PHILOSOPHER FINDS AG DEPARTMENT CONFIRMS HIS IDEA ON LABOR-SAVING

EDITOR'S NOTE: The Bayou Philosopher on his Johnson grass farm on the Bayou discusses work this week, which is about like a bankrupt talking about finance.

Dear editor:

I have long contended that the trouble with labor saving devices is they don't save labor, they increase it, and I am now happy to have this opinion confirmed by the United States Department of Agriculture.

According to an article I ran across in a newspaper yesterday afternoon I was reading to get my mind off the noise of droning tractors running on my neighbors' farms—personally I don't really mind listening to the tractors, it's the effect they have on my wife that bothers me, she hears the neighbors' tractors running and sees mine standing at the turnrow where I left it week before last and the consequent noise she makes is a nuisance—at any rate, according to this article, in spite of all the labor-saving devices which have been invented and sold to farmers, the average length of the farm workday has not shortened much. It's still better than ten and a half hours a day, the Department of Agriculture reported.

This bears out what I've been saying all along. When a man switches from a two-row tractor to a four-row tractor, you'd think he'd do the same amount of plowing in half the time, but what he does is do twice as much plowing in the same old time, ten or eleven hours a day. He finishes the day just

HIGHWAY 206 OFFICIALS TO CONFER WITH ENGINEERS AT MEETING HERE TONIGHT

The Association was organized here last month for the purpose of promoting the improvement and extension of Highway 206 to provide a short-cut for traffic traveling to and from the Dallas-Fort Worth area to points in Southwest Texas a short, safe route to Interstate 20. Highway 206 now extends from Highway 67 just south of Coleman to Cross Plains and the proposed extension would give Cross Plains a state highway to points north of here. Packers, Stockyards Act Benefits All

Changes in the Packers and Stockyards Act extends protection in the market place to a greater number of livestock producers, said A. B. Wooten, extension economist.

He points out that the ACT sets up rules for fair business practices which provide protection for the farmer and consumer, as well as for the livestock and poultry marketing and meat packing industry. The new amendment makes the protection more far-reaching than ever before.

Formerly only livestock markets engaging in interstate commerce and covering 20,000 or more square feet came under the jurisdiction of the Act. Now livestock markets of all sizes, as well as dealers and other agencies handling livestock, engaged in interstate commerce must observe the rules, said Wooten.

Livestock auctions continue to be an important outlet for livestock in Texas. "Posting" them will mean that the operators must meet several conditions. An operator must register with the USDA within 30 days after his market is posted, and also file a bond based on the volume of business transacted during the past 12 months and a schedule of rates and charges for all services rendered by the market. The Act requires that the rates be just, reasonable and non-discriminatory, he said.

There are other provisions, said Wooten. The auction operator may not finance livestock dealers. He may not guarantee prices to be received for livestock, but may protect shipper's interests if reasonable bids are not received at time of sale. He may not permit auctioneers, weighers, starters, or clerks to buy out of commission for any purpose. He should solicit buyers to attend sales and should see that bidding by buyers is open and competitive. The operator should represent the best interests of shippers to the market at all times, sell all consigned livestock without misrepresenting quality, and provide equal treatment to all shippers, regardless of size or regularity of shipments. He must also install, maintain and operate scales to assure correct weights, keep complete and accurate records, and maintain a sound financial status at all times, the economist added.

Mr. and Mrs. V. L. Hobby were in Seminole over the Fourth where they attended a reunion of the Hobby family held at the home of M. D. Hobby.

Mr. and Mrs. Ben Wagner and family spent the week end holiday here with Mrs. Mary Wagner and Dick Gretchen Wagner accompanied her parents home after a week's visit here.

60 Wheat Nears

Wheat growers are reminding the chairman, Stabilization and Control Committee, that July 15 is the deadline for the control program of wheat.

It is pointed out that the wheat being held at this time will know at what time whether the restrictions will be lifted or harvest time in 1960.

