

THE MULESHOE JOURNAL

VOLUME 8.

MULESHOE, BAILEY COUNTY, TEXAS, FRIDAY, MAY 16, 1936.

NUMBER 14

MANY VISITING KIWANIANS WILL BE HERE FOR CHARTER PRESENTATION THURSDAY

Culmination Of Work Started Many Weeks Ago; Plans Being Made For 200.

Arrangements are being made for one hundred or more out-of-town guests of the Kiwanis Club of Muleshoe at the presentation of its charter on the evening of Thursday, May 22, according to Cecil H. Tate, chairman of the house reception committee, and with the twenty-five local Kiwanians with their lady guests. It is expected that the total attendance will be well past the 150 mark. Chairman Tate reported Wednesday afternoon that provision was being made for 200 at the festive board.

The program for the evening, which is an elaborate one, will be under the direction of the Kiwanis Club of Lubbock, parent organization of the local group, and the charter will be presented by E. L. Mitchell of Clinton, Oklahoma, governor of North Texas and Oklahoma district of Kiwanis. Governor Clinton will use for his subject, "The Future of Kiwanis in the Panhandle." President K. K. Smith of the local club will respond to Mr. Mitchell in behalf of the Club. Charter night will afford the ladies of Muleshoe their first opportunity to be guests of the Club.

Charter night, commonly called in Kiwanis circles "Red Letter Day," is the culmination of the building of the local organization some six weeks ago by Walter C. Humpton, field representative of Kiwanis International. Considerable agitation has prevailed in favor of such a club since the first of the year. Due to the untiring efforts of local interested persons, a petition was at length submitted to Kiwanis International, with the resultant coming of Representative Humpton.

Interest in Kiwanis has grown steadily since its inception and after just a few weeks of meeting together, the members report a fine spirit of fellowship and cooperation on behalf of all and quite a bit of constructive work has already been done.

In Kiwanis it is not a matter of finding constructive work to perform, but rather finding time to do the work that comes before it, local Kiwanians say.

Weekly luncheons of the Club are held at the Lorton Home each Wednesday at 12:30. The time is so arranged to stress punctuality.

The objects of Kiwanis are set out briefly as follows:

To give primacy to the human and spiritual rather than to the material values of life.

To encourage the daily living of the Golden Rule in all human relationships.

To promote the adoption and the application of higher social, business and professional standards.

To develop by precept and example a more intelligent, aggressive and serviceable citizenship.

To provide through Kiwanis clubs, a practical means to form enduring friendships, to render altruistic service, and to build better communities.

To cooperate in creating and maintaining that sound public opinion and high idealism which make possible the increase of righteousness, justice, patriotism, and good will.

Members of the Kiwanis Club of Muleshoe whose names will appear on the charter are as follows:

Officers: K. K. Smith, president; A. V. McCarty, Jr., vice-president; Pat R. Bobo, secretary-treasurer; J. E. Altridge, district trustee; Ray Griffiths, J. E. Adams, Neil Roebey, A. J. Gardner.

Last Survivor

Charles Lockwood, 89, of Chamberlain, S. Dak., last of 31 men of the 1st Minnesota Civil War regiment who formed the "Last Man Club."

NO CENSUS REPORT YET; MUST RE-CHECK RECORDS

Inquiries are received at The Journal office every day about the census report for Bailey county and Muleshoe. "There ain't no census report"—yet. Our district is probably so thickly populated that it takes longer to add up the totals than it does in other districts. Anyway, the supervisor says that there is some more checking up to do and as soon as this is finished the report will be sent to The Journal at once.

SENATE PASSES RESTRICTIONS ON MEXICAN IMMIGRATION

WASHINGTON, D. C.—A bill placing immigration quota restrictions upon Mexico was passed Tuesday by the Senate without a record vote.

By 51 to 16, the senate voted to place Mexico alone of western nations under a quota. The bill originally called for placing all Central American countries under quota restrictions.

The drastic alteration was agreed upon at the suggestion of Senator Harris, Democrat, Georgia, sponsor of the measure. Then the bill was approved without a record vote.

Mexican immigration to this country which is now unlimited, would be restricted to about 1,200 to 1,900 annually.

