## ST. JOSEPH STOCK YARDS.

Wonderful Growth and Development of This  
Important Market for Live Stock.

Success ever invites attention and commands patronage. In the busy world to-day the enterprise which makes a winning must first demonstrate its merit. These principles, carefully considered, have been a factor in building up the live stock market at South St. Joseph, Mo., where a representative of the LIVE STOCK INSPECTOR finds a surprising activity in trade and a phenomenal increase in daily receipts of cattle, hogs, sheep, horses and mules. There was a time when the St. Joseph stock yards were an untried enterprise. That time has passed away and the management stands out to-day in the sunshine of success, inviting shipments of live stock from a territory limited only by the length of the rails which bear hundreds of cars to them daily. The chief advantages claimed are not limited to one or two or three, but consist of many reasonable facts. The water used in exchange building and pens, in alleyways and packing plants is of the finest quality and unexcelled anywhere. Stockmen who have had wide experience as shippers claim a superiority for the water and its "fill" on consignments. Another advantage is that the yards are located in the heart of the great corn producing districts, where crop failures from climatic causes are unknown, where neither early nor late frosts injure or the hot winds invade, thus insuring the highest prices for feeders by reason of many near by feed lots. Again, these yards having the advantage of Missouri river rates, draw shipments from the southwest at Kansas City rates and from the northwest at Omaha rates, thus enlarging their

JOHN DONOVAN, JR., (Gen. Manager St. Joseph Stock Yards.)

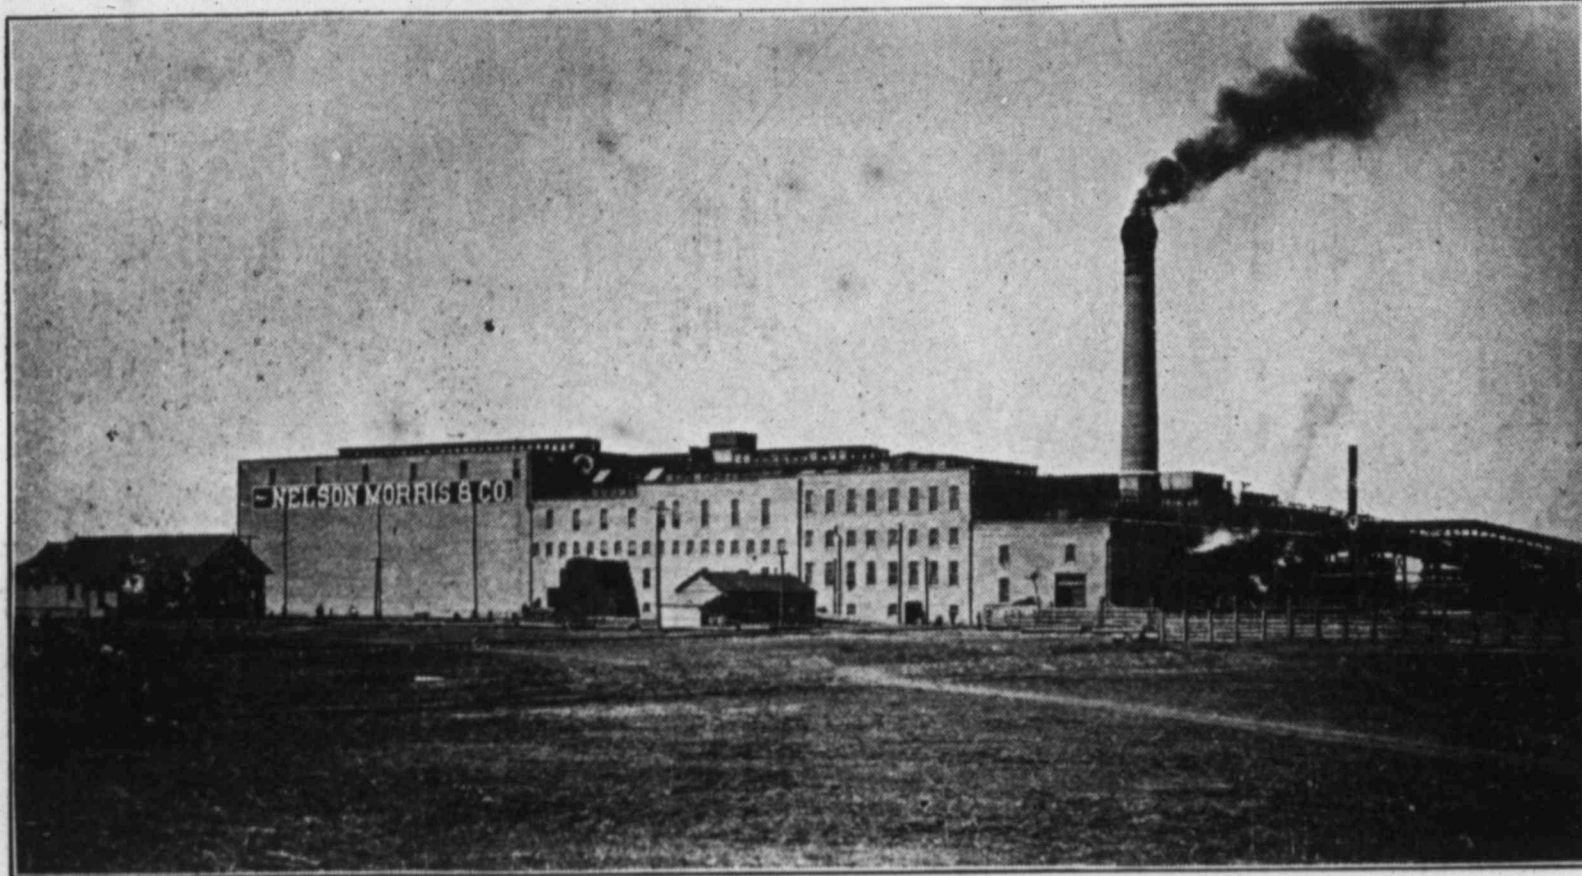

Swift Co. Packing Plant, St. Joseph, Mo.

field of receipts by direct competition with other markets. Another advantage is the low yardage charges as shown in advertisement elsewhere in this issue. Again it appears in the fact that the yard company operates its own tracks and engines, with no "terminal charge" like Chicago on each car of stock arriving. Another prominent fact is the splendid arrangement of the sale pens whereby business is conducted more rapidly and scale weights get a record of the "fill" before going "down the alley to the packing plants." Another feature is the new pens paved with brick, splendidly drained and most conveniently arranged. Another fact is the presence of so many packers, thus producing a heavy demand for all receipts and preventing what otherwise would produce a "glut" and consequent reduction of prices. And another feature is that its trade draws largely from Chicago, thereby giving to producers and shippers a very near approach to Chicago prices without expensive freight hauls to the distant city by the great lakes.

The enthusiastic patrons of the St.

Nelson-Morris Packing Plant.

Joseph Stock Yards adduce other reasons but the foregoing are sufficient to call the attention of stockmen of Oklahoma and Texas to these markets and a trial will convince any shipper of the merits of the market.

#### EARLY HISTORY OF THE YARDS.

From the jubilee number of the St. Joseph Journal of Commerce we take the following early history of these yards:

"The St. Joseph Stock Yards were opened for business December 1, 1887. Mr. C. B. France was the first president, and for several years prior to the opening of the yards, Mr. France was deeply interested in securing and placing in successful operation such an enterprise in this city and was assisted by a host of other good men and business energy of the city who stood faithfully at his side in the enterprise and aided him materially. Mr. Chas. Cameron was the first general manager and Mr. A. S. Lowe was the first secretary. The institution had enterprise, wisdom and capital behind it, and successfully moved along happily from the start. Among the directors at that time were Messrs. John Donovan, Jr., Samuel Nave, Henry Krug, Jr., C. B. France and J. B. McNeely. The directory, as will be noticed, was from the start composed of men who not only enjoyed the confidence and respect of this section of country, but men of ample capital, large business experience, and men whose names stood for strength, and who had a reputation of bringing things to pass. In other words, every name connected with this enterprise had made a success in life, and not one of them ever made a failure in any business undertaking."

For ten years the management continued the enterprise with varying success, meeting the liveliest competition and sometimes making remarkable records in receipts. Financial reverses owing to the stringency of the times were not lacking however and much was present to contend with. Through it all Colonel Jno. Donovan, Jr., labored early and late, never doubting its ultimate success. In January 1897, largely through his efforts, G. F. Swift and Company were made owners of a majority of the stock of the yard company and new activity and new plans were at once formulated, resulting in

#### REORGANIZATION OF THE STOCK YARDS COMPANY.

Concerning this change the Journal of Commerce under date of May 11th, 1898, says:

"On January 10th, 1898, the new Stock Yards Company was organized—resulting in the following officers and directors being selected: G. F. Swift, of Chicago, President; John Donovan, Jr., of St. Joseph, Vice-President, Treasurer and General Manager; E. G. Vaughan, of Kansas City, Secretary and Ed Morris, of

Chicago, O. M. Spencer and Earnest Lindsay, of St. Joseph, directors. The capital stock being placed at \$1,250,000 fully paid up, steps were taken for the improvement and extension of the yards in keeping with the prospects of Greater St. Joseph's stock interests. The plans and specifications were submitted by architect E. J. Eckel, under whose supervision the construction on a most liberal scale is being rapidly forced. The Yards as contemplated when completed will be the largest and most modern in this country. The new portion will be 3,100 feet long and 500 feet wide, of which 1,900 feet will be used for cattle and 1,500 feet for hogs. The entire capacity of the Yards will be 25,000 hogs, 18,000 cattle and 8,000 sheep daily. The Yards will be provided with a sewerage and water system, and will require 12,000,000 brick for paving. The supports for the roofs of the pens will be iron columns and the unloading platform and stone wall in front paved with brick. 25 miles of additional railroad track will be constructed and the switching will be done by the Stock Yards Company's own switch engines. A six stall round house for their use is already under construction."

Since the date of the above the official roll has been enlarged to include the position of Traffic Manager which position is ably filled by Col. M. B. Irwin, who is wide awake to every material interest and is proving to be the right man for this very important place.

It is also worthy of note that the sanitation arrangements of the yards is perfect and the portion devoted to the quarantine or southern division is well appointed and convenient.

#### THE HORSE AND MULE MARKET.

Nowhere, outside of the National Stock Yards at East St. Louis is there so complete arrangement for marketing horses and mules. Several commodious brick barns constructed at a cost of \$30,000 provide ample facilities for care and handling and afford office rooms for commission firms in this trade. A market is here for everything from a bronk to fancy steppers, from a burro to a thoroughbred. What St. Louis for years has been to the great south, St. Joseph will be to the supply stalls of the north and east and if care is taken to handle the trade it is no doubt St. Joseph will easily lead all competitors in sales of horses and mules.

#### NEW LIVE STOCK EXCHANGE

For the past ten years, the business of the yards has been conducted in a three story brick building, erected in 1887. For the past year this building has proven to be wholly inadequate and nearly every room now contains the offices of not less than two and often three commission firms. To say it is crowded would be picturing it mildly. Therefore early in the present year, plans and specifications were adopted for the erection of a new building very much larger in every way with all modern conveniences, and same is now in course of construction. The cost will not be less than \$100,000. It will contain one hundred and five choice rooms for office use of commission men, besides special quarters for the company offices, telegraph offices rooms for packers use, and other special purposes, in addition to an 80 foot square trading room and a hall for use of exchange meetings. Two elevators of latest safty appliances will add to the conveniences of reaching each

of the four main floors, to and from which broad stairways lead. The material used will be stone, brick, iron and terra cotta in the construction of the building which will be 184 x 135 feet and four stories high. See cut of the new exchange buildings in this issue.

