WHEAT SHOW IS NEW FARM IDEA LAUNCHED

CITIZENS NATIONAL BANK WILL AWARD PRIZES FOR BEST EXHIBITS AT DISPLAY ROOMS.

WILL CLOSE IN SEPTEMBER

All Local Tillers of Soil Are Eligible to Compete in Agricultural Contest, Which Opens Today.

The Citizens National Bank has launched an unique and an attractive inspiration for the betterment of cultivation of wheat in Hale County and surrounding territory. The new novelty in the way of agricultural innovations is a prize "Wheat Show."

The "Wheat Show" opens Friday and continues until September 1. The desire and hope of the banking officials is to have every farmer in this territory bring a sample of the wheat grown on his land to the banking room to be put on exhibition. Prizes will be awarded by the bank for the best number of bushels grown on an acre of dry and on irrigated land. There will also be prizes given for the best production on irrigated and dry land. A special grand prize will be awarded for the best sample of wheat exhibited by weight test regardless of yield an acre.

R. A. Underwood, cashier of the Citizens National Bank, stated this morning, "The bank only requests that the farmers of this territory bring in their samples of wheat and put them on exhibit until September 1. With each sample exhibited, the farmer is requested to write a short letter telling how much wheat he raised, how many bushels threshed to the acre and any other facts that may be of interest and profit to the wheat growers of this community."

"Every farmer in this territory is invited to compete in this prize 'Wheat Show.' It makes no difference whether the wheat is produced on a dry farm or an irrigated farm. We have arranged various classes to cover these agricultural conditions. Souvenirs will be given out the closing day of the contest to all who can call at the bank. It is the aim of the Citizens National Bank to stimulate the interest in better wheat production and to increase the production."

The prizes to be awarded by the bank are as follows:
Grand prize: The greatest number of bushels an acre produced on an acre of dry land \$25
Ten honor prizes for next best production on dry land, each \$5
The best sample of wheat exhibited by weight test, regardless of yield an acre \$25
Ten honor quality prizes for the next ten best samples \$5
First grand prize for the greatest number of bushels an acre on irrigated land \$25
Five honor prizes for the next best greatest production an acre on irrigated land \$5

MEETING IS POSTPONED.

On account of unfavorable weather, the Presbyterian Ladies' Aid meeting was postponed until 4 o'clock Monday, July 23. The society will meet with Mrs. J. E. Flamm at the home of her daughter, Mrs. J. W. Richards, on that day.

Maxwells to Open Four-Game Series Against Crosbyton

Tomorrow afternoon the Maxwells will open a four-game series with the Crosbyton combination, the first game being staged here at the Maxwell Park and the other three games, Thursday, Friday and Saturday at Hale Center during the Woodmen Encampment at that place.

Yesterday afternoon the home club invaded Hereford and added another victory to its slate by winning, 4 to 0. The pitching of Humphries was spotless, and he was never in danger of being scored upon throughout the nine seasons.

It was announced by Manager Lipscomb yesterday that the Lorraine team will be here during the first three days next week. Lorraine claims to have defeated every team in its neighborhood this season, and is confident that it can give the same medicine to the Maxwells.

Plans Are on Foot to Hold Teachers' Institute on Plains

A Teachers' Institute is the latest educational movement on foot in the Plains. Judge Charles Clements announced yesterday that it is planned to have the teachers in Hale, Floyd, Lamb and Swisher Counties assemble here September 3 and remain in session for one week. The idea has not been approved by all the districts at present, but Judge Clements believes that it will meet with satisfaction when the time comes. If the plan is adopted, the county schools will not open until September 10.

Judge Clements already has received offers from educational authorities and instructors to take part in the program. There will be men of national reputation in educational and school work booked if the suggestion of Judge Clements is adopted by the other county judges.

SANTA FE OFFICIALS SEE SUGAR BEET EXPERIMENTS

Col. C. L. Seagraves and L. L. Johnson Make Trip Through County With P. W. Madsen.

Col. C. L. Seagraves, head of the industrial department of the Santa Fe Railroad, and L. L. Johnson, agricultural agent of the same system, made a trip with W. P. Madsen, the sugar beet expert, through Hale County to inspect the experimental sugar beet patches this afternoon.

Both seemed highly pleased with the success of the cultivation of the beets up to the present time, and feel assured that sugar beets will become one of the extensive crops in the Plains within a few years.

They will make a later trip here with the representatives of the Utah-Idaho Sugar Company about August 1, when an analysis will be made of the beets grown here for experimental purposes.

Hale County Wheat Shipments Go Below Early Expectations

The wheat shipments from this district, were under the estimates set by the grain dealers at the beginning of last week. It was believed that more than one hundred cars would leave this part of the country for the mills by last Saturday night, but according to John Lucas, Santa Fe agent, there were less than seventy-five cars to leave Plainview up to the close of the week. The shipments also have been limited this week so far, as only four cars have left up to noon today.

It is believed that the farmers are storing their wheat in the bins with the expectations of an increase in market prices. At the present the market quotations have reached the \$2.15 mark, and some have visions of the three-dollar mark in the near future. Others who are disposing of their wheat at the present market prices believe they are taking advantage of the high water mark in the wheat world. They say that the Food Control Bill before Congress at this hour will materially affect the price of wheat, and that the harvest in the northern states also will lead to the decrease of market quotations.

WHEAT HARVEST TO BEGIN ON E. H. PERRY'S FARMS.

Wheat harvesting will begin on E. H. Perry's farms this week. Mr. Perry has two tracts of land, each consisting of 320 acres, of which 520 acres are under wheat cultivation. It is estimated that about ten bushels to the acre will be harvested from 350 acres, and that the yield on the remaining acres will be in the neighborhood of twenty bushels to the acre. A few acres will run as high as thirty bushels.

GRAND JURY IS SELECTED.

The grand jury which will convene August 6 will consist of Charles Schuler, W. W. Laney, William Britt, W. A. Lowe, C. E. Benson, George Dorthitt, Dan Morgan, C. G. Goodman, J. H. Helm, J. W. Patterson, Shelby Leach, J. M. Buchanan, T. H. Brown, J. J. Lash and George Schnick. The petty jurors also have been drawn for the next term of district court.

FOOD CONSERVATION LESSONS TO BE HELD

DEMONSTRATIONS WILL BE GIVEN AT COURTHOUSE THURSDAY AND FRIDAY AFTERNOONS.

MRS. WHITIS TO SUPERVISE

Courses Are to Cover Canning, Drying, and Preserving of Vegetables and Fruits by Scientific Methods.

Thursday and Friday afternoons have been designated as demonstration days for food conservation by the women of Plainview. At 3:30 o'clock in the district court room at the County Courthouse, Mrs. T. P. Whitis, who has taken the courses offered by the University of Texas in the conservation of food, will be in supervision of the demonstrations in canning, drying and brining of vegetables and fruits.

The courses are given under the auspices of the National League for Woman's Service of this city. They will cover every phase of the work in conserving food under the most scientific and modern methods. The aim is to get the housewives of Plainview to co-operate with the Government in solving the food question that has become the great issue of the World's War.

Miss Lena Williams, chairman of the local organization, this morning said, "Every detail of canning, preserving, drying and brining of fruits and vegetables will be thoroughly covered by the demonstrations of Mrs. Whitis. The league requests that every housewife in and around Plainview to attend the demonstrations as knowledge will be gained, and the housewife will have a broader conception of the patriotic service she can render the Government."

In speaking about the further demonstrations to be held, Miss Williams stated, "Any town or community in the County desiring demonstrations are requested to make application to the league, and demonstrations will be arranged and given free of charge."

The applications should be made to Miss Williams or Miss Edna Mayhugh, secretary of the local National League for Woman's Service. It also has been announced that any woman in Hale County who cares to register with the Government to aid in the conservation of food may do so through the local club.

In this issue of the Herald is published a facsimile of the registration card for national service, which may be filled out and sent to Miss Williams or Miss Mayhugh, through which persons it will be given direct and definite attention.

PLAINVIEW MAY HAVE 8 OFFICERS IN U. S. ARMY

Only Some Flagrant Fault Will Result in Dismissal of Those at Camp Now.

Word that reached Plainview yesterday from headquarters of the Southern department, makes it almost certain that the student officers sent from Plainview last May, who are now in camp, are to be given commissioned offices. There are eight who are still in the ranks at Camp Funston. They are Herbert S. Hillburn, M. B. Hillburn, Robert Brahan, Ernest Fowler, Carl C. Brown, Austin F. Anderson, Jennings Anderson, Bert Mathes and Casey Hughes.

Announcement from headquarters states that these student officers who complete the course satisfactorily will be given assignments to the national army, the regular army and staff corps or departments for which they have special adaptability. The tentative plan is to assign about one thousand to staff corps or other departments, 200 to the regular army and forty-six out of each of the nine training camps to the national army.

Though further dismissals are possible, the announcement says, the belief prevails that all of the men now in training at Camp Funston will be given commissions. Only some flagrant fault, it is believed, will result in the dismissal of any of the men who have "stuck" up to date.

EXPERTS WILL LAUNCH WIDE DAIRY CAMPAIGN

PLANS TO STIMULATE INTEREST IN INDUSTRY THROUGHOUT PLAINS AND PANHANDLE.

TOUR TO BEGIN AUGUST 20

Scheme Is Outgrowth of Amarillo Meeting—Commercial Groups Co-operate With Agricultural Men.

"That efforts will be made to develop the dairy industry in the Plains and Panhandle territory to a more extensive point," said Z. E. Black, secretary of the Young Men's Business League, "was evidenced at a meeting of dairy experts at Amarillo last Saturday." Mr. Black, who represented Plainview at the meeting, says that a dairy campaign to be launched August 20 was determined upon by the members of the Plains-Panhandle Dairy Association Saturday. It will last two weeks and will touch every section in the Plains, Panhandle, and eastern New Mexico.

