

## 6,000 AMERICANS ARE IN DANGER OF DEATH

### Men, Women and Children in Peril of Lives at the Hands of Chinese Mobs

#### VICTIMS OF BOYCOTT ARE MANY

State, War and Navy Departments Seeking Every Possible Means of Precaution—Officials Are Worrying Over Situation—Soldiers Being Hurried East. Uncle Sam Is Acting Alone

By Associated Press. CHICAGO, Ill., Feb. 15.—A dispatch to the Inter Ocean from Washington, D. C., says:

Nearly six thousand Americans, men, women and children, are in peril of death at the hands of Chinese mobs in the threatened Boxer uprising. To rescue as many of these as possible from danger and take drastic action in every case where an American is molested has been the purpose of the President through the state, war and navy departments.

Activities in this direction have been going on for weeks, but great secrecy has necessarily been maintained. Aside from the known fact that the Philippine forces have already been greatly augmented and the Asiatic fleet increased, the state department is keeping its program secret. Of the total number of Americans now in China it is estimated that not less than 1,300 are engaged in Christian work.

It is roughly estimated that there are 3,000 Americans engaged in commercial pursuits in China, all of whom are victims of the boycott. In addition to these it is estimated that there are 1,500 other Americans in China in the employment of Chinese merchants and manufacturers, who heretofore have been paid good wages, but who have been driven from their employment by the anti-American spirit.

One thing, the United States is acting alone. Nearly all the anti-foreign sentiment in China is directed against French and Germans, and none toward Japan and England.

All the countries named have been benefited by the boycott on American goods, therefore if Pekin is taken again, as it was in the Boxer uprising of 1900, the fact that it is taken will be accomplished by American soldiers.

That all preparations being made to meet the emergency are being made on a scale which has never been known in this country is indicated by the unprecedented activity at the various army posts and military factories.

Reports Are Disquieting. Reports from China continue disquieting, and have established clearly that the Chinese government, while perhaps not actually spurring on the anti-foreign sentiment, is taking no steps to quell it. The viceroys persist in announcing that there is no boycott, but in the face of their proclamation is the fact that there have been no new contracts for American goods during the past six months. The merchant guilds are reported to be dividing up the market, and it is felt that the government officials here are of the opinion it would be promptly done. Diplomatic agents in China are all agreed to this one fact, that there is no movement by the government to suppress the rising insurrection against foreigners.

Japan Not to Blame. Attempts have been made to saddle the blame of the anti-foreign sentiment in China upon the Japanese, who, it is felt, will be the greatest beneficiaries of any substantial advantage from such a feeling, but officers returning from the east believe that Japan is in no way involved in the matter. There is no feeling among officials that Japan has encouraged the boycott, although the Japanese must surely realize that the exclusion of American goods from China will materially increase the sale of their own goods.

Secretary Taft has stated that the situation is most critical, and, although

## A HOT TIME IS AHEAD FOR HUNS

Coalitionists Will Quit Only at Bayonet Point

By Associated Press. VIENNA, Feb. 15.—The outcome of Monday's session of the Hungarian diet, when the decree dissolving parliament will be read, is awaited with considerable anxiety in view of the reports that the coalitionists are determinedly opposed to such a course. The president of the lower house of the Hungarian diet, a Herr Julius Jusch, declared in an interview printed in Die Zeit of this city today that the diet will only yield to brute force and the deputies will not consent to a dissolution unless they are driven out of the building on bayonets.

## DALLAS HAS BIG MYSTERY

Seven Skeletons Unearthed in a Gravel Pit

By Associated Press. DALLAS, Texas, Feb. 15.—There is a mystery in East Fork community, fifteen miles east of Dallas, that was today reported to the sheriff's department.

Seven full grown human skeletons were unearthed in a gravel pit yesterday by France Polly, a farmer, who was taking out gravel.

The condition of the bones indicated that the bodies were buried many years ago.

Deputy Sheriff Will Moore, who was reared in the vicinity, states there was never any graveyard there. The sheriff's department is starting an investigation.

## RESTITUTION WANTED

Choate's Opinion to Insurance Men Is Suits Can Be Brought

By Associated Press. NEW YORK, Feb. 15.—Joseph H. Choate is said to have rendered an informal opinion to President Charles A. Peabody of the Mutual Life Insurance company in regard to questions which were submitted to him two weeks ago at the direction of the company's board of trustees. These questions concerned recommendations made by the Mutual self-investigating committee that suits be instituted by the company against members of the old agreement to compel restitution. It is understood that Mr. Choate holds that the suits can be brought. The opinion which Mr. Choate is said to have rendered was merely verbal. He will supplement it with a formal one in writing in a few days.

## COLLECTIONS TO REACH \$500,000

Money Is Pouring Into State's Treasury  
**BIGGEST MONTH OF YEAR**  
Large Counties Have Not Yet Made Reports—McLennan Shows \$68,000 in Favor of State

Special to The Telegram.  
AUSTIN, Texas, Feb. 16.—Money of every conceivable kind and denomination continues to pour into the coffers of the state, being remittances from tax collectors throughout the state for collections made in the month of January. This is the biggest month in the year for receipts from the collection of taxes, and from present indications it is now believed that the total amount collected this month will reach very close to \$500,000, which is more than at first thought. The monthly reports of the county tax collectors are coming in at a fast rate, but the report of the first large county in the state for January reached the comptroller's department yesterday. It was from McLennan county.

This report from Tax Collector Lockwood of that county for January showed the total tax collections for January to be \$68,397.09, and of that amount \$24,715.60 is to the credit of the general revenue and \$43,681.49 to the credit of the available school fund. The report shows that the total number of poll tax receipts issued in McLennan county, including those for previous months, is 8,520.

