

Mayor's Proclamation

WHEREAS, October 20 is the beginning of another fiscal year of the American Legion and

WHEREAS, November 11, since the close of World War I has been traditionally known as "Armistice Day" but by act of the Texas Legislature and the Congress of the United States has now been designated as "Veterans Day" and

WHEREAS, the American Legion generally has for the past 36 years presented a united front for a strong, continuing defense policy and has been the foremost advocate for protecting the interest of disabled veterans and the widows and orphans of those veterans who made the Supreme Sacrifice and

WHEREAS, the American Legion post of Friona has always been a strong factor in this community for God and Country, now I as mayor of Friona do hereby declare the period of October 20 through November 11 as "American Legion Days" and ask that our entire citizenry join in honoring the veterans of all wars in that period and co-operate with our local American Legion in whatsoever observances it arranges for this period.

Given under my hand and seal, this the 19th day of October, 1954.
CHARLES E. ALLEN, Mayor.

"Legion Days" Observed Here

October 20 through November 11 has been designated by President Eisenhower, Governor Allan Shivers and many Texas mayors as "American Legion Days" and local Post 206 of the American Legion is planning to dedicate that period to acquainting Texas citizens with the program of the organization, according to Post Commander Joe Brummett.

According to Commander Brummett, October 20 is the beginning of the new fiscal year of the American Legion and since World War I, November 11 has been known as "Armistice Day."

During the "American Legion Days" observance Legionnaires will make a special effort to inform veterans of World Wars I and II and the Korean conflict with the aims and purposes of the American Legion, Commander Brummett concluded.

MONDAY MORNING MUSINGS

When Mr. and Mrs. E. W. Tatum received their Albany News this week, they were surprised to find it was over two years old, still neatly rolled, though slightly frayed at the edges. It was the February, 1952, issue, and came in from Harrison, New Jersey.

RUMMAGE SALE

The Friona Women's Club will sponsor a rummage sale on Saturday, October 23.

The articles for sale will be placed at Gib's Cleaners.

A Youth Rally of the Christ Ambassadors of the Assembly of God Church will be held in Friona, Monday night, at the Assembly of God Church.

This will be an area meeting and young people from the churches in Dimmitt, Muleshoe, Hereford, Oton and Anton will participate.

Congratulations to Smiley's Courts for the colorful and brightly lighted sign erected there this week. What with this, Blanton's neon, the Villa Cafe, Steffey's Drive-In lighting, etc., the Friona front door on Highway 60 is looking better, even at night.

Add to signs of progress the caliche-covered parking lot being prepared by the Friona State Bank on the lots adjacent on the west. This lot for use of customers and bank personnel alike will prove its worth more and more; even now parking is getting to be a problem in Friona. (A problem we are glad to greet.)

Nomination for most routine news story of every week: Braves Win Again! This week the plucky little brothers of the Chiefs copped a 20-0 victory under the new lights of the Lazbuddie field.

Next Thursday night Coach Lehnick's charges will pay a visit to Vega.

Remember the rats pictured in The Star some months ago—found right in the center of town in an abandoned building? Well, that building has been razed to the welcome satisfaction of all concerned, except rodents.

To help you out-of-town subscribers get the picture of grain harvest activity here—the grain trucks are lined up from across the draw south to the City Drug at this minute, some two or three abreast in spite of traffic control efforts by the local marshal.

The Reeve boys and crew are all astrir this week in preparation for showing of the new (sensationally so) Chevrolet to make its local debut late next week. Watch for more on this.

Grain Pouring into Local Storage; Trucks In Greatest Numbers Since 1949 Harvest

Golden River of Maize Flows from Local Fields

The lifeblood of Farmer County might this week seem to flow through the grain loaders from combines thick in the maize fields. With most activity centered in the ripening fields of grain and at the elevators, it would be difficult for a visitor to visualize waving fields of wheat, potato digging, lettuce picking and the livestock activity that also feeds the coffers and contribute to the brisk year-round activity made possible through irrigation and rich soils in the Farmer County irrigation belt.

Above is a large truck taking grain from a self-propelled combine on the Nelson Welch farm northeast of Friona. To the side is grain being harvested on the J. H. Boyle land south of Friona.

Maize harvest in Farmer County began in earnest this week, and even at this early stage of the harvest local elevators are taxed to handle the many loads without long truck lines being formed.

By late yesterday afternoon, trucks so congested the streets and highways near the railway crossing in south Friona that full-time duty of Deputy Roberts was necessitated to direct flow of traffic near the elevator turn-offs.

