BUILDING, REMODELING AND REAL ESTATE TRANSACTIONS SET BRISK PACE HERE

Real estate transactions, building and remodeling projects are among the business news in the Cross Plains area.

The biggest project now in progress is the new Baptist Church which will cost approximately \$90,000 when completed. Foundation work on the building was started several weeks ago and work is going at a rapid pace now. Claude Mayes, owner of Mayes Lumber Co. here, is building superintendent on the project.

Mayes Lumber Company has completed the S. N. Foster building on Main Street, next door to Piggy Wiggly grocery, which will be occupied in the near future by West Texas Utilities Co. The building is ultra modernistic with a complete glass front and the interior has been finished in soft pastel colors with an attractive tile floor. The front portion of the building will be used for display and offices and will be modern in furnishings with no counters separating the offices from the display room. The back of the building will house the repair department and storage.

Mr. and Mrs. Pat McNeil, Jr. and family expect to move into their new three bedroom home which is expected to be completed by the latter part of next week. The home built by Mayes Lumber Co. is located on North Ave. E.

Mr. and Mrs. Andy Dale Young have under construction a two bedroom home, located just north of the Craig McNeil home on North Ave. C, on lots purchased from Mrs. Peyton Smith. They expect to move into their new home about Dec. 10.

Mr. and Mrs. V. C. Adams of Burkett are in the process of remodeling the interior of their home and plan in the near future to add a room.

Mr. and Mrs. Ivan Clark, who reside in Arizona, have recently completed a three bedroom home on their farm near Burkett, Mayes Lumber Co. was contractor.

Mr. and Mrs. Earnest Byrd of Cross Cut have been making extensive repairs on their home and are redecorating the interior.

Mr. and Mrs. Pete Fore of Pioneer have added a fresh coat of paint to their home.

The C. C. Holdridge's have recently enlarged a bedroom in their home and completed extensive interior remodeling. They also repainted the exterior.

Mr. and Mrs. S. O. Skinner, who made their home at Pioneer for many years, have recently purchased the Gattis place on North Main Street and have redecorated the interior and made improvements on the exterior. Mr. Skinner has recently retired after being employed by Sinclair Oil and Refining Co. for 25 years.

Bufs Lose To Merkel; Rest This Week End

The visiting Merkel Badgers ran around, through and passed over the Cross Plains Buffaloes to the tune of 47-0 here Friday night.

The Badgers scored in every quarter while racking up their 47 points, and stopping the Buffalo offense for naught.

Merkel tallied twice in the first and third quarters and once each in the second and final quarters.

The hapless Bufs managed to penetrate Merkel territory only two times, both penetrations coming in the final quarter. In the early minutes of the fourth quarter, the Bufs moved to the Badger 33, and on the last play of the game the Buffs completed a 40 yard pass to the Merkel 20.

After driving to the Buffalo three and five yard line and failing to score, the Badgers started their scoring parade. Merkel's first touchdown came with 3:07 remaining in the first quarter. Quarterback Manly Derton passed to end Larry Perry for 27 yards. Left halfback Joe Neill circled left end for two points after touchdown. About two and a half minutes later Merkel scored again. Neill, who was thrown in the Buffs side all night, knifed through left tackle into paydirt from two yards out. Denton hit end Pat Patterson for the PAT. Merkel's scoring drives covered 27 and 35 yards respectively.

In the second quarter, Merkel marched 55 yards with Neill capping the drive with a 25 yard scamper around right end. Denton kicked the point, and the halftime score stood Merkel 23 and Cross Plains 0.

Neill opened the Badgers scoring in the third quarter as he rambled 10 yards around right end with 4:18 left in the third stanza capping a 56 yard drive. Fullback Frenando Moreno banged his way over right guard for the conversion. With 41 seconds remaining in the third period Denton put the finishing touches on a 20 yard drive as he angled around right end for 12 yards and a touchdown. Denton passed to end Jerry McLeod for the two points.

With one minute left to play, Merkel wrapped up their scoring parade. Denton tossed a 25 yard touchdown pass to back Ronnie English. A pass from Denton to end Johnny Roach on the conversion was fumbled in the end zone, but English covered for the two points.

The strong Merkel defense bottled the Buffaloes up in their own end of the field through the first three quarters. Only in the final quarter were the locals able to penetrate into Merkel territory. The Buffs first drive carried from their own 30 to the visitors' 38 before a fumble stopped the drive. On the last play of the game quarterback Doug Dallas found left halfback Jim Fleming on the Merkel 25 with a pass. Fleming managed five more yards to the Edgier 20.