Preparing for Encampment  
Special to The Telegram.  
AUSTIN, Texas, Feb. 16.—Adjutant General Hulan is now busy with the work of preparing for the big state encampment, which is to be held at Camp Mabry in July or August next. It is believed that the largest encampment will be by far the largest ever held in the state, as it will include between 1,600 and 2,000 regulars with these and about 3,000 state troops of the Texas National Guard. It will be held at a place to be selected by the 6,500 men and officers here at this camp of instruction.

## RUSE OF FIGHT GETS BIG BOOTY

**Jewelry to Value of \$10,000 Is Taken From Salesman**  
By Associated Press.  
NEW YORK, Feb. 16.—With descriptions furnished of two of the men and of jewelry worth \$10,000 taken, the detective bureau is investigating the robbery of a salesman from the Brooklyn bridge last Saturday evening. It was decided yesterday to make public the facts in the hope of recovery of the gems.

It is believed that four men perpetrated the robbery, which took place during the rush hour. It was the familiar pickpocket ruse of a fight, in which the attention of the victim is attracted by one of the men with the stolen property escaped.  
Heathcote & Co. was the firm whose clerk was the victim of the robbery. The salesman on Saturday evening left the firm's establishment with the jewelry, which was to be shown to a customer in Brooklyn. There was nothing to identify the package in which the jewelry was placed; it was simply a pasteboard box, wrapped with coarse paper, with no name of the firm visible. The young man reached his office at the rush hour, taking the shuttle train.

Soon after the train started a quarrel arose between a rough-looking stranger and another similarly dressed. The anger appeared to rise until just before the train entered the Brooklyn bridge, a fight began. One of the men was knocked over the salesman, several others appeared to fall in. The salesman was struck repeatedly. He managed to struggle free just as the train was stopped, and saw that his package was gone.

## FARM SUPPLIES MAKE ADVANCE

Implement and Wagon Prices Are Higher  
W. B. Bonner, a prominent hardware dealer of Mexia, who is in Fort Worth, reports that hardware prices have been materially advanced to the merchants but that there have not as yet been corresponding advances to the retail consumers.

There has been advance in the implement line which will easily go over 5 per cent, he says, "since the first of the year and bargues and wagons have also been advanced, while leather goods have gone clear out of sight. I had a letter yesterday from wagon makers at Fort Smith, Ark., withdrawing all their price lists of wagons and leather goods for the first of the year. Since then practically all of the wagon concerns have made a similar advance in the price of wagons. Buggies, cultivators and riding planters have also been advanced in price this year.

"Texas Implement and Transfer Company in this city the reported advance was confirmed, statement being made that no official notice had been received by the company, however, as all orders had been placed before the advance.

"In this connection, I will say that the cattle owners and the farmers who have stock have had a chance to play even on this because green hides have gone up also. I am now selling green hides at 10 1/2 cents. This means that the hide of a good sized cow will bring from \$4.50 to \$5.00. In former years you could buy a cow for about \$200 and sell it for \$100. The largest case, was one involving \$175.

Miss Ruby Nored of 1801 Hemphill street has returned from Coushatta and Shreveport, La., where she has been visiting relatives for the past month.

Red Cross lodge No. 14, Knights of Pythias, held a regular meeting Thursday night. Harry Stuart of Greenville, chairman of the judiciary committee of grand lodge, was present at the meeting.

For his spring trade H. A. Williams, at corner Second and Throckmorton, has unloaded a car each of John Deere and Avery plows into this city. He also boasts of a good business in Storm Buggies and Express or Dusters.

W. A. Ott, who is representing the Chicago Inter Ocean, the Indianapolis News, Minneapolis Journal and the Des Moines Capital in this city preparing a series of a dozen or fifteen articles on Fort Worth, which will be published shortly in those papers.

## S.S.S. PURELY VEGETABLE.

Every part of the body is dependent on the blood for nourishment and strength, and when for any cause this vital stream of life becomes impoverished or run-down, it invites disease to enter. No one can be well when the blood is impure; they lack the energy that is natural with health, the complexion becomes pale and sallow, the vital energies are at a low ebb, and they suffer from a general broken-down condition of health. The system is weakened and unable to resist the diseases and disorders that are constantly assailing it. The Liver and Kidneys, failing to receive the proper stimulation and nourishment from the blood, grow inactive and dull, and the waste matters and bodily impurities that should pass off through these channels of nature are left in the system to produce Rheumatism, Catarrh, Sores and Ulcers, Skin Diseases or some other blood disorder. When the blood is in this weakened and diseased condition it should be treated with a remedy that is not only thorough, but gentle in its action. S. S. S., a purely vegetable remedy, made of roots, herbs and barks, is just what is needed. It not only cleanses the blood of all impurities and poisons, and enriches and strengthens it, but gently builds up the entire system by its tonic effect. S. S. S. reinvigorates every member of the body, gives tone and vigor to the blood, and as it goes to the different parts, carries robust health and strength. S. S. S. acts more promptly and gives better results than any other medicine. It cures Rheumatism, Catarrh, Sores and Ulcers, Skin Diseases and all other blood disorders, and cures them permanently. Our Medical Department will be glad to give advice without charge to all suffering with blood or skin diseases. Address THE SWIFT SPECIFIC CO., ATLANTA, GA.

## CORNER ON CHAMPAGNE

Distributing Agency Reported to Have Speculative Ideas  
By Associated Press.  
NEW YORK, Feb. 16.—Inquiries were received in this city by cable yesterday by agents of well known champagne houses, regarding details of a proposed distributing agency designed to control the distribution of champagne in the country. No further details were given, and the trade here are much interested in the question.

Some time ago efforts were tentatively made to induce the well known agents of the American champagne concerns to enter on a tour of their home trade into an agreement in regard to distribution.

## NO MAN'S LAND TURNED INTO A VERGELAND

Special to The Telegram.  
LAWTON, Okla., Feb. 16.—It is estimated that the acreage of action in Beaver county this year will be increased ten-fold over that of last year. Beaver county was at one time known as "No Man's Land," and was believed to be worthless for agricultural purposes on account of the scarcity of rainfall. During the season just closing the farmers have gathered a wonderfully large crop and feel encouraged to do greater things the coming year.

