BRITISH AND FRENCH CONSULT WITH DANIELS

UNITED STATES NAVY WILL KEEP ATLANTIC AND CARIBBEAN OCEAN PATHS CLEAR.

WILL RUN U-BOAT BLOCKADE

Big Merchant Fleet of Light Vessels Wilson's Plan to Get Supplies to the Allies.

WASHINGTON, D. C., April 12.—Vice Admiral Browning of the British navy and Rear Admiral De Grasse of the French navy conferred today with Secretary Daniels and Admiral Benson, chief of operations, on co-operation of the navies on conduct of the war. Both foreign commanders came to the United States on their flagships.

The first step by the United States navy in taking up its part of the war operations will be to take over the Atlantic and Caribbean path patrols hitherto maintained by British and French ships. No announcement of the result of the conference was made.

WASHINGTON, D. C., April 12.—A campaign of colossal proportions to break down the German submarine blockade and keep the entente plentifully supplied with food, clothing and munitions has been determined upon by President Wilson and his advisers as America's first physical stroke against her enemy. Unable now to send an army into the trenches, the president believes the United States can do an even greater service in the common cause against Germany by providing a great armada of merchantment to invade the undersea campaign, about which have been rallied the fading hopes of Prussian conquest.

For weeks officials have been at work on such a plan, but not until today was it revealed on how great a scale the task had been projected or how great importance was attached to it in the administration's general war program. Virtually every detail now has been completed and by fall the campaign itself will be in full swing. Many officials believe it may attain a supremacy over the submarine which will prove the decisive victory of the great war.

Wooden Merchant Fleet Planned. Quickly built, light wooden ships of 2,000 tons and upward are to make up the fleet of merchantmen, and to insure maximum construction the shipping board has enlisted the country's entire ship-building facilities, now the greatest in the world.

Already lumber interests have given assurances of an adequate supply of timber at reasonable prices. Engine manufacturers have pledged their co-operation.

The question of labor, however, is giving officials some concern, and a call may be issued appealing for patriotic co-operation by laborers to insure that the campaign against the submarine begin at the earliest possible moment. The shipping board estimates that 150,000 men will be needed to complete the building program, under which it is expected to turn out an average of three ships a day.

Expert Labor Not Needed. Volunteers for this class of public service, it is pointed out, need not be experienced in ship building, as comparatively little expert labor will be required for the type of vessels to be built.

Major General George W. Goethals, builder of the Panama Canal, has been selected to supervise the construction program.

Built for the most part of pine and fir, the ships will range from 2,000 to 3,500 tons. Most of them probably will be equipped with oil-burning engines and all will carry wireless and be armed. An average cost of about \$300,000 per ship is counted on by the board.

The first of the vessels are to be ready in about six months, and during the year following the number afloat is expected to pass 1,000.

President Wilson and the Government shipping board have had the advice of allied naval authorities, and have computed carefully the ability of the German U-boats to cope with large numbers of merchantmen. They are convinced that by quickly building ships of only 2,000 to 3,000 tons a forcing Germany to pay with a

NEW CHARTER FOR CITY HAS BEEN SIGNED BY GOVERNOR

Many New Powers Granted Government—Plainview Is Now in Class of Cities.

Plainview is no longer in the town class. The new charter, which was granted by the last Legislature and which has been signed by the Governor, grants Plainview privileges in government accorded towns of five to ten thousand population. The charter will be effective June 29.

The charter bill as enacted provides for a material increase in the territorial boundaries of the city. The corporate limits are extended in every direction, the greater extensions being to the north and west. Commencing at the railroad crossing south of J. M. Graham's home, the north boundary line of the new corporation runs east to the intersection of the road leading to the old Seth Ward College campus; thence south along the public road to the D. R. McVickers place; thence east along the north line of the Smyth and Holland tracts to Patrick Street; thence south, including part of the J. K. Milwee and W. C. Clements tracts, to a point in the railroad right-of-way close to the septic tank; thence southwest along the right-of-way to the Montgomery property located in South Plainview; thence west, including the Carter Lindsay place, to the east line of Section 41; thence north to the southeast corner of Mrs. E. F. Williamson's tract; thence west along the south boundary of this tract to the southwest corner of the cemetery; thence north along the road west of the cemetery to the draw; thence up the draw to a point about two blocks west of Wayland Baptist College; thence north to a point about three blocks northwest of C. L. Glenn's property; thence east to the Graham line first mentioned.

The new territory includes several hundred acres, upon which are located many nice residences, all of which are contiguous to the city. There is not much acreage property included.

Under the terms of the act Plainview will be placed in the class with cities the size of Abilene, San Angelo, Corsicana, Temple, Greenville, and other cities with a population of from five to ten thousand population and which have adopted special charters. New powers given the City Council are numerous, most important of which are the right to establish and maintain parks, which provision carries with it the right of condemnation; the establishment of a board of city development, and a small tax levy to provide for its maintenance; the right to establish improvement districts and the levy of a special tax therein for paving and other street improvement; the full control over the franchise rights; the right to establish market squares and market places and regulate the use thereof; regulation of meats, dairy products and other foods offered for sale, under direction of city health officer; to license, tax and regulate hackmen, draymen and other persons operating vehicles for hire; to acquire and maintain public utilities, such as waterworks, lighting systems; to assess taxes not in excess of \$2.00 on the hundred dollars' valuation.

R. A. LONG IS AGAIN PRESIDENT SCHOOL BOARD.

The new trustees for the Plainview Independent School District, J. N. Jordan, W. E. Boyd and R. A. Long, qualified yesterday afternoon for their two years' service. The board organized, electing R. A. Long president, Rev. T. B. Haynie vice president and J. P. Sander secretary. J. F. Frye was appointed tax assessor and collector for the school district.

