

# Raiders Take On Aggies In Coliseum Tilt Tonight

—Story On Page 6

## Tech Fraternities Win Trophy

The Interfraternity Council of Texas Tech now has in its possession a beautiful trophy signifying scholastic achievement, as can be seen in the photo above.

Every Tech fraternity currently has a higher overall grade point average than the all-men's average here. As a result, Tech's IFC was one of 27 universities across the nation to receive the Cumme Sum Laude award from the National Interfraternity Council.

It marked the second straight year for Tech to win the award. Last year 25 awards were given.

"I think it is a wonderful honor for such a young system," said Pete Feather, Tech IFC president and shown with the trophy. "There has been a lot of emphasis put on scholarship by the fraternities. They really deserved the award."

## Inter-Conference Letter Plan Nears NCAA Consideration

Final decision concerning the proposed inter-conference letter of intent will be made at the annual convention of the National Collegiate Athletic Assn. in Los Angeles Sunday.

Dr. J. William Davis, Tech faculty athletic representative to the Southwest Conference, will leave today to attend the session. Davis said representatives from all interested schools will meet Sunday afternoon to discuss the proposal.

Final decisions will be made at that time. Davis will later announce the results to the convention.

The letter of intent, initially promoted by Davis, is designed to provide stability in college athletic recruiting.

Under its terms, athletes would be required to select the school they plan to attend by May 15. This would prevent last minute recruiting and "pirating" by cooperating schools.

"As it is, the schools don't

know until the last minute who will show up in the fall," Davis commented.

The Big Eight and SWC have already agreed to honor letters of intent from both conferences. The main difference of opinion among the other conferences concerns the May 15 deadline.

"Some want it earlier, some later. However, several other conferences are expected to accept the proposal at the convention," Davis said.

## After 3-Hour Tour

# Connally Praises Tech Park Plans

By BILL HEARD  
Treador Copy Editor

Governor-elect John Connally had nothing but praise Friday for recommendations on renovation plans for Texas' state parks systems presented him by Texas Tech's park research team.

During his three-hour stay on campus, Connally commended the research staff, directed by E. J. Urbanovsky, head of horticulture and park management, for its work on the \$70,000 two-year study. He called it the first project of its kind carried out by a college for the state.

"You are setting a pattern," he told the assembled team at the close of the presentation, "for the kind of job that can be done by an educational institution for the state. You are building the framework of a plan that reflects the growth of Texas and of this area."

Arriving in Lubbock by private jet, Connally was greeted by Urbanovsky and his staff, Tech President Dr. R. C. Goodwin, members of the Tech Board of Directors, Lubbock Mayor Jack Strong and newsmen. He was accompanied by Lt. Gov. Preston Smith and Rep. Bill Walker of Cleveland.

A quick trip from the airport brought the party to the Aggie Memorial Auditorium for the first half of the presentation—a narrated color slide series depicting the present condition of Texas parks, needed improvements and their costs and the effect these improvements will have on the economy of the state.

Connally displayed particular interest in the economic gains that could be produced by a progressive parks system in Texas. He had expressed interest in plans for park improvement in hopes of encouraging tourist travel in the state. This portion of the study drew several questions from him.

Connally was told it will cost between \$400 million and \$500 million to rebuild and rejuvenate Texas State Parks. The amount, he commented, probably could be recovered quickly through increased

tourist trade at the historical and recreational sites.

The second segment of the program was covered in a display set up in the old dairy barn. Connally stressed the effectiveness of the display and asked if it could be set up in the state capitol building during his inauguration Jan. 13. Urbanovsky said the display is still unfinished but plans to complete it in time for a visit to Tech by state legislative members in February.

The display is a departmentalized study of the parks project in highlighted form. Categorized into historical, unique attractions, biological, chemical and geographical units, it points out the varying attributes Texas has in the way of potential recreational sites. It combines color pictures, graphs, three-dimensional maps and forms into an overall picture of the project.