## What Ailed the Senator

The senator approached the bowing landlord. "I want a large room," he said, "and I want it in a part of the house where I won't be disturbed. I may have to walk the floor a good deal nights and occasionally I'll like to kick over a chair or two."  
"And may I ask what causes this violent agitation?" the landlord politely inquired.  
"I'm trying to think up things to do to Roosevelt," the senator snarled—Cleveland leader.

OUR DAILY SHORT STORY

DUFF GREEN AND LINCOLN

A Dramatic Encounter Recalled by Admiral Porter

About an hour after the flagship arrived at Richmond a man dressed in gray homespun, with a huge, rough white beard...

"Let him come on board. Duff is an old friend of mine, and I would like to talk to him."

When Mr. Duff Green passed over the side he stood defiantly on the deck, scowled at the flag, then turning to Admiral Porter...

"I want to see Abraham Lincoln," "When you come in a respectable manner," said the admiral...

"How long is it?" Inquired Duff Green, "since Abraham Lincoln took his mortal wound..."

The admiral thought and still thinks the man was crazy, but he made Mr. Green throw his stick overboard...

"Has it come to this?" Is he afraid of assassination? Tyrants generally get into that condition.

The admiral reported all this to the president. "Let him come down; he always was a little queer; I shan't mind him."

When Mr. Green was shown into the cabin the president arose and offered him his hand.

"No," said Green, with a tragic air, "it is red with blood; I can't touch it. When I knew you it was an honest man who had the trust of hundreds of my people, and their blood, which now lies soaking in the ground, cries aloud to heaven for vengeance."

I came to see you, not for old remembrance sake, but to give you a piece of my opinion. You won't like it, but I don't care, for people don't generally like to have the truth told them. You may come here protected by your army and navy, to shoot over their heads and desolation you have caused. You are a second Nero, and had you lived in his day you would have flinched when Rome was burning."

Lincoln had stood with outstretched hands, his mouth wreathed with a pleasant smile. He was pleased with meeting an old and esteemed friend. As Duff Green started on his talk the outstretched hand was withdrawn and the smile in the president's eye faded.

He has cut the throat of your army and navy, to shoot over their heads and desolation you have caused. You are a second Nero, and had you lived in his day you would have flinched when Rome was burning."

touched Duff Green's face. "Stop, you political scamp!" he exclaimed. "You are the aider and abettor of those who brought all this ruin upon our country, without the courage to risk your person in defense of the principles you profess to espouse! A fellow who stood by to gather up the leaves and fishes, if any should fall to you. A man who has no principles in the north and took none south with him. A political hyena who robbed the graves of the dead and adopted their language as his own. You talk of the fortunate winner of a dainty little ribbon bag as the guest prize, while Miss Mary Terrell was consoled with a satin card case. A dainty collation was served after the game. The guests who played the game were: Mrs. Ed Temple, Morris Berner, William Massie, B. Anderson, T. Humble, J. B. Goings, John Hawley, E. Stephens, A. G. Goetz, W. J. Herley, Ed Temple, Jim Davis, W. C. Conroy, E. F. Fadick, James Gray, Jerre Ellis, Charles Ware, J. C. McCabe, W. A. Tuley, Small, Barrett, W. P. Anderson, and Miss Mary Terrell.

HUNGER IN POLAR REGIONS

One of the Fearful Trials Encountered by the Explorer

Hunger is one of the trials that explorers of the polar regions have to encounter very often. Captain Scott, in his recent volume, has described an unpleasant experience in the farthest south: "My companions got very bad food dreams; in fact, these have become the regular breakfast conversation. It appears as if there is a sort of nightmare; they are either sitting at a well-spread table with their arms tied, or they grasp at a dish and to piece out of the hands, they are in the act of lifting a dainty morsel to the mouth when they fall over a precipice."—New York Globe.

The assessed value of property at El Paso, Texas, is \$13,573,838, an increase of more than \$1,300,000 over last year.

Vanilla Souffle—Scald one cupful of milk seasoned with one-quarter teaspoonful of salt in a double boiler and mix in two tablespoonfuls of butter creamed together. Cook while stirring for ten minutes to form a smooth paste. Beat together thoroughly the yolks of four eggs and three tablespoonfuls of sugar and pour over the mixture in the double boiler. Stir till all together, flavor with one teaspoonful of orange extract and set away to cool. To prevent crust from forming, rub a little butter over the top. About a half hour before time to serve it, fold in the stiffly beaten whites of the four eggs and bake in a pudding dish for thirty minutes. Serve with chocolate sauce.

HINTS BY MAY MANTON

Mrs. Oscar Menece was the hostess of the "Merry Wives" Thursday afternoon. The suite of rooms where the card tables were arranged was attractively decorated with hyacinths and Jonquils. Mrs. John B. Hawley, making the high score of the club guests, won a beautiful hand made handkerchief. To Mrs. Sam Henderson went a satin card case as second prize. Mrs. Ed Temple was the fortunate winner of a dainty little ribbon bag as the guest prize, while Miss Mary Terrell was consoled with a satin card case. A dainty collation was served after the game. The guests who played the game were: Mrs. Ed Temple, Morris Berner, William Massie, B. Anderson, T. Humble, J. B. Goings, John Hawley, E. Stephens, A. G. Goetz, W. J. Herley, Ed Temple, Jim Davis, W. 5267 Plain Blouse, \$2 to 42 Bust. Plain-Blouse 5267

No matter how many fancy and elaborate blouses the wardrobe may contain, there are always occasions when a plain one is in demand. Illustrated is a model that is susceptible of a great many variations, that is so simple as to be quite easily and readily made and which is suited both to the silk and to the wool materials and to the single washable ones. In the illustration it is made of white lawn with the wide yoke and cuffs of eyelet embroidery, but this applied yoke can be of any contrasting material and can be made either on the pointed outline or on the square one as may be liked. Again if a decollete waist is desired, both the blouse and the lining can be cut on the square outline and short puffed sleeves used, giving the effect shown in the small view. The waist consists of a fitted lining, which can be used or omitted as preferred, the front and back, the yoke is simply applied over the waist and the long cuffs can be either faced onto the blouses or attached to the full portions of the sleeve when the waist is left unlined.

