Cogitations & Aphorisms of Jodok

During all of last week I was terribly "peevish" and as "Andy" says, "I was down in the dumps." In fact, I was so much so that I did not even make an attempt at presenting any of my "cogitations" to the readers of the Star.

Now, the cause of all this peevish and despondency on my part was the treatment my last effort in this column had received before it appeared in print. It had evidently been subjected to a severe ordeal of what might be termed—"journalistic or editorial surgery." All its beautiful curls had been lopped off and it had been shown its long, beautiful flowing beard. Its ears had been cropped and its tail had been docked almost beyond recognition, and it also showed signs of internal surgery as well, having evidently had its appendix and tonsils removed and above all it had suffered the extraction of every fang and tooth it possessed.

It is commonly understood that when a man gets into his "eighties" he is more easily peevish than when he is ten of fifteen years younger, and, old as I be, my pride was almost mortally wounded, but I am convalescent.

Now, I do not know who was to blame for all the above mentioned surgery, and neither do I care any more than it had never been done. It may have been the editor, it may have been the publisher, it may have been the "make-up" man, it may have been the foreman, then, again, it may have been the DEVIL.

But what got me the worst was the fact that it had so little resemblance to my product that I could scarcely recognize it. But it was caught in my trap, so I suppose I will have to own it.

But, laying all foolishness aside—we have been having some very unusually warm weather for this delightful plains country. There were a few nights when it was so warm that it almost resembled "old United States weather," where a fellow arose in the morning hotter and tider after a long sweltering night than when he went to bed. During my many years residence here on the plains, I can recall but few, if any, nights, when at least one blanket was not required to give comfort throughout the night, regardless of how warm the day might have been, but we have had at least two nights when any kind of covering during the night was a superfluous, although I slept soundly throughout these nights and did not really suffer from the heat. I wondered vaguely if we might not be asking ourselves "What has become of our vaunted cool summer nights?"

Now, it just occurs to me that this unusually warm weather here may be the culmination of the tense political struggle that has been in progress for the past several months. Well, anyway, should that surmise be correct, this week will end it and we will then be able to return to our normal summer temperature, since as I understand, there will be no "run-off" primary in Farmer county.

But with all the tenacity of the political campaign in Farmer county, so far as I have been able to learn, it has been a clean and straightforward conflict. I have thus far heard of no political "mud-slinging" from any candidate or his supporters, and had there been any, it would have branded the offending candidate as an unfair opponent, for, it seems to me that there is not a single candidate on either ticket that is deserving of any such treatment.

It just occurs to me that our various candidates comprise as clean a fair a group of people as it might be possible to select from the citizens of the county; and this very fact is going to make it a struggle, with many voters. In the matter of judgment a sto whose name they shall scratch out.

However, in my humble opinion, all voters will, before going to the polls, disrobe himself and her of their malice, jealousies, prejudices and own personal and private interests, and go to the polls in armor, and backed by their own good commonsense and better judgment and cast their votes according to both, when the last ballot has been cast and the votes all fairly counted, then, regardless of who may be elected, very few people of the county will have an honest regret.

It is a pleasure to "me old eyes" to note the fact that so many of our people are making an effort to improve the appearances of their pre-

Friona Star

As those I have mentioned, if I could only have time to roam from my wonted position on the street corner to find them, and should I ever become possessed with the wanderlust for the city and have the opportunity of gratifying this longing, I will be only too glad to bestow my compliments and call the attention of our citizens to such places that I may find.

One of these, the first that came to my attention, and which I have thought of mentioning for some time, is the remises about the home of deputy sheriff, J. C. Wilkison. Now, "Wilkis" seems to be one of those people who have a natural ability and taste for putting things into attractive condition, and the manner in which he has cleaned the gutters on the north and east of his home, and graded and cleaned the sidewalk space between the gutters and his ward, proves that he is an artist in this line, then notice the way in which he always has his shade trees trimmed.

Then, recently I noticed a group of men or boys busily engaged at clearing the space at the rear of the post office building, and the change in appearance from the "eye-sore" that it formerly was, from the presence of growing weeds, rubbish and waste papers of many descriptions, to place of real attractiveness, seems almost a miracle. I do not know who is responsible for this work of cleanliness and neatness, whether it is Mr. Crawford, the owner of the building or Mr. Carson, our postmaster; but whoever may be the responsible party, he is deserving of praise and compliment for his act.

Then another place that bears the marks of neatness and cleanliness is the lot on which the Texas Utility Company office stands at the corner of Seventh street and Main, and is presided over by their very efficient local manager, R. A. Oller.

It is just too bad, however that Ruby's efforts at neatness on his property can not receive the notice it deserves, owing to the fact that the vacant lots on either side of his, are so terribly grown up with weeds as to almost completely conceal the results of his labor from all points except directly in front. About the only way I can see for Ruby to receive the notice he so richly reserves is to clear the weeds from these adjoining lots as well as he has from his own premises. But I am giving him credit and compliment for what he has done and I ask the public, generally, to do so too.

I have at various times mentioned the pretty green sward and ornamental shrubbery which O. F. Lauge has caused to grow in front of the Rockwell Bros. & Co. lumber yard and office, of which he is manager, and the neatly trimmed hedge around his own residence; and the lovely green lawn and majestic shade trees surrounding the R. H. Kinsley home, and the great profusion of beautiful flowers and the green lawn at the Marvin Whaley home. These beauty spots still exist and their owners and care-takers are still deserving of compliment for their efforts in beautifying their home premises and their home town, and the same is also due to Mr. and Mrs. J. W. Parr for the many flowers and ornamental shrubbery that fill the yard around their home on main street.

There are, perhaps, many other places in Friona that are just as deserving of a mention.

As those I have mentioned, if I could only have time to roam from my wonted position on the street corner to find them, and should I ever become possessed with the wanderlust for the city and have the opportunity of gratifying this longing, I will be only too glad to bestow my compliments and call the attention of our citizens to such places that I may find.

And was not that a bad affair that occurred Sunday afternoon when three or four of good people were severely injured and ten of them narrowly escaped death or a life of suffering, in the car collision that took place between Black and Summerfield on Highway No. 33?

I have often heard it said that gasoline and alcohol will not mix, meaning, I suppose that they do not work well together, but it occurs to me that it would have been much better for all concerned if they had been mixed and all poured into the fuel tank of the car, or had the entire mixture been poured into the tank of a driver, the affair might not have happened. This is merely conjecture on my part.

Whatever may have been the cause of this sad affair, if all reports are true that came to my ears, it is a truly sad condition when it becomes a menace to sober and law-abiding citizens to venture out upon our highway in their cars for fear of being run over by some driver who is incapacitated for safe driving.

Some one has told me of a county judge in some Panhandle county, (I think it was Gray county,) who has promised to place the maximum fine on every driver that is caught driving any kind of a motor vehicle on our highways when he has been so much as one drink of intoxicating liquor in him. I heartily commend him, on the position he has taken, and when all other county judges all over the land adopt such an attitude and stand by it, there will be less unsafe driving to menace those who do drive as they should.

BOY SCOUTS HAVE OUTING
The Friona Troop of Boy Scouts, accompanied by their Scout Master, Rev. K. G. Parks, departed Wednesday morning for a three days outing at Palo Duro Canyon.

GUESTS AT GOODWINE HOME
Mr. and Mrs. J. T. Price, were guests at the Mrs. Minnie Goodwine home over the week end. Mr. Price departed Sunday afternoon for Fort Worth, but Mrs. Price remained for a more extended visit. She was formerly Miss Margaret Goodwine.

CAR CRASH INJURES SEVERAL

A head-on car collision, which occurred on Highway No. 33, somewhere between Black and Summerfield Sunday afternoon, came near ending the lives of seven Friona people and three young men of the Black community.

As Mr. and Mrs. Tom Galloway and baby daughter, Mr. and Mrs. Henry Lewis, of this community, and Mrs. Charles Luna and three-year old daughter, and Sharlie Ann, of Dallas, were on their way to Cany where Mrs. Luna and daughter were to take the train enroute to their home, they came meeting a car being driven westward, which persisted in remaining on the side of the road opposite to where it should be.

Mrs. Galloway was driving and Mr. Lewis and Mrs. Luna and the two children were in the cab of Mrs. Galloway's pick-up in which they were riding, while the two men, Messrs. Galloway and Lewis, were sitting on a cushion in the rear body of the car, with their backs leaning against the back of the cab.

CAR TURNS TURTLE NEAR PERMERTON SWITCH

A "blowout" in one of the tires of a fine Oldsmobile car, caused it to turn over two and a half times as it was being driven along Highway No. 33, near Permerton Switch, six miles west of Friona about the middle of the forenoon Sunday.

The car was owned by Paul Colvert, secretary of the Oklahoma Board of Public Affairs, and was occupied by Mr. and Mrs. Colvert and their two small daughters, Mary and Catherine. According to report, Mrs. Colvert was driving when the catastrophe occurred.

An ambulance from Hereford was summoned and carried the people to the office of a physician here at Friona, where first aid was given them when they were taken to the hospital at Hereford for further examination and treatment.

It is reported that Mr. Colvert suffered some cuts and bruises on head and a few broken ribs, and that Mrs. Colvert had some bad cuts on her legs, but none of the injuries being necessarily fatal.

FRIONA WEATHER

During the past week we have experienced some of the warmest weather ever known in this locality, which was mostly the result of the fact that our usually cooling breeze failed to do its duty, and a few nights were thus left still and rather sultry but yet not depressing enough to cause the loss of a great deal of sleep and rest.

On last Wednesday evening a light shower fell to the north and northwest of town, giving an estimated quarter of an inch of moisture, but covered only a small amount of territory.

MRS. SMITH AT HOME

Mrs. A. D. Smith who taught in the schools at Fort Sumner, New Mexico, and who has been visiting relatives at Oklahoma City, returned home last week and will be here regularly, as she does not plan to teach during the coming school term.

MRS. PRICE GIVES PARTY FOR SON
Little Royce Neal Price celebrated his fourth birthday with a party given Monday afternoon at the home of his parents, Mr. and Mrs. E. L. Price.

CANDIDATES EXTEND GREETINGS AND EXPRESSIONS

The attention of the readers of the Star is called to the splendid list of advertisements inserted by the various candidates for county, district and state offices in this issue of the Star.

It will be hard indeed and perhaps impossible to find a list of better people who are offering themselves as candidates in any county, for the suffrage of the people, and their efforts in calling attention to their various candidacies is indeed worthy of the consideration of all readers of the Star.

Enough copies of this issue of the Star are being printed to send one into every home in Farmer county, and we are renewing our liberal offer on subscription rates, which we hope each home in the county will take advantage of.

COURT THIS WEEK

Quite a large number of our people are attending District Court at Farwell, this week, most of them as jurors, but a few as witnesses.

The trial of Herbert Stanley, one of the men charged with the robbery of the Friona State Bank on June 29th, was called on Monday and all that day was spent in securing a jury, so that the taking of evidence was not begun until Tuesday morning. It is reported that the state is striving for the death sentence.

No word as to the progress of the case had been received at the Star office at the time of this writing, Tuesday evening.

The case of J. C. Britton, the other man charged with Stanley, has been set for Monday of next week.

District attorney, James Witherspoon, is being assisted in the prosecution of Stanley by John Aldridge, two Farwell attorneys, J. D. Thomas, also of Farwell, has been appointed by the court to defend Stanley. Owing to the serious character of the sentence sought by the state, the trial will likely consume two or more days.

HOW I ARRANGED MY BED ROOM

By Mrs. W. J. Sides, Bedroom Demonstrator, Oklahoma Lane Club

The first thing I did in fixing my bedroom, I dusted walls, cleaned a all wood work with soap and water and a soft rag. Also cleaned furniture with rayon cloth wrung out of clear water as dry as possible, then saturated in clear polish. Built several shelves in closet, which is two-and-a-half feet by ten feet, for bed linen and hat racks, made shoe racks and hat racks from patterns furnished me by our agent, Miss St. Clair, put rods in closet for hanging cloths on, repapered room, revarnished furniture and all wood work. Repainted floor and had rug cleaned, made protectors for mattresses and pillows, made curtains, put slats under each coil of springs, bought shades, mattress pads and cotton bedspreads. My bedroom is 14x14 feet. Furniture consists of table, chairs, vanity, chest of drawers and bed. The color scheme was carried out in rose and white. Besides materials on hand and volunteer labor, the cost of my bed room was \$14.66, paid for out of produce. I also refurnished rest of my house, consisting of five rooms and bath. Did most of the work myself, the extra cost also being paid for out of produce. I worked about 35 days and figure I saved about \$160.03 in labor.