Arthur Drake of the Friona Wheat Growers said that without question more trucks were lined up than at any time since 1949, with the peak of activity still several days away!

On Tuesday the Wheat Growers here dumped 51 carloads of maize—a total of over 5,000,000 pounds, or 370 truckloads with an average load of 13,780 pounds.

The maize is reported of excellent quality in most cases, with exceptional yields.

Tales have been flying thick and fast regarding the top yields, but with many farmers having cut only a small percentage of their crop it is difficult to arrive at an over-all average. Yields have been reported from 4,000 to 7,400 pounds per acre! The higher yields told at the elevators has included the Gus Schlab feed, some Jones-Osborn maize said to have yielded 7,460 from a 30-acre tract, and

Ray Castleberry bringing in some grain yielding over 7,000 pounds.

Weather has been ideal for harvest, with light frost last Wednesday night followed by clear warm days this week. Frost this year came at a date considered early; last year first killing freezes came after mid-November and followed by rains and some hail coming at the normal harvest season to defer harvesting activity. In 1952 a record early freeze came on October 6 with temperatures dropping below 25 degrees at Friona.

Cotton harvest is getting underway, with Wright Williams of the North Plains Gin reporting 337 bales ginned to date, and other gins throughout the county now in operation. Mills & Fleming gin in the center of the cotton area south of Hub ginned 1,100 bales. Some high cotton yields have been in the 1-1½ bale bracket. Hardy May has delivered 24 bales averaging 517 pounds, from 23 acres, to the North Plains Gin.

The frost of last week was generally not heavy enough to allow machine stripping in the fields. Some farms have defoliated, but in most instances imported Mexican labor is being used for the pulling. Steve Struve is using a crew of Indians in his cotton northeast of Friona. Help shortage is general in the county.

Friona Ex-Ballplayers To be Honored 29th

Ex-football players of the Friona High School are to be specially honored in precedent-breaking all-

day activities at the local schools next Friday, October 29.

Sponsored by the Student Faculty Congress and the Pep Club, programs and a parade have been added to the usual queen coronation at the evening football game to provide maximum interest for not only ex-football players but all ex-students who are invited to be in Friona at this time.

Anyone who has played football during any year here is asked to contact the pep club's office before next Friday, mailing or bringing the coupon to the school office. During halftime of the Dimmitt-Friona game, immediately after crowning of the queen, all the former football players will be called to the field for special recognition.

Color Day will be observed, with all teachers and students asked to wear the school colors of red and white during the day. The seniors will sell corsages next week, with the posies in school colors. There may be ordered any time during the week. The Pep Club has a limited number of attractive Friona High School pennants also to be sold.

In afternoon school assembly the football queen will be formally crowned.

Then at 3 p. m. a parade will be formed to march through town, consisting of a number of floats and school units. Included will be the Friona band and pep club, queen's float, football boys, floats from the four high school classes, F.F.A., F.H.A., Thespians, grade school pep group, etc.

The Chieftain-Dimmitt game will be called at 8:00 in the evening. Ladies of the Lakeview Home Demonstration Club will serve a Mexican supper in the school cafeteria prior to the game, with plates going at 50c and \$1.00.

NEW DEN MOTHERS

Mrs. Maxine Pries and Mrs. Carrie Tatum are now Den Mothers for the Friona Cub Scouts. They held their first meeting with the boys this week.

GUEST SPEAKER

Mr. R. A. Selby, assistant superintendent of the Amarillo Public Schools, and teacher of a large Man's Bible Class at Polk Street Methodist Church was the Layman's Day speaker at the local Methodist Church last Sunday. His subject, "A Time for Decision," Mrs. Selby accompanied her husband.

86-Year Old Young Man Is Thrilled by 'Copter Ascent

Possibly "there is nothing new since the visit of the helicopter and crew here in recent days.