The pattern 5267 is cut in sizes for a 25, 24, 26, 38, 40 and 42 inch bust measure.

WEDDINGS

Barcroft-Vaughn

The announcement of the wedding on Sunday of J. P. Barcroft and Miss Josie Vaughn of this city at Dallas, which was made Thursday, created a great deal of surprise among the friends of the two, as no word had been heard that they had been married, so well was the secret kept. They both went to Dallas on Sunday and returned on the stately steamer White in the afternoon. The bride is the daughter of J. W. Vaughn of this city and the bridegroom is the bookkeeper of the Fort Worth Record. Mr. and Mrs. Barcroft will make their home at the Delaware hotel.

Thompson-Smith

Justice John L. Terrell married Miss Edna Thompson, 1510 West Dargott street, and C. C. Smith of Lewisburg, Tenn., at the home of the bride, Thursday afternoon at 5 o'clock. Mr. and Mrs. Smith will reside in Tennessee.

BRENHAM COTTON MILLS

Bonds Amounting to \$100,000 Will Be Issued for Improvements Special to The Telegram, BRENHAM, Texas, Feb. 16.—It was decided at a meeting yesterday afternoon of the cotton mill directors to bond the mill for \$100,000 for twenty years at 6 per cent to enable the capacity of the mill to be doubled.

A TRAINED NURSE

After Years of Experience, Advises Women in Regard to Their Health.

Mrs. Martha Pohlman of 55 Chester Avenue, Newark, N. J., who is a graduate Nurse from the Blockley Training School, at Philadelphia, and for six years Chief Clinic Nurse at the Philadelphia Hospital, writes the letter printed below. She has the advantage of personal experience, besides her professional education, and what she has to say may be absolutely relied upon.

Many other women are afflicted as she was. They can regain health in the same way. It is prudent to heed such advice from such a source.

Mrs. Pohlman writes: "I am firmly persuaded, after eight years of experience with Lydia E. Pinkham's Vegetable Compound, that it is the safest and best medicine for any suffering woman to use."

"Immediately after my marriage I found that my health began to fail me. I became weak and nervous, with severe bearing-down pains, fearful backaches and frequent dizzy spells. The doctors prescribed for me, yet I did not improve. I would bleed after eating, and frequently become nauseated. I had pains down through my limbs so I could hardly walk. It was as if I had some trouble as I have ever known. Lydia E. Pinkham's Vegetable Compound, however, cured me within four months. Since that time I have had occasion to recommend it to a number of patients suffering from all forms of female difficulties, and I find that while it is considered unprofessional to recommend a patent medicine, I can honestly recommend Lydia E. Pinkham's Vegetable Compound, for I have found that it cures female ills, where all other medicine fails. It is a grand medicine for sick women."

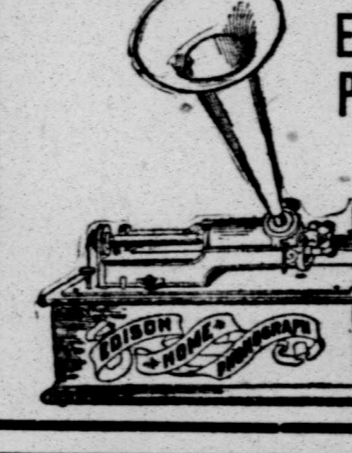

Money cannot buy such testimony as this—merit alone can produce such results, and the ablest specialists never agree that Lydia E. Pinkham's Vegetable Compound is the most universally successful remedy for all female diseases known to medicine.

When women are troubled with irregular, suppressed or painful periods, weakness, displacement or ulceration of the female organs, that bearing-down feeling, inflammation, backache, bloating (or flatulence), general debility, indigestion, and nervous prostration, or are beset with such symptoms as dizziness, faintness, lassitude, excita-

tion, irritability, nervousness, sleeplessness, melancholy, "fall-gone" and "want-to-be-left-alone" feelings, blue and hopelessness, they should remember there is one tried and true remedy, Lydia E. Pinkham's Vegetable Compound at once removes such troubles from diseases peculiar to their sex is terrible to see. The money which they pay to doctors who do not help them is an enormous waste. The pain is cured and the money is saved by Lydia E. Pinkham's Vegetable Compound.

It is well for women who are ill to write Mrs. Pinkham at Lynn, Mass. The present Mrs. Pohlman is the daughter-in-law of Lydia E. Pinkham, her assistant for many years before her decease, and for twenty-five years since her advice has been freely given to sick women. In her great experience, which covers many years, she has probably had to deal with dozens of cases just like yours. Her advice is strictly confidential.

Lydia E. Pinkham's Vegetable Compound Succeeds Where Others Fail.

Colds

A cold is always the result of undue exposure to low temperatures. The rapid cooling of the surface, when not balanced by proper reaction, produces the congestion and inflammation of the nasal and bronchial membranes, commonly called a cold. As the slightest cold predisposes the individual to attacks of the most severe and dangerous character, the necessity for its quick cure need not be emphasized. Take

Chamberlain's Cough Remedy

as soon as the first indication of the cold appears and all dangerous results will be avoided. It not only cures a cold quickly but counteracts any tendency of a cold to result in pneumonia. This fact has been fully proven during the epidemics of colds and grip of the past few years. No case of either of these diseases having resulted in pneumonia when this remedy was used, has ever been reported to the manufacturers or come to their notice, which shows conclusively that it is not only the best and quickest cure for a cold, but a certain preventive of that dangerous disease—pneumonia.

There is no danger in giving this remedy to children as it contains no opium or other harmful drug. It is pleasant to take.

