

CRITICIZE WILSON FOR NEGOTIATIONS IN ADRIATIC FUSS

WASHINGTON, Feb. 28.—While the president was considering today the latest note of the allied premiers on the Adriatic controversy, sharp criticism of the executive's course in the negotiations broke out in the midst of the peace treaty debate in the senate.

Not only the irreconcilable opponents of the treaty but some of the mild reservationist republicans, Senator Kellogg of Minnesota, joined in the senate attack which occupied a good part of the day's session to the exclusion of the pending resolution affecting an entirely different part of the treaty. A general defense of the president was made by Senator Hitchcock of Nebraska, the administration leader.

It was indicated that Mr. Wilson would not long delay his reply to the allied note, which was said to have invited the United States to join in attempting a settlement acceptable to both Jugoslavia and Italy. The reply was expected to go forward early next week, but officials were guarded in their discussions of its probable contents.

The senate discussion revolved around assertions that the disagreement demonstrated concretely the foreign complications which would follow America's entrance to the League of Nations and that the president was seeking to interfere in the affairs of other nations without making any effort to learn whether the people of this country were behind him.

Senator Thomas, democrat, Colorado, one of the treaty irreconcilables, went so far as to suggest that the only way out now seemed to be a war in which the United States either must participate or else be placed in the position of refusing to back up the positive stand taken on behalf of the nation by the president.

The whole situation was characterized by Senator Kellogg as "rather distressing to friends of the treaty." He declared the Adriatic controversy "was none of our business" and that the president's attempt to "dictate" a decision was without justification.

INTO MEXICO Arizona Deputies Start After Bandits Who Killed Yank

NOGALES, Ariz., Feb. 28.—Deputy Sheriffs from Santa Cruz county and a posse from Tucson with bloodhounds, crossed the international line into Mexico tonight in pursuit of the bandits who killed Alexander Fraser, and shot his brother, J. A. Fraser, in a raid yesterday on their store at Montan Camp.

General M. M. Diequez, the new military commander of the state of Sonora, accompanied by the Mexican counsel here and Alberto Figueroa, mayor of Nogales, Sonora, called this afternoon on Francis J. Dyer, American consul at Nogales, Sonora, and expressed regrets over the killing. They promised full co-operation with American civil and military officers in hunting down the bandits.

Troops Out

The posse is on the trail of a man known as Estelito Lara and a companion and is headed for a point called Sycio in northern Sonora. Troops from Camp Stephen D. Little have been sent to the scene of the killing.

Was Mining Engineer

The body of Alexander Fraser was brought here this afternoon. He was 53 years old and one of the best known mining engineers in the western part of the United States and in Mexico. He was a member of the Institute of Mining Engineers of New York City. He was a part owner in the Geneva Times of Ithaca, N. Y., and with his brother-in-law, had a large mining interest in Santa Cruz county.

John A. Frazer formerly lived in Salda, Colo. He was associated with the slain man in the mining business.

EXPECT FINAL VOTE UPON PEACE TREATY BEFORE WEEK'S END

WASHINGTON, Feb. 28.—Another day of oratory and maneuvering in the senate ended tonight with virtually all elements in the treaty fight agreeing that ratification seemed far away.

Getting down to rock bottom in their calculations, the leaders are understood to have agreed that, unless some unexpected circumstance alters the senate alignment, enough votes can not be brought together to either modify the republican article 10 reservation or secure ratification of the treaty without such a modification.

In this situation a disposition became apparent among the treaty's friends and foes alike to bring the senate debate to an end, and let the issue go undecided into the political campaign.

By unanimous consent it was agreed to vote Monday on the reservation which has been pending two days, and in some quarters it was predicted that a final vote on the treaty itself would be reached before the end of next week.

The determination of the administration democrats to fight to the last ditch for their position became more marked during the day's conference and in some quarters it was intimated that they had heard again from the White House regarding article 10. The party leader, Senator Hitchcock of Nebraska, said no news communication on the subject had come through him, but added that he had no reason to believe the president had changed his mind.

As one result of the situation the administration forces and the irreconcilables, who have been arch enemies throughout the long treaty controversy, have been thrown together in interest and through their leaders are understood to have agreed to keep in close touch during next week's maneuvering. They did so today, Senators Hitchcock and Borah, republican of Idaho, a leader among the irreconcilable group, holding frequent consultations.

In the same way the break between Senator Hitchcock and the mild reservationist republicans, with whom he has worked for many weeks for a compromise, was brought to an open breach during the day's debate. In sharp clashes with Senators Kellogg, Minnesota, and Lenroot, Wisconsin, both of the mild reservationist group, the republican leader declared that while they had posed as friends of the treaty, they had worked up "contemptible" means to line up the republicans for destroying reservations.

WILSON SIGNS RAIL BILL; ROADS RETURN MONDAY

President Believes Way Open to Harmonious Pay Settlement.

WASHINGTON, Feb. 28.—President Wilson signed the railroad bill tonight, on the eve of the return of the roads to their owners and to private operation.

In a proclamation issued at the time the bill was signed, Mr. Wilson vested in Walker D. Hines, director general of railroads, virtually all powers conferred upon the executive by the bill. Mr. Hines will also continue to exercise the duties of director general which continued beyond the return of the roads to private control at midnight tomorrow night.

Announcement of the signing of the bill came after officials had become convinced Mr. Wilson did not intend to act tonight, although they were certain he would not permit the measure to become a law by the expiration of the 10-day limit allowed for presidential approval or veto of an act of congress.

There were indications that the president's action on the bill was delayed pending his completion of his reply to the brotherhood heads.

"It was manifest," the letter continued, "that if the bill should become a law, the negotiations and consideration of the wage matter ought to proceed in harmony therewith."

"The bill having now become a law the way is open for immediate action on the wage matter in accordance with the terms of the bill. Section 301 of the bill evidently contemplates that the carriers and employes should, as suggested by you, select representatives who will negotiate with a bipartisan board for the purpose of attending by conference to agree upon a solution of this wage problem."

"In accordance with the assurance I gave last August and repeated in substance in my letter of the 13th instant, I shall at once request the board to employ to join in this action. I believe such a step will go far toward clarifying and maturing the subject for final disposition. In fact the sort of board thus contemplated by section 301 appears to be an appropriate substitute for the committee of experts which has heretofore suggested and indeed such a board will be authorized to go further than such a committee could have gone."

"I can not share the apprehension of yourselves and your constituents as to the provisions of the law accepted by the labor board. I believe those provisions are not only appropriate in the interest of the public which after all is principally composed of workers and their families, but will be found particularly in the interest of the railroad employes as a class."

Inevitably Mr. Hines with the powers granted to the president by the bill, Mr. Wilson made one exception. The president will himself name the agent or agency of the government against whom suit may be brought to satisfy claims arising out of government control of the railroads as provided in section 204 of the act.

At 12:31 a. m., Monday, the government will hand over to their owners 240,000 miles of main line railroad and terminals and equipment valued at approximately \$20,000,000,000, over which its direct authority has been extended since December 28, 1917.

The properties will go back leaving the government with a deficit of \$715,000,000 for its 26 months of operation. But while the deficit appeared large, "federal operation has cost the public considerably less under the best conditions through rates and taxes, that would have been the case under private control," Director General Hines declared in a resume of government control.

Mr. Hines believed that both the nation and railroads gained benefits of a lasting character from the period of unified operation. "In addition to better terms which he believed had been accomplished, Mr. Hines said the rail lines were in a position to better operate their properties and to improve facilities. His statement also dealt with results directly obtained through operating the roads as a unit.

"It made practicable a war transportation service which could not otherwise have been obtained," he said.

Roads Not "Wrecked."