A majority of the growers are required to keep their wheat in storage until July 15, said the Secretary of Agriculture. The law will determine whether they are continuing to comply with their obligations to store their wheat until the 75 percent support at the 75 percent rate when marketing quota are in effect. A marketing quota is an allotment of wheat to each grower. Excess wheat may produce a penalty rate for harvest as grain.

Marketing quotas are voted by the growers. But price ceilings are available at 50 percent of the market price for farmers who comply with the allotments. The quota penalty rate is \$1.07 per bushel.

Any farmer who expects to produce 15 acres of wheat in 1960, who participated in the program in 1959, is eligible to produce up to a copy of a "Vote on the Quotas" at local ASC.

"WHOLESALE" CATALOGUE

You may pay more...

- A wholesale firm is one which sells in quantities to a retailer who intends to re-sell the merchandise to his individual customers.
- The reason the wholesaler can sell at wholesale is because he does sell in quantities — and does not have to deal directly with each individual retail customer.
- A good question to ask then is: How can a wholesaler print and distribute thousands of catalogues to individual consumers, stand the cost of each sales transaction and still sell at "wholesale" prices?
- The answer is: He can't. He is mis-using the word "wholesale."
- By actual comparison, the cost of some merchandise listed in such catalogues is even higher than that charged for comparable items by the retailer.

CAUTION - CHECK THE PRICES IN THE "Wholesale" Catalog YOU MAY SAVE MONEY!

"There is no such thing as 'Wholesale' prices to the buying public, because..."

...no merchant can stay in business consistently selling merchandise at the same price he pays for it."

Your Doctor and You

In today's world of science you can depend on your medical doctor to have the latest information that scientific research has to offer the field of medicine.
 In addition to his many years of education in the medical schools, he also must spend other years in internships and residences in large hospitals where he sees and treats all types of disease, before he goes into practice of his own. Even then he must read countless reports on different types of drugs and their actions on the human body and its organs, to constantly keep in step with medical progress.
 Truly, today's medical doctor has more scientific knowledge than anytime in the history of our nation.
 Consult him often, even at the first sign of illness, visit him and take advantage of the scientific knowledge which he possesses. It could save you countless hours of suffering and days away from your job.

Summertime Is Polio Time

Rapid strides have been made toward controlling this crippling disease with Salk polio vaccine. However, there are very few people who even now have the proper inoculation to completely protect them. Your medical doctor can give you the information you need about this protection as well as immunization against tetanus, whooping cough, thyroid, and many others. He has the proper vaccine, some of which comes in combination doses so one inoculation takes care of three or four, where in the past, separate shots had to be given for each.
 Consult your family medical doctor often. Take advantage of his scientific knowledge, learn how his knowledge can heal you when you are sick as well as protect you from many common illnesses. The cost of a visit to him is small when compared to the protection which it affords you and your family. If you are really ill your doctor will prescribe medication for you. We can further his work by filling your prescriptions exactly as he has written them. This is the safe way to obtain all your medication. Any other way in which you obtain prescription medication can be dangerous. Today's drugs are truly wonderful but they also can be very dangerous unless taken under the proper supervision.

For your safety consult your medical doctor often. Bring us his prescriptions for proper filling.

STATE CAPITAL Highlights AND Sidelights by Vern Sanford TEXAS PRESS ASSOCIATION

Austin, Tex.—About the only cheerful remark heard around Texas Legislative halls of late is, "Think

how bad it would be if it weren't air conditioned."

(House and Senate chambers are cooled this year for the first time, though most of the rest of the Capitol is not as yet.)

Many remember summer sessions in pre-air conditioned days. Scorching extraordinary was the one in 1949 which ran to July 6, longest regular session in Texas history.

Lawmakers and reporters complained that the huge granite blocks in the Capitol walls collected heat like a Dutch oven. Coat and tie rules in the legislative chambers added to the misery.

Some observers said that the 1949 Legislature (which also had a tax problem—didn't really quit. It just sort of melted down. A special session was called the next winter to clear up money problems.