Muleshoe Visited By Worst Hail Storm In Years

One of the worst hail storms in many years visited Muleshoe Tuesday, knocking out scores of windows, beating down gardens and demolishing automobile tops. Many of the hail stones which fell in town were as large as hen eggs. The storm covered an area about three or four miles wide by five or six long. It did not extend into the main wheat belt and fortunately few farmers had planted all of their row crops.

W. D. McDorman, just northwest of town reported the worst damage, the hail in this section having knocked large holes in the roof of his house, completely ruining it. Hail stones in this vicinity were said to have been as large as baseballs. C. H. Long brought several to town after the storm was over, all of them being larger than hen eggs. Trees and shrubbery in the part of it that were almost completely stripped of foliage.

LEVELLAND, Texas.—J. C. Clack 39, Levelland farmer, was killed Monday when caught in a severe hail storm while he was working in a field. He was bruised and succeeded in reaching his house, but died a short time afterward. Houses and property in Levelland were badly damaged by the wind and hail.

H. M. THOMPSON ANNOUNCES FOR COMMISSIONER, PRECT. 2

H. M. Thompson authorizes The Journal to announce this week that he is a candidate for the office of commissioner of Precinct No. 2, subject to the action of the Democratic primaries in July.

Mr. Thompson has resided in the West Camp community for the past five years, has been a member of the school board there for three years and is at present a member of the County school board. He states that he is running for this office on his own record and solicits the support of the voters of his precinct.

Local Markets

This report is received each Thursday morning between the hours of 9 a. m. and 11:30 a. m., and is subject to change without notice. Markets are furnished by local dealers for the benefit of their patrons.

File Applications Now For CMTC, Adams Urges

Judge J. E. Adams, chairman for the C. M. T. C. for Bailey county, asks that all boys who wish to take a free vacation this summer at the expense of Uncle Sam see him at once. This opportunity is offered those taking advantage of the Citizens Military Training Camps which will be open the first part of June.

These camps instruct in the various phases of the army, infantry, artillery, coast guard, signal corps, cavalry, etc., and offers a well rounded program for the red blooded boy who decides to become a guest of the government for a month this summer. Judge Adams stated that these camps are for the citizen-boys, and entail no obligation to enter the army or reserve corps, however, upon completion of four summers the graduates are entitled to commissions of the officers of the reserve corps of the U. S. Army. Dates of the camps to which the boys of Bailey county are eligible to attend are:

- Camp Bullis, Texas, June 12-July 17.
- Fort Bliss, Texas, June 10-July 9.
- Camp S. D. Little, Arizona, July 24-August 22.
- Fort Frances E. Warren, Wyoming, June 23-July 22.

Judge Adams stated that all expenses of the boys attending camps are paid by the U. S. Government. All clothes and canteen and other necessary equipment are furnished free. Boys are allowed five cents a mile in going to and from camp, or the government will send him a railroad ticket and pay him one cent a mile for extra. Expert athletic directors and camp directors will have charge of the boys, and free instructions in all forms of sports will be given.

REV. W. B. HICKS ATTENDING M. E. CONFERENCE AT DALLAS

Rev. W. B. Hicks left Monday of this week for Dallas, where he will attend the general conference of the Methodist church. Rev. Hicks will be gone two weeks.

This is the first time in something like twenty-five years that the conference has been held west of the Mississippi river. It is the law making body of the Methodist church. Delegates from all over the world will attend.

Wednesday, Bishop Cannon, who has been in the limelight due to his fight for enforcement of the prohibition law, was given a vote of confidence by the conference.

NOTICE

Notice is hereby given that the Commissioner's Court of Bailey County will sit as a board of equalization on Monday, May 26th, 1936.

Mothers' Day Program Held At Fairview

Mothers' Day was observed at the Fairview school house last Sunday with presching services, dinner on the ground at noon and a Mothers' Day program in the afternoon. A large crowd was in attendance, a few visiting from Muleshoe.

The Mothers' Day program was effectively arranged and carried out by Mrs. H. B. Mathis of that community, and the singing was directed by H. Sterling. The dinner, according to visitors from Muleshoe, was a very important item, and they are impressed with the cordiality and hospitality extended them.

Trustees Order Liquidation Of Surplus Material

The county school trustees recently authorized the county superintendent to collect all equipment used for domestic science, art, farm mechanics and agriculture which is not in use by the schools of the county so that it may be disposed of and the funds derived therefrom put to other use.

