BREASTING THE WAVES

England's income from her shipping exceeds that from any visible exports—steel, textiles, coal or other goods. The kingdom has \$1,500,000,000 invested in the trade; before the war, British tonnage was 41 per cent of total world tonnage.

Now, however, things have changed. British tonnage is only 27 per cent of the world total; such foreign nations as the United States, France, and Japan have used subsidies lavishly to develop their own shipping, and in that fact is one of the major explanations for Britain's protracted industrial slump.

Yet it probably would be premature to sing a swan song for England's maritime pre-eminence. The English have had centuries of experience on deep water. Building and using ships is, by now, almost second nature to them.

British shipping may be in a decline just now; in the long run, it is very likely to maintain its proud and lucrative position.

The English get into slumps, but they have an uncanny knack of holding on tight and coming out of them stronger than ever before.

DOUBLE-BARRELED AID

It is to be hoped that Congress will act fast on President Roosevelt's request for authority to launch a great federal housing program. The whole proposition looks like one of the administration's very best ideas.

For this scheme, like the famous CCC project, is a thing that cuts both ways—or can cut both ways, if it be efficiently handled.

It would be a direct spur to national recovery, helping to revive a great capital goods industry which needs revival very badly; and it would help to provide many Americans with improved living facilities which are greatly needed.

Slum clearance, construction of new private homes, modernization of existing homes which are antiquated and poorly equipped—there is enough work here to keep the building industry busy for years, and it would be worth a direct cash return to the community.

The faster Washington gets busy on it, the better.

LAST OF OLD CAVALRY

It gives one a sort of old and grown-up feeling to read that the U. S. War Department has ordered the cavalry to put away its sabres.

The War Department points out that armored cars, tanks, and so on are replacing the horse throughout the mounted service, and that a cavalryman sitting in an auto has little use for a sabre; nevertheless, the thought that these jingling riders with their polished blades are now officially out of date comes as a bit of a surprise.

Cavalrymen without sabres—or, for that matter, without even horses! Shades of Attila and Bedford Forrest, of Custer and Ney and all the other captains who led galloping troopers into battle beneath a swinging arc of gleaming steel!

We must be getting old, if we have lived into a day when armies have no use for such things.