President Long appointed the following committees: Purchasing, W. B. Martine, Rev. T. B. Haynie and W. E. Boyd; building, F. F. Hardin, E. F. Alexander and J. N. Jordan.

STORES WILL CLOSE FOR MASS MEETING MONDAY.

Practically every store in Plainview has agreed to close for the mass meeting which will be held Monday afternoon at three o'clock in the Court House on the matter of arranging for funds to buy a site to offer the location committee for the West Texas Agricultural and Mechanical College.

The county's proposition for the location of the school will be reviewed in detail at

Do We Want the A. & M. College?

Does Hale County want the West Texas A. & M. College? Answering our own question: Of course she wants it, and has every intention of getting it, if within her power.

Next Monday afternoon the citizens of Hale County will be given an opportunity of learning all the details of the plan which has been adopted by a committee appointed at previous mass meetings in Hale Center and in Plainview. At three o'clock, in the County Court room, all who are interested in the welfare of Hale County and who want to assist in getting this great school for Hale County will be expected.

The town which secures this school must offer a site. The school is not to be put on the auction block and sold to the highest bidder, but the town which offers the greatest advantages to the school in the way of central location, conditions of health, accessibility to the greatest number of students, will in all probability be the location.

To present the claims of Hale County for the location of the school is to the interest of every citizen of the county. To help in raising the money required to purchase a site of two thousand acres of land is the important work to be undertaken. The committee, which has made no general canvass of the territory, is able now to report the collection of several thousand dollars. All subscriptions are made contingent on the procuring the amount desired, and if the school is not located in Hale County, the subscriptions are not binding. Hale County wants to be ready by May 1 with a definite, tangible proposition. She wants to have the site secured by contract and the money ready to perform her contract. The mass meeting Monday afternoon is a step in the direction of preparedness for whatever may arise on the location question. If we make our proposition, we have all to gain and nothing whatever to lose. If the school is not located in Hale County the subscriptions are not binding. If the school is located here our land values will increase, our land owners and merchants will be benefited, and any increment resulting from more business and larger population will come to the general citizenship—and, of most interest, the purposes of the school will be conserved and we will be in easy reach of the school. It will mean more in the development of the life and property of the South Plains than any single thing we can conceive.

Hale County is not asking for the school altogether for selfish motives, for there is a conscientious belief that the best interest of the State will be served by locating the school on the Plains. That Hale County is pre-eminently the place for the school, if on the Plains, is generally conceded. Exclude everything but business, and Hale County needs the school, wants it, and it is to her interest to bestir herself and see that her claims are properly presented and that she meets the conditions required.

It's up to Hale County. She's big enough, resourceful enough and energetic enough to get it. Let the whole citizenship turn out Monday afternoon and discuss ways and means.

Hale County's hat is in the ring, and she generally gets what she goes after.

Hale County is the logical place for the school, but it will not be presented to us on a silver platter with the compliments of the State.

MRS. ELBERT OVERTON DIED VERY SUDDENLY THIS MORNING

She Was Apparently in Good Health; Mr. Overton's Father Died Suddenly Four Weeks Ago.

Mrs. Gladys Overton, wife of Elbert Overton, who lives near Abernathy, dropped dead this morning. She was apparently in good health and was assisting her husband, who was getting ready to leave the place with some cattle. She complained about feeling dizzy, and soon afterward dropped dead.

The funeral will be held in the Plainview Cemetery tomorrow afternoon, the services being conducted at the family residence, near Abernathy, by Rev. G. I. Britain, of Plainview.

W. F. Garner, of Garner Bros., is preparing the body for burial.

Mrs. Overton leaves two small children.

It will be remembered that Mr. Overton's father, G. M. Overton, fell dead, at Abernathy, some four weeks ago.

ARE REPRESENTING P. H. S. IN DISTRICT MEET AT LUBBOCK.

The Plainview High School will be represented today and tomorrow in the District Interscholastic Meet, which will be held in Lubbock, by the following: Edwin McMath and Ruth Harrison, senior declamation; Mary Nan Meharg, junior declamation; Katherine Howard, senior spelling; Frank Howell, pole vault, broad and high jump; Vivian Graham, shot put. The baseball team will also be a contestant for honors. Essays by Noema Harris, Anna Love and Lucy Craig will be submitted.

The contestants were accompanied to Lubbock by Mrs. A. G. Harrison, Professor H. P. Webb and Miss Brown, of Wayland College.

IT WAS A GENERAL RAIN.

Good showers fell over the West Texas area Tuesday evening. The Texas Land and Development Company government station, through W. J. Kilinger, reports .50 of an inch rainfall in Plainview. Outlying communities report good rains, also. Although no official report is made at Floydada, it is stated that a rain of one and a half inches fell in that neighborhood.

A good rain fell north of Plainview, in the Panhandle section, Wednesday evening.

PLAINVIEW WILL SELL HER PAVING BONDS NEXT MONDAY

It Is Expected That Good Premium Will Be Offered—Bids for Construction to Be Let Soon.

The city of Plainview will offer for sale its paving bonds Monday. Mayor W. E. Risser states that the bonds are expected to bring a nice premium, similar bonds having sold well during the past few months. However, the unsettled condition of the bond market, due to the entrance of the United States into the European War, may affect the bond prices.

Aldermen J. B. Maxey, W. E. Winfield and J. M. Waller and City Secretary B. L. Spencer are now in Dallas inspecting paving done by the Vibrolithic Company, whose guests they are. They were joined in Dallas by E. H. Humphreys, who was in Dallas for special lodge work.

As soon after the date of sale of bonds as the law will permit bids for the construction of the paving will be received. It is understood that there will be local bids made for the construction.

During the next few months quite a payroll will be spent in Plainview by whatever firm gets the paving contract.