For all its comforts, air conditioning hasn't taken the sweat out of passing a tax bill.

Both House and Senate have passed tax bills, and a new conference committee was put to work to try to piece them together. But the floor action preceding passage gave no indication that any of the conflicting groups is ready to give an inch.

House membership is split three ways into (1) those who don't want the majority of new taxes to fall on business, (2) those who don't want a majority to be sales taxes and (3) those who apparently don't want any new taxes.

Each of the first two groups has been able to defeat the other's proposals with the help of the "no-taxers." Hence, despite public impatience and their weariness, lawmakers have been ensnared in a one-step-forward-and-two-backward pattern.

Something Old, Something New—Given to the conference committee on taxes were a new bobtailed bill from the House and an old, nearly full-size bill from the Senate.

House bill would raise about \$106,000,000 over two years—about \$70,000,000 less than is needed. Senate bill, designed to raise about \$160,000,000 is the same one passed by the Senate in the first special session. It contains more sales taxes than business taxes which the House refused to accept on the last round.

Cut from the House bill before passage were the \$50 deductible sales tax (a 2 per cent levy on costs over \$50) and the natural gas sev-

erance beneficiary tax. Both fell by the wayside in one of the "if you kill my tax, I'll kill yours" sessions.

Remaining in the bill were levies on which the House has been able to agree all along—on cigarettes, liquor, auto sales and corporation franchises.

"New wrinkles" added were (1) a licensing fee for private clubs that sell liquor and a 10 per cent tax on mixing drinks and (2) a 1.5 per cent sales tax on boats, motors and airplanes.

Bill also contains a provision to cut the sulphur tax from \$1.40 to \$1.03 a ton.

House conferees, none of whom served on the committee last session, are Reps. Menton J. Murray of Harlingen, Prates Seelgson of San Antonio, Wesley Roberts of Lamesa, Joe Ed Winfree of Houston and John Allen of Longview.

Senate conferees include four who served before, Sens. Rudolph Weuert, Dorsey Hardeman, Bruce Reagan and Jimmy Phillips, plus one new member, Sen. Wardlow Lane.

Senate Okay: Beach Bill—After considerable haggling and several close votes, the Senate passed a bill to guarantee public access to public beaches.

Mustang and Padre Islands are exempted from the provisions of the bill. Sen. Bruce Reagan of Corpus Christi, who sponsored the amendment, said that the islands were being developed with a sys-

tematic plan for public parks, beaches and recreation areas.

Opponents to the exemption said it would allow at least one-third of the beaches on the islands to be under private control.

As passed by the Senate, the bill does not try to define boundary between state and private land, but simply affirms the public's right to come and go from state beaches by way of roads.

Fee Bill Added to Call—A bill to let state colleges charge a \$30 a semester activity fee got a new lease on life when Gov. Price Daniel submitted it to the Legislature.

Bill had been introduced twice, but fizzled out in the Senate when Sen. Henry Gonzales challenged it on two points: (1) it was not "within the governor's call" for the session and (2) in order to be considered "within the call," it would have to be regarded as a revenue-raising measure which must originate in the House.

Governor Daniel's action changed this, and the Senate went back to work on the bill. A similar bill was passed by the House last session.

No Deadlock Here—Easiest agreement of the session was on a bill appropriating money to pay legislative expenses.

Both House and Senate gave final passage to a bill transferring \$400,000 from the cigarette tax fund to pay costs of the second special session.

This brings legislative expenses thus far to about \$2,700,000.

Mr. and Mrs. Travis Renfro of Abilene were visiting here Sunday with Mrs. J. H. McElroy, Mrs. Lem Renfro and Mr. and Mrs. Lloyd Bryan. Mrs. McElroy and Mrs. Renfro accompanied them home for a few days visit.

Mrs. Chas. Taylor visited in Zephyr during the holiday week end with her daughter, Mrs. F. L. Tucker and family. Saturday they all attended the singing at DeLeon and Sunday they drove to Snyder where they attended a reunion of Mrs. Taylor's family.