Asked whether he expected any problems in getting Tech's parks recommendations through the legislature, Connally anticipated little trouble.

"I have never seen a time when the Legislature had more willingness to work toward the ends of this plan," he said in stressing the cooperative spirit of the body.

At one point of the tour a Faculty Club luncheon planned for Connally was mentioned.

"I'm interested in this project," Connally interjected. "I'd rather stay here and learn about it, unless you have something I'm supposed to do."

He was allowed to stay.

## Interest ...

With eyebrows arched and eyes fixed with whole-soul attention and interest, Governor-elect John Con-

nally obviously sees something very special in connection with the Texas park renovation research project shown him at Tech Friday. To catch his other moods, turn to Page 5.

# To Santa Fe Club Plans Annual Ski Trip

By BRONSON HAVARD  
Asst. News Editor

Tickets go on sale Monday in Tech Union for the mid-term ski trip sponsored annually by the Tech Ski Club.

Mike Stinson, Club president, announced that this year's trip will be to the Santa Fe ski resort Jan. 26-29.

"The Rocky Mountain ski areas have the finest snow for skiing in the world," Jim Schiermeyer, faculty sponsor, commented on the selection.

### Trip Costs

The tickets are \$50. The cost of round-trip transportation by chartered bus, meals at the resort, lodging at the Holiday Inn, in Santa Fe for three nights, skiing equipment, lessons, entertainment, and membership in the Tech Ski Club are included.

Professional skiing instructors will give lessons according to experience of the skier. Entertainment will be provided by the Four Teens, a Tech group who will accompany this year's skiers. "I say 150 students will go on the trip," Stinson predicted.

### Ski Lessons

Two dollars of the cost are for membership in the Tech Club which provides a dry-land ski school with beginner and intermediate lessons given by Kenny Ballard and John Passow, both

senior members of the club from Colorado. The Club also will give instruction and general tips on clothing and other special requirements for skiing.

Tech was the first Southwest Conference school to have an official ski trip, and at present Texas Christian University is the only other SWC school that plans a ski trip.

Schiermeyer said that the Tech Ski Club was organized in 1955 to introduce novice skiers, who are called snow bunnies, to a well

planned skiing trip sanctioned by Tech to help round out the social calendar.

### Snow Queen Elected

On each trip since 1955 Stinson said that it has been a tradition to elect a Snow Queen and present her with a trophy. Forty members went on the first trip and last year 125 Techsians attended.

Schiermeyer said that the Club and the ski resort take extensive safety precautions. "For the past three years we haven't had a single injury," he commented.

"As far as accidents are concerned we have a lot of 'busted' pride, but no serious accidents," he added.

### Trip Tickets

Techsians interested in the trip may obtain tickets at the ticket booth in the Tech Union from 2-5 p.m. Monday, Tuesday or Wednesday. If there are any conflicts tickets may be obtained by calling Stinson at Ex. 3796 or Christi Brown, 4442.

"We will leave after the final test on Saturday and will arrive back in time for registration at 1:30 p.m. Tuesday. If this causes a conflict for anyone, they should contact Mike or Christi," Schiermeyer said.

The faculty sponsors besides Schiermeyer are Edsel Buchanan, director of intramural sports; Ruth Cowart, government instructor; and Ara Sullenberger, mathematics instructor.

There will be a general meeting of all attending the trip Jan. 8 at 7:30 p.m. in the Union Ballroom.

# Association Taps Tech

Tech has been elected as a member of the Association of State Universities and Land Grant Colleges, according to Chancellor John T. Caldwell, chairman of the executive committee for the association.

Until 1961 the association, oldest U.S. organization of institutions for higher education, had confined its membership largely to land-grant universities and colleges. However, the group voted in 1961 to modify its constitution to provide for gradual selective expansion to include other major public universities and colleges.

Membership now consists of 74 major, multi-purpose colleges and universities located in all states and Puerto Rico.

"Texas Technological College considers membership in this association an honor and privilege," said Dr. R. C. Goodwin, Tech's president.