After driving to the Buffalo three and five yard line and failing to score, the Badgers started their scoring parade. Merkel's first touchdown came with 3:07 remaining in the first quarter. Quarterback Manly Derton passed to end Larry Perry for 27 yards. Left halfback Joe Neill circled left end for two points after touchdown. About two and a half minutes later Merkel scored again. Merkel's scoring drives covered 27 and 35 yards respectively.

Outstanding Bufs

The Buffalo reserves played a fine brand of football with sophomore Alvin Hutchins shining on both offense and defense, and freshman quarterback Doug Dallas doing a fine job at the signal caller's position. Sophomore Paul Whitton did a good job on defense. Senior right halfback Jim Fleming played good defensive ball and caught both Buffalo passes from quarterback Dallas. Defensively again, tackles Perry Jennings and W. A. Morris and center Doyle Oliver were outstanding.

Bufs Rest

The Buffaloes will rest next week end while readying themselves for their final game of the season with Wylie, Thursday, Nov. 13.

The game will get underway at 7:30 p. m. at Wylie Field. The Buffaloes will be hunting their first conference win while the Buffs will be trying to even their conference record at two wins and two losses.

PHILOSOPHER ADVISES EXPERTS ON HOW TO LIGHTEN THE WORK LOAD ON FARM

EDITOR'S NOTE: The Bayou Philosopher on his Johnson grass farm on the Bayou tackles the problem of the small farm this week. Tackling a problem of course is not solving it.

Dear editor: There has been a lot of discussion in the newspapers the past year over the plight of the small farmer, and lots of experts have been worrying about him. They're afraid he'll get discouraged and have to give up farming and move to town.

As a result, a lot of thinking has been going on about the problem, and I was reading in an article last night where some experts studying the matter have decided one way to keep the farmer on the farm is to make his work lighter. For example, they said, farmers ought to use their brains and figure out short cuts for themselves, and they threw in a suggestion of their own as a starter. Why not, they said, "put cows up on a platform so the dairyman can milk them as he stands?" This would save a lot of stooping.

The main trouble with this is that I doubt if it takes any more work to stoop to milk a cow than it does to reach to build a platform for them to stand on, not to mention getting the feed up there to them twice a day. Personally, if I was milking a bunch of cows, which I'm not, and was opposed to stooping, I'd come out in favor of longer legged cows or shorter legged men.

The trouble with using brains and science to lighten the load of farming is that this works up to a certain point, but it generally stops at the edge of the field, leaving nobody but the farmer to go up one row and down another, in between rains.

Science is wonderful, but I've noticed that in the most modern business, with every labor-saving device known to man, or on the most modern farm, with every scientific improvement available, still the man who gets the furthest ahead generally is the one who works the hardest, with the longest hours.

That's where science breaks down. However, it's where I take over. After years of studying the problem, I know how to lighten the work on a farm. It's simple. Just skip about half of what you're supposed to do. Understanding, of course, that this is for the well-run farm. On mine, I skip about three-fourths.

Yours faithfully,
J. A.

Undersecretary of the Interior er F. Bennett told Texans the

President's special cabinet commit- tee on fuels is studying proposed plans to cut back imports. But, he said, the administration would not be "stamped in mandatory controls."

Touchy Topic—Next legislature is forewarned of the difficulties that will be involved in passing any law on industrial safety.

A meeting of the Joint Commis- sion on Industrial Safety developed into heated disagreement and ended in a deadlock. Commission chairman M. B. Blair wanted the group to approve and recommend to the legislature a plan for a state system of safety regulation and inspection in industry. Rep. Joe Pool of Dallas urged that no recommen- dation be made until public hear- ings had been held to get labor and employer views.

Blair's proposal was rejected. Pool's was approved by a 4-3 vote, but Chairman Blair ruled the motion out of order. It ended with agreement to send the Commis- sion's collected data to the gov- ernor and legislature with no re- commendation.

Commission is a nine-member group authorized by the last legis- lature to study and make sugges- tions on industrial safety laws to the upcoming session.

End of Road—Former Rep. James E. Cox of Conroe has lost what apparently is the last battle in his fight against a two-year prison sentence.

Court of Criminal Appeals slam- med the door when it refused Cox a re-hearing. Cox was convicted in a Travis County Court last fall. In June the Appeals Court, by a 2-1 decision, upheld the convic- tion.

Cox was charged with agreeing to accept a \$5,000 bribe in return for killing a bill to outlaw practice of naturopathy. He withdrew from the Legislature after the difficul- ty developed but has steadfastly maintained his innocence.

Diablo Dam Pushed—Both Gov. Price Daniel and the State Board of Water Engineers have given their official approval to plans for construction of Diablo Dam on the Rio Grande River.