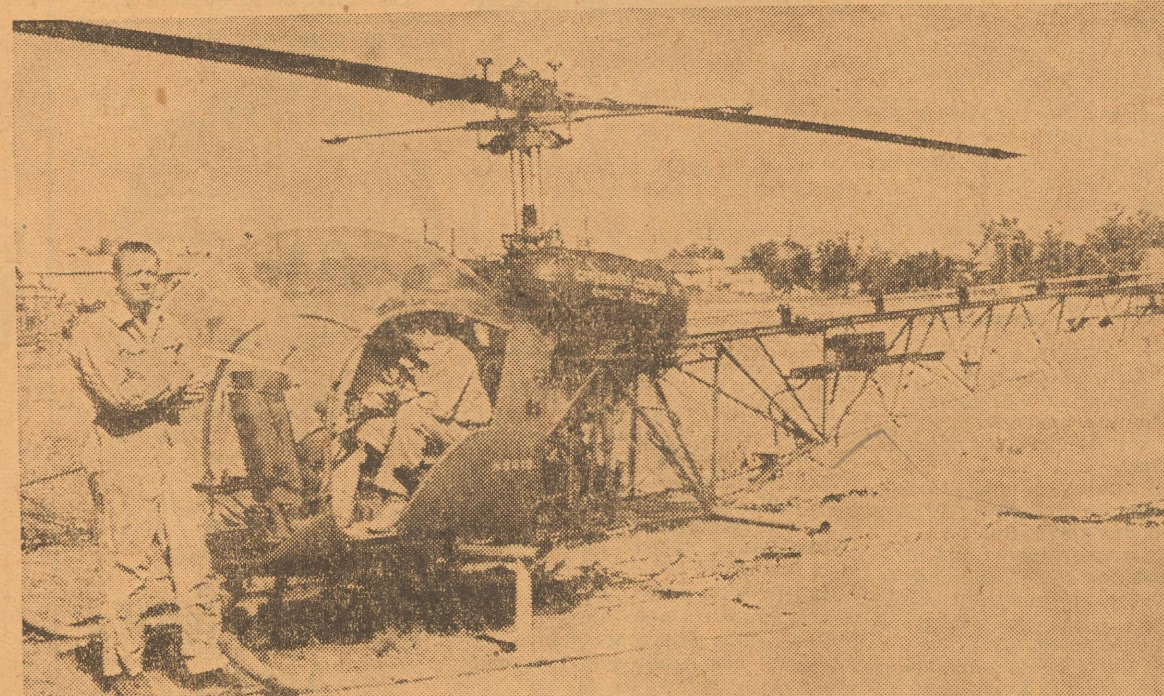

"Uncle John," 86 years old, last Saturday took a spin in the flying windmill piloted by John Scott of Dallas, viewing his home and the Friona townsite for the first time from the air—and in a flying contraption that could hover still, fly backward or straight up, performing most any maneuver at the will of its skilled pilot. Mr. White was enthusiastic in his endorsement of the thrills afforded, and he commented, "that's the nearest heaven I've ever been, and I enjoyed every minute of it!"

Representing Continental Copters, Inc., of which he is vice-president, John Scott has been working throughout Texas since February, finding work peculiarly adaptable to his "copter," coming here for defoliation of the cotton crop. He purchased the \$30,000 machine new from the Bell Aircraft, for whom he had previously worked, and since then has flown a congressional candidate in his East Texas campaign tour, flown for a power and light utilities firm between Fort Worth and Midland, special passenger work in the Dallas area, and the spraying of farm crops.

Flying since 1950, Scott became a captain in the Marine Corps and was assigned to helicopter work in Korea, evacuating wounded, and acting as pilot for General Ridgeway and other officers in observation missions.

Scott was accompanied to this area by his mechanic, Lawrence Peters, Saginaw, Texas, resident formerly with Bell Aircraft.

Some Bug — but No Humbug This!

A new type of defoliation for local cotton was introduced in the Friona vicinity this month when John Scott, former Marine Corps captain, located his helicopter in the area, not only working in the fields but creating considerable interest by taking passengers up in the "flying windmill" for views of local farms and towns.

These are Amendments For Consideration on Nov. 2 Ballot

Highlights and Sidelights FROM Your State CAPITOL

EDITOR'S NOTE: Following is a clear and concise listing and analysis of the Constitutional amendments to be presented Texas voters November 2. The accompanying comment is made by Vern Sanford, secretary of the Texas Press Association, a man who keeps in close contact with Austin and state-wide news items of interest to readers of the hometown weeklies throughout the state.

We hope you will study the amendments carefully — their passage or defeat will come only as you wish and vote.

By VERN SANFORD
Texas Press Association

AUSTIN.—Widespread interest is gradually being developed in the 11 proposed amendments to the Texas Constitution to be voted on at the general election, November 2. No organized opposition has ap-

peared against any of the proposals. However, campaigns are being pushed for several of them.