ONE OF THE 7 BIG BESTS CHEVROLET GIVES YOU OVER ANY CAR IN ITS FIELD

Take it, not from us, but from official results of this year's Mobilgas Economy Run: Chevy's pennypinching 6 delivers the most miles per gallon in its field. For a pair of these Chevrolet sixes with Powerglide walked away with the first two places in their class, getting the best mpg figure—a whopping 22.38—of any full-size car. And here are more expert, impartial opinions and on-the-record facts backing us up on Chevy's other six bests:

BEST TRADE-IN
Check the figures in any N.A.D.A.* Guide Book. Chevrolet used car prices last year averaged up to \$128 higher than comparable models of the "other two."

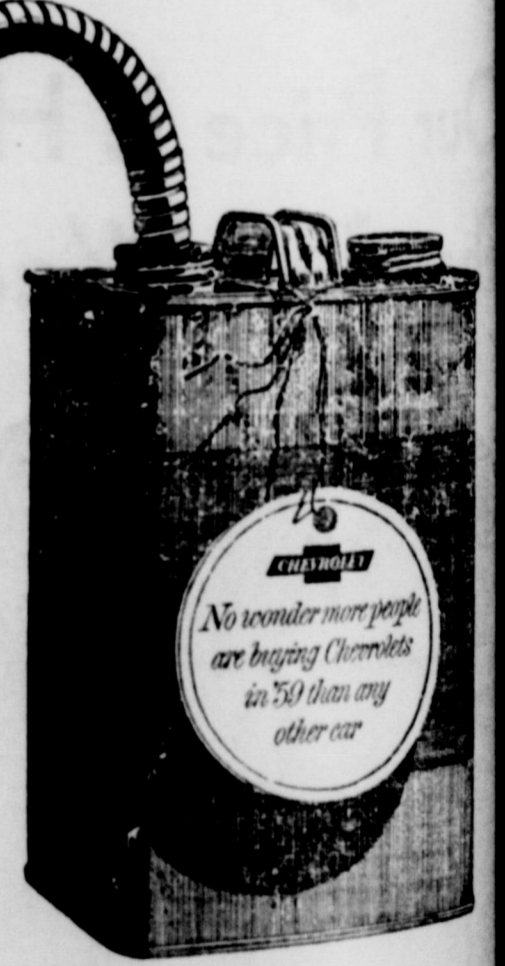

BEST STYLE
It's the only car of the leading low-priced 3 that's unmistakably modern in every line. "In its price class," says POPULAR SCIENCE

magazine, "Chevrolet establishes a new high in daring styling."

BEST BRAKES
In direct competitive tests of repeated stops from highway speeds, conducted by NASCAR, Chevrolet out-stopped both of the other leading low-priced cars—and why not: Chevy brakes are far larger, built with bonded linings, to help lengthen brake life by as much as 66%.

BEST ROOM
Official dimensions reported to A.M.A. make this clear. For example, Chevy front seat hip room is up to 5.9 inches wider than comparable cars.

BEST ENGINE
Every motor magazine has given Chevrolet's standard and Corvette V8's unstinted praise. As SPORTS CARS ILLUSTRATED puts it: "Indeed this device is surely the

most wonderfully responsive engine available today at any price."

BEST RIDE
MOTOR TREND magazine calls Chevy "... the smoothest, most quiet, softest riding car in its price class." You'll be able to tell this yourself, instantly. And your Chevrolet dealer can tell you about a long list of other advantages besides these 7 big ones!

LIBBY'S TOMATO JUICE FOR HEART-WARMING SNACKS

"Hot 'n hearty," this rich, full-bodied Libby's Tomato Juice is a wonderful pick up for many occasions. Good on a brisk morning, fine for after school, and ideal for an evening party served as we have pictured, with Libby's Deviled Ham sandwiches. Or, you could serve this same juice steaming hot in bouillon cups as a first course, or in soup bowls as the quickest "home-from-school" lunch. Some favorite garnishes for hot juices are: a slice of whipped lemon; a generous spoonful of Stuffed Olive; a slice of a large Libby's potato; a sprinkling of chopped chives; a few pieces of popcorn. Or, try conversation passing steaming mugs of juice, add a short stalk of crisp celery with a few leaves left at the top.