CLUB DECLARES FOR CAR LINE Third Ward Service Meets With Approval UNANIMOUS VOTE TAKEN Plans Made to Secure Polling of Each Vote in Ward at Coming Referendum Election

The proposed street car line for the Third ward was discussed in full at the meeting of the Third Ward Democratic club at the store of J. Jacobs, Eighteenth and Terry streets, Thursday night and it was decided unanimously that the proposed line would be a great benefit to the ward.

A motion was carried by the club that the voters of the entire city be urged to come out and vote for the franchise at the time of the referendum election April 10, as the citizens of the Third ward are in favor of the line, which has been sought for a number of years.

The new line will increase the value of property in the ward 40 to 50 per cent and I think that it is up to the citizens of the ward to come out as strong as possible in the vote and show the Traction company that we are interested in the matter.

Platforms Discussed. The matter of platforms on Seventeenth street was taken up by Alderman and Judge Martin at the meeting of the committee that they had seen Alderman Zurn of the street and alleys committee and he had invited the committee to be present at the meeting of the council committee on Monday afternoon before the council meeting to discuss the matter at that time.

Miss Frances Folsom whose renditions of popular songs at the Majestic theater this week have made quite an impression, is a soprano singer of inherent ability. Since the time she was first able to toddle around Miss Folsom evinced great aptitude in picking up new songs.

Among the new members who were taken into the club last night was R. F. Cook, the democratic nominee for alderman from the ward. He is calling for a speech at the beginning of the meeting and expressed his pleasure at becoming a member and stated that he had only been prevented from joining at the earlier meetings because of serious illness of members of his family.

Greenwall's opera house was dark last night. "David Harum" Harry Brown, the popular comedian, for many years a member of the Bostonians and other famous organizations, will be seen here in "David Harum"...

NORTH TEXAS FREIGHT RATES

Just exactly how any man can give even casual attention to the Texas freight rate situation and then soberly state that "it has proved its benefits to the people as a whole" is beyond the Herald...

FOR BETTER FREIGHT RATES

The commercial interests of North Texas are determined to have better freight rates or know the reason why. The meeting held in Dallas Tuesday, which was largely attended by representative business men...

known Fort Worth wholesale business man, presided over the meeting, and following are the resolutions adopted:

Whereas, There has never been any concerted action by all the representative shippers in North Texas for the purpose of securing better and more equitable freight rates for this entire district; and

Whereas, It is the belief of the shippers and others interested in freight matters in North Texas in attendance on this meeting not only that this district is greatly discriminated against in the matter of freight rates, but that the rates in force here are unjust and unreasonable, and that from such concerted action much good might result. Now, therefore be it

Resolved, That it is the sense of this meeting that the shippers and others interested in establishing fair and equitable freight rates for North Texas organize under the name of the North Texas Freight Bureau, for the purpose of using all lawful methods of securing better and more equitable freight rates.

That the duty of perfecting this organization and the executive authority thereof for one year after its organization be vested in a board of directors to be selected in the following manner: Each city or town in North Texas, except Dallas and Fort Worth, having five or more members in the bureau, shall select one member for the board of directors. Fort Worth and Dallas shall each have two members on the board.

The board of directors shall have full authority to take whatever action they consider necessary to carry out the purposes of this organization, and to this end they shall adopt by-laws for the government of the bureau and of the board, appoint a chairman, either from among or outside of their number, appoint committees to represent them and employ such agents as they may deem necessary.

The Freight Bureau shall hold an annual meeting each year and other meetings upon call of the chairman or any three members of the board.

A membership fee of \$10 shall be charged to each member of this organization and the dues shall be \$5 per month.

It is the opinion of the representative business men in attendance upon this meeting that the fact that the Texas lines of railway are dominated by influences outside the state is very detrimental to the business interests of Texas, and that discriminations are practiced to such an extent that great injury is being constantly done the commercial interests of North Texas. It is evident from the high character of the men who participated in this meeting and the deep interest manifested that the war is going to be carried into Africa if necessary to obtain the desired relief, and it is a timely movement in which all the commercial and shipping interests of North Texas should feel an equal interest.

UNDER THE TERRELL ELECTION LAW

Political matters in Texas under the Terrell election law are conducted vastly different from the methods employed in the past, and as many candidates for office are already in the field all over the state, it is well for both candidates and voters to fully understand just what they are up against.

On or before this date the tax collector in every county in the state must file with the county clerk a statement showing how many poll tax receipts he issued, and to whom they are issued, in every precinct, and such statement shall become a record of the commissioners' court.

Before this date the tax collector in each county shall deliver to the board that is charged with the duty of furnishing election supplies separate certified lists of the citizens in each precinct who have paid their poll tax or received their certificates of exemption, the names being arranged in alphabetical order.

AMONG THE EXCHANGES

Waco is out after the state Democratic convention. Waco is the place where the delegates get their money's worth every time.—Waco Times-Herald.

Fort Worth is also going after the state convention, and Fort Worth is the one place in Texas where delegates to any kind of a convention always get more than their money's worth.

People of Fort Worth and Dallas have lost all interest in the rate bill and are shouting themselves hoarse at the incoming race trains.—Clarendon Chronicle.

People of Fort Worth and Dallas have felt an interest in the fast mail trains, but not to the extent indicated. They are finding time to also do some shouting for lower freight rates.

Stirling P. Strong, in announcing himself a candidate for state treasurer declares himself against nepotism, which is a very strong point in his favor. There has been too much of that kind of graft in our state departments.—Quanah Tribune-Chief.

Nepotism has long been practiced at Austin to the great disgust of the people, and any candidate who has the nerve to speak out against it deserves well at the hands of Texas voters.

Fort Worth is to have a canning plant to preserve the peaches and other fruit indigenous to Tarrant county soil. Texas is moving along at a steady pace.—Dallas Times-Herald.

Fort Worth is to have two big canning plants to preserve the meat that has heretofore been canned in Chicago and other great packing centers. While other towns are wondering how it is done, Fort Worth is growing at a most alarming rate.