Seven dairy experts have been placed in supervision of the work, and these persons will recruit teams to wage speaking tours in the interest of the dairy industry. The captains and teams will meet in Amarillo August 18 to outline the work and to consider various suggestions. The campaign will be participated in by leading railroad agricultural officials, members of various chambers of commerce and agricultural agents.

The movement is being held under the direction and auspices of the Plains-Panhandle Dairy Association, and it is planned by those persons in charge to make it the most extensive ever undertaken in this part of the country. It is estimated that more than 1,500 Holsteins were imported through the last campaign to this section of the United States, and it is believed that the movement now on foot will greatly increase the possibilities of the dairy industry here.

To Cover Territory.

The seven teams will cover all of the railroad territory north of Abilene and Sweetwater, west of Wichita Falls and points in eastern New Mexico and all of the Panhandle and Plains country. Plans were tentatively outlined Saturday.

The campaign along the Fort Worth and Denver Railroad will extend from Sunset to Texline and will be in charge of A. K. Short, agricultural agent for the system, and F. L. Poul, dairy expert of the A. and M. College, and a representative of the DeLaval Cream Separator Company of Chicago. The campaign along the Wichita

(Continued on Page Six.)

7 NEW BRICK BUILDINGS WILL BE ERECTED HERE

Ellerd Brothers Let \$30,000 Contract for Erection of Stores on Corner of Broadway and Seventh.

That building thrives in Plainview was evidenced yesterday, when announcement was made that the contract for the construction of seven brick store buildings on Broadway and Seventh streets was let to W. R. Simmons by John and Reuben Ellerd. The buildings will be erected on the northeast corner of these two streets. The corner building will be two stories high, and five of the stores will face on Broadway and two will face on Seventh. It is said that the cost of the construction will be in the neighborhood of \$30,000 and that the work will begin on the buildings just as soon as the material reaches this city. Mr. Ellerd stated this morning that the order for the material had been placed and that a shipment was expected within the near future. The material to be used will be chocolate brick.

The construction of these seven stores will make fifteen new business buildings to be erected in Plainview since last spring. Five of the buildings on the Square will be ready for occupancy by the August 1.

Mr. and Mrs. L. C. Danford and two daughters, Alice and Mabel, and son, Harold, who have been visiting relatives near Plainview, left for their home in Chicago yesterday.

Three More Enlist to Serve America on Front in France

Three more young men of Plainview preferred to volunteer in serving the nation rather than being drafted. They were Alex Newman, Charles Pipkin and George Fisher, who were recruited by Sergeant O'Sullivan last Saturday and sent to Amarillo the same day. Word was received here Sunday that they had passed the physical examination and had left for the training camp at El Paso.

Sergeant O'Sullivan stated this morning that he has received orders to remain in Plainview until further notice, which he believes, will not come until after the selections on the draft are announced. He has been ordered not to enlist any men who have been drafted, but asked to recruit as many men from here as possible for the regular army.

"HIPPO" CLAN IN TRAINING TO SKIN SKELETON CLIQUE

Both Teams Hold Secret Practice to Get Into Condition for Baseball Battle Next Tuesday.

"Let me hear the voice of fandom say next Tuesday 'Atta boy, Ed!' and I'll deliver the punch that will sail the 'pill' over the right fielder's head," said E. H. Perry this morning in speaking about the Lean-Fat game scheduled for 4 o'clock next Tuesday afternoon as a benefit for the Red Cross Society.

The reporters of the Herald failed on their job in obtaining information from the training camps this morning, but a special engaged detective from the Burns' Detective Agency was put on the job. Through the use of a couple of pillows, he was unable to gain entrance into the "Hippo" camp and held several interviews with some of the promising candidates for the

(Continued on Page Six.)

Rainfall This Week Will Be of Benefit to Crops on Plains

July is going after the precipitation record. Since Sunday night, W. J. Klinger, Plainview's Government weather man, has recorded .45 inch in rainfall, which brings the total for this month up to 1.51 inches.

The heaviest rainfall in the last few days was recorded at Olton, where the precipitation reached the two-inch mark. Amarillo reports a one-inch rainfall and Floydada one and one-half inches. Good rains were reported from Hale Center, Tulla and Lockney also.

The precipitation during the last two days will be of a great benefit to the row crops in the Plains. P. W. Madsen, the beet demonstrator, stated this morning that these rains will have a decided influence on the beet crops and will bring about considerable development within the next few days.

Mr. Klinger says that the weather conditions around Plainview are unsettled and showers may be expected. He also said that last Wednesday night was the warmest night ever known to Plainviewians, when the thermometer reached 80 degrees.

HELEN TEMPLE AVERAGES 21 BUSHELS OF WHEAT TO ACRE.

An average of twenty-one bushels of wheat to the acre is he record for the Helen Temple Farm this year. More than 2,100 bushels were realized from the land. All the wheat has been harvested and shipped to the mills, which brought \$2.14 a bushel. Some of the land averaged as high as thirty bushels to the acre, while others yielded less than twenty bushels to the acre.

STOCK SHIPMENTS ARE BEGINNING TO PICK UP.

Now that wheat harvest is about over, the stock shipments are beginning to pick up after more than two weeks' dullness. Last Saturday three cars of hogs were shipped from here to the Fort Worth livestock market, two of which were sold through Watson & Son. The other car was shipped by B. Morton.

SELECTION OF DRAFT NUMBERS IS DELAYED

SEVEN STATES HAVE FAILED TO MAKE REPORTS UP TO LATE THIS AFTERNOON.

TEXANS ARE NOW LISTED

Men Will Be Required to Appear for Physical Examination on Day Called.

WASHINGTON, D. C., July 17.—All but seven of the states have reported completion of their local exemption machinery, encouraging officials in their hope that drawing of lots to determine the order of liability under the selective conscription law may be held before the end of the week. Four states reported ready during the day, and the war department has been informed that in those remaining to report only a few local districts are missing.

While these preparations are going forward, sentiment apparently is growing in Congress in favor of amending the conscription act so as to make aliens liable for service or otherwise to relieve the requirements placed under the present allotment upon communities with larger population.

The states from which reports of completion were received are Utah, Alabama, Ohio and Virginia. Reports still are to come from Illinois, Kentucky, Michigan, Mississippi, New York, Missouri and Pennsylvania.

Requirements Are Issued. Some additional information with reference to the physical examination and filing of claims has been prepared for those who are besieging local boards for information. Some excerpts on the requirements are:

You must report for physical examination on the day named in your call. If you are found physically disqualified the board will give you a certificate which will explain to you what your future duties are. If you are found physically qualified, and file a claim of exemption within 7 days after your call you will be given 10 days after filing your claim for exemption. If you are found physically qualified and file no claim for exemption or if you do not appear for physical examination, your name will be posted to the district board as one who was called for military service and was not exempted or discharged. On the eighth day after call, or within two days thereafter, copies of the list of persons so posted to the district boards will be given to the press with a request for publication, will be posted in a place at the office of the local board, accessible to the public view, and notice will be mailed to you at the address on your registration card. Therefore, watch the notices posted in the office of the board about ten days after the day you were called and make arrangements for the prompt receipt of mail.

The Government has issued a statement to the effect that all men subject to draft are to watch the papers for the announcement of selected men and certain rules covering exemptions. Men are asked to ascertain where the exemption board of their district has its office located.

Local Light Plant Is Installing New Massive Oil Engine

The massive Diesel Oil Engine has just been received by the Texas Utilities Company for installation in the local plant. It is being removed from the car today and will be placed in operation within the near future. Manager F. G. Beckman says that the installation of the big oil engine is one of the many improvements taken by the local company to give Plainview and surrounding territory a modern and efficient plant. The new engine has 520 horsepower and is manufactured by the Busch Seltzer Brothers of St. Louis.

"TEDDY" IS CALLED TO FRONT.

DECATUR, Ill., July 17.—Having almost given up hope of shooting the big lioness which is roaming through the 300-acre timber on the Allerton estate near Monticello, a telegram was today sent to Theodore Roosevelt at Oyster Bay, inviting him to come to Decatur at once to join in the hunt.

To "Keep the New Store New"

We have continued sale prices on all items which we do not wish to carry over.

Our Mr. Jacobs is now preparing a want list for

his market trips and before his departure we want our store reduced to a minimum.

It will pay you to take advantage of the low prices prevailing throughout the store.

We have proved our supremacy in value giving and you will find us ever consistent in our prices, quality and service.

INCREASING POULTRY PRODUCTS IN THE UNITED STATES

The statement made at the recent agricultural conference at St. Louis that the poultry products of the United States could be doubled within a year means that if everybody in a position to help did their part six hundred million dollars' worth of food would be added to our supply this year.

This includes both meat for the table and eggs. Very few farmers practice a systematic plan of disposing of their fowls after they have ceased to be productive, although it is well known that fowls of the heavier breeds, such as the Plymouth Rocks, cease to produce a profitable number of eggs at the end of their second laying year, and that this holds true of the lighter breeds, such as the Leghorns, at the end of their third laying year. Consequently, if efforts were made to dispose of all females when their best laying days were over a large quantity of poultry meat would be placed on the market. All poorly developed chickens should likewise be culled out and used as meat. This way of disposing of unprofitable fowls would allow the farmer to feed his grain to younger and more productive fowls.

Caponizing the cockerels that are not intended for breeding purposes will not only increase their size, but will place a more desirable poultry meat on the market. Another practice that should be adopted more widely is that of fattening all chickens that are to be marketed before they leave the farm. This can be done easily by confining the birds for a week or ten days and feeding them a good fattening ration. They will come to market then in better condition and the farmer will receive a profit for their added weight.

The greater production of turkeys, ducks, geese, and guineas, all of which can be profitably raised and a ready market found in most sections, would increase the supply of poultry meat considerably. The production of ducks especially should be emphasized at this time, because of the rapidly with which they grow. Ducks of most of the meat breeds, properly fed and managed, frequently weigh from five to six pounds at ten weeks of age. It is estimated by poultrymen making a specialty of growing ducks that the feed cost per pound of producing duck meat ranges from 8 cents to 12 cents, depending upon the current prices of grain and other feeds.