#### ST. JOSEPH STOCK YARDS BANK.

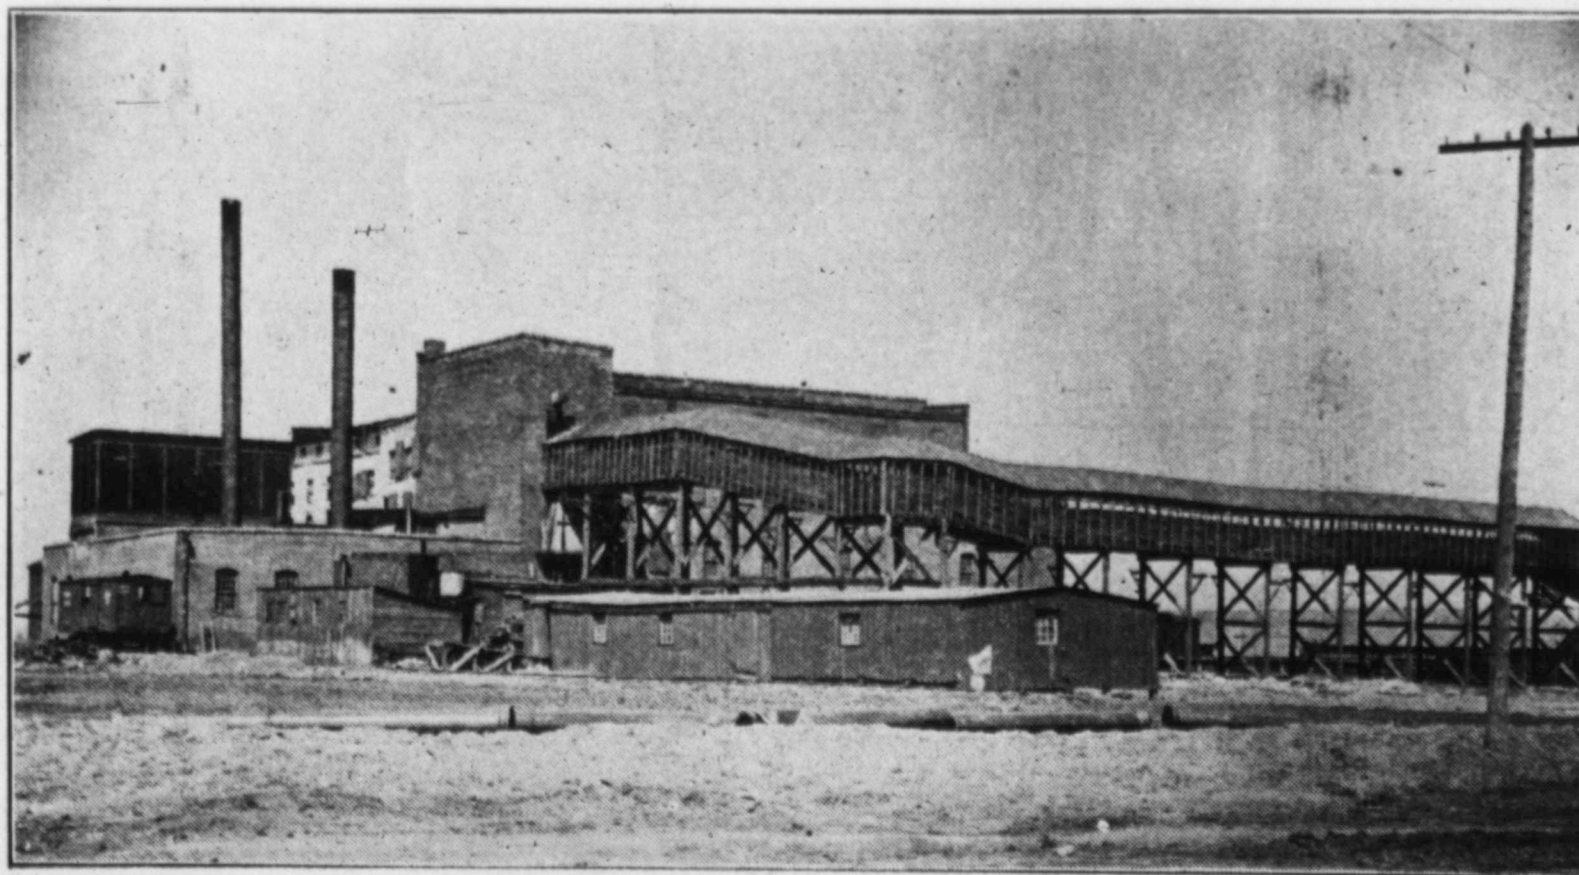

Banking facilities are extended patrons of the market in most convenient form through the St. Joseph Stock Yards Bank, officered by Gordon Jones, President; Ernest Lindsay, Vice-President and Cashier, and E. M. Lindsay, Assistant Cashier. The bank is located in the old Exchange building at the present time but will be provided with most commodious quarters in the new exchange now in course of erection. Capital stock, \$50,000 fully paid up, which will be increased as the business of the yards demands. The bank has made a phenomenal growth since its establishment only four months ago and has already accumulated a line of deposits seven times that of its capital. This is due largely to the management of the bank and also to the fact that among its stockholders are G. F. Swift, of Swift & Co., Chicago; Edward Morris, of Nelson Morris Co., members of Hammond & Co.; Jno. Donovan, Jr., Manager Stock Yards; Joseph Maxwell and others. Every energy is bent to facilitate transactions passing through the bank, such as returning proceeds of stock sold to the home bank and placing same elsewhere as may be directed by the shipper or his bank. The business of the bank is directed personally by President Gordon Jones, who is courteous and accommodating and a most pleasant gentleman withal to meet.

#### PACKING HOUSES.

Given the demand and equitable freight rates one could build a stock yards on the highest pinnacle of the Rockies. St. Joseph is fortunate in having the rates, and the six big packing houses there, creates the vigorous demand for butcher stuff of all kinds. The orderly and systematic location of the big packing plants with reference to the yards at that point, enables them to handle stock at a reduced outlay and pay just that much more in price, and still figure on the same net profit as at other points. Opposite the new exchange building is the big plant of Swift & Co., which purchased at its various houses during 1897, the immense number of 3,256,551 hogs, 2,458,287 sheep and 1,421,381 head of cattle. For the same period the distributive sales aggregated \$121,598,600, making a total of 97,525 carloads. The number of employees of the firm, exclusive of branch distributive houses was 10,942 including both sexes.

The illustration shown in this issue of the St. Joseph house has a capacity per day of 7000 hogs, 3500 cattle and 3500 sheep

The following in regard to the plant was given to the LIVE STOCK INSPEC-

Viles &amp; Robbins Packing Plant.

New Exchange Bdg., St. Joseph Stock Yards

tor by the energetic Superintendent, Mr. Waller and refers exclusively to the plant of Swift & Co., at South St. Joseph:

Area of ground in plant	19.25 acres
Area of roofs buildings and pens	5.25 acres
Area of floor space in buildings	13.50 acres
Number of bricks used in construction	5,945,000
Number carloads of material handled	1,968
Number feet of lumber used in construction	5,250,000
Number horse power in boiler plant	1,000
Number horse power in engines for power	700
Number horse power capable of development by generators	680
Number tons of capacity in ice machine	700
Time required in construction of plant	8 months

No person permanently injured or maimed during construction.

The plant of Nelson Morris & Co. is near by and is admirably adapted in modern conveniences to the purposes it serves. It covers all told an area of nearly fourteen acres and has nearly the same capacity as the latest Swift plant. See illustration in this issue.

The Moran plant kills hogs only and is operated to its full capacity by the Swift people who needed additional facilities.

Viles and Robbins have a big plant which kills hogs only. This company has packing houses at several eastern points and also at Hutchinson, Kansas. Its capacity is fifteen hundred hogs per day and is the oldest plant in operation at the St. Joseph yards. Mr. Jno. Pyne is the gentlemanly manager to whom the LIVE STOCK INSPECTOR is indebted for much valuable information.

The Hammond Company have recently opened in St. Joseph and are operating a mammoth plant. This journal regrets very much that it has not more definite information to accompany the illustration of the plant given herewith.

The Krug plant is another big concern operated at St. Joseph and assisting in creating the demand which in turn is the most important factor in the growth of the stock yards. It has a capacity of 100,000 hogs yearly and is the pioneer packing plant in St. Joseph.

The St. Joseph Packing and Transportation Company has a \$200,000 packing plant with a daily capacity of 40 hogs, and a pay roll of over 75 employees. W. F. Davis of the firm of Davis McDonald & Davis and Ernest Lindsey of the Stock Yards Bank are interested as stock holders in the concern. The business of the plant is constantly increasing and its product is well known all over the west.

COMMISSION FIRMS.

The chief accessory to trade at any market, is the characteristic method and rapidity for handling stock. One

may have the transportation, and the demand, and the yardage facilities and the conveniences, but after all very few shippers from the range would care to take his stuff to a market and attempt, fresh from his pastures, to secure the most advantageous prices for his cattle and the best sale for his hogs. He must have an agent, quick and trained to his business, thoroughly acquainted with purchases, having a complete knowledge of the run for the day at all the markets and strictly "onto his job." With such an agent the shipper trusts his consignments, sure of the best returns. The yards and the packers and the banks are necessary as the blood is to sustain life, but the commission man is the soul which animates and enlivens by adding to the popularity of the market. He is the factor which must be recognized by both buyer and seller of live stock and his commissions are his legitimate payment for services rendered.

In the list of commission merchants at the St. Joseph Stock Yards, Davis McDonald & Davis rank with the best and do a big business. The senior member of the firm is deeply interested in the success of the Yards and spares no effort to satisfy every patron of the market.

The Zeb Crider Commission Co., here is in charge of Chas. K. Carmean, one of the energetic workers for St. Joseph. This firm has a big trade in Oklahoma and Texas and Mr. Carmean assures his patrons of the best service at his command in all shipments consigned to the house at St. Joseph.

Mallory Sons & Zimmerman, the well known Chicago house, which was established in 1862, is represented by a branch here under the same name

and under the management of competent salesmen and office men. The firm led all others last year at Chicago and at Sioux City where they have another branch firm, and exceeded the next highest by 600 cars. At Omaha for the past seven months they have led in receipts and at St. Joseph where they established one year ago they are in the top rank. The firm announces a big demand for feeders and are ready to loan money to responsible parties on cattle. Their motto is, "attention given to all consignments and satisfaction guaranteed." Represented at four markets by their own salesmen they are in position to render every accommodation to shippers. The officers of the Company are: D. C. Mallory, Pres.; J. P. Viere, vice-Pres.; M. T. Zimmerman, second vice-Pres.; F. M. Timms, Secy.; C. A. Mallory, Treasurer and Gen. Manager.

The McKee-Zook-Whitford Co., is a strong institution in every way and take great pains to please an increasing army of patrons. By reference to their advertisement elsewhere in this issue you will see the make up of the officers and salesmen who enjoy a wide acquaintance with buyers and are thereby able to command the top notch in selling. Secretary Ballard is in charge of the office and will be glad to respond to all inquiries, by letter or otherwise. Money advanced to shippers.

The Union Live Stock Commission Co., under the management of Wm. H. Morlock is doing a good business and represents the popular firm of Campbell Hunt & Adams of Kansas City at the St. Joseph yards. All patrons of this firm will find Mr. Morlock with a corps of competent assistants ready to take care of all assignments at that market.

The Foster Lombard Commission

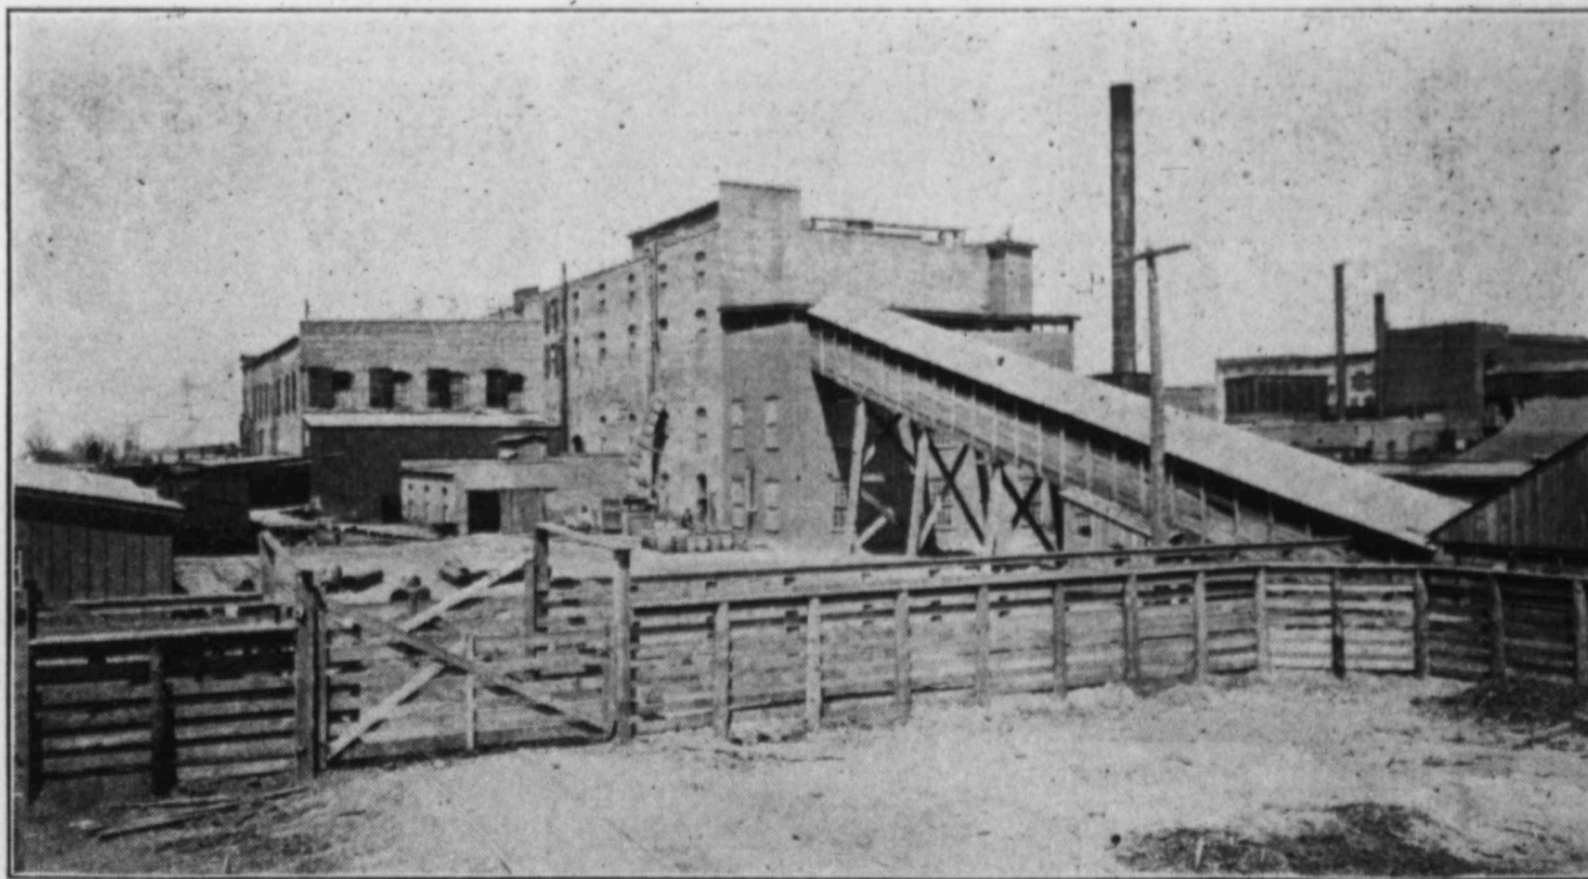

Company of Kansas City have only recently established at St. Joseph, but they are not strangers by any means to our cattlemen and Stock Farmers. A. N. Warren is the courteous and energetic representative of the house at St. Joe, assisted by Jas. A. McNulty and Chas. F. Horne, salesmen and solicitors. The Company at Kansas City is considered financially one of the strongest at the Yards and is backed by ample references. They loan money to responsible parties and give satisfaction in making sales of every thing consigned to them. This fact is fully evidenced by the generous patronage accorded this firm from and by producers in Oklahoma and Kansas. The establishment of the branch house at St. Joe will give them unexcelled facilities for adding to the immense feeder trade now enjoyed by them. The LIVE STOCK INSPECTOR knows the membership and make of this firm and has no hesitation in commending them to its readers.

Complete list of the firms now doing business at St. Joseph Stock Yards and members of the Exchange are as follows:

- MALLORY, SON & ZIMMERMAN Co.
- Donovan & Allen, Managers.
- DAVIS, McDONALD & DAVIS.
- JONES BROS. COMMISSION Co.

This introduction of the St. Joseph Stock Yards would be incomplete without a deserving mention of the Stock Yards Daily Journal, one of the best and brightest of its class anywhere in the country.

With this rapidly growing market, always alert to serve the ranchman.

