## C. OF C. WANTS FARMERS AS ACTIVE MEMBERS

### DIVERSIFICATION, INSURANCE RATE, CITY DIRECTORY, BAND FINANCES DISCUSSED

The Chamber of Commerce held one of the best meetings in its history tonight. It was well attended, enthusiastic and many things were acted upon with dispatch.

A. E. Boyd, the president, presided. The various standing committees which were appointed at the last meeting to co-operate with the other civic business, social organizations of the town, also the city council and commissioners' court, reported that they had offered their services and a number of matters were being handled. The chairman of the committees making reports were Mr. Eoff, R. R. Huddleston, T. G. Harkey, Walter Thatcher and J. M. Adams.

C. A. Pierce brought up the matter of the Chamber of Commerce preparing and having printed a commercial directory of the city, giving the name of each firm, what it handles, its owners, employees, volume of business it does, the compilation however being made as a whole for each industry or line of trade in the city, and not for each individual firm. The matter was endorsed and a committee will be appointed when the time comes for action.

E. B. Miller reported that a meeting will be held soon to discuss the organization of a fair association. As about \$15 to \$20 a month more is needed for the financing of the Boys' Band, Meade F. Griffin, Claude Power and John Lucas were appointed to round up those who have not contributed and raise this amount.

The International Harvester Co. had a letter before the meeting proposing to hold free of charge in Plainview within several weeks a meeting and demonstration with lectures by experts on diversification, dairying, poultry and hog raising, etc. If enough farmers can be induced to attend and take interest in the seasons, which will occupy two days. This will be at no expense to Plainview. Mr. Miller suggested that if possible have the meetings held during the poultry show, and the secretary was instructed to tell the Harvester Co. that Plainview wants the meeting and if possible during the poultry show.

Harry B. Adams said he was preparing to issue a complete city directory for Plainview, which will give the name of every head of a family and child of 18 years and over, the home address, business address, phone, in the city; also include a directory of the officers of the county, city, lodges, clubs, churches, and other organizations of the town, railroad time table, etc. He will publish and distribute a copy free to every home and business house in the city. He expects to get enough advertising to pay him for his time and expense in publishing the directory and asked an endorsement of the Chamber of Commerce. Several members warmly endorsed the proposition as a good one, and something that the town has needed for a long time. A resolution endorsing it was adopted by a unanimous vote.

Mr. Halton outlined a plan for the forming of a corporation with ample capital to finance the buying of dairy cows and possibly registered hogs, and sell them to the farmers who will take care of them, and will pay for them on easy terms. Mr. Miller told of how he and associates some time ago put out a lot of registered bred sows with farmers on the 50-50 increase basis, and that the plan has worked out fine and the farmers took to it readily. A committee composed of Messrs. Halton, Miller and O. Z. Gullede, was appointed to work out Mr. Halton's plan and report back to the next meeting of the Chamber.

Matt Cram brought up the matter of securing the sympathy and co-operation of the farmers of the county in the activities of the Chamber of Commerce, and several members spoke of their being a spirit of resentment on the part of many farmers about town people butting into their affairs and trying to tell them how to farm. A committee composed of C. A. Pierce, J. M. Adams and John Boswell was appointed to see if some plan can be arrived at to dispell this prejudice from the minds of the farmers and secure their co-operation and sympathy in the work of the organization, and also secure them as members.

J. E. Watson of the membership committee, asked that placards be printed for members so they can place them on the walls of their places of business, and the secretary was instructed to have same printed. The initiation fee of \$5 was abolished and members will be asked to pay by regular dues. The very important matter of securing a lower fire insurance key rate

## Japan Playing for Time

Reports from the arms conference in Washington say that Japan is insisting on a larger naval standing than suggested under the Hughes plan of 5-5-3, and that the United States insists that she is not entitled to it as her present navy does not even show this ratio. Japan has asked for additional time for her experts to further examine into the matter of naval statistics.

## Highway Work Goes Rapidly

The work on the Clovis-Portales highway is being rapidly completed now, and will be finished by about the middle of December. The foundation of the road has been completed and now the road is being surfaced with caliche, which consists of a mixture of underground clay and ground rock. This surfacing is put on in a thickness of about a foot and makes a very fine road after being properly rolled and packed. When this highway is completed the road from Clovis to Portales will be one of the best in the entire state. Much work has also been done on the Clovis-Texico highway which was part of the same contract, but this road will not be hard-surfaced for the present.—Clovis (N. M.) News.

