

## TENANTS CHARGED BY YARD IN RUSSIA

Landlord Also Considers the Size of Salaries.

Moscow.—In Russia rooms are rented by the yard and paid for on the basis of a tenant's weekly wage. Bolshevism has evolved a rent law unparalleled anywhere else.

The commissioner of health established a minimum space necessary for a wholesome life for one person. This is called the "minimum norm." Any worker is entitled to this living space, and pays for it in proportion to his salary.

When two or more persons live together, all earning money, the rate of rent for their room is fixed by the largest salary earned by one of its inhabitants. This makes the "nepmen," or private business men, extremely unpopular as tenants, because it drives up the rent of all in their apartments to the higher level of their incomes.

But the "nepmen" are popular among co-operative house-building organizations, of which there are now 450 in Moscow. To make both ends meet on the small payment of 850 required of members of co-operatives, one-tenth of the available living space in co-operative houses usually is sold or rented to nonmembers. Naturally, "nepmen" are preferred because, compared to others, they have such a large amount of money.

Besides what they can get from the "nepmen," the housing co-operatives are assisted by state funds, which are generally loaned to them at 2 per cent interest, with repayment in forty-five years.

The "minimum norm" officially declared able to support one life in good condition is fixed at about 7 by 7 feet, which can under certain conditions be increased to about 10 by 10 feet. Many concessions and exceptions are made, such as for students, whose rent is only five cents a month for each "minimum norm" they occupy.

## Tapestries, Once Pope's, May Come to New York

New York.—Tapestries which once decorated the palace of a pope, and which are valued at \$300,000, soon may be hung in St. Patrick's cathedral here. The World learned recently that wealthy New York Catholics are considering purchase of one or more of the tapestries for presentation to the cathedral.

Woven in the Seventeenth century on the pre-Gobelin looms of De la Planche from designs drawn by Rubens, the set was presented by Louis XIII of France to Cardinal Barberini, who later became Pope Urban VIII. For years they hung in the Barberini palace at Rome.

The set, of which seven survive, were brought to this country by Mrs. Rosa Lewis, English hotel owner, who acquired them from Mrs. Benjamin Guinness of the English brewing family, who bought them from the descendants of the Barberini family. Mrs. Lewis brought them here to sell, and has already received offers for individual pieces, but it is hoped to keep the whole set together.

The seven tapestries, all excellently preserved, represent scenes from the life of the Emperor Constantine, first Christian ruler of the world. Nearly a century was needed to complete the entire set, one of the first famous tapestries made in France.

The sum needed to purchase the tapestries would be about \$300,000. Until they are sold five of them are on exhibition at the Grand Central Art galleries.

## Says Friends Know You by Noise of Your Face

London.—"It is possible to distinguish your face from other people's faces by the noise it makes," said J. L. Baird, the television inventor, in a lecture here the other night. He then proceeded to demonstrate.

He explained that he had discovered that transmissions of pictures by the television system were received as sounds by telephone or radiophone, each object or scene having its corresponding vibration.

In his demonstration he used pictures of various persons, and then of a matchbox, a pair of scissors, a hat and a cabbage. One face made a sound like a saw, another like a pneumatic riveter, while the hat purred softly. The cabbage's image emitted a noise like a man gargling.

These sounds, Mr. Baird said, formed permanent records from which the original images could be reproduced.

## Factory Hands Better Paid Than Office Help

New York.—Factory workers and other manual laborers receive an average higher wage than office employees, according to a survey of the national industrial conference board, made public here recently. Weekly wages of the first type of employees averaged \$2 a week more than those of clerical workers, the analysis revealed. The office salary study was based on earnings in twenty occupational classifications of office workers. The data for the survey was gathered in eighteen cities and was collected separately for men and women.

## U. S. LONGEST TUNNEL NEARING COMPLETION

Greatest Engineering Feat of Modern Times.

Tolland, Colo.—When drillers boring from each side of the Continental divide near Tolland meet in the center of James peak within the next few weeks, consummation of one of the greatest engineering feats of modern times will have taken place.