Grades and levels are being set now by representatives of Henry Elrod Company, of Dallas, who have signed a contract as engineers for the work.

MASS MEETING

Of Property Owners and Business Men of Hale County, on Court House Lawn, Monday, April 16, 3 p. m.

The A. & M. College Committee of Hale County, in its efforts to devise ways and means to bring the West Texas Agricultural & Mechanical College to Hale County, demands the immediate and hearty co-operation of all property owners and business men of the county to attend this meeting.

We desire to finally place this matter before everyone who feels that he will be benefited in any manner, and we appeal to the public spirit of every citizen to meet with us on this occasion to help us complete this work at once.

The committee has been working night and day arranging every detail, but it has now come to a time when we must have the absolute support and co-operation of every citizen, if we expect to secure this splendid institution. Good speakers have been provided to explain this subject to you in every detail. The banks and stores of the town will be closed between the hours of three and five o'clock p. m., so that everyone may attend.

If you want your land and holdings increased in value from ten to twenty dollars per acre, you should be here and help us.

If you want your business increased by a handsome per cent in volume and increased profits, you should give us your support and co-operation.

If you want aid in promoting the progress and the growth of our county, show it by your presence at this meeting.

Come in your "jitney," on horseback, afoot or with your neighbor, but the important feature is to be there. Your absence will be taken by the committee that you are not interested in this movement and are not willing to help build up your community.

If you want to see a quarter of a million dollars additional distributed every year in Hale County, help us get this institution.

If you want this college located in Hale County, it is imperative that you attend this meeting, as we must act at once.

The Agricultural & Mechanical College means more to every farmer and to every business man than two or three new railroads.

If you are interested, you will be present.

Respectfully submitted, A. & M. COLLEGE COMMITTEE, By E. GRAHAM, Chairman.

HIGH SCHOOL WILL PLAY TULLIA HERE NEXT TUESDAY.

Tuesday afternoon Plainview High School will play Tullia High School, on the local grounds. An interesting game is expected, Tullia having a good team.

Mr. and Mrs. L. A. Knight and Mrs. Robt. Malone left Thursday morning for Mineral Wells.

SUGAR BEET EXPERIMENTS ARRANGED FOR DEFINITELY

Young Men's Business League Hears That Freight Rates Will Be Argued in Dallas Monday.

The Young Men's Business League heard encouraging reports last night on the sugar-mill proposition. Col. R. P. Smyth reported that the Santa Fe had agreed to furnish seed for experiments and that two sugar factories have sent beet seed to him for the same purpose. Further, he stated that the companies he was corresponding with were interested in the proposition and have agreed to send representatives here later. P. B. Barber, demonstration agent for the Texas Land and Development Company, stated that he believes the proposition is in good shape. Letters have been mailed to those who have agreed to plant seed, instructing them in the plan.

A. G. Hinn, reporting for the freight-rate committee, stated that a hearing will be held in Dallas Monday, when the Shreveport rate case and the tariffs suspended by the Interstate Commerce Commission when the Fonda Tariff was considered before the Washington hearing, will be reopened. A. S. Stinnett, of Amarillo, has been employed to represent the Panhandle and South Plains towns, Plainview having contributed \$250 for the purpose of carrying on the work. This amount came out of the budget fund of the Y. M. B. L. Mr. Hinn stated that a decrease in rates at this time was problematical, believing that the present economic conditions would be urged by the railroad companies as a reason for sustaining the high freight rate.

A communication from the Houston Young Men's Business League relative to delegates from Plainview to the State convention to be held there during the coming month was tabled indefinitely.

The League voted to pay the assessment, five cents per capita on its membership, to the Associated Young Men's Business Organizations of Texas, thus keeping intact membership in that organization.

The applications of the following for membership were accepted: Arthur L. Talley, H. C. Burroughs, Jr., A. P. Robison, John Ryden, Dr. W. A. Bates, F. E. Blasingame and J. G. Gilliland.

When the proposition of maintaining Lake Plainview was opened, Mayor W. E. Risser reported that C. J. Hubbard, president of the Texas Land and Development Company, would be here soon, advises to that effect having been received by C. E. Craig, general manager of the company, and that he would be in position to open the matter on his arrival.

Mr. Risser also reported on the street paving that the bonds will be offered for sale on Monday, April 16. He stated also that the contract for construction would be let in the near future.

HASKELL HAS HER HAT IN RING FOR A. & M. COLLEGE.

A special communication to the Fort Worth Star-Telegram of Wednesday's date states:

"The committee to devise ways and means for securing the West Texas A. & M. College at Haskell, and sub-committees, met Monday."

"Bruce W. Bryant, representative from this district, was chairman. A site for the school, and method of raising the required \$50,000, provoked most discussion. Haskell has three tracts of land, one about eight, one west and one north."

"No difficulty whatever is expected in raising the \$50,000."

RUMOR OF KAISER'S DEATH WAS STARTED ON THE BOARD.

A persistent rumor was afloat yesterday afternoon that the Kaiser had been assassinated. The report had its origin in wheat-market manipulation, and Associated Press International News Service and United Press had no report on the rumor.

ATTENDED PRESBYTERY.

J. A. Tarwater, of Runningwater; Mrs. F. L. Brown and Rev. T. B. Haynie returned yesterday morning from Tullia, where they attended the regular meeting of the Amarillo Presbytery, representing the church at Runningwater and at Plainview, respectively.

SHE KILLED HER HUSBAND AND WAS GIVEN 20 YEARS.

Mrs. Florence Reynolds, charged with the murder of her husband, Samuel Reynolds, near Canyon, September 19, 1916, was found guilty at nine o'clock Thursday and her punishment was assessed at twenty years in the State penitentiary. The jury retired at 6 o'clock Wednesday evening, and, failing to reach a verdict by ten o'clock, was locked up for the night.