## Automobile Caught on Fire

Friday night about 9 o'clock the fire truck was called to the home of A. M. Steddard, on account of his Moon automobile catching on fire, probably from defective wiring, as he was about to drive it into the garage. The flames were extinguished, the car being damaged somewhat, principally the top.

for Plainview was advanced by Mr. Gullede. The present key rate is 42c, and by remedying several matters it can be greatly reduced and Plainview placed in a lower classification, thus saving lots of money on insurance premiums. T. G. Harkey also urged that steps be taken to have the reductions made. Mr. Pierce told of how Amarillo has a key rate of 22c, and an insurance man recently told him there was no reason why Plainview should not have as low a rate. Messrs. Gullede, J. B. Maxey and Miller were appointed to investigate this matter and report at a future meeting of the Chamber.

## BLED SOE WELL MAY OPEN GREAT GAS FIELD ON PLAINS; KNOW SOON

### Strikes Same Kind Formation as Amarillo Field--Showing of Gas and Oil--Well is Causing Interest

Indications continue to grow better that the Bledsoe well being drilled in the south part of Hale county, five miles west of Abernathy, will strike paying oil or gas.

The well Sunday was down more than 1,300 feet, and had struck a grey and blue shale somewhat similar to that just above the gas flow in the gas wells above Amarillo, where there are several of the largest gas wells in the world, one of them producing 105 million cubic feet per day. Above Amarillo this strata was struck about 1,700 feet deep, and as Hale county is nearly 500 feet lower elevation it is argued that it indicates the same strata extends possibly all over the Plains, and if gas is found in the Bledsoe well it indicates that the entire Plains has a sheet of gas under it, which will mean many wells will be drilled if the Bledsoe well strikes paying gas or oil, for this would become the greatest gas fields so far

struck in the world. Hence, great possibilities hinge upon the Bledsoe well.

Mr. Bledsoe insists that gas or oil in paying quantities will be struck not deeper than 1,700 feet, but the driller from the indications so far thinks it will be struck much shallower than 1,700 feet. When he gets through this grey and blue shale he expects to find something worth while.

Three small pockets of gas were struck while drilling Saturday night, and those at the well Sunday report there is a noticeable oily schum over the slush which comes out of the well and the drill is proceeding with oil.

The drilling is proceeding now without a stop and is running day and night. There is plenty of casing on the ground to go as far as 2,000 feet deep.

It is thought that the well will reach the 1,700 foot level within the next few days, if nothing is struck before that time.

## Tulia Lumber Yard Burned

Tulia, Nov. 26.—Fire which started from burning grass on an adjoining lot completely destroyed the sheds and stock of the A. J. Harris Lumber Co. here this afternoon.

The loss was placed at \$20,000, partially covered by insurance. It is announced that the sheds will be rebuilt and the business continued in its present location.

The fire occurred about 4 o'clock and was well advanced before it was discovered. The fire company made a heroic fight to extinguish the flames. For a time it was feared that the blaze would spread to the buildings east of the lumber yard, but the absence of wind enabled the firemen to confine it to the lumber yard.

## Great Stars Lately Found

The existence of greater stars than Betelgeuse, the giant star whose diameter was measured at 30,000,000 miles was announced by Prof. Albert A. Michelson in an address before the National Academy of Science last night.

Antares, a star in the constellation of Scorpio, was named as one of the super-stars, but its exact size has not yet been determined, he said. Other stars whose magnitude may surpass either of these, are to be measured, he said, by means of the new interferometer developed by Prof. Michelson.

Prof. Bernard exhibited photographs of the "milky way" made through the great one-hundred inch reflector at Mount Wilson, which demonstrated, he said, that the dark spots in the milky way were not holes or openings, but really dark, non-luminous bodies thrown into relief when protected against the bright background of distant stars.

Mr. Boswell has received letters from the secretaries of several chambers of commerce complimenting the booklet, its appearance and the content and illustrations.

## Dallas Man Claims Automobile

W. C. Dunton, proprietor of a cafeteria in Dallas, is here today to get a Studebaker seven-passenger car which was stolen from him nearly a year ago and brought here. The party stealing it came here, rented a farm near town, raised a wheat crop, mortgaged the car and the crop to a local bank. The bank had to foreclose on the car and take it. Later the man was arrested for theft of this and several other cars, and one night while in jail escaped and has not since been heard of.

## Used Cat-o-Two Tails

This morning the trustees of one of the rural schools of Hale county brought to Judge L. D. Griffin a strap of leather, split at the end into two tails having a wire in the end, which they said the teacher, who is a woman, has been using on the pupils, giving one of them as many as sixty-three lashes. They said the wire was longer, but was partly broken off while being used.

The matter will be investigated by the authorities.

## Bond Market Improving

The county and municipal bond market is improving, and it is not thought that there will be much hardship in selling the city auditorium bonds. Amarillo sold \$550,000 worth of city and school bonds a few days ago at par.

Inquiries are being received by the city officials and the secretary of the Chamber of Commerce from money lenders and bond buyers, asking if any bonds are for sale or are there any contemplated issues.

