Bayou Philosopher Comes Out With Crop Sales Plan Patterned After Veterans Program

Editor's note: The Bayou Philosopher on his Johnson grass farm on the Bayou has a hair-brained idea this week, which he won't get anywhere with. Dear editor:

A lot of people have been complaining about the block sales of land under the veterans program in Texas.

As I understand it, a man goes out and contracts to buy up a lot of land at as low a price as he can get, divides it up into blocks, and sells it to veterans at as high a price as he can get, with the state of course furnishing the money.

Naturally, some men have gone at this program too hurriedly, and in their desire to help the state spend its money have sold land a lot faster than some of the veterans could buy it or even have a chance to look at it, but as any salesman knows, when the fellow putting up the money is ready to close the deal, then's the time to stop talking and start signing, and if there wasn't any veteran handy to do the signing, they did not see any sense in letting a technically stand in the way of a good profit.

"As It Looks From Here"

OMAR BURLESON
Congressman
17th District

Washington, D. C.—No segment of our economy stands to benefit more from increased trade with foreign nations than agriculture. Therefore, the farmer must be concerned with the success of President Eisenhower's recommendation for a three-year extension of the Reciprocal Trade Agreements. They provide for a gradual reduction in tariffs.

At least ten percent of farm production must be exported if this country is to have a prosperous agriculture. If the farmer is to have reasonable prosperity, we must have export markets, and to have an export market, trade has got to work both ways. Foreign nations cannot buy from us unless we buy from them.

When farmers are prosperous, many other businesses and industries also profit. If farmers buy tractors, shovels, radios, or automobiles from the industrial areas, they have got to have the income to pay the bill.

According to reports of the Texas Bureau of Business Research, farm income increased in 1954. However, there was a decline in many of the individual commodities.

In my judgement the bill which the Congress passed last year, permitting the Government to sell 700 million dollars worth of surplus commodities for the currency of the foreign country making the purchase, was greatly responsible for some of this increase. It does not mean that the sales at that time had actually been made, but the effect was nevertheless noticeable.

It gives me a great deal of satisfaction that I had something to do with the passage of this law, and I hope that in the next three years the full authority to sell surplus commodities will be exercised.

In addition, we are greatly in need of certain strategic materials which we can purchase with the foreign currencies received from the sale of these commodities.

It looks as if the best we can do may not be good enough for the farmer to maintain a reasonably high income. Aside from the drought, we are not getting a fair share of cotton allotments, which is due in a large part to the administration of the law, rather than the law itself. The result is that our area, although it has not been responsible for surpluses, is paying the penalty for overproduction in other places.

Incidentally, Secretary of Agriculture Benson testified before a Senate Agriculture Committee that "things are looking up on the farm front under Republican leadership." I hope this is true, but at the time it seems to me that if the farmer is "looking up", as Mr. Benson has said, it is on account of being flat on his economic back. This is not recommended as the best place to look up from.

Something we might all try on for size: "Patting a friend on the back will get us farther than kicking our enemy."

Russell Wright and Weldon Newton, both students at A&M College, spent a few days here the past week with homefolks.

Tom Wilson and Mrs. W. J. Garrett of Jayton and Mrs. E. R. Neeb of Abilene were in Cross Plains Friday of last week and visited with Mrs. W. T. Wilson for awhile.

Two decades ago, it took an average of 3 month's wages to pay the hospital bills resulting from a case of pneumonia. Today, a case of pneumonia is cured at home—with drugs that cost an average of only 5 hour's wages. That's just one of many facts which prove that . . .

Make Plans Now For That Spring Garden

College Station—There's plenty of satisfaction and amazing production in a "small" spring garden. The garden fever however often persuades folks to plant a larger area than they can properly care for. So when you plan this year's garden, trim it down to your size, advises B. G. Hancock, extension horticulturist at Texas A&M College.

Spread out your plantings so the harvest will extend over a longer period of time, suggests Hancock. A garden planted at one time causes over-production for a short period and then supplies are gone.

Plant a variety of vegetables, about 32 are commonly grown in Texas. Why not try a new vegetable each season, he says.

Have commercial fertilizers, insecticides, seed treating chemicals and other needed equipment on hand for ready use.

English peas, turnips, cabbage plants, onions, head lettuce and white potatoes can stand considerable cold weather and may be planted four to five weeks before the last average killing frost.