During the past seven years there have been more than five hundred rural schools provided with equipment through rural aid to be used in giving training in the above mentioned lines. Before schools could obtain rural aid to reimburse the districts for the equipment that had been purchased it was necessary for the trustees to employ teachers who were especially trained in this type of education and to assert an interest on the part of the community in the promotion of such work.

In many of the schools thus equipped the teachers have been changed and others employed who were either not interested in this phase of education or did not have sufficient training to direct the classes in these arts. This in a large measure has resulted in the loss of all interest that had been aroused by the former teachers, and much of the equipment has been lost.

Due to these existing conditions and since the present law provides that the equipment purchased with rural aid funds must remain the property of the state, the State Board of Education passed a resolution authorizing the disposal of this property in order to check further waste of funds through this channel.

MULESHOE 1; BAILEYBORO 2 IN HARD FOUGHT 12 INNINGS

Muleshoe was defeated by Baileyboro with a score of 1-2 last Sunday in the hardest fought game of baseball that the team has played this season. Fast work and precision marked the game throughout, and it was an interesting game to see.

School Closes Friday, May 16, At Lazbuddie

Friday, May 16, will mark the end of a very successful school year for the Lazbuddie community. Commencement exercises were held for the grammar grades Tuesday evening at 8:30 in the High school auditorium with Rev. Thompson of Farwell delivering the address. The following students were given grade diplomas and will be added to the high school enrollment next year: Geraldine Haskins, Thelma Chronister, Arvel Chronister, A. L. Hayes, Haskell McHardy, Clarence Pyrite, Bonnie Griffith, Lawrence Fleming, Melba Chronister, Clarence White, Arthur Dyck, Tony Ivey, and Alred Steinhoff.

The Lazbuddie school has been classified by the State Department as a second class high school and has been given definite assurance of affiliation with the State for all work being done this year. The people of the community are behind the school and for every thing else which tends toward making a better place in which to live. There is Sunday school every Sunday, both in the school auditorium and in the new church with an average attendance each week of 150.

The play, "Fingerprints," put on Friday night, May 9th, was a very decided success. The auditorium was full and a net rate of \$49.25 was very much appreciated by the boys who will get basket ball sweaters with same.

The play, "A Worthy Vagabond," is scheduled to take place Thursday evening, beginning at 8:30, and is expected to draw a large attendance.—Cont.

Construction Of Muleshoe-Earth Line Imminent

J. G. Singer, district manager for the State Telephone Company was in Muleshoe Wednesday making preparations for the building of the Muleshoe-Earth line which will start next week, according to Mr. Singer. R. L. Brown and M. P. Smith were appointed by the Kiwanis Club at the Wednesday meeting to go over the route with officials of the company on Tuesday and Wednesday of next week.

Members of the Club were in high spirits today over the fact that the line is to be built. All assistance possible will be given by the citizens of Muleshoe in the building of this extension, as well as other projects in the rapidly settling Muleshoe territory.

The main line will take a route which will serve best in connecting the many branch lines. It will take in the territory around Lazbuddie and Big Square, thence to Earth.

Rev. and Mrs. Lloyd Jones are attending the general conference of the Methodist church in Dallas this week.

Muleshoe Group At Lee Highway Opening Meet

A delegation from Muleshoe composed of W. L. Egan, Judge J. E. Adams, A. J. Gardner and Joe March attended the formal opening of the new highway between Crowell and Vernon last Friday. Delegations from practically all towns on Lee Highway between Muleshoe and Fort Worth were present for the ceremony, and efforts are to be made to complete the paving through to the state line as rapidly as possible.

In less than a year pavement on the Lee Highway, Highway 28 in Texas, has taken place in Wilbarger, Foard, and Cottle counties and preliminary work toward paving has taken place in Motley and Hale counties. Floyd county is now the only gap in one of the most extensive highway development programs in Texas.

With the completion of the present paving program on Highway 28 the first paved highway from all central points of Texas to the Plains will be completed and Highway 28 should prove to be the major route for travel to the Plains. In the past a large part of this trade has gone on the southern route by way of Breckenridge, Stamford, Spur and Lubbock. Highway 28 now affords a much better route for Plains travel than any other. Strong competition for the Plains trade in the past has also been offered by routes north of Highway 28.