FRIONA HOME DEMONSTRATION CLUB

The Friona Home Demonstration Club met at the home of Mrs. A. H. Boatman July 16th, to study "Cool Meals for Hot Days."

We enjoyed a very instructive and delightful afternoon. Mrs. St. Clair demonstrated two "onedish" meals—a potato salad served on lettuce leaves with cold meat, and Creole rice. This was such an appetizing meal that I am going to give it in this report for the benefit of some who may wish to try it:

Creole Rice: 1 cup ham cooked, 3 cups cooked rice, 2 onions, 2 or 3 bell peppers, 1 half cup butter, 1 half teaspoonful chili power. Four to six real ripe tomatoes, or one No. 2 can of tomatoes with juice poured off. Salt and pepper to taste. Add all ingredients to rice and cook slightly, and serve warm.

She also served a fruit punch consisting of juices from following fruits: pineapple, lemon, orange, grapefruit. The punch was sweet, but enough tart flavor of the fruit to quench the thirst and the last word.

She gave us cards for eight and picked up and at

We were very

Those attending were: Irene White Gladys Lacwell, Juanita Baynum, of Clovis; Tim Magness, Billy Ray Raybon, Bobbie Joe New, Saddle Sonny Burney, Tommy Lacwell, ne Baynum, Albert Addula Hart, G. H. Pruden and Ede Below.

Mr. R. M. Pittman, of Fort Worth, arrived here last week for an ed visit in the home of Mr. E. L. Price. Mrs. Price is his

International Sunday School Lesson

By DR. J. E. NUNN

For Sunday, July 26

General Theme: Christianity
Scripture Lesson: Acts 7:59 to 8:4 - 1 Peter 4:12-19.

Acts 7:
59. And they stoned Stephen, calling upon God, and saying, Lord Jesus, receive my spirit.

60. And he kneeled down, and cried with loud voice, Lord, lay not this sin to their charge. And when he had said this, he fell asleep.

Acts 8:
1. And Saul was consenting unto his death. And at that time there was a great persecution against the church which was at Jerusalem; and they were all scattered abroad throughout the regions of Judea and Samaria, except the apostles.

2. And devout men carried Stephen to his burial, and made great lamentation over him.

3. As for Saul, he made havock of the church, entering into every house and haling men and women committed them to prison.

4. Therefore they that were scattered abroad went every where preaching the word.

1 Peter 4:
12. Beloved, think it not strange concerning the fiery trial which is to try you, as though some strange things happened unto you:

13. But rejoice, inasmuch as ye are partakers of Christ's sufferings; that, when his glory shall be revealed, ye may be glad also with exceeding joy.

14. If ye be reproached for the name of Christ, happy are ye: for the spirit of glory and of God resteth upon you: on their part he is evil spoken of, but on your part he is glorified.

15. But let none of you suffer as a murderer, or as a thief, or as an evildoer, or as a busybody in other men's matters.

16. Yet if any man suffer as a Christian, let him not be ashamed; but let him glorify God on this behalf.

17. For the time is come that judgment must begin at the house of God; and if it first begin at us, what shall the end be of them that obey not the gospel of God?

18. And if the righteous scarcely be saved, where shall the ungodly and the sinner appear?

19. Wherefore let them that suffer according to the will of God commit the keeping of their souls to him in well doing, as unto the faithful Creator.

GOLDEN TEXT: Be thou faithful unto death, and I will give thee a crown of life. Revelation 2:10.

INTRODUCTION
One of the seven prominent men in the early church chosen as a deacon, and probably the most able of all of them was Stephen. "A man full of faith and the Holy Spirit" (Acts 6:5), as well as "of grace and power" (8:3). Stephen had been exceedingly active and successful in performing miracles and especially in proclaiming the Lord Jesus with such wisdom and so in the power of the Holy Spirit that those attending the synagogue of the Libertines were unable to reply to his mighty arguments.

STEPHEN'S DEFENSE
So they brought Stephen before the Sanhedrin, that great body of Jewish legislators, the most august assembly of its kind in the world at that time. Standing before the Sanhedrin, "his face as it had been the face of an angel" (6:15). Stephen delivered that marvelous address found in the seventh chapter of Acts. What a vision was given to him that day as the first martyr of the Christian Church, when, looking up steadfastly into heaven, he saw the actual "glory of God," "and the Son of man standing on the right hand of God." (Acts 7:55).

"THEY STONED STEPHEN"
Acts 7:59
"And they stoned Stephen, calling upon the Lord, and saying, Lord Jesus, receive my spirit." "And cried with a loud voice, Lord, lay not this sin to their charge, and when he had said this, he fell asleep." (Ver. 60). Christ often referred to death as sleep (Matt. 9:24; Mark 5:39; John 11:11). Paul also uses the figure (1 Cor. 15:20, 51; 1 Thess. 4:14). We fall asleep with the expectation of awaking when rested. When we slip away from this earth in death, we who are Christians are convinced that we shall awaken, as it were, in the presence of the Lord. We arise from slumber refreshed for the day's work: after death, we are all changed and we live in the abiding strength of resurrection power.

THE PERSECUTION OF SAUL OF TARSUS, Acts 8:3-4
"But Saul laid waste the church, entering into every house, and dragging men and women committed them to prison." The word here

more ye mow us down, the more quickly we grow. The blood of Christians is fresh seed." It was hard tragic, that the Christian group at Jerusalem, that had been knit together by the Spirit into such a delightful confraternity (4:32) should be broken up, "scattered" (8:1,4). That, however, is another characteristic of humanity; it is a missionary religion; it may not selfishly "nest," settle down; must be forever pushing on and out - or else, as here, driven on and out. Jesus has been spoken of as "restless;" he was, and his religion is. Contrast Judaism and Christianity: the former has its gaze, historically and sentimentally, fixed upon the little country Canaan, Palestine; the latter, like its Lord, faces everywhere; the whole world; for the one Jerusalem is a goal, for the other a starting-point (Luke 24:47).

PREACHING THE GOSPEL IN ANTIOCH - Acts 11:19-21
Luke describes for us the progress of the gospel in Judea, Phenicia, Cyprus, and Antioch. It was a glorious crusade as fleeing believers told the story so that new believers were added to the army of the Lord in every village and city. Phenicia was an important land along the sea containing Tyre and Sidon. Cyprus was an island in the Mediterranean about sixty miles from the mainland. Antioch, about 300 miles north of Jerusalem, was a large city on the Orontes River founded in 300 B. C. by Nicator. It rose quickly to take first rank in the kingdom of Syria. It was the third city in the Roman Empire and had probably a half-million people, Jews, Greeks, Latins, and Syrians. It was destined to supplant Jerusalem as the center of Christian activity. These fugitives began preaching immediately, even though they were in a strange city. "The hand of the Lord was with them." God had demonstrated his approval of their mission to the Gentiles. God gave power to the message and many were convicted and converted. "They turned from their idolatry to the Lord Jesus Christ." A victory had been won in a distant land.

ENCOURAGEMENT FOR PERSECUTED ONES - 1 Peter 4:12-19
Peter, when an old man, writes a comforting letter to the Christians who are suffering under the cruel hand of Nero. We see it as Peter's word of help in one of the darkest hours of the life of Christianity. Domitian and Trajan had been bad enough but Nero was worse. The cruel tormentors made their way from Rome into the provinces where any person who was known as a Christian was caught and made to suffer. Peter knew what it was like - for he had experienced such treatment from the Sanhedrin and under Herod Agrippa I. When he heard of the fiery trials of the Christians of the five provinces he wrote this letter of encourage cheer, and strengthen them. They needed to understand the meaning of their suffering and to gain from trial the good that Christ would have them receive.

A CAPTAIN WEIGHS ANCHOR-AND GOLD
A sea captain on duty discovered a rich gold lode when he found specks of gold in the mud clinging to the anchor which was being weighed near Tatu Island, off New Guinea. Sealed orders, the prospect of death on the high seas, and a last minute rescue followed, writes a Melbourne, Australia, correspondent in the Detroit Free Press.

The captain thought his find was alluvial gold. A planter prospected the gold and won 200 ounces. They formed a small syndicate with a few friends, keeping the location a close secret.

An engineer was appointed to prospect the find. He sailed under sealed orders from Melbourne until far at sea. At the place where the captain made his discovery the engineer found that the gold was not alluvial but a rich lode.

On the way back to port the schooner ran into the teeth of a gale which smashed the rudder, leaving the ship to drift helpless for hours on a seldom navigated stretch of water. The floundering ship was rapidly sinking when an inter-island motor ship appeared. All on board were rescued after great difficulty. They were landed 100 miles from civilization. Plans now are being completed to work the lucky lode.

Forest Here 20,000,000
Years Ago, Scientist Says
A forest not very different from that existing today girdled the earth in the North Temperate zone 20,000,000 years ago, according to Roland W.

biologist of the United States Geological Survey. He bases his conclusions on the study of fossil leaves, fruits and seeds which he found in the strata of the Cretaceous period.

Good River for Fish
Passer-by (to angler)—Good river for fish?
Angler—It must be. I can't persuade any to come out.—Pearson's Weekly.

Foresight
Bill—My uncle knew a month before he died when he would die.
Jack—My, that's remarkable. Intuition tell him?
Bill—No, the judge.

Too Particular
Mrs. Backpay—Good morning, sir, will you take a chair?
Post Office Collector—No, thank you. I'll take the piano instead.

Right on the Chair
How far down do you want to go?
By, all the way, of course.

TAKE YOUR CHOICE

A hexagon has six sides.
Montpellier is the capital of Vermont.
William H. Taft was President in 1912.

Queen Wilhelmina is the present ruler of Holland.

Hooster is a nickname for the people of Indiana.

Jenny Lind was a world famous singer from Sweden.

Gold coins contain alloy because pure gold is too soft.

In condolences, it is not what people say, but how they say it.

Louisiana was named after King Louis XIV of France.

The meaning of trepidation is alarm, dismay or consternation.

Because you plant roses doesn't mean that you endorse thorns.

Those who have little to telephone wonder what keeps others so busy.

To find the circumference of a circle, multiply the diameter by 3.1416.

Little factory towns want more smoke. It doesn't yet injure their health.

Some good children go to sleep before it is time to read them the bed time story.

People get into a quarrel beyond extraction before they realize how deep into it they are.

As government lays on more taxes a man discards those personal ones of his own devising.

It is gradually dawning on those who are interested in "wild life" that there isn't going to be any.

Nearly everyone wants to be important without the penalty of others being nosy about his affairs.

Jerusalem Is Discarding Gharries for City Taxis
The last of Jerusalem's famous fleet of ramshackle open horse-drawn cabs has been discarded for taxicabs, notes a Jerusalem United Press correspondent.

Practically every visitor to Jerusalem used to take at least one drive in one of these horse cabs, or gharries. They seemed as typical a part of the Jerusalem scene as gondolas in Venice or rickshaws in Shanghai.

The steep city streets recently were asphalted for the benefit of automobile traffic. As a result the cab horses continually slipped and fell. The Society for the Prevention of Cruelty to Animals intervened, resulting in the withdrawal of horse-drawn cabs from the streets.

Incidentally the change started a minor racket in cab licenses. The government planned to issue a taxicab license to every previous holder of a gharry license. The transfer value of one of these licenses in the open market stands at present at about \$500.

Some sharp-witted automobile agents obtained advance information on the government's intentions and immediately bought up all horse-cab licenses they could find. Their idea was to "be in on the ground floor" when the new taxi licenses were issued.

Lightning Ends Argument
Two men standing in a field near Gauhati, Assam, were having an argument. Gradually dark clouds gathered above them, but still they argued, oblivious of the threatening storm. Suddenly there was a blinding flash of lightning, which abruptly ended the controversy. When the two disputants came to themselves they found that the shock had deprived them both of the power of speech.

Lights Needed Half a Day
To show the importance of attention to the lighting of homes, experts have discovered that during the eight-hour working day throughout the year, artificial illumination is necessary during nearly 50 per cent of the time.

Nowhere, a Floating Town
The town of Nowhere—built on a giant raft—is so named because it goes nowhere in particular as it is towed in search of logs along the west coast of Canada. The town has a main street, school, church and store, and every child wears a life belt all day long.—Collier's Weekly.

