

Dim your lights when approaching car, not only for safety but for courtesy.

THE WEATHER
West Texas: Partly cloudy, warmer in the north, west tonight; partly cloudy, warmer Tuesday.

Smugglers, Cops Clash On Border

Four Mexicans Are Reported Killed, Another Injured

BROWNSVILLE, Jan. 31 (AP).—Four men were killed and one was wounded in three separate clashes between Mexican authorities and unidentified bands, reported to be munitions runners, across the border from here today.

General Gabriel Cervera, commander of the Mexican army garrison at Matamoros, said two members of such a band had been slain at El Soliseno, 20 miles west of Matamoros.

A Matamoros policeman was killed and another officer wounded when they attempted to halt a truck on the outskirts of Matamoros.

The McAllen Monitor said it had an unconfirmed report that 18 men had been killed in a fight at Ramirez, 35 miles west of the border.

The newspaper said it had reliable information small bands had been looting villages near the border for several weeks.

Employment Service Office Here Finds Positions for 3002

Ira C. Pratt, senior interviewer in charge of the Midland office of the Texas State Employment Service, announced today that a total of 3,002 jobs were filled by the local office during 1937. Of these jobs, 2949 were in private industry, and the remainder of openings filled by the employment service were in public works, mainly highway and building construction.

A total of 638 of these jobs provided permanent employment, Pratt said, while openings provided for one month or less in duration accounted for 1364 placements. Farm work provided 1068 jobs filled by this office.

Most of the jobs filled locally last year were in agricultural, domestic and commercial pursuits. The local placement record showed that the 3,002 jobs were filled with 2268 men and 734 women workers. The records showed placements of World War Veterans totaling 37.

In obtaining orders for workers, staff members of the local office made 251 initial contacts with employers, and 403 revisits to employers.

The records showed a total of 394 applicants actively seeking work, and registered with the local office on December 31, 1937, as compared with 237 in the active file of the same office on the same date of the previous year. The local office received 1438 new applications by job seekers during 1937. Mr. Pratt said.

Each opening is filled solely on the basis of the workers' qualifications and the employers' requirements, Pratt emphasized. The final selection of the workers he wishes to employ is made by the employer, he said, and no charge is made either to the employer or to the worker. The local office is located at 102 1/2 South Main street.

Midland Couple Recovering From Wreck Injuries

Mr. and Mrs. W. B. Chapman are recovering at their home here today from injuries suffered Saturday night when the car in which they were riding overturned north of Odessa.

Chapman reported that he lost control of the car while en route from Hobbs to Odessa and that it overturned several times on the highway, finally coming to a stop without having ever quit the road. A passing motorist stopped and brought the couple here where they received medical attention.

Both Chapman and wife escaped without receiving any fractures but are suffering from the severe shaking up they received from being tossed around in the rolling car. He is able to be up but Mrs. Chapman is still confined to her bed.

Teacher Called To Jacksonville

Miss Hovey Jenkins, teacher in the Midland public schools, left for Jacksonville, Texas, Sunday night on receipt of news that her grandmother had died there Sunday morning.

Details of the funeral arrangements had not been learned by her friends here at press time.

TWO LANDINGS SUNDAY.

Two landings were reported for Sunday at the Midland airport. Lieutenant Harper, flying an A-17, came from Bartlesville field, La., and continued to Fort Bell, Okla. Lieutenant Johnson, in an A-17, arrived from Biggs field, El Paso, and departed for Hensley field, Dallas.

BUSINESS MEETING.

Noon class will hold a business meeting at the home of Mrs. Laura Duffield, 111 W. Pennsylvania, Tuesday evening at 8 o'clock.

The Good Earth

But China came back when the shells stopped falling, for China will live forever by its own adage. Chinese began rebuilding, brick by brick. They fashioned their stone and mortar on the spot where their homes had been—as they in turn had been rebuilt on the ruins of the homes destroyed in 1932, or 1927.

Attorney Declares Vacancy Claim Aid Was Offered Him

AUSTIN, Jan. 31 (AP).—Gilbert T. Adams, Beaumont attorney, told the senate investigating committee today that F. S. Sheridan, Land Commissioner McDonald's campaign manager in Houston in 1936, had offered last August to aid him in seeking to obtain McDonald's approval of a vacancy claim.

Adams said he did not accept Sheridan's proposition and that his claim had not been allowed. State land office employees told him, Adams said, they were convinced no vacancy existed.

Today was the committee's fifth day of inquiry into oil leasing and vacancy practices during McDonald's first term in office.

Another Producer Brought in on Vacuum West Side

BY FRANK GARDNER.
The east side of the Vacuum pool Lea county, N. M. added another producer today when Phillips Petroleum Company No. 1 M. E. Hale, an outpost, flowed 29 barrels of new oil the last hour of a five-hour test. Production the first part of the test represented oil load No. 1 Hale is now shut in for storage. It is botomed at 4,500 feet, in lime, and has not been shot nor acidized. Location is the center of the northeast of the southeast section 35-17s-34e, a mile northwest of the two Texas Company producers at the south end of the pool.

A mile and three-quarters north and a quarter-mile west of the Phillips well, Magnolia No. 3 State-Bridges, also an extension of production, is flowing by heads every two and one-half hours after halting drilling at 4,551 feet. It found first pay from 4,495 to 4,509 and an increase from 4,537-48. Operators are running tubing for test of natural output. The well is located in the center of the southwest of the southeast of section 23-17s-34e.

Rumors of a pipe-line outlet in the near future for the Vacuum pool became stronger today with the report that the Texas-New Mexico Pipe Line Company has bought enough 8-inch pipe for the line. The company has already surveyed for a line from the pool to the Lynch area, 18 miles to the southwest.

Texas No. 1 Corbin, wildcat eight miles west and a mile south of the Vacuum pool, is drilling at 3,823 feet in anhydrite and lime. In eastern Eddy county, Texas, No. 1 Welch, a wildcat approximately four miles east of the Getty pool, is drilling at 2,062 feet in brown lime. It is reported running high structurally. Location is in the center of the southwest of the northeast of section 30-21s-31e.

Swabbing through tubing was slated to begin this afternoon in Magnolia No. 1-A McKee, Ordovician prospect in the Imperial area of northern Pecos. Limer, with wall packer, has been set in the hole. Four-foot anchor is set on bottom, at 5,294, then a 15-foot joint of 7-inch pipe, the top eight feet of which are perforated, and seven joints of the blank liner are above perforations. An eight-foot canvas packer is set on top of perforations. The No. 1-A McKee showed some "kick" while liner was being set.

Humble No. 1 Lewis & Wardlaw, Ordovician test in western Tom Green county, is drilling below 4,856 feet in shale and lime.

Tops Solid Lime High.

Solid lime was topped at 4,470 by Shell No. 1-C Baumgart, important outpost a mile and a half east and one-half mile south of the farthest east producer in the Denver area, southern Yoakum. It is only 31 feet lower on the solid lime than Shell No. 1-B Baumgart, west offset to the No. 1-A Baumgart, an extension producer. No. 1-C Baumgart, located 1,320 feet from the north, 2,200 feet from the east line of section 866, block D, Gibson survey, is drilling ahead at 4,547 feet.

After initial acid job of 1,000 gallons, Shell No. 1-B Baumgart flowed 19 3/4 barrels of oil on a one-hour gauge, with 1,500,000 cubic feet of gas. Operators are preparing to retreat with 4,000 gallons. Bottomed at 5,010 feet, in lime, the well flowed 120 barrels on 24-hour natural test, with 750,000 feet of gas. It is 1,320 feet from the south and 440 feet from the east line of section 829, block D.

Guilf No. 1 S. J. Dixon, Yoakum test between the Bohago area and the Bennett pool, is drilling at 4,320 feet, in anhydrite.

Cochran Well Hits Water.