A force of 700 men is laboring daily to rush completion of the gigantic project known as Moffatt tunnel this spring. When finished it will extend slightly more than six miles, making it the longest tunnel in the United States. Passing directly under one of the highest peaks of the Continental divide, it will open up the long isolated Moffatt country, a virgin territory larger than the state of New York, and will save approximately twelve hours' running time between Denver and Salt Lake City, on opposite side of the Rocky mountain range.

To Be Ready July 1. Unless more unforeseen difficulties arise, the tunnel will be ready for the first train to pass through it on July 1.

At present trains crossing the divide are forced to climb a winding mountain trail more than 30 miles long before they arrive at Corona, on top of the range, 11,666 feet above sea level. Trains passing through Corona, a town which consists merely of a telegraph operator's hut, entirely inclosed by a snow shed, move on the highest standard-gauge tracks in the world.

For several months in the year traffic often is stopped for days at a time because of heavy snowfalls on the right of way. The chief operating expense of the line, according to its annual report, is caused by the necessity for almost constant use of snow-removal equipment.

When the Moffatt tunnel is completed all of these difficulties will be eliminated. Trains will travel on almost level ground until they come to the entrance of the tunnel. There they will start climbing a gentle grade straight through the Continental divide and more than two miles below ground. When they get to the middle of the tunnel the grade will change and they will gradually go downward and out into the open country beyond.

The tunnel, expected to cost \$10,000,000 before it is completed, is being financed by the counties it will serve. The railroad using the bore, in turn, will repay the counties affected. The rental scale will be graduated to provide for the expected increased earning capacity of the road after the new route has been in use several years.

Almost insurmountable difficulties have been passed so far by engineers constructing the mammoth hole. Such obstacles as soft rock, requiring extensive and permanent timbering, and underground rivers, which had to be pumped away, have faced the contractors almost constantly.

Strike Subterranean River.

At one place, for instance, an unknown subterranean river was struck. It filled the tunnel as rapidly as the pumps would empty it. Finally it was noticed that Crater lake, high up in the mountains, was becoming lower. Engineers dropped several tons of coloring matter into the lake. When they went down to the tunnel they discovered that the water swirling through it was the same color as that in the lake above. The lake almost vanished before the contractors were able to stop its rushing flow through the tunnel.

Some idea of the stupendous size of the project may be gained from the latest construction figures. Seven hundred miles of holes have been drilled; 2,500,000 pounds of blasting powder used; 11,000,000 board feet of timber, corresponding to 2,000 miles of planks an inch thick and a foot wide, have been put in place; 800,000 pounds of drill steel have been consumed, and more than 3,000,000,000 tons of rock have been removed.

## Alberta's Silver Foxes Found of High Value

Clairmont, Alb.—Silver foxes reared in the Peace river country of northern Alberta are attaining a remarkable reputation for quality, and fox farms in many sections of the United States and Canada now have stock taken from this district.

Alfred Fraser, a prominent New Yorker, once saw in New York four pelts from the ranch of F. E. Turner of Clairmont consigned to London, and was so struck with their quality that he delegated a representative to the Peace river country to secure live silver foxes. A big trade has since been built up in supplying breeding foxes. Last year Turner shipped 80 consignments to all parts of the continent.

## 100 Eagles Attack Flock of Sheep, Kill Forty-two

Moscow.—A great flock of mountain eagles, darkening the sky, swooped down on the meadows of the Dagestan republic and killed forty-two sheep in one mass attack, according to word received by the Soviet commissary of agriculture. The terrified shepherds, accustomed to beating off the attacks of single eagles, fled when the big birds descended on their flocks in mass formation. It was estimated that at least 100 eagles participated in the raid from the sky.

The Most Beautiful Chevrolet in Chevrolet History

The COACH \$595  
L. O. B. Flint, Mich.

# More for Your Money than you ever thought possible

Already the Most Beautiful Chevrolet is scoring the greatest success in Chevrolet history! And why? Because no other car of equally low price ever supplied so completely all the attractions and advantages of a high-priced automobile!