Good River for Fish
Passer-by (to angler)—Good river for fish?
Angler—It must be. I can't persuade any to come out.—Pearson's Weekly.

Foresight
Bill—My uncle knew a month before he died when he would die.
Jack—My, that's remarkable. Intuition tell him?
Bill—No, the judge.

Too Particular
Mrs. Backpay—Good morning, sir, will you take a chair?
Post Office Collector—No, thank you. I'll take the piano instead.

Right on the Chair
How far down do you want to go?
By, all the way, of course.

IT'S YOUR LAUGH

Next Question
Teacher—Where is the capital of the United States?
"All over the world."

Not Choicy
Butcher—Round steak, madam?
Bride—The shape doesn't interest me so long as it's tender.

Ouch!
Lady (showing photograph)—Don't I look terrible?
He—Not on the photograph.

That's That
"Rastus, does you love me?"
"Mandy, you is one woman I don't like none other no better than."

Counting Time
"Has Sir Charles asked for your hand yet?"
"No, but the knight is still young."

In the Same Fix
"Til tell you this, old boy; I'm master in my own house."
"Quite. And my wife's away, too."

Ding-Dong
He told her of his great love.
"When a belle is told," she whispered winsomely, "a ring generally follows."

Around the Bend
Motorist—Is it very far to the next town?
Native—Well, it seems further'n it is, but it ain't.

Appropriate Name
"Oatmeal, oatmeal—every day oatmeal!" lamented Willie.
"Yes," said Fred; "no wonder they call it a serial."

Makes a Difference
Passenger—Have I time to say good-by to my wife?
Porter—I don't know, sir; how long have you been married?

The Reason
Tommy—I wonder why fat men are always so jolly and good natured?
Billy—That's easy. They can't run and they can't fight.

Good Trade
"Yesterday I got a parrot for my wife."
"Um! I wouldn't mind an exchange like that."—Answers Magazine.

Bailed Up
Bob—Can I play basketball? Why I'm so good I can play in my sleep.
Heckler—Yeh, and usually do I.

A Past-Tense Mystery
"That political luminary is not as brilliant as formerly."
"No. He is a sort of ex-ray now."

Passing the Time Away
"Why are you passing your watch from one hand to another?"
"I am only passing the time away."

Couldn't Abide Them
"I hate stubborn people."
"Me, too. I make it a point never to give in to that sort of person."—Stray Stories Magazine.

Caution
"Where are you going, hubby?"
"To a wild life conference."
"Very well. But remember, not too wild."—Philadelphia Bulletin.

Fortunate
Senior—My brother fell against the piano and hit his head.
Junior—Hurt him much?
Senior—No, he hit the soft pedal.

No Rest for Zoo Animals
Night time, with its protecting shadows, no longer means greater privacy for a number of the animals at the Paris zoo, at least during visiting hours. When darkness falls the lions' den is lighted with floodlights, and the scene made more picturesque by colorful projectors. Likewise the seals have had their tanks flooded with powerful underwater lights to show their swimming antics. In cases where the floodlights are being used, however, provision has been made to protect the animals against glare.

Bureau of Standards
Through the government's vast testing laboratory, the national bureau of standards, there is one general trip, daily except Saturday, Sunday and holidays, beginning at 2:15 p. m. The bureau deals with standards in all fields of commerce and industry, is the custodian of the national standard measurements of length and mass and is the principal testing laboratory for governmental purchases and supplies, although doing some work also for private industries and the public. It was established in 1901, under the Department of Commerce, and employs 700 skilled technicians in the fields of physics, chemistry and engineering. There are 12 laboratory buildings in the unit.—Washington Star

Douglass Closes Campaign Friday With Radio Talk

Friends Feel Sure He Will Be Swept Into Office

Panhandle, July 22.—Curtis Douglass, Attorney from Panhandle, is bringing to a close this week his campaign for state senator from the 31st senatorial district. His active speaking campaign began more than two months ago, and he has spoken in nearly every city of the Panhandle.

In addition, many business friends and attorneys have made addresses in what probably has been the most vigorously contested district office in the history of the Panhandle.

Waging a campaign against an opponent, entrenched in office for his second four-year term, interspersed with two campaigns for governor, Douglass has realized that he must make a real battle.

However, on the eve of the election next Saturday, July 25, Douglass and his friends are confident that he will receive an overwhelming endorsement at the polls.

Douglass spoke at Allison, McLean, Alanreed and Mobeetie Tuesday. Wednesday afternoon he spoke at Lefors and at Pampa at night. The Pampa program called for an introduction by W. M. Lewright with W. J. Smith presiding. Thursday's program called for an address by Douglass Thursday night at Borger.

A feature of the campaign for Thursday and Friday is a motor caravan through the Panhandle. Plans are for 25 to 50 cars to make a flying trip to dozens of Panhandle cities in his behalf. Tentative plans were to spend Thursday night in Childress with a Douglass rally there that night.

The caravan will move toward home on Friday and will reach Amarillo Friday night for a parade to help close the campaign. Douglass will speak over KGNC, Amarillo, from 8 to 8:45 p. m. Friday night, July 24.

E. A. Simpson, Newton P. Willis, Julius Dossenfeld, James Spiller and R. A. Wilson, all attorneys from this section, are filling engagements this week.

Return Marvin Jones To Congress From 18th District

"On farm matters, Representative Marvin Jones of Texas, chairman of the powerful house agriculture committee, speaks in Congress for the Administration with an authority possessed by no other member."

—from Associated Press Article
"Marvin Jones is one of the most powerful floor fighters in the House of Representatives." from Washington Herald article
"The farmer is no longer suffering from 15-cent corn, 3-cent hogs, 2 1/2-cent beef, 30-cent wheat and 5-cent cotton. — He has been returned to the road to freedom and prosperity. We will keep him on that road." —Democratic Platform

The farm program, handled by Mr. Jones, has brought many millions in benefit payments to this section. It has increased farm prices, restored purchasing power and saved thousands of homes at a low rate of interest. Not only has it benefited farmers and livestock men. It has saved business as well.

Has Lived in the Panhandle Since Boyhood Days. Interested in the people of this section and acquainted with their needs.

In cooperation with local citizens, has given vital assistance in securing public roads, school buildings and other projects.

MARVIN JONES COMMITTEE

Lewis P. Fields, Chairman

USE REST PERIODS TO CHECK BOREDOM

The National Institute of Industrial Psychology is conducting a campaign to drive fatigue and boredom out of Britain's factories and workshops. Its most potent antidote against these twin evils is the scientific rest pause—a carefully calculated interval during the day's routine when everyone is allowed complete relaxation. "The effect of such breathers," an official of the institute told a London Tins-Bits Magazine man, "leads not only to increased happiness among the workers, a decrease in their sickness and accident rate, but also tends to improve their efficiency."

"Rather against the will of some of its officials, a Midland factory granted its employees a 15-minute rest pause in the morning and another of the same duration in the afternoon. It thus sacrificed 30 minutes of each man's time daily. But instead of any loss in output, at the end of the week there was actually a 2 per cent increase! In another instance, following the introduction of rest pauses, girls employed on piecework in a tapestry factory increased their output and earnings by 10 per cent. The slower workers derive the maximum benefit from these intervals."

"Auto Bug" Has Lights; Runs Down White Grubs

In the West Indies, Central America, and northern South America, there is a large click beetle, which has on the forepart of its body two large luminous spots giving out so brilliant a light that it is called in some places "the automobile bug."

This striking insect so appealed to women of the West Indies that they once used it as an evening coiffure ornament, fastened to a hairpin with a thread. Dealers sold the beetles from small wicker cages in the market places.

The beetle is remarkable in another way. When flying, it throws a large brilliant spot of light on the ground, despite the fact that the luminous spots are on top. It was once believed that the beetle flew upside down, but this is physically impossible. The explanation is that in flight the abdomen is elevated between the wings exposing another luminous area where the hindpart of the body joins the forepart. It is a matter of speculation whether this ground light helps the beetle in landing.

The young of these beetles, say entomologists of the United States Department of Agriculture, are beneficial in eating white grubs, a serious pest in sugarcane fields in these regions. These baby beetles also are luminous—so luminous that one in a dark room will shed light enough for reading a newspaper.

Starfish Are Dyed Blue in a War Against Them

Starfish in Long Island Sound are being dyed a deep Nile blue by the United States bureau of fisheries in its study of their migratory habits. As a voracious enemy of the oyster, the starfish has long been fought by oystermen and the government. At first various tags were attached to the little things, who simply cast off the arm to which a tag had been tied and grew another.

Finally a Nile blue dye that does not kill the starfish, and after three months seems as brilliant as when first applied, was found. Now, by taking samples of the starfish at regular intervals and by noting the points at which they are found, it is possible to keep definite track of their movements.

Trade Winds Shift

In the last 30 years, the direction of Hawaii's trade winds has shifted from northeast to east, say reports from the United States weather bureau's Honolulu office. This has resulted in some areas formerly dry becoming verdant, as the moisture-laden winds hit the mountain peaks from the new angle.

Pay Unclaimed

Lying unclaimed with the United States treasury, Washington, D. C., are \$17,000 due employees in the Mare Island navy yard for overtime between March 21, 1878, and September 22, 1882.

Awing the Multitude

"Our ancient dragon inspires no terror," said Hi Ho, the sage of Chinatown. "If we wish to awe the multitude we should create a new winged creature more or less resembling a bombing plane."

He Knew Better

"Wot I say is, the man should have all the say in the home, that's wot I say."

"I say the same—only I don't say it."—Stray Stories Magazine.

And Lots of It

Mother (to son wandering around room)—What are you looking for?
Son—Nothing.
Mother—You'll find it in the box where the candy was.

He'd Like It Better

Mother—Don't you think a cake with ten candles would be nice for your birthday, Bob?
Bob—I'd rather have a candle and ten cakes!

No Bull

Teacher—Henry, analyze this sentence: "It was getting to be milking time." What mood?
Henry—The cow!

SHORT SNAPS

A "high-boy" is a high chest of drawers.

Ottoman empire is a name sometimes applied to Turkey.

Two University of Missouri professors have announced the discovery of Vitamin H.

A LITTLE DIFFERENT

An old slave market still stands at Louisville, Ga.

Red-headed persons are said by one expert to make the most fuss in the dentist's chair.

Toy libraries, where playthings may be borrowed like books, have been opened at Moscow, Russia.

The Berlin Philharmonic orchestra carried two tons of instruments on a recent tour of England and Scotland.

A bill collector in Bolivia was fired for accepting as payment the site of what became the richest tin mine in the world.

The father of a Harvard student allowed himself to be "shot" in court to prove that his son's air pistol was harmless.

Woman's traditional fear of rats and mice is absent at the University of Utah. Coeds in home economics are caring for three families of white rats.

WISDOM OF THE DAY

Good to forgive, best to forget.—Browning.

True ease in writing comes from art, not chance.—Pope.

Veracity, that golden key that opens the place of eternity.—Milton.

In jealousy there is more self-love than love.—La Rochefoucauld.

When we are well, we all easily give good advice to the sick.—Terence.

Sin has many tools, but a lie is the handle which fits them all.—Holmes.

Learning without thought is labor lost. Thought without learning is perilous.—Confucius.

The greatest punishment for having done an injury is the fact of having done it.—Seneca.

OF GENERAL INTEREST

Casein is being made in Japan from the liquid produced in processing silk.

The mining business of Peru is very much in the hands of American companies.

Building construction in Johannesburg, South Africa, last year broke all records.

Twenty per cent of the well-to-do married adults in this country have no children.

A white-tailed kite, a fading species of hawk, was captured recently at McAllen, Texas.

The largest ships now afloat will be able to pass easily under the new San Francisco-Oakland bay bridge.

Famous men of ancient times lived almost as long as do famous men of today, according to the statistics of a large life insurance company.

SNAPPY JOTINGS

Pasteur institutes report 1,500 bites by human beings treated last year.

Streamlined baby carriages operated by motor have appeared in London.

The high price of radium is not due to its rarity, but to the immense cost of isolating it.

The tailor shop of President Andrew Johnson still stands in Green county, Tennessee.

Parts of a building erected in Egypt by Pharos Akehnaton, 3,300 years ago have been excavated.

Statistics compiled in Berlin show that by far the greatest number of births occur in the half-hour before and the half-hour after high tide.

FOR THE SCRAPBOOK

When one door is shut, another opens.—Cervantes.