J. R. Meeker et al No. 1 Wright, eastern Cochran wildcat, is shut down for orders at 4,997 feet after encountering sulphur water from 4,993-97. It is making one-third of a barrel of oil and two-thirds of a barrel of sulphur water hourly. The well had shown some water, described as salty, from 4,946-43, but it was believed to be rotary drilling fluid pumped into formation before changeover to cable tools was made. It is reported that operators will plug back to shut off water, then will acidize zones around 4,900 which showed saturation and porosity.

Amerasia No. 1 R. W. Robertson, wildcat a mile east of the Seminole pool in Gaines, on first drillstem

District Court to Open Here Feb. 28

A call to the Midland county grand jury to meet February 21 and civil jurors to report each Monday for the following three weeks has been issued by district judge Chas. Klapproth.

Grand jury duties at the forthcoming session are expected to be somewhat lighter than at the last term of court, here, one of the heaviest ever held. At the present time, there are no murder cases on the docket, other than one or two carried over from a previous term.

A complete list of jurors follows:
Grand Jury:
G. Frank Aldrick, Hugh C. Barnes, Russell Conkling, J. L. Crump, W. T. Doherty, John H. Edwards, Terry Elkin, John P. Butler, E. R. Greathouse, J. L. Greene, A. E. Horst, Jno. P. Howe, R. B. Lawrence, J. L. McGrew, J. R. Martin, F. J. Middleton, J. C. Miles, R. L. Miller, P. J. Mims.
Petit Jurors:
Feb. 28:
J. A. McClurg, A. F. McKeen, J. P. McMullan, Max M. Mallicoat, J. S. Maxwell, J. A. Mead, John B. Mills, Roy Minear, E. J. Moran, Paul Osborne, T. E. Neely, J. B. Neil, Geo. Phillips, W. E. Figg, M. O. Prestidge, Foy Proctor, W. M. Pyle, F. D. Rice, W. E. Richman, Jess Rodgers.
Ben T. Rodgers, Bert Ross, P. A. Schlosser, W. H. Seales, Q. M. Shelton, H. E. Skipper, J. C. Smith, W. B. Sparks, J. M. Speed Jr., C. O. Stanley, O. W. Stice, F. A. Stout, O. L. Stultz, N. E. Tanner, G. E.

Wintery Weather Marches Through State Today; Relief Is Foreseen

Crashes Niagara's Honeymoon Bridge

With a roar that drowned out Niagara itself, famed "Honeymoon Bridge" tore loose from its moorings on two nations and collapsed into the gorge of the Niagara river, missing the three workmen who appear as tiny dots at lower right. Losing a 36-hour battle with an ice jam 90 feet high, the historic steel span moved downstream slowly, a twisted ruin riding a modern "glacier."

Totally Ignores a Parking Ordinance

Digging out in sub-zero weather after the century's worst snowstorm proved a staggering task in Michigan's buried upper peninsula as this remarkable photo of Ironwood's Main street shows. Laying behind dust, suffering, isolated communities, stranded miners and school children the 150-inch snowfall piled drifts 25 feet deep in places. Ironwood battled 12-foot drifts downtown

Two Youths Jailed On Burglary Charge

Two Midland youths, Walter Glenn and Dick Reynolds, were returned here from Big Spring and placed in jail Sunday after being arrested Saturday in Big Spring in connection with alleged forced entry and theft of about \$20 from Reed's tourist camp here sometime Friday night. Burglary charges were filed against the two boys this morning.

TO SEAGRAVES.

Mr. and Mrs. J. C. Elder left today for Seagraves where they plan to spend sometime.

test, from 5,070-5,112, showed four and one-half stands (40 3/4 feet) of drilling mud in 30 minutes. A second test, of one hour's duration, was from 5,068 to 5,112 and showed 100 feet of drilling mud. The well had logged a showing of oil and some porosity from 5,104-12, resulting in operators decision to test. They are now preparing to run 5 1/2-inch casing to around 5,000 feet.

Merchants Warned Not to Cash Check

Midland merchants are warned through the local chamber of commerce not to cash check issued to G. A. McCallister by the Pritchard Construction Company on the Valley State Bank of Des Moines, Iowa. The check, Workman's No. 137, was either lost or stolen in Odessa, the Midland Chamber of Commerce was notified by McCallister. The check was in the amount of \$45.54. Merchants are asked to notify the sheriff of Ector county should the check appear here.

MEETING POSTPONED.

Regular meeting of the Midland safety council has been postponed from tomorrow, Feb. 1, until Tuesday, Feb. 2, according to announcement of Mrs. John W. Skinner, chairman. The meeting will be held in the chamber of commerce of ice.

RETURNS HOME.

Mrs. Leslie E. Hoss has returned from a visit to Tulsa, Okla.

Princess Juliana Becomes Mother of A Daughter Today

AMSTERDAM, Jan. 31 (AP).—Crown Princess Juliana of the Netherlands gave birth to a daughter and heir-presumptive to the throne today. The princess was born at Soesdijck palace, and mother and child are reported doing well.

The child may be the country's third consecutive woman ruler. There has been no male in direct line to the throne for 64 years.

MEETS ROTARY HEAD.

Roy McKee returned late in the week from San Antonio where he attended the meeting of the State Association of Life Underwriters. While there, he attended the meeting of Rotarians of Texas honoring Maurice Duperry, of Paris, France, president of Rotary International and was personally introduced to the official.

HERE FROM WINTERS.

Bob Harrison, former Midland resident, was here from Winters today, visiting with friends.

Freeze Is Felt Clear To the Gulf

Low Temperatures For Year Recorded In the Panhandle

By Associated Press.
Wintery weather marched through Texas to the sea today, kicking up a storm in the Gulf of Mexico and leaving behind the year's lowest temperatures.

Freezing weather extended deep into South Texas, touching Houston with 28 degrees. In the Panhandle, temperatures dropped as low as 10 degrees.

The weather bureau hoisted storm warnings from Pensacola to Brownsville.

In East Texas, floodwaters were receding and all storage pits were safe, operators said, from further danger of crumbling.

The freezing weather hit Fort Worth and Dallas, and temperatures from 16 to 20 degrees were expected tonight.

The center of the cold wave was expected to pass through Tyler Monday night; at Houston, where it rained some Sunday, a 28 to 32-degree minimum was expected, and Austin and Temple awaited freezes.

The mercury dropped to the lowest level of the year in Midland last night when a reading of 18 degrees was recorded. During the morning it climbed back to 35, where it had hovered since.

The low temperature of last night was second lowest of the season, being only one degree higher than the minimum figure, 17 degrees, registered in December.

Relief from the cold has been promised West Texas in a forecast by the weather bureau in Dallas. Warmer weather tonight and tomorrow is the prediction. However, temperature ranging from 15 to 24 degrees has been forecast for East Texas, temperatures from 30 to 36 for the Rio Grande valley.

Watson Students Present Musical Program Today

A string ensemble and soloists from the Watson school of music were presented by Miss Lydie G. Watson and Ned Watson in a program at the high school this morning at the chapel period.

Good tone quality, good time, and worthwhile musical selections marked the program which included the following numbers:

(a) Finky the Sailor March (Wellaby); (b) Moonlight Beach Walks (Zamecmik)—string ensemble.

Piano solo: Sonata in G (Beethoven)—Ann Ulmer.

Violin solo: Minuet in G (Beethoven)—Betsy Jo Joplin.

Accordion solo: (a) Waltzing; (b) Happy Days (both by Arnett)—Doyle DeArman.

Chinese Man (Intermezzo by Creighton)—string ensemble.

The three solo numbers, or piano, violin, and accordion, drew special applause from the audience.

Members of the ensemble were: Doyle DeArman, Robert Lloyd, Charles Reader, Charles Barron, Weldon Garden, Anna Lois Campbell, Joyce Watson, Dorothy Fay Lynch, Edward Clark, Betty Jo Joplin, Edith Rae Collings, Roxie Ruth Friday, Lewis Wingo, Marcelle Ramsaler.

HAVE OPERATIONS.

Mrs. Robert Blalock underwent an appendix operation and Mrs. F. S. Sanders a mastoid operation in a Midland hospital during the week-end.