"We trust that our election reflects the quality of work performed at this institution," he continued. "Membership in the association will provide still greater opportunities for improvement of our instruction and research."

Election to the association includes nomination by a member university, recommendation of the association's executive committee, and election by two-thirds of the association's governing senate, which includes heads of all member institutions.

The association maintains headquarters in Washington, D.C., provides an information service on national matters affecting higher education, and takes common policy positions on major problems of higher education.

## Write Now - Save Penny

A word to the wise for the thrifty Techsan this weekend would be to write, write and write. After midnight Sunday, that letter home will cost five cents.

For a nickel, the U.S. Post Office will sell a first class postage stamp and, for three more pennies, an air mail stamp.

Tech post office officials said the postage hike effects only postal cards and first and third class mail. Postal cards will cost four cents and air-mail postal cards will be six cents.

## Freda McVay Fills PIO Post

Mrs. Freda McVay, 1962 Tech graduate, replaced John Ropollo this week as informational representative of Texas Tech's Public Information Office.

Ropollo, who had been at Tech since November 1961, resigned his post to become public relations director at St. Paul's Hospital at Dallas.

Mrs. McVay received a B.A. degree in journalism last spring. At Tech, she was TOREADOR copy editor; president of Theta Sigma Phi, women's journalism society; editor of two Lubbock county club magazines; vice president of Town Girls Club and a member of Sigma Kappa sorority and Young Democrats.

## To Area Cotton Industry

# Textile Study Means Money

By MARY LOU WATSON  
Toreador Staff Writer

Tech's textile research laboratories in the past three years have pumped \$75 million into High Plains economy.

This fact was revealed by Bill Crumley, associate director of the research program.

The initial purpose of the project, organized in 1959 — known as T.R.L. — was to eliminate prejudice against West Texas cotton, asserted Crumley. Cotton mills considered area cotton second rate, stemming from the time only short staple cotton was grown in the area, he said.

### T.R.L. Gets Results

Crumley and his staff got results in short order. In 1960 they found that yarn made from light-spotted cotton was equal in performance and quality to that made from higher grade cotton.

This information was supplied to Plains Cotton Growers, Inc., one of the organizations which supports T.R.L. From there the facts went to Congress.

### Split Grades Supported

In the next legislative farm program, split grades were properly supported. "Congressmen said that these results had a distinct bearing on their decision," Crumley said. "This has meant approximately \$21 million to High Plains cotton producers."

At present there are seven major projects underway at T.R.L. covering a wide range of research related to cotton production and the textile industry.

One series of tests is designed to reveal effects of fertilizers, insect sprays and other chemicals

on the spinning performance of Texas cotton.

### Ginning Techniques

T.R.L. facilities, located in the Textile Building, include a pilot spinning plant and fiber and chemical labs. The pilot plant is actually a small-scale textile mill

capable of performing all functions of a modern textile mill except mass production.

The plant's area of 12,000 square feet is divided into four large rooms. Each room is equipped for some phase of the basic processing

operation and has its own humidity and temperature controls.

### Atmospheric Conditions

"Atmospheric conditions for any stage of processing may be selected to meet the needs of the research project in progress," Crumley said.

## We All Got Back!

Chugging thriftily along highways 199-82 from Fort Worth Wednesday in an overloaded and asthmatic Microbus at the frantic speed of 35, the writer was passed by what seemed to be at least half the cars registered on Tech campus.

He was impressed by the discretion of the drivers.

Only very few succumbed to temptation to overtake the laboring Volkswagen in no-passing zones. Only very few were exceeding the legal speed limit. Only very few could be seen to violate any of many traffic laws.

This is why a happy-sounding administrator could say to the writer: "Yes . . . we all got back this time . . . for the first Christmas in a long time."

*We all got back!*

Of course the factors involved in an such success must be myriad—at least as many as a thousand times the number of drivers involved—but for every *conscious* decision made with safety first in mind, Techsians are congratulated. The safety-first decisions must have outnumbered by far the careless ones.