Where liberty dwells, there is my country.—Franklin.

For what avail the plow, or soil, or life, if freedom fail.—Emerson.

He deserves small trust who is no privy counsellor to himself.—Ford.

God gives every bird its food, but does not throw it into the nest.—J. G. Holland.

The talent of success is nothing more than doing what you can do well; and doing well whatever you do, without a thought of fame.—Longfellow.

Swiss Cow Takes Back Home
Disliking her new home, a cow found her way for 15 miles through the mountains from the canton of Vaud, Switzerland, to its former master, a farmer living near Geneva. The hussy took 10 days for the trip and arrived lean from hunger and lame from wandering, but obviously glad to be back again with the man who had sold her.

One Shot Kills 2 Hares
While hunting near Koujatice, Czechoslovakia, Anton Bridisch fired one shot from his rifle, the bullet killing two hares and wounding a farmer, the farmer's wife, two cows and a goat, so Anton called it a day and quit.

Oven Taken to Fires
London has added to its fire equipment a canteen van, with oven capable of cooking 100 meat pies, to supply food for firemen on duty at blazes for long periods.

Valuation
"Politeness costs nothing," said the ready-made philosopher.
"Yes," replied Mr. Groucher. "If it had a market value there would be more of it."

25 Millions for Japan's Toys
Toys shipped from Japan to the United States last year were valued at nearly \$25,000,000, the largest amount paid by any country.

Animals Increase in West
Antelope, deer, elk, moose and mountain sheep, long threatened with extinction, have been staging a comeback. In our national forests there has, says the Scientific American, been a general increase in the last several years in the numbers of these game animals, according to a report from the forest service. The last estimate shows an increase of about 600 in the number of antelopes in Western national forests during the preceding twelve months. This brought the total to about 15,000. Deer increased by about 100,000, bringing the total to 1,040,000. Elk increased from 15,000 to 120,000, and the count of moose went up to more than 8,000. Mountain sheep increased to 13,000, but mountain goats decreased slightly to 17,000.

Fishing for Hens
Fishing for hens with improvised line and bait, is the method devised by a native at Dundee, Natal, for "poaching." A farmer in the district discovered that his prize Rhode Island Reds were gradually disappearing. He informed the police. A native was later arrested not far from the farm with five fowls in his possession. In his pocket was a long piece of string with a meale (Indian corn) fixed on one end. The man had apparently thrown his line and "bait" in the farmyard, and when the fowl had swallowed it he quietly pulled it in, seized the chicken, and removed the meale for use on another occasion.

Snake Swallows Doorknob
Winsted, Conn., never produced a better nature yarn than this: A well-polished brass doorknob, protruding through the skin of a six-foot black snake and shiny from constant rubbing against the ground, was found recently when the reptile was killed near Danville, Va.

Jesse Smith slew the snake when it lunged at his dog on a plantation in Caswell county. He found that the reptile had swallowed the brass knob while looting the nest of some guinea fowls, mistaking the decoy for a real egg.

Unable to disgorge the knob, the snake was forced to make the best of the situation. When it was killed half of the knob had emerged through the skin.

FEDERATION TO MEET AT LAZBUDDY
Tuesday, July 23

The Star is authorized to announce that the Farmer County Federation of Women's Clubs, will meet in regular meeting on Thursday, July 23, with the Lazbuddy Club.

The meeting is to start promptly at 2:00 o'clock, p. m. at the Lazbuddy school building, and the host club will entertain the visitors.

The following program will be rendered:
Roll Call— "Texas Pioneers."
"Texas"— "Yesterday, Today and Tomorrow." Mrs. J. C. Wilkinson, Friona. "Significance of the Civil War For Texas," Mrs. J. H. Martin, Farwell.

Trade in Friona

We have Served You For 36 Years

Hereford, Texas

Old Acquaintances of Douglass and All Ministers of Panhandle Vouch For His Character

WE, The undersigned citizens of Carson County, certify that Curtis Douglass has lived among us during the past eleven years and that he is a citizen of good morals and good repute, capable and well qualified to serve as State Senator. We present him to the people of this district as one of our most active civic workers who has the support and confidence of the citizenship of this section.

Any citizen is requested to communicate with us at our expense if such citizen desires intimate information concerning the character and habits of Mr. Douglass.

"No Man Can Serve Two Masters"

CAN A STATE SENATOR PROPERLY REPRESENT THE MASSES OF OUR CITIZENSHIP AND BE THE ATTORNEY FOR THE FOLLOWING CORPORATIONS?

1. Great Southern Life Insurance Company.
2. Shell Petroleum Corporation
3. Columbia Fuel Company.
4. Humble Oil and Refining Company.
5. Phillips Petroleum Company.
6. Continental Oil Company.
7. The Cargray Corporation (Hagy, Harrington & Marsh.)
8. Safety Casualty Company.
9. Smith Brothers Refining Company.
10. Post Dated Oil Company.
11. Associated Natural Gas Corporation.
12. The Mert Oil Corporation.
13. Buckeye Gasoline Company.
14. Aeroline Gasoline Company.
15. Piney Oil and Gas Company.
16. Magic City Oil and Gas Company.
17. Pioneer Oil and Gas Company.
18. Shamrock Oil and Gas Company

These 18 corporations listed above may be authenticated from newspaper dispatches, state railroad commission hearings and court records. And yet the Senator says he has not collected \$500 from corporations in 25 years of practice. These names listed are documented, and there is a reason to believe there are many more corporations the senator represented.

PANHANDLE FARMERS!

What would you have done if you had not received your wheat, cotton and other checks under the AAA? Did you know that Senator Small was one of the co-authors of Senate Concurrent Resolution No. 4 which petitioned the congress of the U. S. not to pass the Agricultural Act for the farmer (See Senate Journal page 42, Regular Session 43rd Legislature 1933.)

SENATOR SMALL WAS ABSENT WHEN IMPORTANT LEGISLATION WAS VOTED UPON FOR EITHER PASSAGE OR DEFEAT AT THE FOLLOWING SESSIONS OF THE LEGISLATURE, AS FOLLOWS:

5th Called Session, 41st Legislature 1930, ABSENT 95 times. Regular Session, 43rd Legislature, 1933 ABSENT 275 times. Regular Session, 44th Legislature, 1935. ABSENT 265 times. 1st Called Session, 44th Legislature, 1935, ABSENT 54 times. 2nd Called Session, 44th Legislature, 1935, ABSENT 81 times.

In connection with the above absences, Senator Small and his supporters say that he was never absent when important legislation affecting this section was voted upon. The voters attention is called to pages 29, 30 and 31, Senate Journal 2nd called session 44th legislature wherein Senator Small was absent five times when the Senate was voting upon amendments to Senate Bill No. One, which was a bill on the question of old age pensions.

Senator Small has accused the friends of Curtis Douglass of attacking Small's record instead of dwelling on the virtues of their candidate; we admit that we are waging a campaign on Small's record, for that is the MAJOR reason we want to replace him.

A VOTE FOR CURTIS DOUGLASS JULY 25 IS A VOTE FOR THE FARMER, THE LABORER, THE INDEPENDENT MERCHANT AND FOR THE PEOPLE.

C. P. MCCOLLOUGH, For Committee

Columbus Cathedral
The Columbus cathedral, Havana, is situated in Cathedral square at the foot of Empedrado street. Columbus cathedral was the center of religious ceremonies held under the Spanish domination. It maintains as its most valuable tradition the fact that it held within its walls the remains of Christopher Columbus—removed to Seville when Spanish rule ended in Cuba. There is a contention, of course, that the real Columbus relics are buried in Santo Domingo and that those that were once interred here were the relics of Diego Columbus, brother of the great navigator.

Socrates' Poison
The poison which Socrates drank was an infusion of the leaves and stems of the hemlock which is a deadly poison even in small doses. According to his biography, he conversed with his followers almost up to the time of his death, his vital powers gradually being shown by the torpor and coldness which, commencing in his feet and limbs, spread to his entire body, the brain being affected last.

Just Enough for One
A famous wit once excused himself from walking with an elderly lady on account of the bad weather. A little later, however, she met him walking alone. "So," she said, "it cleared up pretty quickly for you, it seems?" "Just a little," he quickly replied, "just enough for one, but not quite enough for two!"

Redwood Termite-Proof
California redwood timber makes an ideal surface to paint, stain or enamel, while beautiful durable, fire-resistant roofs of shingles have been used by home owners for generations. Shrinkage is unusually low in this wood. And it is said that termites will not eat it, as they dislike the taste.

Bucharest a Gay City
Bucharest is notable as an eastern replica of Paris, elegant and gay. It is an outpost of a Latin civilization which extended far into the East, and it dates from the early Christian era, when Roman legions established a Dacian fortress there.

NEW IDEAS

A Los Angeles inventor has set up a device to utilize the sun's rays to melt metals.

Ice ribbons are a new form of ice suitable for beverage uses and for packing foods.

Warts can be cured by suggestion, according to the American Medical Association Journal.

The post office at London is using a robot letter sorter. The machine is the first of its kind.

Letters painted on railroad ties tell French airmen the name of the town they are passing over.

A gas mask which may be carried in one's hat or handbag has been invented by Lieut. John B. Allan of Millport, Scotland.

Glass fiber can now be produced of such flexibility that the material closely resembles real silk. It can readily be worked by the long fiber textile process and converted to yarns and fabrics.

Average American Uses Lots of Milk and Butter
Mr. Average American uses a little over a pint of milk a day in one form or another. To be more specific, according to statistics the average American uses 55.3 gallons of milk a year. In addition to the milk, he eats 17.8 pounds of butter, 4.3 pounds of cheese, and 2.77 gallons of ice cream in the course of a year. There are other nations which have a higher consumption when it comes to ice cream. Other nations don't even report on their ice cream consumption, while in this country it is quite an item.

The great dairying countries of Europe use more milk and cheese per person than the United States, although there is little difference in butter consumption. Sweden heads the list in milk consumption, with 69.7 gallons per person for the year; Denmark, with 68.5; Switzerland, 67; and Germany with a consumption of 61 gallons per person are all ahead of the United States.

When it comes to cheese consumption, the American just isn't in it with his four pounds, for the average Swiss eats over 23 pounds, the average Frenchman or Dane 13 pounds; the German eats more than nine pounds, and the Englishman about the same.

Many Giants Mentioned Through Ancient History
Stories are common among the lower civilized peoples, as well as among savage tribes, to the effect that men have lived who have measured 15 feet in height. Og, king of Bashan, is said in Deuteronomy (3:11) to have been the last of the giants. His bedstead of iron was nine cubits, or between 11 and 13½ feet in length. Pliny mentions the name of an Arabian giant who measured 9½ feet, and also speaks of two others who were 10 feet in stature. The following list of men whose real height is well known shows that it is possible for individuals to go far beyond the average height of the human species, which is 65 inches.

Magrath, bishop Berkeley's giant, ninety-two inches; Patrick Cotter (1701-1804), or O'Brien, 99 inches; Charles Byrne, Irish giant, 100 inches; Topinard's Kalmuck, 100 inches; Winkelmaier, Austrian (died 1887) 103 inches; Topinard's Finlander, 112 inches.

Ancient Advertisement
"To be sold. The sloop King Solomon, Burthen about 100 Tons (more or less), with all her Guns, Tackle and Apparel, now lying at Stephen Mayard's Wharff, in New York; Also a House and a Lot of Ground in New York formerly known by the Name of the Anabaptist Meeting house; Also a Negro Woman that understands all sorts of House Work, and a Negro Boy; a Marble Chimney Piece, three Marble Tables, three Riding Chairs and a single Horse Chaise; 16,000 two-foot shingles, 150 Elephant's Teeth; three Desks, two Cases of Drawers, a Mahogany Book Case, six Dozen of Boston Axes, 360 Gallons of Spirits, sundry sorts; Whoever inclines to buy any of the above, may apply to Thomas Noble and Joseph Scott, in New York."—From the New York Post-Boy, May 28, 1744.

In extremely cold weather, sap in trees has been known to freeze.

Queen Caroline, wife of King George II of England, had a gown made of silk raised in Georgia.

Oil refining science makes such rapid progress that the average refinery becomes obsolete within five years.

BRIEF FACTS
More than 2,000 varieties of sausages are made in Germany.
Ethiopia is larger than any European country except Russia.
Knitting by women visitors is not permitted in the United States senate gallery.