Late News

WASHINGTON, Jan. 31 (AP).—The United States today accepted Japan's expressions of regret for the slapping Wednesday at Nanking of John Allison, in charge of the embassy there, by a Japanese sentry.

The state department was advised the Japanese planned a court martial of those responsible.

AUSTIN, Jan. 31 (AP).—The railroad commission today called a state-wide oil meeting here February 18.

WASHINGTON, Jan. 31 (AP).—The senate took up consideration of the administration's housing legislation today, temporarily laying aside the anti-laying measure which has been debated since the session opened.

WASHINGTON, Jan. 31 (AP).—The supreme court today upheld the right of the National Relations Board to conduct hearings to determine whether companies subject to the Wagner labor relations act had engaged in unfair labor practices.

Bootlegging Not Wholly Destroyed

True enough, the worst phase of bootlegging, when rival gangs fought it out in the streets of our big cities, and bribery and collusion were taken as a matter of course, seems to have passed with repeal.

But the bootlegger is still with us. Last year the enforcement division of the Alcohol Tax Unit of the U. S. Treasury seized 16,412 stills, with a mash capacity of 2,709,749 gallons. In connection with those raids 12,365,224 gallons of mash were seized and destroyed.

During 1937 there were also 29,477 people arrested for federal liquor law violation, and in 695 major liquor conspiracy cases investigated, 2104 defendants were convicted in court.

That indicates a very considerable amount of bootlegging even in the face of legal liquor, and proves all over again the only thing that is certain about the liquor problem: it is never completely solved.

In the days back before the World War, the dries were certain that national prohibition would solve the problem once and for all. And after 10 years of that, even a great many ardent dries were convinced that the final answer had not been found.

In 1933, wets were jubilant, and gave assurance that under proper legal restriction all would be well, and the problem would be settled forever. Now, already, only five years later, we face a reviving prohibition movement on a national basis, together with a gradual legal drying up of local areas.

Certainly we ought to have learned by now that no single stroke, no single law, no single plan is going to solve forever a human problem that has been with us at least since the days of Noah.

Constant and temperate application of all we can learn by experience, the broadest education of the individual, gradual yet persistent efforts to temper and control the worst phases of the problem as they arise—these offer a better hope for the future than any dogmatic "one-shot" solution offered by extremists of either persuasion.

Goodby, Buffalo!

Another old friend is leaving us—the buffalo nickel. He is 25 years old, with his well-worn design of an Indian head on one side and a bison on the other. The law permits changing coins every 25 years, and so, just for variety or something, we will have a new kind of nickel this spring, with Jefferson on one side and his old home, Monticello, on the other.

The design will be different, but the central problem will be the same, whether it is the buffalo or the Jefferson nickel—how to get more of them.

Social Security and Railroad Retirement program payments thus far have been \$294,000,000 more than income from taxes. At that rate, it'll be the treasury that needs security, not the people.

White boy, born here and raised in China, is reported "dazed" upon returning to U. S. Can't get used to the absence of gunfire, probably.

'Now, About Wage Cuts and Price Boosts—'

Only Few Minutes from Broadway

The cold wave that sent temperatures in the east to the coldest point in two years created scenes of polar ice almost within the shadow of Manhattan skyscrapers. Above a ferry boat, dwarfed by the size of the floes that move down the Hudson River, attempts to batter its way through a huge sheet of ice at Nyack, N. Y.

Behind the Scenes in Washington

Editor's Note: The opinions expressed in this article are those of Mr. Dutcher, NEA-Reporter-Telegram Washington correspondent, and are not to be construed as expressing the editorial policy of The Reporter-Telegram.

WASHINGTON, Jan. 31. — The question whether the price of steel can be made to go down without an accompanying reduction in wages of steel workers has become a crucial issue inside the New Deal. The anti-monopoly crusaders have that as their aim, and believe that the answer will determine whether their recent campaign has meant anything or not. The situation is no end involved in a maze of pressures and counter-pressures, both in Washington and in the higher councils of industry and labor. But no matter how involved it may be, it's something to watch. The issue has been tossed to the New Dealers by President Benjamin F. Fairness of the U. S. Steel Corporation, who has said:

"It is clear that prices cannot be reduced without a corresponding reduction in costs, of which wages are the most important part." This followed appearance of Tom Lamont, member of the Morgan firm, and John L. Lewis, generalissimo of organized steel workers, at the White House. Lewis is supposed to have joined in a warning that agitation against high steel prices drove off buyers, who believed prices might drop. Lamont is supposed to have said that prices might be cut cautiously if enough demand could be stimulated. New Dealers whose prices at steel prices insist those prices are way

out of line; that the industry "priced itself out of the market"; that steel labor represents only 22.9 per cent of the finished product. Lewis, meanwhile, is seeking to negotiate a renewal of his union contract with U. S. Steel which will involve no wage cut. There will be more to report on this steel situation when some of the numerous big shots involved in it began to get themselves disentangled from current confusions and uncertainty. Team of Steel and Jackson. THE price of steel, you may be sure, is definitely involved in the political future of Assistant Attorney General Robert H. Jackson. It is he who has led the administration's furious charge on monopoly and monopoly prices and it is he who would get the credit for the first big break in the "steelmasters' lines. Jackson, ablest figure in the New Deal ranks—according to Roosevelt, other New Dealers and many sideline observers—has been built up by his friends and supporters—including F. D. R.—as the 1938 candidate for governor of New York, a key post in the forthcoming elections. Not to mention his appointment as solicitor general. Naturally he became an out-front target for the united fire and undercover work of numerous other unannounced candidates and the

politicians who support their aspirations.

As the report spread about that he also was Roosevelt's choice to succeed himself in the White House, the lineup against him became even stronger, since there are many conservatives sworn to fight any effort by Roosevelt to influence nomination of his successor. (The presidential report is based only on Roosevelt's friendship for Jackson and his desire to see him become New York's governor.)

Needs the Victory.

THE New York political situation is so scrambled by numerous complications that it is difficult to tell just where Jackson stands in the scrambling. He has suddenly become an outstanding figure in state

The Town Quack

Clarence Schaubauer had better build Bill Collins a bigger banquet hall before the 1938 chamber of commerce meeting is held. The day after our last banquet, I had a paragraph telling about the last 25 or 30 who arrived having to march in at one door and out the other, because there were no seats available.

State Press, in the Dallas News, takes note of the overgrown Midland banquet and throws out a warning as to possible consequences as follows:

It may have been the only thing to do, that of escorting the late-comers up to and out thru the rear exit. But wasn't it bad policy? The cold-shouldered ones might have gone out and held an indignation meeting. The night has organized a rump parliament, a rebel chamber of commerce with banquets of their own. In plainer terms, they could have bolted the old party and started a new one. If the excited guests in the above case took no such action, if they showed no umbrage, if they declined to go outside to a tavern and conspire against their former associates, then their moderation deserves hearty applause. Perhaps their experience in the case cited taught them a lesson. Some people are always late because of a peculiar and personal indifference to time. All precision machinery depends on timing. It must carry all its working parts in a union of motion. The ancients never quite understood this principle, hence their failure to devise and construct machinery for the

politics, and Roosevelt's endorsement is the strongest single factor of strength any New Yorker can have. But the anti-Jacksonite strategy is to insist that acceptance of him as a gubernatorial candidate has been apathetic. "That's why a 'Jackson victory' in the form of a steel price cut (but without any accompanying wage cut, mind you) would be a clarifying boost for Bob Jackson.

If you want to know whether Roosevelt still "means" his monopoly crusade, just watch his appointment of a successor to take charge of anti-trust cases.

relief of hand labor. The chronometer is itself a machine, of course, and its moving parts must move in the tempo of their relation to the whole operation. But what good is a perfect timepiece to persons who fall or refuse to abide by its directions? In the days of guessing had to be done. In these days of clocks and catches, of hours, minutes and seconds, all easily discovered by watch toilers, what excuse is there for not getting to dinner on time? However, a poor excuse, like a poor timepiece is better than none.