PRODIGAL'S RETURN

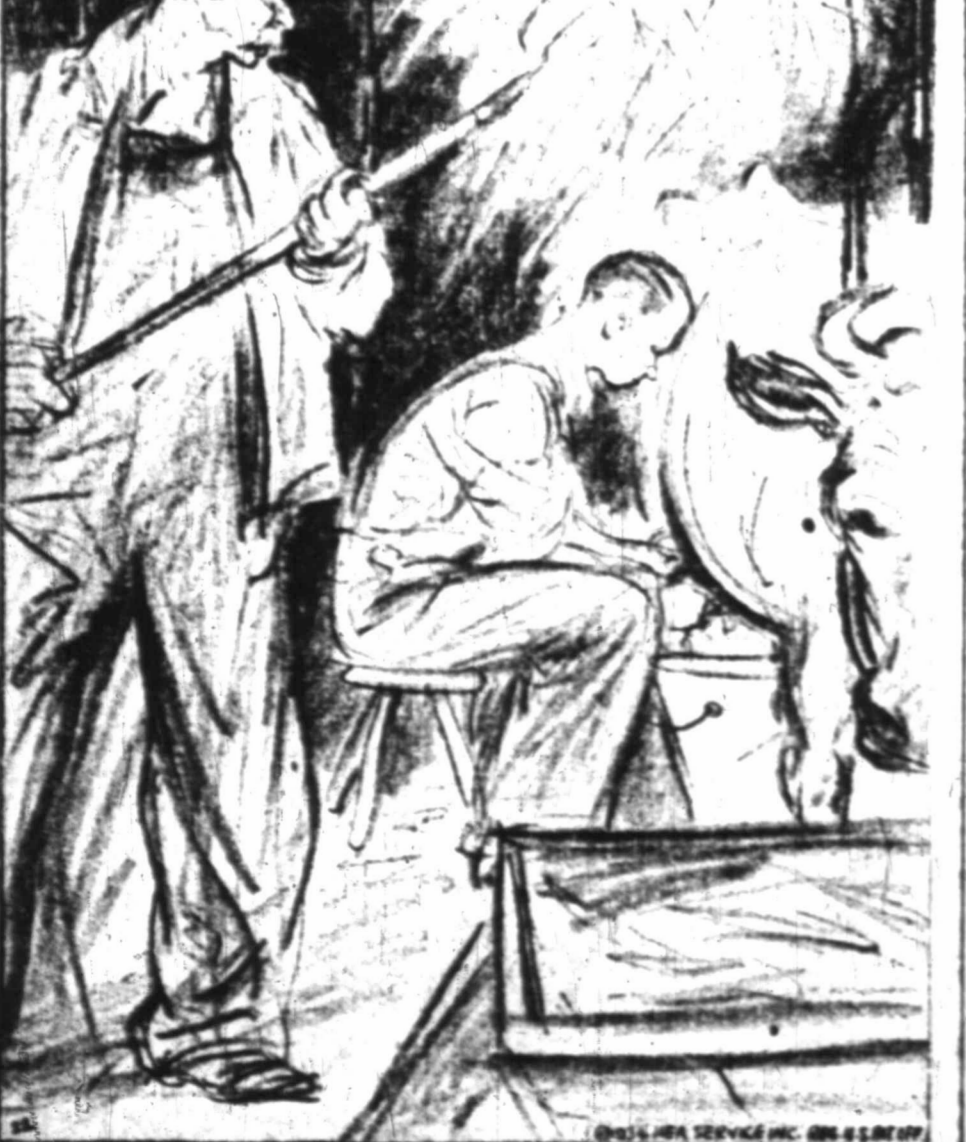

Samuel Insull's return to America makes a queer spectacle—a blending of the return of the prodigal son, the arrival at the jailhouse of a fugitive coiner, and the advent of the captain back from the wars.

The issues at stake in his indictment, his flight, his arrest, and his approaching trial are being overshadowed by the projection of his own personality. The whole affair is being dramatized, and it is being dramatized in the wrong way—as the case of one individual, not the case of a system.

For this trial ought to do more than simply tell us what kind of man Insull himself was, in the day when he was mighty. It can tell us what kind of country we were in those days, what sort of economic system we lived by, and how power was gained and used.

If we concentrate too much on the personality involved, we are apt to miss an important lesson.

Side Glances by Clark

"I don't care what you've learned in college, just so you haven't forgotten anything I taught you."

Texas Lens Still World's Greatest

PORT DAVIS (AP)—The mysterious light that makes the heavens glow at night is to be the first study by the astronomer at Mount Locke, according to Dr. Otto Struve, McDonald observatory director, who, with Mrs. Struve, spent several days here recently.

"The night sky is not dark," said the noted astronomer. It has a glow, if one will notice, and astronomy does not know what causes that.

Dr. Struve expects to have a cottage finished on Mount Locke, site of the McDonald observatory now under construction, so that an astronomer can be located here by September 1 to begin study of the lighted heavens with a monor telescope from Yerkes observatory at Williams Bay, Wis., of which Dr. Struve is the director.

A tremendous enthusiasm is astir among astronomers about the forthcoming institution, Dr. Struve said. He believes there is no place where the lighted sky observations could be made so well as in the Davis mountains.

Dr. Struve said the great mirror, cast at Corning, N. Y., several weeks ago for the world's greatest telescope in California did not come out successfully. It was ruined, he said. Another may be cast within a year.

Thus, the Texas mirror still holds first place. The mirror for the Mount Locke observatory has been called an 80-inch glass but it really is 82 inches, Dr. Struve explained. Some of the edge may have to be dressed off in shaping and polishing, however.

Daughter of Rumania

Archaeology Find Given to Texas U.