BREEZY PARAGRAPHS
England is one of the world's most favored countries with bird song.
Snow is more important to the welfare of spruce trees than it is to pines.
The average expense of a year in college is estimated from \$450 to over \$1,000.
Soviet Russia claims to be rapidly approaching the United States in lumber production.
In memory of King Albert of the Belgians a large tract of land is to be planted as a forest in Palestine.

The Savannah, one of the world's first ocean liners, crossed the Atlantic in 22 days, sailing from Savannah, Ga.
Termites live underground, but reach the wood parts of a house by building mud runways to the masonry walls.
Real estate provides the major part of the funds which support Oxford, England's group of famous colleges and universities.
Allowing 30 years to a generation, an individual living today has over 500 ancestors from the year 1700 to the present.

ACROSS THE WATER
Britain now has \$0,000 charitable organizations.
Butterflies are reported increasingly scarce in British forests.
Turkey's population is 16,188,767, according to a recent census.

In 60 years British Columbia grew from 36,000 population to a province of 700,000 residents.

European prospectors have found gold in Algeria. A 6,000-acre tract contains metal of volcanic origin.

Airplanes are used in Russia to deliver prisoners to the dungeon of a Russian prison on Solovetski Island in the White sea.

Red has been made the color of the German post service, all mail boxes, trucks, collecting vehicles, and buses painted cadmium red.

Austrian censors open all bulky letters found in the mails, while forbidden political propaganda, printed on thin paper, circulates freely.

MUCH IN LITTLE
Ninety countries imported American toys and games last year.

It costs about \$200 to prepare a greyhound for its first race.

The average cost of gasoline is less than two cents per pound.

Surgical needles are made of gold with soldered iridium ends.

Revive Superstition as to Magnetism of Body
The number of psychiatrists doing a thriving business may owe their good fortune to the carelessness of modern housewives, for less than 100 years ago the following thought was in vogue: "The earth is a magnet with magnetic currents constantly playing around it. The human body is also a magnet, and when the body is placed in certain relations to the earth these currents harmonize, when in any other position they conflict. When one position is to be maintained for some time a position should be chosen in which the magnet currents of the earth and the body will not conflict. This position, as indicated by theory, and known by experiment, is to lie with the head toward the North pole."
"Persons who sleep with their heads in the opposite direction, or lying crosswise, are liable to fall into various disorders. When they go back to the right position, these disorders, if not too deeply impressed upon the constitution, soon vanish. Sensitive persons are always more refreshed by sleep when their heads point due north."

Charity Overdone
The Jains, a religious sect numbering in all India, about one and a quarter million, had their origin in the Fifth century B. C. The great distinction between its members and the Hindus seems to lie in regard for animals, says Katherine Mayo in "The Face of Mother India." A poor Jain with infested clothes will carefully transfer his tenants from the cloth to better pasturage on his bare flesh, she declares.

The Deadly Black Widow Spider an Enemy of All
The female black widow, which is so much more deadly than the male that little attention is given the latter, is characterized chiefly by the glossy blackness of her shoe-button-like body which is about half an inch long; her long legs that sprawl over approximately two inches of space; and, of course, the distinguishing marking on the underside of her body. Though this is generally confined to the red hour-glass figure, it sometimes varies both in color and shape. If not red the marking is yellow.
Since she has decidedly cannibalistic tendencies this spider is generally seen alone, for she early devours her mate along with the other insects upon which she feeds and her young, which burst from the egg-sac in early summer 50 to 100 strong, soon scatter to avoid being eaten by their mother. Her natural habitat is out of doors on the under side of rocks; but her coarse, sticky web is also to be found in dark corners of attics, basements and barns.

Origin of Azusa
An amusing, if not romantic, story is told by some of the origin of Azusa, at the gates of the San Gabriel canyon in Los Angeles county, writes Dorothy Marie Davis in the Los Angeles Times. It has all the appearance and hint of a Spanish-Indian name, and many hold it to be such. But the legend surrounding its beginning has a delightful ingenuity, which it would be a pity to discard. The time had come for the naming of the settlement and the citizens disputed which of their own surnames should be held thus for posterity. Each was unwilling to yield the honor to another and that plan was abandoned. Geographical position was considered as a background for a fine name. Natural features were urged. None was found satisfactory. At last a solution was presented which met with complete approval. They took the first and last letter of the alphabet and added the three letters by which their country was known. They had A-Z-U-S-A, or AZUSA.

"Beware the Tick"
Ticks are of particular interest to the United States bureau of entomology because they attack both men and animals, particularly farm stock. In "Beware the Tick" in Hygeia, the Health Magazine, Walter E. Burton points out that the most deadly of tick-carried diseases is Rocky mountain spotted fever. In the Bitterroot valley in western Montana about 75 die of every 100 persons who contract the fever. Tularemia, or rabbit fever, about which every hunter has heard, can be contracted by persons who handle rabbits. It can also be carried from wild animals to human beings, by several kinds of ticks, much as spotted fever is transmitted. Ticks also cause what is known as relapsing fever and a peculiar form of paralysis.

Flies Skate on Surface
Some flies, especially certain sea-shore midges, have the power of skating on the surface of water without breaking the surface film, the hairy foot pads probably assisting them in the performance. So far as is known, only one fly possesses the power of swimming actively under water, a small marine midge found in the coral lagoons in Samoa.

Political Announcements
Those whose names appear below have authorized the Friona Star to announce their candidacy for the nomination for the offices under which their names appear, subject to the action of the Democratic Primary election of July 25, 1936.

For County Judge and ex-officio Superintendent of Schools.
WALTER LANDER

For Sheriff, Tax Collector and Assessor:
EARL BOOTH
J. H. (Jim) MARTIN

For County and District Clerk:
MRS. ANNE JERSIG
E. V. RUSHING (re-election)

For County Attorney:
E. F. LOKEY
A. D. SMITH

For District Attorney:
FERRY T. BROWN
JAMES W. WITHERSPOON

Commissioner Precinct No. 1.
J. M. W. ALEXANDER
L. F. LILLARD

County Treasurer
ROY B. EZELL

For State Senator, 31st District.
CURTIS DOUGLASS
CLINT C. SMALL

TO THE VOTERS OF FARMER COUNTY

Due to the vast size of this Judicial District, it has been impossible for me to see each of you and personally solicit your consideration of my candidacy for the office of District Attorney. So I take this means of asking your support, and assuring you that I shall be very grateful for all that you may do in my behalf. --- As your County Attorney during the past four years, I have tried faithfully to perform the duties of my office fairly and impartially, without fear or favor, and with a view to saving the Tax Payers of the county every dollar possible. Although I have tried a number of cases, the records will show that Farmer county has not paid out a dollar for a jury fee where the defendant was acquitted.

With eight years experience in the practice of law, and experienced in the prosecution of crime, I believe I am qualified to make you an efficient District Attorney.

Sincerely yours,
Perry T. Brown
Candidate For District Attorney

J. M. LYON & CO.
Chicago, Ill.,
July 18, 1936

To The Voters of Parmer County:

We have just learned of the candidacy of Mrs. Anne S. Jersig for county and district clerk and wish to rush a note of approval. Few people have the long experience and faith in Parmer County as shown by Mrs. Anne S. Jersig. For twenty-five years, through war, several depressions, and many droughts, she has farmed, raised and fed fine herds of cattle, and boosted the country. She has met hard times with hard work and keen intelligence. We do not know of a man in the country who has a broader and better knowledge of farm and community problems in Parmer County, and who is better able to serve the interests of the people. Her knowledge of soil, farm tools, feeding (last year she dug a pit silo and helped beat the drought) and real estate is remarkable.

She has not only stuck to Parmer County for twenty-five years, but her advice, encouragement and even personal aid has helped many others. She has been so busy caring for hundreds of acres that probably many of the 1500 voters are not personally acquainted with her, but as large real estate dealers in Parmer County for many years as South and West Land Company, and J. M. Lyon & Co., we have seen her business and farming experience, and found when we needed anything done in Parmer Co. Anne S. Jersig did it quickly and thoroughly. Parmer County will benefit by putting her to work as County and District Clerk so that she can serve all the community.

WINIFRED WHITHAM
Sec'y, J. M. Lyon & Co.

THRILL FOR THE THRIFTY

2 New Westinghouse Refrigerators which SAVE More than they Cost!

● Refrigeration luxury you've always wanted... savings so great that you can't afford to be without... that's the thrilling fact of these big new Westinghouse Economy models. They save in every way, by reducing food bills, since with them you can buy in quantity, take advantage of bargain-day specials... by saving food, because spoilage is ended and you can use every leftover in dainty appetizing dishes... plus the economies of low-cost, trouble-free operation which mean negligible upkeep expense.

And these big Economy models are real Westinghouse quality. See them today. See how completely they maintain Westinghouse standards in quality construction, in foodkeeping conveniences, in dollar-for-dollar value inside and outside.

PRICED AS LOW AS

Westinghouse Economy REFRIGERATORS

2 Big sizes—5.2 cu. ft., and 6.0 cu. ft.

5 YEARS' PROTECTION
Every Westinghouse Economy Refrigerator has the famous Time-Tested Westinghouse mechanism, with 5 years' protection against service expense, at a cost of only \$5, included in the price.

TWISTING FACTS REGARDING CANDIDACY OF CURTIS DOUGLASS

(Borger Daily Herald)
Two of the chief sponsors of the campaign of Senator Clint Small just can't take it. Evidently they realize that Curtis Douglass of Panhandle is going to be the next state senator, and it will be a blow to their political pride to have a small town lawyer win this race.

The Amarillo News-Globe has attempted to make us believe that Small is just about the whole legislature. One would think from that paper's unstinted praise of the senator that the legislature would have to go in permanent adjournment, if he were not returned to office. Although the senator and his sponsors have given him credit for just about all the legislation during the past eight years, even he is weakening now and then and admitting that he could make an error.

Curtis Douglass and his friends have taken the senate journal, court records and other documents and have given the record of the senator to the public. When that record is placed before the public, for some reason or another it does not sound too good to the voters. So far as we have been able to learn, not one bit of mud has been slung at Senator Small. His sponsors have carried on a campaign of vilification for weeks, and we know that people of the Panhandle are tired of it. Little has been said about Small that is not authenticated. We are willing to believe that the senator's public record has been made deliberately and purposefully, as he has been praised so highly by his sponsors for his intelligence and ability.

A few days ago the Borger Daily Herald published an editorial in regard to the senatorial race. This editorial mentioned that the acknowledged president of the Small senatorial club was Editor Clyde Warwick of the Canyon News and stated that the president of the West Texas State Teachers College, Canyon, and representatives of the Canyon Chamber of Commerce probably would be the first ones to call on the new senator, Curtis Douglass, for aid when he went to Austin.

The Canyon editor has made a bitter reply to this editorial, stating that The Herald gave veiled hints of reprisal against the college, if Douglass were elected. The editorial said nothing of the kind—either directly or indirectly—and emphatically stated that Douglass was for the college and the schools of the Panhandle. If the Canyon paper and the Amarillo News-Globe want to twist the facts, it is their privilege. This newspaper is willing to let the voters settle this argument on Saturday, July 25.

The Borger Herald is not so narrow as to concede the Canyon editor his opinion on everything, whether he be right or wrong. But we must say again that we believe it poor policy for Canyon to become embroiled in a campaign that concerns election of a state senator or state representative. As Douglass will be the next senator, we would not like to be embarrassed by going to Austin next January and saying:

"Well, Senator Douglass, you know

WARREN'S CAMPAIGN CONNECTIONS GIVEN

Panhandle, Texas,
July 19, 1936

Editor The Borger Daily Herald:
An effort has been made by the Amarillo News-Globe to bring my name into politics, probably far more than it deserves. I have no apology for being a private in the ranks in the campaign of Curtis Douglass of Panhandle for state senator from the 31st senatorial district. I have known this young man for more than 10 years, and I would not be supporting him unless I thought he was worthy.

The News-Globe has me charged with handling publicity for Douglass. When one of the News-Globe star reporters left his job several months ago to work for Small's headquarters, I felt that I would not be true to a friend, if I did not volunteer to send a news story occasionally of the progress of Douglass' campaign. I have not received one cent for my publicity services, which I have given cheerfully in behalf of good government for the 31st senatorial district.

I do not think the Amarillo News-Globe was quite fair in warping things around about Judge H. E. Hoover of Canadian and Judge R. H. Templeton of Wellington. Mr. Douglass himself is fully capable of handling this matter himself. He has conferred with these two men and I am sure he knows exactly how they stand in this campaign.