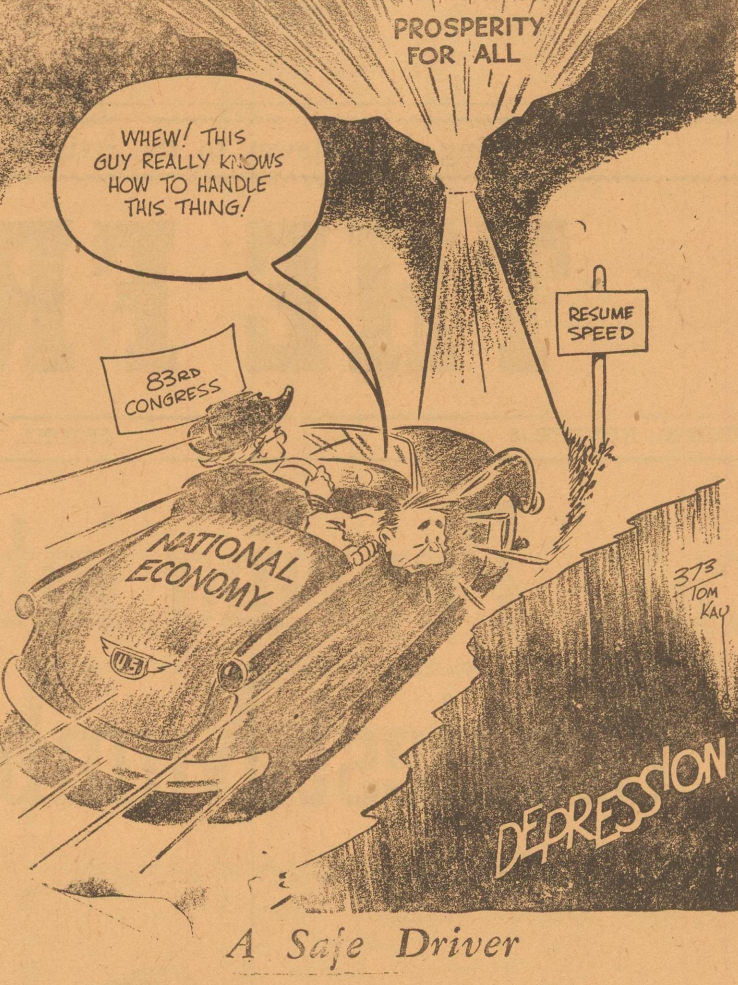

Reports from over the state indicate somewhat of a draw between active support of various amendments and a general tendency to vote against some or all of them because the proposals are not understood or because of some question as to the results of writing such changes into the constitution.

Amendments are discussed here in the order in which they will appear on the ballot.

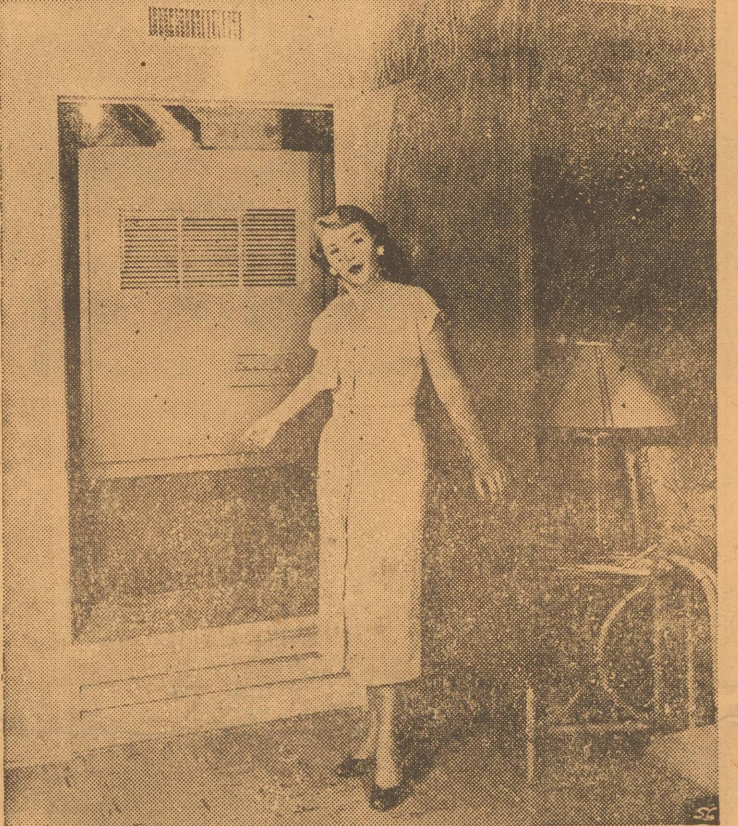

SJR No. 7

Senate Joint Resolution No. 7 authorizes the Legislature to increase State spending for Old Age Assistance, Aid to the Blind, and Aid to the Dependent Children, by \$7,000,000 a year.