Need for the dam was dramati- cally illustrated by the recent heavy floods on the Rio Grande, said J. T. Ellis Jr., the governor's aide in water matters. Rampant waters

caused an estimated \$7,000,000 property damage, and about \$31,- 900,000 worth of water was lost for useful purposes.

Next step toward getting the dam is for the International Boundary and Water Commission to prepare final plans and go to Congress for an appropriation. Diablo will be a joint project of the U. S. and Mex- ico with this country putting up \$48,600,000 of the \$80,000,000 cost.

Loan Plan Challenged—Atty. Gen. Will Wilson has filed suit to test the constitutionality of a law permitting "certificate plan" loans.

Three nationwide finance com- panies are defendants in the suit. Wilson contends the certificate plan, though permitted by law, violates the constitutional prohibition against charging more than 10 per cent interest.

Under the plan a borrower may get a sum of money for a year and agree to pay 10 per cent interest on the total amount. But he is required to repay the money in monthly installments. Hence, ex- cept for the first month he is pay- ing interest on money he does not have.

No Branch Banks—In other ac- tion, Attorney General Wilson stuck to his ruling last spring that Texas banks may not set up "little banks" at nearby military installa- tions.

In numerous cities downtown banks have set up special facili- ties at nearby air bases, army posts, vet hospitals, etc.

This clearly violates the Texas Constitution's ban on branch bank- ing, said Wilson.

Younger Scientists Urged—Lab- oratory science courses beginning in the seventh grade instead of the tenth are recommended by a Uni- versity of Texas chemist, Dr. Robin C. Anderson.

Earlier introduction of science will help students in choosing their profession, Anderson told a recent statewide conference of science and mathematics teachers.

Expert Advises Fall Deferment of Grasses

The early fall rains which have been followed by mild, cloudy weather have given a tremendous boost to grass growth. This condition, advises B. J. Ragsdale, associate extension range specialists, is ideal for fall deferment of native grasses.

The specialists points out that if best results are to be obtained from this range improvement practice, it should be started at once. By deferring grazing of native grass pastures now, food reserves in the grass roots will be restored, and an early vigorous growth can be expected during the next growing season. Research work indicates that a grass plant deferred from grazing produces approximately four times as many roots as a closely and often grazed one, he says.

Another advantage of fall deferment this year is seed production. Many grasses failed to produce an abundant seed crop earlier due to the dry summer. These grasses are now producing a good seed crop, says Ragsdale. Deferment will allow the seed crop to mature and this in turn will speed up the natural reseeding of native pastures. Too, when grasses are grazed continuously during seed head production, livestock eat the seed stalks and the plants may not be able to produce early forage next spring.

The forage now being produced can utilize during the winter months after the food reserve in the

Estelle Freeland Circle Meets At First Baptist Church

The Estelle Freeland Circle of the Baptist WMU met at the church Tuesday of last week with Mrs. A. D. Petty reading the scripture and giving the meditation.

The program "Red Letter Days in the Baptist Jubilee Advance" was presented by Mmes. A. Webb, Cora Howland, Richard Thompson, Sam Jones and A. O. Allen.

Others attending the meeting were Mmes. W. H. Coppinger, L. L. Howser, Luke Westerman, A. Abbott, Henry Williams and B. F. Witherspoon.

Mrs. Coppinger offered the closing prayer.

Mr. and Mrs. Ekal McMillan were in Coleman Sunday afternoon visiting Mr. and Mrs. C. F. McMillan.

Rev. James Brandon of Cottonwood accompanied Rev. V. D. Walters, Lee Bishop and B. F. Witherspoon to San Antonio Monday morning to attend the Baptist Convention.

Roots have been restored and the seed crop has matured and fallen to the ground. Good grass forage on the ground for winter use in the feed reserve needed for cutting overhead ranching costs. Too, points out Ragsdale, deferred grazing is one of the practices eligible for ACP payments in certain areas of Texas. Details on the practice may be obtained from local county agents or county ASC offices.

STATE HEALTH NOTES

Do you have a teenager in the house? If you do, in addition to clothes strewn around the house, a continuously occupied telephone, and voracious appetites, you probably listen to complaints about acne—the scourge of teenagers since early times.

There has been much study of acne as a skin disease, but the exact cause is still undetermined. The body's hormonal balance, nutrition, the climate, and certain organisms all play a part. However, there is little doubt that the changes of activity in a youth's physical make-up as he attains adolescence is a major contributor to the problem.

Excess oil is emitted, combining with an overgrowth of skin about the pores, thus obstructing the openings so that oil gland canals become plugged with dried, fatty material causing a local skin obstruction ranging from a tiny blackhead to tender, inflamed cysts containing pus.