Chas. E. Thornton,

(Managing Editor Stock Yards Daily Journal.)

stockman and shipper, the St. Joseph

market is thoroughly reviewed in this issue of the INSPECTOR and you should keep in close touch with the market by a daily perusal of the St. Joseph Stock Yards Daily Journal, which is the official market report of the St. Joseph Live Stock Exchange. Any dealer at the yard will include you on his list. The St. Joseph market has for its official paper the Stock Yards Daily Journal. Though only a yearling it stands foremost in the rank and receives a most liberal patronage from all sections, lately reaching out into this territory and Texas. The manager, Mr. Charles E. Thornton, for a period of five years connected with the management of the Daily News at St. Joseph, is determined to keep a steady advance. A postal address to C. E. Thornton, South St. Joseph, Mo., will procure a sample copy. It is also an excellent medium for sale of stock, sale of ranch, and for breeders of fancy stock. Rates reasonable and good service guaranteed.

The publisher of the LIVE STOCK INSPECTOR in this connection desires to thank the management of the yards and of the big packing plants for favors extended and Messrs Carmean, Jones, Morlock, Ballard, Dennis, Allen, Thornton and others for aid in securing the information covering these markets; also Frank Freytag, manager of the St. Joseph Daily Gazette, for favors rendered.

In conclusion the publisher desires to state that this is not a special edition of this journal, but one of a series issued regularly twice each month in the interests of the live stock trade generally, and as the representative organ of the Oklahoma Live Stock Association and the cattlemen

and stock farmers of Oklahoma and adjoining territory.

The introduction herein given of the St. Joseph Stock Yards is from the view point of the stock raiser instead of a boomer of realty and the publisher asks a fair consideration of the merits of this market at the hands of our patrons.

A very encouraging feature of the cattle industry, says the Farmer's Journal and Live Stock Journal, is the increased attention given on the ranches to the production of feed stuffs; and a very encouraging feature of the farming industry is the increased attention given on the farms to the production of live stock. Each industry is at its best when combined with the other.

The Live Stock Inspector of Woodward, Okla., is now published twice a month instead of monthly as heretofore. No change has been made in the price or character of the journal. The price is still one dollar a year and the Inspector still maintains its position as one of the best stock papers published in the west.—Canadian Record, July 28.

The Woodward Live Stock Inspector comes to us now twice a month. It is one of the best edited and neatest printed papers on our exchange table and is very valuable to a man in the stock business.—The Quannah Observer July 27.

Will Bolton will issue his Live Stock Inspector twice a month from this on. Will is a hustler and understands his business and will make the Inspector rank high as a class journal.—The Quannah Observer, July 27.

## ON TRAIL.

## From a "Puncher's" Point of View.

So early in the morning befor the break o' day,  
You hear the cook 'a hollerin' "Turn out there,  
chuck away"  
You tum'le out 'yer sougans with many a growled  
cuss word,  
Then rope a buckin' broncho, and out to join the  
herd.

You follow up the cattle for many a weary mile  
With the wind a-blowin' constant and the dust as  
thick as ile,  
A steady churn o' alkali that fills your eyes and  
nose,  
And perhaps a sullin' dogie to round up your other  
woes.

You're spittin' dimes fer dryness, your baccy don't  
taste right,  
You strain your eyes to burstin', but no water hole  
in sight.

Then yo' cuss the boss for travelin' such a dogoned  
thirsty trail:

You know a hundred better, he's not fit to drive a  
nail.

At night you've just fell over when some one pulls  
your tarp.

"Git up, next guard," he hollers, "I've woke you  
twict, look sharp."

It ain't no use you roarin' tho' you do it by the  
yard.

You've got to crawl your night horse and stand  
your two hours guard.

Some night's its not so rocky when the moon's a  
shinin' clear

And the cattle sleepin' quietly to the biggest mean-  
est steer;

Then you circle round the bed-ground to an old-  
time puncher song.

And your two long hour's of guardin' don't seem  
one-half so long.

But when the thunder bellows, and the rain's a solid  
sheet,

And your horse for wind and mud holes can  
scarcely keep his feet

When the cattle keep a millin' as if they'd never  
tire

And the lightnin' plays continual on their horns in  
points of fire.

When the flashes run together, and never think to  
stop.

And you see as plain as daylight the steer 'right  
next you drop.

Then its "Boys jest tar and feather me and ride me  
on a rail,

If you ever find me venturen' on anothr cattle  
trail."

But all this is soon forgotten when you reach your  
journey's goal.

And the cattle bein' delivered you get your little  
roll.

Then you start out on a bender and you paint the  
city red.

And you're lucky in the mornin' if you find your-  
self in bed.

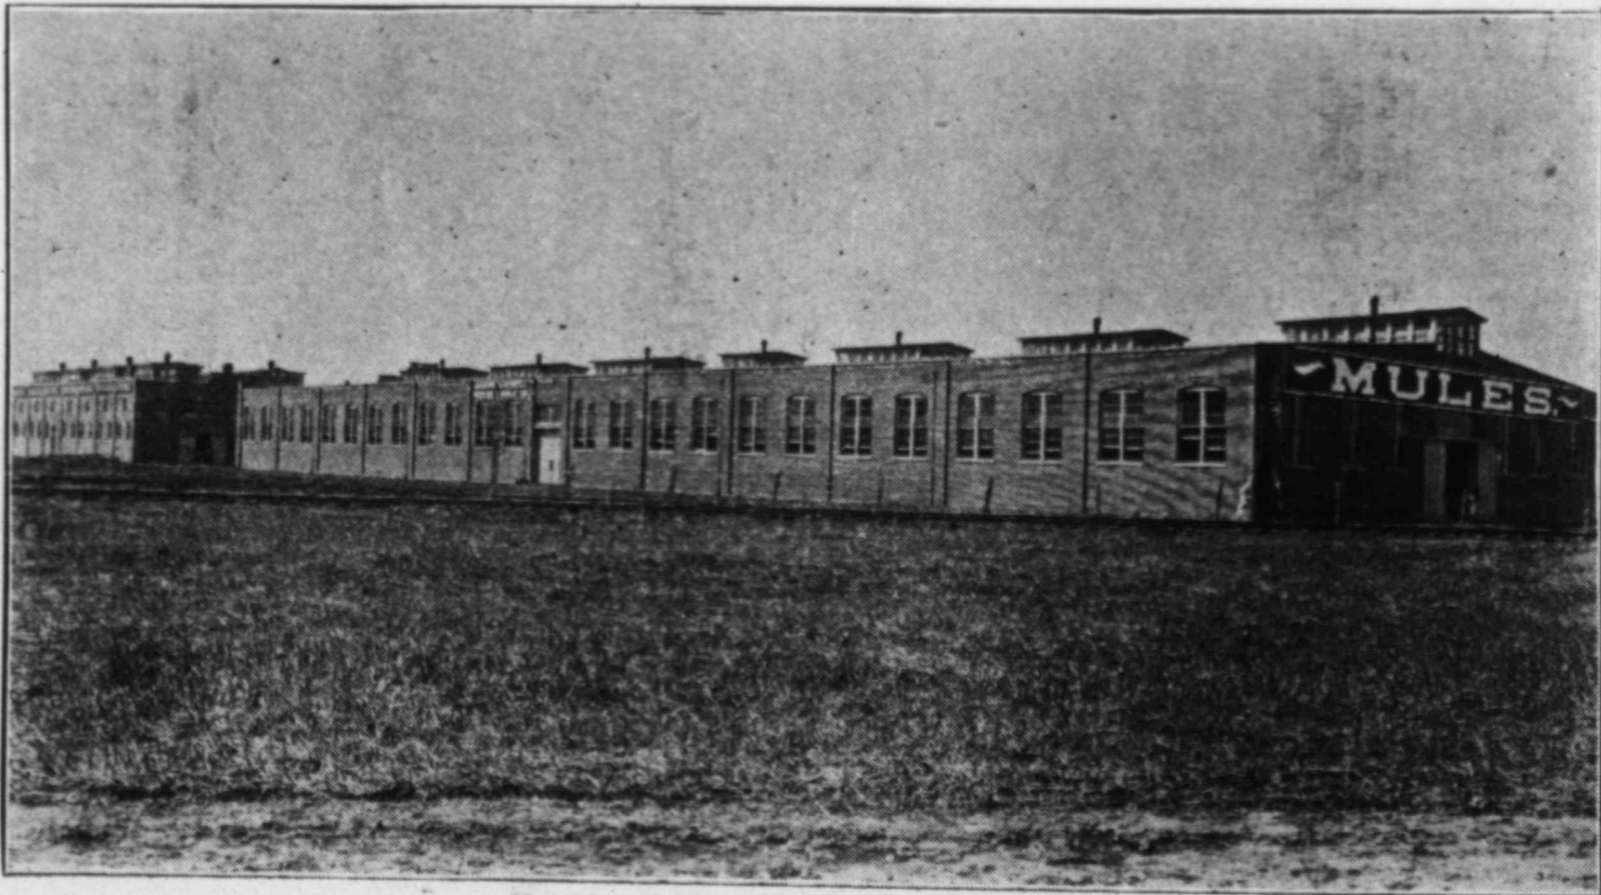

You keep it up a day or two, your roll decreasing  
fast.

For with whiskey and tin-horners the biggest roll  
can't last.

And very soon you're stony with a bad case of the  
shakes.

And your choice between a box-car, blind baggage  
or the brakes.

—HUGH D. C. MCLACHLAN.

Horse and Mule Market, St. Joseph.

**Vaccines and Vaccination.**

June 22nd, 1898.

To the Editor of the LIVE STOCK INSPECTOR, SIR:—As there seems to be some confusion in the minds of many stockmen as to what a "VACCINE" is, and also as to what constitutes the operation known as "VACCINATION," it may be of interest to your many readers to get a plain statement of facts regarding the true meaning of the two words. This information seems especially appropriate and desirable at this time, both on account of the growing popularity of live-stock vaccination in this country, and the shameful fact that certain frauds have been practiced upon stock owners in the name of this valuable procedure. Taking advantage of the opportunities incident to the introduction of a new system, certain individuals have imposed upon stockmen by selling them absolutely worthless nostrums under the name of "vaccines," or by performing various operations upon their stock and calling them "vaccinating," which bear no resemblance to the genuine vaccination.

Be it known, then, that a vaccine virus (called vaccine, for short) is the attenuated virus of a specific disease. It is derived from the disease itself, and cannot be obtained from any other source. It cannot be manufactured from drugs or chemicals.

The vaccines most widely known and used are those for preventing Small Pox, Diphtheria and Lockjaw in man; Anthrax in cattle, horses, mules, sheep and goats; Black Leg in cattle; Lockjaw in horses and mules and Erysipelas in swine.

As before stated, these vaccines are all derived from the diseases which they are intended to prevent, and the vaccine of one disease will not prevent another. For instance, Diphtheria cannot be prevented by Small Pox vaccine, nor Anthrax by Black Leg vaccine. Each disease must be treated with the vaccine for that particular disease; and none of them can be prevented by inoculation or otherwise, with drugs, chemicals or any other substance except the special vaccine.

It will be readily understood that by the very nature of the product, the preparation of vaccine requires not only the greatest care and scientific skill, but special and elaborate apparatus. Smallpox Vaccine and Black Leg Vaccine are specific substances which cannot be replaced by any other preparation. No reputable druggist, for instance, would think of selling anything but genuine Smallpox Vaccine for the prevention of smallpox, and the substitution of any other substance would be a fraud to the purchaser; and in the same way the sale of anything but genuine Black Leg Vaccine for preventing Black Leg would also be fraudulent. It is true that as soon as the value of Smallpox Vaccine was recognized, nearly a century ago, unscrupulous persons fraudulently offered for sale other preparations under that name. However, these deceitful practices were gradually brought to light, and it is many years since any manufacturer or dealer dared to sell as Smallpox Vaccine anything but the actual Vaccine. Now that Black Leg Vaccine has proved its value as a preventive remedy for Black Leg, the Vaccine is in demand, and it must be stated with regret that unscrupulous parties can be found who are offering for sale as Black Leg Vaccine preparations that are not Vaccines at all. Until the facts are discovered a certain number of stockmen are bound to be victimized. The original and genuine Black Leg Vaccine is supplied only through the Pasteur Vaccine Co. and its authorized agents, and as a protection against fraud each packet of vaccine bears the company's trade mark which will be found in another column.

Now as to vaccination: This operation, so far as Black Leg Vaccination is concerned, consists in injecting the vaccine under the skin by means of a specially made syringe. No other preparation than the black leg vaccine

can be used for the purpose, for if any other preparation were so used the operation would not be "vaccinating." Naturally, unscrupulous persons are to be found who are employing or who have tried to employ some other method or preparation and call it "vaccinating." This, of course, is fraudulent. Moreover, placing a seton in the dewlap, or rowelling, or bleeding, or nerving, are not "vaccinating" and if called vaccinating it is done for the purpose of deceiving. Therefore, no method or operation, however performed, can properly be called vaccinating, unless the genuine and appropriate Vaccine Virus be used.

During the last century millions of human beings throughout the civilized world have been vaccinated with the Smallpox Vaccine and protected against smallpox; so much so that smallpox has entirely lost its terrors and epidemics are now very few and slight in extent. During the last twelve years, that is to say since the vaccination of live stock to protect them against Black Leg has become recognized as a practical and economical operation, millions of cattle have been vaccinated in Europe, and the result is that the mortality from that disease on that continent is to-day insignificant. Since the Pasteur Vaccine Company introduced the Black Leg Vaccine into this country, three years ago, hundreds of thousands of cattle have been vaccinated and protected against Black Leg, and the mortality from Black Leg among vaccinated animals has been infinitesimal. It may safely be predicted that at no distant date the Pasteur Vaccine will become of universal use in all those parts of the United States where Black Leg has heretofore been so costly and troublesome, with the result that Black Leg will be practically stamped out and millions of dollars be annually saved to the cattle industry. But to accomplish this purpose the vaccination must be actual and not a pretense. That is to say Black Leg Vaccine must be used and not any worthless nostrum that may be fraudulently offered for sale under that name.

Yours truly,  
HAROLD SORBY.

**Rough Riders are Rude.**

While the Spanish troops at La Quisinas took cowardly advantage in fighting from ambush, it seems that the rough riders also played a trick upon the concealed foe.

This fact has been learned from a Spaniard who was in the fight and afterward captured by the Cubans. He says of the Americans: "They did not fight as other soldiers. When we fired a volley they advanced instead of going back. The more we fired the nearer they came to us. We are not used to fighting with men who act so."