Increasing Supply of Eggs.

The number of marketable eggs can be increased by following a few practical suggestions. Among the most important of these are the production of infertile eggs after the breeding season is over, and the proper handling of eggs by the farmer before sending them to market. The infertile eggs is obtained when all male birds are removed from the flock. This does not decrease the number of eggs produced, but it does increase greatly their keeping qualities. The production of the infertile egg and the proper handling and marketing of eggs by the producer would increase tremendously the number of marketable eggs each year by diminishing the quantity that are rendered unfit for food.

An increased production of ducks eggs is advisable where available markets are found.

The poultry house should be clean and sanitary and the fowls free from insect pests, thereby preventing disease and mortality. It is estimated that nearly \$9,000,000 worth of poultry is lost each year through disease alone. Special attention should be given to the feeding and housing of laying fowls at seasons of the year when their natural source of food supply is cut off.

General Increase in Poultry Products.

Although the hatching season proper should be considered at an end by May 1, it may be feasible in some sections of the northern and northwest a part of this country to continue hatching until the first of June. Chicks hatched at this time, with proper feed and management, will frequently begin laying in January of the following year. The maturity of fowls hatched late can be greatly increased if the mother hens are confined until the chicks are weaned. In this way feed that is furnished the chicks produces growth, instead of energy to follow the mother. Extra precautions should be taken in the late spring and early summer to keep the young birds free from lice and disease, both of which cause thousands to die every year. More general use of the incubator and brooder will increase considerably the output of chickens, and consequently the number of layers the following year.

The U. S. Department of Agriculture and the several State agricultural colleges will be glad to supply helpful information to anyone interested in raising poultry on a large or small scale.

merely a "claim" of "mortal mind," and that "goneness" is nothing but baseless "error." What's the sense of worrying about baked beans while we have this Boston cult ready to prove that there bean't no beans?—Literary Digest.

Concentrate products, especially soup mixtures, so that each container will hold as much canned food and as little water as possible.

GRAZING LAMBS.

Experiments have shown that May and June lambs by the proper care may be made to weigh 80 pounds by November. But to do this the lambs must have good pasture and in addition be fed a grain supplement.

Experiments at the Iowa station showed that lambs without grain on blue grass pasture made an average daily gain of .4 pound a head at a cost of 2.12 cents a pound of gain. When the animals were fed corn in addition to the pasture the average daily gain was .46 of a pound a head; on barley pasture .39 pound daily a head. This shows that considerable gain may be made on grazing alone. The lambs were one year old in this experiment.

At the Minnesota station, wethers while on a grass pasture, but fed a small grain ration, made 60 per cent better gains for 112 days than wethers without grain.

On partially dried up grass pasture that had not been cut or pastured during the summer, sheep of mixed ages in South Dakota made only from one-third to one-fourth the gain without grain as with it.

In many states clover is used for fall pasture for lambs. The aftermath is left to be grazed in late August or September. The lambs are turned in in the afternoon to prevent bloat. Alfalfa pasture is also fine for lambs. The same precautions against bloat should be taken. When damp with dew in the morning alfalfa or clover is likely to bloat.

Rye makes excellent fall pasture for lambs. It may be planted in early September and grazed in four or five weeks. Wheat, barley, oats or emmer may be planted for the same purpose.

Silage makes fine winter feed for lambs. Corn or sorghum silage with a little grain or cottonseed meal and hay will winter sheep. Pasture of course is preferable, but if it cannot be had in winter silage will answer.

WORLDLY ANXIETY.

Little Jewish girl of Maids Vale was asking questions in regard to her father's brothers and sisters. She elicited the circumstance that one of them went back to heaven after he was born.

"Hard luck!" she remarked. "Very hard luck, indeed. I hope," she went on earnestly, "I do hope grandpa got his money back."—Lloyd's News.

**UNCLE SAM'S THRIFT
THOUGHT FOR TODAY.**

Spread the Meat Flavor.
Spread the meat flavor over other foods and so economize on the quantity of meat consumed, says the United States Department of Agriculture. Here is one way to spread the flavor.

Meat Stew With Dumplings.
Make a stew from a cheap cut of meat, cut into small pieces, potatoes, and such other vegetables as are desired. Thicken with a little flour diluted with cold water. Serve with dumplings made as follows:

Mix and sift one cup of flour, two teaspoonfuls of baking powder and 1/4 teaspoonful of salt. Work in with the fingers one teaspoonful of butter; add gradually 1/2 of a cup of milk or a little more if needed. Roll out 1/8 inch thick and cut with biscuit cutter or in square pieces. The dumplings may be stewed, baked like biscuits or cooked with the stew. In the latter case remove enough liquid to permit the dough to be placed on the meat and vegetables.

**PLANS FOR ORGANIZATION OF
FARM LABOR ANNOUNCED.**

Under the government plan for the organization of farm labor, the details of which were announced by the U. S. Department of Agriculture today, provision is made for nation-wide co-operation in the solution of the farm help problem. The work of organization already has been started in about 40 States, and it is expected that eventually every community in the United States will be reached. It is believed that the resultant utilization of emergency labor will begin to have an appreciable effect on the farm labor situation before the season has far advanced. Meanwhile, the immediate and acute problem of supplying labor for the harvests, now beginning in the Southwest, is being handled, so far as the United States Government's services are concerned, through the existing employment service of the U. S. Department of Labor, which will continue to handle such problems of

mass mobilization under the new plan as it has in the past.

Federal and State Co-operation.

The plan is based on close co-operation on the part of the U. S. Department of Agriculture and the U. S. Department of Labor with State committees on national defense charged with labor matters, with the State agricultural colleges, with the county agents, and with county and local or township labor committees or representatives to be established in every locality. The Department of Agriculture will represent the Federal authorities in determining farm labor needs and in assisting in organizing all available farm labor in the rural districts. The U. S. Department of Labor will devote its attention to organizing labor in urban communities and industrial regions, and will co-operate with the farm labor forces where necessary by obtaining extra labor from the populous centers.

The plan provides for strictly local handling of all labor problems that can be adjusted locally. The fundamental unit of the organization is the "community man" who, with the assistance of such committees as he may appoint, canvasses his own neighborhood, finds out what farmers need help, and what men are available for supplying the local need, and affects such adjustments as can be made locally. If, after all local adjustments have been made, there remains either a deficit or a surplus of labor, he reports to the "county man," whose business it is to effect adjustments between the several communities in his county. The county man, in turn, reports any deficit or surplus to the "State man," who canvasses the situation for the State as a whole and reports to the Department of Agriculture, which, in close co-operation with the Department of Labor, is charged with the distribution of mobile labor for the country as a whole.

Thus each unit in the system acts as a clearing house for its own territory, reporting to the unit higher up only when it needs or has help to offer. The plan provides that supplemental reports shall be submitted by each community man whenever changes in the local labor situation make desirable further adjustments that can not be met with the material at hand, or when a surplus of labor develops which he can not use.

A great many retired farmers, of whom there are 700,000 in the country, may be available for emergency service under this plan of farm-labor mo-

bilization. The plans contemplate also the drawing of emergency labor from the cities under the immediate direction of the Department of Labor, the effective utilization of college students and school boys, and, if necessary, the assignment of volunteer women and girls to rural tasks connected particularly with feeding and caring for harvest hands or other extra labor, or with farm canning or drying of surplus perishable products. In other words, the plan contemplates supplying assistance not merely for field operations, but to farm women during their season of heaviest domestic duties.

**CHILDREN'S PLAY SHOULD NOT
BE HINDERED BY WAR.**

WASHINGTON, July 10.—"Public provision for recreation is not a luxury to be cut off, but a necessity to be conserved," Miss Julia Lathrop, Chief of the Children's Bureau of the U. S. Department of Labor, in discussing the report on facilities for Children's Play in the District of Columbia which has just been issued by the bureau, said today:

"An English authority has lately pointed out the demoralization to boys and girls caused by the breaking down of clubs and the withdrawal of the army of recreation leaders, and he has traced much of the increase in juvenile delinquency in England to the chaos in recreation activities which has, pre-

valled since the war. "This is a good time to remind ourselves that the continuance and development of all types of innocent and healthful recreation in every community offers a call to patriotic service for many who can not go to the front. The strain and anxiety which are certain to grow in this country for an indefinite period ahead of us need to be counterbalanced by greater community

effort to provide opportunity for wholesome play."

If you have more preserving jars than you can fill, lend them to a neighbor who will make them work for the nation.

Can nothing that you can keep without canning. Dry such vegetables as corn, string beans, navy beans, mature lima beans, okra, etc.

My Idea of a Car
By John W. Bate of the Mitchell

I have stood for three things in particular in all of my work for the Mitchell:

- 1—Factory efficiency—
- 2—Lifetime service—
- 3—Every possible attraction.

Factory efficiency comes first. Without it, the other things are impossible at any modest price. We are saving \$4,000,000 on yearly production cost in this mammoth model plant. And that alone enables us to offer such cars at Mitchell prices.

All-Enduring Parts

Three years ago we changed our standard from 50 per cent over-strength to 100 per cent over-strength. Some call this new margin needless and extreme. It means many over-size parts. In these days it means very costly materials.

But it also means, in my opinion, average lifetime service. Two of our cars that we know of have already run over 200,000 miles each. The average repair cost has been reduced to a trifle.

I have watched some 70,000 Mitchells. Every fault, every weakness, has come to my attention. Our cars of today represent an evolution, wrought by world-wide experience. They have long been marvels of

endurance. But, despite that fact, we have in three years doubled our margins of safety. That to make our vital parts almost all-enduring.