Wright of Plainview, director of Plainview's Chamber of Commerce juvenile band, which is composed of members of the Plainview Boy Scout organization, is to open a class in Amarillo November 30, it has become known here. Mr. Wright will devote two days a week to the training of a juvenile miyed band in Amarillo.—Amarillo Tribune.

M. M. Herrine, formerly a citizen of Tahoka, was here a few hours Saturday, en route to Fort Worth, from Roswell, N. M., where the family now resides.—Tahoka News.

We recently had a letter from A. E. Tunberg, who now lives at Wausa, Neb., telling us to send him the News, as he and his family are interested in the "every day occurrences, weather conditions, markets, crops," on the Plains. He also says they enjoy the News editorials very much. Mr. Tunberg and family lived north of Plainview several years ago. They have many friends in this county.

## Hand Shaking Menace to Health

New York.—The health of the nation is menaced by the American custom of shaking hands, Dr. Francisco X. Sauchelli, health expert, declared here recently.

"President Wilson is suffering from the effects of too much hand shaking under nerve tension," he said. "The custom undoubtedly was a contributing factor in the death of Colonel Theodore Roosevelt, and I am sure it was materially responsible for the death of Enrico Caruso."

"I do not think it will be many years before Americans turn to embracing or some other less harmful form of greeting."

## Flying Becoming Safer

A commercial flying organization reports that in 12 months its machines flew 95,020 miles, carrying 6814 passengers. The service covered Key West to Havana, New York to Atlantic City, New England cities and Great Lakes towns.

"Not a single passenger or employ was injured during these operations," says the report.

Flying already is safer than most of us imagine.

The emperor of Japan is very dangerously sick and will likely "kick out" soon. Some way or other, we just can't feel very sorry about a king dying.

Bob Henry of Waco has announced as a candidate for U. S. senator. Bob came out last in the race five years ago, and he will doubtless do as well this time.

These days a number of "father and son" banquets are being held, to bring them together. In olden times conferences were often held in the woodshed.

There has been a good deal of agitation for the past few years anent a new motto for the coin of the realm. Personally, we have leanings toward "Abide With Me."

We may as well not look for all the labor troubles to be settled—if they were the labor leaders and agitators would lose their jobs. Keeping trouble going is too often their stock-in-trade.

Seven thousand school teachers attended the thirty-fourth annual session of the State Teachers' Association in Dallas last week. Of course, as usual, they passed resolutions demanding increased pay for teachers and higher taxes.

Milk won a great victory in the recent New York City election. One Tammany candidate distributed many thousands of bottles of milk among the people of the city, and was elected by 400,000 majority. There was a time when something much stronger than the lactic fluid won elections for Tammany.

Accidents at railroad crossings are killing 1500 people a year and injuring three times that many, says C. W. Galloway, vice president of the Baltimore and Ohio railroad. Most of the victims are motorists who fail to slow down, look both ways along the tracks and listen for locomotive whistles. Unless you are anxious to meet the undertaker, stop, look and listen!

The Memphis Herald, which is edited by W. A. Johnson, former state senator and lieutenant-governor, says: "The present visit of the governor and his committee to the penitentiary, for the purpose of investigating conditions, would be ridiculous if it was not such an important matter. The governor had several weeks ago notified Capt. Herring and other officials that the visit would be made. They have cleaned and polished and scrubbed up and put everything in order for the occasion. The committee has assembled and been met by the citizenship of Huntsville and a brass band. When the official party arrives every thing has on its 'Sunday clothes' and there is not a hitch in the program. There is not a single thing wrong in the management and it is all just right. Why of course it was known that it would be that way. The pro, or way to see prison affairs as they are in the daily grind is to walk in on them without so much sound of trumpets and advertising. The Herald believes our penitentiary system is not at all good, and that the way to remedy it is to get at the bottom of the cause. Governor Neff no doubt thinks he is on the right track, but there is too much spotlight publicity to this to get any real facts as to the everyday life in the penitentiary."

The newspapers a few days told of a man near Carlsbad, N. M., having with his bare hands grappled with a pole cat, catching it by the tail and beating it to death against the ground. That man is sure brave and for nerve has any soldier in the World war or any other war backed clear off the boards. Grabbing a pole cat by the tail is far more dangerous than even "sassing" your mother-in-law or calling a West Texas cowman a liar.