The News-Globe also stated that I was taking part in the race for congress. It stated that the Borger Herald published the Hutchinson County Herald, and accused me of being the owner of the latter publication. The News-Globe made reference to a special edition published for John R. Miller against the incumbent, Marvin Jones. The Borger Daily Herald does not own the Hutchinson County Herald, weekly, but prints it for a stipulated sum. As it

some of the people at Canyon worked underhanded and dirty against you. They twisted the facts in your recent campaign for senator. Well, most of us didn't mean it. We were working for what we thought were the interests of the college and thought that the old senator was all right. We assure you NOW that you will make a good senator and want you to help us get the biggest appropriation possible for the college.

It is sensible politics in The Herald's opinion for a city like Canyon to be fair with all candidates for the legislature. Since these Canyon and Amarillo tirades have appeared, Douglass has reiterated his stand of a fair deal for the Canyon college, regardless of the vote next Saturday. This newspaper is willing to stand Douglass' statements, rather than twisted interpretation from prejudiced editors like Clyde Warwick and T. E. Johnson. The latter took a special delight in featuring these editorials in his column last Sunday in the Amarillo News-Globe. The News-Globe must be greatly worried over the outcome of this campaign to devote so much space to this matter. Of course, The News' sole purpose was to attempt to arouse the alumni of West Texas State Teachers College against Douglass, trying to make it appear in a round about way that the Panhandle attorney was not a friend of education.

Should Senator Small be elected for a third term—and we believe that his chances are far less than even those of Alfred M. Landon, Republican nominee for president, against President Roosevelt, whom we predict will be elected by a tremendous majority—this newspaper would not like to have to take up many lengthy matters of legislation with him, particularly as we think his record indicates that eight years is sufficient in this office.

The Senator must admit that the Borger Daily Herald has been good to him. It worked like a slave for him in two campaigns for governor, and two years ago we lost a lot of prestige because of our efforts. As we remember the senator only polled 22,000 votes against 25,000 votes for opposing candidates in the gubernatorial campaign two years ago from this senatorial district. That was sufficient to show that Clint Small was out of the political picture in the Panhandle, and the people will show it again with their votes next Saturday.

seems that Borger generally has wanted a weekly newspaper, as well as a daily. The Daily Herald felt it had just as well get the printing job for the weekly, if possible. In most instances, the weekly newspapers of Borger have been printed by Clyde W. Warwick, Canyon editor, who did this work solely as commercial printing. The Daily Herald management decided it would make an effort to keep this printing business in this city. The Daily Herald takes no responsibility for the political or business action of the management of the Hutchinson County Herald. The publisher of that newspaper endorses whom and what he pleases.

As I am president of the Panhandle Publishing Co., owner of the Borger Daily Herald, this statement is made to clear certain errors and insinuations published in the Amarillo News-Globe.

Yours very truly,
D. M. Warren

IT'S YOUR LAUGH

Approved
Soph—Is this cup sanitary?
Fresh—Must be, everybody uses it.

It Goes in Can-ines
Teacher—What is cauliflower?
Student—That's what dog biscuits are made of.

Good Morning, Judge

"You look blue."
"Yeh! A cop saw me crash the red."—Cincinnati Enquirer.

New Habit

"I never saw you smoke a cigar before."
"I just picked it up recently."

Obliging Fellow

Charity Worker—Will you please help the Working Girls' home?
Bill—Sure, where are they?

Head Man

"If it wasn't for me, you'd be the biggest fool in this business."
"Oh, so you're the top."

Whiskers, Curly Banned

Boy students must be clean-shaven and girls must not curl their hair, according to the new rules of the Kwangtung department of education at Canton, China. Rouge, powder and high-heeled shoes are forbidden, and girls must not wear ostentatious ornaments, such as diamond rings and bracelets. All students must wear clothes made of native materials. To break these rules means severe punishment.

Taxes Overlooked

Taxes on inherited wealth, the most attractive of all tax-gaining instruments, have been surprisingly little developed the world over. In fact, in Italy, one of the first important fiscal changes of the Fascists, death duties, with a few exceptions, were abolished altogether.

Cattle Ban Is Lifted

For the second time in 43 years the official ban on the importation into Great Britain of live stock from the European continent has been lifted to permit the importation of Friesian cattle from Holland for breeding purposes.

Analysis of Motives

"Don't you think our friend's belief that no one except himself can save the country denotes great patriotism?"
"Not exactly," replied Senator Sorghum. "It's rather a case of egoism rushing to the rescue of pessimism."

Poison in Window Putty

To stop birds from eating the putty, 1,000 windowpanes of a housing estate at Langtoft, England, will be kept in place by a poisonous red lead composition.

In Tight Place

Pupil—Do you think it's right to punish folks for things they haven't done?
Teacher—Why, of course not, Willie.
Pupil—Well, I didn't do my home work.

John R. Miller

Democrat for CONGRESS

Of 18th Congressional District

PANHANDLE TO HAVE REPRESENTATION

Our friend John R. Miller in congress means Texas-Panhandle representation at Washington. Opposed to a man who has held the office for 20 years, Miller is fresh from the ranks of the people our congressmen are elected to represent. Miller goes to Congress with obligations only to the people in the section of the country in which he lives.

Familiar as he is with the problems of industry in the great Panhandle oil field and versed in the problems of the wheat farmers and stockmen of the plains, Miller is truly a representative.

His understanding of and sympathy for the common man is shown in the sincere interest he has taken in the plan to care for those among us who have given the world of their best and are now entitled to rest and the reward of a happy and protected old age. Let us stand 100 per cent for our friend, your friend, John R. Miller.

OUR FRIEND AND NEIGHBOR

Five times mayor of Borger, an attorney by profession, John R. Miller has always championed the cause of the weak against the strong, the masses against the few . . . He is truly a candidate of the people and for the people.

JOHN R. MILLER'S PRINCIPLES

1. I favor the Townsend Old Age Revolving Pension Plan.
2. I favor a program which will make possible a farm for every farmer and a home for every family.
 - (a) By long term loans at low interest rates for purchasing or refinancing homes, either city, suburban or rural.
 - (b) By "grubstaking" families who want to buy small acreage or farm homes.
3. I favor federal aid for education in the poorer communities.
4. I favor an "honest dollar," stabilized at the 100 cent level.
5. I favor extending the civil service merit system.
6. I favor increasing business through increasing the people's buying power by:
 - (a) Give the farmer cost of production plus a reasonable profit.
 - (b) Give the wage earner more than a bare existence wage.
 - (c) Protect small independent business from unfair competition.
 - (d) Give old people an adequate pension without a pauper's oath. When all of those have an income, they will buy.
7. This program means simply to increase prosperity by getting money into the hands of the little fellow to "get the grease where the squeak is."
8. Prevent concentration of wealth by means of taxes on incomes, inheritances, gifts, luxuries and tax exempt bonds.
9. Prevent war by conscripting money and materials as well as men, in time of war.

HOW TO VOTE ON JULY 25

BEWARE!

PAY NO ATTENTION TO LATE PROPAGANDA THAT ENEMIES MAY START AGAINST CURTIS DOUGLASS FOR STATE SENATOR. GO TO THE POLLS SATURDAY AND CAST YOUR VOTE FOR HONEST AND FAIR GOVERNMENT AS REPRESENTED BY CURTIS DOUGLASS.

Vote Saturday For
CURTIS DOUGLASS
For State Senator

C. P. McCOLLOUGH, Secretary
Douglass for Senator Club

SPRING BLOSSOMS

Creditors have better memories than debtors. Too few grasp the meaning of social responsibility. It is hard to find any humility that does any good. No joke really dies. Each generation revamps it. People who live in modern flats have no room for complaint. By streamlining some trains have Mystery is everywhere—even blessings come in disguise. You can't push yourself ahead by putting yourself on the back. Massachusetts communities sponsor 25 of the state's 75 open forums. The man who takes no chances has to take what's left by those who do. If a boy can build a fire that doesn't go out on the first attempt, he's got character. Many a man marries a girl with money because he can't get the money without the girl. A usurper, to "usurp," has to find a sufficient number of citizens to support his usurpation. One blessing is that atheists do not now think it necessary to make a constant noise about it. Banking hours go on and on long after the man outside thinks everybody has gone fishing. We sometimes see a fellow proud of his quiet, good manners, while everybody walks over him. At every new technical discovery the first question arises, what use can be made of it in war? They say the world's meanest man is left-handed and keeps his money in his right-hand pocket.

Water Flower Gobbles Up

Tadpoles and Mosquitoes The bladderwort is a humble water plant, which bears its yellow flowers on slender stems above the surface of ponds. But it has the strange power of seizing and eating small tadpoles, mosquito larvae, anything tiny enough that swims or crawls too near it, says a writer in Pearson's Weekly. How it captures its prey has puzzled naturalists since Charles Darwin observed that its murderous attack was far too rapid to be detected by the eye. Recently, however, Prof. Francis E. Lloyd, of McGill university, Montreal, solved the mystery by using a fast micro-camera. Taking 100 pictures a second, it enabled him to learn the method by which the bladderwort swallows its prey in the thirty-fifth part of a second—by sucking it into a "trap." Professor Lloyd constructed a tiny groove of glass leading up to a bladderwort placed in a special tank. After many failures, he was able to photograph living creatures being swallowed. His pictures show the bladderwort trap to be an extremely complex mechanism with a water-tight door kept shut by a "latch" of bristles. When these bristles are moved, the door swings inward, and the resulting vacuum of water carries the flower's prey into the trap.

Beggar's Academy Closed

Police of Pilsen, Czechoslovakia, recently found a beggars' academy operating near the city. There were two teachers and 26 scholars who took courses in walking on crutches, looking maimed, blind, deaf and dumb, and in writing begging letters. Bandages and other beggars' appliances were sold at regular prices. All collections received by the scholars were handed over to the teacher, who kept half and distributed the balance among the students.

Windmills Still Used in U. S.

The sole business of scores of American firms is making windmills. Over wide sections of this country windmills pump water for irrigation, for cattle and for domestic use. They also grind corn, cut wood and churn, and in some localities with dependable winds generate electricity for light, heat and power.—Gas Logic.

Calendar of Ills

A calendar of illness, which shows the diseases corresponding to the alteration of climate during the year, such as colds, damp, wind, heat, and the electric conditions, has been compiled by a Vienna doctor. The doctor spent eight years in compiling the calendar and studied 20,000 cases.

Lights for Animals

The city council of Cleveland, Ohio, has passed an ordinance providing that "any ridden or led animal" appearing on the streets at night "shall display a red light or a device which reflects a red light at the rear end of said animal."

No Weather Forecast

Palmsist—Don't worry, the dark clouds will soon roll by. The sun will come peeping through and— Client—Here, miss, I came for a hand reading, not the weather forecast.

The Answer

Mother—Haven't I always told you the Browns are not the kind of boys to play with? Junior—Yes, mother, but I'm a good boy for them to play with.

More Cattle Than Men

On Isabella Island, one of the Galapagos group, there are but 115 inhabitants and 40,000 head of cattle. The area of the island is 1,650 square miles.

Missed It

Miss Green—I left my book laying on the deck. Miss Carney—Lying. Miss Green—Honest, I'm telling the truth.

PIKES PEAK FLAT IN DISTANT PAST

Famous Pikes Peak is merely a piece of level prairie standing on end. Twelve million years ago when man was still swinging through the forest by his tail, according to the evolutionists, the area near Denver, Colo., where the 14,000-foot mountain now stands was a level plain. Pioneers with their covered wagons (had there been pioneers and covered wagons in that remote time) could have driven across it without suspecting that the prairie was soon to be pushed up into a lofty peak. That is the view of Northwestern university geologists. Pikes Peak and its neighboring mountains have long baffled geologists seeking to determine their age and origin. An expedition from Northwestern university found the answer in fossil bones embedded in the peaks. They are the remains of animals that lived before the Ice age. They indicate that the region was a flat, marshy plain at the time, but what mighty internal force shoved up the mountains is undetermined.—Washington Post.