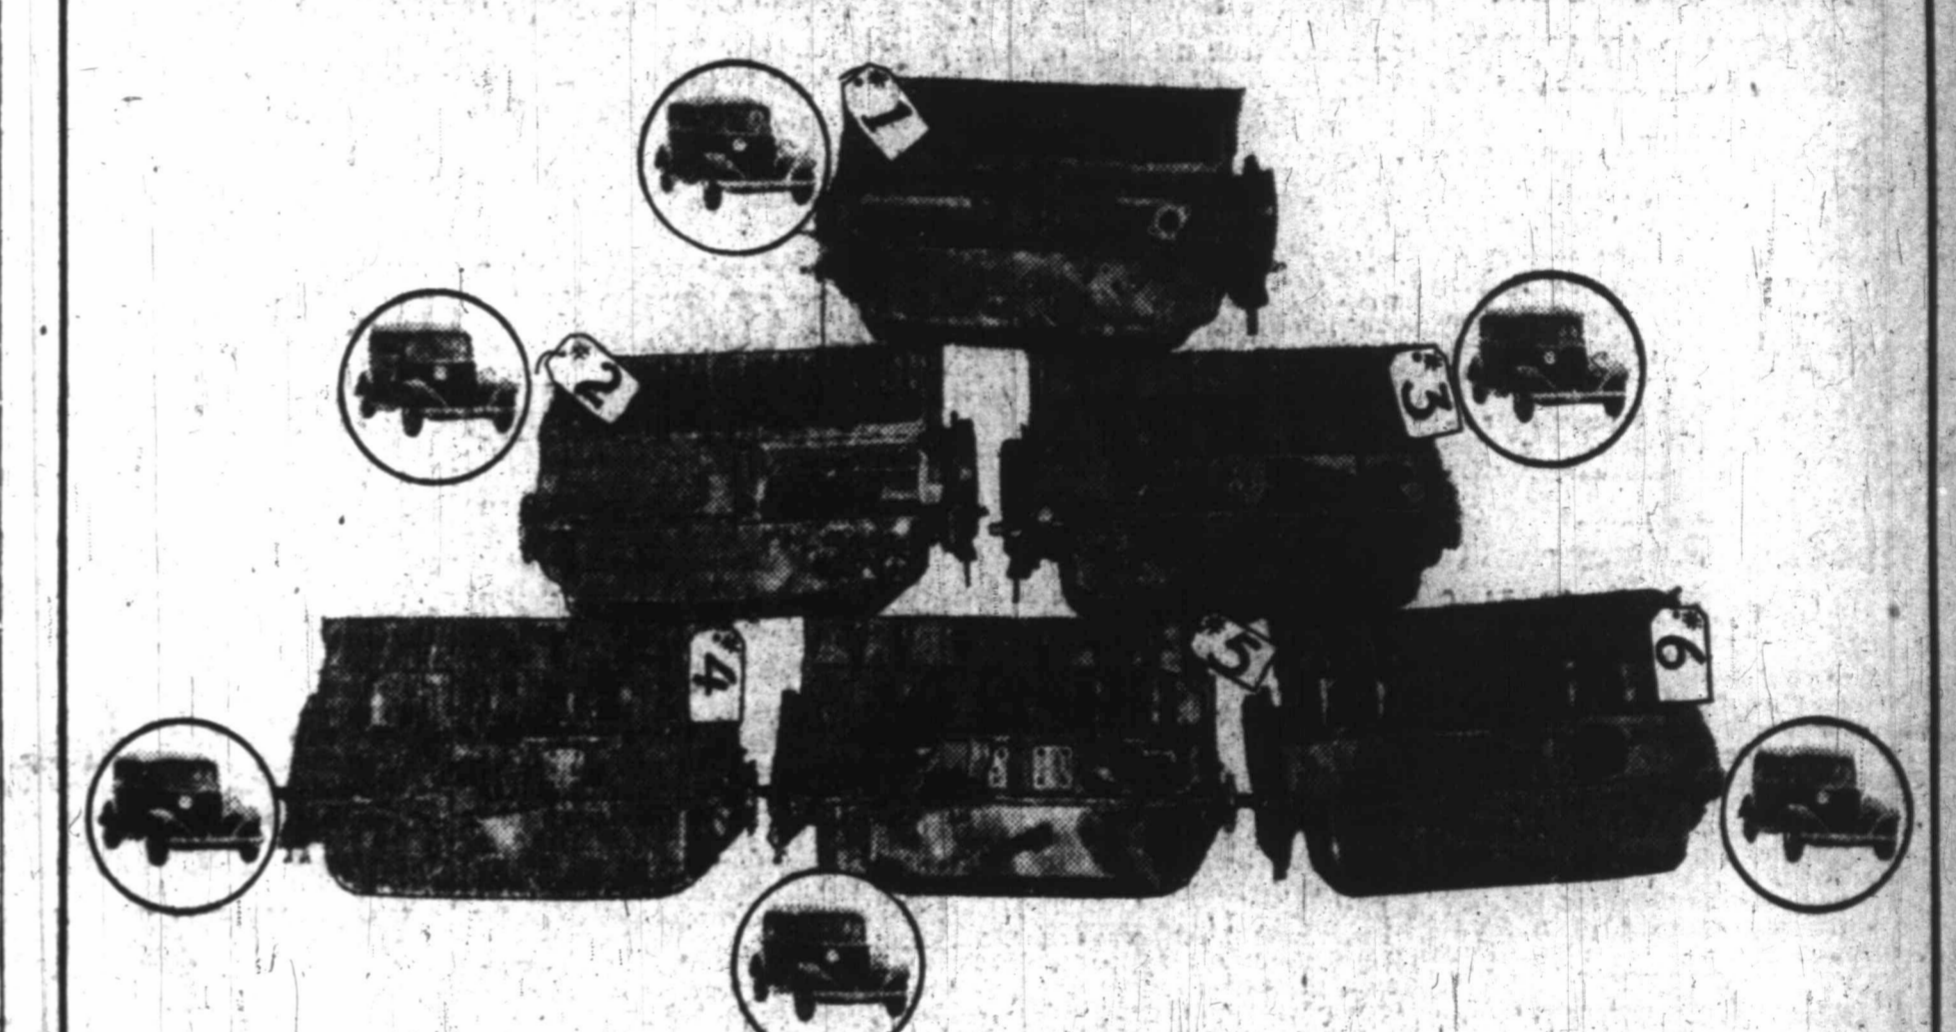

BROWNWOOD (AP)—Parts of a human skull and a huge lower jaw bone discovered near Brownwood a year and a half ago while rock was being excavated for a road have been given to Dr. J. E. Pearce of the University of Texas, by Dr. John Snyder, Brownwood dentist, who has had them in his care.

Discovery of the bones caused wide interest owing to the great size of the jaw and the thickness of the skull. It was hinted then that they might represent some race that inhabited this country before the Indians.

Soon after the discovery of the bones Dr. Pearce came to Brownwood to examine them. A number of others interested in archaeology have been here to view the bones. Articles describing them have been published in several scientific magazines and news stories about them have been widely printed.

Dr. Pearce said there is no reason to believe they are anything but bones of a large Indian. He said that nevertheless they were extremely interesting and he intended to study them closely. They will be placed in a museum at the university.

WE WRECKED THESE NEW MOTORS TO PROVE PROTECTION FOR YOURS!

NOW FOR THE FIRST TIME NATIONALLY KNOWN MOTOR OILS HAVE BEEN PUT UNDER A SUPERVISED "DESTRUCTION" TEST TO GET THE FACTS!