Answering directly assertions that the roads would be returned "wrecked," Mr. Hines declared they would be returned in a condition which "compares favorably" with that in which they were taken over and his opinion in better shape to meet demands upon them than they would have been after two years under private management. The administration, he said, had made every effort to observe the contractual obligation to maintain the properties in substantially as good condition as it received them. He pointed to the expenditures of approximately \$1,200,000,000 for improvements, equipment and rebuilding as proof of this.

The government bought for the roads a total of 100,000 freight cars and 1930 locomotives. While this is below normal purchases for a like period, it was explained that physical inability to obtain equipment because of the exigencies of war was the only reason the normal purchases were not made.

OPERA SINGER AND JEWELLED CAP SHE SAVED FROM REDS

Mme. Lydia Lipkowska.

Here is one of the most valuable of Mme. Lydia Lipkowska's jeweled possessions which she saved in her flight from the Reds in Russia. When Mme. Lipkowska fled from Petrograd to escape the Bolsheviki all she was able to save of her valuables was some of her jewels. The cap she is wearing in the photograph is framed with pearls and a pendant suspended under the chin. The jewelry, she says, is the only one left.

FRENCH TRAINS RUN ON LIGHT SCHEDULE; MEN LODGE DEMANDS

PARIS, Feb. 28.—Trainmen and other employes on all the railway lines of France have been called out by a general strike order issued today by the national federation of railway men. Limited train service was maintained throughout today, however, with the aid of men mobilized from the railway division of the army and civilians who offered their services.

The ministry of public works has organized a service to enroll volunteers to replace the strikers, to operate automobiles and aid in the work of victualing.

The national federation of railway workers tonight formally issued the conditions on which the strikers will return to work. These consist of recognition of the union, application of the proposed graded wage scale, joint grievance commissions, immediate consideration of the future status of the railroads and no strike reprisals.

WEEK'S THIRD BANK COUP OLYMPIC PROGRAM WILL

PLANO, Texas, Feb. 28.—Officers in several north Texas counties have instituted a search for two men, who just before daylight today, shot and killed G. W. Rye, a night watchman, an looted the Plano National Bank of Liberty Bonds and other negotiable securities valued variously at from \$50,000 to \$150,000. No money was taken. Officers believe the robbers escaped in an automobile and that they are hiding in some north Texas city, probably Dallas.

The robbers entered the bank through a rear window and when discovered by Rye, immediately opened fire, one bullet penetrating the watchman's abdomen. Rye, who died fifteen minutes later, fired four shots, but it was believed the bandits escaped unscathed. Sound of the shooting quickly brought citizens to the bank, but the men were gone. Shortly afterward farmers south of Plano reported the passage of an automobile going at high speed in the direction of Dallas.

Detectives from Dallas were summoned and photographed various prints left by the robbers on various safe deposit boxes from which most of the bonds were stolen.

GAMBLING EQUIPMENT TAKEN IN BY SHERIFF

Second Raid in Week on One House Resulted in Find of Electrical Roulette, Faro Table.

EASTLAND, Feb. 28.—Breaking their way with axes through barred doors, Sheriff Elmer Lawrence and his deputies raided a gambling house just outside the city limits of Eastland last night, took the proprietor and players into custody, together with a satchel full of money, 200 decks of cards, a sack full of poker chips, a faro bank and roulette tables.

This was the second raid on the same house within a week. The first was made last Saturday evening when the tables and equipment taken were piled together and burned.

The paraphernalia found by the officers in the last raid was of a later style than the first. The roulette wheel was run by electricity and the faro bank was complete in every detail. No estimate of the amount of money taken in the raid has been made as yet. One of the players fought desperately for his liberty but was overpowered. Lawrence's declaration some time ago that he could not permit gambling in Eastland county under any circumstances.

FUEL ADMINISTRATION CONTINUED BY WILSON

WASHINGTON, Feb. 28.—President Wilson today by executive order continued the fuel administration, lodging its powers in a committee of four.

The functions of the fuel administration have been exercised by the railroad administration which is going out of business March 1. The fuel situation was represented to the president as so serious as warranting the continuance of control by a government agency.

The following are designed to compose the committee: I. W. Howe, Rembrandt Peale, F. M. Whitacker and J. F. Fisher.

MRS. OTT APPEALS FOR VERDICT FOR TWO YEARS

DALLAS, Feb. 28.—Notice of appeal was filed late today by counsel for Mrs. Ida Valera Ott, whom a district court jury earlier in the day had found guilty of manslaughter for shooting her husband, Andrew L. Ott, here last December 23. The court assessed her punishment at two years in the state penitentiary.

LAST OF ONE REGIMENT LEAVES SIBERIAN DUTY

WASHINGTON, Feb. 28.—Arrival at Vladivostok for embarkation of the last army detachments in Siberia was indicated in a message today from Major General Graves, commanding, which said the last of the 27th infantry reached there Wednesday, en route to the Philippines. The regiment has been guarding the trans-Siberian railway.

CISCO TODAY HONORS MARTYRS OF BIG WAR IN MEMORIAL PROGRAM

"Every man who lost a bunkie overseas owes it to that man's memory to be present at the city hall this afternoon at 3:30 o'clock," says Roy C. Griffin, commander of the local post of the American Legion, who requests that as many former service men as possible be present in uniform.

The occasion is the presentation of six French diplomas to the bereaved parents of that many men who lost their lives in France. An elaborate and impressive program has been planned as follows:

"Paying tribute to Cisco's men who gave their lives that we might be safe from autocracy."

(1) Cisco Chamber of Commerce band, "My Country 'Tis of Thee."

(2) Scripture reading, Rev. E. H. Holmes.

(3) Invocation, Dr. J. D. Leslie.

(4) Solo, Louis Duckert.

(5) Address, Rev. R. A. Langston.

(6) Presentation of diplomas, Roy C. Griffin, post commander.

(7) Band, "Star Spangled Banner."

(8) Benediction, Rev. L. N. Stuckey, assisted by local Red Cross and pastors.

DALLAS DEMOCRATS APPROVE ADMINISTRATION RESULTS

DALLAS, Feb. 28.—A number of Texas democrats, "approving the matchless achievements of the present national democratic administration," today issued a call for an unofficial meeting in Dallas March 6 for the "purpose of organizing for the election of delegates" to the national convention who are in accord with it.

Signers of the call included Thomas E. Love of Dallas, democratic national committeeman from Texas.

OKLAHOMA'S GOVERNOR SIGNS SUFFRAGE BILL

OKLAHOMA CITY, Okla., Feb. 28.—Governor J. B. Edwards late this afternoon signed the joint resolution ratifying the federal woman suffrage amendment after the house of representatives had by a vote of 76 to 4 adopted the amendment of the senate eliminating the emergency clause and both bodies adjourned finally at 4:30 o'clock tonight ending the shortest legislative session ever held in this state.

As soon as the bill was signed certified copies were sent by registered mail to President Wilson, the secretary of state and the presiding officers of the national senate and house of representatives.

MANY ARMY OFFICERS MAY GET REDUCTIONS

SAN ANTONIO, Tex., Feb. 28.—A general reduction of regular army officers' permanent grades today was believed by officers at southern department headquarters to be impending as a result of the receipt of a telegram from the office of Major General Peter C. Harris, adjutant general of the army asking for a list of officers in the department "who are surplus in their grades."

PEN SENTENCES FOR TWO CHARGED WITH KILLING

MACOMB, Ill., Feb. 28.—Dr. George Macomb and Mrs. Alice Clugston were found guilty today of the murder of the latter's husband, Lawrence Clugston at Bethnell last July. Dr. Alverston was sentenced to life imprisonment and Mrs. Clugston was sentenced to 14 years in the penitentiary. The state charged the two had caused Clugston's death by the administration of arsenic.