Poultry and Eggs Shipments Decline

AUSTIN.—Shipments of poultry from Texas to out-of-state points during December declined moderately from the corresponding month last year, both chickens and turkeys contributing to the decline, according to the University of Texas Bureau of Business Research.

A total of 588 cars of poultry were shipped out of state during December, of which 543 cars were turkeys and 45 cars were chickens. During December, 1936, out-of-state shipments amounted to 672 cars composed of 63 cars of chickens and 609 cars of turkeys. Combined shipments of chickens and turkeys were 13 per cent below December, 1936; chicken shipments were off 29 per cent, and turkey shipments were down 11 per cent.

Shipments of eggs out of the state totaled only 17 cars, compared with 19 cars during December, 1936. Receipts of eggs from other states increased sharply, however, 57 cars compared with only 22 cars in December, 1936. Of last month's out-of-state receipts of eggs 25 cars came from Kansas, 21 from Missouri, 7 from Illinois, 2 from Georgia, and one each from Wisconsin and Nebraska.

Ontario Town Worries Over Love on Dole

LINDSAY, Ont. (UP).—The problem of young people marrying in order to get on relief is puzzling Mayor H. D. Logan.

"Thirty-five new applications have been received for relief, and of these 12 couples were under 25," lamented the mayor. "They were married for the purpose of getting on relief. What can we do?"

The attitude of the government that no single man would get relief is forcing young people to get married, one alderman said. The mayor declared that many young men wouldn't learn a trade. They were the last to be hired and the first to be fired, and said that one young man told him that the town had to keep him and his wife.

The town councillors are still worrying over the problem of "love on the dole."

It's a Small World!

Strawberries in January, a voice across three thousand miles in a few minutes, pictures printed in newspapers an hour after the event happens . . . such things make us all realize how small the world really is.

Give science credit for bringing far places and far things near our doorstep, but give advertising credit too. Advertisements have made us desire. The printed word creates the want, stimulates the inventor's imagination. Then the printed word, the advertisement, tells us that those things we have wished for are ready for our use!

Broaden your horizons by reading The Reporter-Telegram advertisements daily! The news of the business world awaits your perusal. And it is good news indeed.

SOCIETY NEWS SECTION

Intermediate Endeavor Group Elects Officers

New officers were elected at the regular meeting of the Intermediate Endeavor Sunday under sponsorship of Mrs. Z. T. Reader.

Jimmie Pickering was chosen president, Raymond Mann vice-president, and Doris Lynn Pemberton secretary-treasurer.

The last of a series of mission studies on the topic "Our Missionary Gift" was presented with Doris Lynn Pemberton as leader.

Following the leader's talk, Jimmie Pickering, Bobbie Park, Charles Reader and A. L. Stewart presented talks on various topics of the study.

Sentence prayers were opened by Jimmie Pickering and closed by Elma Jean Noble.

A song session and a business meeting preceded the program.

Present were: Doris Lynn Pemberton, Jimmie Pickering, Dale Mickey, Bobbie Park, Charles Reader, Raymond Mann, A. L. Stewart, Mrs. Reader.

The group was dismissed with the Endeavor benediction.

The fifty-ninth anniversary of the Christian Endeavor organization was observed by Junior Endeavors in their meeting.

Mrs. F. C. Cummings, a guest, led the song service, after which everyone present took part in the program. The story of Christian Endeavor and its founder was discussed and followed by a lesson on what the Endeavor means to members of the Junior organization.

Mrs. J. K. Graves led the Bible drill.

Lesson on Spiritual Needs Heard by Naomi Class

"Ministry to Spiritual Needs" was the subject discussed by Mrs. J. Howard Hodge at the meeting of the Naomi class at the Hotel Scharbauer Sunday morning.

The devotional was led by Miss Mary Lowry and Mrs. L. H. Tiffin conducted the singing.

Approximately 15 members were present.

The class will hold a business meeting at the home of Mrs. Laura Duffield, 111 W. Pennsylvania, on Tuesday evening at 8 o'clock.

Highlights on Style Given by Dallas Girl in Hollywood

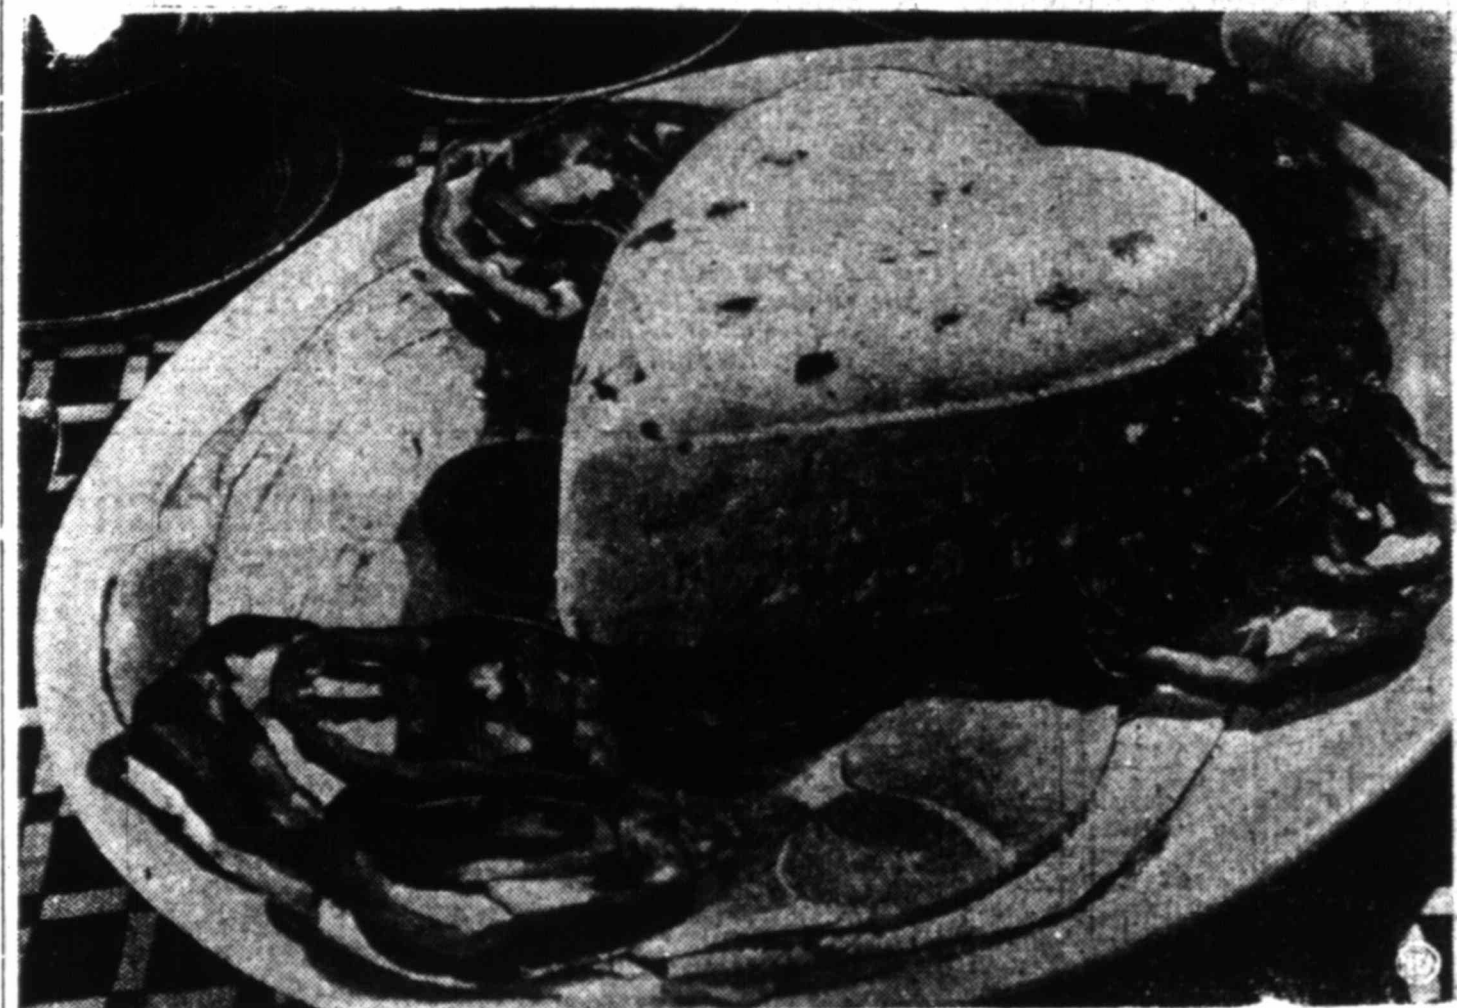

BY DOROTHY HOWE.