Comments from some members of the Legislature and other people familiar with the program indicate

"New Look" Air Conditioned Home

With the annual Fall check-up of furnace equipment and many replacements necessary throughout the country's older homes just ahead, here is an example of what is happening in existing buildings as well as new ones, where year-round air conditioning is being installed. The compact, closet-size Carrier Weathermaker in the background cools and dehumidifies in summer, heats in winter and circulates filter-cleaned air all year.

The Weathermaker Home concept of building the home around this unit is bringing changes in residential design—a new look for better living, and minimum construction and air conditioning costs in addition to year-round comfort. For the attractive housewife shown, it means substantially reduced housework, lower cleaning bills, less frequent redecorating, and a healthier, happier family and home life.

WASHINGTON AND "SMALL BUSINESS"

By C. WILSON HARDER

An independent businessman catching someone dipping into the till does not rationalize such action away as due to unhappy childhood, nor stays quiet because he may antagonize capitalist's relatives or friends.

This fact explains growing grounds of protests reaching Washington from Main Street.

To most minds there is no double standard of evil. Evil is evil, and its black mantle falls on those who passively accept evil, as well as those who concoct it. And encouraging evil with financing is beyond most human understanding.

Many feel Sen. Joseph Knowland, (R., Cal.) would have emerged here had he stood by demand to sever diplomatic relations with Russia.

Attempt being made by J. Stracken Lee, Utah's governor, to stop foreign aid spending as unconstitutional, is drawing Main Street support.

Reports of British Labor Party packet in Red China give sense of urgency to this feeling.

Attlee's statement, "I believe that the Chinese peasant has got something for him, which is concerned with the welfare and prosperity of the peasants and rests upon the confidence of the peasant population. The West has nothing to fear from Communist China." in the Bevin statement made in China, "Our purpose is itself sufficient to show our support for the Chinese People's Revolution" has thrown chill in many American hearts who realize these people may be but a heart beat away from again ruling England.

It is also disclosed British gunboats will protect merchant ships going into Shanghai; naval power perhaps paid for in part by U. S. military assistance aid.

Statements as made by British Labor Party leaders who may again be on eve of power are attributed to either madmen or those who have actually degenerated so morally they can rationalize murder, pillage, slavery. In any event, independent businessmen want to stop use of their taxes to financing such rationalization of evil.

At present British defend Red China relations on grounds U. S. still sees fit to recognize Russia, a situation publicly deplored by Herbert Hoover as the great psychological mistake and moral tragedy of this century.

Now many fear epidemic of rationalization of evil is infecting Washington.

Washington believes special 60 man committee now studying antitrust laws, heavily loaded with college professors and corporation lawyers, will recommend nullifying nation's antitrust laws when it reports in December on grounds U. S. cannot do business with nations without antitrust laws. Already propaganda on this position has been unleashed.

Thus drive will be to sell American people that in order to live with evil, this nation must adopt the ways of evil.

But it is held significant that British system of cartel and monopoly business has as its eventual and inevitable result spawned government officials who not only condone, but uphold bloody, red handed evil. It is history shows all nations who have gone Communist have been nations without antitrust laws to protect independent enterprise.

SJR No. 6

Senate Joint Resolution No. 6, permits a person who has served some time as a teacher and accumulated credits under the Teachers' Retirement System, and also some time as a State employee, with credits under the State Employees' Retirement System, to count his accumulated credits under both systems in determining his retirement pay.

Apparently but few people would be affected. However some opposition is being expressed by members of both retirement systems to the idea of intermingling the two systems in any way.

HJR No. 37

House Joint Resolution No. 37, provides that proprietary employees of the States' subdivisions may be covered by Federal Old Age and Survivors Insurance.

Other municipal and county employees may now be covered under that system under an agreement between the State and Federal governments, and in many cases have been.

But the Attorney General has ruled that the State has no authority to make an agreement covering proprietary employees without a constitutional amendment.

SJR No. 10

Senate Joint Resolution No. 10, would create a State Building Commission with broad authority, subject to Legislative direction, to erect buildings for State purposes.

A State Building Fund would be created by transferring to it the surplus from the Confederate Pension Fund.

The present 2c ad valorem tax provided by the Constitution, for Confederate pensions, returns far more than is necessary to take care of the one Confederate veteran and more than four hundred widows of veterans now receiving such pensions from the State. Therefore the fund is accumulating a surplus of well over \$600,000 each year.