CIDSEY IS APPOINTED STATE COMMISSIONER

FORT WORTH, Tex., Feb. 28.—J. C. Cidsey, former national bank examiner, was appointed state commissioner of insurance and banking today to succeed George Waverly Briggs, resigned.

YOUNG MEN'S BUSINESS LEAGUE AGAIN SUCCEEDS IN PUBLIC SERVICE, BASEBALL PROJECT IS 'OVER'

Cisco is virtually a member of the projected Oil Belt baseball league.

Again members of the Young Men's Business League came to the front with a voluntary proposal that they take over the work of seeing the baseball proposition through and again success crowned their efforts. For \$825 was raised in Cisco Saturday to pay for the Cisco league franchise; \$800 was needed.

Already Cisco baseball fans can visualize the white sphere soaring over a nine-foot fence and already can imagine they hear the crack of wood against leather. And it will not be long until their dreams will be realized.

The solicitors secured considerable additional subscriptions to the capital stock but did not have the full \$20,000 deemed necessary to put the team and equipment on a sound financial basis. The work will be completed during the coming week, and it is undoubtedly a

CHARGED WITH MAIL FRAUD TEXAN IS PLACED IN JAIL

NASHVILLE, Tenn., Feb. 28.—Ben W. Wald, arrested in Texas on charges of swindling, embezzlement and fraudulent use of the United States mails brought by the Volunteer Oil company of Nashville, was returned to Nashville today by government agents and lodged in the county jail. His bond was fixed at \$65,000.

Officials of the company charge that Wald obtained approximately \$60,000 through misrepresentation. He is said to have posed as owning valuable oil lands at Wichita Falls, Texas, and to have persuaded a number of prominent Nashville people to invest in the Volunteer Oil company on the strength of the leases he claimed to hold. Officials of the company claim that upon investigation of the titles the leases proved worthless.

HOOPER SAYS AGRICULTURE RECONSTRUCTION PROBLEM

CHICAGO, Feb. 28.—Development of agriculture to keep pace with the development of industry was one of the greatest reconstruction problems facing the country, Herbert Hoover declared tonight in an address before the western society of engineers. Industries are drawing from the farms, he pointed out, and if we develop our exports of industries during the next five years as rapidly as during the last five years we shall have been faced with the necessity of importing foodstuffs.

PERRY GROCERY COMPANY OPENS BRANCH BUSINESS

T. C. Perry, head of the Perry Grocery company which recently opened a new store in Cisco on East Broadway, announced Saturday night the opening of a branch here to be located on Avenue F between Seventh and Broadway.

As in the other establishment, the new store will be completely stocked and will be operated entirely on a cash basis, according to Perry. Delivery service will also be provided in the new store.

For Lieutenant Governor.

TEMPLE, Tex., Feb. 28.—I. W. Culp, member of the Texas legislature from the 4th district, today announced his candidacy for lieutenant governor of Texas.

Denounce Prohibition.

ST. LOUIS, Mo., Feb. 28.—National prohibition was denounced and congress was asked to repeal the 18th amendment in a resolution adopted here today at the district republican convention, called to elect delegates to the national convention in Chicago.

MORAL LEADERSHIP LOST FOR AMERICA, SAYS BAKER

NEW YORK, Feb. 28.—The position which America held at the close of the war as moral leader of the world was relinquished when the country "lost its nerve," said Secretary of War Baker at a luncheon today of the Brooklyn chamber of commerce.

"We made reservations until the moral leadership passed," he declared. "Reservations have to some of us, however, been forgotten they are dealing with the fate of mankind. Our adhesion to the League of Nations is what will save the world."

"On March 4, 1921," Mr. Baker continued, "I expect to be inaugurated—in private life, and what I say is said as one who is leaving public life."

Harding Starts Tour.

WASHINGTON, Feb. 28.—Senator Harding of Ohio left tonight for a speaking tour through Missouri, Kansas, Oklahoma, Texas and Colorado. He will speak in at least eight cities.

Neil Hitt — Office in Daniel Hotel — Telephone

NORTH TEXAS CRUDE TAKES JUMP IN PRICE.

Oil producers here are elated over the advance in the price of north Texas crude for which pipe lines will now pay \$3.25 per barrel at the well. This is a boost of 25 cents over the old price. The new price was posted by the Prairie Oil & Gas company from its headquarters at Independence, Kan. and was immediately met by the Gulf Production company in the Burk Burnett field and the Sinclair Consolidated. Other companies hastened to meet the raise.

The new price is effective in all of the north and central Texas fields and all of the other high grade oil fields of the mid-continent area with the exception of Houston. The Desdemona, Burk Burnett and other fields within a wide radius of Cisco are affected by the raise.

This is the fourth time mid-continent oil has been boosted since November 20th of last year, up to which time crude was selling for \$2.55 per barrel. It was raised to \$2.80 and then \$2.75 by the Prairie, and the Sinclair Consolidated posted the \$3.00 price the first of the year.

The new raise was forecasted a little more than a week ago when the Stein Oil company of Wichita Falls boosted crude in the Burk Burnett field to \$3.25, which price was met by several of the larger companies.

The raise in crude means that the production of oil is not meeting the demand, and that if no new pool of phenomenal proportions is discovered shortly, next winter will see crude at \$4.00 per barrel and going up. The opening up of Mexico to American oil operators is the only thing which will be able to keep oil prices from soaring skyward within the next year. And even at that the heavy Mexican crude has such a low gasoline content it is doubtful if it will be able to fill the demand for internal combustion engine fuel.

While Oklahoma is sitting steady in the saddle with production, Louisiana is proving treacherous, with salt water ruining some of its most voluminous gushers, and Texas is just about to come into its own.

Big oil producers who gave Texas a hurried inspection and then dashed madly to the Louisiana fields in eager pursuit of a distant mirage, are coming back. They have found the desert on other sides too light and frothy to satisfy their appetites. Louisiana is good in places but is pitted with small and independent pools, orphaned of a mother pool, and a producer is just as liable as not to drill dry holes on all four sides of a gusher.

While the Texas line in places is about as futile as a village queen, those who have held their faith in this field have to find oil sands of good, substantial strata that show promise of being almost inexhaustible producers. This state has not been drilled up by a long

way. Its possibilities have hardly been scratched.

The oil is here in unlimited quantities. The mother pool of this section has not yet been uncovered. The probability that it lies around Cisco or even beneath Cisco, is just as plausible as that it is elsewhere. What the oil men here are getting is only a skimming of the surface. The real stuff is deeper.

PENNSYLVANIA CRUDE ALSO UP.

Pennsylvania crude is now up to \$3.50 per barrel. Friday a 15-cent advance was posted. An advance in refined oil prices is expected as the consequence of recent raises in crude prices throughout the country.

IN BROWN COUNTY.

D. R. Bailey is pulling casing to abandon his No. 1 Lopez. Jose Padilla survey, at 2917 feet. Bailey is drilling deeper in his No. 1 Low, J. M. Baker survey. The well is now at 2390 feet.

IN COLEMAN COUNTY.

The Gladys Bell Oil company is estimated to have 29 barrels per day in its No. 4 Pope, Martinez survey, section 751, which is in sand between 1915 and 1924 feet. The same concern has an estimated 19 barrels per day in its No. 2 Watson. Sand between 1929 and 1937 feet.

The Magnolia Petroleum is putting its No. 3 Morris, J. B. Davidson survey, on the pump. The well made a showing of 30 barrels at 2116 feet but has made no other showing. There is a little gas and very little water in the well.

Stewart and others have a failure in their No. 1 Lopez, M. Martinez survey, section 571. The hole was abandoned at 1510 feet.

IN CORVELL COUNTY.