(Editor's Note: Miss Howe is one of Dallas' recent additions to the Hollywood colony, having gone to California several months ago to be trained by Paramount Studios and to make her screen debut in "Big Broadcast of 1938," Paramount production.) She was formerly a model in the semi-annual Southwestern Style Shows at Dallas.

DALLAS, Jan. 28. — Glamorous Hollywood lies miles away from the Southwest, which to my native mind includes Texas, Oklahoma, Louisiana, Arkansas and New Mexico. But it would be realized by the distance by comparing the fashion

Salads Are Amazing to Consume

* MOST ANYTHING'S LIABLE TO BE IN THEM *

If you happen to be fond of Thousand Island salad dressing, then this molded Thousand Island salad may appeal to you. It does yeoman service at the bridge supper of Sunday night, assisted by a few cold cuts.

By Mrs. Gaynor Maddox, NEA Service Staff Writer.

The American salad is much like the American drug store—you can find almost anything you want in it. However, the type of salad made in a bowl and mixed with simple dressing of oil, lemon juice or vinegar and spices seems to be making headway. That doesn't mean that molded salads, meat balls and every other kind of salad are not popular.

Molded Thousands Island Salad (8 servings).

One-half cup tomato catsup, 1/2 cup mayonnaise, 1/2 cup finely chopped celery, 1/2 cup finely chopped green pepper, 2 tablespoons chopped stuffed olives, 1 teaspoon minced chives, 1 1/2 cups shredded green lettuce, 1 package salad gelatin, 1 cup boiling water.

Dissolve the salad gelatin in boiling water. Chill until the mixture begins to thicken. With the exception of the shredded lettuce, combine all the other ingredients and mix well. Add these to the slightly thickened gelatin mixture and stir until they are well mixed in. At the last, fold in the shredded lettuce. Turn into mold and chill until firm.

MENU:

BREAKFAST: Grapefruit on halfshell, hot oatmeal and bran, raw sugar, cream, bacon waffles, syrup, coffee, milk.

DINNER: Salami canapes, roast turkey, celery and rice stuffing, creamed chestnuts, green beans, mashed potatoes, endive and orange salad, pumpkin tarts and whipped cream with candied ginger, coffee, milk.

SUPPER: Tomato bouillon, molded Thousand Island salad, cold sliced turkey, rolls, stewed pears, devil's food cake, tea, milk.

Capistrano Lettuce Bowl (8 servings).

Two heads firm lettuce, 1 small head broccoli, 4 deviled eggs, 8 small tomatoes, 1 small can whole kernel corn, 1/2 cup ripe olives, 1 cup strips of green celery, 1 teaspoon salt.

Shred 1 head of lettuce and arrange in bottom of large wooden salad bowl. Cut the other head into 8 sections. Cook the broccoli in salted water until slightly tender, but decidedly not mushy. To keep it very green, add a little sugar to the boiling water. When cooked, drain and chill broccoli. To arrange the bowl for its dining room appearance, place the chilled head of cooked broccoli in the center of the bowl on top of the shredded lettuce. Run strips of celery into head of broccoli, giving it a pin-cushion effect. Stuff the well seasoned tomatoes with the whole kernel corn. Devil

hard cooked eggs cut in half and garnish each half with slices of ripe olive. Arrange the stuffed tomatoes, deviled eggs and lettuce sections around the head of broccoli. Serve with a plain French dressing, or this buttermilk dressing which is popular now in Hollywood.

Buttermilk Salad Dressing (Enough for 8 servings).

One-half cup mayonnaise, 1 teaspoon onion juice, 2 teaspoon lemon juice, 1/2 teaspoon dry mustard, 1/8 teaspoon white pepper, 1/8 teaspoon paprika, 1 cup thick buttermilk.

If these ingredients sound reasonable to you, then combine them all, swing in the salad bowl, pour on the dressing and serve.

age; 1 in past 45, than in former years. About 95 per cent of all the deaths from cancer occur at ages over 35. Of ages over 40, 1 person in 10 dies of cancer. Largely because of neglect and ignorance 9 cases out of 10 are now fatal. Yet if proper precaution and treatment were observed, it is probable that over half of the yearly deaths could be prevented. Women are more subject to cancer than men owing to the fact that the special organs of women are especially susceptible to this disease. It has been estimated that between the ages of 35 and 45 three times as many women as men die of cancer and between the ages of 45 and 50 twice as many die.

The cause of cancer is as yet unknown, in spite of the fact that a great deal of effort has been spent toward this end in the past few years. Some progress has been made but as yet science must still say that the cause is unknown. There are numerous theories as to how cancers arise, but no one theory fits all types and cases. All efforts to prove that cancer is inherited have failed. Experiments have been made on white rats, guinea pigs, and rabbits and no trace has ever been observed to prove that the disease is hereditary. All that can be said is that some people may inherit a type of skin that is more apt to have cancer develop in it, but as far as internal cancer is concerned, heredity apparently plays no role. It is known that certain diseased conditions of the skin predispose to malignancy, for example, a rough scaly skin, injury, chronic ulcerating conditions of the skin, black moles, etc.

Long continued local irritations of various kinds pave the way for cancer to develop: 1. Cancer of lip and mouth from pipe stem burns; 2. constant irritation from bad teeth and dental plates; 3. betel nut in East Indian races; 4. esophagus or gullet from eating rice too hot; 5. stomach cancer from ulcer; 6. uterus—neglected tears (childbirth); 7. skin—irritated moles and warts; 8. breast—neglected sores, cracks, and lumps which were at first harmless.

Such organs, such as the liver, appendix, and heart, very seldom have malignancies develop primarily in them, whereas others, such as the stomach, large and mucous membranes, skin and intestine, and breast frequently are the location for cancerous growths. Why some tissues develop cancer more readily than others is unknown. Cancer is not contagious. In all the thousands of recorded operations for this disease there is no report of a case in which cancer was acquired from the patient by any surgeon or nurse. Cancer cells have been removed from one person and transplanted into another person and would not grow.

Cancers are usually classified according to the type of tissue from which they arise. Cancers arising from the skin, and secreting membranes, such as the breast, uterus, stomach and bowel, are known as carcinomas. Malignant tumors arising from connective tissue, that is bone, muscle are known as sarcomas. Cancers arising from the black or brown moles are called melanomas, and are one of the most malignant and fatal tumors known. Cancers may also arise from lymph glands, nerve tissue, and other special structures, and have special technical names. Cancers may be malignant either by position or by invasion. The former are malignant by position because they occur in some vital structure such as the brain. The chief characteristic of cancer is its tendency to invade, or grow into surrounding structures, and to spread into other parts of the body. A cancer of the bone may grow out into the soft tissues, and also spread by way of the blood stream into some quite distant part of the body. Cancer cells may grow into a blood vessel, break off and be carried by the blood into the lung, liver, bone, brain, or other parts of the body. Some types of cancer, such as of the breast, prostate, and thyroid gland, tend to spread to bone, where as some other types, such as sarcomas of the bone, and kidney tend to spread to the lungs first. Another common way that cancer spreads is by way of the lymphatics to neighboring lymph glands or kernels such as in the arm pit from the breast, into the neck from the face and mouth, or into the groin from the lower extremities, cervix or rectum. Glands located along the spinal column and around the stomach also have malignancies spread to them from the pelvis, rectum, stomach, or pancreas.