It is a rule of warfare that when an advancing column receives a decimating fire, that is when one man in every ten fall, the attacking force should retreat. But the rough riders, it appears, were not versed in the etiquette of the battlefield, and instead of turning back as "good form demands" they went right ahead until they captured the Spanish position. Now what could courteous, chivalrous, punctilious Spanish do in the face of such rudeness, such disregard of all convention and propriety? From the standpoint of the Spaniard it was not only bad form for the Americans to advance after they had been fired upon, but it was an intimation that there was a strong force behind them. So the Spaniards turned, as they were bound by all Spanish precedent to do, and ran toward Sevilla.

The rough riders have certainly forfeited all claim to Spanish recognition as members of the fighting elite, and it is probable that when they next engage the foe the Spaniards will administer a well deserved rebuke by running without waiting to fire.—Chicago Times-Herald.

James Mandeville, of Cloud Chief, shipped 5 cars of cattle from Woodward on the 16th. They were consigned to Elmore & Cooper, Kansas City.

**We are in the Market Every Day for Cattle, Hogs and Sheep.**

We are especially bidding for range cattle and sheep, both for slaughter and feeding. Located on fourteen railroads, and in the center of the best corn and live stock district of the United States, we are prepared to furnish a good market for all kinds of live stock. Our charges for yardage and feed are—

**YARDAGE:**

Cattle, per head - 20c      Horses, per head - 20c  
Hogs, per head - 6c      Sheep, per head - 5c

**FEED:**

Corn, per bushel, - 60c      Hay, per hundred lbs 60c

Our packers furnish a daily market for all kinds of cattle ranging from canners to export cattle. Look up your railroad connections, and you will find them in our favor.

### Kansas Will Keep Tab on Ticky Cattle

Topeka, July 23.—The live stock sanitary board, or the two members, Riddle and Bryden, met to day and made a rule that will enable it to keep track of ticky cattle that pass through the state under the interstate commerce law. The rule requires the agent of a railroad where such cattle are loaded to telegraph to the nearest inspector the name of the shipper and the number of cattle shipped, together with their destination. The board then traces the cattle, and if any native cattle following them become affected it will be an easy matter to locate the blame and obtain damages.

The board has three expert veterinarians employed now making an examination of a new poisonous weed in McPherson county. Over 100 horses in that county have died within the past two weeks from eating the weed. Taylor Riddle, secretary of the commission, says that the growth of the weed is now confined to a territory four miles long and two wide, but he is afraid it is spreading. It contains the rankest kind of poison, and a horse never recovers after eating a sprig of it.

### A Protest.

Ruskin says that no people ever advance in civilization except in time of war and that no nation decays except in time of peace.

The association of school land leasers are bound that the friends of education shall not lose their vigor for the want of a fight. They went to Oklahoma City last week and captured the populist convention. The old Kansas politicians that robbed Kansas of her school land and then of her nominal price paid for them are in the saddle in Oklahoma with whip and spur are urging on the avaricious herd of hungry jack leg politicians who are without conscience or patriotism. No more vicious legislation could be asked for than is demanded by the following plank in the populist platform:

"We favor such legislation as will secure to the settlers upon school land, the preference to occupancy and the full value of all improvements placed thereon, and we are opposed to the placing of a maximum rental value upon said land."

The legislation asked for means that the school land shall be placed within reach of the petty county and township political strickers to be divided up among themselves. Shall we permit it? Are the mass of the people such consummate donkeys that they will calmly vote away the three grandest funds ever held in trust by any commonwealth? Are we such abandoned scoundrels that a great political party feels justified in asking us to rob not only the children of this generation but millions of infants unborn of their birthright? Or did these brilliant statesmen think we are such fools that we would not know what they are after? The party or man who is so base and unpatriotic as to advocate the passage of any law that will cripple the school funds or the public building fund ought to be buried so deep that his carcass would never become organic matter again to pollute fair nature.

The money to buy these lands was or will be wrung from homesteaders of the Strip. These lands were not given to us. Each one must contribute his share to their purchase. The investment in the three funds is the best investment ever made by any people if the lands are held in trust and rented at fair rates. I am humiliated to think that I must protest against the passage of a law that is so absurd from a business standpoint. What would you do with a father or brother who would offer to rent real estate and by contract give the tenant a preference by right of his occupancy, and further contract that the tenant could put upon the land such improvements as he saw fit at the expense of the owner? You would not do a thing but have the proper court inquire as to his sanity, and there is not a jury in Oklahoma but would send him to the insane asylum.

But for translucent gall the last clause in the plank is extraordinary.

The master boodlers love us so much that they must warn we idiots not to put a maximum rental value upon said land. Whoever heard of a landlord or a merchant who did not take all he could get? If you have the least spark of manhood about you vote for no man for the legislature unless his record and his pledge insures his honesty in regard to the school lands.

Let these lands alone. They are well handled now. They are producing a good income and the expense of collection and disbursement is very light. No law can be passed which will increase their value or the income at present. Governor Barnes has shown himself so far such an intelligent and warm friend to education that I do not believe he could be induced to sign any law that would cripple our school funds.

J. M. DELISLE.

### Cornerstone Laying at Alva.

The laying of the corner stone of the Northwestern Territorial Normal building was witnessed by about 7,000 people. Reduced rates were secured on the railroad and the trains were loaded with people from Eastern Oklahoma, Southern Kansas and Woodward county. The farmers and their families enjoyed the occasion more than anyone else, realizing as they do the importance of the school to their sons and daughters.

Governor Barnes, Attorney General Harper, S. Cunningham and other distinguished visitors were present. The address by the Governor was a masterpiece and was listened to by the people with close attention. The address by the Hon. Temple Houston was one of the finest ever listened to. He held the crowd spellbound while he occupied the platform. Senator Marum had recently attended a democratic convention where he lost his voice, and only made a few remarks.

The Corner Stone was laid by Grand Master of Oklahoma, E. W. Banford, assisted by numerous other Masons.

A procession two miles long composed of Alva Cornet Band, civic orders, in uniform and citizens in-bugies and carriages formed on the Square and there to the Normal grounds.

The building will be the pride of Oklahoma for years to come. It will be 145 feet front 125 feet deep, the principal tower will be 100 feet high. It will be lighted by gas, and heated by hot air, and have accommodations for 600 pupils.

The fall term of the Normal will open Sept. 1 with Pres. Jas. E. Ament in charge. The tuition will be absolutely free.

### Preventative for Texas Fever.

Topeka, Kan., July 19.—The state sanitary board thinks it has accidentally discovered a preventative of Texas fever. Some time ago ticky cattle were brought into Harper county and the board quarantined them. Simultaneously the cattle took a disease resembling black leg and an old farmer prescribed a mixture of sulphur and salt as a remedy. This was also given to the ticky cattle and it developed that while the ticks lived and thrived no fever was observed and none of the infected cattle died. John Bryden, a member of the board, has been making an investigation of the subject and found that in olden times sulphur and salt was a cure for almost every ill that cattle were heir to. The board will make experiments along the line of the idea.

The mortality among milk cows in the suburbs of Ft. Scott, Kan., the past few days has become alarming. Many have died and the veterinarians have their hands full of sick ones. They diagnose the trouble as thymatoma, a disease of the bovines, resulting from grazing on pastures that have recently been flooded or that are poorly drained. About a dozen cows have died in the city in ten days.

Texas fever is reported from Lamar, Mo., where 12 head have died and 20 more are sick. The state veterinary surgeon is asked to investigate.

**PERSONAL POINTERS.**

B. F. Holden has removed from Mangum to Moscow, O. T.

Hon. Temple Houston went to Topeka on business the 26th.

Editor Harry Patton, of Tologa, was a welcome visitor the 28.

Dad Nall, of Panhandle was greeting friends in Woodward the 26th.

Mr. and Mrs. R. H. Germany went to Haskell, Texas, Monday the 25th, to attend the cowboys' reunion.

Judge Dean is the proud grandpa of a new boy born to his daughter, Mrs. Mathews, the 23 inst.

J. W. Holman and Millard Word sold Emmet Word 300 yearling heifers at \$22.50 per head on July 23rd.

B. F. Holman and Millard Word made this office a call on the 25th and incidentally settled association dues.

John McCarthy returned the 19th from a three weeks' visit in St. Louis. He was accompanied by his brother Pete.

Chas. M. Crocker, school land inspector, is here from Guthrie looking after the leasing of the school lands to the cattle men.

Chas. Swindall, the popular young county attorney of Day county, was in Woodward on business this week.—News July 29th.

Sheriff Bryan of Tologa made the INSPECTOR office a pleasant call on July 18. He reports cattle and crops in first class condition.

Mrs. Robert Word returned to her home in Higgins the 19th after a week's visit with relatives and friends at Woodward and Ft. Supply.

O. H. Cafky left on the 27th for Jacksonville, Ill., to spend a couple of weeks visiting relatives and friends and taking a much needed rest.

Josh Hale has sold the Cattle King hotel to Oscar Neely and Harry Adams who will continue the business in good style, being experienced in that business.

B. F. Grimes, Jr., of Ashland, Kas., made this office a pleasant call on the 25th and advertised his brands which will be found in the columns of the INSPECTOR.

Nick Hudson, wife and two children left the 26th for the Washita. Mrs. Hudson will attend Rev. Stone's meetings at McKenzie Flats and Mr. Hudson will bring up a herd of cattle.

Mrs. Ed Hewins is moving her household goods to Douglass, Wyo., where she has bought a nice home. The Colonel will remain here for the present. Mrs. Hewins left for Douglass the 20th.

Sam Matthews, live stock inspector of the second district, is spending several days in this district assisting Jake Cantelou. He went to Alva with the rest of the crowd the 18th, returning the next day to finish up his work here.

On July 13th Mr. Buckingham, of Kansas City, received 250 head of cattle from E. Bain and 190 head from Hugh Braley, of Silverton, Tex., which he had purchased some time ago. The delivery was made at Clarendon.

John C. Quarles and Tom Campbell were here the 15th and 16th on business. They went to Kansas City the night of the 16th returning the next Wednesday. Both gentlemen have a large number of friends in Woodward who are always glad to welcome them here.

R. E. Davis, better known as "Daddy" Davis, enjoyed the pleasure of a family reunion on the 14th inst. in commemoration of his 63rd birthday. He has several children and grandchildren here, but enjoys the credit of being as young in action as any of his children. May he live to enjoy many repetitions of the above event.

The following Woodwardites went up to Alva the 18th to attend the laying of the corner stone of the normal ceremonies: J. W. Miller, Profs. DeLisle and Godwin, Miss Della Cann, School Land Inspector Crocker, Mr. McIntire; Dr. S. S. Munger, Bert Röll, John Pugh, wife and daughter Nina, Senator Temple Houston and Judge D. P. Marum and wife.

A party of Woodward young people spent Sunday the 24th with friends at Fort Supply. The following ladies and gentlemen composed the party: Misses Lillie Scott, Lena Smith, Nora Crabtree, Alice Patton, Florence Dennis, Elizabeth Jackson and Minnie French, Messrs. Lucius McAdams, Luther Patton, Frank Smith, Robert Mayfield and Dr. Chas. E. Davis.

Benjamin M. Duncan put in an appearance yesterday after a trip to the northern portion of the Panhandle of Texas. Ben says the grass was fine where he was, but there are fewer three-year-old steers there than in former years to eat it. Those cattle which are there are mostly young things, which will be sold to feeders on the range.—Kansas City Times July 22nd.

ANY PERSON wishing to know the truth in regard to their health should not fail to send for a valuable and new 64-page Booklet which will be sent FREE for a short time to those who mention this paper. This book is published by the celebrated physicians and specialists—Dr. Hathaway & Co., of 215 Dearborn st., Chicago, whom you should address. Write today.

TERRITORY OF OKLAHOMA, }  
OKLAHOMA COUNTY, }  
Office of the Secretary of the Live Stock Sanitary Commission of the Territory of Oklahoma.

To Whom it May Concern:  
Notice is hereby given that from the date hereof until November 15, 1898, the state of Texas is declared to be in a state of quarantine and no cattle shall be permitted to enter the Territory of Oklahoma from the state of Texas until after the same shall have been inspected by one of the inspectors of the Territory of Oklahoma and pronounced to be free from all contagious or infectious diseases.  
Done by order of the Live Stock Sanitary Commission of the Territory of Oklahoma, in regular session assembled at Oklahoma City, O. T., this 5th day of July, 1898.  
R. J. EDWARDS, Sec'y.

**The Graphophone as an Entertainer.**  
Science, through the Graphophone, has made it possible for one to have in his home at any time reproductions of music of any kind. In fact every pleasure that appeals to the sense of hearing, is placed at the command of the owner of a graphophone and at small expense. On a Graphophone one can make records of his own words or songs and reproduce them immediately and as often as desired. This can be done only on talking machines manufactured under the Graphophone patents. Endless variety of entertainment is thus afforded. Catalogues can be obtained by writing to the COLUMBIA PHONOGRAPH COMPANY, No. 720-722 Olive Street, St. Louis, Mo.

**Treatment for Black Leg.**  
The Kansas Experiment Station, after a number of tests, has concluded that the best treatment is preventive and that inoculation or vaccination with a prepared virus is the most effective. The station says that if a case of Black Leg has occurred after inoculation, it has not been reported, and so far no bad results have followed vaccination.

The Pasteur Black Leg Vaccine has now been used successfully upon some twenty-millions of animals, mostly in Europe, but its success during the last two and a half years in this country is phenomenal and we would strongly recommend stockmen who are troubled with Black Leg to prevent it by using Pasteur Vaccine. 32-1f-com

To all Members of the Live Stock  
Association

You are hereby notified that O. N. Myers has been employed as inspector for the Association at Kansas City and will take pleasure in meeting you at any time you are at that market. He may be found by inquiring at the office of the Stoller Commission Co., on the second floor of the Exchange building. Please call on him when in Kansas City and receive any suggestions he may have to offer. Membership letter regarding inspection service issues from Secretary's office August 5th.

Respectfully  
W. E. BOLTON, Secretary.

It is thought that Texas fever has broken out south of Coffeyville, Kas., also in Fawn Creek Township in Montgomery county, Kansas.

Printers' Ink, a bright little journal for the trade abbreviates the name of this Territory as "Oak Terr." The proper way is "Okla." and the Territory is understood.

A woman was on the street to-day who should have been at home. She was wearing a loose Mother Hubbard wrapper and a badge which read "Dewey did it."—Atchison Globe.