As a result of the paving program on Highway 28, this route is considerably shorter than it has been heretofore and when the grading work in Motley county is completed the only square turn on the entire route from Plainville to Vernon, a distance of 170 miles, will be in Floyd county. There were 28 square turns between Crowell and Vernon before the pavement was completed and now there is not a one. The largest curve between Crowell and Vernon is only five degrees and about the same can be said of the new grades in the other counties.

The distance between Crowell and Vernon has been out around five miles and about the same distance has been cut between Radush and Crowell. Considerable mileage has been cut by the new grades in the other counties also.

New Produce House Opened Here Last Week

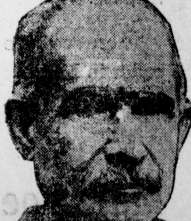

The Winningham Produce Company opened for business in Muleshoe last week. Mr. Elmo Head, formerly with the Muleshoe Produce Company will be manager of the new firm. He is well known here, having been in Muleshoe for the past several months. Mr. Winningham, proprietor of the new concern, is also well known to farmers of this territory and these gentlemen invite their old customers to call on them in their new location in the old Post Office building.

WILKINS WILL USE SUB TO MAKE VOGUE UNDER ICE

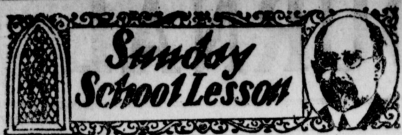

WASHINGTON, May 13—The Sir Hubert Wilkins expedition, which would sail beneath the ice across the top of the world—from Spitzbergen via the North Pole to the Behring Sea—has chosen the old and battered United States submarine P-13 for its craft and today made written request to the navy department for a charter.

The plans disclosed that the submarine, if made available, would be virtually rebuilt; fitted with machinery for boring through ice 50 feet thick; equipped with balloon air observation and provided with both television and radio.

He Has Never Slept

Albert E. Heron of Trenton, N. J., 76 years old, declares that he has never slept in his life. He reads newspapers all night.

JESUS TEACHING IN THE TEMPLE

Matthew 22:15-22; 34-40

Rev. Samuel D. Price, D. D.

After the Triumphal Entry into Jerusalem on Palm Sunday Jesus returned to Bethany for the night and came again to the Holy City on Monday. This time there was no special acclaim except as the children, true to their nature, played at procession and sang praises as did their adults the day before. When Jesus' attention was called to their singing as unseemly in the Temple courts He declined to rebuke them. Indeed, in Jesus the children and women, too, have found their best friend in all the history of world leaders. Again the night was spent at Bethany and another return made to Jerusalem on Tuesday. Then the withered fig tree was noted which because it showed only leaves and no fruit the previous day had been blighted for its mere pretention, for in Palestine the fruit would come before the leaves.

This last day of public teaching is clearly divided into two parts. Read Matthew 23, 24 and 25 for the instructions of that day. Chapter 23 gives the morning lessons. In the afternoon He went to the Mount of Olives (24:3).

Those who hated each other intensely by united in their program to entrap Jesus. The Pharisees, Herodians and Sadducees were in opposing groups of thinkers, but they form a coalition against the One they regard as their common enemy. False flattery was used to get Him off His guard if possible. Then a trick question was propounded, which they thought would ensnare Him, no matter how He might make reply. The Jew hated the Roman government and had to pay tax there to. Shall tribute be paid to Rome was the query.

This time reply is made through an acted parable, something akin to pagentry that is very popular for teaching purposes in our day. Jesus asked for a Roman coin. Of course none would be found within the temple area and recourse was possibly made to one of the money changers, whose table had been overturned by Him the previous day. Think of the waiting company, and then note their interest as a denarius was held aloft and the question asked: "Whose picture and inscriptions?" In amazement the Herodians and Pharisees heard the injunction to do full duty both to the government in power and to Almighty God as well. Obligation was recognized to pay taxes to the authority that provided roads, safety and other values that come from taxation. At the same time the King of kings must receive the loyalty that belongs unto Him.

The Sadducees then tried their trick question about the resurrection state in which they did not believe. But what they admitted for the sake of an argument is an abiding fact. Jesus told them that sensuous conditions did not prevail in the Home land of the soul. Then the Pharisees try once more as they ask for the supreme commandment. The reply shows dual obligation to both God and neighbor.