CONOCO produced New and Improved Germ Processed Motor Oil to give new and old motors the lubricating protection they should have.

An oil with several times the film strength of any mineral oil you can buy. A new degree of oily penetrativeness that creates the "Hidden Quart" protection, an exclusively patented feature that only Conoco can use. New, also, in that dilution does not affect its quality as a lubricant. Finally, practically no carbon or sludge.

To demonstrate to you how well it will protect your motor, a most daring and conclusive test was made at the Indianapolis Motor Speedway, under the supervision of the Contest Board, American Automobile Association.

Six oils were tested. Five of these were nationally known and advertised all over the country. They were purchased by AAA officials who certify them to be the oil sold to the public under their famous trade names.

The other oil was New and Improved Conoco Germ Processed Motor Oil—exactly the same as you can now buy at any Red Triangle Station. Six new, strictly stock cars of medium priced class were selected by AAA officials who made sure all were in equal condition. They were each assigned an oil of the same S. A. E. grade by lot drawing and numbered—no one but the chief AAA official knew which oil was in any car. After 2,500 miles of careful wearing-in at graduating speeds, they were drained and given five quarts of fresh oil and the oil filler caps sealed by an AAA official. No more oil was added.

Now for the real consumer test—the first of its kind in history—the test that was to prove, not by laboratory tubes, not by intricate testing apparatus, but by the grim

fact-finding drive under normal driving conditions—500 miles a day average at 50 miles an hour, as long as the motors could operate on just five quarts of oil—with no additions!

For the first 600 laps around this two-and-a-half mile track, all was serene—then things began to happen. With a roar and a rending of metal, the motor that contained Oil No. 4 stopped at 1,713.2 miles, the first to go out.

Rapidly following this, Oil No. 6 quit at 1,764.4 miles—then Oil No. 5 at 1,815.9 miles—all oils advertised as having the finest lubricating qualities! Oil No. 1 hung on for another day and did a trifle over 906 laps or 2,266.8 miles, when its motor stopped with a crash of broken metal.

Now it became a duel between two oils that were real lubricating oils! All through the next two days they defied each other, but on the eighth day, at 3,318.8 miles, Oil No. 3 had used up every ounce of resistance from every drop of oil and had wrecked its motor. A fine record, made by a fine oil, but second best.

Then a solitary car kept running, covering lap after lap—mile after mile—day after day—a total of 4,729 miles! Read it again—4,729 miles on that original five quarts of oil! It was New and Improved Conoco Germ Processed Motor Oil, proved the finest of all oils by an unquestionable decision.

Here is motor protection and low consumption! Here is an oil that will definitely cut your repair bills and give you most, in both miles and dollars. Drive into any Red Triangle Station—get a fill—and know that you have the best oil for protection and economy your money can buy.

Advertisement for CONOCO THE HIDDEN QUART STAYS UP IN YOUR MOTOR AND NEVER DRAINS AWAY. Includes logos for CONOCO, CONTINENTAL OIL COMPANY, and AAA CERTIFIED TEST. NEW AND IMPROVED CONOCO GERM PROCESSED MOTOR OIL EXCLUSIVE NEW FEATURES PROTECTED UNDER RECENT U. S. PATENTS.

## Here They Are, Beauties of C. I. A.

## Personals

J. Howard Hodge is in Dallas where he is transacting business.

John W. Dorsey of Andrews was in Midland Sunday visiting his mother, Mrs. H. B. Dorsey.

L. K. Eastman, San Angelo oil man, is in Midland transacting business.

Bob Preston is in Midland from the ranch visiting friends and relatives.

Ford Schrock of Royalty is in Midland visiting his parents, Mr. and Mrs. W. M. Schrock.

Bill Hogsett of Monahan will return home today after a visit with friends and relatives.

J. C. Cunningham and James R. Day of San Angelo are business visitors in Midland today.

Misses Mollie B. Bagley and Dropha Johnson visited friends in Odessa Monday.

Mr. and Mrs. Holt McWorkman are visiting relatives in Mossburn before returning from the Tulsa oil show.

## 'Viva Villa' Takes Place in List of Greatest Pictures

"Viva Villa!" Metro-Goldwyn-Mayer's spectacular story which closes today at the Yucca theatre, is generally classed among the great screen masterpieces of all time. Filmed largely in Mexico, with Wallace Beery as the star and with an exceptional supporting cast, "Viva Villa!" has emerged as one of the truly great productions of recent years. More than 100,000 Mexican natives were used during production, as many as 6,000 appearing on the screen at one time. Months were spent by the stars in the remote interior of Mexico, their only means of communication with the outside world being by airplane.

## Hollywood Backs Her for Queen

All the beauties in Hollywood are not film darlings, as Pat Campbell amply proves, posing here with the trophy she was given as a winner over 200 rivals for the title of Miss Hollywood. She will vie with other California girls for the crown at the state fair in Sacramento next autumn.

of Villa's turbulent reign, have been classed with the unforgettable march of the Clansmen in "The Birth of a Nation," with the chaotic race in "The Ten Commandments" and with the Oklahoma land rush in "Cimarron" as soul-stirring spectacles. Added to its lavishness is a fictional romantic story which runs through the photoplay, presenting Beery for the first time in many years as a lover. With Beery in the notable cast appear Leo Carillo, Fay Wray, Donald Cook, Stuart Erwin, George E. Stone, Joseph Schildkraut, Katherine De Mille, Phillip Cooper, Frank Puglia, Henry B. Walthall, David Durand, Francis X. Bushman Jr., Adrian Rosley and Henry Armetta. The picture was directed by Jack Conway.

