### Lady is Drowned In California Jimmy Ogle, 19, son of Johnny Ogle of Austin, was accidently

drowned in a river near Mendocino, Calif., Sunday, Sept. 20.

Young Ogle and another youth were in the river when the swift current swept Ogle away. The cepted the invitation to meet at body has not been recovered. Memorial services were held in California Thursday, Sept. 24. Survivors include his father; a

brother, Danny Ogle of Fort Worth and a sister, Mrs. John Gardner of Austin. He was the grandson of and maintenance of the Community | Mrs. John Ogle of Hico.

### to Clairette in past years, the last Hicc FFA Chapter Elect Officers at **Recent Meeting**

The Hico FFA Chapter held meeting Tuesday, Sept. 22 to elect officers. Thirty-three members were present when Rickie Jaggars, Chapter President, gaveled the meeting to order. Each prospective officer gave his qualification and solicited support in a short speech. Questions were then di-

rected to those seeking the office of president, and the members had an opportunity to judge them by their response.

Rickie Jaggars, senior at Hico High School and son of Mr. and Mrs. Ralph Jaggars, was re-elected president. Jaggars received his State FFA Convention in San Antonio this summer.

In memory of Debbie Ann Richardson, writen by Mrs. Eunice Daniel:

Little Debbie Ann Has gone to be with God, We will miss her so while here below As on through life we trod. She's just a little angel In God's loving care, We expect to meet her Some day up there. We loved her during her short stay But Jesus loved her more And called her home as a little bud To bloom on heaven's shore, Dear Daddy and Mother, We would say, Trust God and look to him

For guidance along the way

## COUNTY AGENT By BILL MCCUTCHEON

Hybrid sorghum-sudan pastures, fast growing and excellent forage, can also be deadly, especially during the late summer and fall. The breakdown of the sorghum's plant material by its own enzymes results in prussic acid poisoning for the animals which eat the plant material.

The actual agent causing death is hydrogen cyanide, the same material used in state gas chambers for execution

There are two times during which poisoning occurs. After frost, where there is damage to the plants, high levels of hydrogen cyanide very common in the plants.

The second case is when plants perk up and begin fast growth after a very drouthy period during which the plants have burned up. The hydrogen cyanide is very colatile and therefore stays in the

## Our Area Development Department is ready to help

New business and industry mean new jobs . . . additional tax revenues . . . new dollars spent locally for goods and services. Attracting new business operations calls for teamwork. Local citizens interested in industrial development can count on the full cooperation of our Area Development Department. This department works closely with chambers of commerce, industrial foundations and other groups interested in community and industrial development. We want to do our part to help the cities and towns we serve grow and prosper. We think it is not only good business, but part of our citizenship responsibility.

## BOWLING ALONG ... By RUTH SALMON League Secretary

June Roberson took honors for the high game of the season for the ladies by whipping up a 216 for the Alibies against the Bowler Bears, where Wedge Turner whittled out a 199-209-545, ending with a 2-2 split.

The Hornets slipped into a tie for first place after defeating the Mixers four points. Gemini and the Good Guys had close games, with Gemini edging them for four points as Glenn Ross turned in a 192-523 and Jeanette Warren defended herself with a 142 game.

The Road Runners crowded the Chokers for four points. Marlene Kilgo rolled a 165 game.

Joe Tooley, bowling for the Jets zoomed up a 165 game against the Operators for a 2-2 split, as Charlie Dayton sneaked in a 172-173-490.

I have mentioned TAM Winter-

green Hardingrass in my column

many times in the past two years

and with prime planting time here

This perennial wintergrass has

been impressive and is growing in

popularity. It is not a wonder

grass, but it does fit in well with

many farm and ranch programs.

It provides grazing at a time when

it is needed most and unlike small

grains it does not require land

preparation and re-seeding each

TAM Wintergreen Hardingrass is

adapted to black and Grand Prairie

soils (land where oats does well). Its suitability for sandy soils has

not yet been fully determined and is not satisfactory on cold or

vear

I would like to mention it again.

"Where Customers Send Their Friends"

tight land that. tends to waterlog or puddle when wet or cement when dry.

For planting, a well prepared firm hard seedbed is desired. The land should be plowed several months before planting and only shallow cultivation to destroy vegetation is recommended just prior to seeding. Avoid planting on loose seedbed following deep cultivation. Plant seed about half inch deep and then firm soil with a roller or culitpacker. One pound (PLS) should produce a stand on 36-40 inch rows; but for grazing, 3-5 pounds broadcast seems preferable. Early planting (Sept. 15-Oct. 15) should encourage fall growth and reduce the chance of freeze damage. Planting after Nov. 1 is risky because of freeze damage on the young plants.

Fertilize about like oats. Use unbalanced material early in the fall on estabished grass and top dress with 40-60 pounds of actual nitrogen in the late winter. Control weeds with 2,4-D when needed after the crowns form.