The department of agriculture shows that the cattle tick killed cattle in Texas alone to the value of \$23,000,000 last year. The beef trust will probably hasten to blame the tick for the increase in the price of meats.—Galveston Tribune.

The fever tick annually causes much loss throughout the Southern states, and the government should do all possible to aid in the eradication of the evil. Quarantine lines will not do the work. There must be earnest and intelligent effort at suppression.

Fort Worth and Houston are chinning across the state over their climatic advantages and blessings. There is nothing like a game of bluff in it as a rule, but San Antonio has the good climate goods and can deliver them every day in the year, except those on which Fort Worth sends down a blizzard and Houston sends up a fog bank. Neither are indigenous here.—San Antonio Light.

San Antonio has a climate that gives one that tired feeling. It is only in Fort Worth that climatic conditions are ideal and men are induced to get up and do things.

One cotton mill in Sherman has demonstrated that such industries are profitable here. Two would be more profitable, and ten would be much more profitable. Let's build enough cotton mills to consume the entire cotton crop of Grayson county, if no more.—Sherman Register.

If all the big cotton producing countries in the state would begin work on an effort to build more cotton mills, instead of wasting time on reduced acreage, the cotton problem would soon be solved so far as Texas is concerned.

The railways entering Fort Worth should immediately proceed to get busy in the matter of providing adequate facilities to prevent such occurrences in the future. Fort Worth is a constantly growing proposition, and it is unjust to expect this city to do business today with the facilities provided a number of years ago.

When the new water works machinery is received and installed, which will soon be done at a cost of \$35,000, the supply of pure artesian water now enjoyed by citizens of Fort Worth will be increased to 6,000,000 gallons daily, and that is a record that cannot be equalled by any other Texas city. They have artesian water in Houston in great abundance, but Houston people are complaining of finding catfish in the fluid of the same variety the little negroes catch out of Buffalo bayou.

There is considerable demand now for Fort Worth residence property, and some choice property of that kind is moving at stiff figures. When the people of any Texas town or city show a disposition to invest their money in good homes it is a sure indication not only of prosperity among the people, but a general recognition of the fact that such city or town has an established future. There can be no questioning the future of this city. It is as clear as the noonday sun.

Texas millers at their meeting in this city, declared strongly against the adulteration of feed and food-stuffs, and expressed a willingness to assist in the prosecution of violators of the law. The stand taken by the millers in the premises is the proper one, and if adhered to will probably result in the abatement of some of the evils of which the public has so long complained.

Hogs on the Fort Worth market climbed to \$6.20 Thursday, and over 200 head went at those figures. This fact serves to illustrate the truth of the allegation that there is money in the hog business for the farmers of Texas, and the Fort Worth market is ready to take all they can produce. It is very gratifying to note that receipts on this market are showing a very gratifying increase.

Fort Worth is to have a pure food show next month, and it is a move that should be liberally encouraged and supported. This pure food proposition is one in which every citizen is vitally interested, and when the men who dispense food articles show a disposition to encourage the pure food movement they are entitled to just recognition.

The Fort Worth Fat Stock Show will be the greatest event of the kind witnessed in the southwest, and visitors to this city can rely upon the fact that they will see something well worthy their undivided attention.

North Fort Worth is going to have a very strenuous mayoralty campaign, judging from the lining up of the forces, and political pyrotechnics of the latest and most approved order will be much in evidence.

Something is about to happen down in Austin, and the ominous rattle that has already been heard is believed to be but the precursor of an official call for a special session of the state legislature.

Prospects for the Hepburn rate bill are said to be very dark in the United States senate, where the railroad influence is alleged to have long been perilously active.

WOULDN'T IT JAR YOU?

LITTLE TALES WELL TOLD

A DISTINCTIVE DIFFERENCE Former Governor Howers of Maine, a member of the committee on territories and a strong Roosevelt man, was defending the statehood bill in the house one afternoon. "I am for what will best subserve the interests of the greatest republic the sun has ever shone on," he cried. "Then as a laugh went on from the Democratic side, he perceived what had said and added: "The greatest republic the sun shines on."

BIBLICAL QUOTATIONS

Delegate Mark Smith of Arizona, has been the recipient of many congratulations on his speech flaying Representative Tawney recently. His Biblical quotation has extorted admiration from men less familiar with the scriptures. "Yes," said Smith modestly, "a Biblical quotation is a good thing. Many years ago General Huston of Kentucky, one of the greatest lawyers that state ever saw, said to me: 'In a law case, remember this: An apt Biblical quotation, sprung at the right moment, will knock seven witnesses out of the box.'"

LIABLE TO ERR

Senator Penrose tells of a lady who objected to all familiarity by street car conductors, such as touching her or calling to her, or assuming that she needed help in getting on or off a car. One day when the motorman was putting on brakes and slowing up the woman arose, and the conductor shouted: "Wait, tiddy, until the car stops." "Don't address me, sir, as lady," she indignantly replied. "Beg your pardon, ma'am," replied the conductor; "but all of us are liable to make mistakes."

POINTED PARAGRAPHS

Love and pain are more or less chummy. Keep eggs from spilling by eating them while fresh. A big policeman can bluff almost anybody—except his wife. The darkest hour is just when your chickens are disappearing. When a man challenges comparison he has to fight against big odds. Fortune tellers are seldom able to pick out fortunes for themselves. It's as easy for most women to be good as it is for some men to be no good. Everybody says the love of money is the root of all evil, but nobody believes it. Not until a man is able to beat an echo out of the last word can he hope to outtalk a woman. A building may burn either down or up; it depends on whether the fire starts in the attic or basement. While a woman may not care for a vacation, she dislikes to admit that she passed the entire summer at home.—Chicago News.