### WAS FISHERMAN

SANDUSKY, O. (UP)—Weighed down with machine guns and sawed-off shotguns, police made a hurried run to the western end of the city. A shaky voice had just given a "Dillinger tip" over the phone. The voice had said that the roving desperado and "several of his pals" were eating in a west end restaurant. Police found only a Lake Erie fisherman, too inebriated even to speak.

One of every 20 Americans is on the federal payroll.

## Auxiliary Holds Last Meeting

Ten members of the Episcopal auxiliary were present at a meeting held at the home of Mrs. John Shipley, 1501 W. Illinois Monday afternoon. The meeting opened with the Lord's prayer followed by a prayer for the woman's auxiliary and the collect for the day. Routine reports and the roll call were read.

Committees gave reports on the recent sale of a quilt made by the auxiliary and plans were made on the making of another. Members of the woman's auxiliary acting as members of Trinity chapel, expressed their appreciation for a cash gift given to the church by the former Petroleum club.

This was the last meeting for the summer. Refreshments were served at the close of the services.

## ANCIENT BIBLE IN BOOKSHOP

TORONTO, Ont. (UP)—A Bible printed in 1613 thought to be one of the oldest in existence in Canada, has been found in a second-hand bookshop here. It contains the Order of Common Prayer, the historic John Speed Biblical geography and map of the Holy Land and a series of woodcut, with explanatory texts.

Yucca, Sat.: Adults 10c, Kids 5c. (Adv.) 63-4.

## Discuss the Life of Christ

The Bible study class of the Presbyterian auxiliary met at the church Monday afternoon for the last meeting before disbanding for the summer. The Book of Mark was reviewed with Mrs. W. J. Coleman acting as leader. Discussions on the "Characteristics and Personal Life of Christ" were read. Seventeen members were present.

## Announcements

**Thursday**  
Mrs. Preston Bridgewater, 717 W. Kansas, will be hostess at 10 o'clock Thursday morning to members of the Bien Amigos club.

**Friday**  
Meeting of the Anti club with Miss Madalene Roberts and Miss Aylene Alverson Friday evening at 8 o'clock.

Members of the Lucky 13 club and their husband will be entertained Friday evening at 8 o'clock at the home of Mrs. John P. Howe, 1311 W. Holloway.

Meeting of the Belmont Bible class with Mrs. D. E. Holster, 901 N. Whitaker, at 3:30.

Tastes of the theatrical stage are exemplified in Ted Shawn's choice of beauties at Texas State College for Women (C. I. A.). The eight girls pictured above were selected from a group of 32 nominated for the distinction.

Whether Shawn and his dancers rendered their decision with beauties of the stage in mind, we do not know, but it is certain that poise, grace and charm were the deciding factors. The eight girls were introduced at the senior formal prom which is the outstanding social event of the year honoring graduating seniors.

Miss Gladie Parr, a striking olive brunette from Wausler, was chosen most beautiful girl in the entire group. She is a junior at the college majoring in dramatic art. Miss Melba Gambie, junior journalism major from Ranger, was also chosen from that class.

Freshman beauties include Miss Mary Elizabeth Weir, journalism major from Charleston, Ill.; Miss Joan Woodrum and Miss Ardis Ankerson from San Antonio.

Miss Nettie Mae Brown, business administration major from Beaumont, and Miss Ruby Pritchett, also a business administration major from Bedias, were those selected from the senior class. Miss Margaret Major, sophomore president, was named the most beautiful of her class.

The Minuet club will give its regular monthly dance Saturday night in the ballroom of Hotel Scharbeier. The affair will be informal.

Circle B of the Presbyterian auxiliary will hold an ice cream social on the church lawn Saturday afternoon at 6 o'clock.

### The Sports Horn

BY BILL PARKER

#### IN COMEBACK ROLE

The manner in which he is plotting the Tulsa Oilers suggests that Jake Atz is far from through as a pennant-winning skipper. Critics who attributed his six consecutive championships at Fort Worth mainly to a strong and well-balanced club will have to find another reason if Atz and his Oilers continue their pace.

After leaving Fort Worth several years ago Atz managed Dallas, Shreveport and New Orleans with no success. Some critics hastened to declare that the once-miracle manager of the Texas league probably was not a wizard at any time but just a fine ball club that Paul La Grange, the business manager, moulded and kept intact for several years.

Today Atz is on the comeback trail. He has been through a series of hard knocks the last three years but now is his old self and again proving his worth as a manager. He hasn't a powerful ball club at Tulsa. He has the Oilers hustling and is again employing the tricks of inside baseball he used when steering the Cats. Jake Atz, day by day, probably is the Texas league's most popular character with fans and a majority of sports editors and they are gratified to see his team in the first division battling for the pennant. It means Jake is out of the rut.