Two Major Problems

Our two greatest problems have been the motor and the springs. To combine perfect performance with economy of fuel. To build an engine which would keep its newness, its silence and its power. We have certainly accomplished that.

Then to build a perfect shock-absorbing cantilever spring. A spring to make motoring about as comfortable as sailing. A spring that needed no shock absorbers, no snubbers, no rebound straps.

We accomplished that two years ago in the Bate cantilever springs. They make the Mitchell, I believe, the most comfortable car in the world. And in those two years not one of these springs has broken.

The Mitchell Extras

When we attained a lifetime car we wanted it complete. So we studied all cars in Europe and America for beauties, conveniences and luxuries. We have now in the Mitchell 31 wanted features which nearly all cars omit. We have added in the past year 24 per cent to the cost of luxury and finish. We have created eight new styles of bodies which combine all the attractions we found in 257 new models.

And this year we build two sizes, so that people who want a five-passenger car need not pay for a too-big chassis.

So the Mitchells today, in all these ways, typify my ideals. I know they excel all other cars in their class. And any Mitchell dealer can in five minutes prove that in many different ways.

If I bought a car, after all I know, I should want it built like this.

**MITCHELL SIXES
TWO SIZES**

MITCHELL—A roomy 7-passenger Six, with 127-inch wheelbase and a highly developed 48-horsepower motor.
\$1460

Four-passenger Roadster, \$1495. Sedan, \$2175. Cabriolet, \$1895. Coupe, \$1995.
Also Town Car and Limousine.

MITCHELL JUNIOR—A 5-passenger Six on similar lines, with 120-inch wheelbase and a 40-horsepower motor. 1/4-inch smaller bore.
\$1195

All Prices f. o. b. Racine.

Smith Form-a-Truck \$350 F.O.B. Chicago

Now Eight Bodies in One

SMITH Form-a-Truck itself is one of the biggest money makers implements ever offered you.

Combined with the famous Eight-in-One body it is absolutely necessary to any modern farmer.

Look at the eight bodies in one which you can get in a minute, simply by moving the levers on the side.

Think of what this means to you in farm equipment! Instead of having to maintain four or five different types of wagon, you get them all in one.

Take a load of hay—deliver it—in a minute change the body to carry live stock. Haul your hogs, or calves.

Get rid of this load. Take on cattle in the stock rack body.

Then, if you want to haul supplies—lumber, barrel goods—change to the flat rack body.

And all of this on the Smith Form-a-Truck chassis.

Thousands of farmers are using Smith Form-a-Truck now. You will not get the utmost efficiency out of your farm until you use it.

Use Any One of Six Chassis

Using any one of six chassis, Smith Form-a-Truck combines with any Ford, Maxwell, Dodge Bros., Buick, Chevrolet or Overland chassis to make a fully guaranteed one-ton truck. It gives you real truck construction that will stand up under the hardest hauling you could ever do.

When You Are in Town Drop In

When you are in town drop in and see Smith Form-a-Truck. It will pay you well.

GARDEN CULTIVATION.

WASHINGTON, D. C., July 6.—This is the time of the season when the gardener is likely to allow the weeds to get a start in the garden. Right now the plants need every drop of water, and weeds should not be allowed to rob them. Weeds grow much faster than cultivated crops, and if not destroyed will rob the plants of the moisture they need for forming fruit. Those fortunate enough to possess a private waterworks or who have city water should make use of the hose to supply the crops in the home garden with needed water. The watering should be done in the evening and by the time the sun rises the next morning the water will have soaked in. The soil should be cultivated about twenty-four hours after each watering in order to prevent the formation of a crust on the surface. Nothing retains soil moisture like a finely broken surface.

It is an excellent plan to water eggplants, peppers, cabbage, cucumbers, melons, and other crops needing highly fertilized soil, with manure water. Have a barrel covered with fly screen in which to prepare and store the manure water. Give each plant an occasional watering with this water and the added growth will repay you.

Suspect Hog Cholera—Anti-Hog-Cholera Preparedness Urged.

"Don't take a chance with a sick hog. Act quickly. Get a veterinarian or a trained man immediately. Don't wait a single hour when you suspect disease in your herd. Use the telephone or send to town at once. Only prompt action will stop hog cholera losses. Every hog saved will help to win the war."

This is the message of tremendous importance the U. S. Department of Agriculture is carrying to farmers, not only in the great hog belt included in Iowa, Missouri, and Illinois, and near-by States, which produce 34 per cent of the hog output of the United States, but also to farmers of the South, where in several States in 1916 hog losses due to cholera rose to two to three times the average for the country. Hog losses in 1916 by disease rose to 130 per thousand in Arkansas, 195 in Louisiana, 100 in Florida, 80 in Georgia, 76 in Tennessee, 70 in Alabama, and 65 in Mississippi, against an average of 48 per thousand for the entire country. At least 90 per cent of these were attributed to hog cholera.

The time for argument about anti-hog-cholera serum is past, declare the specialists of the U. S. Bureau of Animal Industry. Explicit figures are readily available which prove unmistakably that when administered in time by competent persons, hog-cholera serum will keep well hogs from taking the disease for a period of 3 to 6 weeks. Not argument, but quick action is imperative to get serum and a trained operator to the farm to treat the hogs. Hogs will be saved and the nation's meat supply increased if every farmer will immediately upon sign of disease call in the nearest available expert to diagnose the complaint and administer whatever treatment is necessary.

The Department of Agriculture is urging that all State, county and local live stock interests, including State veterinarians, live-stock boards, State college workers, county agents, and local veterinarians, begin immediately to organize anti-hog-cholera preparedness campaigns to reach every farmer in every county. Such organization al-

ready exists in many places. Where it does not, there is need of special and immediate action before the hot weather conditions, favorable to hog cholera, come on.

Bankers and other business men can aid in the work of informing farmers when they can get expert help immediately when they suspect cholera in their herds. Lists of accredited persons competent to diagnose cholera and administer serum, together with their addresses and telephone numbers, should be furnished to each farmer in the county with the appeal that he call for help at once in case of need. Business men may also arrange through the local veterinary authorities or county agents to buy serum and hold it in reserve for emergency use at the nearest State serum plant, private plant, or serum depot. State and Federal animal-industry authorities should be notified of any outbreak at once by telegram.

Because a single outbreak of hog cholera on any farm is a matter of moment to the entire community, and because hog-cholera infection is rapidly spread in many ways, the Department of Agriculture is urging farmers to employ every possible measure to keep the disease out of their herds. The Department has issued a special hog-cholera poster, "Stop Hog-Cholera Losses," which gives specific directions for avoiding infection by sanitary and self quarantine measures; also directions for the isolation and treatment of cholera-infected hogs and directions for disinfection and restocking the hog lot. Farmers' Bulletin 834, soon to be published, contains the latest information at the command of the Department of Agriculture concerning hog-cholera prevention and the immunization of hogs against the disease.

WHY SHE GRIEVED.

Bridget Malone's husband lay dead. Bridget sat in front of her saloon and grieved loudly and publicly. From time to time she threw her apron over her head, and, rocking back and forth in her comfortable chair, wailed inconsolably.

The mayor of the village crossed the street and stood at her side compassionately. "Don't take it so hard, Bridget," he said comfortingly; "it's the way we all must go—we all have to stand these separations."

"I know, Mr. Mayor, I know," sobbed the widow, "but I was only thinking if Pat had died fifteen years ago, what a sight of trouble he would have saved me!"—Holland's.

Don't have an empty preserving jar in your neighborhood next fall.

Weeding will seem easy next winter when mother serves those home-canned string beans.

WELL WORTH IT.

A little three-year-old boy was eating sugar when his papa came upon him and exclaimed:

"Look here, boy! Do you know sugar is ten cents a pound now?"
"Well, it's worth every cent of it," was the unhesitating reply.—Holland's.

THE STATE OF TEXAS.

To the Sheriff or Any Constable of Hale County—GREETING:

YOU ARE HEREBY COMMANDED That you summon, by making publication of this Citation in some newspaper published in your county, if there be a newspaper published therein, but if not, then in the nearest county where a newspaper is published, once each week for four consecutive weeks previous to the return day hereof,

Mrs. J. C. Newman, Gladys O. Newman, Emma Gertrude Newman and Virginia Low Newman, who are non-residents of this State, and H. B. Pack, who is absent from the State, to be and appear before the District Court of Hale County, Texas, at the next regular term thereof, to be held at the Court House of said Hale County, Texas, in Plainview, Texas, on the 6th day of August, 1917, then and there to answer a petition filed in said Court on the 1st day of June, 1917, in a suit numbered on the docket of said Court No. 1542, wherein E. C. Hunter is plaintiff and Lois Pack, H. B. Pack, H. G. Pack, D. S. Pack, Mrs. J. C. Newman, Gladys O. Newman, Emma Gertrude Newman and Virginia Low Newman are defendants.

Plaintiff's cause of action being a suit in Trespass to Try Title to Lot Number Twelve in Block Number Twelve in the Town of Plainview, Hale County, Texas, to recover the title and possession of said lot, to establish and declare a certain deed made by C. E. McClelland conveying said lot to J. H. Buntin, "Trustee for J. N. Donohoo, Homer Pack, J. C. Newman, J. M. Graham, J. L. Vaughn, G. S. Hardy and W. B. Sheffey, dated April 4th, 1908, recorded in Deed Records of Hale County, Texas, Volume 15, Page 612, to be a trust for the use and benefit of the Methodist Episcopal Church, South, at Plainview, Texas; and to remove the cloud cast by such deed on plaintiff's title to said lot and to quiet plaintiff's title to said lot.

HEREIN FAIL NOT, and have you before said Court on the first day of the next regular term thereof, this WRIT, with your return endorsed thereon, showing how you have executed the same.

Given under my hand and seal of said Court, at office, in Plainview, this the 1st day of May, 1917.

JO W. WAYLAND,
Clerk, District Court,
Hale County, Texas.