The Texas Buckeye has abandoned its No. 1 C. A. Strickland, John Wynn survey at 3726 feet.

IN HAMILTON COUNTY.

The Gladys Bell Oil company has a failure at 3560 feet in its No. 1 Bell, Colson, J. B. Bradley survey.

IN SCHLICHER COUNTY.

The Central Oil company has abandoned its No. 1 Ogden, W. A. Bennett survey, section 16.

AMERICAN PETROLEUM PRODUCING GETTING SOME GOOD ONES.

The American Petroleum Producing company of Cisco is getting some pretty good shallow wells down around Sipe Springs these days. Their No. 1 J. M. Hauser is pumping 45 barrels and their No. 2 is doing 55 on the pump. These wells are about two miles and a half south of Sipe Springs.

The company's No. 3 Hauser came in

yesterday for 100 barrels flush production. It is estimated that the well will hold up for at least 50 barrels. All of these producers found the sand at about 250 feet.

Sipe Springs may not be producing any gushers but a man is getting a better run for his money there than in any of the other fields in this section.

The American is figuring on putting up its own office building here shortly.

Card of Thanks.

To those who gave us so many kind thoughts and did so many wonderful things for us during the illness and death of our husband and father, we are deeply grateful. The ministrations of friends during the dark hours of the past week will ever be remembered by us.

Willard STORAGE BATTERY

Willard Threaded Rubber Insulation

Threaded Rubber Insulation

What It Is

It is a corrugated piece of hard rubber, pierced from front to back with 196,000 tiny threads in order to make it porous, so that it will afford free passage for the battery solution.

It is used inside the battery, in each cell, between each two plates in the cell. It is very durable, as one would expect of hard rubber.

It lasts as long as the battery instead of wearing out before the plates (like ordinary insulation).

It is the exclusive invention and property of the Willard Storage Battery Company and is not used in any battery except the Still Better Willard, branded with the trademark shown on the battery pictured below.

What It Does

It does not wear out or get full of holes, causing short circuits and other insulation troubles.

It therefore helps you to get all that you should get out of the plates at continued high capacity.

It makes true "bone-dry" shipment and storage of the battery possible, because the Still Better Willard having never had a drop of moisture in either plates or insulation is in a bone-dry condition and can be kept indefinitely without depreciation. Batteries with ordinary insulation can be shipped without battery solution, but they are not bone-dry for the insulation has been wet, and once wet it cannot be allowed to dry out. The battery must be filled at an early date.

Finally, Threaded Rubber Insulation does away with the bane of the battery owner's existence—re-insulation.

Cisco Battery Company

Inside the Battery

In this "Still Better Willard"—identified by the trademark shown on the side of the box (in red) every positive plate is separated from its negative neighbor by Willard Threaded Rubber Insulation, samples of which are shown above. It has a pronounced effect on the quality of the battery.

WINNER OF CARNEGIE DIAMOND MEDAL HERE, SAVED THIRTY EIGHT LIVES FROM SHIP WRECK

Arthur Loeb a Feature Act Today at the Judia

The world's champion bell diver and possessor of the only diamond-studded Carnegie medal in the world, Arthur Loeb, the hero of the Eastland disaster in Chicago in 1915, is in Cisco en route to France, where he will assist in the raising of some of the ships sunk in the recent war.

Mr. Loeb reached Cisco this morning. He came from Arizona where he spent a day or so, and will remain here until tomorrow. He said that he is simply seeing the country.

The diver is on his way from Vladivostok, Russia, where he has been professionally engaged for some time.

Although known as the hero of the Eastland disaster, Loeb is really the hero of three other wrecks. He won the diamond Carnegie medal for his work in the Eastland wreck. It is the only one of its kind in the world. It is a gold, diamond-studded medal, and valued at \$10,000. Mr. Loeb's medal collection contains many others, but the Carnegie diamond medal is the most valued one.

This medal was presented to Loeb for saving the lives of 38 persons. He was present on the dock when the vessel began to turn over. He had booked passage on the boat, and had arrived too late to get aboard. When he saw the vessel list and begin to sink, he tore off his clothes and plunged into the water and began bringing out persons struggling amid wreckage. He remained in the water 72 hours with the exception of a few five-minute rest periods. There were 1615 lives lost, but Loeb succeeded in saving 38 persons, for which he received the highest gift of the Carnegie hero fund and so far the only one of its kind issued.

As a result of his work during this disaster, Loeb carries a fractured skull at present, and is the only living man with a broken blood vessel, the injury being received while taking the drowned people from the water. He was rendered unconscious for three days at the time, being pronounced dead twice by an eminent Chicago physician.

The extraordinary heroism of Loeb first came to the foreground when he worked on the United States submarine E-4, which was sunk off the Honolulu coast in 1915. At that time he dived a record distance of 267 feet, encumbered with 1465 pounds, his shoes weighing 800 pounds, his helmet 165, and his belt 300 pounds. At the Cleveland tunnel catastrophe in 1916, he also established a remarkable record, rescuing four men alive and bringing 13 tools from the tunnel.

Among the many honors held by Loeb for his diving accomplishments is the distinction of having swam from Francisco bay from that city to Oakland, a distance of more than seven miles, encountering very rough water conditions.

Loeb is but 30 years of age, but he

has been diving and receiving world-wide commendation for a period of 13 years. He strongly advocates the advisability of teaching the youthful population the mastery of personal water traffic, he having been launched on a swimming career at the early age of 10 years.

From the picture the most unusual physique of Loeb may be realized. He

Arthur Loeb.

so absolutely controls his entire muscular system that it is possible for him to endure loss of food and sleep, and experience difficulties in the water which have been accomplished by no other swimmer.

After spending a short period in America, Loeb will return overseas, this time going to France, where he will place his life in the hands of one of the world's most renowned surgeons and undergo an extremely critical operation.

SUGAR MARKET IS STRONG; REFINED PRICE UNCHANGED

NEW YORK, Feb. 28. — The local market for raw sugar was strong and while there were no fresh purchases reported holders were not offering any too freely, owing to the continued buying by the Royal commission on a f.o.b. basis. It was rumored that the last sales for March-April shipment to the Royal commission was on the basis of 9 1/2¢ f.o.b. Cuba, and it was said that as high as 9 3/4¢ f.o.b. had been paid, although no details of these transactions were received.

RICE.

NEW ORLEANS, La., Feb. 28.—Rough rice no sales; receipts 1152 sacks; millers receipts 1152. Clean rice strong. Sales: Blue Rose 3502 pockets 8 1/2¢ 13%. Receipts 24737. Bran and Polish unchanged.

Automobile traffic was so heavy on Lake Erie last year that a special freight steamer to load motors on all four decks will be put into service to handle the business between Cleveland and Detroit.

JUDIA THEATER

REALART PICTURES
presents
Mary Miles Minter
in
"Judy of Rogues' Harbor"

At the risk of the direst kind of punishment, she saves her mistreated little cousin from the clutches of their brutal "grandpop."

"Judy of Rogues' Harbor" is the story of a courageous little girl whose wonderful character, determination, and desire to help those imposed upon, helps her to overcome all obstacles.

THRILLING GRIPPING APPEALING

MARY MILES MINTER TAMES "WILD ANIMALS"

The question of handling several hundred pigeons who were necessary in the making of the scene for "Judy of Rogues' Harbor" developed into a serious problem as intimate contact with human beings was entirely strange to them.

Mary Miles Minter the Realart Pictures star, in whose forthcoming picture the pigeons are used, conceived the idea of making friends with and gaining the confidence of the birds. Two hours daily were devoted to feeding the pigeons, permitting them to perch upon her shoulders and virtually "eat out of her hand." The pigeons soon developed a very friendly feeling, enabling the proper handling of the situation so necessary to the story and which had caused no end of annoyance. Miss Minter, when questioned by her director, Wm. Desmond Taylor, as to her power over the birds, stated naively: "It is as easy to handle human beings as it is dumb animals or birds. Just be natural."