In this issue of the LIVE STOCK INSPECTOR will be found an article on Pasteur Vaccine, its uses and benefits, by Harold Sorby. This article should be carefully read by every stockman.

The Chicago Live Stock Commission Co. has stationed N. B. Claunch at Woodward for the shipping season as its representative.

The Chicago and Aurora Smelting Co., of Aurora, Ill., makers of type metal and stereotyping metal, have the thanks of the LIVE STOCK INSPECTOR for a very handsome pin tray for desk use made by them of their own metal composition.

Watch your mail and when you see a letter-head or envelope that pleases you better than the one you are using, show it to your printer, and tell him wherein it suits you. He may not be able to make yours like it, but he will be able to suit you better from knowing what style you like.

The managers of the Kansas and Oklahoma railroads have secured an order calling in all their cars in anticipation of a great rush of grain business. They say that the surrender of Santiago and the destruction of the Spanish fleet has greatly stimulated the export of grain and they look for very heavy shipments during the coming six weeks.

We are under obligations to the Mangum Sun for a copy of the Annual Commencement and Course of Study of the Mangum High School. The contents indicate that the people of Greer county are making rapid strides in education and progression and the workmanship on the course of study would be a credit to any printing institution. The Sun certainly deserves great credit for its enterprise.

Private mailing cards have been authorized by an act of Congress of May 19, 1898. The law outlines how they are to be printed, and limits the size to 3 1/4 x 5 1/2 inches, and says the sender must have printed on the face the words, "This side is exclusively for address." If the person using private post cards wants any special advertising matter to be printed it must be placed on the reverse side.

Farmers near Tonkawa and Blackwell are considerably worried over a strange and new disease among cattle. It is an affliction of the eye. The animal is first noticed to have a swelling around the eyes and then they begin to droop the eyelids and water runs from the eyes. In a few days the eyeball turns perfectly white and the animal gets as blind as a bat. No fatalities so far, but all are at a loss to know what to do for the disease, what causes it, where it came from or how it will eventually result.—Ponca City Democrat.

The experiments of dipping ticky cattle at Fort Worth, Tex., have progressed so favorably that Colonel Albert Dean received yesterday instructions from Dr. D. E. Salmon, chief of the bureau of animal industry, at Washington, to allow ten cars of dipped cattle to leave Fort Worth free of quarantine for Illinois points for experimental purposes. Colonel Dean notified his inspector at Fort Worth, Dr. R. P. Steddom, that after carefully inspecting the cattle and permitting them to load to indorse on the bill of lading, "Feed only in native yards."—Kansas City Journal, July 21.

It is a great benefit to ranchmen to have their Western horses halter-broken when they come to market, says the Live Stock Reporter. The advantage should not be underestimated. When broken to lead Western branded horses can be sold one by one in the auction before a large gathering of buyers, whereas horses that cannot be haltered have to be sold at retail. Then again buyers will invariably pay from \$5 to \$10 more as the quality dictates for a horse that is halter broken over one that is absolutely unbroken. They are easier handled and can be shown to better advantage to a customer.

## Association Organization.

The cattlemen of Greer county have formed a local organization for the protection and sanitation interests of Greer county cattle. The organization was effected by the election of G. W. Boyd, President, H. Y. Hoover, Vice-President and J. C. Gilliland, Secretary-Treasurer. The by-laws as published are commendable and the association should be duplicated in every county in Oklahoma. The organization can then maintain local inspection in co-operation with the Oklahoma Live Stock Association, which embraces all the counties in its membership and maintains inspection at all the principal markets. The Oklahoma Association also wields a powerful and united influence in maintaining the quarantine line through the territory and acts directly for its membership in securing legislative enactments of great value to the live stock industry. It is by this association of the cattlemen of all Oklahoma and the adjoining cattle interests in Texas and Kansas which enables the Oklahoma Association to give the best service at the very low rate of only two cents per head per annum. The local association in every county would be effective in directly enhancing the value of the Oklahoma Association and organization of such bodies should be encouraged.

Meantime, the rolls of the Oklahoma Live Stock Association are open to all reputable cattlemen and they can join at any time by addressing the secretary at Woodward who will at all times furnish the necessary blanks for membership application and blanks for the rendition of brands for record.

## National Magnanimity.

The terms of peace as they have been officially outlined are in keeping with American character and tradition. They may serve as a clew to the purpose of the American people now becoming conscious of their mission and destiny.

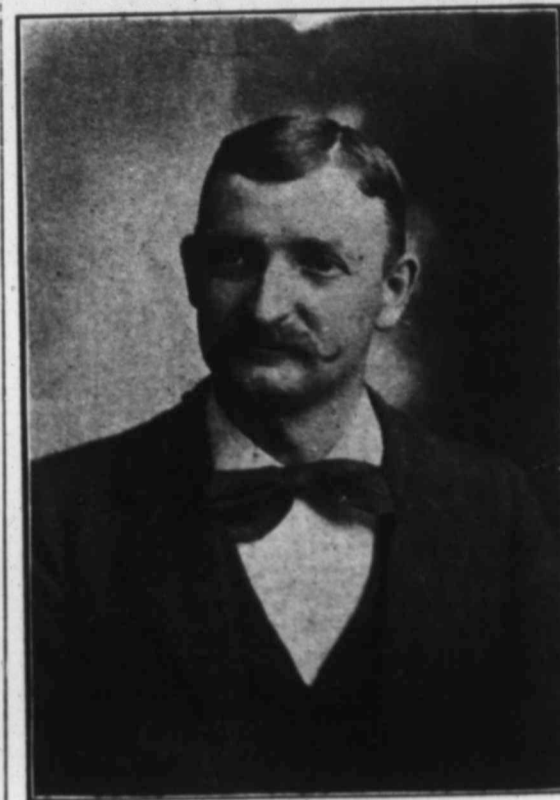

The magnanimity of these terms is unprecedented. Never was victory so complete; never was defeat so crushing and final. Spain is helpless and at the mercy of America. Precedent justifies, if it does not exact, hard conditions, for in such cases might is usually the measure of right.

But mercy is the measure of right. This is a new thought, for sentiment is held fair sport among the cynical diplomats who make the map of the world. Hitherto it has been considered an indication of weakness, but it now appears as a sign of conscious strength, of a power resting, not upon bayonets or ships or guns, but upon a national sense of right, which is the guarantee of safety.

The result is no cunning contrivance of politicians. It is the will of the people who are determined to keep the faith of Washington, Jefferson and Monroe.

The American nation has carried the world one step further on the road to peace. Militant, but not military, she shows that a Government which derives its power from the consent of the governed is indeed the strongest government on earth, and is the only government which dares to be magnanimous. This is the path of judgment, the way of understanding. While they walk in it the American people will not go astray.—St. Louis Post-Dispatch.

The Geo. B. Loving Co., reports the sale of the 7D ranch and cattle in Tom Green and adjoining counties to E. C. Sugg & Bro., of Sugden, I. T., J. B. Wilson of Dallas was the owner. About 10,000 cattle and 150,000 acres of land, 70,000 acres of which is patented were included in the deal. Mr. Wilson bought back 1,000 head of three year old steers and speyed heifers at \$32.50. This is one of the best bred herds in Texas, and with Sug Bros., recent purchase of Coner's herd and ranch, immediately adjoining this, they have one of the biggest layouts in the state. The price for the two purchases will aggregate \$800,000.—Ft. Worth Live Stock Reporter July 19.

Frank Freytag Jr.

Manager of the St. Joseph Daily Gazette began with that Journal as traveling solicitor in November 1884 and has been with them continuously since then, going through every department and was made managing editor Oct. 20, 1896. Mr. Freytag is a very pleasant gentleman and assisted the publisher of the LIVE STOCK INSPECTOR materially in getting matter for this issue of same.

Under date of July 30th Geo. H. Healy writes from Benton, Beaver Co., Oklahoma: "Cattle are rather slow in these parts. While prices are held pretty firmly the tendency is downward. Sales of Panhandle wintered Mexico cows and calves @ \$27.50. Arizona and New Mexico cows and calves, offered @ \$28.50; Southern New Mexico 2 year heifers sold @ \$17. Not much trading as people have got to see their way out with their present holdings before loading up again. Our grass has never been of finer growth and condition. Very dry weather for several weeks past and Buffalo grass is cured. Calf crop somewhat short."

The head officers at Camp Alger are still debating over the question of whether they have been made the victim of a practical joke or whether "those Kansas troops are d—fools," as one of the brigadier generals expressed it. A few days ago a lot of Kansas boys forwarded a petition to headquarters which read in this wise: "Inasmuch as our services do not seem to be needed at the front and we are likely to remain here over winter, we respectfully request permission to put in a crop of wheat. We find about 1,000 acres fit for the purpose on this reservation and can raise enough to bread the army for quite a spell.—Ex.

THIS MAY BE A SAMPLE COPY, in which case you are invited to become a subscriber. You want the stock news of the southwest. We furnish it. The dollar you pay us for subscription for a year may bring many dollars worth of information. If you are taking the paper regularly, please favor us and yourself by inducing your friends to subscribe. We are all interested alike in live stock development. Co-operation counts and we wish to give you good value in every issue. Respectfully,

PUB. LIVE STOCK INSPECTOR.  
Woodward, Okla.

SUCCESSFUL PHYSICIANS We heartily recommend Dr. Hathaway & Co., of 215 Dearborn st., Chicago, as being perfectly reliable and remarkably successful in the treatment of chronic diseases of men and women. They cure where others fail. Our readers, if in need of medical help, should certainly write these eminent doctors and you will receive a free and expert opinion of your case by return mail without cost; this is certainly the right way to do business. They guarantee their cures. Write them today.

**Great Oaks from Little Acorns Grow.**  
 Publisher LIVE STOCK INSPECTOR:

Have just finished reading last issue of your paper, and must congratulate you upon the proposed "new departure" whereby the INSPECTOR is to appear semi-monthly in future. It may I assume, be taken as an evidence of progress, and the appreciation of your constituents up there of your unceasing efforts for the furtherance of their interests.

I have been here in Chicago for the past week, and spent a good part of my time in the office of the Pasteur Vaccine Company, where opportunity was afforded me of seeing the wonderful outgrowth of their business throughout the entire western country. From an humble beginning three years ago, and in the face of obstacles and difficulties at the outset, the indefatigable and untiring energy of Mr. Harold Sorby, the company's manager here, backed by the excellence of the Pasteur Black Leg Vaccine, which he offered the cattlemen, have overcome practically all opposition. Among the warmest advocates of Pasteur Vaccine may now be counted many who at first were either intensely skeptical or bitterly opposed to it. Since 1895 when the Pasteur Vaccine Company commenced operations in this country their sales have more than doubled every half year. In Texas, for instance, from 2,540 head vaccinated with Pasteur Vaccine in 1895, the figure jumped up to 48,350 in 1897, and over 25,000 for the first six months of 1898, and all this in spite of free distribution and sale of other (so called) "Vaccines" and nostrums in great variety. The states of Colorado, the Dakotas and Montana show even a greater increase, and the Indian and Oklahoma Territories are also showing up creditably. One order was received only a few days since from the Chickasaw nation for Vaccine for 2000 head. Thus you see in the case of the Pasteur Vaccine Company as well as the LIVE STOCK INSPECTOR "Great Oaks from Little Acorns Grow."

The Company is now engaged in the preparation of a Pamphlet which will be issued, containing full information of Black Leg and its nature, causes, and prevention, and copies of hundreds of testimonials from stockmen in twenty different states, all unanimous and enthusiastic in their praise of Pasteur Vaccine. Fifty thousand copies will be distributed. Any one interested can procure a copy from you, from the undersigned at Ft. Worth, or from the Pasteur Vaccine Co. Chicago.

The one thing that puzzles me is why some cattlemen still insist on "projecting" as the colored brother would term it, with untried preparations, "sure cures" and all sorts of fakes, when the genuine article, tried and proved for twelve long years in Europe and three years in this country can be had at nominal cost. I guess P. T. Barnum, who was a close observer and an admirable judge of human nature, was pretty nearly right when he said the great American people loved to be humbugged.

P. W. HUNT.  
 Chicago, Ill., July 17, 1898.

**Quarantine Notice.**

Office of the Secretary of the Live Stock Sanitary Commission of the Territory of Oklahoma, Oklahoma City, O. T.

**TO WHOM IT MAY CONCERN:**

Notice is hereby given that the infection of Southern or Splenic fever, commonly known as Texas fever, has been discovered among the cattle in different parts of the counties of Washita, Custer and Greer, in the territory of Oklahoma, and to such an extent as to cause the Live Stock Sanitary Commission to consider it necessary that said counties shall be quarantined. It is therefore ordered that said Counties of Washita, Custer and Greer be quarantined and that no cattle shall be permitted to pass or be driven out of said counties into any portion of the Territory of Oklahoma, without first having been examined by one of the authorized inspectors of this commission and a certificate of

health issued to the owner or person in charge thereof.

Railroad companies doing business within the Territory of Oklahoma are hereby notified not to receive any cattle for shipment from said counties without the owner or person in charge thereof shall present a certificate from one of the authorized inspectors of this commission showing said cattle to have been inspected by him and pronounced to be free from said infection. This certificate shall be supplied in addition to the certificate required by rule six (VI) of the regulations for the year 1898.

Any person persons or corporations violating the provisions of this Notice and Order shall be punishable under the laws of the Territory of Oklahoma in such cases. Provided:

This notice and order to be effective until revoked by order of this commission and public notice thereof given.

Witness my official hand this 22nd day of July, 1898.

R. J. EDWARDS,  
 Secretary of the Live Stock Sanitary Commission of the Territory of Oklahoma.

The Hardesty Herald is one of the best exchanges coming to our table. In a recent article on the character of legislation needed in Oklahoma it closes with the following well worded paragraph:

"The people of all Western Oklahoma need and want the Camp Supply reservation for a veterinary and stock experiment station, and want it equipped for successful operation. And there are other things which all the people of Oklahoma want which can only be procured through the right kind of delegate in congress. Too much care cannot be taken in voting for the right man."

The Blossom House at Kansas City has been the temporary home of more cattlemen than all the other hotels in Kansas City combined. It retains all its old time popularity and is now building extensive additions in order to accommodate the ever increasing patronage. Manager Doggett has proven his ability as a hotel man and cordially invites the Oklahoma cattlemen to make headquarters at the Blossom House which is convenient to depot and stock yards. The Blossom is the best two dollar per day house west of Chicago. Finest table in Kansas City.