ANNOUNCEMENT
To Our Friends and Patrons

All steel products continue to advance in price. We are just as anxious as you are to have you get the farm machinery that you will need at the least cost and therefore urge you to place your orders for your needs before we are compelled to increase prices.

Present markets are so unsettled that we expect to order only a sufficient number of grain drills and row binders to fill such orders as may be placed with us before August 1st. We cannot insure delivery or guarantee prices after that date. You are therefore urged to get your orders to us promptly.

We thank you for past patronage and solicit your future business.

THE FARMER AND HIS WHEAT.

It is time for the farmer to do some sagacious thinking. This is the hour he should study national and international market conditions. Wheat today is quoted at \$2.15. Should the farmer wait for a jump in the price of wheat? Will it go down or up? These questions trouble the mind of the farmer who has wheat to market.

It does not take much thought to know that wheat is in demand. We know that between America and a few other smaller countries, the world depends upon for its wheat. Looking at it in that light, it looks as if the price of wheat will go up.

On the other hand, we learn that the Government will regulate the price of all grains under the Food Control Bill now before Congress. We also know that the wheat yield of the North, which is above the average, has not been harvested. These two incidents alone will be big factors in lowering the price of wheat. Wheat may drop to less than \$2 and it may go above the present mark. It's a gambler's chance that the farmer is taking.

NEWSPAPERS ARE RELIABLE ON DRAFT NEWS.

"You can't believe what you see in these newspapers about the draft," were the words of a member of the local exemption board. He made his statement without any consideration or discrimination between the highest type of journalism and the yellow type. He made his statement with the idea of creating the impression that the newspapers are to entertain and not to furnish reliable news.

We confess that there are a few papers in the nation that do not stick to facts. We are certain that some newspapers search for something sensational rather than actual news. But, certainly, that class of journalism is in the minority.

The ruling journalism in America is that journalism that informs and educates. The real genuine journalism of the land is today called the people's university. It educates and it entertains. It is a champion of social reform and a public interpreter. Yet, above all, it is an institution highly and extensively informed on all public questions—and always acquainted with the latest news first. The press is always the first on the scene, whether in Washington, San Francisco, the South or the North.

Was it not the New York American that announced the regulations covering the physical examinations before the exemption boards across the country knew the details of the law? Was not the Chicago Tribune the first to announce that men subject to draft would be given numbers and that they would be taken into service through a public drawing in Washington?

The reason for existing conditions is that the Government has faith and confidence in the average American newspaper. The news of any new law is given to the press before it is sent to the printer's to be printed into pamphlets, which are later sent to various public places. By the time the pamphlets reach the hands of officials, the news has been spread through the land by the means of the Associated Press, the United Press and other news associations. By the time the instructions reach their destination, the public has learned and the story through the means of the up-to-the-minute press.

Most of the American people have confidence in the American press in furnishing reliable, straight-forward and up-to-the-minute information on any public question of public interest. They know that the American press is intelligent and clever enough to obtain information at first hand. The American people know that the American press is believed in by the Government.

When the people of America want to know something about a public question, they do not waste time in calling upon public officials, but go to the nearest news stand. They know where the truthful and latest news may be found.

CHANCELLOR HOLLWEG AND SECRETARY OF STATE BRYAN.

It has been stated that the resignation of Dr. Von Bethmann-Hollweg will have about the same influence on the political and diplomatic life of the German Empire as the resignation of William Jennings Bryan had on the political and diplomatic life of the American nation.

Far be it from such. This statement has been made on the assumption that both men held similar positions in countries alike in character. Of course this is not true. America is a nation that exists on a foundation of democratic principles. America is a nation of the people, for the people and by the people. The German Empire is a nation governed by a selected few. It is not a nation of the people, for the people and by the people.

On the other hand, the office of chancellor is in paramount superiority to the office of the secretary of state. Was it not that dominating character of Prussianism, Bismarck, who was honored by this high office at the beginning of the Prussia Empire? Was it not Bismarck through the power in this office that the Parliamentary majority was laughed at during his reign in the office of chancellor? Whoever heard of a secretary of state defying Congress? Bismarck, as chancellor, guided the destinies of the Prussia Empire.

Yet that is all history. Hollweg, the chancellor of today, also has been the guiding star of the German Empire. The Kaiser had his word, but Hollweg's policies of government usually found expression. This more than anything else has caused the downfall of Hollweg. He was taking advantage of the power the office allowed him. It was too much for Kaiser William. His crown seemed as though it was melting; he felt as if God had gone against him. It was time for him to make a change to save his own name in the eyes of the people. This he has done.

Bryan's resignation had limited influence on American diplomacy and political life. Hollweg's resignation is going to be a tremendous factor in the outcome of the political and diplomatic confusion in the German Empire.

CITY COUNCIL IN SESSION LESS THAN ONE HOUR.

F. F. Hardin was authorized by the City Council last night in its regular session to construct a six-foot sewer line, beginning in the ally of block 28 in the Highland addition across the street and into block 29 of the same addition. The city has agreed to reimburse Mr. Hardin at the end of twelve months.

The only other business taken up by the Council was the granting of permission to Garner Brothers to build a warehouse on the lot in the rear of the furniture store. George Hull will be permitted to erect a warehouse in the rear of lot 12, block 18.

EXPERTS WILL LAUNCH WIDE DAIRY CAMPAIGN.

(Continued from Page One.)
Valley lines from Wichita Falls to Abilene will be in charge of W. H. Clements of the Nissley Creamery Company and a representative of the Shapleigh Company of Westchester, Pa.

WHI Canvas Oklahoma.

The campaign along the Rock Island lines from Sayre, Okla., to Santa Rosa, N. M., through Amarillo will be conducted by a special dairy expert from Council Bluffs, Iowa, A. Peterson, agricultural manager of the Rock Island lines, and Porter A. Whaley of the Amarillo Board of City Development.

The campaign along the Santa Fe Railroad from Sweetwater to Lubbock and branches of the system in that territory, will be held by L. L. Johnson, agricultural agent for the Santa Fe, and a representative of the department of agriculture under Fred W. Davis. The tour on the Santa Fe from Lubbock to Canyon and from Canyon to Farwell will be staged by experts who have not yet been selected.

The movement along the Santa Fe from Higgins to Melrose will be in charge of a representative of the DeLaval Cream Separator Company, and Dr. Evans, dairy expert of the A. and M. College of Texas, and a representative of the A. and M. College of New Mexico.

County demonstration and agricultural agents throughout this territory have already signified their willingness and pleasure at assisting in the work of the campaign.

"HIPPO" CLAN IN TRAINING TO SKIN SKELETON CLIQUE.

(Continued from Page One.)
heavyweight team.

G. E. Lewis told the detective that he had volunteered to save the colors of the Fat men's land. "It is certainly true that we will suffer through the touch of the rays of the sun. It is a fact that our wives will be putting cold cream on the sunburned necks and faces the next day. Yet, in honor of our characters and reputations; that the challenge of the living skeletons may not go unanswered; that revenge may be our glory, we are willing to undergo the pains and sufferings of a Job."

Some of the men discovered on the scene today were A. G. Hinn, F. Sanson, Frank Hardin, W. A. Nash, G. E. Lewis, J. E. Willis, Y. W. Holmes, J. B. Nance and L. A. Knight. If the detective is correct in his identification, T. Stockton also was skipping in and around the infield.

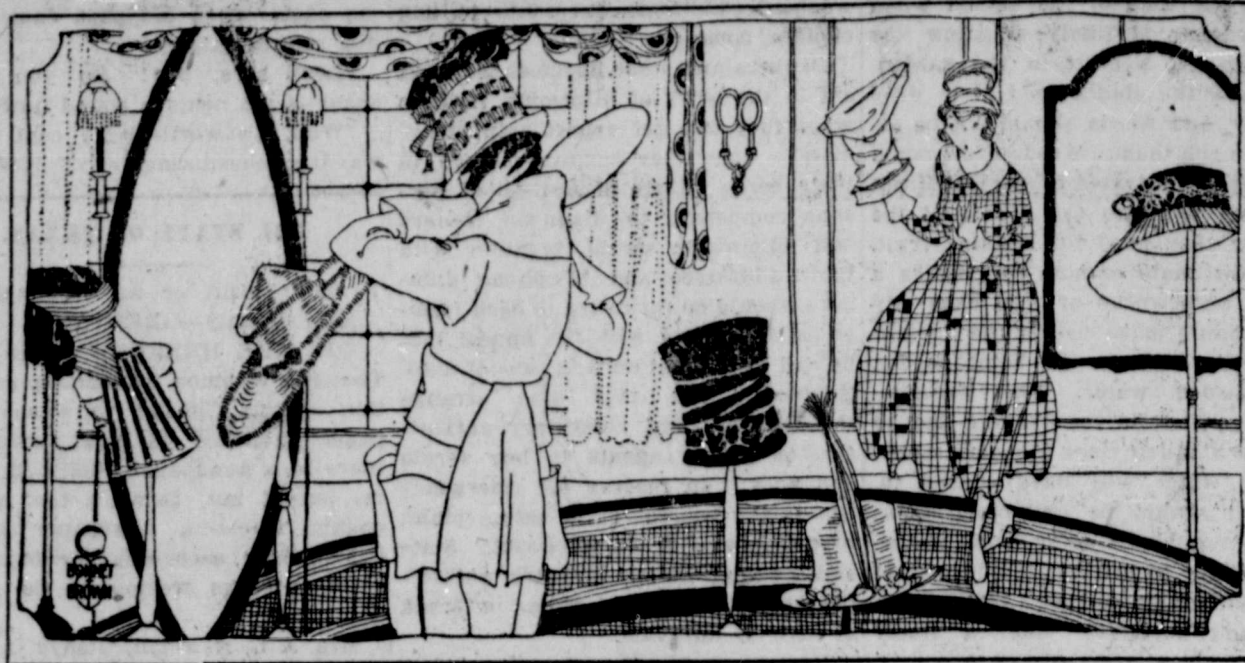

William (Shorty) Watson returned today from somewhere in the North, where it is rumored he has been going over the plans with General McGraw of the New York Giants. According to Mr. Watson, the Leans are going to be taught a few scientific and trick plays in the battle next Tuesday. We have a new play called the "Duck or Hospital for You," which is a slight modification of the old hit and run play. It is especially adapted for long-distance hitters, which naturally means Fat men, says Mr. Watson.