Mary Miles Minter will be seen in "Judy of Rogues' Harbor," her second Realart picture, which is an adaptation from Grace M. White's widely read book by the same name which comes to the Judia theater today and tomorrow. A exceptional all star cast, including two of the most remarkable veterans of the stage, play the supporting roles.

"YANKEE DOODLE GIRLS" HAVE RETURN ENGAGEMENT

Harry Feldman's "Yankee Doodle Girls," who just broke all house records at the Alhambra theater, Eastland, the last week, will open another return engagement here at the Broadway Monday night, March 1, and will present all new plays and also those two funny black face comedians, "Pete" and "Bud," who you will remember on their last visit to the Judia.

The company numbers 18 people and is, without a doubt, the very best musical comedy, now touring this section of the country.

The program will be changed daily and there will be new and novel specialties introduced.

The city of New Orleans, La., has placed the largest single order of its kind ever given to one manufacturer at one time by an American municipality. The order calls for 28 pieces of motor fire apparatus.

The Miami Motor club is laying out plans for camping accommodations for motorists in Florida. A site has been located near Biscayne Bay, and provisions are to be made for drinking water, gas and other conveniences.

The registrations for 1919 in Massachusetts have been in excess of 177,500 passenger cars and 41,500 commercial vehicles.

A High Class Car

Haynes—For People Who Care

Discriminating motorists the world over are rapidly becoming HAYNES owners, because in it they find the four vital factors of a car.

Character Beauty Power Comfort

No car can give complete satisfaction and pride of ownership unless it has these important qualities.

For the Haynes these factors have crystalized it's good repute.

And today you will find the Haynes car far ahead in leadership, this leadership it has held for over a quarter of a century. There are two reasons for this fact: Perfect mechanically. Low in price. Then also it's tone and character create for it a demand unexcelled by any other car.

Haynes is built by a STANDARD and not by a PRICE.
I can make immediate delivery on the following models:

Seven passenger Touring Car, six cylinder. Four passenger Roadster, six cylinder.
Seven passenger Touring Car, twelve cylinder. Four passenger Roadster, twelve cylinder.

Sunday Morning, February 29, 1920

THE NEWS' PLATFORM FOR CISCO AND EASTLAND COUNTY.

- 1—A municipal auditorium or convention hall.
- 2—Removal of unsightly awnings, and erection of uniform marquee on Avenue D.
- 3—Development of the public schools.
- 4—Truthful publication of oil news.
- 5—Better rural schools.
- 6—Development of every foot of Eastland county soil into productive acres.

SINCE the Morning News has become part of Cisco's daily habit it is not an uncommon sight to see some of our most dignified citizens still dressed in their nightgowns out on the front porch about daylight looking for "the home paper". We don't blame 'em. It's the first thing we look for in the morning.

BACK TO BARTER?

WE ARE quoting a well-known trade journal: "It sounds childish, but the truth is that the American dollar is on a drunk—drunk with vanity of self-importance and enlarged ego, and until it gets back to something approximating its real value in the terms of the currencies of the various countries of the world, we are going to continue to lose the greatest opportunity America ever had to conquer the world's markets."

In other words, the United States is about the only place in the wide world where there is much merchandise for sale. And what we're doing to Europe is a plenty. We are putting the pinchers on these foreign nations until their money looks like coppers. They demand our products, and because we control the situation we're making them pay, and they will eventually resent it. The foreign buyer feels that he is being held up, and he is.

In a statement made the other day by a representative of one of the great French import houses dealing in food products, he said: "We are building our warehouses not at the Atlantic ports but on the Mediterranean. You have got us now, but once we get on our feet you will never get us in this position again." The same feeling is said to prevail all over Europe.

We are selling our raw materials and our manufactured goods on the highest market basis in the history of the country as an exporting nation. It is based on the highest wage scale ever known. Foreign countries can not adjust themselves to our condition, and it has presented a serious subject of discussion and study on the part of the financiers of this nation.

To bring about an adjustment of foreign exchange the bankers of the United States are suggesting a system of barter, in which the people of Europe are to pay us for our merchandise and raw materials in products of their own country, but raw and manufactured. For instance, it is suggested that we might exchange machinery or copper for German chemicals or hardware or optical goods, or we might take from Germany cotton stockings in exchange for raw cotton.

Already large financial firms are preparing to pioneer the field of barter, in hope that there may be a stabilization of conditions, and that America will be the gainer is predicted, as it will lessen the complaint of our foreign trade that they are being overcharged for our products.

It will be an interesting experiment. The pioneers in this scheme can afford to try it out. If it works the whole United States will be directly concerned.

The Economy Refining company of Cisco, Texas, has taken over the Union Cisco Oil & Refining company, with all their assets. This means two companies, consolidating into one company, makes the Economy Refining company a larger, stronger company. This gives two ideal locations to build large, modern plants upon, one consisting of twenty acres, joining the city on the east on the Texas & Pacific railroad, known as the Orlsten Tract; the other consisting of 40 acres, joining the city on the west on the Texas & Pacific railroad, known as the Harrell Tract. These two pieces of city property also carry the mineral rights, which is also a big item within itself. The first plant we are building is on the 20 acres, joining the city on the east. This will be a modern, 3000-barrel refinery, fully equipped in every detail, with the latest modern processes for refining.

We are now at work on this property, excavating and building the out-houses, preparatory to the construction of this big plant, which will be finished as rapidly as we can possibly complete it. It will soon be in operation and pouring forth large profits to all our shareholders.

Now the second site, containing 40 acres, will be held as an asset to the company for further developments. If the large producing wells keep coming in around Cisco, assuring us of plenty production, which we have no doubt that they will, on completion of this first plant we will build another large plant upon this site, or set aside part of this tract for some other industrial purpose.

The Economy Refining company is going over the top. We are bound to succeed, and if we succeed, the shareholders who helped us build this great industry will profit by their actions in securing some of these bona fide securities.

Now the time to buy these dividend securities is when they are first offered to you, and while you can get them at par. Do not wait until this plant is built and in operation and have to pay more for these securities.

We are meeting with good success and co-operation from the citizens in and around Cisco, and we know that we will continue to have this co-operation, for this is a home industry, backed by strong home business men of ability, who are all property owners of Cisco. In adding the Union National to the Economy Refining company, we also added a stronger board of officers and trustees. In making this deal, we made some changes in our board of officers, and added two more trustees. The officers and trustees of this company are:

President: Judge B. B. Greenwood, past county judge and county attorney of Stephens county and large property owner in Stephens county. First vice-president: W. D. Nunn, large property owner and real estate dealer. Second vice-president: Frank Harrell, large property owner, builder and real estate dealer, also connected with the Rockwell Bros. Lumber company. Secretary: G. E. Berry, one of the firm of Berry & Harrell, builders and real estate dealers, also a property owner in Cisco. Treasurer: Guaranty State Bank & Trust company. Trustee: J. Walter Ray, vice-president of American National bank, railroad promoter, large property owner, prominent oil man, well known in Eastland county and oil circles. Trustee: J. A. Smith, property owner and one of the proprietors of the Hartman hotel. Trustee: L. W. Hilgenberg, formerly with the Roxana Petroleum company, is an experienced oil and refinery man. General Manager: W. L. Sanders, formerly of Oklahoma, an experienced refinery man and now an oil operator and property owner of Cisco, and well known in the oil circles.

You can see by the officers and trustees behind this great industry that honesty in our dealings is assured to the public. We have no secret chambers and this company is subject to the law.