ANTIQUATED SYSTEM OF TAXATION

We have a debt ridden, tax burdened world. The nations, many states, counties, municipalities and improvement districts add millions to their obligations annually, and then increase their assessed valuations and flatter themselves that they owe only a small percentage of what they are worth. We have got a firm grip on our boot straps and are breaking our backs trying to lift ourselves out of insolvency to the plain of solvency. Labor is not producing and money has quit working. Many billions of dollars are invested in tax free securities and billions more are being issued. Men with idle money say: "If we invest in industries and are successful, the government takes our profits, therefore we play safe and buy tax free bonds." Thus industry is starved and more thousands added to the roll of the unemployed. Continual shifting of the burden of taxation to the shoulders of those engaged in business and industrial pursuits, whether factory owner, employee or producer, can have no other outcome than to increase taxes beyond the ability to pay. The great problem of today should be the modernizing of our systems of taxation in order that the expense of government might be more equitably distributed and kept within our income. Instead of applying themselves to this phase of the situation, we find government officials devoting their time to an effort to discover means whereby they may secure more money to spend.

It would be a step in the right direction if the National and State governments would select qualified men to make a thorough study of the question of taxation with a view to evolving some system which could be uniformly applied in every state and which would distribute the cost of government in a fair and equitable manner. Certainly one haphazard and unjust manner of assessment should be thrown into the discard.—Farm & Ranch.

A Seth Ward small boy was told by a teacher the other day that he was descended from a monkey. He ran and asked his mother if it was true. She replied, "I'm sorry I can't tell you, as I've seen only a few of your father's people."

A Houston judge last week issued an injunction against a woman in that city restraining her from gossiping or "making any remarks" about a certain woman. Notice of her death may be looked for soon, for if a gossip cannot gossip she will soon die. The three most despicable creatures in the world are a bootlegger, a professional gambler and a long-tongued gossiping woman.

In the early days of this country all the 100 per cent Americans used paint on their faces. Those of the present generation roar because the women are but following in their footsteps.

Some folks certainly have a consuming thirst that is past all understanding. A bunch of beer-guzzlers have organized with the hope of having a law passed by congress permitting the making and selling of beer at a high tax, the money to be used to pay the soldiers a bonus—in fact, they wouldn't mind paying the entire war debt in this way. Evidently some people want beer very much—when they insist on paying a heavy government tax to get it. Most of us kick like bay steers at additional taxes.

When a fellow gets to working for the government he accumulates a lot of nerve. The shipyard workers are preparing to demand a full year's wages as an indemnity if the disarmament conference decides to stop work on the warships Uncle Sam is now building. Nobody, it seems, has any mercy on the poor old tax payer.

"THE ONLY MAN THAT WAS CHEERED"

When the body of the nameless hero of the great war was laid to rest at Arlington on Armistice Day the greatest soldier in that war was noted in the procession that followed the remains of the American boy through the streets of Washington.

That greatest soldier was Woodrow Wilson. And Woodrow Wilson as truly gave his life in that colossal conflict as did the lad whose body found sepulture among the tombs of our honored and heroic dead.

And the surging thousands, as they saw the stately figure of Woodrow Wilson, could not repress their acclamation of this glorious man who had saved the world.

The reporters in detailing the incident, said simply: "He was the only man that was cheered." The president had passed, followed by a long retinue of officers, soldiers and statesmen. The great crowds were silent until they saw Woodrow Wilson. Then as with one voice they cheered. They all cheered, and I thank God our martyred president survived to see that day.

As the disarmament conference deliberates at Washington the whole world cheers. They are not cheering Harding, nor Hughes, nor Briand nor Feeh. They are cheering Wilson. They see a gleam of hope that this conference will somehow gather the broken fragments of what Woodrow Wilson planned, and yet rescue peace for the world—that peace that was enshrined in the League of Nations covenant; that peace that he brought back from Versailles; that peace that he incarnated in his life; that peace for which, when he is gone, all the world will know he died.

The throngs will continue to applaud, and their shouts of praise will increase with the passing years like the climbing waves of the sea. And when history shall write its final appraisal of our honored Americans the name of Woodrow Wilson will shine resplendent as the greatest man this country ever produced.

In that day the only badge of immortality that Lodge and his crowd can claim will be that once they came into the orbit of the light of his majestic life and were the men that hounded Wilson and betrayed a suffering world.—J. B. CRANFILL, in Dallas News.

A food expert up north declares that eating turnips "depresses one's spirit." Not so. When we are full up on turnips boiled with their greens and a hunk of ham bone, we feel as optimistic as a West Texas oil promoter, and as puffed up as a turkey gobbler.

Great quantities of eggs and poultry are being marketed by the farmers of the Plainview country, who are finding their poultry flocks a good source revenue in this period of low prices for grain products. The farmers find that at present prices for grain, a wagonload of poultry will bring them as much as several loads of maize heads, and that a can of cream will bring them a greater return financially than a wagonload of row stuff.