The detective failed to get into the Leans headquarters through the keen observation of Dr. Gidney, who was on guard duty. The doctor stated that the Leans were making rapid progress and that a 14-karat baseball clan will make the representatives of the "Hippo" gang wish that they had joined the army instead of remaining here to battle for the baseball supremacy of Plainview.

When asked for the line-up, Doctor Gidney gave out the following: J. W. Wayland, C. E. Craig, D. L. Alexander, A. L. Putnam, Bob Burch, M. M. Bonner, E. E. Robinson, S. J. Jackson, C. W. Cozzens, W. J. Mitchell and J. L. Overall, all pitchers. "I'll do the catching," said Doctor Gidney, "and we will not need any infielders or outfielders."

Get ready for canning season now. Regrets are the only things ever canned in the jars you forgot to order.

You can brag about your garden all winter if you have your canned evidence on the dinner table.

A MESSAGE TO THE LADIES

A recent shipment of mid-summer and early fall hats have been added to our stock. They are of satin, white and colors, felts in all the latest blocks and colors, and models of ribbon and velvet. Just what you need to finish out the summer or begin fall with.

BECKMAN-CURTIS.

The marriage of Miss Alpha Curtis, daughter of Mr. and Mrs. W. L. Curtis, formerly of Sallisaw, to Mr. Fred G. Beckman of Plainview, Tex., was solemnized Tuesday evening at half after eight at the home of the bride's parents, 517 North Twenty-first street, Poteau, Okla. The Rev. B. V. Ferguson, pastor of the First Baptist Church, officiated.

A profusion of ferns and carnations were used in the decorations throughout the house, emphasizing a pink and white color motif. Miss Frances Powell played the wedding music. The bride's only attendants were her two small sisters, the little Misses Katherine and Anna, as ribbon bearers and Grace Pryor as ring bearer, carrying the ring in the center of a lily. They wore fluffy frocks of white net with sashes of pink. As the Lohengrin wedding march was played the small ribbon bearers advanced slowly down the stairway stretching their silken bands to the place of the ceremony, a bower of ferns and palms.

They were followed by the ring bearer, preceding the bride and groom, who came down the stairway together. The bride wore a gown of white satin, lace and carried a shower bouquet of lilies of the valley and bride's roses. An informal reception followed the ceremony, during which an elaborate wedding collation was served, carrying out the color note of pink and white.

Mr. and Mrs. Beckman left at 11 o'clock for a honeymoon trip in Dallas and other Texas points and will be at home in Plainview, Tex. The bride traveled in a suit of dark blue with white boots, hat and gloves.

The bride has been a popular member of the Trusty school faculty. Mr. Beckman, who formerly lived in Okmulgee, is the son of Mr. and Mrs. H. C. Beckman, who were present at the ceremony. He has recently assumed the management of the Texas Utilities Co. of Plainview.—Southwestern American.

MANNING-KERR.

J. W. Kerr of Snyder and Mrs. Nannie Manning of Memphis, Tenn., were married in this city last Sunday afternoon by Justice G. C. Keck. Attending the ceremony were Henry Wheeler of Slaton, Mrs. Mae Miller of Amarillo and John Meisterhans of this city. Immediately after the ceremony, Mr. and Mrs. Kerr left for Amarillo, where they will make their home.

Mrs. E. L. Stephenson, who has been a guest of friends at Tulla, left for her home this morning.

FORT WORTH VISITOR IS GUEST AT THEATRE PARTY.

Mrs. W. A. Nash was hostess Friday night at a theatre party in honor of her guest, Miss Lena Maud Smith of Fort Worth. After seeing Mae Murray in "The Primrose Ring," the invited guests went to the Dye Drug Store, where refreshments were served.

Those in the party were Miss Smith, Mrs. W. A. Nash, Misses Georgia Brashears, Lizzie Mae Rook, Patty Dalton; Messrs. Bert Pritchett, Mory McGlasson, Milton Williams, Frank Henderson and Mrs. Lillian Kindel.

PLAINVIEW PERSONS SPEND SUNDAY AT KINDER RANCH.

Last Sunday a group of Plainview persons spent the day at Judge Kinder's farm. The party consisted of Celestine Harp, Lucille Kinder, Daisy and Marie Gidney, Mr. and Mrs. Paul Barker, Mr. and Mrs. Ben Smith, Z. E. Black, George Wyckoff, Paul Pierson, and Olin Brashear.

Q. Y. L. M. CLASS TO HAVE THEATRE PARTY.

The Q. Y. L. M. Class of the South Methodist Church will hold a theatre party at 8:30 o'clock Thursday night. The young men members of the class are requested to meet at the Dye Drug Store.

BENEVOLENT LEAGUE MEETS.

The Benevolent League met Friday at the home of Mrs. C. W. Tandy. The "Widowed Mothers' Pension Act" was discussed and articles on social service were read.

A check for \$10 from the Elks' Lodge was presented to the league.

AMERICAN BEAUTY SILK POPLIN COAT IS FAVORITE OF WOMEN MOTORISTS.

Vestee capes are almost like the cape coats except that they swing free from the shoulders and are not confined below the arm slits. One particularly pretty one is of cell burella cloth lined with silk of the same shade. The vestee is quite long, has two pockets and is held in place by a belt which runs around the waist. The cape has a convertible collar and buttons covered with the cloth. The vestee may be discarded at any time, for it snaps in place with little catches. Another cape in the same model is in old blue cloth, with white gaberdine lining and collar trimmed with brass buttons.

Another useful coat is in American Beauty silk poplin. It is a regular sport coat model, having a tan brocade lining. The collar is the wide fringed scarf style, and the cuffs button up to a point. For one who wants a striking looking coat there is tan silk, with a gray plaid trimming of khaki kool. The plaid is green, yellow and deep tan and appears in collar, cuffs and lining of sash, and also in wide side panels at each side of the plaited coat skirt. The white broadcloth brazer is also a very popular sport garment.

Among the Jersey coats there is one in blue that is sleeveless and has a draped shoulder cape that falls over the top of the arms. It has a wide, dark blue stenciled border around the bottom and on the edge of the cape drapery, and is finished at the waist with a soft, tubular sash with fringed ends. A sweater shawl is an oddly woven little affair in tan Shetland wool. It has a serviceable hood, finished with a tassel at the back, and ties at the front. It is long enough and full enough to be a warm and cozy garment for evening rides.

Don McVickers and W. E. Boyd spent last Thursday at the Reeves' Ranch in fishing and enjoying a day of outing.

Miss Lena Williams left today for Louisville, Ky., where she was called through the illness of her sister.

Miss Bertha Mae James is visiting her brother, Robert N. Smith.

Mr. and Mrs. A. B. Martin and Miss Sarah Ross returned this morning from Galveston.

Mrs. Inman, who has been visiting her sister, Mrs. J. B. Scott, returned to her home at Tahoka.

Miss Elzela Perdue and Miss Eleanor Fairris left for Amarillo Monday to visit friends.

J. L. Randolph and family have been visiting at the home of his brother-in-law, J. M. Malone.

Miss Willie and Miss Johnnie Young left yesterday for Sacramento, Cal., to visit relatives for the summer.

J. C. Lomax left yesterday after a short business trip here.

The Churches

Baptist Church.

Sunday school will begin at 9:45 o'clock under the tent, east of the church building. Preaching services will be held under the tent at 11 o'clock and the Men's League will meet at 3 o'clock.

Program for Men's League.

Subject: "The Greatest Gift of God."
 "Our Appreciation for the Gift" Guy Ivey
 "Love Cause of Gift" Mrs. J. E. Hatcher
 Solo—"Love Lifted Me" .. Miss Glenn
 "What Does the Gift Mean to Me?" .. D. W. McGlasson
 Evangelistic meetings 10 o'clock and 8:30 o'clock every morning and evening. Every person is invited to attend.

THE REV. I. E. GATES, Pastor.

NATIONAL HONOR GIRLS WILL MEET THURSDAY.

The members of the Girls' National Honor Guard will meet at 4 o'clock Thursday afternoon. The third lesson in first aid work will be covered and practical demonstrations of the application of bandages will be undertaken.

SILVERTON FORMS RED CROSS AUXILIARY.

The first Red Cross auxiliary under the direction of the Plainview chapter was formed Sunday morning at Silverton. Mrs. Tom Carter, chairman of the local chapter, presided at the meeting, and Judge R. C. Joiner spoke about the work of the Red Cross Society.

The members of the Plainview chapter who attended the organization of the auxiliary at Silverton were Mr. and Mrs. Tom Carter, Mrs. T. P. Whitis, Mrs. Joseph Buchheimer, Mrs. E. L. Doland and Mr. and Mrs. E. E. Monzingo.

Miss Lena Maud Smith, who has been the guest of Mrs. W. A. Nash, returned to her home in Fort Worth yesterday.

Wayne Paxton left for Chicago yesterday to close some furniture deals for the Paxton & Oswald Company.

Mrs. I. G. Dodd and children arrived here yesterday from Weatherford to join Mr. Dodd, who has accepted the management of the local telephone station.

Dr. E. Lee Dye left this morning for Tulla, where he will attend the annual county picnic.

Mrs. Howard L. Smithson and two sons left yesterday for their home in Dallas, after visiting friends at Floydada the last three weeks.

Mr. and Mrs. L. L. Green, who have been the guests of friends near Plainview, left this afternoon for their home at Amarillo.

Miss Adelaide Donnelly of Canyon, who teaches in the public schools in this city, passed through this city this morning on her way to Houston.