It is anticipated that if the amendment is adopted, nearly \$6,000,000 will be available for transfer to the new State Building Fund in January of 1955.

This amendment has the support of the State Bar of Texas.

The first building, if the proposal is adopted, must be a State Supreme Court Building and it must be dedicated as a memorial to Texans who served in the armed forces of the Confederate States.

SJR No. 5

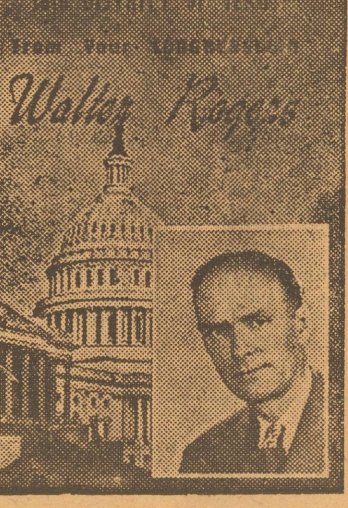

Senate Joint Resolution No. 5, would increase compensation of members of the Legislature to \$25 per day for the first 120 days of any session.

Texas Constitution now provides \$10 per day for the first 10 days and \$5 per day thereafter.

There is strong support and little or no opposition to this increase in pay, which most people think would about cover legislators living expenses while in Austin.

Included in the same amendment is authority for the Legislature to set salaries of the Governor, Attorney General, State Treasurer,

subsequent to that war, we inherited all of the problems that have been accumulating through the years. It was my pleasure to have an extended visit with Judge Edward P. Furber, who is now serving as Chief Justice of this territory. We had a most interesting discussion concerning these problems and what Congress must do to solve some of them. One of the toughest will be the problem of land ownership. Many people in this country think that perhaps the method of handling land ownership is complex here, but you should see what happens when you have several systems mixed together. One man might claim under the Japanese title, another under Spanish, another under German title,

To the People of the 18th District:
United States Trust Territory Of the Pacific

Some time ago, I made a few remarks in a newsletter about the Trust Territory over which this country has jurisdiction and which lies in the far Pacific Ocean. These islands are in three groups, the Marshalls, the Carolines, and the Marianas, with the exception of Guam. Guam has been a United States possession since 1898. All of these islands together cover a space in the Pacific ocean about the size of the United States. If all were lumped together, they would constitute a land mass less than half the size of Rhode Island. It is interesting to note that all of these islands, except Guam, have been under the control of four separate powers, to wit, Spain, Germany, Japan, and the United States. This frequent change of authority has resulted in frequent changes in policy, as far as the Micronesians are concerned. Of course, when the United States occupied these island in World War II, and then accepted them in trust

Hospital Building Need Fast Becoming Acute

Parked cars, lined from the highway north past the present hospital building—this is no exceptional picture but rather the rule as hospital facilities in Friona are being taxed to the limit as never before.

The steadily growing population and the ever-increasing recognition of the local hospital facilities as an outstanding area asset has contributed to the present situation wherein the building program must be tackled anew with a goal of early construction of a new hospital.

Picture to the left shows just one of the many, many Farmer County patients being assisted here—little Gary McCormick of Bovina, victim with other members of his family of severe burns from an explosion scarring their own lives and destroying their home.

About half of needed funds for beginning building of a new hospital have been subscribed, Manager Jimmie Baxter reports, with about \$16,000 of this in hand as actual cash. A concerted drive will be commenced early next month aimed to secure the complete total of funds needed. No let-up in solicitation is anticipated at this crucial time, the need being so evident and acute for expansion of services, room and improvement of safety conditions.

More will be said in subsequent issues pointing out the concrete facts regarding the many phases of local hospital operation. Suffice it to say at present that the facilities are overworked. The need is here, the best of hospital personnel is gathered in the Farmer County Community Hospital, and there are people to be served. We cannot minimize a one of these factors or sell the hospital short. Have you contributed?

THE LIONS ROAR

By BILL STEWART

The Friona Lions Club met Thursday night, October 14, with the attendance up somewhat from the last meeting. There were twenty-six members and the club sweetheart present.

Charles Allen, Zone Chairman of the local club, gave a report on the last zone meeting which was held in Friona the last of September. He remarked that the attendance record of the Friona club was below that of other clubs in this zone. Lion Allen was on the program committee at the meeting and was unable to pull his program from behind the door, and his ad lib gradually dwindled away.