SCIENTIST'S BODY STORED SINCE 1841

What remains of the man who discovered morphine has been lying in a dust-covered coffin in a small store-room next to a country church in Einbeck, Germany, since 1841 because there is not even a plot of ground for burial, says a correspondent in the Detroit Free Press. Hopes for a decent tomb or perhaps even a monument are dwindling, for Einbeck is a poor town and appeals to the rest of the country have gone unheeded. Friedrich Sertuerner is remembered only on an unobtrusive black tablet with gold letters, on the building in Einbeck where his studies finally led to the discovery of morphine. The tablet says, simply "Here lived and worked as a pharmacist from 1806 to 1809 Friedrich Sertuerner, Ph. D., the discoverer of morphine." Meanwhile Sertuerner's coffin is gathering more dust.

Lime Juicers

Lemons are grown in this country; limes are not—at least not enough to supply the demand. And yet there are enough people in the United States who like lime drinks to justify the importation every year of five or six million pounds of the little, greenish-yellow fruit from the West Indies and other foreign lands. The reason limes are not home-grown is that they require a warmer climate than lemons and other citrus fruits, although they are grown to a limited extent in frost-free sections of Florida and the Keys. Specialists in the United States Department of Agriculture have recently developed a cross between a lemon and a lime which seems to be harder than the lime and full of acid juice. They have named it the "Perrine" and it may be suitable for home-garden culture in the warmer parts of Louisiana and Texas as well as Florida.—The Country Home.

Smallest British Church Closed

England's smallest church has been closed with the exodus of the congregation. It stands in the middle of a thick wood on the Pownall estate at Wilmslow. Built of wood and stone, the church is 15 feet long, 12 feet wide, and 14 feet high, and until recently had an organ, a pulpit, pews for 12 people, and stained glass windows. The late Henry Boddington, of Manchester, a founder director of the Ship Canal company, built it of stones gathered from ancient temples all over the world.

New Teeth for Whale

Workmen engaged in restoring a whale for exhibition purposes at the Santa Barbara Natural History museum were not to be daunted when the big sea mammal was found to be minus a number of teeth. False teeth were made to take the place of those that were lacking.

Calves Born at Sea

Four calves were born at sea during a recent voyage of a freighter from Puget Sound to the Hawaiian Islands with a shipment of blue-blooded cows. Hawaii has some of the finest live stock in America.

One Way

Mother—No, you can't have any more cookies tonight, Junior. Don't you know you can't sleep on a full stomach? Junior—Well, I can sleep on my back.—Windsor Star.

Inca Gold in Lake

Much of the Inca gold thrown into Lake Titicaca during the squeezing of Peru by Pizarro is still there. Quantities of it are "fished" up from time to time.

Pound-and-a-Half Plane Works

Weighing only one and one-half pounds and equipped to carry sufficient fuel for a two-hour flight, a tiny plane constructed recently in Leningrad, Russia, can carry a load of nine pounds.

50,000 Rats Raised for Science

One rodent farm in Essex, England, has a normal "stock" of 50,000 rats and 350,000 mice, most of which will be sold for research work.

Herbs Supplanted

Western medicinal, mostly from America, are supplanting old-fashioned herbs in China, where they have been in use for centuries.

SHORT PARAGRAPHS

Leeches are said to be a cure for black eyes. Half the things that men want are not money. The "tree of knowledge" is not a tree; it's a forest. The illiterate ought to keep out of print; but do they? A man can go to college and still be a "self-made man." Let a peevish man alone; usually he wants to be so let. No folly is more costly than the folly of intolerant idealism. Those who tell jokes poorly suffer from being misunderstood. Capital is timid. Of course. It has been ill-treated so many times. One way to save money is to be so busy you haven't time to spend it. There is a kind of homicide by the "didn't-know-it-was-loaded automobile." Girls' diaries are like some old manor houses—full of secret passages. In literary art, all depends on the tools a man has: Ideas and vocabulary. You often see something silly succeed enormously. That's the mystery. As soon as an author ceases to be read, his books are published in a "set." You've still got to climb the ladder of success. It's no use waiting for the lift. A hostile mass meeting, if it is a big one, makes even the old politicians tremble. "Second day bread" on the race track is the horse nosed out in his last start. You can tell by the way some persons reason that they are going to get into jail some day. Whales Elude the Wiles of Any Would-Be Captors South Africa has found a new aquatic sport to entertain beach crowds—a game of "hide and seek" or "catch-me-if-you-can," between whales and men in boats, writes a Langebaan, South Africa, United Press correspondent. Two whales and two boats have taken part in such a game before the excited gaze of crowds on the beach. The whales were unexpected visitors. They first were seen from shore. The news quickly spread among the inhabitants, who streamed down to the water's edge for a glimpse. Two boats, each manned by three men, then were put out to try to catch the whales by driving them on to the beach. But the whales were too clever. Again and again they eluded their pursuers—diving and appearing in unexpected places. Spectators on the beach were aroused to excitement when they saw the monsters actually pass beneath the boats to outmaneuver the hunters. Though nearly successful several times, the men were beaten by approaching dusk and the running of their intended prey. Monument for Elephant The quip that "an elephant never forgets" has been reversed in the Federated Malay states, for an elephant that derailed a train is being commemorated in connection with the fiftieth anniversary of the F. M. S. railways, writes a Singapore United Press correspondent. One of the earliest trains was running near Telok Anson, on the west coast of Malaya, when a herd of elephants crossed the line. The rest of the story is told in the words by an inscription erected by the government near the spot: "There is buried here a wild elephant who, in defense of his herd, charged and derailed a train: September, 1891. Film Measures Pressure Chinese scientists have found a method of measuring great pressures, such as take place in building structures, by the effects of the pressure on a photographic film which is afterward developed. The discovery was made, Shanghai reports, when it was found that the films were unusually sensitive to pressure. A Hill and a Pill "Pa, what's the difference between a hill and a pill?" "I don't know, my son, unless it's that a hill is high and a pill is round—is that it?" "Naw! A hill is hard to get up and a pill is hard to get down." So Careless of Him "What happened, George?" "Puncture." "You should have watched out for it. The policeman warned us there was a fork in the road about this point."—Stray Stories Magazine. Horses Swim All Day The only horses that swim all day for a living are those which pull the ferry boats across the Oxus river in central Asia. Favorite Selections Question—What are those girls doing who sit on the library steps? Answer—Outside reading.

SALT AND PEPPER

Clothes don't make the man—but the padding helps. I prit with the tide—and you'll soon land on the rocks. A word to the wise is often ignored. They already know. To keep a friendship requires a good deal of ingenuity. The rolling pin is often more effective than the steam-roller. Patience in weakness is mightier than impatience in strength. A lot of people are just hard to please. Some others are just hard. Today is the tomorrow you worried about yesterday—and all is well. An aim in life means that you want to play the game, whatever it is. A man who begins "wishing he had stayed single" by and by will be. Peculiar phenomena of blushing is that if you think about it, you do. Good intentions should make good deeds—not an apology for bad ones. Between five and ten billion cigars are smoked in this country annually. Don't always judge by contraries. A man who boasts of his honesty, often is. Medical science moves as fast as any other. You hardly ever hear of arnica any more. After fifty, one begins constructing a philosophy to explain why he didn't reach his aims. A man never lies to his wife. His tongue may try to, but his actions always reveal the truth. That motto recommended to everybody, "Live dangerously," was adopted by gangsters long ago.

OUR VOICES CHANGE AFTER WE EAT MEAL

When is your voice normal? Practically all the time, most people think; yet, actually, one's voice varies in tone from minute to minute, states a writer in The Elms Magazine. Microphone engineers in Hollywood, worried because film stars' voices seemed to change unaccountably at different times of the day, arranged tests to discover the cause. They found that after a meal a person's voice varies tremendously from the pre-meal voice. In some cases the change was so marked that the recording engineers found that people unacquainted with the speakers thought, when the sound track was played over to them, that they were listening to two people speaking instead of one. A further complication arises from the fact that, as the time since the last meal lengthens so the speaker's voice varies more and more in tonal quality. It is believed that at only one individually ascertainable time, somewhere midway between meals, is each person's voice at its normal pitch.

Relics of Hittites Found

What is believed to be the first step toward the discovery of the lost Hittites, who appear in the Bible as a great imperial power, has been found in Asia Minor. In a 4,000-year-old tomb was discovered a Hittite statue of a bull, seven inches high and inlaid with gold. The silver-smith's art is astonishingly modern, and indicates that the race was cultured rather than primitive as previously believed. The discovery has aroused great interest among European archeologists because previously nothing had been known of the Hittites' work except rock carving and a few potsherds.

In Futurity Races

In futurity races the dam is entered before the foal is born, or the foal is entered when a few months old. The race is not run until the foals are two-year-olds. The three important futurity races in the United States are: The Futurity, Westchester Racing association; the Pimlico Futurity, Pimlico, Md.; the Breeders' Futurity, Lexington, Ky.

Cat Guards Master's Grave

For seven months a tomcat has been guarding the grave of his master, a fishmonger at Rehan, North Bavaria. Unable to attend the funeral, the pet found its way to the grave, and since then from dawn to dusk it has sat there, splitting at all who approached. Frequently he has to be taken home at night by force for feeding.

Man Preves He Brands Bees

A beekeeper at Whitton, New South Wales, brands his bees. His statement to this effect was met with such a chorus of disbelief that he exhibited a honey display and a frame of bees. The queen bee was branded on the thorax with a numbered metal disc.

Willing to Share It

"I don't care for Peggy—she's so small-minded." "But awfully generous—she'll give anybody a piece of it."—Stray Stories Magazine.

School Days

Everett—If that old principal doesn't take back what he said to me I'm going to leave school. Jack—Why, what did he say? Everett—He told me to leave school.

Stopping Over

"What sort of a time is your friend having on his motor trip?" "Great! I've had only two letters from him—one from a police station and the other from a hospital."

Venezuela and Oil

Venezuela is the second largest source of oil in the world. The principal petroleum fields lie around Lake Maracaibo, the Orinoco delta and near the mouth of the San Juan river.

POULTRY

FEAR DEATH LOSS IN MANY FLOCKS

Stringent Methods Must Be Used, Specialist Says.

By H. H. Alp, Poultry Extension Specialist, College of Agriculture, University of Illinois.—WNU Service.

Although the outlook for poultry and eggs is mostly favorable for the first half of the year, heavy mortality losses still loom as a threat to the poultry industry.

Some flock owners last year lost as high as 47 per cent of their mature flocks, and there will be ruinous losses again this season unless poultrymen adopt more stringent methods than they have used in the past.

The drive against poultry mortality losses might well start with greater alertness on the part of flock owners in detecting birds out of condition, in destroying and removing quickly from the pen all sick birds and in a real appreciation of cleanliness.

Certainly drugs and so-called remedies have failed to solve the problem, much as they have been used.

There is too much "doctoring" of sick chickens and not enough clean feeders, waterers and houses. It is useless, of course, to clean the droppings board and leave a side rail to a feeder or waterer filthy dirty.

Faulty sanitation or flock management is probably not wholly responsible for heavy mortality losses now being suffered by flock owners. There is considerable evidence that certain strains of poultry may be lacking in vitality. Future breeding may need to be done more with two-year-old stock and less with yearlings.

Why the Early-Hatched Chicks Are Preferred

There are at least five reasons why one is apt to be more successful when early hatched chicks are raised, according to H. L. Kempster, of the Missouri College of Agriculture.

The pullets will have time to mature and start laying in late summer or early fall, when egg prices are higher; the cockerels, when sold as broilers, usually return more money; early hatched chicks are not so likely to become infested with coccidiosis and infested with worms;

early hatched pullets develop into heavier birds, which lay larger eggs, and cooler weather is conducive to more rapid growth and proper development. In the selection of chicks, buy those that are free from disease and of vigorous stock, which has been tested for pullorum disease. Try to get chicks from heavy laying hens or from early hatched, well matured pullets.

Brooder House Temperature

The temperature in a brooder house where a brick brooder is used should range from 70 to 75 degrees. The thermometer should be placed on the wall one foot above the floor and three feet from the brooder where possible and the readings should be taken at that point. It is well to remember, says a North Carolina State college authority, that a bucket of water should be kept on top of the brooder at all times. This raises the humidity and aids in early feathering of the chicks.

Feeding Fresh Greens

If fresh greens are fed as the only source of vitamin A, they should be fed daily in amounts of 5 to 6 pounds per 100 birds per day. Whole alfalfa hay can be fed in racks or in the litter at the rate of about 2 pounds per day for the same number of birds when fresh greens or alfalfa meal are not fed.