AND IT MAKES SUCH GOOD SOUPS!
Tomato Corn Chowder is hearty enough for the hungriest man, yet budget-wise. Only the goodness and body of Libby's Tomato Juice can make this chowder the satisfying soup it is. Put it in your file of main course soups.
Tomato Corn Chowder: Cook 2 slices bacon, diced, with 1/4 cup grated onion until bacon is crisp. Add 2 cups cubed, raw potatoes, 1 cup water, 1 1/2 teaspoon salt, and 1/2 teaspoon pepper. Cover and simmer about 30 minutes or until potatoes are tender. Add 1 cup drained Libby's Whole Kernel Corn, 2 cups Libby's Tomato Juice, and 4 tablespoons flour dissolved in 1/2 cup milk. Cook over low heat, stirring occasionally, until chowder is slightly thickened. Makes 1 1/2 quarts or 6 generous servings.

Simply add a few garnishes to the flavorful fruit and serve with pride. Your women's club will enjoy this glamorous party-food idea too—serve a favorite fruit salad dressing, hot rolls and plenty of steaming coffee as accompaniments.

Crushed Pineapple 'n Cottage Cheese: Arrange 1/2 cup drained Libby's Hawaiian Pineapple with 1 pt. creamed cottage cheese. Arrange mounds on salad greens. Garnish with a half maraschino cherry on the lengthwise.
Peach 'n Nut: Arrange Libby's Peach Halves on salad greens. Put halves of walnuts together with cream cheese and place in mounds of peaches.
Fruit Cocktail 'n Cottage Cheese: Arrange mounds of drained Libby's Fruit Cocktail on salad greens. Top with cottage cheese.
Whole Pear: Drain Libby's Pear Halves. Put two halves together with softened cream cheese. Top with cream cheese and walnuts. Stand upright on salad greens.

The luscious pineapple is ready-to-eat, just as it comes from the can, with all the flavor-packed goodness found only in pineapple grown and canned in the Hawaiian Islands.
This is the time to stock the kitchen shelves well with Libby's canned pineapple—sliced, crushed, chunks, tidbits, and juice. Use for quickie salads, a variety of desserts, and hot 'n broiled for a meat or fowl garnish.

For dessert "at ease," tangy red apple slices with your favorite cheese or a plate of cookies is all that's needed.

For thrifty menu planning, you can't beat Libby's canned foods because they provide such fine quality for so little money! It's wise to check your "home supply" of canned foods before shopping at the Green Thumb Sale. Then you'll be reminded to replenish any supplies that may be running low!

Cottage Cheese Makes Thrifty, Elegant Dessert

Call it Dutch, call it baker's or call it pot. By any name, cottage cheese is still the same fine milk product it was in colonial days.

Settlers from Holland and Germany introduced the art of making cottage cheese to this country. Their skill for making and using "Smearcase" has been passed down from generation to generation.

Here's one of their recipes that has become famous. It's called Dutch cheese cake. It's an inexpensive, but elegant dessert, calling for 1 pound cottage cheese, ¼ cup milk, 1/3 cup sugar, grated rind and juice of 1 lemon, 1 pie crust, ½ teaspoon salt, ½ cup chopped raisins, 3 eggs beaten and 2 tablespoons melted fat.

Bake the crust in a deep pan until a delicate brown. While it's baking, press the cheese through a fine sieve. Add first the milk, then the sugar and salt and the raisins; next the beaten eggs, melted fat, lemon juice and grated rind.

Stir until mixed well. Fill the baked crust with this. Bake in a moderate oven until firm in the center—about 15 or 20 minutes.

Cottage cheese is no longer confined to areas settled by the Dutch and Germans, for it is sold in every community in the country.