Other vegetables adapted to early planting—two to three weeks before the last frost—are radishes, mustard, beets, carrots and leaf lettuce.

Finally, Hancock says for best results plant those vegetables suited to your particular area.

Sammy Hill of Norman, Okla., was here over the week end visiting his parents, Mr. and Mrs. J. B. Hill.

Austin—Veterans' land scandals got the silent treatment last week. Four veterans refused to testify.

The senate investigating committee took other testimony behind closed doors, silent as far as the public was concerned. And, the House veterans' affairs committee stymied its own public investigation in a tangle of technicalities.

A House committee member, Rep. Bill Elliott of Pasadena, charged "organized pressure" to block further investigation of the issue.

Speaker Jim Lindsey had sent a separate House investigation resolution to a different committee, state affairs.

Ex-Land Commissioner Bascom Giles, head of the Veterans' Land Board until Jan. 1, invoked the Constitution and refused to testify as to his business dealings with several persons named in testimony about block deals.

C. O. Hagan and C. P. Earnsters, principals in much of the land-sale testimony, followed L. V. Ruffin in refusing to testify.

Insurance Hearings
Hearings started in both houses of the Legislature on a long list of bills to "clean up the insurance mess."

Sen. Searcy Bracewell told a Senate committee his bill to firm up capital requirements was "tough". The committee put it in a tenderizing sub-committee for three weeks.

It would raise minimum requirements for future legal reserve life companies to \$25,000 capital and \$125,000 surplus, all in cash or bonds. Smaller existing companies would continue, but would be limited in size of policies and re-insurance, until they reached the minimum. Those with investments of minimum capital and surplus in office buildings or real estate mortgages would have three years to convert to cash.

The House Insurance committee heard the three state insurance commissioners and others propose corrective measures, including state regulation of the sale of insurance securities.

Shepperd Wants 13 Laws
Attorney General John Ben Shepperd asked for legislation "to prevent another Duval County."

Speaking to 200 publishers at a Texas Press Association convention in Austin, Shepperd revealed that his legal skirmishes with Boss George Par disclosed many shortcomings in Texas laws.

He recommended 13 bills, and asked the editors to help effect passage.

Most of the bills would tighten control over county funds and call for annual published reports of expenditures.

Suggested Taxes
Tax proposals continue on the penny basis set by Gov. Allan Shivers' program. His two-penny gasoline tax hike, good for \$60 million a year, was introduced earlier by Rep. Charles Murphy of Houston.

Rep. W. G. "Cotton" Kirkin of Odessa offered the familiar penny-a-thousand-foot natural gas dedication tax bill. He figured it would bring in \$33 million a year.

And, Rep. Jerry Sadler of Percilla dropped in a penny-a-glass, \$3.30 per barrel beer tax, estimated to produce \$16 million a year.

All faced an ultra-conservative revenue and taxation committee.

From Rep. Jack Bryan of Buffalo came a proposal to place a three percent gross receipts tax on establishments engaged in storing or parking motor vehicles.

Bills in the Hopper
Approved by the House of Representatives, was a bill to increase the pay of state officials. If acceptable to the Senate, the pay scale will go to \$25,000 for the governor; \$20,000 for the attorney general; secretary of state, \$15,000; and the land commissioner, treasurer and comptroller \$17,500.

Sen. A. M. Aiken Jr., of Paris and Rep. Barefoot Sanders of Dallas are sponsoring a plan to provide \$45 million for new school building construction. It would let school districts vote higher bond issues, up to 10 percent of the assessed property values.

Two representatives, John T. Cox of Temple and Jack Welch of Marlin, have submitted a bill seeking the death penalty for second conviction under the Narcotics Code, and permitting conviction of an uncorroborated testimony of an accomplice.

Sen. Doyle Willis of Fort Worth has a bill to close beer taverns on Sunday.

A bill to limit the building of lodges in state parks was introduced by Rep. Ben Atwell of Dallas.

Sen. Kilmer Corbin of Lubbock wants to make Democrats out of Democrats. His bill is to prevent Texans from voting in the Democratic primaries and then voting

Republican in the general election. Sen. Carlos Ashley of Llano tossed into the hopper a joint resolution that would permit Texas to go after the tourist trade by advertising. An amendment to the state constitution would be necessary to remove the old, old ban designed to keep the carpetbaggers out of Texas.