The biggest disappointment of the Texas league season was the inaugural night baseball at Dallas. Plans had been made for a gala night. Club officials were confident the crowd would be 4,000 or more with Houston opposing the Steers. But at game time the crowd was estimated at 400.

Poor attendance at Dallas seriously hampers operation of the entire league because a substantial gate at Dallas has meant help to towns like Beaumont.

Texas league moguls are trying to keep their chins up. They are forcing smiles and looking forward. Vice President Bob Taitton of the Dallas Steers, believes attendance will increase when races end at the Texas State fair track but he takes a grain of salt with his optimism.

#### DIDN'T QUITE SAVVY

LITTLE RIVER (Bell county). (AP)—C. I. Burks, 76-year-old Bell county pioneer, who was appointed the first postmaster of Little River during Cleveland's first administration, says he didn't know the meaning of "two-bits" when he came to Texas in 1877, from Georgia, his native state.

On entering central Texas Burks came to Rockdale. There he boarded a hack en route to Bell county. After crossing the San Gabriel river bridge he said he was halted by J. H. Holtzclaw, a toll-collector, who lived in an old log cabin at the foot of the bridge. "You owe me 'two-bits,'" Burks says the keeper told him.

"I was puzzled at his absurd language," the pioneer settler said, "for I didn't know whether he wanted two dollars or two potatoes. Back in Georgia we had no such methods of counting money and naturally I didn't know what he meant by saying 'two-bits.' I handed him one dollar and waited to see how much more money he wanted."

Burks said when the toll collector handed him seventy-five cents in change he was convinced that "two-bits" in Texas was just as much as twenty-five cents in Georgia.

### Desert Love Drama 'Heat Lightning' at Ritz Wednesday

"Heat Lightning," a drama of desert love and hate, comes to the Ritz theatre tomorrow and Thursday with an all star cast headed by Alene MacMahon.

This Warner Bros. picture is said to combine dynamic action with romance and light comedy. Like "Grand Hotel," "Union Depot," "Central Park" and other pictures of that ilk, the action all takes place in a single locale, in this case the picturesque Mojave Desert.

Though incidents are crowded into twenty-four hours to keep the production moving in fast tempo, there are three romances, all of a clandestine character, which furnish the smashing climax in which a girl slays her lover.

Alene MacMahon is the girl and Preston Foster her lover, a no-account but fascinating crook whom she cannot resist. A second love affair is that of Ann Dvorak, younger sister of Miss MacMahon, who in a mad search for pleasure, throws her heart away on a young village scamp.

The third romance, if it can be dignified by that term, is carried on in a quasi-comic buffle between Bath Donnelly and Glenda Farrell, Reno divorcees out to graze all the fun there is, over the love of their chauffeur, Frank Mc-

Hugh. Others in the cast include Lyle Talbot, Theodore Newton, Willard Robertson, Harry C. Bradley and James Donlin. Brown Holmes and Warren Duff wrote the screen adaptation from the Broadway stage hit by Leon Abrams and George Abbott. Merwyn LeRoy directed.

### Many Mexicans Explore Capitol

AUSTIN, (AP)—Texas' state capitol annually attracts hundreds of Mexicans who come from afar to explore its expansive corridors

and inspect its architectural grandeur. Sundays and legal holidays they come to the huge granite building in scores. There are whole families and nearly all groups include a babe in the arms of the father or mother with the oldest of the children riding herd on the younger.

They do not give the building casual examination. They start at the bottom and end at the dome for a bird's-eye view of the capital city lying cradled between purple hills in the valley of the Rio Colorado.

Other points of interest around Austin, the old land office building, the new highway building and the extensive parks are visited but "El Capitolio" is the center of attraction.

The building, with its ornately carved wooden doorways, long and high-ceilinged halls and many paintings portraying incidents in Texas' history, also is visited by hundreds of persons from out of the state who annually pass through Austin. The capitol dome can be seen for miles when other parts of the city still are obscured.

A counter-attraction will be set up with completion of the main unit of the library and administration building at the University of Texas. The unit will be built on higher ground than that on which the capitol is situated and its tower will be higher by several feet than the capitol dome.

Hopes that the capitol can be re-decorated and made spick and span for the Texas Centennial observance in 1936, still are being held by state officials. An appropriation will be sought at the next session of the legislature either to match a federal appropriation or to carry out the work as an independent state project.

Both houses of the legislature at the last special session voted an appropriation to repair and redecorate the building but it failed when the houses were unable to agree on a conference committee report.

In 1800, India had a coin in use which was only one-eighth inch wide.

### Restoration of Fort Is Sought

AUSTIN, (AP)—Restoration of Fort Parker, from which marauding Comanche Indians captured Cynthia Ann Parker in 1837, will be sought as a Texas Centennial project.

Limestone county citizens have pledged funds to acquire the land on which the fort stood, a mile from state highway 14 between Groesbeck and Mexia. D. E. Cole, chairman of the state park board, has promised cooperation in securing a state park designation for the site and establishment of a Civilian Conservation

corps camp for its improvement next fall. A movement is under way in Limestone county to secure funds for the erection of a copy of the long abandoned fort. A peasant depicting pioneer life, the fall of the fort and the capture of Cynthia Ann Parker is planned for Centennial year.