It would be unwise to plant on land where you could expect heavy competition from volunteer small grain or rescue grass.

Several local producers have seed available and weather conditions are favorable for planting. If you have questions on this

grass I will be happy to discuss it with you.

5

Medical historians trace origin of modern medicine to the Greeks. During the golden age of Greece Pharmacy was closely related to medicine. Physicians did much of their own compounding and dispensing.

The ancient Egyptians worshipped Anepu-the Apothecary of the Gods. In fact it is thought that the science of Chemistry originated in Egypt and they knew the art of embalming and the methods of preservation.

Monarchs of Arabia encouraged Pharmacy in the sixth century. Frederick II issued the "Magna Charta" of Pharmacy profession. The first Apothecary shop in America served Philadelphia in 1729.

Today there are approximately 117000 Pharmacists in America. Any Pharmacist is dedicated to be of service to any person needing medication-At any hour day or night.

We believe this service is unsurpassed at Howard Drug

Painting, Textoning

No job too large or small for equipment and

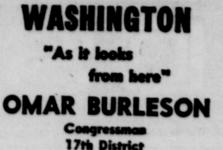

Washington, better. There is, however, concencost, the overcrowding of facilities, and shortage of technical help their community. connected with illness, more people are receiving better care than ever before. But there are deficiencies which still have to be met for certain hospitals to qualify under the Medicare Program.

Special efforts are being directed to providing better nursing care. nursing homes to be found anywhere but from reports there are also some pretty had ones.

One of the great unanswered challenges is the shortage of nurses and yet small hospitals in many of our small towns are being denied medicare benefits because they do not have, and cannot afford to have, at least one registered nurse on duty for each 8hour shift.

Many of our older and smaller hospitals do not meet the safety standards set by regulations under the Medicare Program. In many instances these physical facilities can be improved to the extent of qualifying but no one wants to spend the money necessary if they are unable to have at least three registered nurses on duty ov- introduced legislation to amend the er a 24-hour period.

In Texas alone there are some 170 hospitals which may have their, er in-patient beds from the remedicare benefits terminated if quirement of full 24-hour registered they have to comply with the un- nursing services and his legislation bending strictness of the rules and also calls for the relaxation of such regulations laid down by the Department of Health, Education, intitutions having fewer than 50 inand Welfare. Like most, if not all, natients, as requiring an autopsy Federal programs administrators being performed on 20 percent of must "go by the book" but the deaths occurring in such hospitals.

D.C.-The national book itself, in the form of rules health crisis has been discussed and regulations, is forcing the closheretofore and from all indications | ing of some small town hospitals. it may get worse before it gets This means that elderly patients would have to go to a hospital lotrated attention being given to meet cated in some larger town. Elderthe situation. In spite of the high | ly patients accustomed to local care just simply don't want to leave

Everyone agrees that any hospital or nursing home should have the best and most modern care available but when regulations and rules leave no hospital at all people are understandably upset. There should be more time for modernizing buildings to meet pro-We probably have some of the best per safety standards but under the rules this still leaves the requirement for nurses.

Licensed vocational nurses do a very fine job and could well, under the general supervision of doctors and registered nurses, fill the

practical needs. There is an area for common sense to be provided and particularly until reasonable deficiencies can be met. A hospital less than two years old in South Texas faces

the prospect of being denied admittance to the Medicare Program because of the requirement of equipment which probably will not be used and lack of nurses which it cannot obtain.

NOTE: Congressman Omar Burleson's staff advises that he has Social Security Act which would exempt hospitals having 50 or few-Church other requirements when applied to

# Now all your U.S. Savings Bonds pay higher interest.

### Now it's official.

Now one of the safest investments in the world brings you new and higher returns.

Now your U.S. Savings Bonds pay the highest interest in history: a full 5 per cent when held to maturity of 5 years and 10 months. (4% the first year; 5.20% thereafter to maturity.) Previously, these Bonds earned you only 41/4% if you held them for seven years.

The new interest began June 1, 1969. So all of the Bonds you own, no matter when you bought them, have been collecting higher interest since that time.

Those Bonds are still replaced if lost, stolen or burned.

You can still buy them through Payroll Savings or the Bond-a-Month plan.

Regardless of your other invest ments, can you think of any easier, better, or safer way to build a nest egg for yourself?

It's nice to know that you are doing a little something for Uncle Sam, too. The \$52 billion in U.S. Savings Bonds now outstanding in the hands of millions of Americans go a long way toward keeping your country financially strong.

There never was a better time to take stock in America.

There's a man at the place where you work who can start you on the Payroll Savings Plan right now.

Bonds are safe. If lost, stolen, or destroyed, we replace them. When needed, they can be cashed at your bank. Tax may be deferred until redemption. And always remember, Bonds are a proud way to save.