Counsel for the defense and the State argued for three hours before the jury, going over the various details and particulars of the alleged killing.

The State sought to make its case out of circumstantial evidence, since there was no eye witness to the shooting save Mrs. Reynolds, who declared in a previous examination that when she saw the shotgun that killed her husband fall, she turned her face away. State Attorney Miller made an impassioned appeal to the jury to find the defendant guilty on the evidence adduced. With the aid of the shotgun, pistol and target that was before the jury, he showed the impossibility of a man pulling a gun from a buggy in such a way as to cause the gun to discharge so as to strike him where it is alleged the wound was made.

The defense counsel declared that the jury could conceive of more than a dozen ways in which the shotgun could have been discharged so as to cause the wound to range straight for the heart. It could not determine how the jury could convict the defendant in view of the circumstantial evidence adduced. "A chain is said to be no stronger than its weakest link, and so in this case the circumstantial chain is weakened," said the counsel for the defense.

The court room during the afternoon was crowded with visitors. When arguments began the house was full and seats were at a premium. Many students from the high school were present. At times Judge Umphres prevailed upon the audience to remain seated and called for quiet.—Amarillo News.

POWER OF THE UNITED STATES.

Houston Chronicle: The power of the United States is an unknown quantity.

It has never been measured, and it never can be until some great emergency arises.

Statistics do not disclose this Nation's wealth or resources, because wealth is a matter of production, and we never have produced what we could, while resources are to be counted as they are used, and we never have used but a small fraction of those available.

The American people are not doing one-half what they might, and are consuming twice what they need.

These two factors make it impossible to calculate their potentiality.

Despite this, however, the United States ranks first among all the great powers in banking, agriculture and industry, and it is behind none in the character and capacity of the average man.

The United States has never moved toward any objective as a unit. It has never been called upon to exert its full strength in any one direction. It has never been made to suffer, to endure, to achieve, in the ultimate.

Until it has been put through such tests we are unable to estimate its power. Neither the world outside or the people who dwell within its limits can say with assurance what its real ability might be.

To judge the vitality and resourcefulness of this Nation by the past is impossible, because it has never faced an undertaking proportionate to the limits of either.

Barring the American Revolution,

the people of this country have never confronted the necessity of straining themselves.

Even then only about half the people contributed all that they could, while the other half sulked in the corner or suffered themselves to be deported.

The Civil War only tested the ultimate strength of one section of the country, leaving two-thirds of it comparatively uninjured.

If the United States should ever be summoned to exert her full power, the world would be astounded.

Great as the exhibition of German endurance and ingenuity has been, the American people could double it, and then have something in reserve.

In the first place, we have 20,000,000 men, and, comparatively speaking,

every one of them is a man.

In the second place, we have 2,000,000 square miles of agricultural territory.

In the third place, we have water power enough to run every mill wheel in the world.

In the fourth place, we have ample supplies of coal, iron, oil, copper, lead, and other essential minerals.

In the fifth place, we have a credit unequaled by any nation, and about equal to the three foremost combined.

In the sixth place, we have an initiative, an originality of thought and a spontaneous loyalty on the part of all the people, which is the greatest of all assets.

A. B. Martin went to Tulsa Wednesday on business.

TRUTH

As its advertisement—so the car. An honest announcement goes with an honest car.

Truth is the eternal test.

You will never read a Chevrolet statement making any extravagant claim.

True, we have claimed certain qualities for our car—superior motor-power, easy riding comfort, low cost of upkeep—but we have always been prepared to support our statement with the proof.

We claim that the Chevrolet model—now as always—stands for the highest motor value in its price class.

Test our statement—see the Chevrolet car, ride in it.

You will find—as thousands of others have—that we have spoken the truth.

The P. & O. No. 111 Lister

This Lister is known to farmers wherever sold as P. & O. No. 11, but the improved type is called No. 111 on account of important improvements.

There are more of them in the hands of farmers than all other makes combined,—over 2,000 sold by one dealer in one county in West Texas. The special features on this Lister made it deserving of its immense sale. Its use is not confined to preparing for row crops; it is now almost universally used for plowing for small grain crops by listing and re-listing, leaving the ground in oval waves, which not only catches and holds the moisture but prevents the loose soils of the West from blowing away.

The adjusting link on front end of beam is an important exclusive feature on the No. 111, absolutely preventing the point from running below the desired depth. The wheels are provided with dust-proof boxes, an immense help in the sandy loam lands of the West. The feeding device absolutely deposits one seed at a time of any of the row crops, besides can be equipped for both corn and cotton. You will have to see this wonderful improvement to appreciate it. The tilting hoppers allow change of plates without emptying them. Furnished with either disc or shovel coverers. This Lister embodied many other important features that will convince you that it is the best on the market.

The P. & O. No. 123 4-Wheel Lister

This Lister has all the advantage of the No. 111 and in addition has rear wheels. This is desired in many localities as it enables the operator to see the seed as planted. The rear wheels have cushion springs to hold them in line with the row and following the unevenness of the ground and conform to the ridge without straining the rear frame, compelling also, the Lister to remain in proper working position at all times. The friction lock disengages automatically, allowing the wheels to castor and turn round in a very small space.

'Hello! Third National Bank?

When can I get a statement of my account, including today's deposits?'

"Your statement will be ready in five minutes"

This is real, up-to-the-minute bank service—giving the customer the thing he needs at the time he needs it.

This is the kind of service we are now prepared to give to you.

We have just installed a Burroughs Bookkeeping Machine which handles our accounting work and keeps a statement of each customer's account ready all the time, with entries made right up to date.

Any time you want a statement of your balance in a hurry, it is ready for you.

