On days when the heat is unbearable, people go to the lakes or beaches to be cool and comfortable. The cool breeze of the lake or sea shore is air in motion that has been cooled by the process of water evaporation. This same process is created by a Paramount Evaporative Cooler. The large squirrel cage blower continuously pulls outside air through wet redwood filters thereby lowering the temperature through evaporation of water in the filters. This cool, fresh, filtered air is then directed into the area to be cooled.

Some of the advantages of a Paramount Cooler are:

- Low cost of equipment, operation and maintenance
- Quick and easy installation
- Maximum comfort at all times
- 100% fresh, cooled, filtered air
- · Fresh air ventilation, without cooling, for spring and fall-just turn off the water

See the Paramount DeVille evaporative cooler at you WTU Showroom.

CARD OF THANKS

I wish to let all my friends bock school. in Cross Plains know that I

I do not choose to be a common man. It is my right to be uncommon ... if I can. I seek opportunity - not security. I do not wish to be a kept citizen, humbled and dulled by having the State look after me. I want to take the calculated risk; to dream and to build, to fail and to succeed. I refuse to barter incentive for a dole. I prefer the challenges of life to the guaranteed existence; the thrill of fulfillment to the stale calm of Utopia. I will not trade freedom for beneficence, nor my dignity for a handout. I will never cower before any master nor bend to any threat. It is my heritage to stand erect, proud and unafraid; to think and act for myself, enjoy the benefit of my creations, to face the world boldly and say: "This I have done." All this is what it means to be an American.