We extend to you an invitation to call at our office in the Hartman hotel most rigid investigation. Call for further information. Call and see us.—Economy Refining Co. (Advertisement)

Verdigris Remover.
The verdigris that forms on brass may be removed by the following treatment: Mix a good metal polish in equal parts with wood alcohol. Apply with a brush and allow to dry. When dry, rub well with a clean cloth and the verdigris will come off, too, leaving a clean, smooth surface. After this the brass may be polished in the usual way.

CHURCHES

First Methodist Church. (Worshipping in city hall.)
First Methodist Church. (Worshipping in city hall.)
 "Jellyfish, centipedes and parasites" will be the subject of the sermon Sunday at 7:30. Each represents a class of people to be found almost anywhere, and because all three classes are in our own town, the pastor is going to preach about them at the evening service Sunday night.
 At the morning service, 11 a. m. we follow our beautiful ritual service entirely, and are sure that you will enjoy it. The pastor will preach at this service from Mark 8:24: "If any man would come after me, let him deny himself and take up his cross and follow me."
 The services of the day will be as follows:
 Sunday school 9:45 a. m., G. Fisk, superintendent.
 Morning service 11 a. m.
 Story hour 4:30 p. m. Story by Mrs. Buckley.
 Intermediate league 5:30 p. m.
 Senior league 6:30 p. m. All young people welcome.
 Evening service 7:30 p. m. Strangers, visitors, old men and everybody else welcome.
 Lewis N. Stuckey, Pastor.

First Presbyterian Church.
 "Life enlistment" will be the subject for the morning sermon. This is a call to consecration. "The need of preparation to meet God" will be the subject for the night sermon.
 These services will be preparatory to the revival which is to begin in this church next Sunday, March 7. Rev. W. B. Gray, D. D., Brownwood, will do the preaching.
 Schedule of services today: Preaching at 11 a. m. and 7:30 p. m. Sunday school at 9:45 a. m. Christian Endeavor society 6:30 p. m.
 Every member of the church is urged to be present. Strangers and visitors and those without a church home are most cordially invited to worship with us.
 J. D. LESLIE, Pastor.

Christian Endeavor.
 "Kind words and deeds" is to be the topic at tonight's session of the Cisco Christian Endeavor society. Talks by members have been arranged in what is claimed to be an interesting program.
 The program: "Every-day courtesy," Miss G. T. Simmons; "Why be kind?" Miss T. Ford; "When kind words are best," Alfred McAfee. A general discussion of the subject will follow. Because of sickness Miss McCumart of Abilene, district president, will be unable to attend but promises to be present at a later date.

First Christian Church.
 Bible school 10 a. m. Preaching 11 a. m. and 7:30 p. m.
 Morning subject: "The Christian's Light." At the evening service the subject in Acts will be continued, the subject being "Witnessing through difficulties."
 Christian Endeavor meets at 6:30 p. m. Our people are urged to attend men's services at city hall at 3:30 p. m. Strangers and visitors cordially welcomed.
 E. H. HOLMES, Minister.

First Baptist Church.
 Rev. W. R. Kendall of Paris, Texas, will preach morning and evening. Mr. A. B. Ely, violin, will play the offertory. At the morning service Mrs. Atline will sing "Consider and hear me" by Alford Webster.

Of Interest to Women

Utah has the most women members in its legislature of any of the states.
 Pauline Frederick popular actress and motion picture favorite, is an expert shot with a rifle.
 Argentine has more than 700,000 women engaged in business pursuits of the liberal professions.
 To Miss Rebecca Gratz of Philadelphia belongs the honor of founding the first Hebrew Sunday school in the United States in 1838.
 Mrs. Carla A. Westcott of Seattle is believed to be the first woman in the United States to receive a Federal license as a marine engineer.
 Mrs. Mary B. Jackson, an attractive young matron of Portland, Ore., is the first woman of her city to become a candidate for the position of constable.
 More than one hundred women lawyers were included in the attendance at the recent Chicago convention of the National American Woman Suffrage association.

The number of women eligible to vote in New York state is 3,125,099, which is equal to the total vote received by General Grant in his election to the presidency in 1868.
 Few women consider that they carry some 40 to 50 miles of hair on their head. The fair-haired may even have to dress as much as 70 miles of threads of hair every morning.
 Harvard's new graduate school of education for the training of school administrators and teachers, will be the first department of the big Cambridge university to admit women students.

Of the women of history who first saw the light on Leap Year's extra day probably the most widely known is Ann Lee, founder of the religious sect known as "Shakers," who was born at Manchester, England, February 28, 1736.
 Gertrude Farrar will probably have to pay a tax this year on an income estimated at \$350,000 to \$400,000, including earnings of \$250,000 as a movie star and \$50,000 from concerts, in addition to \$2500 received for each appearance in opera.

Two hundred thousand girl guides have been organized throughout the world during the past five years. Units of the organization exist in India, Ceylon, Australia, Poland, Russia, South Africa and a number of other countries, as well as in America, Great Britain and France.
 Miss Jessie Bonstelle, the pioneer woman stage producer in England, has to her credit no fewer than 200 successful productions. Her latest and most notable production is "Little Women," which she dramatized after having tried for eight years before she finally gained the consent of the Alcott family to make a stage version of the famous story.

What Really Annoyed.
 Caller—"Hear that girl! Doesn't her constant singing in the flat annoy you?"
 Ledger—"Not so much as the constant flat in her singing."—Boston Transcript.

Cheap At the Price.
 "Look here, Doctor, that bill you sent me was rather large."
 "But think what I saved you by telling your wife she shouldn't go to the south of France this winter."—London Opinion.

PRESIDENTIAL CANDIDATES WILL SPEAK HERE MONDAY

As recently announced at the Washington headquarters of the republican and democratic national committees a new and thrilling plan has been adopted to have noted statesmen, party leaders and presidential candidates speak in their own voices to men and women everywhere by means of phonograph campaign records.

These records, containing great orations and addresses that will become historic, are being released at the rate of two each month, one democrat and one republican.
 Copies of the January and February numbers, carrying the speeches of Senators Lodge and Harding, Wm. G. McAdoo and U. S. Atty-Gen. A. Mitchell Palmer, in their own voices, arrived here Saturday. The public is invited to hear them at the Nunn Electric company.

Political clubs, commercial organizations, women's clubs, schools, lodges, churches, motion picture theatres, desiring to arrange for a hearing of these records each month as they are released, will please phone or call.

Getting His Share.
 "Tain't manners to talk while you's eatin'," said Miss Miami Brown.
 "No," answered Mr. Rastus Pinkley, "an' wif food scarce like it it, 'tain' good judgment either."

Abrasive Knee Work.
 Hewitt—"He wouldn't rent you the flat, eh?"
 Hewitt—"No; he said that I was so kowlegged that I would be continually rubbing the paper off the walls."—New York Globe.

NEW FIRM FOR MEN'S WEAR WITH NEWEST THINGS OUT

Just back from the market, where they bought a swell line of men's wear, the new firm of St. John & Karkalites will open a haberdashery where the men of Cisco and Eastland county will find the things they want of the newer sort, not usually found in a city this size.
 The proprietors, who are local men, having recently left the Humble Oil company, have been to Chicago, where they selected their spring line, a por-

tion of which is already here.
 The firm is composed of R. R. St. John and J. W. Karkalites.

Fickle Applause.
 "Did your speech get prolonged applause?"
 "Yes," said Senator Sorghum; "almost as much as the jazz orchestra that played at the reception the same evening."
 The use of motor vehicles is prohibited in Venice, Italy.

TEXAS TOWNS WHERE BIG LEAGUERS TRAINED BOAST OF HAVING DEVELOPED DIAMOND STARS

SAN ANTONIO, Tex., Feb. 28.—Many brilliant stars of ballroom have sped over the diamond paths at League park, where the New York Nationals will go into spring training March 2 for the 1920 season.