A factor undoubtedly operating against carelessness was the splendid effort of the Student Traffic Safety Committee and its TACSOR program.

The long, dangerous, congested 280-odd miles of road from Dallas and Fort Worth contained as much—and probably more—Tech traffic as any other in the state.

*The writer didn't see any accidents along the way.*

How different from a dark forty-mile stretch of rain-slick roadway going into New Orleans along which he saw three major collisions accompanied by canvas-covered forms and shrieking ambulance sirens.

*But we all got back!*

Thanks to every driving Techsan for making Operation Roundtrip one-hundred percent successful!

—B.M.

### NEWSMAN'S PREROGATIVE

## New Year's Events Predicted

By CHARLEY RICHARDS  
Toreador Managing Editor

One reason newspapermen like to see another year roll around is that it gives them an excuse to try their skill at predicting what will happen during the next 12 months.

With a whole year to choose from, topics of discussion are almost unlimited.

If we miss the boat on one prediction, chances are in our favor that by next January nearly everybody will have forgotten it.

On the other hand, if we happen to guess right, everybody will remember it . . . because we'll remind them.

With that in mind, here's our preview of 1963. We predict that:

### It's All In A Night's Work

Below in its entirety is the summary of a daily report handed to his superiors by campus patrolman Ken Holleman:

- 11 p.m. Holleman on duty
  - 11:15 Holleman to Toddle House
  - 11:30 Holleman back on duty
  - 12 Justice on duty
  - 12:10 Checked the farm
  - 12:30 Locked Post Office
  - 1:30 Checked X-13
  - 3:00 Checked the farm
  - 3:50 Toddle House
  - 4 Back on duty
  - 5:10 Turned off outside lights
  - 5:45 Unlocked Post Office
  - 6:10 Back at Office
  - 6:11 Heard noise in chief's office, found mouse in waste basket, killed same.
  - 7:00 Holleman off duty
- Justice prevails?*

1. Enrollment at Tech will surpass 10,000 this spring for a new record, with 12,500 registering in September.
2. The year will go by without a fraternity being fined by the IFC.
3. The Red Raiders will register no worse than an 8-6 mark this season in Southwest Conference basketball play and will finish fourth.
4. There will be no Tech Union - sponsored dice tournaments this year.
5. Tech's Board of Directors will be delayed a year in the attempt to get the okay on a law school here.
6. The Picador cagers will go through the season undefeated with Coach Charley Lynch's biggest trouble coming when he tries to decide which five of his players are the best.
7. The cokes and hot dogs that now sell for 15 cents and 35 cents respectively at Tech ball games will not be sold at higher prices this year, although smaller cups or shorter buns may be used.
8. At the end of regular season play this fall Tech will sport a 7-3 football record and will have four players on the top two all-SWC teams.
9. A campus election will be held before the end of the year to see how Techsians feel about athletic integration here, and that a majority of the students will vote in favor of it.
10. The next time Southern Methodist brings its red-shirt-clad boosters to a football game here they will make sure there is a gate in the fence in the end zone before they start switching banners.
11. The Board of Directors will okay a contract to build separate athletic dining facilities.
12. Texas Tech will not compete in SWC baseball competition this year, or the next.
13. Techsians will continue to complain about the campus parking problem until the only practical solution will be taken: freshman and sophomore cars will be banned from campus. And then the same Techsians will really complain—in vain.
14. Tech Union will open its doors at 7 o'clock sharp at least half the mornings this semester.
15. The name-change proposal will come up again, with each of at least 10 names favored by some influential group on campus.
16. If a wallet-snatching thief comes to Tech this year, he will not go to Gordon Hall, and that if he does, he won't take a flashlight with him.

## Exam Schedule

<b>SATURDAY, JAN. 19—</b> 8-10:30—9 TTS 11-1:30—3 MWF and Saturday classes only 2-4:30—All sections of English 131. Room numbers will be announced in respective classes.	ernment 234. Room numbers will be announced in respective classes.