Blackleg among young cattle and calves is prevalent and many people are sending for and receiving vaccine virus from the government.—Liberal News.

In some cases the government vaccine is all right, in others all wrong. The government is simply conducting experiments. If you have the cattle to risk the government has the dope and you can get it free if you only agree to report when and how the cattle died after treatment.

Governor Barnes is now preparing his annual report to the Secretary of the Interior and has issued a circular letter requesting the people to send him news items relating to crops, resources, new industries, progress and prosperity of the various sections of the territory. He also asks for photographs of prominent buildings, street scenes, farm and crop scenes, fine natural scenery, etc. It is the aim to make this one of the best reports in the territory's history and the people should join hands and assist all they can.

Chas. K. Carmean, manager for Zeb F. Crider Commission Co., at South St. Joseph, is one of the hustlers at the St. Joseph stock yards. Carmean never loses an opportunity to get business for his house and enjoys a very wide acquaintance among stockmen all over the southwest. He is a royal good fellow moreover and can turn a trick and go all the gaits. See the Crider advertisement and call on Carmean when you visit St. Joseph.

**The New Stock Tax Law.**

From the Kansas City Star.

Oklahoma farmers are preparing to take advantage of a law passed by the territorial legislature of 1897, which will enable them to dispose of enormous quantities of corn and forage for cattle which heretofore they have been compelled to ship out of Oklahoma in order to reach a market. It is a new and substantial source of revenue.

In section 1 of article 10, Oklahoma statutes of 1897, under the title of "Revenue Relating to the Taxation of Transient Property," it is provided "that this act shall not apply to live stock brought into this territory after the first day of November and kept therein until the first day of April following for the express purpose of being grain fed and prepared for market, subject to the quarantine regulations."

This provision exempts transient cattle from the taxation imposed elsewhere in the law, and was intended especially to benefit the farmers by inducing cattlemen to bring in their herds to consume the surplus grain and forage. Last year the farmers were not familiar with the law, and no concerted effort was made to enjoy its benefits.

This year, however, farmers throughout the corn belt are interesting themselves in having cattle brought in from Southern and Southwestern ranges. Oklahoma never before had so much feed stuff as it has now, and the sale of it in the locality where it is raised will greatly increase the bank accounts of farmers instead of entailing the loss in profits that formerly followed the hauling of this surplus to railways.

Cattle men from Texas are already here, making feeding contracts with farmers. The cattle will be distributed over the corn belt in bunches of 100 to several thousands. The firm of Witherspoon Bros., in the Otoe and Ponca Indian country, will bring in 10,000 head, I. T. Pryor, of Columbus, Tex., will have half as many, while numerous other cattle men will have large herds. It is estimated that in the Osage reservation alone 75,000 head will be fed.

Cotton oil mills will also be drawn upon for feed. There is already a mill at Purcell, I. T., and one at Norman, Okla., the first with a 2,000 head capacity. Mills are building at Shawnee, Oklahoma City, and Guthrie, each of which can feed 2,000 cattle.

In extreme Western and Southwestern Oklahoma the question of winter feeding is a matter of less trouble to cattle men than in any other parts of the territory, as the buffalo grass ranges are self-sustaining throughout the year.

**Quarantine Notice.**

Special to LIVE STOCK INSPECTOR.

**TO STOCKMEN:**

You are hereby notified that a herd of cattle infected with Texas fever containing ticks (Boophilus Bovis) have been driven from Waukomis west to the Cimarron river, thence northwest along the river to Abner Wilson's pasture in Woodward county, Oklahoma, where they are now held in quarantine on pasture two miles square in southeast corner of above named pasture. I hereby declare the following territory quarantined, to-wit: Beginning at Waukomis Okla., in Township 21 north, Range 7 west and all townships numbered 21 west of Range 7 to Cimarron river, thence on north side of Cimarron river a strip two miles wide to the east line of Abner Wilson's pasture, and that no cattle will be permitted to be driven across or off of the above district without a permit from myself or some other territorial inspector.

This rule is effective from August 1, 1898.

SAM MATTHEWS,  
 Inspector 2nd District.

**Western Slaughter of Cattle.**

From the St. Louis Live Stock Reporter.

Many who study the general features of the beef trade will be surprised at the uniformity of the killing in the years from 1890 to 1897 at the

combined markets of Chicago, Omaha, St. Louis and Kansas City. The highest total was 3,954,000 cattle in 1894 and the smallest 3,104,000 cattle in 1893. Chicago killed the largest number in 1892, Kansas City killed the largest number in 1897, Omaha killed the largest number in 1895 and St. Louis the largest number in 1896. The average combined total killing for the eight years was 3,580,000 head. The lowest year was 13 per cent below the average and the highest year was 10 per cent above the average. In 1897 Chicago killed 500,000 less than in 1890 but Kansas City, Omaha and St. Louis made up the loss and 300,000 more. The combined Western slaughter of the present year will equal last year so far as present figures show.

Since last issue of the LIVE STOCK INSPECTOR Jno. McGrath has resigned as Inspector of the Sanitary Commission and has been succeeded by Chas. Bickel, of Alva. The very latest as we go to press is that Bickel will not qualify and another man will be appointed at once. This position should be filled by a practical cattleman as the interests involved are of too great magnitude to be left to the political pull of an inexperienced officer.

#### Notes.

An ordinary piano contains a mile of wire string.

Rice forms the chief food for about one-third of the human race.

From a silver half dollar a silver-smith can make a silver teaspoon.

An old man in St. Louis is soon to wed his eighth wife.

Sarah Bernhardt, the great actress, is to play Hamlet in tights and doublet.

There is a nettle weed being cultivated in Europe for its fiber from which textile fabrics are woven.

The Soldiers' Families Protective Associations are doing a great and good work.

The first article made in aluminum was a baby's rattle in the year 1856.

Seeded raisins are an important item among the fruit industries and a valuable one to consumers.

Hemp is of antique origin. Persia is its native home. In California it reaches a height of fifteen or twenty feet.

Tomatoes were once believed to be poisonous and were only cultivated as a garden curiosity. They were called love apples.

Cervera was once madly in love with an American belle. He was unsuccessful in his wooing and with characteristic Spanish ardor he has been seeking vengeance.

All modern necessities for the comfort of the wounded soldiers are being packed and shipped. There are sheets, pillows, towels and boxes of books and magazines.

Before the burning and sinking of the American steamer, Delaware, through the courage and coolness of the crew every soul on board escaped. On the list of mention for bravery is the name of Miss Ellen-Hill, the ship stewardess.

Paper cans are now being made in the United States to take the place of tin cans for preserving food. By the use of these cans the danger from poisoning in canned goods is done away with.

David H. King, a member of the Jeekyll Island Club, has very nobly placed his magnificent seaside home at the disposal of the government to be used as a hospital for wounded soldiers and sailors. The Red Cross Relief committee will be in charge. The island on which it stands is off the coast of Georgia and is eleven miles in length and a veritable paradise.

"Buckey" O'Neill, of Arizona, while charging the foe at San Juan with his comrade Rough Riders, lost his life. He was in all the west a universal favorite. He was once editor of the cattleman's paper, "Hoof and Horn." One of his friends in

writing of his life for a New York paper says: "His wife still lives to mourn the man who, no matter where he happened to be when away from home, wrote her a letter every day. Even while a sheriff in pursuit of criminals over deserts "Buckey" penned a few lines to Pauline on a scrap of paper and sent it back by any stranger he chanced to meet."

The process of whitening sugar was never known until a hen waded in a puddle of clay and then strayed through a sugar house. Her tracks were left in the piles of sugar and it was noticed that the spots where she had stepped were whiter than the rest. So the process of bleaching sugar with clay was adopted and so it is that many useful discoveries are made by accident as well as experiment.

#### Fashion Notes.

Burnt orange is one of the newest colors.

Linen lawns are cool and pretty.

Stiff collars are out of style.

Lace mitts are very popular again.

The Dewey girl wears a helmet, cape and military jacket.

Pique dresses are all the rage, some of them elaborately trimmed.

This summer's hats are worn far down over the face.

The made mull hats are pretty for children.

Fans are worn suspended from a long chain which passes around the neck.

Yale blue is the newest blue shade. Owing to its vividness it is rather trying on most complexions.

Jeweled belts and hat pins are handsomer than ever before. Some of the new belts of white kid have enameled flags in red, white and blue.

The tucked dressing sacque is one of the novelties.

The new varieties of canvas cloth have raised figures woven in black and dark blue.

Old fashioned shawl pins, bracelets and necklaces are coming in style.

Silk sashes are more popular than ever before. The ready made ones are expensive, so a great many buy the silk and fringe by the yard and make them themselves at very little cost.

A small ruffle is placed around and underneath the bottom edge of the new skirts, which gives them the desired flare.

The old fashioned cashmere and lace shawls, like our grandmothers wore, are quite the style and promise to be the mode for winter wraps.

#### All Around Home.

Grease spots can be removed from carpets by the application of naphtha.

A lump of camphor placed in the boxes where silver is kept will prevent it tarnishing.

Oxalic acid, a teaspoonful diluted in half a cup of boiling water, will remove ink stains.

When clothes have been scorched in ironing place them in the sun and it will entirely remove the scorched spots.

The odor of onions left on the hands after peeling them can be removed by rubbing the hands with celery or mustard.

Lime in the eye may cause serious inflammation. The eye should at once be bathed in weak vinegar or lemon juice and water.

Colored prints can be made to retain their colors if they are soaked a short time and washed through a strong salt water.

Lamp chimneys can be hardened and made to last longer by placing them in a vessel of cold water and heating gradually to a boiling point, then allowed to boil five or ten min-

utes. Never allow a lamp to set where water will be splashed on the chimney. This is the most common cause of breakage.

In working on silk embroidery a celluloid thimble should be worn, as it does not catch the thread like the metal thimbles.

In preparing tin cans for flowers if the drainage opening is made in the side near the bottom it will not clog so easily as on the under side.

If you have no ice at hand and wish cool water fill a jar with water, wrap the outside in a very wet cloth and place it where the wind will blow on it.

To make paper transparent for copying drawings place a sheet of paper over the drawing and rub it lightly with pure benzine. The tracing can then be easily made.

To remove a glass stopper from a bottle pass a woolen cloth around the neck and saw it back and forth. The friction heats and causes the neck to expand and loosens the stopper.

#### Our Receipt Book.

##### GREEN TOMATO OYSTERS.

Slice green tomatoes very thin and place them to soak in strong salt water for a short time. Dip each slice of tomato in a batter, covering it well, and fry in hot lard.

##### JELLY PIE.

One glass of jelly, one-half cup of butter, one cup of sugar, yolks of four eggs. Beat all together and bake in a pastry lined pan. Beat the whites of the eggs to a stiff froth and spread over the top just before the pie is done.

##### SUCCOTASH.

Use double the quantity of corn that you do of beans. Cook the beans for three or four hours. Put the corn in one hour before dinner. Have just enough water to cook them in. Care must be taken not to let it stick. Cut the corn from the cob, mix with the beans, season with salt, pepper and a lump of butter; also add half a cup of cream and one small onion chopped fine. This may be served either warm or cold.

##### WHITE HOUSE LAYER CAKE.

Whites of 8 eggs, 24 cups of sugar, 1 small cup of butter, 1 cup of milk, 4 cup of corn starch, 3 cups of flour, 24 teaspoonfuls of baking powder, 1 teaspoonful of vanilla. Follow general directions for making cake. This receipt will make four layers of cake. Caramel for putting between the layers consists of 3 cups of brown sugar, 1 cup of sweet cream, piece of butter the size of an egg, teaspoonful of vanilla. Boil twenty minutes, at the end of which time if the preparation is not of the proper consistency add more sugar.

##### SPICED GRAPES.

Seven lbs. of ripe grapes freed from the stems and washed; five lbs. of sugar, three teaspoons each of cinnamon and allspice, one-half teaspoon of cloves, a pint of good vinegar; squeeze the grapes from their skins and rub through a sieve to free it from the seeds; cook the skins until tender in barely enough water to cover, then add the strained pulp, sugar, vinegar and spices; boil for one-half hour on back of range. This is fine for all kinds of meat, especially cold meats.

##### GNOUCHI.

Put one ounce of butter into half a pint of cold water, and set on the stove in a pan till it boils; when boiling add two and one-half ounces of flour, stirring all the time over the fire until it is cooked; that is until the panado leaves the sides of the saucepan quite clean and cuts the spoon.

Take it off the fire and when slightly cooled add two whole eggs and the yolk of another, a little salt and cayenne and then three ounces of grated cheese, and beat it well together. Rub it through a colander with a jam-pot into some boiling fat; fry till a light brown. Do not put too much in the fat at once, and serve very hot.

It is only a few months ago that William Schinckebier of Chicago applied to the courts for freedom from his wife who had set up for his observance these new commandments:

These are the new commandments of ten. Which wives now make to married men:

- 1—Remember that I am thy wife, That thou must cherish all thy life.
- 2—Thou shalt not stay out late at night When lodges, friends or clubs invite.
- 3—Thou shalt not smoke indoor or out, Nor chew tobacco round about.
- 4—Thou shalt with praise receive my pies, Nor pastry made by me despise.
- 5—My mother thou shalt strive to please And let her live with us in ease.
- 6—Remember 'tis thy duty clear, To dress me well throughout the year.
- 7—Thou shalt in manner mild and meek Give me thy wages every week.
- 8—Thou shalt not be a drinking man, But live on prohibition plan.
- 9—Thou shalt not flirt, but must allow Thy wife such freedom anyhow.
- 10—Thou shalt get up when baby cries, And try the child to tranquilize.

These, my commandments from day to day Implicitly thou shalt obey.

The plaintiff obtained his divorce, but it is only fair to Chicago to say that it was granted on some more reasonable ground.

## 'FRISCO LINE.

THE FRISCO WANTS

THE BUSINESS

The St. Louis and San Francisco Railroad Co.

The great live stock route, reaching the three great live stock markets of the world, Chicago, St. Louis and Kansas City. The attention of shippers is particularly called to the fact that we now have the shortest line from points in Texas to Kansas City and St. Louis. We are also giving special attention to live stock shipments from the Panhandle of Texas to St. Louis, taking same from the A. T. & S. F. R'y at Cherryvale, Kansas. Stock loaded at Woodward and points in that vicinity in the evening reach St. Louis the second morning. Information gladly furnished on application to  
ZACH MULLHALL,  
G. L. S. Agent,  
National Stock Yards, Ill.  
or J. P. MOORE,  
L. S. Agent, Ft. Worth, Texas.