Instead of leaving your pass book for two or three days at the last of the month in order to have it

balanced, you get a neatly printed statement each month, showing all checks and deposits and a balance you know is right. Every checking account will receive these regular monthly statements, together with the canceled vouchers.

The Burroughs will also post our ledgers, giving us neatly kept and accurate accounts, and providing an absolute and automatic proof of the accuracy of every entry on our statements and ledgers.

We are sure that the improvement in our service made possible by the machine bookkeeping method will meet with your approval, and that you will appreciate the convenience and protection against error afforded by the mechanically figured statements.

Now, when the sorghum grains are scarce, many a man is wondering why he did not save plenty of the grain for seed. And others wonder why they didn't select heads from their fields last fall. That can be done next fall, and there's no better time to make the resolution than now; but testing seed can be done now. It is a kind of crop insurance that pays big in the long run.

IS CONSCRIPTION THE THING?

Texas Congressmen, in expressing their views on the proposed war legislation, state that Texans are opposed to conscription. The Governor of Texas has gone on record as opposing this method of raising troops.

The man who says that Texans are loyal to the United States and to its President will come more nearly expressing the views of representative Texans. Texas, whose history as a Republic and whose history as a State reveals a stalwart fearlessness when a natural right is at stake, is game. Texans are eager to serve when the time comes for action. Texas is ready to defend her coast and her border and will not be opposed to an offensive war when there is at stake the principle of democracy, for which her valiant sons in the early Nineteenth Century dared oppose a foe organized under military government and skilled in the art of warfare. Texas is ready to lend her aid in helping write into international law, as she has in her own constitution and as she has subscribed to in becoming a unit in the United States, the principle of democracy, and is not averse, however much she loves peace, to enter a war for mankind.

Let us forget these words of our President: "The world must be made safe for democracy. Its peace must be planted upon the tested foundations of political liberty. We have no selfish ends to serve. We desire no conquest, no dominion. We seek no indemnities for ourselves, no material compensation for the sacrifices we shall freely make. We are but one of the champions of the right of mankind. We shall be satisfied when those rights have been made as secure as the faith and the freedom of nations can make them."

"The right is more precious than peace, and we shall fight for the things which we have always carried nearest our hearts—for democracy, for the right of those who submit to authority to have a voice in their own governments, for the rights and liberties of small nations, for a universal dominion of right by such a concert of free peoples as shall bring peace and safety to all nations and make the world itself at last free."

"To such a task we can dedicate our lives and our fortunes, everything that we are and everything that we have, with the pride of those who know that the day has come when America is privileged to spend her blood and her might for the principles that gave her birth and happiness and the peace which she has treasured."

We have faith in the universal triumph of democracy, and fear not to become a component part of the forces which will bring it about.

And what can be more democratic than conscription? As is known only too well to those whose early lives were contemporaneous with the great Civil War, and to others who have heard the tales, traditions and personal experiences of that time, the term conscription is abhorrent to many of our people. The shirker was conscripted. A conscript was detested. What is detested as mean and low is the SPIRIT shown by the shirker. Call the same action by another term and it loses its frightfulness to many.

By drafting into service all men of a certain age, rejecting the morally and physically unfit, the United States can raise immediately an effective fighting force. That conscription should be selective seems good, and indeed it is the plan announced by the War Department. The man who is needed in the civil pursuits of the country will be rejected and detailed to his regular duties.

That the man who is in the firing line is the only valiant man, that his sacrifice is supreme, is not true. Men can be equally as patriotic in maintaining the food supply, in administering professionally to the sick and wounded, in keeping the wheels of industry a-hum. Exception of these is a provision of a selective conscription.

England found hundreds of thousands of willing volunteers. She depleted her corp of workers when she did it. She had to send men back from the front to keep her country economically in a fighting condition. Germany's industrial preparedness has been the greatest factor in resisting her enemies.

The United States has taken count of the experience of other nations in the war. Her war program, as outlined by the War Department, is the recommendation of the leading military and industrial men of the Nation.

Texas abhors the spirit which once in our history made necessary conscription and hung a stigma on those shirkers who were slow to follow democracy's dictates. She wants military and industrial preparedness and is ready to make the sacrifice, whatever it be, to perpetuate democracy and to warn all powers that her rights may not be violated with impunity. She fought for independence for herself and won it; she allied herself with the other States in the Union, who were pledged to the common principle of liberty and freedom. The principle is the bedrock of her civil foundation, and she's ready to back it whenever and by whom assailed.

Food For Thought

"The wisdom of the wise and experience of the ages may be preserved by quota, on."—Benjamin Disraeli.

Such things as honor and love and faith are not only nobler than food and drink, but indeed I think we desire them more and suffer more sharply for their absence.—R. L. Stevenson.

As rust corrupts iron, so envy corrupts men.—Antisthenes.

Whoever could make two ears of corn, or two blades of grass, to grow upon a spot of ground where only one grew before, would deserve better of mankind, and do more essential service to his country, than the whole race of politicians put together.—Jonathan Swift.

One of the advantages of the negative part assigned to women in life is that they are seldom forced to commit themselves. They can, if they choose, remain perfectly passive, while a great many things take place in regard to them; they need not account for what they do not do. From time to time a man must show his hand; but, save for one supreme exigency, a woman need never show hers. She moves in mystery as long as she likes; and mere reticence in her, if she is young and fair, interpret itself as good sense and good taste.—W. D. Howells.

WILL RE-OPEN SHREVEPORT RATE CASE IN DALLAS MONDAY.

FORT WORTH, Texas, April 11.—Notification was received today by Sam H. Cowan, attorney for the Texas shipping interests, that the Interstate Commerce Commission has set the adjourned hearing on live stock, lignite and cordwood, three items in the Fonda 2-B tariff, to be held simultaneously with the reopening of the Shreveport case in Dallas on April 16. The original hearing was held in Fort Worth.