The two main goals of skin care are improving appearance for psychological reasons and preventing permanent scarring. A good cleansing with hot soapy water and a gentle massage with the finger tips for five or ten minutes each night should be a rule. Never scrub the skin vigorously or roughly as this injures the tender infected dermis. After the skin is rinsed thoroughly with cool water and patted dry, a physician recommended lotion or ointment may be applied. Also pay attention to your scalp, since proper care of the scalp seems to improve the facial acne.

If you have acne, avoid adding more oils in the form of cosmetic creams, lotions or pomades. Also, avoid makeup bases and powders as they may further obstruct the pores.

Some success with ultraviolet light has been obtained, especially in winter months, but such devices should be used only under the care and supervision of your physician. They can be dangerous in the hands of the uninformed.

In order to improve the appearance of the skin, some attention must be paid to the acne blemishes themselves. You are urged to refrain from squeezing blackheads, pustules, and cysts to avoid self-inflicted scar formation and the spread of infection. Hot compresses, frequent cleansing and the medications prescribed by a physician will usually control the blemishes.

There is some indication that diet is a contributing factor in some instances. A reduction in your intake of nuts, strong cheeses and chocolate should be undertaken in many cases.

Observe the proved rules of good health. Get plenty of exercise and enough sleep. Eat regular, well-balanced meals and drink six to eight glasses of water each day. Frequent baths and shampoos will keep the excess oils from accumulating.

Mr. and Mrs. Dave Ingram visited Willie Mae Ingram in the Gorman Hospital Sunday afternoon.

THE FANTASTIC STORY of MUSA-SHIYA THE SHIRTMAKER

(Also Sometimes Drygoods Selling)

If the shipping department of a factory had not made an error, the world would never have known of Musa-shiya the Shirtmaker and the most astounding advertising campaign in history would never have been launched.

Following World War I an English textile factory was getting back on a peacetime basis. In error it sent a full five year backorder of shirting material to Musa-shiya, a Japanese shirtmaker who operated a small shop in Honolulu. Business was poor and Musa-shiya was near bankruptcy, when the customs office informed him that certain bales of cloth and a fat bill for duties awaited his pleasure at the port of Honolulu.

When the little shirtmaker realized what had descended upon him, he asked for time and went into the silence for purpose of mental refreshment. Remembering a friend in a big mercantile establishment, he hid himself there and sought counsel. How in the name of the horned prophet of evil was he ever to get rid of all that English shirting? And in the meantime where was he to put it? His little box of a shop wouldn't hold one bale.

"You'll have to advertise," advised his friend. "Leave it to me. I'll have our advertising agents help you out."

This merely compounded the little Japanese shirtmaker's troubles. Advertising to him was an uncharted sea. The advertising agent called on Musa-shiya and suggested \$300 as a modest starter. "Too-o-o much. Maybe I think thirty dollar plenty," said the shirtmaker. He was told that wouldn't even get him in print. The agent explained the costs of various advertisements and finally Musa-shiya agreed to try the plan and what was destined to be the most astounding and far reaching campaign in the history of advertising was launched.

Two column by five inch ads then started appearing regularly in the Saturday Honolulu Star-Bulletin. The ads were written just the way Musa-shiya talked—in colorful pidgen English which is used throughout the Orient. Here is an example of one of Musa-shiya's ads:

"Well here come storek again—but Musa-shiya, the shirtmaker, is able prepare. Wonderful accumulation of baby things in dry goods selling corner of Musa shop. Everything for the baby—especially diaper. Exclusive of storek, which find most easily, many persons not finding little shop of Musa-shiya the shirtmaker in King Street, Makai side, between fish market and river."

Tourists started sending copies of Musa-shiya's ads to their friends in many countries. Soon Musa-shiya was receiving orders from all over the world as well as doing a thriving business in Hawaii.

And that is the story of how a well planned, small advertising campaign made an unknown Japanese shirtmaker not only wealthy but world famous.

Your local newspaper doesn't promise to duplicate this story for its advertisers, but it does take your sales message into the homes of your customers where full and careful consideration is given your suggestions. Who knows, perhaps you too can be a Musa-shiya.

When you are ill and need medication of any importance your Physician usually prescribes.

He depends on your Pharmacist to have the proper medication which he wishes to use in your particular case. He knows that through his prescription he will be able to give you one of many of the specialized drugs which your Pharmacist carries in his stock, thereby he does not have to limit his medication to a relatively few drugs, but has his choice of many.

These specialized drugs a lot of times mean the difference in a long siege of illness and a speedy recovery in a few days. Actually, in a lot of cases he is able to treat certain types of illness with these drugs without the patient losing any time from work.