As a general rule carcinomas (those arising from the skin such as of the breast, uterus, stomach, and bowel) spread by way of lymphatics to glands, whereas sarcomas (those arising from connective tissue bone or muscle) spread by way of the blood stream, but either one may spread either way. This knowledge is important in attempting to cure cancer. Malignant tumors may spread first to the neighborhood glands, grow there, then spread to other and more internal lymph glands, and once cancer has spread to the inside of the body, in lymph glands, lung, or brain, it is usually incurable.

To Be Continued.

Epworth Leagues Meet for Study, Varied Program

A discussion of the famous Gypsy Smith's talk, which Clyde Pate heard in Amarillo a few weeks ago featured the meeting of the Senior Epworth League at the Methodist annex Sunday evening.

A song service by the group and a talk by Rev. W. C. Hinds, pastor, completed the program for the evening, taking the place of the scheduled lesson on the negro.

The Friday evening recreation period from 7:30 until 10:30 o'clock will be devoted to intermediates, or boys and girls of all churches from 12 to 18 years of age.

About 15 young people were present.

Intermediate Group.

Lesson for the Intermediate League study was on the race problem with special reference to the negro, about seven members appearing on the program for the evening.

Elmor Hedrick presented a piano solo, as a special number.

A business meeting will be held in connection with the recreation hour at the church annex Friday evening. It was announced.

Approximately 20 boys and girls were present.

Marble Shaft Honors Mooie, Champion Cow

LEE, Mass. (UP).—In memory of Mooie, a Holstein-Friesian cow, John O. Ellis has erected a suitably inscribed five-foot marble monument.

The cow, registered Highfield Colantha Mooie, set a lifetime world record milk production of 205,928.5 pounds.

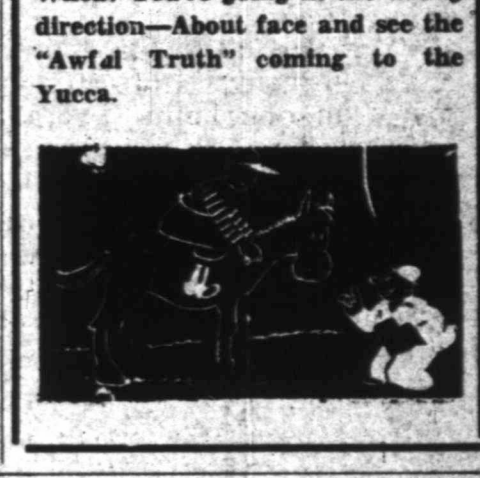

WHAT CATHARTICS DO TO YOU!

Harsh pills and purgatives often over-stimulate your intestines... and leave them weak and listless.

If your constipation is of the common type that is due to insufficient bulk, there's a better way to treat it. Kellogg's All-Bran supplies the bulk you need. It absorbs moisture and softens like a sponge. This water-softened mass aids elimination. But All-Bran does still more. It contains vitamin B... the vitamin that helps tone the intestinal tract.

Eat Kellogg's All-Bran every day and drink plenty of water. Made by Kellogg in Battle Creek.

Whos! You're going in the wrong direction—About face and see the "Awful Truth" coming to the Yucca.

Don't experiment with Children's Colds

Relieve Their Misery This Proved Way

WHEN your child comes down with a cold, you can't afford to take needless risks. Use the treatment that has been doubly proved for you—Vicks VapoRub.

It has been proved by everyday use in more homes than any other medication of its kind—further proved by the largest clinical tests ever made on colds. (Full details in every VapoRub package.) Only Vicks give you proof like this.

Vicks VapoRub is direct external treatment. There's no dosing—no risk of spoiling appetite, or disturbing delicate digestion. VapoRub can be used freely, as often as needed, even on the youngest child.

You simply massage VapoRub on throat, chest, and back (as illustrated).

Then—to make its long-continued double action last even longer—spread a thick layer on the chest and cover with a warmed cloth.

No Long Waiting for Relief to begin...

Almost before you finish rubbing, the youngster begins to feel warm and comfortable as VapoRub goes to work direct through the skin like a powerful vapor. At the same time like its medicated vapors, released by its direct to the irritated air-passages with every breath.

This double action loosens phlegm—relieves irritation and coughing—helps break up local congestion. And long after the little one relaxes into restful sleep, VapoRub keeps right on working—hour after hour. Often, by morning the worst of the cold is over.

TAKE HOME A BUNDLE OF GOODNESS

If you can't come out and enjoy our delicious Mexican preparations, then take advantage of our carry-away service.

Any time of day or night you can get those delicious steaming hot tamales by the dozen and piping hot chili by the pint or quart to take away. And, too, if you'll bring your container, we will gladly prepare for you any dish you like in true Mexican style.

Cancer, Mysterious Disease, Is Common Cause of Death.

Editor's Note: The following paper on "Cancer" was read by Miss Cowden before members of the Junior Woman's Wednesday club recently. It is published herewith in the hope that it may prove of interest to the general public.

By Miss Ida Beth Cowden.

Cancer now ranks as one of the chief causes of death. According to estimates 90,000 deaths from cancer occur each year in the United States. During the past several years the recorded death rate shows about 2 1/2 per cent more cases each year. Part of this increase may be explained on the basis that more people are now living to the cancer

SIX CITIES ASK FRANCHISES IN THE WTNM LEAGUE THIS YEAR

MIDLAND AGAIN STARTING MEMBER OF YOUNG CIRCUIT

BY JESS RODGERS.

LUBBOCK, Jan. 31. (Special).—Six West Texas and New Mexico cities announced themselves as desiring franchises in the West Texas-New Mexico League this year at the annual meeting held here yesterday.

If the league starts the season as it is tentatively arranged, three new clubs and one club that dropped out in mid-season last year will join two clubs that finished up the season in 1937.

Permission was voted by league directors for Fincher Withers to move the Hobbs franchise to Midland, J. A. Hutchinson to move the Monahans franchise to Midland, Monahans franchise to Big Spring, and applications of Clovis, N. M., and Lubbock for franchises in the league were granted. Wink and Roswell, holdovers from last year, will again start the season.

Milton Price, secretary of the Texas League, was re-elected president of the league, and directors voted him a \$600 salary for the year. Price served during 1937 without salary and offered to do so again this year but directors overrode the suggestion and voted him a salary.