Rates \$1 per day.

TERMS REASONABLE.

FOR SALE: One hundred registered yearling and forty two-year-old Short Horn bulls, acclimated, and from the best strains in Kentucky. No better bulls can be found than these and there is no danger of losing them for fear of taking them to another climate. They are from cows which are considered the best west of the Mississippi. Price will be made right, to all purchasers. Mention this paper and address

B. B. GROOM,  
Panhandle, Texas.

#### GRASS ON WESTERN RANGES.

From the Kansas City Times:

While there is some anxiety in regard to the growing corn crop the grass crop on the western and south-western ranges is said to be assured and the best in years.

Peyton Montgomery is an old range cattleman. He rode a broncho in Texas forty years ago, and since that period, when he was a mere youth, he has passed most of his time on the ranges of the west and southwest. The opinion of such an experienced ranger ought to be of some value when he expresses himself on the cattle situation. He has recently returned from a business trip to La Junta, Col., and here is what he had to say:

"From Dodge City, Kan., to Trinidad, Col., the grass is better than in fifteen years and fatter cattle can be expected from this portion of the west than at any time in the past twenty years. I feel enthusiastic over the bright prospects for western cattlemen, not so much as to the prices which will be realized for cattle, but as to their fine condition. There are not many cattle changing hands on the southwest ranges just now, but the sales which are made are at about steady prices."

#### LIVE STOCK SOLICITORS.

The members of the Kansas City Live Stock exchange by a vote of 81 to 43 adopted the following amendment to section 10 of rule 9, as now in force, to the eleventh line, ending in the phrase, "Members of this exchange," and substituting the following:

"Section 10.—No agent, solicitor or employe shall be hired except at a stipulated salary, not contingent on commissions earned (save only as provided in section 2 of this rule.)

"No solicitor shall be employed except as a bona fide traveling agent.

"He shall not solicit consignments local to his own neighborhood only.

"He shall not be actively engaged in any business other than that of traveling solicitor.

"No solicitor, agent or employe shall be hired who is in the employ of any other party or parties; nor shall he be actively engaged in any other business (save only as provided by section 2 of this rule.)

"No person shall be employed or continued as solicitor who shall buy live stock for speculation or shipment to any market, either on his own, his employer's or other parties' account."

#### Do You Ship Cattle?

Very many readers of the LIVE STOCK INSPECTOR will soon begin shipping cattle to the markets at Kansas City, St. Joseph and St. Louis. For the benefit of those who may be undecided where to consign, the following

list will be of value, representing as it does the leading and more progressive commission firms at the markets.

If you expect to get top sales for your stuff, don't monkey with back number firms who are not alive to their business, who do not even solicit your patronage.

On the other hand, the firms and companies below named are up to date in method; they employ the very best salesman and buyers; they thoroughly understand their business and can give you the very best service at no higher rates than is charged you by others in the business who do not even seek your acquaintance.

In addition to all this these men aid you directly by assisting you to maintain an Association journal; they are interested in your success and invite your confidence. Consign to these people when you ship, no matter whether it be a single car load or a hundred; no matter whether it be cattle, hogs or sheep, and you will not have cause to regret your action.

#### Tax on Stock Exchange.

Washington, D. C., July 20—The commissioner of internal revenue, in a decision rendered to-day, holds that the evidences of transactions of the Kansas City live stock exchange are subject to the internal revenue stamp tax. In the course of his decision the commissioner says:

"I think the business carried on by this exchange is included in the provisions of the act and that it is the duty of the exchange when a sale is made and an agreement of sale or an agreement to sell is entered into to give the buyer a bill and a memorandum or agreement or other evidence of sale or agreement to sell and to place thereon the stamp required by the act, which is 1 cent for each \$100 in value of said sale, etc., or fractional part thereof in excess of \$100.

#### Frank Weinshank will Resign.

Topeka, Kan., July 21—Frank Weinshank, member of the state live stock sanitary commission, will tender his resignation to Governor Leedy when the latter returns home. He will resign for business reasons, having opened a business house in Wichita recently.

## \$50 in Gold!

Will be Paid to any Man or Woman.

It remains for the celebrated firm of physicians and specialists, Dr. Hathaway & Co., (Regular Graduates Registered), to place a genuine business proposition before the public, which has never been made before.

We agree to treat any person afflicted with any chronic disease and cure them, furnishing medicines and everything necessary for their case, or forfeit \$50.00 in gold, providing the patient faithfully follows treatment and directions, and the case is a curable one.

This offer is plain, and there is no catch to it; and furthermore, the offer is good and the money perfectly safe because we are financially responsible.

Dr. Hathaway & Co.'s experience during the last 20 years has proved the fact that they have cured thousands of cases where other doctors have failed, and this warrants them in making this remarkable offer. All persons who are suffering from any chronic disease, have now an opportunity to test the treatment of the acknowledged leading physicians and specialists of this country, with an absolute surety of being cured. Special diseases, such as catarrh, blood poison, weakness

of men and women which affect the delicate organs and private diseases of all kinds, rheumatism, stricture, varicocoele, rupture, female troubles, skin eruptions, ulcers, kidney and urinary diseases, liver and stomach difficulties, liquor, opium and morphine habits, or any chronic disease. Our treatment can be taken at home under our directions, or we will pay railroad fare and hotel bill to all who prefer to come to our office for treatment, if we fail to cure. We have the best of financial and professional references and transact our business on a strictly professional basis, promising nothing but what we can fulfill. We do not believe in any of the free prescriptions, free cure, free sample or C.O.D. frauds, but think it is best in the end to be honest with our patients. Write us to-day; don't delay.

We have carefully prepared Symptom Blanks No. 1, for men; No. 2, for women; No. 3, for skin diseases; No. 4, for catarrh, and new 64 page booklet which we will send Free to all who really desire truthful information about their condition. Call or address:

## POLYNICE OIL!

This new French Medical Discovery has been used with remarkable success in Bellevue Hospital, New York; Howard hospital, Philadelphia; John Hopkins and the Maryland hospitals, Baltimore, Md.

The New York Herald, October 2d and 6th, in an editorial article, says the experiments made at Bellevue hospital with POLYNICE OIL in treatment of RHEUMATISM were highly successful.

The physicians at Bellevue hospital were surprised at the marvelous results produced by this wonderful French medical discovery, which they called

POWERFUL POLYNICE.

John Hopkins University,  
Baltimore, 5th April, 1897.

The experiments made here at the hospital with the Polynice Oil, witnessed by me, having been very successful, I hereby recommend it in all cases of rheumatism.  
(Signed) DR. E. L. BRUGER.

LIVE STOCK NOTES.

Stockmen are requested to write postal card items for this column. The Inspector desires to print live stock notes from everywhere. Send us a postal—push it along.

Mr. Pryor shipped four cars of extra good steers from Woodward on the 25th.

Mun Baker shipped ten carloads of cattle from Gage to Kansas City on the 19th.

Thirty-five dollars per head was offered and refused for two-year-old steers at Woodward last week.

White winged peace will have a tendency to send cattle values still higher. The war is about over.

A. Goddard and Hiram Black, of Custer, sold a fine lot of spring calves at an average of \$16 and \$17 per head on July 15th.

L. H. Patton, of Woodward, has a carload of long yearling Hereford Shorthorn and Red Polled bulls for sale at Higgins, Texas.

Clark Kinkead, a large cattle feeder from Wichita, arrived in Woodward on the 19th and spent several days in this vicinity looking at cattle.

W. P. McCorkle shipped two cars of cattle from Woodward on the 26th. They went to Kansas City market, care of Campbell, Huft & Adams.

On the 23rd Sam Rude and N. B. Claunch shipped 450 head of steers from this place to Kansas City. They were consigned to the Chicago Live Stock Commission Co.

The Oklahoma boy who sent home his pay, fifty dollars with instructions to his father to buy calves with it is made of the right kind of material to make a success in anything he undertakes.

Charles T. Gordon came up yesterday from Norman, Okla., with two cars of cattle, which he disposed of. Last night he left for Omaha to view the exposition there. Mr. Gordon says there have been good rains from Oklahoma City south.—Kansas City Times July 22.

Cattle market in the Panhandle is strong, according to the Canadian Record, \$15 being offered and refused for steer calves for fall delivery and yearling heifers are being held at \$18, but very few of either are being sold. Cattlemen are vaccinating their calves freely and some are mixing sulphur with the salt, believing that it will cause the ticks to fall off in the early fall.

Rowland & Francis, of Harvey Co., Kas., have brought suit against Lehr & VanHorn, of Butler Co., for \$2,500 damages, on account of the latter allowing cattle infected with Texas fever from Crawford county, Texas, to be put in their pasture in Butler county, Kas., last spring, in which the former had 6000 head of cattle, thereby infecting the entire lot. The pastures have been quarantined.

Frank Weinshank and John Bryden, members of the Kansas live stock sanitary commission, went to Kansas City July 21st to consult with Albert Dean, agent of the bureau of animal industry, in regard to doing away with the Kansas cattle inspectors in Colorado. It is said to be contrary to the provisions of the interstate commerce law for state cattle inspectors to inspect cattle passing through a state or territory enroute to another state. Cattlemen have been charged 1 1/2 cents per head for this inspection, so-called, of their cattle, and which in 1897 amounted to \$3,000. Nothing definite was agreed upon yesterday, but the state inspection will undoubtedly be done away with. Mr. Bryden reported two more cases of Texas fever in Cherokee and Montgomery counties, Kansas.

Our Market Letter.

The county markets are strong for feeders and stockers in Oklahoma. The sales are few, sellers being in no rush about selling and buyers are unable to buy satisfactory stuff at prices they are willing to pay. In the markets the prices remain about the same but the range of the markets has narrowed.

The grades including beef steers, western and Texas and Indian steers, remain very near the same price as they were fifteen days ago although some very choice stuff brings a slight advance. There is plenty of news to advance the market including foreign demand, government buying, and shortage of supplies in cattle raising districts, but the market is at a point where conservative buyers hesitate about investing too heavily, and until there is something to cause heavier buying, prices will not advance very much and should receipts continue large prices may decline.

The Kansas City market on July 29, ranged as follows: Dressed beef and shipping steers \$4.00@5.30; Texas and Native cows \$1.50@4.70; Indian steers \$3.15@4.30; stockers and feeders \$3.50@4.75.

The St. Joseph market for July 29 ranged for dressed beef and shipping steers \$4.00@5.15; cows and heifers \$2.65@4.25; stockers and feeders \$3.25@4.10.

Omaha dressed beef steers \$3.75@5.20; cows and mixed stock \$2.50@4.00; heifers \$3.40@4.50; stockers and feeders \$2.50@4.30.

Chicago beef cattle \$4.12@5.55; cows and mixed \$2.00@4.40; stockers and feeders \$3.75@4.25.

St. Louis native dressed beef steers \$3.70@5.35; stockers and feeders \$2.80@5.35; cows and mixed lots \$2.15@4.65; Texas and Indian steers \$3.00@4.25; cows and mixed lots \$2.00@3.50.

The receipts of cattle at Chicago, Kansas City, Omaha, and St. Joseph for the last fifteen days, about 163,000 head.

Hogs: The hog market remains steady with prices steady. The top price has ranged in Kansas City between \$3.90@4.05 for the past fifteen days and the bulk of the sales from \$3.70@4.00. The receipts for the fourteen days have been 175,238.

St. Joseph top prices \$3.80@3.90; bulk \$3.60@3.85. Receipts for fourteen days about 75,000 head.

Chicago top prices on July 30, were \$4.05 with bulk of sales ranging from \$3.70@4.00. Receipts for two weeks ending July 30, 299,000 head.

St. Louis top prices July 30, \$4.00@ with bulks of sale ranging from \$3.80@3.97. Receipts for two weeks \$52,750. The receipts of hogs for seven months are 955,738 head as compared with 964,940 for same period of 1877 a decrease of 9,102 head.

HORSES AND MULES.

The horse and mule markets have been active but receipts have fallen off from the first two weeks in July as fast as demand and the time for fall trade has hardly arrived. The exporters continue in the market at St. Louis and Kansas City, but nearly all have left Chicago, but others are expected at the latter place soon. The export demand is principally for coach horses and drivers.

The Live Stock Inspector is now semi-monthly and better than ever. It is sure to succeed for nothing equal to it in its line is published.—Chandler News, July 29.

Prevent Blackleg In Cattle

by using Collier Williams Mixture. Easily applied and a sure preventive of Blackleg in cattle. For full information, price, etc., call on or address

When visiting Kansas City, stop at the BLOSSOM HOUSE, Opposite Union Depot.

**School Lands for Lease.**

RENEWALS AND VACANT LANDS.  
 TERRITORIAL SCHOOL LAND OFFICE,  
 GUTHRIE, O. T., July 23 1898.  
 Notice is hereby given that bids will be received on or before August 20, 1898, for leasing all vacant school lands and school lands in Oklahoma Territory on which leases expire October 1, 1898, and January 1, 1899.

**GENERAL RULES.**

1. All applications must be made for a period of three years from Jan. 1, 1899.
2. All notes for deferred payments must be made payable on the first day of October of each year.
3. No bids at less than the appraised value will be considered (prior to Aug. 20, 1898).
4. All bids on vacant lands must be accompanied by the first year's rental and where possession is desired at once an additional cash payment will be required for the period between September 1, 1898, and January 1, 1899. Where there are improvements on vacant lands applicants must offer in their application to pay a reasonable value therefor.
5. All bids by other persons than lessees, for leased lands, must be accompanied by the first year's rental and 25 per cent of the appraised value of the improvements, if any, in draft or post office order to guarantee the fulfillment of the terms of their application, should the same be accepted, and also offer to pay the appraised value of the improvements if the land is awarded to them.

**NOTICE TO LESSEES.**

No cash payment will be required of lessees, except of lessees whose leases expire October 1, 1898, who will be required to pay in cash three months rental at their present yearly rate for the period between October 1, 1898, and January 1, 1899.

All leases hereafter will commence on January 1.  
 All lessees desiring renewal of leases must make application for such renewal on or before the 20th day of August 1898 at not less than the appraised rental value, and failing to do so will forfeit their preference rights in the premises.

All lands on which leases expire as above mentioned and for which no application shall have been received in accordance with the above regulations prior to August 20, 1898, will be leased to the highest bidder without reserve as to the preference right of the former lessees. Bids to be received on or before September 15, 1898.