Mr. Cowan departed tonight for Chicago to represent the Texas shipping and the Texas live stock interests at a meeting in that city of all commercial organizations in the United States to consider what action shall be taken on the announcement of the railroads of a general advance in freight rates. He will return by April 16.

The list of commodities in the order in which they will be considered at the Dallas hearing follows: Horses and mules, stone, sand and gravel, common brick, fire brick, junk, machinery (gin and irrigation), glass fruit jars and bottles, iron and steel articles, potatoes and turnips, fruits, melons, empty barrels and kegs, blackstrap molasses, cotton seed and products, unshelled peanuts, flour, wheat, corn, hay, agricultural implements except hand implements, bagging and ties, binder twine, cans, cases and tin pails, baskets, chocolate raw material, dry goods, window glass, glassware (table), horse and mule shoes, oil (refined petroleum), iron and steel pipe, wrapping paper, printing paper, tin articles, wire and nails, door locks, tool files and rasps.

SCOPE OF PLAINVIEW LIBRARY IS CONTINUALLY INCREASING.

Although the Plainview Public Library is patronized by many and its scope is increasing, by reason of continual additions to the books on file, many of the people of the town do not know of the advantages the library affords. There is a membership fee, which is nominal. The library is maintained in the rear of the City Hall, the west entrance being used. The maintenance cost is small, and practically every cent that is received goes for new books.

The report of the library committee from the City Federation of Women's Clubs from September 1 to April 1 follows:

pedo for each one sent to the bottom, the United States soon can exhaust the resources of the submarine fleet for operating far from its case. The German resources can be still further dissipated by routing the American merchantmen through hundreds of ocean lanes to scores of European ports.

If the blockade-running campaign does not actually end the war by destroying Germany's faith in the U-boat, to which her reliance was transferred after the hope of decisive victory on land apparently had been abandoned, the administration is confident it at least will thwart the German threat of forcing an early peace on the allies through a starvation blockade.

WHERE PEOPLE WHO DRESS BEST TRADE

THE INJUNCTION AGAINST FONDA TARIFF IS UPHOLD.

AUSTIN, Texas, April 11.—The Third Court of Civil Appeals today affirmed the case of the Abilene & Southern Railway Company et al. vs. State of Texas, from Travis County, thereby sustaining the Travis County District Court in the injunction against thirty-odd short lines preventing them from using the rates prescribed in Fonda tariff 2-B, they not having been parties to the original proceedings in Atlanta, where United States Circuit Judge Pardee acted. The opinion of the court has not been filed; therefore, its reasons are not known as yet.

The Texas short lines in question

filed a plea for intervention with the Circuit Court previous to the trial of the case in New Orleans last week, asking for an injunction to prevent interference by the State of Texas and their unrestricted use of Fonda's tariff. The Railroad Commission, following the Atlanta restraining order, permitted the short lines to use Fonda's rates where they are lower than the Texas Commission tariffs. Their intervention plea will be decided along with the main issues in the case when a decision is announced by the tribunal which heard the case in New Orleans.

HYMN BEFORE ACTION.

The earth is full of anger,
The seas are dark with wrath,
The Nations in their harness
Go up against our path:
Ere yet we loose the legions—
Ere yet we draw the blade,
Jehovah of the Thunders,
Lord God of Battles, aid!

E'en now their vanguards gather,
E'en now we face the fray—
As thou didst help our fathers,
Help Thou our host today!
Fulfilled of signs and wonders,
In life, in death made clear—
Jehovah of the Thunders,
Lord God of Battles, hear!

MASS MEETING

Of Property Owners and Business Men of Hale County on Court House Lawn, Monday, April 16, 3 P. M.

The A. & M. College Committee of Hale County, in its efforts to devise ways and means to bring the West Texas Agricultural & Mechanical College to Hale County, demands the immediate and hearty co-operation of all property owners and business men of the county to attend this meeting.

We desire to finally place this matter before everyone who feels that he will be benefited in any manner, and we appeal to the public spirit of every citizen to meet with us on this occasion to help us complete this work at once.

The committee has been working night and day arranging every detail, but it has now come to a time when we must have the absolute support and co-operation of every citizen, if we expect to secure this splendid institution. Good speakers have been provided to explain this subject to you in every detail. The banks and stores of the town will be closed between the hours of three and five o'clock p. m., so that everyone may attend.

If you want your land and holdings increased in value from ten to twenty dollars per acre, you should be here and help us.

If you want your business increased by a handsome per cent in volume and increased profits, you should give us your support and co-operation.

If you want to aid in promoting the progress and the growth of your county, show it by your presence at this meeting.

Come in your "jitney", on horseback, afoot or with your neighbor, but the important feature is to be there. Your absence will be taken by the committee, that you are not interested in this movement and are not willing to help build up your community.

If you want to see a quarter of a million dollars additional distributed every year in Hale County, help us get this institution.

If you want this college located in Hale County, it is imperative that you attend this meeting, as we must act at once.

The Agricultural & Mechanical College means more to every farmer and to every business man than two or three new railroads.

If You Are Interested, You Will Be Present.

Dressed Right

Wherever you may be, you can always be sure you're dressed in the right way in Langham-High Clothes. Whether you are in your home, at school, at work, at the game, or walking or calling, you are sure your appearance and dress are what they should be in every particular.

LANGHAM HIGH CLOTHES

will fit you as though they were made for you. They are excellently tailored and finished in a way you will like. Their hang is exactly right and the minute you set eyes on them, you'll want to put them on. Do that—and you are on the Langham-High Team for the rest of your High School life.

LANGHAM-HIGH CLOTHES MADE BY LEOPOLD CHICAGO

KANSAS CITY STOCK MARKET IN DETAIL.