Scientists in New York city are teaching people how to live 100 years. The best way we know of is live in the Plainview country, lead a clean moral life and work like the dickens

President Harding's proposal of the organization of a council of nations to meet each year and talk over relations and questions that may arise, has been coldly received by the delegates to the disarmament conference, and it now seems that he will not likely be able to put it over. Doubtless, they feel that as the United States "threw them down" by refusing to join in the League of Nations, they do not care to join in a makeshift. When the republican leaders planned the defeat of the ratification of the League of Nations in order to defeat President Wilson and the democratic party, they committed the greatest political crime this nation has ever experienced. It is astonishing, as

well as horrifying that men of their standing would do as they did.

**Hand Shaking Menace to Health**  
New York.—The health of the nation is menaced by the American custom of shaking hands, Dr. Francisco X. Sauchelli, health expert, declared here recently.

"President Wilson is suffering from the effects of too much hand shaking under nerve tension," he said. "The custom undoubtedly was a contributing factor in the death of Colonel Theodore Roosevelt, and I am sure it was materially responsible for the death of Enrico Caruso."  
"I do not think it will be many years before Americans turn to embracing or some other less harmful form of greeting."

THE most interesting and important phonograph for the Christmas shopper to hear is Mr. Edison's new instrument.

Its remarkable achievements have created a new standard for phonographs.

On May 25th, 1921, at a recital given in the 2nd Field Artillery Armory, Brooklyn, Gen. Wingate heard the New Edison's RE-CREATION of Miss Helen Clark's voice compared with Miss Clark's original voice. The above is an extract from his letter to Mr. Edison. No other phonograph, in a public test, has ever fooled its listeners into believing they heard the living artist.

We have an exact duplicate of the instrument which amazed General Wingate. It is the only phonograph which has something new to let you hear.

Compare it with other phonographs and talking machines. Come in and hear these comparisons. They're worth while. Come in.

## OLD ABERNATHY CITIZEN DIED WEDNESDAY MORNING

Uncle John Gaughnon, an aged citizen of Abernathy, died here Wednesday morning at the home of an old friend, W. A. Bartrand, and was buried at Lubbock cemetery Wednesday evening.

"Uncle John" as he was well known and spoken of in Abernathy, has been in that community for about fifteen years. He was liked and admired by the entire citizenship, as he has been very active, and was, though very old, always able to keep himself in comfortable circumstances. At seventy years of age he worked as a mechanic and carpenter and for the past ten years has been able to do enough work to accumulate money. He was born in Canada in 1830, and leaves no relatives known to his friends at Abernathy. His remains were carried to the Simmons Undertaking parlor and prepared for burial. Interment was in the Lubbock cemetery, funeral conducted by Father Keller, of the Roman Catholic Church, who lives in Slaton.—Lubbock Avalanche.

Troop 1 met in regular session Friday, Nov. 25th, with an attendance of forty persons; thirty-six scouts, three visitors, and Scout master Offlighter. The meeting was called to order at 7:30 p. m. The meeting opened with the song "America" and then everybody repeated the scout oath. Offlighter made a short talk about the coming of the new Scout year and preparations to be made for it. The scribe then called the roll. This was followed by the librarians' and treasurers' report. The treasurer reported that there was \$105 in the treasury. Three new members were added to the scouts. Dues were next collected by the treasurer. Most of the boys paid 50 cents to re-register for the new scout year. Those that did not will do so at the next meeting.

Other business was attended to and then Offlighter made another talk. The Scouts decided to celebrate the end of the Scout year at the next meeting. Officers and patrol leaders will be appointed. There will also be a feed at this meeting.

After this decision games were played until the meeting was over. Reporter.

## CONFEDERATES CAPTURE CHATTANOOGA AGAIN

### OLD SOLDIERS ENJOY RE-UNION WITH THEIR FORMER COMRADES

Chattanooga, Tenn.—The trip north east from Birmingham was through a broken country with wooded hills with valleys between. The autumn foliage of the trees is gorgeous in all the rich colors from blazing red to pale yellow. We of the Plains miss the hills, valleys and trees.

In the valleys the farms are somewhat larger than those in Southern and Central Mississippi, and as we came northeastward through Alabama and into Georgia they seemed to increase in size. However, as compared with those on the Plains they are but garden patches. Corn seems to be the principal crop, but we saw many fields of cotton. Arain fell all the way from Birmingham to Chattanooga as we came, and the papers say heavy rains have fallen all over Alabama and Mississippi, breaking the drouth of six months.

There are several good towns in Northwest Alabama, which contain industries, some of them being hosiery mills.

We came into Chattanooga in a rain, and the clouds obscured Lookout mountain though we passed around the foot of it, skirting the pretty river for quite a distance.

### Chattanooga Among the Hills

Chattanooga is a city of possibly 35,000 people, and is built among the hills, some of its streets being very steep. It has several modern skyscrapers, but most of its buildings are from one to three stories of the vintage of twenty-five years ago.