A lessee in good standing who makes application in accordance with the above regulations prior to August 20, 1898, for renewal of his lease will be notified in case higher bids than his be received and may, within 20 days from said notice, make application for renewal at the rental price offered by the highest bidder on said land. Should he fail to make such application within the time prescribed he must, on the expiration of his lease, give possession of the land to said highest bidder and may either remove his improvements or accept the appraised value therefor.

All delinquent lessees are hereby notified that they will not be permitted to renew their lease, or to remove any crop or improvements until their rental obligations are fully paid.

**WESTERN COUNTIES.**

In counties where no appraisements have been made the present rental value now paid by lessees in said counties will be deemed the appraised value and the return made by the lessees to be the value of the improvements unless the justness of said return be contested by a sufficient number of persons desiring to bid on the land in the aforesaid counties to justify the Board in having appraisements made therein.

Lands west of range 14 will be leased by the section without limit at \$33 per section or \$16 per quarter section, except in Greer county which is \$12.50 per quarter section, and in Beaver county at not less than \$20 per section or \$10 per quarter section.

Blank applications will be mailed to

any one on request.  
 By order of the board for leasing school lands.  
 C. M. BARNES, Governor,  
 W. M. JENKINS, Secretary,  
 S. N. HOPKINS, Supt. Pub. Inst.  
 CHAS. H. FILSON, Secretary Board.  
 (First published in NEWS July 29, 1898)

**Jews in the United States.**

It is estimated that the Jews of the United States number about 1,200,000, although that may be somewhat in excess. Although in common with the great mass of the population they prefer the cities, they are found scattered in every section from Bangor to the Klondike, and their synagogues, which were a novelty a few decades ago, save in places like New York, Philadelphia, Charleston, Savannah and Richmond, can be met everywhere.

Chicago recently witnessed the fiftieth anniversary of its oldest synagogue—the new edifice on Indiana Avenue, with its impressive architecture, tells the story of successful growth. The new temples in Cleveland, Little Rock, Kansas City, St. Louis, Detroit, are eloquent reminders of Western progress. San Francisco vies with the Eastern coast-cities in the number of its synagogues. The President of the United States was present at the recent corner-stone laying for the new Washington Temple, which will be worthy of the capital of our country.

In New York, Philadelphia, Cincinnati and Baltimore, the synagogues are in the broad places, and convey a favorable idea of American Israel. According to Rev. Dr. Carroll's statistics there were, in 1897, 570 Jewish congregations in the United States, 143,000 communicants—the last term is misleading. As a rule, the father alone counts as a member of the synagogue. Besides, in the smaller towns in which there are no regular synagogues, there will be found many Jews, and these are not included in the estimate, while a large proportion of Jewish residents of the chief cities may be unattached to any synagogue, membership, being voluntary, not compulsory.—From Frank Leslie's Popular Monthly for August.

The Colorado Cattle Sanitary Board handled 45,511 head of cattle in June 1898 against 67,417 for June 1897, a decrease of 22,106 head.

EXCHANGE CLIPPINGS.

Billy Bolton will hereafter issue his Live Stock Inspector at Woodward twice a month.—Wichita Daily Eagle, July 14.

Billy Bolton's Live Stock Inspector will hereafter be semi-monthly instead of monthly as heretofore.—The Stroud Star, July 22.

The Live Stock Inspector, edited by Billy Bolton, will be issued twice a month instead of once a month.—Wichita Daily Beacon, July 25.

Editor Will E. Bolton, of the Live Stock Inspector, has announced that it will hereafter be issued semi-monthly.—Oklahoma State Capital, July 16.

Billy Bolton's Live Stock Inspector has been changed from a monthly to a semi-monthly, and shows every evidence of prosperity.—The Waukomis World, July 14.

Bill Bolton has changed his paper, the Live Stock Inspector, from a monthly to a semi-monthly. Bolton is all right and so is his paper.—Guthrie Daily Free Press, July 15.

The Live Stock Inspector, Will E. Bolton's paper, is now issued twice a month without any increase in price. Furnished in connection with The Opinion at \$1.35 per year for both.—Kiowa County (Kan.) Opinion, July 22.

Will E. Bolton's Live Stock Inspector will be published semi-monthly. This is one of the best stock papers west of St. Louis and should be in the hands of every stockman in this country.—The Caldwell Advance, July 21.

The Live Stock Inspector, published at Woodward, Ok., is hereafter to be issued twice each month. This is a publication that should be in every cowman's family in Kansas. It is only a dollar a year.—Preston Plaindealer, July 23.

It is our pleasure to announce to our live stock farmers that hereafter the Live Stock Inspector, of Woodward, O. T., edited and owned by Will E. Bolton, will be issued semi-monthly. Step in and see sample copy.—Belle Plaine Defender, July 14.

The Live Stock Inspector of Woodward, Okla., published by Will E. Bolton, and one of the best live stock journals that reaches this office, heretofore a monthly, will now appear twice each month.—Fort Worth Live Stock Inspector, July 19.

It is our pleasure to announce to our live stock farmers that hereafter the Live Stock Inspector, of Woodward, O. T., edited and owned by Will E. Bolton, will be issued semi-monthly. Step in and see sample copy.—Belle Plaine Defender, July 21.

The Woodward Live Stock Inspector, which has heretofore been published monthly, will be changed to a semi-monthly publication. The Live Stock Inspector is a valuable paper of its kind, and its subscribers will certainly appreciate the change.—Beaver Herald, July 21st.

The Live Stock Inspector, published monthly by Will E. Bolton, at Woodward, Okla., will be issued semi-monthly in the future. This is an up-to-date stock journal and deserves a wide circulation among the stockmen of the Panhandle.—The Childress County Budget, July 20.

Will E. Bolton, editor of the Live Stock Inspector, published monthly at Woodward, now in its fourth year, will publish it twice a month hereafter. It made Will sweat to build the Inspector up to a financial success, but the pesetas are coming his way now.—Mulvane Record, July 15.

Our good friend W. E. Bolton publisher of the Live Stock Inspector of Woodward, O. T., was formerly publishing a monthly paper. Yielding to a desire to serve his patrons better and to give them more for their money, he

is now issuing his paper twice a month equally as good as before and without increasing cost of subscription. He has our best wishes for the increased patronage he so richly deserves.—National Live Stock Reporter St. Louis July 25.

Dr. John A. Kiernan, assistant inspector of the Bureau of Animal Industry, has reported to Albert Dean for duty. Dr. Kiernan will be stationed at Fort Worth, Tex., to take charge of the cattle transportation at that point.

The Live Stock Inspector, published at Woodward, Okla., will hereafter be issued twice each month. We can say in all earnestness that the Inspector is worth one hundred times its subscription to every man who handles cattle. The price is only one dollar a year. Every cattleman in this county should read it.—Medicine Index, July 15.

The Live Stock Inspector, the bright stock paper published "on the range," at Woodward, Okla., will hereafter will be published twice a month instead of once as heretofore. W. E. Bolton, the publisher, has secured new quarters and in many ways improved the appearance of his paper, and will no doubt meet with the success he deserves.—Stock Yards Journal St. Joseph, July 15.

Editor Bolton has changed his Live Stock Inspector from a monthly to a semi-monthly. This is one of the best, freshest and most popular stock journals published anywhere and we are glad to see that Bro. Bolton has found it to the interest of all concerned to make the improvement. The Live Stock Inspector is the Oklahoma stock paper.—Mangum Star July 21.

It will be welcome news to its many patrons to know that the Live Stock Inspector will be published semi-monthly from now on. But the price of that valuable stockman's journal will be the same to Herald subscribers as it was before. The Inspector is devoted exclusively to the interests of live stock, and is always foremost in promoting the interests of the stockmen.—Hardesty Herald, July 22.

The Woodward Live Stock Inspector, Wm. Bolton's popular cow paper, comes to our desk twice a month now instead of once as heretofore. The price however remains the same, \$1 per year. Here is a chance for every farmer to get a good, reliable stock paper at a remarkably low price. It is a 4 col. 16 page paper, chock full of interest to everybody and worth twice the price.—Belle Plaine News, July 14.

The Oklahoma Live Stock Inspector, published by that live and energetic newspaper man, Will E. Bolton, will hereafter be issued semi-monthly. Stockmen especially and Oklahoma in general should support this excellent home institution, as it is fully up to the standard with many other papers published outside the territory. Late issues may be obtained by calling at the Enterprise office.—Mullhall Enterprise, July 15.

The Live Stock Inspector, published at Woodward, by Billy Bolton, has grown to a semi-monthly now and is still the neatest of its class that comes to the Eagle's nest. Always good and its more frequent visits will add to its power and usefulness while it is still held at its old rate of subscription. Every Oklahoman who keeps stock ought to have it on his reading table. Send for a sample copy.—The Okeene Eagle July 22.

A Lincoln county man read the other day about the trouble the government was experiencing in collecting a fleet of rams for the navy, and what did he do but write to Washington to say he had one which was at the government's disposal, although this was a species of warfare new to him, as he never before heard of a sheep being used in battle. He also expressed doubt as to the availability of his ram as a sea fighter, but he guaranteed the animal to boost a Spaniard from Havana to kingdom come.—Ex.

**POULTRY DEPARTMENT.**

LIVE STOCK INSPECTOR.

[This Department solicits items of news from each reader of the Live Stock Inspector. It will be the aim of the publisher to make it interesting and instructive and this can best be accomplished by your aid and assistance. Direct all communications for publication to **H. L. ROCHELLE, Editor Poultry Dept., Woodward, Okla.**

When reply is desired outside the columns of Poultry Department, always enclose stamp in your letter to the editor. All business communications should be addressed to the publisher at Woodward, Oklahoma.

When you buy an incubator you do not buy brains. You must supply them yourself, even if you have to borrow them.

As molting season draws near give your fowls a little extra care as they have a heavy drain on their system while growing a new coat.

Some breed are not bred for eggs but for the eye. But the eye does not make them lay eggs, and eggs are the things that bring in the cash.

How much will hens eat? Well, we have one that seems to want a bushel at a meal and another that hardly notices food unless it is to her liking.

We advocate pure breeds for farmers. Scrubs and crosses have caused more losses than diseases. When a man begins to cross his birds he starts on the down grade.

The growing chickens should not be forced onto perches too young, especially the large breeds, as it will produce deformities, but care should be taken to prevent them from huddling into large bunches as this will produce disease.

Frank Fuhr, of the Meade Globe, gets gay over some advice given poultry raisers by the editor of the Poultry department of the LIVE STOCK INSPECTOR. Frank is a nice young man but his knowledge of ducks is limited to an occasional hand out of baked mallards and he should not get bumptious. Our poultry editor is no spring chicken and has followed poultry raising for years. If you see it in the LIVE STOCK INSPECTOR its so!

**Results of Experience.**

The following excerpts from an editorial in Reliable Poultry Journal by the Texas Stock and Farm Journal, is very appropriate and timely and will show what a great goal the American poultryman must strive to reach.

When the reader of a poultry paper finds in it statements to the effect that Mr. Blank refused \$100 for a prize winning cockerel it ought to mean something to him. One hundred dollars is a lot of money, and there must be a wide difference between a bird for which \$100 is refused and a bird that the same breeder will sell for \$5. Still, the beginner with poultry who saw the cream of the season's breeding at the poultry show, often expects to receive, and is disappointed and perhaps angry if he does not receive for his \$2 to \$5, a bird as good, to his way of thinking, as the one for which ten to twenty times this amount must be paid.

In February number of the Reliable Poultry Journal Mr. Sharp Butterfield in his report of the great Crystal Palace show held at London, England, stated that several of the birds, including males and females, were catalogued at \$1000 each. Do any of our readers believe that those prices were put there just for fun, or simply for advertising purposes? If they do they are mistaken. Those prices were genuine. There is a good deal of road to travel between a \$2 bird and a bird held at \$1000. Many will say, "the chicken never lived that was worth a thousand dollars." Possibly not, but if you wanted one of these particular chickens it would take a thousand dollars to get it.

In the mind of the average citizen

to whom "a chicken is a chicken," regardless of everything except its value for pot-pie, no chicken is worth even \$5. Still the novice in the poultry business soon makes up his mind that there are chickens for which he would willingly pay \$5. After he has been in the business longer he will reach the point reached by Doctor Schmidt, where to get what he wants he will be willing to buy three birds, one after another, at \$25 each.

When the fancy gets as old in this country as it is in England men will pay even a thousand dollars for just the bird they want. We believe, fully in this statement. At the Boston show a year ago last winter J. W. Shaw paid Sharp Bros. an even one hundred dollars for seven or eight pounds of Light Brahma pullet. Of course it was an outrageous price—of course no "chicken" was ever worth such a sum but it was paid just the same, and we happen to know that Mr. Shaw appreciates the value of \$100.

And so it goes. Axtell, the trotting horse, could not pull a freight train, but his owner, Mr. Williams, received \$105,000 for him, enough to buy a whole drove of good honest plugs. About \$104,000 was paid for a few seconds of speed in that case, where in the case of exhibition poultry tens of dollars are parted with willingly by intelligent men who want a little higher quality, who want to own and be able to produce "the winners."

**Shade for Poultry.**

During July and August the fowls, both young and old, must be provided with plenty of shade. If confined in yards where there are no trees, or large weeds, shelter of some kind must be arranged, says the Farm and Home.

An old piece of muslin spread over posts will serve the purpose, but does not in any way compare with the comfort afforded by nice, branching trees.

Almost any kind of fruit trees, such as apple, cherry or plum, will give a sufficient shade after two or three years.

Still, no matter how provided, fowls must have shade in summer just as they must have shelter in winter, and unless they get it disease in some form will almost certainly visit the flock. Do not, though, carry the idea to extremes, and keep the fowls where no ray of sun can reach them. They need some sun; in fact it is only during the midday that fowls suffer from the heat. It is then they will hunt the shady nooks, and there remain until evening, when they will again come out in search of food.

See to it at once that some kind of protection from the sun is provided, not only for the old fowls but also the chicks, and at the same time remember that fowls relish cool water several times daily.—Mississippi Valley Dem. & Journal of Agriculture.

**H. L. Rochelle, Breeder of BUFF COCHINS... Exclusively.**

Won all first, three second and one third at Poultry show held in Wichita, Kansas, December, 1897, with strong competition. A few birds for sale from my breeding pens. Eggs, \$1.25 per setting for balance of season. Send stamp for circular.

H. L. ROCHELLE, Woodward, Okla.