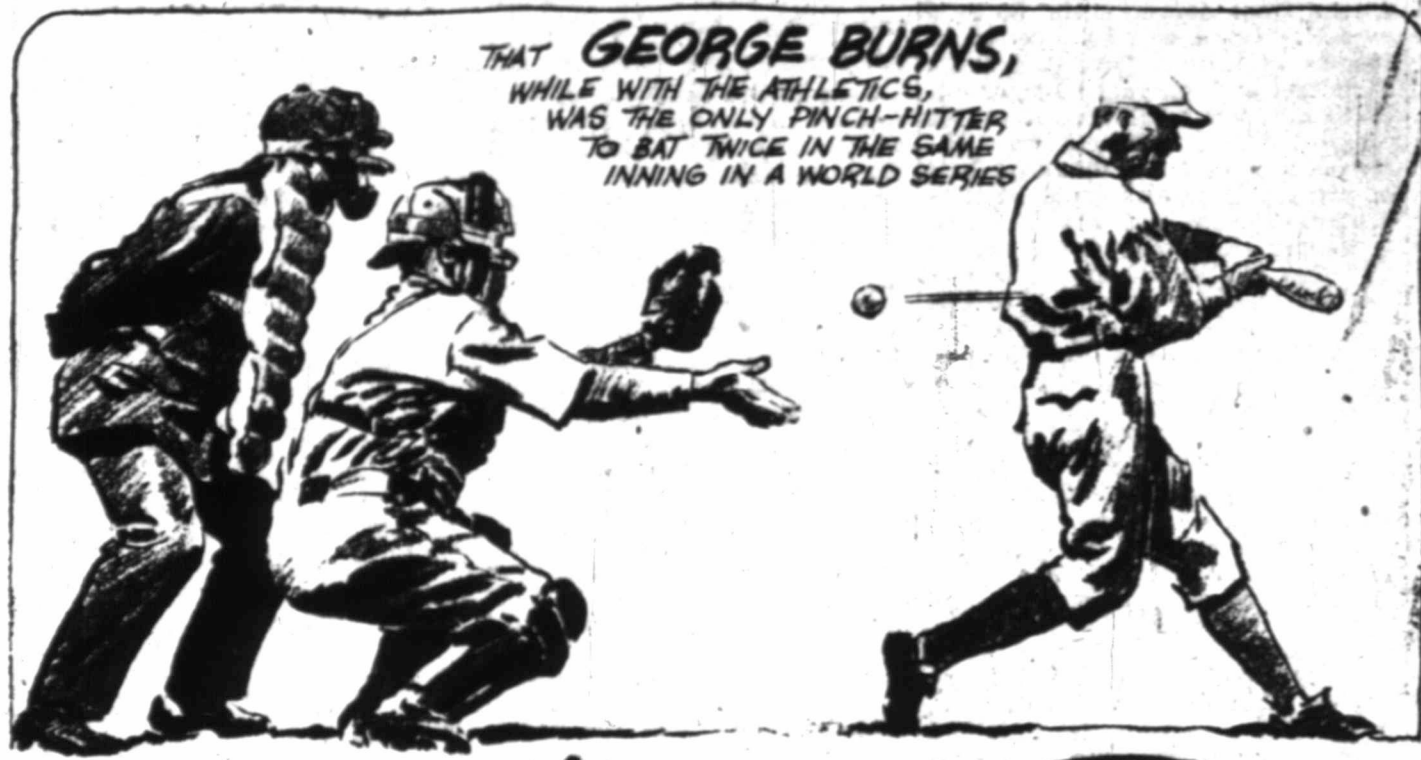

The player limit was raised one man but the salary limit will remain at \$1,000 a year. Each club will be allowed to use 14 players this year, including a playing manager. A bench manager will not be counted as one of the 14 eligible. League directors also agreed on a minimum of six rookies, and not more than three class men.

Bill Collyns of Midland was elected active vice-president and three honorary vice-president positions were filled with the names of M. C. Uimer, Midland, Bob Tarleton, Dallas, and John Railis, Roswell.

The meeting was called to order at 1:30 in the afternoon by President Price and developed into one of the liveliest ever held. With about 40 representatives of the half-dozen towns present, frequently bickering developed over some of the laws voted into the constitution. The player limit question caused most of the trouble, the new ruling finally being adopted on a vote of 4-2. Wink and Monahans held out for the 13-man limit as it was during the last season.

Lubbock, with a direct tie-up with

Did You Know

THAT GEORGE BURNS, WHILE WITH THE ATHLETICS, WAS THE ONLY PINCH-HITTER TO BAT TWICE IN THE SAME INNING IN A WORLD SERIES

THAT JACK DEMDSEY WAS ONCE KNOCKED OUT IN THE FIRST ROUND?

THAT BUCHANAN WAS THE FIRST MAIDEN TO WIN THE KENTUCKY DERBY?

ANSWERS TO ART KRENZ CARTOON

1. George Burns batted as a pinch hitter twice in one inning and failed to hit safely, when he made the first and last out of the A's seventh inning 10-run rally in the fourth game of the 1929 World Series.

2. Although it is generally believed that Sir Barton was the first maiden to win the Kentucky Derby, the "Spirit of the Times," issue of April 5, 1884, reads: "Buchanan has yet to score his maiden victory." May 17th issue, day of Derby, mentioning the favorites, reads: "Buchanan is next in favor. He was placed in all his races last season but never won." One week following running of race, issue of May 24, 1884, reads: "He started in six races last year without winning."

3. On Feb. 13, 1917, at Murray, Utah, Fireman Jim Flynn met and knocked out Jack Dempsey in the first round. A year and a day later at Fort Sheridan, Illinois, the "Manassa Mauler" turned the trick on Jim, knocking him out in one round.

Styles of Dress for Students in Change

Dallas already signed, Roswell and Wink declared there was nothing but minor matters in the way of their getting started but Big Spring, Midland and Clovis representatives agreed they were not very far advanced toward a start. However, all expressed confidence they would be ready by starting day, tentatively agreed upon as April 27 or May 4. The season will close August 28.

Fincher Withers, National Baseball Association field man, was told to attempt to get two more clubs into the league, and efforts will be made this week to line up a couple of more cities. However, there is quite a bit of doubt as to the feasibility of the plan.

President Price announced that another meeting would be called in the next few weeks, at which time clubs will adopt a schedule and post their entry and forfeit fees. Site and date of the meeting is to be announced later.

Stamp News

MARKING an important event in Ireland's history, the minister of Post and Telegraphs has announced the issue on Dec. 29 of the Constitution of Eire special commemorative stamps.

The values are 2-pence for inland and 3-pence for foreign postage. They will remain in use through May 31, 1938. These stamps have special interest for specialists in both music and religious stamps.

Eire (official name of the land of the Irish) is depicted as a young woman, seated, her right hand resting on a harp. She has just written the opening words of the new constitution. These acknowledge the rule of the Almighty and invoke His divine assistance.

Rescuer Finally Calls For Another Rescuer

CLEVELAND (UP).—The telephone company did a rescue act for a man whose job is rescuing other people.

Capt. William Crapo, chief of the U. S. Coast Guard station, sent an emergency call to the telephone company when he discovered he had misplaced 13 daily menu lists for his 3-year-old daughter in a telephone book.

The company had collected Crapo's book along with thousands of others. A crew of boys took up the search in the old directories and finally rescued the menus.

Fox Hunter Chagrined, Shoots Stuffed Pelt

GOSHEN, N. Y. (UP).—Herbert N. Roe, secretary of the County Seat Conservation club, went fox hunting. He returned—with the mutilated pelt of a sawdust-stuffed fox.

It all happened when companions "planted" the stuffed fox in a brush and assigned Roe to approach the spot by direct line while they closed in from the sides.

Roe fired twice. Sawdust flew into the air. The "fox" was annihilated.

Ross Kidnaped

Standing mute before a federal commissioner in Chicago, where he is pictured above, youthful John Henry Seadlund, alias Peter Anders, offered no plea when charged with the kidnap-murder of the aged Charles Ross, Chicago businessman whose body was found in northern Wisconsin woods. A technical plea of "not guilty" was entered and Seadlund was held for grand jury action.

Striking Records Compiled by Boys

DEARBORN, Mich. Jan. 31.—Average spoilage of less than 1 per cent productive work requiring in excess of a million hours a year is the record of the student body of the Henry Ford Trade School located in the Rouge plant of the Ford Motor Company here. The students are 1700 boys between 12 and 19 years old.

To get a passing grade in the daily examinations in the Trade School, the work turned out by the students must be accurate from 0.003 inches to 0.0001 inches, and finer. The ordinary passing grade of 75 per cent in most schools is worthless in the Ford School.

Thousandths and ten-thousandths of an inch are common measurements for Trade School boys. All their work is productive, although none of the work goes into the Ford car.

Smaller boys repair small tools used in the Ford plant. An example is the repairing of up to 15,000 pairs of safety goggles each month.

Older boys of more experience repair all of the precision tools used in the Rouge plant, such as 350 pairs of micrometers, 4000 dial indicators and other items in proportion each month.

The oldest boys are engaged in the manufacture of tools—cutters, reamers, drills, arbors, punches, dies, plug-gages, and special tools in the Ford company which can be built on the machines used in the Trade School shops.

Inspection of their work is carried on in all stages of production. An finished work must be inspected before the tools can be sent out into the Ford factory to be used in production.

Johansson gage blocks, the international standard of measurement, which are produced by their inventors, C. E. Johansson, in the Ford plant, constantly check the accuracy of inspection tools.

Trade School boys spend a week in the class room and two weeks in the shop during their course of training. They are paid cash scholarships and are given three weeks vacation each summer and an additional week at Christmas. In addition, they receive free lunches. Two dollars per month is paid each boy for deposit in a thrift account.