Fort Parker, one of the numerous Texas posts established by white men in their conquest of Indians, was raised by the Comanches in 1837, many of the Texans massacred and the little Parker girl captured.

She was reared as an Indian and married to one of the chiefs, later to be recaptured by Texans and returned to white civilization.

# GREATEST RESERVE CAPACITY for Unusually HOT DAYS — ELECTRIC REFRIGERATORS

No matter how hot it is outside, it's always 50° or less in your ELECTRIC Refrigerator

Designed specifically to meet the unusual demands of Texas' summers, Electric Refrigerators have proved their ability to maintain correct temperature of 50 degrees or less constantly regardless of outside temperatures. Electric Refrigerators are built with tremendous surplus power for no other reason than to offset the continued blistering heat so common in the Southwest.

Prices are low—operating costs are low—maintenance costs are negligible—so buy safe, dependable Electric Refrigeration.

*Time-Tested and Proven in more than 100,000 Texas Homes*

### CATS MAKING BASEBALL HIT

By W. WINSTON COPELAND  
United Press Staff Correspondent  
FORT WORTH, (AP)—The Texas league's "unknown quantity"—the Fort Worth baseball team—is making itself a known quantity, much stronger than anticipated.

Although still far from the league lead after a pitiful start this season, the club seems to have found the spirit that ruled Fort Worth teams back in the '20's when Fort Worth was a frequent Dixie series

### Misfortune Also Makes Strange Bedfellows

contender. The present status of the club is all the more remarkable when it is considered that even until late last winter it was not certain the club even would be in the league.

Manager Del Pratt, a veteran but new at the Fort Worth helm, had only a few weeks to scramble together a club. His scrambling at first appeared lumpy, but the acquisition of Art Shires and Max West seems to have smoothed out the mixture.

There are no pennant chances here, as yet, but fan interest is reviving and there is more than a faint hope that the Cats may be in

the Shires play-off. The Cats this year are hitting. For several years they have been just another club at bat. Six regulars now are slapping the ball above the 300 mark and getting their hits at timely moments.

To Sig Broskie, rookie catcher, goes much of the credit, as much as to "Whattaman" Shires and Max West. This youngster has all the earmarks of big league timber.

He is batting above 300 and breaking up ball game after ball game. Shires has a strong throwing arm, handles pitchers well, is busy, a constant hustler and is the spark-plug—along with Shires—of the team's spirit.

Another rookie, Cecil Smith, a Fort Worth sand-lotter, has stepped into the vacancy at shortstop left by injury to the veteran Jack Tavever. Smith started wobbly at first, but his fielding now is good and he is hitting above .300, harder than Tavever did.

Shires, West, Tauby and McHenry are other regulars hitting in the select ring. Only two regulars, Scarritt and Holly, now are under the 300 mark, but each makes up this weakness with sparkling defensive work.

The question facing the Cats is whether the pitching staff can stand the gaff. If so, the pre-season underdogs may turn out to be the post-season champions.

### 'SWATER OPENS A NEW GOLF COURSE

**SWEETWATER**—West Texas' most scenic golf course, hazardously constructed around the rugged shores of Lake Sweetwater, from a sporting standpoint, was opened Sunday.

The course was opened as one of the few grass-greens links in all West Texas.

Golfers by the score made initial rounds over the course, from early morn until the last rays of sun.

The 3,118-yard course has a par of 85.

Length and par of the holes is as follows:

- No. 1, 390 yards, par 4.
- No. 2, 163 yards, par 3.
- No. 3, 341 yards, par 5.
- No. 4, 450 yards, par 4.
- No. 5, 138 yards, par 3.
- No. 6, 365 yards, par 4.
- No. 7, 300 yards, par 4.
- No. 8, 415 yards, par 4.
- No. 9, 266 yards, par 4.

The course offers three water hazards, on two of which there are special tees built for women golfers. Six of the nine holes have boundaries.

A charge of 20 cents a round, for each nine holes, is to be charged. Those desiring a season ticket, entitling the holder to play for a year, can purchase one for \$15, or in combination with a fishing permit, which sells for \$5 itself, for \$18, a reduction of \$2.

E. B. Lovvorn, formerly connected with the high school athletic staff, is in charge of the course and the club house.

### TEXAN'S BILL ASKS FOR GREATER ARMY

**WASHINGTON** (AP)—Machines can occupy territory, but men must hold it, hence rifles and bayonets still are the decisive factors in military strength, according to Rep. Clark W. Thompson, (Dem., Texas), author of a bill to enlarge the United States army. He is a former officer in the marine corps, and now a major in the reserves.

Conceding the tactical utility of motorized "cavalry," aircraft, and the military machines, Rep. Thompson holds that mechanization does not reduce the need of human combatants.

"War is never won without holding territory, and you cannot hold territory with machines alone," he said in a United Press interview. "It is men with cold steel that win wars, and for every new military machine some device is invented to counteract its effect. Anti-aircraft guns are becoming highly effective, and for every combat plane there is another to shoot down. There are tank-traps for the tanks, and guns that can penetrate tank armor.