Miss Elna DeLong and cousin, Ruth Roberts, left this morning for Miss DeLong's home in Roswell, New Mexico.

Miss Ruby Barrow left yesterday afternoon for a few weeks' visit in Hereford.

Mrs. Frank S. Barrow and children left yesterday to visit friends at Hereford.

Mr. and Mrs. Dan C. Hailey, who have been visiting friends at Lockney, left this afternoon for their home in Topeka, Kan.

Mrs. Rosa Lee left this morning for Temple, Texas, where she will visit relatives for the next two weeks.

Mrs. H. Faber, Jr., of San Antonio, who has been visiting friends at Floydada, left this morning for her home.

Miss Pearl Fields of Fort Worth left for her home today, after visiting at Floydada the last few days.

Mrs. A. J. Scribner left today for her home.

Mrs. L. C. Dollard and daughter, Gladys, who have been the guests of friends at Lockney, returned to their home in Wichita Falls yesterday.

HALE COUNTY SCHOOL ENROLLMENT SHOWS 130 INCREASE.

The unofficial scholastic census report sent in to State Superintendent of Public Instruction Doughty by Judge Charles Clemer's last week numbered 2,477 students for Hale County. The student enrollment was proportioned as follows: Plainview 1,097, Hale County 1,063, Hale Center, independent, 163, and Abernathy, independent, 154. This is an increase of 130 over the last scholastic census report taken in Hale County.

CARD OF THANKS.

We wish to express our thanks to the friends who so kindly assisted us during the sickness and burial of our husband, father and brother.

MRS. JAMES K. PACE
 AND CHILDREN,
 MRS. W. L. RIDDELL.

AN EXPLANATION To Herald Readers

The Herald that you should have had last Saturday morning did not reach you until Sunday, consequently you did not learn of our New Sale in time to attend—it was An After Supper Sale Saturday.

We wish you could have been here, though with our extra sales force we could have waited on scarcely three more patrons. That you may not be disappointed we tell you now

We Will Do It Again Next Saturday

Not all items can be duplicated but other equally interesting ones will be added. When you come be assured you won't be disappointed.

The After Supper Sale Saturday—6:30 to 9:30

To close certain summer stocks there will be reduced prices daily.

Richards Bros. & Collies
 WHERE PEOPLE WHO DRESS BEST TRADE

THREE PLAINVIEW MERCHANTS TO CHANGE RESIDENCE.

Three Plainview firms will move into new homes about August 1, according to announcements today. The L. J. Warren Grocery will move into the new building on the east side of the square and the J. T. Hartley & Son will occupy the new brick building on the southeast corner. The Farmers Exchange will be located on the northeast corner of the square when next month is inaugurated.

FORMER PLAINVIEW RESIDENT DIES IN WACO.

W. J. Curtis, a former resident of Plainview, died at Waco last Sunday. It is said that paralysis caused his death. Funeral services were held at 4 o'clock yesterday afternoon at that place.

Mr. Curtis moved from this city about three years ago to Collin County, and later moved to Gunther. He is survived by a wife and several sons and daughters.

Will Consider Co-operative Delivery System at Later Meeting.

The Retail Merchants' Association did not meet Monday night to consider the co-operative delivery system, but it is planned to hold a meeting within the near future. It is believed that plans will be adopted to put the system on experimental basis here. The merchants are all in favor of introducing some new system in order to reduce the expense of the present delivery system.

COURT HOLDS THAT SUBSCRIBER MUST PAY UP BEFORE HE CAN STOP.

The right of a publisher to collect for newspapers taken from the post-office has been upheld in the circuit court in the suit brought by H. F. Staple, publisher of the Atchison County Mail, against Charles Traup.

When a bill was sent Traup for sixteen years' subscription to the Mail he refused to pay it, asserting that he had refused to take the paper from the post office and mailbox a number of times. The plaintiff proved by postmasters and others that Traup did take the paper during all of the sixteen years.

It was shown that even if a subscriber does occasionally order a newspaper discontinued or refuse to accept it, he cannot get out of paying for what he owes the paper, and must pay the arrearage before stopping the paper.

The jury was out only a short time and brought in a verdict for the entire account—sixteen years' subscription at \$1.50 a year, or \$24. The costs in the Justice Court amounted to about \$100 besides the attorneys' fees.

A similar case has been decided by the Court of Appeals, where it was held that anyone taking a newspaper must pay for it as long as he takes it from the post office.

Get that canning impulse. Rubber rings! You'll need good ones while the jars are still hot.

1,200 PERSONS ATTEND OPENING REVIVAL SERVICES.

More than 1,200 persons attended the opening Baptist Revival services Sunday evening conducted by the Rev. I. E. Gates under the big canvas tent, east of the Baptist Church. The services are being held every morning

between 10 and 11 o'clock and every evening at 8 o'clock.

GRASSHOPPER CONTROL

Grasshoppers begin to feed upon the farmers' crops immediately upon hatching from the egg. Unlike many insects, there is no grub-like larval stage nor is there any resting or true pupal stage. They are active and able to hop about almost immediately upon emergence from the eggs. They are, however, unable to fly while young, as it takes from 70 to 90 days for them to develop wings. The farmer should, therefore, attack the pest during its young stages, since not only less material and labor are required, but they can not fly to untreated fields as they often do when mature, according to a Farmers' Bulletin of the U. S. Department of Agriculture, No. 747, entitled "Grasshopper Control," by W. R. Walton.

There are three principal methods of control discussed in the bulletin as being of more or less practical value in combating grasshoppers: Destruction of the eggs, trapping the insects in the field, and use of the poisoned baits.

The eggs of grasshoppers are deposited in the ground, or in the crowns of plants such as alfalfa in the drier regions. Where cultivating implements can be used, the ground containing eggs should be thoroughly plowed, or disked, and harrowed in the fall, as these operations prevent the eggs from hatching the following spring. Digging up the soil by hand is practicable only in gardens, truck farms, or ground under intensive cultivation.

The most common method of trapping is by the use of a simple horse-propelled implement called a hopper-dozer. This consists of a long, shallow pan or trough, with a back and side wings rising at right angles to the pan, mounted on runners. The pan is constructed of galvanized sheet iron, the back and side wings may be built of wooden frames covered with stout muslin or light cotton duck, and the runners are made of wood or old wagon tires. The pan is kept partially filled with water, covered with a film of low-grade kerosene. As the hopper-dozer is drawn over the field the grasshoppers jump or fly against the back and most of them are precipitated into the oil-covered water in the pan. A slight touch of oil is fatal to the insects. These implements can not be used on uneven, stony, or recently cleared land, nor in meadows or fields of grain where the crops have reached a considerable height. Even where they are used successfully, a good many grasshoppers escape being killed.

The most effective method of control, according to the bulletin, is the use of poisoned baits. Poisoned-bran bait has proved to be a simple, reliable, and cheap method of destroying grasshoppers. This bait is prepared as follows: Wheat bran, 25 pounds; Paris green, 1 pound, or white arsenic, 1 pound; 6 finely chopped lemons or oranges; low-grade molasses, such as refuse from sugar factories, or cattle molasses, known as "black strap," 2 quarts; water, three to four gallons. The bran and Paris green or other arsenical are mixed thoroughly while dry, then the fruits are chopped finely and added, and, lastly, the diluted molasses is poured over the bait and the whole thoroughly kneaded. A coarse-flaked bran is most desirable, although where this can not be obtained easily ordinary middlings or alfalfa meal may be substituted; a low-grade, strong-smelling syrup or molasses, however, is essential to the entire success of the undertaking. Crushed ripe tomatoes, watermelons, or limes may be substituted for the lemons or oranges, if necessary. Ordinary powdered white arsenic (arsenious acid) contains nearly twice as much arsenic as Paris green and is comparatively low in price. The powdered form of arsenate of lead may be used, but in this case twice as much of it must be used as of the Paris green. In semi-arid regions water should be added to the bait at the rate of 4 gallons to 25 pounds

of bran, as in these climates the bait dries out very rapidly and the extra moisture is necessary in order to attract the grasshoppers.

Another effective bait is the modified Criddle mixture. This is prepared as follows: Fresh horse droppings, one-half barrel; Paris green, 1 pound, or powdered arsenic, 1 pound; finely chopped oranges or lemons, 6 to 8 fruits, water sufficient to make a moist but not sloppy mash. This bait must be thoroughly mixed before being distributed and as most people object to handling this mixture with the bare hands, a pair of cheap rubber gloves may be used for the purpose.

Both the poisoned-bran bait and the modified Criddle mixture are distributed over the infested fields by sowing broadcast, either on foot or from a light wagon or buggy. A broadcast grain seeder, mounted on a wagon, has been used successfully for this purpose in the western portions of the country.

In applying the poisoned baits in orchards, care must be taken to avoid distributing it close to the trees, because severe injury to fruit trees occasionally results from such applications of arsenical poisons.

The time of day chosen for distributing the poisoned baits has an important bearing upon the results secured. In California and other semi-arid regions the bait should be distributed in late afternoon or early evening, just before the grasshoppers ascend the plants on which they usually pass the night. They are apparently hungry and thirsty at this time, and greedily take the bait if it be available. In the molar portions of the country, such as New England and Florida, the bait should be applied early in the morning to secure the best results. Farmers should not be discouraged if the grasshoppers do not drop dead immediately upon eating the poison, as it usually takes from 24 hours or more for the full effect of the baits to become apparent.

Can! Summer investment of time and money, small returns in food and health, large.

Chicken, horse and hog feed, hay and bran. New Feed Store at the City Scales. WHITE HAY AND GRAIN CO. tt.

CITATION BY PUBLICATION.