REFLECTIONS OF A BACHELOR

Children will never disobey you if you never give them any orders. A man will manufacture a lie out of the whole cloth, scandal in the church. If money could stick to one's descendants the way red hair does, everybody would be rich. Generally you can tell when a woman is a mother by the way she doesn't think any children she meets are pretty.—New York Press.

THE BOUNCING OF BONI

Count Castellane denounces as absurd the report that he got on his knees before his wife and begged for mercy. Of course, it is. A fellow can't spend mercy.—Philadelphia North American. Whatever real grievances Countess Boni de Castellane may have against her husband, she can't justly accuse him of not being a good spender.—Hartford Times. Count Boni de Castellane cabled to his cousin in New York yesterday: "Say that it is not true." It appears that among all his other shortcomings Count Boni is just a plain garden liar.—Kansas City Times. An expert at statistics figures that Anna Gould's count has cost her just \$2,018 a day—and that's the least of it.—Boston Globe. Count Paul Ernest Bonifacio de Castellane. That's his name in full. Has cost the Goulds \$20,000,000 in cash—and a lot of worry.—Toledo Press.

VERSES THAT RING

MY OWN SHALL COME TO ME Serene, I fold my hands and wait Nor care for winds, or tide, or sea; I have no more 'gainst tide or fate, For lo! my own shall come to me. I stay my haste, I make delays, For what avails this eager pace? I stand amid the eternal ways, And what is mine shall know my face. Asleep, awake, by night or day, The friends I seek are seeking me; No wind can drive my bark astray, Nor change the tide of destiny. What matter if I stand alone? I wait with joy the coming years; My heart shall reap where it has sown, And garner up its fruit of tears. The waters know their own, and draw The brook that springs in yonder height, So flows the good with equal law Unto the soul of pure delight. The stars come nightly to the sky; The tidal wave unto the sea; Nor time, nor space, nor deep, nor high, Can keep my own away from me. —John Burroughs.

SENATORS FROM TEXAS

Senator Bailey did not use all the means at his command to give Senator Patterson pain the other day. He had in his possession, but did not use, a fact which would have deeply grieved the Colorado senator who has been waging so valiant a battle against the caucus system. Each senator and representative contributes to the congressional directory an autobiography, in which he gives only the most important events of his life. In Senator Patterson's autobiography appears this sentence, referring to his election to the senate: "In his acceptance speech Mr. Patterson announced that he would in the future act with the Democratic party and enter the Democratic caucus." "He is the only senator who has deemed the fact that he pledged himself to enter the Democratic caucus of sufficient importance to warrant inclusion in his autobiography." President Roosevelt has apparently not been pleased with Senator Culberson's activity in digging up facts with which to confute Republican spokesmen at the critical moment. The other day Senator Spooner was put forward to defend the Santo Domingo treaty, and delivered a powerful argument to show that the President was awaiting the senate's action before carrying the treaty into effect. Culberson waited till he got through and then annihilated his whole argument by producing a forgotten statement from the President himself in which he stated that the treaty was being carried out at the present time. Again, after Patterson had denied that he ever favored binding action in a caucus, Culberson crushed him by producing the record of Patterson's vote in the caucus of 1903. He has done so many of these things that every Republican speaker feels a cold chill when Culberson arises. The feeling has evidently spread to the White House, for when the President was asked what he thought of Bailey and Culberson he said—at least he is quoted by his visitor as having said: "Texas has one senator and one detective." QUAKER REFLECTIONS Cursing our luck won't change it. It's what a man hasn't done that sometimes counts. A drop in the bucket is worth two in the bucket shop. If meaning well meant riches we would all be men of means. All the world's a stage, and the trust magnate is the property man. Lots of us never recognize our blessings because we can't penetrate the disguise. The trouble with the fellow who knows it all is that he insists upon knowing it, too. The poet takes life seriously, but the average editor would take a poet's life with positive glee. A man will manufacture a lie out of the whole cloth, but with her ideas of economy a woman will use remnants.—Philadelphia Record.

CHRISTIAN SCIENCE LECTURE TOPIC

Large Audience at the Opera House Last Night

ADDRESS WELL RECEIVED

Discusses Methods of Curing Disease. Declaring No Struggle With Believers in Materia Medica

A large audience greeted Bickel Young, Christian Science lecturer, at the opera house Thursday night, the large building being comfortably filled.

A clear explanation of Christian Science was given by Mr. Young, the manner of curing diseases and other questions being taken up for discussion. Close attention marked the entire lecture.

Not a New Law

Christian science may be defined as the science of all that relates to God, and is science not only in relation to healing, but as a corrective to all problems of existence. Accepted theories of religion and science have scoffed at the association of these words, but the logic of logic shows conclusively that science must relate to truth, and therefore to God, since God is the cause and basis of all life.

Christian Science does not proclaim a new God, nor a new law, but rather declares the same God and the same law that Jesus declared, the one Infinite eternal God, who is good, and his good and unchangeable law. Christian Science declares the omnipotence, omniscience and omnipresence of God so do all other denominations and religions. Science shows that evil has no power, knowledge nor presence; in other words, that it is unreal.

What Christian Science Means

The steps of salvation in Christian Science are not unusual. As in other denominations they involve repentance or conviction of sin, sorrow for wrong doing, or repentance, and reformation manifested by a universal life. Salvation in Christian Science, however, includes exemption from sickness, want and woe, as well as from sin. It is not contingent upon death, but is a way of life, a way of righteousness. Christian Science is as much as this. Those who have been healed, some of them so-called incurable diseases, through the use of this book. In some instances this testimony has been given in courts of law, and has not been in the least shaken by cross-examination.

No Quarrel With Doctors

Christian Scientists are in no wise arrayed against those who believe in materia medica. They were all healers in it themselves until the efficacy in Christian Science a more efficacious way of healing. This way they believe to be the best, because it is God's way, as shown in the works of Jesus. Although charity is supposed to have been the highest of all virtues, in common with all well informed people, recognize the fact that it is merely an experimental system. Surely after four thousand years it ought to be beyond this stage. Furthermore, it is a self-combustible system. Surely the combinations of medical societies and the medical fraternity generally should care before our legislators enact any special legislation; the tendency of which is almost invariably to shut out all other systems. Nor can any valid excuse be given, as in Christian Science is concerned, on the ground of protection to the public, since the health of the community depends on the health of the individual, and the individual depends on the health of the community.