Log Drifts 1,000 Miles Through Arctic Waters

OTTAWA (UP).—A small log which is believed to have drifted 1,000 miles through Arctic seas from the mouth of the MacKenzie river near Akavik to Bellot Strait has been placed on display here.

Major D. L. McKeand picked up the log last summer on an Eastern Arctic cruise, and brought it here for study. The log was submitted to the forestry laboratories of the Department of Mines and Resources and was identified as a piece of black spruce, which does not grow within 1,000 miles of Bellot Strait.

The log was a century old. Experts believed it had drifted from the Mackenzie river, where considerable stands of coniferous trees are found.

Mouse Strangely Killed In Telephone Box Trap

SCHENECTADY, N. Y. (UP).—A mouse with a smashed head was removed from a telephone box by Repairman Harry Blanchard.

Blanchard theorized that the animal, sticking its head through a hole on the side of the box, was beaten to death by the bell clapper when a call came through.

HITCHES SKIS TO AN AIRPLANE

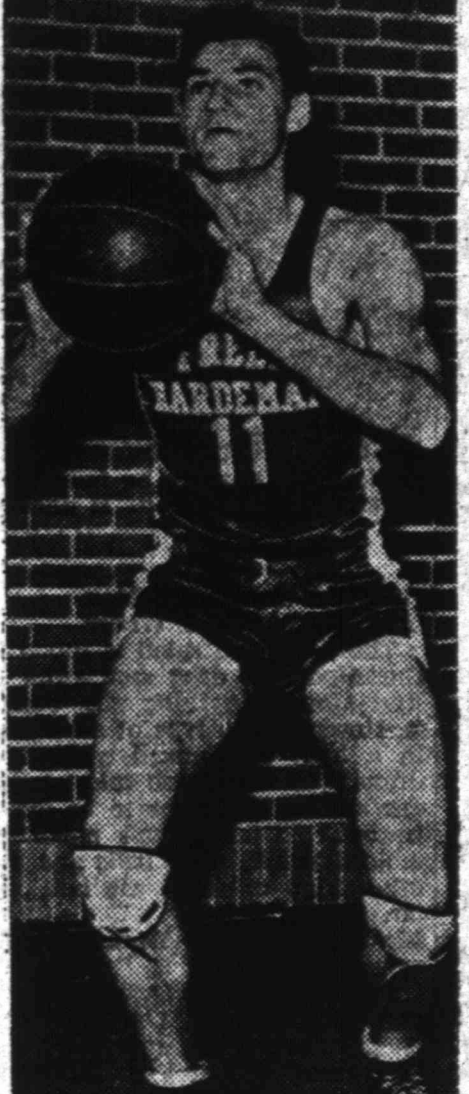

Tired of the more common methods of skiing behind horses, motorcycles, and automobiles, and having nothing else to do, Bain Esarius (Shorty) Fulton, Akron airport manager, hitches his skis to an airplane. Fulton is being towed across the snow-covered airport. A second or two later, the tow-line broke, plane was in the air, and Shorty was in a snowbank, which he would not have found in clouds.

De Valera Prelude to British Parley

Humbly bowed in prayer, Eamon de Valera is pictured at mass in Westminster Cathedral in London prior to his successful conference with British leaders over Anglo-Irish relations. De Valera, who continues his rule of the re-organized Irish Free State as taoiseach (leader) of Eire under the new constitution, won important concessions in trade, finance and defense.

BUMPER CROP

Nets almost caught fire when Jim Murdaugh, above, scored a staggering total of 78 points, or practically two a minute, as Freed-Hardeman Junior College of Henderson, Tenn., crushed Bethel College, 115-30. Because it was established in junior college competition, the mark probably will not be accepted as a new collegiate record.

SKI DEMON

Burger Rued of Norway, world ski champion and Olympic winner in 1932 and 1936, scored 172 feet out into space to win the International Ski Tournament title at Fox River Grove, Ill. He is shown surrounded by admirers after his winning jump.

North Brighton course, where he expects to make 16 rounds or 288 holes in 8 hours and walking only 44 miles.

Australian Will Seek Marathon Golf Record

MELBOURNE (UP).—Stan Gard, North Brighton Golf club member, will attempt to break the world's record on marathon golf.

The title is held by an American player who played 246 holes in 21 1/2 hours in 1931. He walked 70 miles.

Gard will stage his effort on the

CALM YOUR NERVES!

Oklahoma City—Mrs. Ruth Williams, 317 N. Douglas St., says: "I was nervous, tired and upset, and had headaches and backache associated with functional disturbances. After taking Dr. Pierce's Favorite Prescription my appetite improved, my strength returned, and I was relieved of the functional disturbances." Get it, in liquid or tablets, at your drug store today.

Fifth Anniversary Of Nazi Government Observed by Germans

BERLIN, Jan. 31 (AP).—Totalitarian Germany Sunday celebrated the fifth anniversary of Adolf Hitler's coming to power with parades, speeches and praise for the Reich Chancellor's solution of five major problems since 1933.

Unemployment—Practically eliminated by the introduction of compulsory labor service, conscription of all able-bodied men for two years of military service, a vast program of road making, land reclamation and construction of public buildings.

Your Income Tax

No. 4 Who Must File Returns Returns are required of every single person who for the year had a gross income of \$5,000 or more or a net income of \$1,000 or more and of every husband and wife living together who for the year 1937 had an aggregate gross income of \$5,000 or more or an aggregate net income of \$2,500 or more.

Quads Write "Thanks" to Dr. Dafeo

Because there are five of them, the Dionne quintuplets are prosperous youngsters, but there doesn't seem to be much profit in being quadruplets. That fact doubles the gratitude of the Mahaney quadruplets of St. John's, N. B., for a gift of cash sent them by Dr. Allan Roy Dafeo, physician to the quints.

National American Legion Commander To Visit Lubbock

LUBBOCK, Jan. 31 (Special).—Invitation to all ex-service men and other leaders of the South Plains to attend the luncheon in Lubbock Thursday, Feb. 10, at which Daniel J. Doherty, of Woburn, Mass., national commander of the American legion, will be speaker was extended today by A. C. (Jack) Jackson, commander of Allen Bros. post in Lubbock, which will be host.

Tires Purposely Blown Out During Tests Here Today

Residents of Midland today witnessed one of the most startling demonstrations of highway safety it has ever seen by their privilege to see, when tires were purposely blown out on cars traveling at high speed.

Personal

Mr. and Mrs. R. T. Moore of McCamey were guests of Mr. and Mrs. Lenton Brunson Sunday. Mr. and Mrs. T. R. Higginbotham have left on a 10-day trip to East Texas where they will visit their parents.

Fraud Prevention in Registering Motors Being Given Study

AUSTIN, Jan. 31.—Steps will be taken immediately by the highway commission to prevent a repetition of last year's widespread frauds in the registration of motor vehicles. Robert Lee Bobbitt, chairman of the Texas highway commission, said today following a conference with Julian Montgomery, state highway engineer, and representatives of the Texas Good Roads association.

The Foundation of a Dress Suit

There's a reason for the perfect form this assured young man exhibits. The style experts call it proper foundation. Foundation garments for the well-dressed man are just as important as for the woman, they contend.

A Three Days' Cough Is Your Danger Signal

No matter how many medicines you have tried for your cough, chest cold, or bronchial irritation, you can get relief now with Creomulsion. Serious trouble may be brewing and you cannot afford to take a chance with any remedy less potent than Creomulsion, which goes right to the seat of the trouble and aids nature to soothe and heal the inflamed mucous membranes and to loosen and expel the gum-laden phlegm.

NOW I HAVE TIME TO HELP THE CHILDREN WITH THEIR MUSIC LESSONS

FOUND An EXTRA day MIDLAND STEAM LAUNDRY ..PHONE 90.. Children grow "as the twig is bent." The wise mother gives time to her children's learning and play; you can make that time by saving a day a week—when we do your washing and ironing.