Poultry Cullings

Markets seem to prefer infertile eggs. Enlarged livers occur in a number of poultry diseases. Moderation is a pretty good policy in all things, including chicken raising. Laying hens will produce more eggs during the winter if they get warm water to drink. Most markets demand a light colored skin; consequently, those flocks that tend to produce this should be favored. Laying pullets are sensitive to any sudden changes and are easily thrown into a partial molt, with a check in laying. The hen is strongly individual. Now and then one succumbs to the lassitude of an easy life, just eating the mash and grain and grit in troughs and hoppers before her and laying now and then.

NOTES FROM ABROAD

China has the highest death rate in the world. France plans to build special highways for auto speeders. Butter and cheese are being sold by automatic machines in Berlin. Voluntary gifts provided more than half the funds received in 1935 by London hospitals.

For every 300 men between seventeen and forty-nine in Warsaw there are 374 women.

Peiping, China, has a three-year plan for the restoration of historic monuments and improvement of streets.

England has one automobile for every thirty-five persons, compared with one to every five in the United States.

More than \$1,000,000 worth of old newspapers of foreign countries were received at Canton, China, in the last year.

Radio sets made in Palestine are provided with wood cabinets extruded and specially veneered to withstand the heat and humidity.

ACTIVITIES OF WOMEN

A club exclusively for widows has been founded at Yunchiao, China. The Jewish women of Morocco drape themselves with fine cloth, but do not wear the veil.

Brides in the newly created Philippine Republic do not always attend their own weddings. Telephone girls of Bombay, India, are required to have speaking knowledge of six languages.

Of the 202,320 miners in Japan, 21,380 are women. Nearly 400 workers are girls under fifteen years old.

Women's organizations in Canada have more than 250,000 members. There are upward of 350,000 women in business in the Dominion.

Woman suffrage became a reality in the Virgin Islands recently when the federal district court issued a mandamus ordering the election board to register women as voters.

FOR MEDITATION

To climb steep hills requires slow pace at first.—Shakespeare. Selfishness is the only real atheism; aspiration, unselfishness, the only real religion.—Zangwill.

Our todays and yesterdays are the blocks with which we build.—Longfellow. Truth is as impossible to be sold by any outward touch as the sunbeam.—Milton.

The clothing of our minds certainly ought to be regarded before that of our bodies.—Steele. Honor, glory and popular praise, rocks whereon greatest men have oftest wrecked.—Milton.

I have always suspected public taste to be a mongrel product out of affection by dogmatism.—R. L. Stevenson. Grief is itself a medicine.—Cowper.

Music is the real universal speech of mankind.—Weber. Valor consists in the power of self-recovery.—Emerson.

He that strives to touch a star, oft stumbles at a straw.—Spenser. An obstinate man does not hold opinions, but they hold him.—Pope.

A good book is the best of friends, the same today and forever.—Tupper. Law should be clear, precise, consistent. To interpret it is to corrupt it.—Napoleon.

Satire is a sort of glass wherein beholders do generally discover everybody's face but their own.—Swift. Silence is the mother of truth.—Disraeli.

Tenderness is the repose of passion.—Joubert. Few people know how to be old.—La Rochefoucauld.

Consider it a great task to be always the same man.—Seneca. Those who plot the destruction of others often fall themselves.—Phaedrus.

Mother is the name for God in the lips and hearts of children.—Thackeray. A plowman on his legs is higher than a gentleman on his knees.—Benjamin Franklin.

It is the first of all problems for a man to find out what kind of work he is to do in this universe.—Carlyle, dros.

Poultry

SELECT, HANDLE EGGS CAREFULLY

Hatchability Is Important to All Poultrymen.

By Dr. W. C. Thompson, Professor of Poultry Husbandry, New Jersey College of Agriculture.—WNU Service.

Much of the profit making possibilities of next season's pullet flocks will be determined by the type and character of hatching eggs used in incubators. Good chicks and good pullets will come only from good eggs. The ideal weight of hatching eggs is from 26 to 28 ounces to the dozen and not less than 24 ounces to the dozen.

Although the matter of weight in egg selection should not be carried to the extreme, next year's pullets will tend to produce eggs of the same type as those from which they were hatched.

Hatching eggs from poultry breeding flocks should be gathered two or three times daily during cold weather because chilling, to say nothing of freezing, ruins chances of a good hatch. Store the eggs in a cool place, preferably at 60 degrees Fahrenheit and in as even a temperature as possible.

The air in the storage room should not be too dry, or moisture in the eggs will be evaporated. Placed in clean trays or cartons, the eggs should be turned two or three times daily.

Do not wash hatching eggs, but remove any dirt with a fine sand paper or emery cloth. It is far better, however, to have produced hatching eggs perfectly clean than to have to clean them after they are gathered.

Discard the abnormally colored and oddly shaped eggs and set the selected eggs in the incubator within two weeks, and preferably within 10 days of the time they are laid.

Gravity Principle Used to Ventilate Hen Houses

While there is some difference of opinion about the best way to ventilate poultry houses, a simple system based on the principle of gravity has been used effectively in New Jersey multiple-unit laying houses for more than a decade, says E. R. Gross, professor of agricultural engineering at the New Jersey College of Agriculture, Rutgers university.

The only changes made in the gravity system during the last ten years are the adaptation of new materials for construction and successive increases in the size of the flue. Professor Gross reports. Under this system, the front windows of the house serve as intake openings and are regulated according to weather conditions.

The air passes through the room to an intake flue which is located at least six feet from the window and extends from two feet above the floor straight upward through the roof to at least two feet above the ridge of the roof. The flue is made of four strips of insulating wallboards nailed to four light posts to form an airtight box or tube and is located in each unit accommodating 100 to 150 birds.

A large cap prevents rain and snow from entering the house through the top of the flue. For most effective operation of this system, the flue must have a cross section area of at least two and a half inches per bird and, in most cases, this area may be advantageously increased to three and a half inches per bird.

A flue which is too small does not afford sufficient air change to carry away the moisture and keep the litter dry. Guineafowl can be housed with the barnyard hens but it would be better to keep them in a pen by themselves.

As the male is rather hard on the hens, states a writer in the Montreal Herald. The male guinea is treacherous. A small part of the henhouse could be used for the wintering place for guinea-fowl to good advantage.

The meat of the guinea-fowl is quite good to eat, but is gamey in taste and dark in color. Guineafowl females usually lay in May or early June. They do not lay as many eggs as hens, although some have been known to produce upwards of 100 eggs in a season; they do not lay during the winter months.

Potassium Permanganate Permanganate of potash has little, if any, value in the drinking water. This drug is a mild disinfectant but, in the amounts that can be used and exposed as it must be to conditions that offset any virtue that it might have, it cannot disinfect a hen or chicken.

As a routine addition to the drinking water of fowls, it has lost its favor and is now comparatively discarded. Skim-milk is a valuable food for poultry, however, fed, according to an authority in the Rural New-Yorker.

Raising Ducks Why are there not more ducks raised on American farms? The greatest objection given by most farmers and poultrymen is that they do not have a pond or stream near the house. Although a pond or stream is a valuable feature, it is not essential. All that is necessary is to provide sufficient water for drinking purposes.

An ordinary trough with a board about four inches wide fastened along the top will prevent the ducks from splashing the water out.—Wallace's Farmer. Synthetic rubber is being made in Germany. More than 55,000 high school students were injured playing football during 1935.

ONCE-OVERS

Of Cuba's 2,380,000 tons of sugar exported in 1935, the United States received 64 per cent. Only the District of Columbia and New Jersey have statutes forbidding corporal punishment in schools.

One reason why many of us don't get far is that we sidestep opportunity and shake hands with temptation.

A survey has indicated that more than 1,000,000 horsepower can be derived from the rivers of Saskatchewan.

Seeing a rabbit dig a piece of tin out of its burrow near Alice Springs, Australia, a prospector discovered a valuable tin lode, which is to be mined.

The 275,000 municipalities in this country which have power to issue bonds have an average bond debt of \$70,000 and a total debt of \$19,200,000,000.

GEMS OF THOUGHT

When we destroy an old prejudice we have need of a new virtue.—Mad. de Staël. Every gift of God is an invitation to claim a greater—grace for grace.—Godes.

Of all knowledge the wise and good seek most to know themselves.—Shakespeare. Every right action and true thought sets the seal of its beauty on person and face.—Ruskin.

At the basis of all morality, all knowledge, all lofty endeavor, lies the truth that God reigns.—Greeley. Though we travel the world over to find the beautiful, we must carry it with us, or we find it not.—Emerson.

Pleasure must first have the warrant that it is without sin; then the measure, that it is without excess.—H. G. J. Adam. The vice of envy is not only a dangerous but a mean vice, for it is always a confession of inferiority.—Theodore Roosevelt.

FACTS AND FIGURES Coal was discovered in Manchuria 3,000 years ago. Theater-goers in Cuba hiss an actor for applause and clap their hands for disapproval.

The first Diesel motor was used in a ship in the Caspian sea in 1903 and proved a success. An octopus can change its color quickly to almost any hue its surroundings demand.

A species of earthworm found in the tropics of South America grows to a length of 6 feet. The President having the largest family was John Tyler who was the father of 14 children.

The real name of John Paul Jones, first American naval hero, was John Paul. He added Jones later. POINTED PARAGRAPHS

Don't try to climb the ladder of fame on roller skates. It is said that seasickness is a sure remedy for pomposity.

An expert penman sometimes forges ahead until he gets caught. Other people's mistakes cause us a lot of unnecessary trouble.

It is impossible to convince a spider that there is honey in a rose. Tramps have one redeeming quality; you never hear of their getting mixed up in labor riots.

Some people are away up in the social scale because they are too light to bring it down.—Washington Star. WORTH CONSIDERATION

"National prestige is a reputation for the will to war."—A. A. Milne. "Man will never conquer death, but he will not tire of seeking youth."—Dr. Alexis Carrel.

"I believe in hope. I don't know that I believe much in principles, in politics."—Rudyard Kipling. "The religious difficulties of most men are moral or emotional, rather than intellectual."—Sherwood Eddy.

"No institution which hopes to survive can come into the world fully grown and mature."—Sir Samuel Hoare. "For many college graduates education has been 20 years of mental massage, not mental exercise."—Bruce Barton.

Mmes. Frank Griffith and Fred Rogers, and Misses Dorothy Rogers and Lucile Curry were Clovis visitors last Thursday. E. B. McCune, of Lubbock, called on friends here Wednesday. Messrs. Frank Truitt and Fat Fallwell left Monday for Chicago where they will spend about ten days looking after business interests.

Tom Galloway spent last Monday in Hobbs, New Mexico. Mr. McAdams, of Amarillo, was in Friona Friday. Clyde Gillespie, of Amarillo, was a business visitor in Friona, Wednesday. Stub Jones spent last Wednesday in Clovis.

TO THE VOTERS OF THE 69TH JUDICIAL DISTRICT I have tried to merit the confidence and support of the people of the 69th district and I believe that my many good friends will vouch for my sincerity. Whatever success has been attained in my efforts toward enforcing the law has been due in a large measure to the splendid cooperation given by the people, for which I herewith express my deepest appreciation. You people will realize that because of the large size of the district, it is physically impossible for me to see every voter, but I believe that I can count on each one of you, not only for your vote, but for your continued cooperation as well. James W. Witherspoon DISTRICT ATTORNEY (Political Advertisement)

To The Voters Of Precinct No. 1 I deeply appreciate the loyal support the people of my Precinct have given me in the past. I have tried to merit the confidence and support of each and every one by trying to serve all to the very best of my ability; and in spending my part of the County's money, I have tried to get value received. Whatever success I may have had, I feel it is partly due to the splendid co-operation given me by the people; and should I be re-elected, I pledge to one and all, my honest and faithful services. I respectfully solicit your support at the polls. Very truly yours J. M. W. Alexander

To All The Voters OF FARMER COUNTY Having in former years served you both as County Attorney and as County Judge, I assure you of my appreciation of those honors, and in coming to you in this campaign as a candidate for County Attorney, I most earnestly solicit your vote and undivided support in the primary Election. If elected I will serve you as your County Attorney promptly, faithfully, efficiently and effectively. Expressing my appreciation of all favors I may receive, I am, Most sincerely yours, E. F. LOKEY Candidate for County Attorney Parmer County, Texas

To The People of Parmer County Although I have no opponent in this campaign, It has been my desire to visit all, or as many as possible, of the people of Parmer County. But unavoidable hindering circumstances have prevented my doing so. I assure you I shall appreciate every vote given me in this election. Sincerely yours, WALTER LANDER COUNTY JUDGE