In the park's history a long line of diamond celebrities have tanned under a glowing sun during spring training, and many an ambitious recruit from the "sticks" has found the spirit of hope or despair lurking in the shadows of its dugouts.

The Philadelphia Americans trained at League park in 1913 and 1914, and the St. Louis Nationals worked out there in the springs of 1915, 1916, 1917 and 1918. The Cardinals went to Hot Wells, near here, in 1915, but did most of their work at League park, with the Cleveland Indians.

The New York Giants had brief experience with the park in 1915, when they put on the finishing touches of their spring work here. In 1919 the St. Louis Browns started one of their most successful seasons by developing pitching arms and batting eyes here.

In addition to a training season of about three weeks for the Giants, the local park will be used for an unusual number of exhibition games this spring. The Giants will play the Boston Red Sox here in an exhibition March 24, the St. Louis Browns will play the San Antonio (Texas league) team March 25 and 26, and the Chicago White Sox will play the locals March 31.

The Giants will arrive here the night of March 1, according to present plans. Except on dates already fixed, the Giants will oppose the San Antonio club every Saturday and Sunday.

WACO, Tex., Feb. 28.—While the vanguard of the Chicago American league club is expected to reach Waco the first week in March for spring training, present plans indicate the main body will not arrive until the second week.

Only twice have major league teams trained here. The White Sox worked out here in 1912 and the St. Louis Americans in 1914. The Indianapolis club of the American association was here for a part of its spring training in 1912.

Katy park will be the scene of the White Sox activities this year, the home of the Waco club while a member of the Texas league.

The previous spring workout of the White Sox here, in 1912, marked the initial trial of the now brilliant infielders Weaver and Bath, and it was at Waco last that Benz developed into a first string hurler.

OLYMPIC PROGRAM WILL BE ON ELABORATE STYLE

Several Hundred Events and Extensive Distribution of Prizes to Make Next Event Biggest Ever.

NEW YORK, Feb. 28.—Copies of the official program of the Olympic games were sent in Belgium during a period last week to October, recently received in this country, disclose the character and scope of the most ambitious international sports in the history of the athletic classic. Close to 20 different sports in 10 event competitions are included, including individual and team events, and several hundred prizes.

All the Olympic medals will be made of silver, and the gold medals will be made of gold. The medals for the 1920 games, including the Marathon race, Polo, and other events, are continued and early delivery indicates a larger and more varied entry by nations than ever before.

Elaborate distribution of prizes and trophies is provided, heavy gold silver and bronze Olympic medals being the award to the best three competitors in all of the track and certain other contests. In addition there will be special diplomas, cups, statuettes, bowls and other prizes for the winners of the more important events. Many of these were donated by the rulers and titled personages of European countries for past Olympics and are in the possession of individuals or nations having won temporary title to the prizes at Stockholm in 1912.

NOVICE AT THE GAME WINS BIG AUTO RACE

LOS ANGELES, Cal., Feb. 28.—Jimmy Murphy, a novice as a driver, won the Los Angeles speedway opening event of 250 miles and captured the \$10,000 first money today. His time was 2:25:37.99.

Ira Vail was second and Joe Thomas third. Murphy's average time was 343 miles an hour.

REFEREE'S DECISION BARRED IN MICHIGAN

DETROIT, Mich., Feb. 28.—Referee's decision in boxing bouts in Michigan will not be permitted, the state boxing commission ruled at a special meeting here recently.

The commission's ruling was given on the petition of a local club that proposed to stage matches in which the referee instead of the newspapermen would determine the victor.

TEXAS IS CAMP GROUND OF FOUR BIG TIME CLUBS

New York and St. Louis Nationals and Chicago and St. Louis Americans Will Work Out in Texas.

DALLAS, Tex., Feb. 28.—Experts in preparation of playing fields and other training camp attaches are invading Texas to prepare the way for the four major league baseball clubs that will train in this state.

Two clubs from each league will get their spring training in Texas, the New York Nationals at San Antonio and the St. Louis Nationals at Brownsville, while the Chicago Americans will hold forth at Waco and the St. Louis Americans at Taylor.

Each team has arranged a series of exhibition games, starting with Texas league teams or major league clubs training nearby, and winding up with clubs in cities along the route to the respective team's home camps.

Last year the New York Giants took their season's warming up exercises at Gainesville, Fla., while the St. Louis Cardinals worked out at home. The Chicago White Sox camped for spring work at Mineral Wells, Texas, and the St. Louis Browns were at San Antonio.

Spring work will get under way in earnest between March 1 and 15 in all four Texas camps, although battery men will have a few days' start to get their arms in condition warranting heavy workouts when the rest of the squads report.

In point of location of spring camps in Texas, the Cardinals will be the farthest south, as Brownsville is at the extreme southern point of the state, on the Rio Grande, and just across that river lies the Mexican city of Matamoros. Waco is about 100 miles directly south of Dallas, toward San Antonio, and Taylor lies between Waco and San Antonio.

ST. LOUIS CARDINALS LEAVE FOR BROWNSVILLE

ST. LOUIS, Mo., Feb. 28.—The St. Louis Nationals tonight departed for Brownsville, Texas, to begin their spring training Monday afternoon. Twenty-nine members of the team, including Manager Branch Rickey, were in the party. Twelve other members are to report in Brownsville Monday.

The Cardinals and Philadelphia Americans will play 18 games in and about Texas before returning north. Before departing Manager Rickey expressed doubt whether Milton Stock, third baseman, the lone "holdout," would sign with the team.

CISCO BASKETBALL TEAMS SPLIT TWO WITH CARBON

The girls' basketball team of the Cisco high school scored a victory over the girls of the Carbon high school here Friday with a score of 38 to 8.

In the same game the boys' team of the Carbon school beat the Cisco basketball team by a score of 23 to 20.

Both of the plays were close and exciting. A return game will probably be staged at Carbon next Friday.

Minor Honor Tearable

CHICAGO, Feb. 28.—The minor leagues of professional baseball have chosen Al Tearney, president of the Western and Three I leagues, to represent them in all their affairs before the national commission.

Club Meets Monday

The Twentieth Century club will have an open meeting Monday afternoon at 4 o'clock in the auditorium of the city hall, at which time an interesting program will be given. Every one is invited.

EFFICIENCY TESTS FOR BATTERIES IS EXPLAINED

"Some idea of the cars used in the construction of Willard batteries may be obtained from the severe electrical and mechanical tests which each jar has to pass before it can become part of a Willard battery," says Mr. Covington, local Willard expert.

Each one of these rubber jars has only to stand a pressure of about two volts in actual service, and is carefully protected from mechanical shock. But before these jars can get by the electrical inspector, each one of them must prove its ability to stand up under a pressure of not a few volts, but of a full 24,000 volts; and in order to make sure that each piece of rubber is mechanically strong, each lot is sampled and the sample submitted to a tension of 3,500 pounds to the square inch."

THE AMBER COLORED LIQUID.

A Little Club Tragedy Involving a Bell-boy and a Cocktail Glass.

From the Outlook.

This is a verbatim report of a conversation which recently took place in the locker room of a New York club. The dramatic rights in the production are not reserved.

First (and Last) Scene.

Character: One Bell-boy. One Member with Pro-Prohibition Tilt.

Enter B. B. bearing tray on which rests a cocktail glass filled with yellow liquid. M. W. P. T. eyes him thirstily as he approaches.

M. W. P. T.—Say, boy, I suppose that's from somebody's private stock? B. B.—Why, no, sir!

M. W. P. T.—Good heavens! How do you get it? B. B.—Why, just order it from the bar, sir.

M. W. P. T. (in stage whisper)—What do you ask for? B. B.—Orange juice.

M. W. P. T. (still whispering)—What do you get? B. B.—Orange juice!

Member collapses. Puer riddens exit. Curtain.