... Fisher Bodies whose style, distinction and luxury rival the costliest custom-built creations!

... marks of distinction such as full-crown one-piece fenders, bullet-type lamps and narrow windshield pillars!

... a host of improvements typified by AC oil filter, AC air cleaner, coincidental steering and ignition lock and improved transmission!

All in addition to Chevrolet's already renowned quality features and powerful, smooth performance—and all offered at amazing price reductions!

Here truly is more for your money than you ever thought possible—more than even Chevrolet, with its progressive policies and magnificent factories, could possibly offer, were it not for the economies of tremendous volume production.

Come in—see the Most Beautiful Chevrolet. Drive it. Learn what makes it the greatest value triumph in automobile history—and why it is winning new buyers by tens of thousands each week!

# QUALITY AT LOW COST

## MOON WOULD SHINE IN WAR OF WORLDS

### Low Lunar Gravity Would Increase Gun Range.

Washington.—If men from the earth were ever able to reach the moon, by the methods of Jules Verne or H. G. Wells, they would engage in warfare in a way unprecedented on the earth, for the ordinary 75-millimeter field gun would shoot three times as far there as did the German long range gun that bombarded Paris during the war.

Though the range of the 75 is about 13,000 yards on the earth, on the moon this would be about 250 miles, Dr. Fred E. Wright, petrologist of the Carnegie Institution of Washington, said in a lecture.

Could Fire 3,400 Miles. With the long-range gun that bombarded Paris from a point about seventy miles away, and had a muzzle velocity of about a mile a second, the lunar gunner could fire nearly half way around the moon, 3,400 miles. If the gun were pointed directly upward its shell would reach a height of a thousand miles above the lunar surface. At a muzzle velocity of a little less than a mile and a half a second, which is not beyond the realms of possibility, the projectile could be fired

completely on the moon, at the earth or some other planet if desired. For a projectile to leave the earth it would have to be fired at a velocity of eighteen miles per second, or at nearly seven miles a second if the earth had no atmosphere.

Doctor Wright has made these studies of the diminished force of gravity and lack of atmosphere on the moon's surface in connection with the work of a Carnegie Institution committee of astronomers, mathematicians and geologists who are collaborating in an effort to learn about the earth's satellite.

"The geologist, accustomed as he is to working with conditions as they exist on the earth's surface, finds himself in a different kind of world when he studies the moon," said Doctor Wright. "The force of gravity to which he is accustomed being so much less, many phenomena would be different. For example, volcanoes on the earth throw rocks only a short distance, so that they often fall back into the crater from which they came. But moon volcanoes would throw material much farther. The result would be that the inside floor of the volcanic craters would be lower than the outer surface, just the opposite of the earthly volcanic conditions. Also the craters would be much larger than any on the earth. Telescopic observation shows that both of these conditions actually occur.

"Another point of marked difference is the lack of erosive forms on the

moon, while so many of the earth's surface features are the result of weathering by wind and water, the moon is without atmosphere and moisture and these forms are absent."

Measures Gravity on Earth. Doctor Wright has also been investigating the force of gravity of the earth and is developing a new form of apparatus for measuring its intensity. The standard way of doing it is with a very accurate pendulum, but the method is complicated and a week or more is required to set up the apparatus at any one place and make the readings. The new instrument, which measures the twisting of a spiral tungsten spring due to the earth's attraction, gives promise of permitting readings comparable in accuracy with the pendulum to be made in a few hours.

### Navy Officer Sues

Washington.—Rear Admiral Bradley Fiske charges that the navy has infringed his patents for shooting submarine torpedoes from airplanes. He is suing Mr. Wilbur and several officials of the Navy department for a quarter of a million.

### Home for Widows

Constantinople.—Constantinople has dedicated a new widows' home, the first institution of its kind in Turkey.

## NEW WING PLANNED FOR U. S. CAPITOL

Building, Begun in 1783, to Have Extension.

Washington.—The capitol, as it stands today, is a symbol of the nation's growth. It has passed through three major stages of expansion, and is yet to be completed through extension of the central part of the east front to give it better architectural balance with the present senate and house sections.