KANSAS CITY STOCK YARDS, April 9.—Cattle receipts were 11,000 today, nine thousand less than on last Monday, market 10 to 20 cents higher, following a rise of 15 to 35 cents after Tuesday last week, a long string of good steers at \$12.00 to \$12.40, including pulp feds. Hog receipts today were 9,500, market 15 to 25 cents higher, following an advance of 40 cents last week, top \$16.10. Sheep and lamb receipts 8,000, market 15 to 25 cents higher, lambs \$15.30, ewes \$12.75, both new high records.

Beef Cattle.

The limit on strictly prime natives has been raised to \$13.00, though none that good were here today. Fair to good natives sold at \$11.00 to \$12.00, light steers without much flesh \$10.00 to \$11.00. About 75 cars of pulp-fed steers were here, sales mostly at \$11.50 to \$12.40. In the quarantine division seven cars from Holdenville, Oklahoma, sold at \$9.65 to \$10.60, weights from 913 to 980 pounds, and some Arkansas steers weighing 990 pounds sold at \$9.50. Cows and heifers sold a quarter higher in some cases, heavy cows up to \$10.50, yearling heifers and steers worth up to \$12.00, bulls \$10.00, veals \$13.00. Buyers have shown keen desire for all grades, especially steers with weight, since the middle of last week.

Stockers and Feeders.

Prices broke around 50 cents the first of last week, and the accumulation of the first few days was worked off pretty close on that basis, a few sales after Wednesday a shade stronger. The break was believed to be temporary, and so it proved to be, sales today around 25 cents higher than the close of last week, stock steers mostly \$8.00 to \$9.00, feeders \$9.00 to \$10.00, exceptions higher in each class.

Hogs.

Fifteen higher at the start and 25 cents higher at the finish described the hog market today, the lower end of the bulk of sales getting the full advance. Prime heavy hogs sold up to \$16.10, medium weights \$16.05, lights \$15.85, bulk of sales \$15.60 to \$16.05. Big advance in wheat and provisions since Friday furnished part of the stimulation of the hog market today, together with the natural bullish outlook on futures. Receipts fell below estimates at most points, and nothing more than light supplies are considered possible the balance of this month. Farm activity will not hold receipts down as much as when prices were one-half what they are now, although the extreme importance of raising a large crop if possible is pretty generally understood.

Sheep and Lambs.

The market got out of a rut today, most of the lambs at \$15.00 to \$15.30, with heavy Northern lambs, 86 pounds, at \$15.00, ewes from the Fort Collins district at \$12.75, yearlings worth \$14.00, wethers \$13.00, clipped lambs around \$12.50. Lack of a pelt shruts spring lambs out of their usual premium this spring, and they are being kept at home till they grow some wool. Goats are scarce, but clipped Angoras are worth up to \$7.50, unclipped \$9.00, kids \$10.50. Moderate receipts and stronger prices are the forecast.

TUBERCULOSIS OFTEN AT ROOT OF ADDISON DISEASE.

No country, no race, no sex, no color is immune to tuberculosis. Similarly, no tissue, no member, no portion of the human body is immune to its inroads. The catholicity of the disease, both as to people and tissues, brings about strange results. Tuberculosis of a bone or a joint is very different in its manifestations from tuberculosis of the lungs, the skin or the brain. When some of the internal organs are attacked, for example the suparenal capsules, the consequences are even at wider variance from the commonly conceived picture of the devastations of that minute vegetable, the tubercle bacillus.

Thomas Addison, sprung from the English yeomanry of Cumberland, physician, teacher, student and diagnostic genius, carried on a series of observations for years before he found that tuberculosis was often at the root of the disease which now bears his name. Addison's disease, generally caused by tuberculosis of those little organs which lie just above the kidneys, is marked by extreme prostration, bloodlessness, a marked bronzing of the skin, and death. There may be other symptoms, but the weakness, anaemia and skin pigmentation are the most prominent.

The dogged determination which marked Addison's attempt to track a disease to its original source is the ruling spirit of Twentieth Century medicine. No half-discovered fact will satisfy the modern investigator. The ultimate object is sought in its entirety by an industry of search, a correlation of scientifically deducted facts, and a concentration of effort. Addison was born in April, 1793, and died of brain disease, June 29, 1860.

The United States, which leads the world in the use of crude cocoa, last year imported more than 213,000,000 pounds, establishing a new high record.

OLD-TIME ENGINEER GAINED 20 POUNDS.

Wouldn't Take All Money in Universe for Good Tanlac Did Him.

Everybody in Jacksonville, Fla., either knows or has heard of Engineer Chas. J. Weeks, who runs the Seaboard Air Line fast train "Fox" between Jacksonville and Tampa. Mr. Weeks bears the distinction of being the second oldest engineer in point of service with his road, having been with the company thirty-five years. He is a man of very temperate habits, few words and strong convictions. According to his own statement, he has never taken a drink or used tobacco in any form. He not only has a splendid record for efficiency as a railroad man, but is held in the very highest esteem by his fellow citizens in Jacksonville.

"I've gained twenty pounds on seven bottles of Tanlac, and feel as well and happy as I did when a boy," said Mr. Weeks to the Tanlac representative who had called by special invitation at his attractive residence, 2139 Lydia Street, for his statement a few days ago.

"For twenty years I suffered with nervous indigestion of the worst sort," he continued, "and at times during the past fifteen years I didn't think I would last much longer. To tell the truth, I finally reached the point where I didn't much care whether I lived or died.