An Unsatisfactory Tire Cover.

From the Chicago Tribune.

A farmer having purchased a tire cover from one of Chicago's automobile supply houses, returned the cover in a ruined condition, saying he had received only 200 miles service from it. He had been using the cover on one of the tires of his car, with the idea that it was a means of obtaining larger mileage.

Forty-five hundred different models of motor cars have been manufactured since 1905.

TRIPLE VICTORY IN ENDURANCE RUN

Three standard Elgin Sixes drove to victory with perfect scores in the Chicago Motor club's 1916 endurance run from Chicago to Bass Lake, Ind., and return.

Triumphant over a large field of entries, and with severe contest conditions, the Elgin cars made the entire two-day run without incurring a single demerit. The trip was made during a period of unusually torrid weather, but despite the intense heat all three Elgins finished the run without retarding their radiators.

Highest economy honors were awarded the three Elgin Sixes for showing an average of 25.6 miles to the gallon of gasoline and approximately 200 miles to the quart of oil. Each car carried an official observer.

NOT A BAD IDEA AT THAT.

With This Peculiar Law Carolina Should Have Felt Reckless Drivers.

From Motor Life.

Lots of things are done in North Carolina and South Carolina that, for example, South Dakota and Alaska are not guilty of. Probably, also, vice versa. The twin Carolinas, for instance have a most peculiar law.

The courts have ruled that a pedestrian struck by a motor car can sue for the possession of the vehicle. This law has become so popular of late, it has been upheld so often to the loss of his car by the owner, that a growing number of people in these two states, when they feel the need for a motor car for business or pleasure, walk forth, strut in the right of way of a motor car, are knocked down, institute suit, and quickly obtain possession of the car that injured them.

The National Auto Dealers' association is waging a legal war to bring about the repeal of this statute.

GASOLINE WAS \$4 A GALLON.

Spain, With 29 Million People, Has Only 7,000 Cars.

The Cadillac representative in Spain on a visit to America for the New York show, revealed a most peculiar condition in that country. Some of the finest highways in the world and a generally excellent road system exist in Spain, he says, but the cost of gasoline has receded but little since the signing of the armistice. During the war, gasoline was \$4 a gallon and today the best price at which one can buy it is \$3.

Another peculiar fact about Spain is that, although there is a population of

20 million people, there are only 77,000 cars.

Toronto, Can., has no less than 36,000 motorists.

It was during 1912 that an impetus was given to motor transportation in Turkey, and in July, 1914, the number of automobiles circulating in Constantinople was less than 400.

Exclusive Milliner Will Move Monday

MRS. IDA KENNON

will move the Exclusive Millinery Shop from the Famous store to Fisk & Roper's dry goods store, 719 Ave. D, Monday. Her patrons are cordially invited to visit her there, where she is showing only exclusive millinery of the very latest styles in the celebrated

Grace Hats

—including the popular transparencies and other stylish head wear. New patterns are arriving weekly, and the ladies of Cisco will be shown the very latest in the milliner's art.

Twenty Years of Experience

The longest in America devoted to one idea of building the highest quality motor truck that human minds could design and perfect.

Twenty years of pioneering the way for others, progressing from the first crude one cylinder truck ever built in 1901, to the powerful 1920 GRAMM-BERNSTEIN Masterpiece.

Twenty years of nationally recognized leadership in truck design and construction.

Twenty years of successfully solving the hauling problems of the world; of reputation for highest quality and unsurpassed performance.

That is the unequalled history of B. A. Gramm and the Gramm-Bernstein Motor Truck Company.

Their present line, embracing 1 1-2, 2, 2 1-2, 3 1-2 and 5 ton capacities, all chainless drive, reflects all that has been learned as a result of their long experience and in the minds of competent judges, is fully two years ahead.

ALL WORK DRIVE TRUCKS PRICED FULLY EQUIPPED; NO EXTRAS TO BUY.

We unhesitatingly recommend the Gramm-Bernstein truck for your consideration. Let us show you what they are doing for others in your business.

FOR SALE—Twenty-two full blooded Plymouth rock chickens, \$2 each; box 651, or Fred Davies' place. 29-3p

NEW ORLEANS COTTON SETS UP NEW RECORD

NEW YORK, Feb. 28.—An active covering movement in March cotton contracts advanced the delivery to 38.25 today, a new high record, May up to 35.07 and October to 30.03. The new crop positions were not so strongly supported, the close being 28 points higher to nine lower, but there was a more bullish feeling noted in the entire list and spot news continued firm, one wire from North Carolina stating that cotton was held in strong hands and that holders were demanding and getting 40c a pound. The market opened steady with December six points lower and others unchanged to eight points higher. A little selling by New Orleans occurred at the opening and there was moderate pressure from local houses on a report from Fall river to the effect that the mill activity was threatened by a strike of coal handlers, but the demand for March contracts soon asserted itself, and with a bullish interpretation of weekly statistics, the strength of the stock market and steadiness of foreign exchange brought about a steady uplift of prices which reached its climax near the close.

The market opened steady with December six points lower and others unchanged to eight points higher. A little selling by New Orleans occurred at the opening and there was moderate pressure from local houses on a report from Fall river to the effect that the mill activity was threatened by a strike of coal handlers, but the demand for March contracts soon asserted itself, and with a bullish interpretation of weekly statistics, the strength of the stock market and steadiness of foreign exchange brought about a steady uplift of prices which reached its climax near the close.

CORN MARKET RALLIES CLOSE IS UNSETTLED

CHICAGO, Feb. 28.—Anticipation of possible improvement in traffic conditions after railroads are returned to private ownership gave considerable advantage today to bears in the corn market. Prices rallied at the last, however, and the close was unsettled, 1 1/2c net lower to 1 1/2c advance, with May \$1.28 1/2, to 7/8 and July \$1.21 1/2 to \$1.31 1/4. Oats gained 1/4 to 3/4 1/2c and 1/2c positions ranged from 10c decline to 12c advance. Gospel current among traders was that somewhat more liberal receipts might well be looked for under changed methods on the railroads. The selling side of the market was

also favored because of talk that the government reports on farm reserves of corn would show a good sized surplus. Closing up of February contracts, however, and week-end adjustment of trades brought about a spirited rally in the final hour of the session. Oats paralleled the action of corn. Provisions were ruled largely by sentiment in regard to grain.

UNFAVORABLE WEATHER PUT COTTON UP HIGHER

NEW ORLEANS, La., Feb. 28.—A return of unfavorable weather conditions to the belt and expectations that the railroad bill would become law put the cotton market higher today, following temporary declines around the opening. The opening decline carried the market 5 to 18 points under the close of yesterday, and from this there was a rise until the trading months were 12 to 38 points higher than the last prices of yesterday. The close was at net gains for the session of 11 to 25 points. Traders on the long side considered the rains in some Texas detrimental to the start of the crop there. The forecast called for wet and cold weather in the belt. March closed at 39.60, which compared with the price of 40.25 against middling spots being unchanged.

Cottonseed Oil. NEW YORK, Feb. 28.—Cottonseed oil declined early under a renewal of March liquidation and in sympathy with lard, but late months worked higher near the close on short covering. Final prices were 25 points lower to 19 net higher. Sales 14,300 barrels. Prime crude 17.00@17.50; prime summer yellow spot 17.25@17.75; May 18.90; July 19.25; September 19.20. Prime winter yellow and summer white nominal. Requirement for a complete motor equipment for tactical army division has been made upon the war department by Adj. Gen. Beary for use of the national guard in Pennsylvania.