The teaching about duties to Caesar and our neighbors introduces the applications in this quarterly temperance lesson. Both Wets and Drys have sides at the congressional hearing last March. National prosperity and better morals are positively related to the enforcement of the Eighteenth Amendment. The testimony of Edison and Ford are on the side of humanity as against those who are seeking commercial gain through the organized liquor traffic. The fact is the same as always in the past. Alcohol is poison. It is neither body building nor of value in building good character.

What Is Kiwanis?

Kiwanis, which has grown to a membership of over ninety thousand in more than twelve hundred cities of the United States and Canada within the short span of nine years, is confronted with the problem of educating this increasing membership in its aims, purposes and ideals.

Kiwanis is a composite group of business, professional and agricultural men devoted to the rendition of service to the respective communities in which the clubs are located.

Theological dogma, political creed, nationality, wealth, social status—none of these have any place in its membership. It is a mosaic not only of North American business life, but also of varied social and economic and social points of view.

One of the real contributions that Kiwanis makes is the inculcation in each member of a fine sense of perspective—a keen appreciation of fundamental life values, and a working knowledge of the relation of the forces of the spirit of business achievement.

The success of individuals, of communities, and of nations, depends on the extent to which the spiritual forces, latent in all of us, are wholesomely developed. It is these spiritual forces which constitute the fundamentals of Kiwanis. They are age old, sometimes called old fashioned, but always powerful and ever new in their application.

Integrity, faith, industry, vision, thrift and interest in the other fellow—these constitute the fundamentals of Kiwanis.

Building with these forces, Kiwanis is truly a conscious driving force toward newer and higher ideals.

The Very Latest

By MARY MARSHALL

To the young woman who contemplates making some of her own clothes the best advice that can be given is this: "Specialize." Don't attempt to make an evening dress, and a separate skirt, and a blouse and a few articles of lingerie. At least don't attempt to do all these things to start with. A different technique is required in the making of the various sorts of clothes

and you will get better results if you plan to make several blouses, or several simple house dresses to start with.

This year there is need in the wardrobe of every woman of a variety of different blouses and a distinct saving can be achieved if you make these yourself. The lower sketch shows one of the new spring blouses designed by an important French dressmaker.

To wear with a brown suit such as the one of flat crepe shown in the upper sketch it might be made from natural colored pongee. It might also be effectively made from opstzer white silk. Two shades of blue or two shades of green would be a good selection for wear with a blue or green suit or separate skirt.

VACCINES

Some time ago I attended a meeting of my medical society, the program being a sort of symposium—"What I Know About Vaccines"; all members were to participate in the discussion. After several interesting talks, one physician, noted for his terseness and pointed expression, arose and said, "I can tell you in very short time what I

know about vaccines—not a damn thing!" Nevertheless the vaccines have come to stay. With their judicious and timely use, typhoid fever has all but become a thing of the past. We have learned to depend upon immunizing preparations made to sell; that is the case with every branch of the health

game. A vaccine, or immunizing preparation, made to sell; that is the case with every branch of the health

manufacturer, is dependable.

PROHIBITION

President Hoover's appeal to Congress for the immediate passage of legislation designed to strengthen his hand in the enforcement of the Prohibition laws removes all possible doubt, if any really existed, as to whether or not he is earnest in his desire to make the "dry" laws effective.

To agitation for the repeal of Prohibition, based upon the assertion that it cannot be enforced, the President's response is that it has not had a fair chance at enforcement under the system which Congress has imposed upon the Executive. He asks that the Pro-

hibition Unit be transferred from the Treasury, where it obviously does not belong, to the Department of Justice, where it does belong; that measure be adopted to permit the speedy trial of Prohibition violations in the Federal Courts; that more room be provided in Federal prisons for those convicts under this law; that the Border Patrol be unified and made more effective and that an adequate statute be adopted for the control of the liquor traffic in the District of Columbia, for which Congress is the local legislative body. The President is entitled to adequate tools with which to do the work Congress imposes upon him. If the people of the United States really want prohibition enforced, and have impressed that fact upon their representatives in the Senate and House, Congress will strengthen the President's arm in these respects. If Congress fails to do so, the fact will be hailed by the advocates of repeal as proof that the people are tired of Prohibition and do not want it enforced.