### Confederate Re-union In Progress

The annual Confederate re-union was in progress, and the city is gaily decorated with the "Bonny Blue flag," the "Stars and Bars" and the tricolor bunting, while the streets and hotels are crowded with grey-haired veterans wearing the grey suits of the Confederacy, and on their breasts the ribbons and medals telling the regiments in which they fought sixty years ago. A touch of color is given by the many camp sponsors, maids of honor and matrons of honor, wearing long wide ribbons. The Daughters of the Confederacy and the Sons of the Confederacy are also holding their annual re-union here.

None of the Confederate veterans is younger than seventy-six years, and I met one who is 102 years of age. The most of them are rather feeble, and places of rest and emergency medical stations are numerous. Some of the veterans, however, are well preserved and look strong and stalwart and one would think some of them not over sixty years of age. The city is given over to the veterans, and every courtesy and comfort is being accorded them, signs are up everywhere "Veterans Don't Pay."

The meetings of the veterans have been largely attended. Gov. Alf Taylor and other notables are among the speakers. Gov. Taylor and several of the old soldiers got their fiddles and had some great music playing old tunes of the Southland and brought tears and memories of long ago—for the old songs of the South have not only the sweetest melody but their associations melt the heart—for they are of the heart.

It has been decided by a resolution

that so long as four Confederate soldiers will attend the annual re-unions will continue to be held. The next reunion will be held in Richmond, Va., the capital of the Confederacy.

In the lobbies of the hotels there are gay crowds of veterans, their wives, daughters and sons, and most of the time there is dancing to the playing of old-time fiddlers. The dances are the old-fashioned square-dance, the stately minuet, the Virginia reel, etc., and some of these old four-score-year-old vets dance like they were only twenty. Last night we attended a ball given to the sponsors and maids-of-honors in the Billy Sunday tabernacle. Several hundred couples took part in the grand march and the dancing. The visitors are being shown many social courtesies for Chattanooga people are very hospitable.

In a hotel today an old grizzly fellow wearing a grey suit and a fantastic black hat with a large feather plume in it, came up and shook hands with me and said "I am one of the only two survivors who were on the Merrimack when it fought the Monitor in Hampton Roads." Here and there we meet men carrying hornets' nests and other designations of the nicknames which made their regiments or divisions famous during the war. In the hotels there are headquarters for the various regiments and other units and the old comrades are meeting each other, some of them the first time since the war closed, and they are happy as they recount the incidents and deeds of daring of those days in which men's souls were tried.

I have attended a number of national Confederate re-unions during the past thirty years, and I enjoy doing so, for it is inspiring to look into the faces of these men who fought for a great principle that was right, and to hear the bands play "Dixie" and other heart-swelling airs to the sound of which these men charged into the very jaws of death.

My father was a Confederate soldier, a cavalryman under Gen. John Morgan—one of the Morgan's "terrible men" who went farthest north of any command during the war—and he fought here at Missionary Ridge and on Lookout mountain in "the battle about the clouds." I am indeed proud of the fact that I am the son of a Confederate soldier.

Chattanooga was a battle ground during the war, and both armies occupied it. Here and there about the city are large tablets telling of what has occurred on that particular spot. Just out of the city rises Missionary Ridge and Lookout mountain and a few miles away is the battlefield of Chickamauga, the bloodiest battle of the war.

In Friday's News I will tell of our trip over the battlefields of Chickamauga, Missionary Ridge and Lookout Mountain. J. M. A.

### Blue Hogs in Crosby County

Crosbyton can truly boast of having some of the finest hogs in Texas, if not, perhaps, in the United States. Some of the best Poland China and Duroc Jersey hogs to be found have been some of the hog fanciers pride for some time, but not long ago Mr. W. R. Davis, of Crosbyton and S. A. Guy of the Cap Rock Jersey farm received a shipment of Sapphires, (Blue Hogs). The Sapphires are a new breed of hogs and said to be very fine for quick growth and being ready for market at an early age.

It is claimed that it took thirteen years to develop the Blue Hogs, and that 90,000 head of hogs were used in the experimental stages of the work, that the cost of producing the Blue Hogs is estimated at \$278,000 and there are about 2,500 head on farms now for breeding purposes.—Crosbyton Review.

### TESTED RECIPES

**Pineapple Salad**—One can pineapple, three oranges, three bananas, Cut pineapple, oranges and bananas in small pieces, place in dish. Make a dressing, using the liquid from pineapple. Bring liquid to boiling point and thicken with one cup of sugar, egg, two tablespoons flour, mixed together. Let cool and pour over fruit.