Boss Lion Granville McFarland stressed the need to advertise the Lions Club and increase membership.

At the October 28 meeting a film will be presented by the Southwestern Public Service.

The next zone meeting will be held in Dimmitt on November 9, with dinner at the Snack Bar there at 7:00 p. m.

Dr. and Mrs. Paul Spring and Mr. and Mrs. H. K. Kendrick are planning to attend the football game in Dallas this week-end.

Band Awaiting Arrival Uniforms

By GLADYS BAXTER

The main event this week is waiting for the new uniforms. The boys' white shoes have already arrived and the girls are awaiting theirs.

The band went to Amherst last Friday night and played numbers throughout the game. They also gave a half-time performance. It was cold and the instruments didn't give their loudest volume. But if you will come out Friday night to the Sudan and Friona game, we think you will enjoy the half-time caper. Help the band and pep squad by coming out and showing some school spirit with them.

So if you hear the beating of those drums and see some odd formations on the field—well, come out and see for yourself.

Kind of Companion Crop Important With Alfalfa

In the Central and Northcentral States the majority of alfalfa seedings are established with a companion crop. These give a return from the land during the seeding year, control growth of annual weeds, and help prevent wind and water erosion. In this area, if handled properly, little if any damage is caused by such a crop.

Various companion crops were used in a recent Michigan study including several varieties of oats and barley, German millet, Blackhawk soybeans, common Sudangrass, and Silverhull buckwheat. They were all drilled solid and Grimm alfalfa was broadcast with each crop in the same operation at 8 pounds per acre.

The oats, barley, millet and soybeans were either removed as hay or for grain. The buckwheat and Sudangrass were cut for hay in early bloom and later for grain. After companion crops were removed, a stand count of alfalfa was made in late October and hay yields were taken the following year.

Delayed or incomplete removal of companion crop was almost invariably accompanied by a decreased stand of alfalfa. Thicker stands and more hay were obtained following removal of the grain cut at a height of 3 rather than 8 inches. However, removal of small grain as hay usually led to a thinner stand and a subsequently smaller hay yield than did removal about a month later as grain. In the case of Sudangrass, buckwheat, millet or soybeans, prompt and complete removal of the companion crop was associated with at least fair stands and yields of alfalfa hay. Delay in removal of companion crops usually was disastrous to stands.

Even with more alfalfa plants per square foot in the seedings in Sudangrass, buckwheat, millet or soybeans, the yield of hay the following year was a half a ton less per acre than when oats and barley were used. Plots of Sudangrass and buckwheat cut for hay, with over 13 alfalfa plants per square foot alive in the spring, produced only 2.54 tons of alfalfa hay per acre. Plots of oat varieties, with 9.3 alfalfa plants per square foot, produced 3.02 tons of hay.

Thus, stand count was by no means an adequate criterion of potential hay production. Plant vigor, as well as number, must be considered. With all small grains, acceptable stands and yields were obtained using the systems of management with little difference between treatments.

New seeding of alfalfa with wheat in fall several weeks after wheat harvest.

VISITED FRIENDS HERE

Sgt. and Mrs. Ramon Guillen of Alameda, California, were Friona visitors, Tuesday.

Sgt. Guillen and wife were injured in a car wreck just west of Friona last year, taking the life of their baby, and the parents were hospitalized for some weeks at the hospital here, at which time they made many friends.

Guillen spent some months in Marine patrol duty near the Russian border in Alaska after being through Friona last year. The present stopover here came as the family was enroute to the Naval Air Station at Alameda after visiting Mrs. Guillen's parents on the east coast.

Visiting in the J. T. Gee home over the week-end were his mother, Mrs. J. S. Jackson, and his brother, Ed Jackson, both of Carbon.

AMENDMENTS

Continued from Page 2

Comptroller of Public Accounts, Secretary of State, and Commissioner of the General Land Office.

The Governor's salary is now set by the Constitution at \$12,000, the Attorney Generals at \$10,000, and the other four officials involved are paid \$6,000 a year.

Under this amendment the Legislature could not reduce salaries below these amounts, but could set

them at higher rates.

Opinion does not appear to be so nearly unanimous about this part of the proposed amendment. Some people are troubled by the apparent power of the Legislature to change the salaries at will, and they point out that the Federal Constitution and many other state constitutions prohibit a change in salary during the term to which an official has been elected.

SJR No. 14

Senate Joint Resolution No. 14, prohibits use of the credit of the State or any grant of public money for construction, maintenance or operation of toll roads and turnpikes.