On that plea, that public sentiment has changed since the Eighteenth Amendment was adopted, the Wets hope to win many victories at the polls this year. There are 36 senators to be elected in 1930, 435 members of the House of Representatives and Governors in more than half the States. In many, if not most of these contests the Wet vs.

Dry issue will be the paramount one. Whichever else National Prohibition has accomplished, it has done precisely what far-seeing statesmen as Presidents Taft and Wilson predicted it would do; it has cut across party lines and thrown the whole political system of the United States into confusion. And unless this year's election settles the question, which is unlikely, there is an excellent chance that the sole major issue in the next Presidential election will be that of Prohibition. For nothing less than a clear-cut national referendum which will determine without equivocation just what the people of the United States today really desire as to control or suppression of the liquor traffic will satisfy the ardent advocates either of Prohibition or of its repeal.

SUCCESS

"You cannot say that any man is successful, so long as he is alive," said the head of one of America's great industries not long ago. He meant that any man might make a blunder which would offset all that had gone before, no matter how successful he had been. That was drawing it pretty fine, but how many men whom the world regards as "successful" feel that way about themselves? Find the men who feel that they have succeeded in doing

all that they ever hoped or tried to do and you find the unhappiest men alive. They may have succeeded in their business enterprises, but they have not succeeded in living.

Success means different things to different people, and sometimes the man whom the world piles has succeeded in leading a happier life than has the one whom the world envies. A man who overtakes his ideals is not a success in any true sense of the world. Unless our standards grow steadily higher as we approach them we soon lose the zest of striving to attain them, and in that striving, not in the overtaking, lies happiness, and nowhere else.

It is a common misconception that the Declaration of Independence declares happiness to be one of the inalienable rights of humankind. The right which the Colonists so boldly claimed was the right to pursue happiness. And the man or woman, who discovers early in life that the nearest approach to happiness, is through a constant endeavor to do the job in hand, as well as it can be done comes nearer to success, not only in his or her immediate occupation but in the broader sense of living a successful life.

Town Talk

Dr. A. R. Matthews returned Thursday from a trip to Mineral Wells.

E. C. Eubanks and F. T. Roloson of Hereford were here Friday.

H. C. Pipkin and Chas. Keiffer of Amarillo were here Friday.

Pat R. Bobo spent the week end in Fort Worth.

J. D. Thomas of Farwell was here Friday.

Mr. and Mrs. Gilbert Wollard spent Sunday in Floydada.

W. H. Eledsoe and Geo. W. Dupree were here Monday from Lubbock.

Mr. and Mrs. Ivan B. Mardis of Tullia spent Sunday here.

W. W. Kirk of Plainview was here Tuesday.

E. A. Bills of Littlefield was in town Monday.

S. A. McKee and son, Sam, of Pittsburg, Kansas, were here this week.

Rev. Doris Davis and family were here last week, the guests of Mrs. Davis' parents, Mr. and Mrs. A. J. DeBort.

Chas. Pomeroy of Amarillo was in Muleshoe Saturday.

Sam Hoffman of Texaco was in town Tuesday.

Walter Moeller spent the week-end in Amarillo with his brother, Eric Moeller.

Mrs. Sarah Spicer spent the week-end in Amarillo with her sister, Mrs. L. D. Walker.

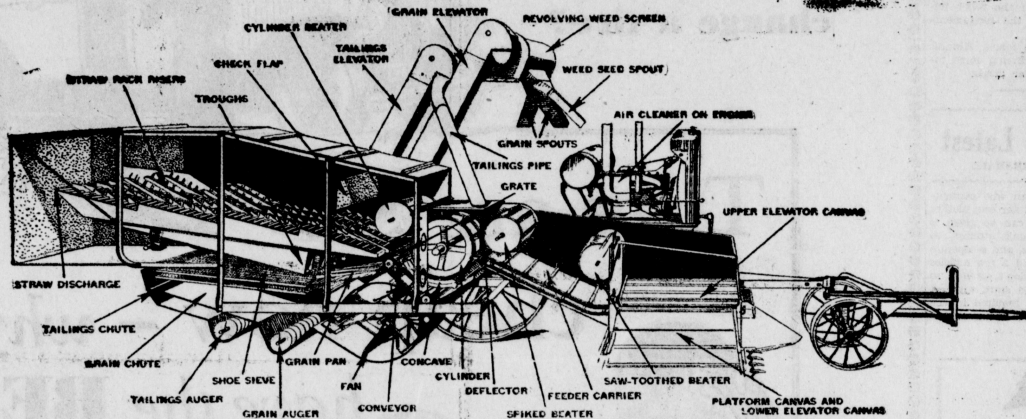

Mrs. Jimmie Singer of Littlefield, is visiting her parents, Mr. and Mrs. C. F. Moeller.