"After eating I would have so much gas on my stomach and would get so puffed up I couldn't hardly fasten my clothes on. My food would sour and curdle, and I would have heartburn so bad I would feel like a piece of hot iron was laying in my stomach, and the pains were simply awful. To tell you the truth, I just don't know how I lived. I could eat no meats or sweets of any kind, and for days I would have to live almost entirely on bread and water. God only knows how I suffered. I just can't describe it. The pains

around my heart and the palpitation were so intense I thought at times I must have heart trouble. I couldn't find anything to relieve my troubles, although I tried hard.

"Tanlac was so highly recommended to me that I bought a bottle, and cannot express in words how grateful I feel for the good it has done me. Just think of it!—a few bottles of this medicine has made me feel better than I have in fifteen years. It seems al-

most unbelievable, but it's the plain, simple truth. I can now eat anything placed before me, and everything agrees with me perfectly, and I enjoy my sleep as much as a child, and I'm feeling just fine in every way. I feel so nimble I think I could hold a good runner a tight foot-race.

"Tanlac has entirely relieved me of the things that troubled me so long, and I just don't know how to express my gratitude. I wouldn't be in the

shape I was before for all the money in the universe.

"If anybody doubts my statement, you can just tell them to write me a personal letter, and I'll answer it. I'll be only too glad to have the opportunity of telling them what this great medicine has done for me."

Tanlac is sold in Plainview by Long-Harp Drug Co.—Advertisement.

You Can Make Excellent Cake With Fewer Eggs

Just use an additional quantity of Dr. Price's Cream Baking Powder, about a teaspoon, in place of each egg omitted.

This applies equally well to nearly all baked foods. Try the following recipe according to the new way:

CREAM LAYER CAKE

Old Way

- 1 cup sugar
- 1/2 cup milk
- 2 cups flour
- 2 teaspoons Dr. Price's Baking Powder
- 3 EGGS
- 1/2 cup shortening
- 1 teaspoon flavoring

New Way

- 1 cup sugar
- 1 cup milk
- 2 cups flour
- 4 teaspoons Dr. Price's Baking Powder
- 1 EGG
- 2 tablespoons shortening
- 1 teaspoon flavoring

Makes 1 Large 2-Layer Cake

DIRECTIONS—Cream the sugar and shortening together, then mix in the egg. After sifting the flour and Dr. Price's Baking Powder together, two or three times, add it all to the mixture. Gradually add the milk and beat with spoon until you have a smooth pour batter. Add the flavoring. Pour into greased layer cake tins and bake in a moderately hot oven for twenty minutes. This cake is best baked in two layers. Put together with cream filling and spread with white icing.

Cold Days Require Coal Why is it that some folks always delay their coal buying and the installing of their stoves until the last minute when every member of the family has run the risk of serious cold or pneumonia and until all of the coal and stove dealers are so busy they cannot give the best service? Surely the wise man will not be caught in a blizzard with his coal supply not yet laid in. Seniors—Marion Hardesty, Abernathy; Lewis Stambough, Abernathy.

The teachers of Hale Center regret that they could not get the names of all who won prizes in the School Fair and Interscholastic Meet. However, they are sending the prizes to the teachers of the children who won them, and they will give them to the winners.

We wish to express our thanks to all who helped us in the fair. Especially do we thank those who gave prizes; the mothers of Hale Center district for their free lunches Friday and Saturday, and also the judges, who so willingly gave us their time and labor in judging the exhibits.

GRUBBS BRINGS SUIT AGAINST COLLEGE OF INDUSTRIAL ARTS.

KAUFMAN, Texas, April 9.—Suit was filed in the District Court of Kaufman County today by Judge V. W. Grubbs, of Greenville, against the board of regents of the College of Industrial Arts and others.

The plaintiff, generally recognized as the father of said institution, charges that it has been commercialized by the management through the medium of high entrance and graduation requirements and unreasonable expenses to such an extent that the girls for whose special benefit it was established, by the Twenty-Seventh Legislature, in 1901, are effectually excluded from its benefits.

He claims to have been damaged in the sum of \$10,000 by the action of defendants in repudiating the guaranty of the Lydia Grubbs scholarship. Also that there is a considerable sum of money in the hands of defendant Edwards contributed by plaintiff's friends in Texas and elsewhere, which he seeks to have refunded to the contributors, through a court receiver. He seeks an order enjoining the said board of regents from excluding the girls of Texas who most need such training for life by the maintenance of unreasonable entrance requirements, standards of scholarship and high cost of attendance; also for an order removing the present members of said board from office, for costs and general relief.

Cheap and big can Baking Powders do not save you money. Calumet does—it's pure and far superior to sour milk and soda.

This is "HOOSIER BEAUTY" The National Step Saver

Special Exhibit of Carload of Hoosier Cabinets

Fresh from the factory, with every little touch of economy known to modern household science, come direct to us a showing of every model of Hoosier Kitchen Cabinet manufactured by the world-famous Hoosier Company.

Do not be deceived: These cabinets were not stocked for one of the National sales held periodically by all Hoosier dealers. This is simply our big spring shipment of Hoosiers. The National Sale will not be held until August. But, why should you put off the pleasure, the economy, and the necessity of ownership of a Hoosier until fall?

We have decided to make a special local sale, so that you may be getting the service out of your Hoosier, and while this stock lasts we offer you any model of Hoosier at \$6.00 down and \$6.00 a month. If you prefer to "kick in" with all cash there will be a ten per cent discount awaiting you.

Get your Hoosier now and make your kitchen work easy by using modern kitchen efficiency methods. Why tramp hundreds of miles during the course of a year back and forth in your poorly arranged kitchen? Why be all fagged out at the end of the day, your head and back aching? Why be a kitchen drudge, when you can make a Hoosier serve you by systematizing your work? A Hoosier will make your work easy and give you time for rest and recreation.

The Hoosier offers you only one of many of the household pleasures and economies you may enjoy by buying from our other complete lines of housefurnishings. No matter what your household needs or plans, figure with us when you are looking for these things.
