Sheep and Lambs.

Lambs sold up to \$14.70 Monday, and ewes to \$10.90 Tuesday, highest prices on record in these classes. Ewes, wethers and yearlings remain firm, but lambs suffered a break of 30 to 50 cents, part of which has been recovered, top lambs closing the week worth \$14.40. Feeding lambs sold up to \$14.15 Tuesday, but are off 35 cents from the high point. The market has good capacity. J. A. RICKART.

Jno. A. Porter, vice president of the Texas Utilities Co., is in Plainview on business.

R. C. Henry, Roy Spodgrass and H. R. Thompson, of Floydada, were here Saturday on business.

Mrs. C. J. Wheeler, of Yampa, Colo., who has been visiting Mrs. J. W. Pippin, has returned to her home.

### TO SUBSIDIZE MOTHERS.

Harper's Bazar for February says: One of the most remarkable results of the war is a plan in France for subsidizing motherhood. A bill which provides for a certain sum of money to be given for the first child, and other sums for each succeeding child, is soon to be introduced. How often have we heard a father or a mother say: "Yes, we should like so much to have another child, to grow up with this one, but we cannot afford it. It will take all the money we can save to give this one a start in life." The feeling of financial responsibility for their children is deeply rooted in French parents.

Here is an idea that Americans might well thing about. But it is only one of the unusual pieces of news we find in the current issue of Harper's Bazar. As a journal which brings you the latest and most interesting news from all countries, Harper's Bazar is without a rival among American magazines.—Adv. It.

### RESOLUTIONS.

INASMUCH as it has seemed good in the sight of our all-wise and indulgent Father to take from us our beloved brother and past master, C. E. McClelland, and

WHEREAS in the death of our brother the craft has lost a faithful and zealous Workman, the community, an honorable and upright citizen, the family an affectionate husband and a devoted father; therefore be it

RESOLVED, 1st, that this lodge be draped in mourning for the term of 30 days;

2nd, That this lodge extend to the bereaved family its heart-felt sympathy and condolence in their great loss;

3rd, That these resolutions be spread upon the minutes of the lodge and a copy be sent to the family of the deceased, and that a copy be sent for publication in The Plainview Evening Herald.

Respectfully submitted,  
S. W. WADDILL,  
GEO. J. WILLIAMS,  
Committee.

### ANNOUNCEMENT.

On account of not being able to get a store room, have located temporarily my Jewelry and Optical Business in part of a building on north side of the square, second door east of the Third National Bank.

Come in and see me. My motto is "A Satisfied Customer"—whatever it takes.

Graduating from the best Optical College in the North, I use the most modern methods of examining the eyes, which insures you a fit in glasses.

Watches and clocks repaired so they will keep time, and handle only the dependable Jewelry, and at a moderate cost.

I am now a citizen of Plainview; so come and let's get acquainted. I won't let you regret it.

Respectfully yours,  
ARTHUR L. TALLEY,  
—Adv. It. Jeweler and Optician.