Jimmie and Calvin Adams are visiting their aunt, Mrs. Chas. Keene, at Rule.

Miss Mayone Moore of Mt. Vernon, Texas, is visiting her sister, Mrs. J. C. Birdsong.

Horace Westley of Colorado was in Muleshoe the first of the week looking after business.

A Clean Thresher and a Grain Saver

Sectional View of the McCormick-Deering No. 8 Harvester-Thresher

12 Important McCormick-Deering Points

1. Adjustable to cut low. Gets lodged and tangled grain.
2. Continuation of grain-tight platform canvas forms lower elevator canvas. No grain lost at end of platform. Large capacity, wide elevator carries all grain to feeder.
3. Chain and slat feeder carries grain, heads first, into the cylinder. Direct front feed.
4. Spiked beater in feeder assures positive feeding and controls delivery of grain to cylinder.
5. Ninety per cent separation at cylinder. Straw and grain thus separated never mix again.
6. Four-section straw rack. Extends entire length of thresher from cylinder to straw spreader. Combs straw apart, drops it three times, thoroughly shakes out all the grain.
7. Extra long chaffer and cleaning sieve thoroughly cleans grain.
8. Revolving weed screen takes weed seeds out of threshed grain and bags them. Saves dockage and reduces spread of weeds.
9. Platform folds for transportation—does not have to be detached. No transport truck to buy.
10. A pioneer of small combines—backed by 99 years of practical harvesting-machine experience, and by field tests under difficult conditions in the harvest fields of the world.
11. Expert service on the entire machine by permanent dealers and Company-owned branches.
12. Handles a variety of crops under a variety of conditions and seasons.

THE McCormick-Deering No. 8 Harvester-Thresher is noted among experienced threshermen for its ability to thresh cleanly and save all the grain. Elevator men write that grain threshed with the McCormick-Deering brings top prices and is free from weed seeds and stems, shriveled wheat kernels, and other trash.

The McCormick-Deering is designed according to the accepted principles so successful in stationary threshers. The continuation of the grain-tight platform canvas forms the lower elevator canvas. No grain is lost at the end of the platform. A large-capacity, wide elevator carries all the grain to the feeder. Direct front feed is assured on the McCormick-Deering. A chain and slat feeder carries grain, heads first, into the cylinder.

High Efficiency, Ball-Bearing Cylinder

A spike-tooth cylinder, the recognized type for clean threshing, is mounted on ball bearings, high enough to permit immediate separation of the grain by gravity through the concaves and grates. The grain separated here never mixes with the straw again. The feed throat has a capacity of 48 square inches—ample to handle any crop that can be

successfully combined. Practically 90 per cent separation occurs at the cylinder in the McCormick-Deering.

The straw delivered to the straw racks has very little grain in it. Nevertheless, straw racks of extraordinary capacity are provided. The straw travels and is agitated over a separating space 100 inches by 37 inches. The straw racks are of the four-section type, equipped with risers and pins which comb the straw apart, tossing it and dropping it repeatedly until all the kernels are shaken out. The cleaning area is unusually large. The shoe sieve is 38 inches by 37 inches. A revolving weed screen separates and bags the weed seeds—making the grain clean and reducing the spread of weeds.

Play Safe—Select a McCormick-Deering

Come in and inspect the McCormick-Deering—inside and out. You'll find all of the principles and features that experienced threshermen have found best for clean threshing under all conditions and in all small grain crops, one year after another. And the McCormick-Deering is backed by an unmatched service organization which protects every McCormick-Deering user everywhere.

All customers selling cream to the Wingham Produce Co., at Muleshoe next Saturday will be numbered from 1 on up and each odd number will receive, free of charge, one baby chick feeder, valued at 35 cents. Wingham Produce Co.