"I am not opposed to mechanization, but would oppose machines beyond the adequate strength for their management. In Chinese-Japanese clashes last year the Japanese had all the latest machinery and inventions, but they made their real advances by infantry on the march."

The Thompson bill, rarely subject of extensive hearings before the house military committee, proposes that the commissioned strength of the active list of the regular army be fixed at an annual average of 14,000, and the enlisted personnel at 165,000 exclusive of Philippine Scouts. Present strength is approximately 118,000 enlisted, including the scouts, and 12,000 officers, including the Philippine Scouts.

"I know of no military expert who does not contend that the lowest safe point for the American arm, is 165,000 men," Rep. Thompson said to the United Press. "That is the smallest number that could adequately man the defensive and offensive machinery of the army in event we were attacked. Our present entire combat force could be seated in one large stadium, as the Yankee baseball park in New York."

There are 87,000 troops within the continental limits of the United States, including engineers, quartermaster corps, medical corps and other non-combatants. In a sudden national emergency we would have only 50,000 rifles available immediately for combat duty.

Rep. Thompson said that the present military strength of the United States, despite its great population is less than that of small countries such as Greece and Belgium.

He furnished the following statistics of military strength for certain countries, according to best available estimates at the end of 1933:

- United States of America—Active 135,032 (since reduced), trained reserve, 330,000; total 465,032.
- Argentina—Active, 34,708; trained reserve, 309,454; total 344,162.
- Belgium—Active 80,224; trained reserve, 450,000; total, 530,224.
- Brazil—Active 85,190; trained reserve, 171,180; total 256,370.
- British Empire—Active 296,250; trained reserve 694,946; total 1,141,197.
- Chile—Active 22,100; trained reserve 177,120; total, 199,220.
- France—Active 594,300; trained reserve, 6,328,000; air force, 30,913; total, 6,922,213.
- Greece—Active 85,875; trained reserve 485,046; total, 570,921.
- Italy—Active 437,268; trained reserve, 5,885,000; air force, 173,171; total 6,495,539.
- Mexico—Active 59,249; trained reserve, 29,962; total, 89,211.
- Netherlands—Active 29,500; trained reserve 330,000; total, 359,500.
- Spain—Active 203,033; trained reserve, 2,095,000; total, 2,298,033.
- Sweden—Active 33,500; trained reserve, 261,700; air force, 253; total 295,253.

The first balloons were inflated with hot air, obtained by burning damp straw and wool.

**City**  
(Continued from page 1)

famous oil field fire fighter, in extinguishing a flaming gas well, set off for demonstration purposes on the exposition grounds. Jim Fitzgerald of Skelly was among Midland men who attended the show.

Tulsa was crowded with oil men, from all over the world and the Tulsa people made unusually successful efforts to be hospitable hosts. Attendance at the oil show was the greatest on record.

Two other towns had exhibits at the Tulsa oil show. One of these raised a special fund of \$600 for exhibit and literature expense. The other city's expenses were not known. Without asking any citizen for additional funds, the Midland exhibit was financed from the chamber of commerce budget at a cost of less than \$185 minus the literature and less than \$240 for all costs, including literature.

Without a single exception, every former Midlander seen said he wished he were back in Midland.

The oldest set of bells in the United States is a set of four, bearing the date 1682, which hang in the Moorish belfry of the Spanish Cathedral in St. Augustine, Fla.

**Childress Athlete Has Good Record**

**CHILDRESS** (AP)—Vestal Newberry, ranked among Childress athletes second to only Leonard Ratican, "Red Raider" of district five, has not confined his achievements to fields of sport. During his 11 years in school he has been neither absent nor tardy. In addition he has always maintained a high scholarship record and is among the best students in the graduating class.

He captured the 1933 football eleven which lost the district five title by a single defeat in which Wichita Falls pushed over the winning touchdown in final minutes of play. All-district guard honors were accorded Newberry. On the basketball team which he also captained he was a star forward and guard and in track placed first in the 100-yard dash in several tournaments, placed in the 220 and ran one lap of the relay team which captured district honors.

While in the lower grades Newberry attended a rural school and lived several miles from the school building but managed to be in his class promptly every day.

Although it is not definitely decided he is seriously contemplating entering Baylor university next fall.

## IT LOOKED LIKE A BARGAIN

Today, the windows and shelves of many stores are crowded with packages bearing "bargain" prices. With prices so low, not getting your money's worth seems almost impossible.

No matter how strongly you are urged to buy these "bargain brands"—or how often you are told they are "just as good"—it is safer to refuse them unless you are fully familiar with their value.

But it pays to remember that while some of these products are bargains, others are not.

Look for the *real* bargains now among brands which you know—by your own experience, through their advertising, or by the reputations of their makers. Ask for them by name! Insist on getting what you ask for!

In some of the unfamiliar packages you see so frequently today, there is *cheap merchandise*—the offering of a few manufacturers who have gone too far in their efforts to make your dollars buy more *quantity*. Products in which these manufacturers have sacrificed *quality* to make a low price still lower and, seemingly, more attractive.

Many of these reliable brands now cost less than they have in years. But *only the price* has been reduced. The *quality*—which originally made these products popular with you and many others—still remains as *high as ever*.