This vast white monument, covering 153,113 square feet, embraces the first capitol of the United States, a modest, almost plain structure about 120 feet long and 100 feet wide, once large enough to accommodate the senate, the house, the Supreme court and the Library of Congress, but now too small for the court and its library.

Funds were scarce when the young government set out in 1783 to build its capitol after a design by Dr. William Thornton, calling for a domed rotunda, a portico and two wings, so it was decided to erect first only the north wing. That was completed in 1800 and congress, the court and the library moved in. "The Oven," a temporary round brick structure, was put up the next year on the site of the house wing, the permanent structure of which was not finished until 1811, three years before both wings were burned by the British. After repairs had been made, work was begun on the rotunda, and the capitol visioned by Thornton was completed in 1827.

It then proved adequate until shortly before the Civil war, when it became necessary to build the present senate and house extensions. Subsequently the library was given a building of its own, and large office buildings were erected for senators and representatives. The library and the house office building are already overcrowded.

When the senate moved into its extension in 1859, the Supreme court acquired the old senate chamber, and only recently have its members been willing to contemplate leaving that room where Webster, Clay, Calhoun, many of the great of the early republic, made history with words. A new site has been selected for a Supreme court building east of the capitol, near the Library of Congress.

## Depicts Future Man as Bodily Ugly, Brainy

Philadelphia.—"A bald-headed, toothless, chinless, thin-shouldered, spindle-legged individual," was the futuristic portrait of the average person of the next generation painted for the Philadelphia Physical Education association by James E. Rogers, director of the National Physical Education Service of New York city.

But the man of the future, though he may have lost all claim to beauty, will be well equipped with brains, Mr. Rogers added.

The one way to avoid having his futuristic sketch become a reality, the speaker added, was for the present generation to return to its "natural heritage of climbing, swimming and running." He indicated that a school day lengthened to conform with the present business day, to provide a more complete recreation program and foster "educational athletics as against spectator athletics," would be a welcome step in American educational methods.

## 45 Days on Trail to Get to Seat in Legislature

Nome, Alaska.—State legislators who complain of over-night travel to reach the capital, have only one forty-fifth the troubles of Thomas Gaffney, representative-elect to the Alaska legislature. Gaffney is now mulling outbound from here with dogs. When he reaches Nenana behind his team he will take the government railroad to Seward. From there it is a steamer ride to Juneau. The legislature convenes at Juneau the first Tuesday in March and Gaffney calculates with 45 days start to just about make it.

## London Street Is Paved With Blocks of Rubber

Washington.—The first thoroughfare to be constructed of rubber is now in use in London. Blocks consisting of rubber caps, vulcanized to a brick base, have been laid in New Bridge street, a road subjected to heavy traffic, and, according to cable reports to the Department of Commerce, have proved successful.

## Famous Irish Castle Will Be Abandoned

Belfast.—A recent decision of the war office to abolish Carrickfergus castle as a military station makes very uncertain the future of one of the most historic spots in the British Isles. The castle is situated on the shore of Belfast lough and was founded in 1128 by Sir John de Courcy, one of the Norman invaders, and was for centuries the scene of much strife between Ireland and England. King William the Third landed there in 1690 on his way to the Boyne and some years later the French privateer Thurot was captured there.

## HAWAIIAN PINEAPPLE IN THE MENU

**M**OST of us have the habit of wanting what we want when we want it. Especially during the cold days we crave plenty of rich foods in the way of meats, roasts, curries, rich sauces, all the foods we like, but which really are generally much too rich for our digestions.

Too often we can't have some of the things we want, but there is probably no reason why we can't eat all of these delicious meats we want, if our cold weather dinners are carefully balanced.

Pineapple, for instance, has been found by science to be invaluable as an aid in digesting meats. For this reason, as well as because all of us like pineapple, our winter dinner menus should contain plenty of this healthful fruit. Fortunately, Hawaiian pineapple may be served in any course in the meal, and since it becomes a different dish when dressed in a different costume, we can readily use pineapple in two or maybe three, of our dinner courses.