THE STATE OF TEXAS,
To the Sheriff or any Constable of Hale County—GREETING:
YOU ARE HEREBY COMMANDED, That you summon, by making Publication of this Citation in some newspaper published in the County of Hale, if there be a newspaper published therein, but if not, then in the nearest county where a newspaper is published, once in each week for four consecutive weeks previous to the return day hereof, F. G. Hill, whose residence is unknown, to be and appear before the Honorable District Court, at the next regular term thereof, to be holden in the County of Hale, at the Court House thereof, in Plainview, Texas, on the 6th day of August, 1917, then and there to answer a Petition filed in said Court, on the 27th day of June, A. D. 1917, in a suit numbered on the docket of said Court No. 1,32, wherein Mrs. Mollie Hill is plaintiff and F. G. Hill is defendant. The nature of the plaintiff's demand being as follows, to-wit:
THE STATE OF TEXAS,
County of Hale.
In the District Court of Hale County, Texas, August Term, A. D. 1917.
To the Honorable R. C. Joiner, Judge of said Court:
Now comes Mrs. Mollie Hill, herein-

after called plaintiff, who resides in Hale County, Texas, complaining of F. G. Hill, hereinafter called defendant, whose residence is unknown, and for some cause for divorce says:

1st. That on or about the 4th day of July, A. D. 1900, this plaintiff was duly and legally married to defendant in Hale County, Texas, and continued to live with him until about the 20th day of June, A. D. 1909.

2nd. That plaintiff has been an actual bona fide inhabitant of the State of Texas for a period of twelve months, and has resided in Hale County, where this suit is brought, for a period of six months next preceding the filing thereof, having become a resident of Hale County about the year 1891, and has resided in Hale County nearly all the time since.

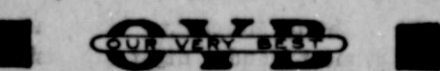

3rd. That at all times, while living with the said defendant after their said marriage plaintiff conducted herself with propriety, doing her duties as a wife, and at all times treated her said husband with kindness and forbearance, and has not been guilty of any act bringing about or causing the hereinafter acts of the defendant.

4th. Plaintiff would further show to the court that on or about the 20th day of June, A. D. 1909, defendant deserted your petitioner, and with the intention of finally separating himself from your petitioner and with the intention of living apart from her, voluntarily and with his own accord, and without any fault upon the part of your petitioner, and since said time, which is more than three years, has lived apart from your petitioner and has wholly neglected your petitioner and their girl, Mabel, and has wholly failed and refused to contribute to their support.

5th. And plaintiff would further show to the court that during the time of their living together as man and wife there was born to them a girl, Mabel, who is now about fifteen years of age, that this plaintiff has the care, custody, and education of said child since the time that the defendant deserted her, and that this plaintiff is now in business which enables her to continue the education of said child,

It takes about 5 gallons of O. V. B. Paint for two coats on the average 7-room house. This spread value is due to careful selection and fine grinding of pigment. It makes your cost very reasonable. Besides, you'll find the paint wear you want in

"All That's Best in a Paint"

Whatever the age or condition of your house, O. V. B. Paint doesn't take long to pay for itself several times over because of its durability. It increases the value of the house with its fresh, bright, protective coat of metal. No adulterants—no cheap ingredients—but a firm weather-resisting surface that's possible only with pure lead and zinc, uniformly mixed by machinery.

Come in today. Let's figure together. Let our color suggestions and cards help you plan your color combinations.

MOON & SNYDER, Petersburg, Texas.

JACK FROST BAKING POWDER

"Try 'Jack Frost' Powder as a starter— Not sour milk or cream of tartar"

that by reason of the premises plaintiff avers that it is right for her to have the care, custody and education of said child, and that it is just and right for this court to so award.

Wherefore, plaintiff prays that defendant be cited by publication to answer this petition; and that on final hearing plaintiff have judgment dis-

solving the marriage between plaintiff and defendant; and that plaintiff have the care, custody, and education of said child of said marriage; and for such other and further relief as the court may think proper and right or as the plaintiff may be entitled to.

HEREIN FAIL NOT, And have you before said Court, on the said first day

of the next term thereof, this Writ, with your endorsement thereon, showing how you have executed the same.

Given under my hand and seal of said Court, at office in Plainview, Texas, this the 28th day of June, A. D. 1917. JO W. WAYLAND, (SEAL) Clerk District Court, Hale County, Texas.

Pure Milk is One of the Cheapest and Best of Foods

Is the opinion of Dr. M. P. Ravenel of the Department of Medicine of the University of Missouri.

Our milk is produced under the most sanitary conditions. We milk with milking machines, in a cement floor barn, and clarify all milk before selling. It is positively the cleanest and purest milk sold in Plainview. "Look in the bottom of your bottle." We cordially invite your inspection from 3 to 5 P. M.

CALOMEL DYNAMITES A SLUGGISH LIVER. Crashes into Sour Bile Making You Sick, and You Lose a Day's Work.

Calomel salivates! It's mercury. Calomel acts like dynamite on a sluggish liver. When calomel comes into contact with sour bile it crashes into it, causing cramping and nausea. If you feel bilious, headachy, constipated and all knocked out, just go to your druggist and get a 50-cent bottle of Dodson's Liver Tonic, which is a harmless vegetable substitute for dangerous calomel. Take a spoonful and if it doesn't start your liver and straighten you up better and quicker harmless to both children and adults. Take a spoonful at night and wake up feeling fine; no biliousness, sick headache, acid stomach or constipated bowels. It doesn't gripe or cause inconvenience all the next day like violent calomel. Take a dose of calomel today and tomorrow you will feel weak, sick and nauseated. Don't lose day's work! Take Dodson's Liver Tonic instead and feel fine, full of vigor and ambition.

LEMONS MAKE SKIN WHITE, SOFT, CLEAR. Make This Beauty Lotion for a Few Cents and See for Yourself.

What girl or woman hasn't heard of lemon juice to remove complexion blemishes; to whiten the skin and to bring out the roses, the freshness and the hidden beauty? But lemon juice alone is acid, therefore irritating, and should be mixed with orchard white this way. Strain through a fine cloth the juice of two fresh lemons into a bottle containing about three ounces of orchard white, then shake well and you have a whole quart of skin and complexion lotion at about the cost one usually pays for a small jar of ordinary cold cream. Be sure to strain the lemon juice so no pulp gets into the bottle, then this lotion will remain pure and fresh for months. When applied daily to the face, neck, arms and hands it should help to bleach, clear, smoothen and beautify the skin. Any druggist will supply three ounces of orchard white at very little cost and the grocer has the lemons.

CITATION BY PUBLICATION. THE STATE OF TEXAS.

To the Sheriff or any Constable of Hale County—GREETING:

YOU ARE HEREBY COMMANDED, That you summon, by making Publication of this Citation in some newspaper published in your county, if there be a newspaper published therein, but if not, then in the nearest county where a newspaper is published, once each week for four consecutive weeks previous to the return day thereof, W. J. Stevens and E. F. Graham, whose residence is unknown, to be and appear before the Honorable District Court, at the next regular term thereof, to be held in the County of Hale, at the Court House thereof, in Plainview, Hale County, Texas, on the first Monday in August, 1917, being the 6th day of August, A. D. 1917, then and there to answer a Petition filed in said Court, on the 26th day of June, A. D. 1917, in a suit numbered on the docket of said Court No. 1551, wherein J. C. Jones is plaintiff and W. J. Stevens and E. F. Graham are defendants. The nature of the plaintiff's demand being as follows, to-wit:

That on or about the 19th day of June, 1917, the plaintiff, J. C. Jones, was lawfully seized and possessed of the lots and premises hereinafter described, holding the same in fee simple; that on or about the said date the defendants, W. J. Stevens and E. F. Graham, unlawfully entered upon and dispossessed plaintiff thereof, and now withhold from the plaintiff the possession thereof, to his damage in the sum of \$7,000.00; that the lots and premises so entered upon and now withheld from the plaintiff by the defendants is all of lot No. 8 and the south one-half of lot No. 7, in Block No. 56, in the original town of Plainview, in Hale County, Texas. That plaintiff, claiming the said lots and premises under a deed duly registered, has had peaceful, continuous and adverse possession of the same, using the same and paying taxes due thereon, for a period of more than five years prior to the 19th day of June, 1917; that plaintiff is holding title to said lots under a deed from J. J. Oxford and wife, Mary Oxford, and under an unbroken chain of title from the State of Texas; that the defendant W. J. Stevens has no legal title, but is claiming an interest in said lots under a deed from J. M. Presler and wife, and the said Presler and wife claim under an alleged patent; that said patent is void as to these lots; that the said E. F. Graham has no rightful interest in and to said title to said

lots, but is claiming the same under a deed from Tilghman Graham, his attorney in fact, to Mrs. S. C. Graham. Plaintiff prays that defendant be cited to appear according to law, and that he have judgment for the title and for restitution, for costs and damages and for other relief in law and in equity.

HEREIN FAIL NOT, And have you before said Court, on the said first day of the next term thereof, this writ, with your endorsement thereon, showing how you have executed the same.

Given under my hand and seal of said Court, at office in Plainview, this the 26th day of June, A. D. 1917. JO W. WAYLAND.

(SEAL) Clerk District Court, Hale County, Texas.

LIFT YOUR CORNS OFF WITH FINGERS. Tells How to Loosen a Tender Corn or Callus So It Lifts Out Without Pain.

You reckless men and women who are pestered with corns and who have at least once a week invited an awful death from lockjaw or blood poison are now told by a Cincinnati authority to use a drug called freezone, which the moment a few drops are applied to any corn or callus the soreness is relieved and soon the entire corn or callus, root and all, lifts off with the fingers.

Freezone dries the moment it is applied, and simply shrivels the corn or callus without inflaming or even irritating the surrounding tissue or skin. A small bottle of freezone will cost very little at any of the drug stores, but will positively rid one's feet of every hard or soft corn or hardened callus. If your druggist hasn't any freezone, he can get it at any wholesale drug house for you.—Adv.

Whenever You Need a General Tonic Take Grove's.