Purpose of this amendment is to write into the Constitution a prohibition now contained in the law, but could be changed by future legislation.

It has the support of the Texas Good Roads Association and many other people particularly interested in the State Highway System, and no known opposition.

HJR No. 16

House Joint Resolution No. 16, would require women to serve on juries.

There are only five states including Texas which do not permit jury service by women.

This amendment would require women to serve under the same rules for jury service as apply to men. It has the active support of many women's organizations.

SJR No. 4

Senate Joint Resolution No. 4 has to do with the terms of elective district, county and precinct offices. It would change all of those which have two-year terms into four-year terms.

It has the support of the County Judges and Commissioners Associations of the state, and the organizations of many other county officials.

The terms of a great number of district, county and precinct offices would be changed immediately if this amendment were adopted. Other such offices are designated

to change to four-year terms in 1956 so that, while all of them would be four-year terms after 1956, only about half of them would appear on the ballot every two years.

Wording of this proposal has resulted in confusion as to its effect on the terms of representatives in the Legislature. Many lawyers are of the opinion that the proposal would require four-year terms for members of the House and other lawyers have said that at least it presents a problem which can only be solved by court interpretation.

SJR No. 2

Senate Joint Resolution No. 2, would authorize creation of county wide hospital districts in Bexar, Dallas, El Paso, Galveston, Harris, Jefferson and Tarrant Counties.

The amendment is permissive and, if adopted, would not create any such districts itself. It simply provides that the property-owning taxpayers of the named counties can vote on such a proposal at a later date.

An active campaign for this proposal is being carried on by a statewide committee composed of mayors, county judges, members of hospital boards, and prominent citizens of the counties involved and some from other parts of the state.

and another under the tribal laws. The solution is going to be very, very interesting. In fact, it could be the source from which we might find a better method of handling land titles and ownership.

The Cost of Reclamation Projects

The Commissioner of Reclamation recently forwarded me information on 69 federal reclamation projects, or major divisions of projects, in operation during 1953. The total acres now served by full or supplement irrigation is 7,147,000. The 1953 harvest established a record in production of 25.7 million tons of food, fiber, forage and pasture crops. This meant that there was an increase of about 2.1 million tons over the 1952 harvest. The value of the 1953 crops from these projects totaled almost 786 million dollars. That would mean the third highest value production in reclamation history, despite some rather sharp declines in

unit crop prices received by farmers. It was the eighth consecutive crop to exceed one-half billion dollars and brings the total of all harvests since 1906 from federal reclamation projects to 9.7 billion dollars. It is well to point out that this cumulative value of all the harvests, to wit, 9.7 billion dollars, is four times the cost, as of June 30, 1953, of all plant, property and equipment of all completed or uncompleted reclamation projects. It is also more than eight times the cost of works built and operated exclusively for irrigation. There have been many complaints registered against reclamation projects, and many of them have been called socialistic and a waste of government money. Although there have been some failures in these projects, the overall picture reflects that the leaders in this country, who founded the reclamation program more than five decades ago, knew what they were doing, and their work has paid great dividends.

LAMPLIGHTER

Thomas Edison lighted the first practical incandescent lamp 75 years ago today. The lamp was never very bright—and it burned for only 40 hours—but to day its brilliance is seen everywhere in modern electric living. What's more, all of our pictures of the future—in homes, farms, businesses and industry—are painted around the wonders of electricity, and its comforts and conveniences. Thomas Edison—Lamplighter. His genius shines all about you.

Ellison, Bruns and Parr attended the district Secretary's and President's meeting in Lubbock, Thursday night. Smith visited the Farm Bureau office in Hobart, Okla., last week, too. We haven't found a group of farmers anywhere that favor compulsory social security for themselves yet, and that includes the Oklahoma group mentioned. This, we think, is a healthy indication of rural opposition to the Socialistic Trend, and we hope it grows in evidence in other groups until individual responsibility is again the rule among Americans.

Farm Bureau urges you to vote in the November election. Read and study and ask all you can, particularly in regard to the proposed State Amendments before you are asked to express your opinion on them. You will make the rules you live by for years to come. Be sure they suit your taste by voting yes or no. Remember that if you don't go to the poles, you will be voting with the majority of the minority does go. That may not be what you want.

If you can and will go to the State Farm Bureau Convention in Galveston, beginning November 7, please let us know at your earliest convenience. Seven voting delegates will go, and you may be eligible as one of those, with part of your expense provided. The directors were authorized to approve delegates, at the County Convention. If you are interested, submit your name.