Suppose we start a dinner with a South Sea Island Fruit Cup. It sounds very enchanting and proves to be a wondrous way to begin a good meal. Just remove the skins from three bananas, cut in quarters lengthwise and slice in quarter-inch slices. Arrange in cocktail or sherbet glasses. Pour ice-cold, crushed Hawaiian pineapple, the contents of a large can, over each, allowing about one-fourth cup to each serving. Garnish with a candied cherry and serve immediately.

A very attractive salad which

can also be unusual, is pineapple and cream cheese salad. Use pale green heart leaves of lettuce, arranging a ring of these on individual salad plates. On each ring put a whole slice of canned Hawaiian pineapple, from a medium size can, drained and slit across with a sharp knife so that it can be easily divided by the salad fork, yet does not show the cutting until eaten. Rub a fresh cream cheese through a ricer or colander on the pineapple so that it stands up in light delicate flakes, then with a teaspoon gently put in the hole of the pineapple guava or currant jelly. Finish by sprinkling with a French dressing in which lemon juice is used instead of vinegar. The combined flavors of the dressing, pineapple tart jelly and delicate cheese are deliciously blended. Fingers of whole wheat bread and butter are delicious served with this salad.

Another salad, if you wish something a little more ornate for your salad course, is Brown-Eyed Susan Salad. Place a slice of Hawaiian pineapple, from medium can, on a lettuce leaf. Mold pimiento cheese, or cream cheese to which butter coloring and cayenne pepper have been added, into slender pointed rolls, long enough to cover pineapple from center to edge. Lay rolls on the slice of pineapple like petals of a flower. Stone a ripe olive and place in center, trimming underside to make it fit. Garnish with mayonnaise.

Then, if the dessert is to be a heavy one, like plum pudding, for example, pineapple slipped in will make it not only more delicious,

but much more digestible and therefore more "balanced." Hawaiian Plum Pudding is perhaps the best of this kind:

Cream one-fourth cup butter, add one cup brown sugar and one egg well beaten. Heat one-half the contents of one medium can crushed Hawaiian pineapple. Dissolve in it one teaspoon soda, one-fourth teaspoon cloves, one-fourth teaspoon cinnamon, one-fourth teaspoon nutmeg and one-half teaspoon salt. Cut into small pieces one-half cup raisins, one-fourth cup currants, one-half cup dates, one-fourth cup citron and one cup chopped nut meats. Mix with one and one-half cup flour; add alternately with pineapple to first mixture. Mix well and bake in greased muffin tins in a moderate oven (325 degrees F.) for thirty-five minutes. When cool, place in a covered tin box or jar if you are not ready to use it immediately. When ready to serve place in a steamer and steam for thirty minutes. Serve hot with hard sauce.

Oahu pineapple cake is a delicious dessert which is reminiscent of Paradise Islands where it originated. Bake a thin sheet of plain cake. Cut into six rounds the size of pineapple slices. Frost the rims with frosting made with three-fourths cup confectioner's sugar, one teaspoon orange juice and one teaspoon pineapple juice from a large can of sliced Hawaiian pineapple. Place a slice of pineapple on each cake, sprinkle with one-half cup chopped nuts. Cover the hole in pineapple ring with a delicately-browned marshmallow.

## TEMPORARY ADMINISTRATOR CITATION ON APPOINTMENT OF

The State of Texas  
County of Callahan

To the Sheriff or any Constable of Callahan County,—Greeting:

You are Hereby commanded; to cause to be published once a week for ten days, exclusive of the First day of Publication, before the return day hereof, in some newspaper of general circulation published in said County, which has been continuously and regularly published in said County for a period of not less than one year; the following notice:

The State of Texas  
County of Callahan

To all Persons Interested in the Welfare of The Estate of Edward R. Wilson, Deceased:

You are hereby notified, that Ferne G. Wilson has filed in the County Court of Callahan County, Texas, an application for Letters of Temporary Administration upon the Estate of Edward R. Wilson, deceased, and on the 14th day of January, A. D. 1927, by order of the County Judge of said Callahan County, the said Ferne G. Wilson was appointed Temporary Administratrix of the Estate of said Edward R. Wilson, Deceased, and at the next regular term of said Court, commencing on the First Monday in April, A. D. 1927, the same being the 4th day of April, A. D. 1927, at the Court House thereof, in Baird, Texas, at which time, all persons interested

in the Welfare of said Estate are hereby cited to appear and contest such appointment, if they so desire, and if such appointment is not contested at the said term of said Court, then the same shall become permanent.