**Pumpkin Pie**—Cut up pumpkin, scrape out pulp, but do not peel. Cook until tender, drain and steam dry; let cool; put through sieve; four cups pumpkin, two eggs, two cups sugar, two tablespoon flour, three cups of milk, one teaspoon cinnamon, one teaspoon allspice, one quarter teaspoon ginger, two teaspoon salt. This will make two large pies.

**Ginger Bread**—One egg, one cup sugar, one cup dark molasses, one-half cup shortening, three and one-half cups flour, two cups boiling water, two level teaspoons of soda, two level teaspoons allspice, one level teaspoon cinnamon, one level teaspoon ginger. Raisins or nuts and a cheap icing may be added.

### HOLIDAY CANDIES

**Fudge**—Two cups granulated sugar, two rounding tablespoon of cocoa, one-eighth teaspoon cream of tartar. Mix well together, then add one-half cup milk.

Boil over a slow fire until the mixture forms a soft ball in cold water, stirring only at first, until the sugar is dissolved. The milk will not scorch if the fire is slow. Now add one teaspoon butter and remove from fire, then add one-half teaspoon vanilla. Do not stir.

Set in a pan of cold water until cool, then beat briskly until it begins to harden. Do not turn out on the plate too soon—thorough beating now gives a fine texture.

If it becomes too stiff to stir and is not perfectly smooth and fine, turn out on board and knead as you would fondant. Then turn out on plate and cut into squares.

### BREAD AND ROLLS

**Bread Cake**—One cup of sugar, one cup of light bread sponge, one cup of flour, one good half cup of butter, one egg; add citron and flavor with nutmeg for a white cake or spice to taste and add raisins, currants or nuts as desired. Bake in a moderately hot oven.

**Soda biscuit**—Two quarts of sifted flour, a piece of butter the size of an egg, one saltspoon of salt, two teaspoons of cream of tartar, one teaspoon of soda or three teaspoons of baking powder and milk or water to make a dough. Sift the flour and powder together three times, rub the butter in, add the salt and lastly the milk. Mix as well as possible. Roll three-quarters of an inch thick, cut with a biscuit cutter and bake in a quick oven. This is nice crust for various purposes.

**Vienna Rolls**—One pint of sweet milk, scalded; one quart of flour, one tablespoon of butter added to the milk, one-half teaspoon of salt, one-half of a cake of yeast, softened in a little lukewarm water. Have the milk lukewarm; then stir the ingredients together and beat for five minutes; then cover and set in warm place to rise. Do this at night. In the morning flour the board, put the dough upon it and roll out one-half an inch thick. Cut with a large round cutter fold each one over to make a half-round, wetting the edges a little so that they will stick together. Place on buttered tins so as not to touch, and when light bake in a good oven. When done brush over with milk to give them a gloss. Send warm to the table.

Nuts may be added just after removing from fire. A very good variation is made by leaving out the cocoa and adding nuts.

In making Taffy, etc., for the children, if a teaspoon of vinegar is added for each cup of sugar, and the mixture is not stirred while boiling, you should have no trouble with it going to sugar. Finally, do not scrape out the pan when turning taffy into a plate.

**French Dressing**—There is nothing quite so nourishing as the best olive oil. It is not economy to buy the oil substitutes, for the finest olive oil obtainable is a valuable food, and one should attempt to use it once every day. One eighth teaspoon mustard (powdered), one teaspoon salt, one clove garlic, juice of one-half lemon, one cup olive oil (best Italian) ice cold, good dash of paprika. Beat thoroughly with a fork until well blended—remove the garlic—and pour over lettuce in a large bowl. Stir the lettuce and dressing thoroughly together—"fatigue it" as the French say.

## COFFEE AND THE GOVERNMENT

It is estimated that coffee bought and sold already roasted by the average retail store does not reach the consumer's table until three to six months after it has left the wholesale coffee roasting machine.

Anyone who knows anything about coffee will tell you that after it has been roasted even if left in the bean, it deteriorates very rapidly. In fact, the Government, during the war period, in investigating the subject of coffee deterioration, found that coffee lost at least thirty per cent. of its drinking quality after it had been roasted thirty days.

If the deterioration is so great in thirty days, you can appreciate the deterioration in roasted coffee in six months.

The Missouri farmer is now gathering one of the largest corn crops in the state's history. Notwithstanding the high yield of corn this season, it is estimated by the department of farm management of the Missouri College of Agriculture that it cost an average of 62 cents a bushel to produce this corn. For this corn that cost 62 cents the farmer is getting from 25 to 35 cents a bushel.

Miss Ruth Evans of Wayland college faculty spent the week-end visiting in Slaton.