How Disease is Cured

Those who believe that mentally plays some part in disease and its

corn generally look in the wrong direction, and say that the curses of Christian Science are effected by mental suggestion, hypnosis, will power, mental science, which is spurious and not related to Christian Science, or to some other erroneous or material belief. Christian Scientists, however, declare that it is God who heals disease through Christian Science, and they of all people know best.

CORN URGED AS STAPLE CROP

W. E. Bonner Urges It in Place of Cotton

W. E. Bonner of the Bonner Hardware company of Mexia, Texas, is a guest at the Metropolitan. Mr. Bonner came here for the purpose of visiting the stock yards and looking into the cattle situation a little as he has extensive cattle and farming interests in addition to his hardware business.

Mr. Bonner will go to Dallas to attend the corn convention, and he states that this will be a very important matter to the farmers in Texas. He is a practical farmer and has learned what he knows by experience. "The farmers of Texas ought to raise more corn," said Mr. Bonner to a Telegram reporter, "and they should be educated to do this because there is money in it for them. They ought to devote more land to the cultivation of corn instead of cotton and they ought to raise more corn per acre on the land that has been in cultivation already. The trouble with the majority of the farmers is that they are not tilling their soil properly and are not using enough fertilizer."

By fertilizing the soil the corn crop could be put ahead by fully two weeks and this length of time frequently decides the success of the crop in our seasons. A little more work in preparing the soil would be the great benefit to the farmer. If the farmers could make in their corn fields and the yield per acre could be enormously increased.

The convention in Dallas will be the first of the kind and an effort will be made to perfect an organization to most systematically encourage and lead the farmers relative to the cultivation of corn. Now they wait until they see some man in their neighborhood come in and use the word "fertilizer." Then the rest will follow his example. But there are not enough of these people in that part of the country and the people should be educated through the newspapers in this regard.

Papers Received Regularly. The farmers are beginning to read more and with the rural mail delivery they are able to get papers earlier and with more regularity, so that they will continue to read more in the future.

Pushing Railroad Work

Mr. Bonner states that the railroad work near Mexia has been a great thing for his town. "Mexia is a great place for the line now," said Mr. Bonner. "It is not only a great thing for the employment of the people who already are awake to the advantages offered by the railroad construction."

Both the Houston and Texas central and with more regularity, so that they will continue to read more in the future. "The Houston and Texas central and with more regularity, so that they will continue to read more in the future. The Houston and Texas central and with more regularity, so that they will continue to read more in the future. The Houston and Texas central and with more regularity, so that they will continue to read more in the future."

Panhandle Conditions. H. C. Harding, who is feeding cattle at Amarillo, is in the city and is too well known a stockman not to attract the attention of a reporter. "Everything is getting along extraordinarily well up in the plains country," said he, "and everybody is happy. There is a great good range and the cattle have gone through the winter remarkably well with few losses. While we have had a few bad days, still the winter has been remarkable. The cattleman who owns his land under these conditions is getting along very well along in the business, which means to be on the up-grade every month, or he can sell his cattle and land at good prices, remove to Fort Worth and invest, like other common in city property and make himself a good deal contented. Watching the city grow and telling his past experiences in the cow business—who could wish for better things? There is a boom in the Amarillo and the Panhandle, and the people who want to buy lands are so thick that they are being bought up and held up to stand up or lean against the walls to sleep. These people are all after the level of Fort Worth, although there are still likely to remain ranches until the levels are all bought up. We old-time cattlemen of course hate to see good ranges that has supported cattle for so long turned under by the plow, but I suppose it is inevitable and for the best in the long run, and in the end will result in more and better cattle, but more generally distributed among the people. Yes, I intend to be another test of our tick exterminator if we can first get rid of our ticks. Our experiment at Amarillo with the mange and scab was a success and has received the endorsement of Dr. Melvin, head of the bureau of animal industry. Beaumont oil and water in parts of one to four were used in the trial."

CATTLE GO FROM HERE TO CUBA

J. D. Neely Buys 172 Head of Bulls for Havana

The market at Fort Worth draws seekers after good stuff from far and near, and among the arrivals the past few days was J. D. Neely, a large handler of shipping stuff and a member of the firm of Maupin & Neely, exporters of live stock to Cuban points. He purchased 172 head of fat bulls, which he will ship to Mobile and from there to Havana. Bulls, he says, sell equally as well as steers and for about the same price. The trade is fair now, but will be better in May and June. Just after the Spanish war his firm did a fine business, shipping as many as 500 milch cows at good prices. No cow is allowed to be killed so long as she will bring a calf, and the duties on butcher stock are so high from \$1 to \$3 per head that the profits are reduced to such an extent that it requires close buying to make good. There is no duty on stock cattle entering Cuba. He will go to San Antonio in a day or two and will try to buy several cars of this bulls that he will feed in Mobile before shipping. "We have," he said, "a brisk trade out of Mobile now for Cuba. It takes only thirty-three hours to make the trip. Mobile has improved wonderfully in the last few years and the old places that you knew when you were there last, many of them, have disappeared and new ones have taken their place. That old landmark known to all old southerners, the Battle House, was burned and a new \$500,000 hotel will occupy its site. The old city is recovering some of her ante-bellum importance and will soon be one of the important ports of the whole Gulf coast. Fine lands are being sold for \$40 an acre and hundreds of people from the north are buying up and settling in the country. Every year a great number of cattle comes from Alabama, Mississippi and Tennessee and the class of cattle is an improvement over the

In the low-grade powders it is "phosphate alum," or "sodium aluminum sulphate," which is also alum, a mineral acid, and that makes the food unhealthful.