New Officials

While the veterans' land probe rolled on, newly appointed State Land Commissioner and Veterans Land Board Chairman J. Earl Rudder borrowed Ray Clark Diebel from the State Auditor's Department and named him executive secretary of the board.

Lawrence Jackson quit this post soon after Rudder replaced Bascom Giles.

Gov. Shivers will have a new Secretary of State early in February. He appointed Al Muldrow, Brownfield farmer-rancher-business man to succeed C. E. Fulgham, who resigned to return to Lubbock. Like Rudder, Muldrow is a World War II veteran.

Miss Betty Jo Montgomery of ACC Abilene, visited her parents here over the week end.

Mr. and Mrs. Charley Smith of Rising Star visited Sunday with her brother and wife, Mr. and Mrs. Fred Tunnell.

Mr. and Mrs. Penny North and Sally of Hobbs, New Mex., spent Saturday night with her parents, Mr. and Mrs. Jim Wetsel. The North family was enroute to their home after a visit with their son and brother in Kentucky.

Cattle trade Monday was steady with some cows and calves stronger. Cows selling Monday at \$10 to \$13, compare with end-of-January val-

ues of \$10 to \$13.50 a year ago. Canners and cutters sold from \$7 to \$10 Monday, are level with a year back. Bulls at \$9 to \$14.50, are also levels with a year ago. Slaughter calves of the good and choice variety sold Monday at \$16 to \$19, identical with last year. Medium and lower grades sold from \$9 to \$15, unchanged. Atomic Energy To Be Used In Treatment Of Cancer At Baylor University Hospital, Dallas

Atomic energy is to be put to work for the benefit of mankind at Baylor University Hospital in Dallas. Mr. Charles R. Moore, Chairman of the Dallas Executive Committee of the Baylor Board of Trustees, announced this new advance for the treatment of cancer today. Mr. Moore stated that plans have been completed for installation of a new "Theratron" Cobalt 60 Beam Cancer Therapy unit at Baylor University Hospital. The Cobalt Therapy Unit is a new type of giant X-ray like machine which utilizes radiation from atomic energy to penetrate the skin and retard or destroy the growth of cancerous tissue. In discussing the new unit Dr. J. E. Miller, Chief of the Department of Radiology at Baylor University Hospital, said: "The principle of X-ray therapy has been used in the treatment of cancer for a long time, but the new Cobalt machine makes possible deeper penetration with less harm to normal tissue than was ever possible before." Internal Revenue Service Presents Income Tax Questions and Answers

File Early
Q. If I have until April 15, 1955, to file my 1954 income tax return, why should I file earlier?
A. If you have overpaid your tax, you have a refund due. These refunds are made in the order the returns are received; therefore, the earlier you file, the earlier you will receive your check.
Q. But suppose I haven't overpaid, what then?
A. It is always wise to file early. Getting the information together is the big job. This you should start doing as soon as possible after the end of the year. Often you may find it difficult to gather important information and an early start gives you more time to get up the information on these hard to find items.
Q. Will the Internal Revenue Service prepare my return for me?
A. The personnel of your Internal Revenue Service would gladly prepare your return if it were possible. Unfortunately due to the tremendous amount of work that has to be carried on, we can prepare returns only for those taxpayers who cannot read or write or who are physically unable to assist themselves.
Q. If the Internal Revenue Service will not prepare my return, then what am I to do for assistance?
A. Although the Internal Revenue Service will be unable to prepare your return, there has been set up an assistance program whereby with a little work on your part, you can prepare your own return.
Q. In what way will the service assist me?
A. For those taxpayers who need to telephone for information or come in for help on some question, after reading the instructions furnished with the blank form, we will set aside certain days on which we can furnish you assistance by answering your questions. Every Monday morning during January from 8:30 to 12:30 has been designated as Taxpayer Assistance Days. These days are January 3, 10, 17, 24, and 31. We will also have taxpayer assistance days all day Mondays from 8:30 a.m. to 5:00 p.m., beginning March 14 through April 11; i. e. March 14, 21, and 28, and April 4 and 11. If you have to come to the office, you should come on Taxpayers Assistance Day. We will not have any one at smaller offices, and we will not be set up to help you at most larger offices on other days.