# Raiders, Aggies Battle Tonight

## Tech Hosts 32 Prep Grid Athletes Today

Thirty-six football prospects from Texas and New Mexico high schools will be visiting the campus this morning to inspect Texas Tech's athletic facilities and program.

San Antonio's five representatives top the list, with John Ayent, Eddie Woodlee, Bill Woodlee, George Davis, and Rick Jones all hailing from the Alamo City. Nick Harries, Gary Howell, Phillip Paris and Ronnie Pack of Odessa, and Gary Duffield, Charles Ivy and Chuck Gibson of Albuquerque are the out-of-state representatives.

Others are David Childers and Leslie Hudler of Victoria, and Donald Haynes of Pleasanton.

Included are Richard Lagow, Dean Ferguson, and Don Ferguson of Dallas, Billie Stewart of Grand Prairie, Steve Overton, Jimmy Carr and Mark Fry of Hurst, and James Biggers, Rusty Workman and Alvin Hartz of Arlington.

Others are Quentin Reynolds of Hutchins, Prentice Preston of Lancaster, Jim Slaughter and Chauncey Marsell of Ballinger, Joe Sherrill and Richard Bridges of Irving, and Gilbert Coates of Amarillo.

The visiting athletes will be guests of the Texas Tech athletic department tonight at the Texas Tech-A&M basketball game at the Municipal Coliseum.

★ The Toreador ★  
**SPORTS**  
January 5, 1963

## Army, AF Cage Teams Vie Monday

An inter-service rivalry will be initiated on the Tech campus Monday when the Army and Air Force ROTC take the intramural gym floor at 7 p.m. for the branches' first basketball contest.

Royal Furgeson will spearhead the Army offense while George Metcalf will lead the Air Force blue on the court. Both squads have been holding workouts for a couple of weeks in preparation for the unprecedented event at Tech.

Serge Chernay, Air Force wing controller, was instrumental in the organization of the game and hopes the contest will lead to a standing rivalry between the two ROTC branches.

Both Air Force and Army officials urge attendance by the entire corps of both branches. Chernay stressed Friday that all corps members attending the game wear uniforms.

"We hope to have a good attendance, and if the response is favorable, more rivalry between the two corps will begin," said Chernay.

By JIM RICHARDSON  
Toreador Sports Editor

Almost every school in the Southwest Conference has its own version of that familiar melody which says something about "We are the Aggies, the Aggies are we."

Tonight at 8 p.m. in the Municipal Coliseum Tech's Red Raiders tangle with those same Aggies from Texas A&M in the second Southwest Conference cage battle for both clubs. And in the meantime the Raiders are collaborating with their leader, Gene Gibson, trying to compose a Tech original which says something about "We beat the Aggies, the Aggies we beat."

Right now only five measures are endangering that latter version from making the top 10 — the Aggie starting lineup. Two of the Farmers to see first action against Tech tonight, Bennie Lenex and Lee Walker, tossed in 17 points

apiece in A&M's 80-54 conquest of Baylor Thursday.

### They've Got Giants

Another giant wearing the maroon of the cadet corps from College Station, Lewis Qualls, failed to make the double digit mark scorewise against the Baptists. However, the seven-foot senior paced all Aggie scorers in the Lubbock conference game last year.

Tech will rely on the same starting five that were responsible for the uproar on campus Thursday night resulting from the Raiders' triumph over Texas Christian University. Bill Murren, Harold Denney, Bobby Gindorf, Sid Wall and Glen Hallum will be the first Tech congregation to test the Farmers' strength.

### Season Records Opposite

Texas A&M brings an 8-2 season record into the Coliseum, contrasting sharply with Tech's 1-8 count (technically 1-7). But as far as any conference member

cares, both the Raiders and the Aggies are 1-0 and leaders in loop play along with Texas and Arkansas.

The bookies say that A&M's War Hymn will drown out anything Tech has to offer. But according to the Raiders' minute Mike Gooden, you can always put a new twist into an old song. More than 10,000 fans will find out tonight firsthand if the Tech quintet is as original as it was Thursday.