Herein Fail Not, but have you then and there before said Court on the first day of the next term thereof, this writ, with your return thereon showing how you have executed the same.

Given under my hand and seal of said Court, at office in Baird, Texas, this the 14th day of February, A. D. 1927.

12-3t. S. E. Settle, Clerk,  
County Court, Callahan Co. Texas.

## IN MEMORY OF SAM McCLENDON

In Memory of my Husband, Sam McCleendon who has gone on to be with Jesus; it is so lonely here without him, but sweet to know I shall join him in that glory land, where parting and sorrow is no more. His busy hands are folded upon his peaceful breast; a calm sweet face, no more to smile at me upon this lonely earth, or hear his cheerful voice in kind and loving words; his kind blue eyes are closed, no more to shed a tear; his rosy lips are paled by death, but a peaceful smile lingers there; no more his voice I loved so dear, falls on my listening ears; no more his welcome smiling face to greet me as when I met him at our door; his gentle Spirit strong and pure, yet seems to linger near; so quick to feel another's woe, and sooth another's care.

Dear faithful heart, forever still, no more to suffer pain. But I must bow to the Saviors will, for we shall meet again.

He sleeps in Jesus loving arms secure upon his Breast.

Where pain and parting never comes to disturb his Eternal rest.

I am thinking of you dear Darling thinking of our happy past, and these memories shall last, as long as I live. But now I am sad and lonely since you have gone away, in every thing I miss you, and I am lonely where ever I go.

The Stars so gently beaming upon your silent grave, where I go and weep for the one I loved so dear.

His Wife.

"Clyde sandy belt will rival Belle Plaine when tested. Buy a lease or royalty and watch development." 50-3tpd.

LAUNDRY WORK: We are prepared to do Laundry work,—both washing and ironing. Mrs. O. L. Weatherly, 2nd door north of the Poe Wagon Yard. 10-2tpd.

## IN MEMORY OF WILL G. RYLEE

On January 12, 1927 at 8:30 p. m. the grim reaper, death came to the home of Will Rylee at Oplin, Texas and took his spirit to the other side of the river from whence no traveler ever returns.

Will Rylee was born in Hood Co. Texas, March 7, 1882, moved to Putnam, Callahan County, when he was six years old, thence to Cottonwood, where he grew up to manhood, and married Miss Pearl Thompson, June 28, 1903. To this union four children were born, the eldest a boy who died in infancy. Three girls are living, two of them are married, Mrs. Burford Tyson and Mrs. James Steakley, of Oplin. Will Rylee's friends were numbered by his acquaintances. He went to school to this writer two years at Cottonwood, as a boy he was kind, courteous and energetic.

In our employ for sixteen years, he was always at his post of duty, with a smile and a kind word for everybody.

"Will", as we always called him, is greatly missed by his immediate family and a host of friends at Oplin, where he lived 21 years; a citizen of the truest type has gone to his reward Surely, God with his boundless mercy will take care of the souls of men like Will Rylee.

His friend,  
T. A. Irvin.

"O, its great to live at CLYDE among the fruits and flowers." 7-1f.

Manufactured by Star Products Co., Cameron, Texas. 14-19t. HOLMES DRUG CO.

## GIRL HEALTH CHAMPION TO TRY FOR NATIONAL HONORS

Alberta Hoppe Took First Place at Iowa Fair and at the Sioux City Interstate Fair.

