## Whoa, Now!

By Greedy Lacey

Due recognition for their support of the Spur Bulldogs above and beyond the extent that most of us go out and watch a ball game are two groups that add color, pep and entertainment to any football contest. These groups are the band and the pep squad.

## G. Walker Is Chosen As Totem Beauty

## Posse Feeds Team View Floydada Film

By "Woody" Woodward

Oh no, don't throw the paper away! Just turn the page quickly there might be something you wanted to read a little further over.

The Sheriff's Posse had their regular meeting and monthly feed Tuesday evening. Our guests were the Spur High football team and I think that everyone enjoyed the evening as much as I did.

While I am still on the subject of meetings, our club secretary, Johnny Scudder, informed me that he had reservations for about 15 members and if I counted right there were about 45 present. If you don't want to sit on the side and watch the rest of us eat fried chicken some night, you had better let Johnny know a day or two early that you are going to be there.

After the dinner the club president, Everett McArthur, made a few announcements and ran through a brief club history from the day that the small group met at the Spur Theatre and the organization was started with eight members. By the way, Johnny says that he will take your 1934 due money any time, either handed to him on the street or mailed to him.

Plans were discussed for the coming game of Palemetto Polo to be played in Florida either the 20th or the 28th of this coming March, and also the return match promised at a later date. If you have not seen a game, then you should regular practice at the roping arena near the airport.

I guess that you people have noticed that I have missed a few weeks with this article and I also guess that it was a relief. I really did get skinned for it by our president last evening so I will try to do better (or worse) in the future.

## Cappleman Chosen "Man of the Year"

The Agricultural "Man of the Year" citation has been awarded L. J. Cappleman, Texas State Director of the Farmers Home Administration, for "conspicuous service in promoting improved farming and living practices."

Two outstanding accomplishments have spotlighted Cappleman's Government service -- both interwoven in the fabric of success of Texas farmers. Better farming always has been a factor motivating Cappleman's service to agriculture and Texas.

Progressive Farmer pointed this up in its December issue. His slogan, "Let's do good farming," has been advice he has given every statewide or district meeting which he has attended and a motto he has strictly observed during the seven-year life of the present Farmers Home Administration, of which he is the Texas head.

Cappleman, five years ago, paramounted early cotton insect control as a factor in raising the lint yield on Texas Farmers Home Administration borrowers' farms. He put out the word and made it a "must" for field men to get Farmers Home Administration borrowers to fight early and late the cotton pests that were getting the profit dollars from Texas Farmers Home Administration farms. Quoting from the Texas farm magazine:

"In two years' time he had Farmers Home Administration about 700 per cent on an effective insect control program. It included early-season poisoning and use of the newest insecticides and best methods of application. Today Farmers Home Administration borrowers beat the county average in acre-yield of cotton. And they do it on land that is below average in both cost and productivity." Because he followed better farming practice himself it was no trick to get his farm borrowers to do like-

wise. The farm magazine added: "Cappleman's zeal for improvements in cotton production has in no way lessened his interest in other agricultural problems. His plans for improving corn yields, milk production, soil building, legumes, etc. on Farmers Home Administration farms have been carefully worked out and are being pushed energetically."

"His motto has proven itself. When folks do 'good farming' they can pay their debts and move up the ladder of success."

At this time Cappleman is leading the nation in bringing financial aid to drought-stricken farmers and ranchmen. No other state approaches Texas in number and amount of special livestock loans to ranchmen who have suffered heavily in the long drought of the past three years.

Loans advanced since July 1, 1951 now total \$27,700,000.00 for the Agency to date. Of this, the Progressive Farmer stated: "Directing this big job -- and just say and think what it means to lend that much money -- was Lester J. Cappleman, State Director of the Farmers Home Administration. When 'Cap' -- that's what his friends call him -- saw the drought difficulties and got the go-ahead to make the drought loans, his organization went into this extra job without any difficulty. That's typical of 'Cap' and the people of his organization. For many years they've been helping farm people go up the ladder of success through supervised farm loans."

Cappleman is a native of Fannin County and Honey Grove was his birthplace. Educated in Honey Grove High School and Texas A & M College, he began his Government service as a rural supervisor for the Texas Rural Communities, which was the forerunner of the Farm Security Administration. During World War II he was called to Washington to be chief of the procurement and price support branch of the War Food Administration. Prior to this service he was Regional Director of the State Production and Marketing Administration.

Cappleman attributes the success of the Texas Farmers Home Administration to service rendered the program by county committees. The local county Farmers Home Administration committee is composed of three successful farmers, who aid the Farmers Home Administration county supervisors in planning and carrying out the farm operations. These committees are all noble spirited citizens interested in improving the welfare of farm families in their communities. Lending heavily on these committees, Cappleman points out that the members make the task of the county supervisor and other officials lighter, as they aid in solving problems constantly arising locally within the program.

## "The coffee's terrible but it's the only restaurant in town"

Muddy coffee. Soggy toast. Indigestible food. Bad luck for the hungry salesman who stops in that town for a bite to eat. The missing ingredient is "competition."