BILL MURREN

## Challenge Bowl Opens; Lovelace Starts At QB

CORPUS CHRISTI (AP) — The Southwest, which has been bragging for years that it had the best football in the country, will get the chance, in a modified way, of showing it here Saturday.

A squad of 27 will face a squad of 26 from over the nation in the first Challenge Bowl.

The Southwest squad is led by such stars as Jerry Mazzanti, Arkansas tackle; Jesse Branch, Arkansas halfback; Lee Roy Caffey and Sam Byer, the double full-back punch of Texas A&M.

Moore has a damaged leg and may not be able to play but the Southwest still will have two quarterbacks since Johnny Genung of Texas was brought in at the last minute to back up Johnny Lovelace of Texas Tech.

Southwest Sports Inc., headed by Ken Jackson, former Texas star tackle, is promoting the game scheduled for 1:30 p.m. CST in Buccaneer Stadium where 18,000 can be accommodated.

AGAINST C&I LIFERS

# Picadors Roam Again

By BARRY BROWNE  
Toreador Sports Writer

Mac Percival and Roger Hennig, two of the starters on last year's Southwest Conference champions from Texas Tech will appear in the Coliseum again tonight, but this time on the other side of the fence.

They'll be wearing the uniforms of C&I Life of Lubbock, the team which will oppose Tech's Picadors in a 6 p.m. contest prior to the Texas Tech-Texas A&M tilt.

C&I Life replaces Sayre County (Okla.) Junior College as the Picadors' opponent. Word was received in Lubbock Friday that a flu outbreak coupled with a theft of the team's uniforms caused the Oklahoma school to cancel its appearance.

Other C&I players will be football player Jerry Elbert and former varsity cager Bob Boulden.

There will be other similarities between tonight's game and last year's contests, best described by the phrase "Mutt and Jeff."

Most likely to recognize the similarity will be the Red Raider fans who jammed the Coliseum last year to see Tech, led by 5-10 Del Ray Mounts, and 6-10 Harold Hudgens, cop a share of the SWC basketball championship.

The striking similarity becomes apparent when 5-11 Dub Malaise and 6-8 James Adams, the top two frosh scorers, begin to mesh the cords for the undefeated Picadors. For, as the Mounts-Hudgens combo was the basis for the championship varsity club, the Malaise-Adams duo has provided the spark

for the powerful Picadors, class of SWC freshman basketball.

Malaise, like Mounts, is "Mr. Outside," popping jumpers and set shots from all over the court. Adams, "Mr. Inside," is a powerful rebounder as well as an ever-present offensive threat—as was Hudgens. A Midland product, Adams uses his 6-8 height to best advantage, and has the talent to come up with the ball amid a flurry of elbows.

Malaise, already hailed as the next great "little man" in SWC cage circles, has tallied 83 points in 3 games for a 27.7 average. His scoring efforts include a 36-point night against Lubbock Christian—tops for the Pics. However, his "take-charge" attitude and hustle have been just as important in making the Pics a strong squad.

Adams, who teams with Norman Reuther of Fort Worth Arlington Heights to provide a devastating rebounding combination, is second on the scoring list with a 13.4

three-game average. Reuther, who adds impressive scoring ability to his rebounding credentials, is third with a 10.4 average.

Rounding out the starting five for frosh coach Charley Lynch will be Dave Olsen of Las Cruces, N.M., and Russ Wilkinson of Lubbock Monterey. Olsen has posted a 9.4 scoring average, while Wilkinson has set a 6.0 pace.

THE TALL AND THE SHORT OF IT—Texas A&M's Charley Minor (5-10) and Lewis Qualls (7- 0) show the variety the Aggies employ on their basketball tours this year. Qualls is the tallest Southwest Conference cager. The big center was high-point man for the Farmers against the Raiders last year in Lubbock. The above photo was taken during the Aggies' practice session Friday afternoon in the Coliseum.