Chicago.—Alberta Hoppe, age fifteen years and ten months, who received a score of 98.9 per cent, was adjudged to be Iowa's healthiest 4-H club girl in a state-wide contest at the recent Iowa state fair. Girls representing 73 counties competed.

A few weeks later she was declared champion health girl at the Sioux City interstate fair in a field of 4-H club entrants from the states of Ohio, Wisconsin, Minnesota, Iowa, Missouri, Kansas, Nebraska, South Dakota, North Dakota, Wyoming and Montana. In this regional contest she scored 99.2 per cent perfect, being faulted only for a little irregularity of teeth and a little weakness in the arch of her foot. The latter is now being corrected through exercises in preparation for the National Health contest in which she will be entered at the National Club congress to be held in Chicago, November 27 to December 4, in connection with the International Live Stock exposition. There Alberta

Alberta Hoppe.

will meet the healthiest club girls from all parts of the country for national honors, each state being represented by its champion health girl. A similar contest for club boys will also be conducted at the same time.

Josephine Arnquist, state leader of girls' club work in Iowa, says: "Alberta, who is a farm girl from Linn county, is a splendid example of a club girl living up to the standards of all-around development of head, heart, hand and health for which 4-H club work stands."

"Alberta is a girl who lives up to the rules of the health game. She has been a 4-H club girl for four years—where health is emphasized in some way at all regular club meetings."

"Swimming is her favorite sport, although she is fond of all gymnastic work including folk dancing, volley ball and indoor baseball. She likes outdoor life."

"Alberta is a sophomore in high school. In her freshman year she averaged about 96 and ranked second in her class. This shows how a good body is the basis on which to build a good mind and a good disposition. She is an example of a rather recently established fact that school children showing the best physical development make the best progress in school."

## Thousands of Soldiers Training for Civil Life

Washington.—A survey of educational training work given enlisted men in the army along with the military instruction they got in the service shows that 44,719 soldiers are being fitted for places in civil life, representative of some 500 trades and professions.

In the particular month covered by the survey 7,800 soldiers were attending motor transport schools; 9,300 were enrolled in post schools to qualify for positions in business life, either as clerks, stenographers or accountants; 1,200 were studying medicine and its allied callings; 4,500 were engaged in work connected with the care of animals, veterinary, blacksmithing and horse shoeing; 4,553 were studying cable, radio, telegraph and telephone communications.

Of the remaining soldier students several hundred are learning the printing trade, more than a hundred are working on railway locomotives as engineers, mechanics and firemen. Still others are trying to master scientific and technical subjects, including meteorology.

About 500 soldiers pursue their studies at night. Arrangements have been made for them to leave their military posts each night to attend classes held in schools of nearby community centers.

## Happy Children

Willows, Calif.—Children in Glenn county are happy. All the high schools are on an enforced vacation pending settlement of a controversy between the teachers and the county treasurer over salaries.

## "Brighter" Burials

London.—"Brighter" burials have been determined upon by the British Undertakers' Woodwork association. New casket designs are for beautiful and graceful workmanship.

## Measures Snow on Far Hill With Telescope

Visalia, Calif.—Measuring the depth of snow on a mountain 11 miles away with a telescope and thereby saving a two-day trip, has been arranged by Col. John R. White, superintendent of Sequoia national park.

Valley farmers kept asking how the snow was piling up in the mountains because it is their next year's water and irrigation supply in the making. Colonel White got tired of making a two-day trip to Alta peak to measure the snow. To save time he placed a telescope on the mountain and measured the snow from the valley.

# Byrne Commercial College

DALLAS

A School With a Personality

will offer you. Immediate employment and opportunity for promotion—a chance to make money—an opportunity to enjoy travel, comforts and luxuries—an opportunity to own your own business and to develop it to large proportions—an opportunity to develop into a useful and prominent citizen and to render service to others. What more could you wish for?

Every student going out of our school reflects credit or discredit on the institution. Your interests are our interests; we must QUALIFY and PLACE you and we do it in HALF the time of otherschools.

Mailing this coupon will not obligate you, but will bring you our 32 page booklet that you will enjoy.