Funny how that word has a way of stirring up activity. People who manufacture things, for example, prickle all over when they think about competition. They sit up evenings fretting about it, and spend millions to improve their products. The result, of course, is high quality at lowest possible cost. And the winner of a contest like that has to be the public.

People are tempted sometimes to wonder what life would be like without competition. For a clue, they might note the shabby fall in living standards in countries where clumsy fingers of state monopoly have strangled competition.

Over 3,000 manufacturing firms in America share in the electrical business. We can name offhand 20 sizable firms that compete at giving the public better refrigerators. There are more than 200 rivals in the making of electric motors. At least 37 in electric irons; 53 in home freezers; 25 turn out vacuum cleaners. And so on down the list.

Some companies competing with General Electric today actually sprang up from the seeds of General Electric research. New products have invited new companies. In certain cases, whole new industries. And more will come.

The competitive race just never ends. That sounds tiring for the contestants, but in fact it is healthy exercise. Healthy for the country, too. At General Electric we wouldn't have it any other way.

You can put your confidence in—

Following the ceremony a reception was held in the home of Mr. and Mrs. George Stanford. The bride's table was laid with an ecru lace cloth over brown. A tiered ecru wedding cake topped with a bride and groom and set in a ruffle of ecru net and bronze pom poms was on one end of the table. Centering the table were two brown candles and brown napkins on which were inscribed "Clyde and Wanda, November 25, 1953". At the other end of the table was the punch bowl. Presiding at the table were Miss Jean Galloway of Spur and Mrs. Paul Turpen, sister of the bride from Lubbock. Mrs. Herman Loftis, aunt of the bride from Frederick, Oklahoma, presided at the guest book. Other members of her house party included Mrs. Jack Rhine, aunt of the bride, and Miss Sue North of Clovis, New Mexico.

Mrs. Bearden chose a brown flannel suit with brown and white accessories for going away. Her corsage was of bronze daisy pom poms.

**Her Voice Travels 3 Miles for a Penny**

HOW MUCH DOES YOUR TELEPHONE SERVICE actually cost? Recently we asked a group of telephone customers to help answer that question by keeping a record of all the calls they made and received for a week. One of the group, Mrs. Felicia Littlejohn, made and received 58 local calls. She estimates that they covered a total of 345 miles. The cost, according to Mrs. Littlejohn's figures - about three miles for a penny. That's a real bargain," she added.

### Entry Deadline Is Producing Rush At Fort Worth Show

Fort Worth, Dec. 3 -- As the deadline for livestock entries nears, the mail at the offices of the Southwestern Exposition and Fair Stock Show is growing heavier and indications point to a record number of beef and dairy cattle, sheep and goats. Final day for these entries is Dec. 15.

Premiums are the largest in the Stock Show's history - \$173,235, including the horse show and rodeo. Exhibitors of horses have until Jan. 8 and exhibitors of poultry, turkeys and rabbits have until Jan. 15 to send in their entries.

Plans are already in motion for the world's greatest indoor rodeo. Verne Elliott, "Mr. Rodeo", who has produced all but two of the rodeos here since 1923, again will present the show. As was the case a year ago, Beutler Bros. will be associated with him and the combined string of rodeo stock form the greatest collection of bucking horses and fighting Brahms bulls in the country.

Special days are being set in honor of organizations and cities. Show dates are Jan. 29 through Feb. 7.

## BEFORE YOU BUY ANY NEW CAR—ASK YOURSELF THESE 5 QUESTIONS

*Does it match the Aero Willys on...*

### ECONOMY...

An independent auto-testing organization drove three AERO WILLYS cars, with overdrive, through all 48 states, covering more than 90,000 miles. On gas, they averaged better than 30 miles per gallon. And total operating cost was less than a penny a mile!

### SAFETY...

"Motor Trend" magazine has published ratings of 20 leading American automobiles on safety. They picked AERO WILLYS as the safest car of them all! Modern, aeroframe construction... good visibility... low center of gravity... all make AERO WILLYS safer for you!

### CONSTRUCTION...

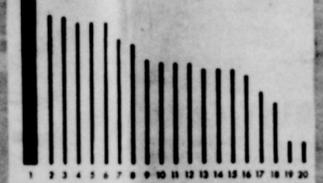

Most automobiles are still made the old-fashioned, "two-piece" way—by just dropping a body onto a frame and bolting them together. AERO WILLYS is made the modern "aeroframe" way—one sturdy unit, for greater strength and safety, less body noise.

### VISIBILITY...

From the driver's seat of an AERO WILLYS you can see all four fenders. This means safer driving, and much easier parking. Visibility forward is another big safety factor—you can actually see the road ahead of you as close as 10 feet in front of the car.

### COMFORT...

AERO WILLYS gives you "small-car" economy—but "big-car" comfort! You get more than five full feet of seating width in both front and rear seats. And you can drive around curves without that uncomfortable feeling of sway or roll you get in most ordinary cars.

CAN ANY CAR IN AMERICA AT ANY PRICE GIVE YOU ALL THESE ADVANTAGES... EXCEPT THE BEAUTIFUL