#### Highway Work Goes Rapidly

The work on the Clovis-Portales highway is being rapidly completed now; and will be finished by about the middle of December. The foundation of the road has been completed and now the road is being surfaced with caliche, which consists of a mixture of underground clay and ground rock. This surfacing is put on in a thickness of about a foot and makes a very fine road after being properly rolled and packed. When this highway is completed the road from Clovis to Portales will be one of the best in the entire state. Much work has also been done on the Clovis-Texico highway which was part of the same contract, but this road will not be hard-surfaced for the present.—Clovis (N. M.) News.

#### Seeks Owner of \$57,000

Chicago—Charles S. Neumann, wholesale flour dealer, has a \$57,000 roll he wants to give away. Flour sales have been good with Neumann lately and he has no use for \$57,000 he picked up on the street. Consequently he is advertising for the owner and, if no results are obtained, he says he will divide the money between the Red Cross and children's relief in Europe.

### CAN CHIROPRACTIC CURE DISEASE?

No neither can anyone else. Chiropractors remove the cause, nature does the healing. A Chiropractor will find the "Pinched Nerve" that is depriving the affected part of its sustenance and will remove the pressure.

This adjusting supplemented by electrical and mechanical massages stimulates the health and vitality of the nerve and cause it to function properly.

#### DODGE BROTHERS APPOINT DEALER

Shepard-Mathes Motor Co. Will Sell  
Popular Detroit Car In This  
Territory

Announcement is made by Dodge Brothers, Detroit, of the appointment of Shepard-Mathes Motor Co. in the Carter-White building with a complete salesroom and service station.

The remarkable popularity of the Dodge Brothers Motor Car has caused automobile men all over the country to clamor for sales privileges, but Dodge Brothers policy of quality in selling methods, as well as quality in the car, requires a painstaking investigation in every instance before a selection is made. In Messrs. Shepard and Mathes Dodge Brothers have a dealer on whom they believe they may rely for both progressiveness and fair business methods.

The prompt manner in which Dodge Brothers assumed one of the foremost positions in the automobile industry is regarded as a striking testimonial to the high regard in which their name was held by the public even before they marketed a motor car bearing their name. Prior to that time Dodge Brothers had built the vital parts for more than a half million other cars, establishing a reputation for thoroughness and mechanical skill.

This reputation has been more than upheld. It is said of Dodge Brothers in explanation of their unusual success, that they spare no money or effort in building a car to suit their particular ideas of thoroughness in manufacture. What their ideas on this subject mean to the purchaser of their product may be imagined from the fact that they have a staff of several hundred inspectors who do nothing but check up on workmanship in the various processes of manufacture. In addition there are several large departments devoted entirely to similar work, such as the physical and chemical laboratories where raw and finished materials are subjected to tests so thorough as to leave no doubt of the quality.

It is significant that the first Dodge Brothers Motor Car ever built was made up exactly as a car is made in the regular line of production. Ordinarily the "experimental job," as the first car is known, is built of castings because of the great time and expense involved in preparing dies for forgings. Dodge Brothers, however, decided that their experimental car should be like the car they expected to build, in every detail, so that neither they nor the public might be "fooled." So they spent almost a year in making these dies and preparing otherwise for a completely manufactured car. As a result, when the car was built they knew what they had and what they and the public might expect of their products. As a further result this first car, although only an "experimental job," has rolled up a total of more than 150,000 miles, traveling year after year under all sorts of road conditions. This is but an illustration of the many things unique in the history of Dodge Brothers as manufacturers.

Public approval of their principles of thoroughness is seen in the rapid expansion of Dodge Brothers Works made necessary by public demand. In December, 1921, it was a plant of less than 20 acres. Today Dodge Brothers Works covers 100 acres of floor space.

#### An Appreciation

In behalf of the faculty of the Plainview high school, I wish to express our appreciation of the thoughtfulness of the Parent-Teachers' Association and the liberality of the merchants of Plainview in furnishing and equipping a rest room for the use of high school teachers and as an emergency room for pupils.

The room is made comfortable with two rockers, two pairs gray blankets, one cretonne cot cover, two cotton pillows, one coal oil stove, one coal oil can, five gallons coal oil, one large mirror, one box-stand curtained with cretonne, one bowl and pitcher, one bar toilet soap and dish, one can talcum powder, one comb, one roll paper towels, one picture, one rug, one curtain pole and curtain, one table runner and one borrowed cot. The sewing on the cover, pillows and curtain was done by girls of the Domestic Art department.

These articles were either compliments of the merchants or were made possible by monetary gifts.

Beulah Duensing.

Seven thousand school teachers attended the thirty-fourth annual session of the State Teachers' Association in Dallas last week. Of course, as usual, they passed resolutions demanding increased pay for teachers and higher taxes.

These days a number of "father and son" banquets are being held, to bring them together. In olden times conferences were often held in the woodshed.

We have unlimited dry storage space for household furniture.—Call Perry Motor Co., phone 541.