HINTS FOR THE HOME

Pies
The tenderness or shortness of pastry depends to a great extent upon the amount of flour in proportion to the shortening, as a general rule, use one-fourth to one-third as much shortening as flour. Just enough water should be used to cause the paste to stick together, or the less amount of water, the more brittle the crust will be. The paste should be put together quickly and handled as little as possible for a great deal of handling results in a tough crust.

All ingredients should be as cold as possible for if the shortening is warm and soft it will stick to the board.

A thin fruit juice has a tendency to soak into the crust. Rubbing the crust with the white of an egg helps to prevent this.

If an upper crust is used, it must be split in several places to allow the steam to escape.

Good Pie Crust

To make crust try this recipe: One and one-half cups of flour, one-third to one-half cup shortening, one-half teaspoon salt, cold water.

Sift flour and salt together, cut in the fat by means of two knives until all is reduced to a fine powder. Add the cold water slowly and just enough to make the dough stick together. Put out on a floured board and roll thinly into circular shape to fit the plate. Fit it loosely into the plate, allowing

it to come a little over the edge, as it shrinks when baked. Trim edges.

If two crusts are used, moisten the upper crust and then press edges together to prevent juice from seeping. Having mastered the pastry part of the pie, the next thing is to make the pie itself.

CARD OF THANKS

We take this means of expressing our appreciation for the expressions of sympathy and kindness rendered us in our bereavement during the illness and death of our father.

TEST OF CONOCO'S GERM-PROCESSED TENACIOUS FILM . . .

. . . Compared with Popular Oils at Pike's Peak . . . Reveals 76.4% Less Motor Wear! . . .

We sincerely believe that this disclosure alone will cause you to begin using CONOCO Germ-Processed Motor Oil . . . such decided reduction in motor wear . . . such triumph over the savage attack of friction and heat . . . such positive supremacy over the oil you have been using, all have a definite appeal to your pocketbook and judgment.

Charts prepared from the Pike's Peak Test records indicate a longer life for your motor by lubricating it with Germ-Processed oil. Too, you will save substantially on your gasoline cost, and in oil expense, by using this oil. And the fact that Germ-Processed oil penetrates metal surfaces means, that after starting your car on a cold morning you can safely drive at top speed with less likelihood of damage . . . for CONOCO's film is already on the job.

Less Carbon—Less Cost—More Mileage and Less Heating—More Compression. All these things mean a better all-around motor. It is truly unusual for a motor oil to so excel competition as CONOCO did in the Pike's Peak Tests. Tested out on the Pike's Peak Highway, scene of many famous automobile tests, was a memorable struggle for supremacy . . . On the one side, three of America's representative and popular oils—on the other, Germ-Processed oil. And CONOCO Germ-Processed Motor Oil won, by all test applied.

Only CONOCO can make Germ-Processed oils. CONOCO can give you these new motor oil merits, including penetrative lubricity. We hope to serve you soon, at stations displaying the Red Triangle.

SEND NOW for the new Free Booklet which describes in detail the story of the Pike's Peak Tests. Illustrated with photographs and charts. Address Continental Oil Company, Ponca City, Okla., or at the station with the Red Triangle.

IT'S WISE TO CHOOSE A SIX

These modern features make it wise to choose a Chevrolet Six

In selecting a low-priced car, bear these all-important facts in mind: The new Chevrolet is a SIX—and offers all the smoothness, flexibility and durability of a 58-horsepower valve-in-head six-cylinder motor. The new Chevrolet is the only car offering the style, comfort and safety of Body by Fisher at such low prices.

And the new Chevrolet is the only car in its field with this great combination of modern engineering advancements:

four long semi-elliptic springs, four Lovejoy hydraulic shock absorbers, completely enclosed four-wheel brakes, a modern "pump" method of fuel supply with the gas tank in the rear, adjustable driver's seat, Fisher non-glare windshield and twin-beam headlamps.

See your nearest Chevrolet dealer today. Learn for yourself why it's wise to choose a Six. Learn for how small a down payment and on what easy terms you can own a new Chevrolet Six.

SIX-CYLINDER SMOOTHNESS AT LOW COST

Let Mrs. Bostrom tell you how she **SAVED \$831** on last years

“Our threshing bill averaged \$900 a year with extra hired help and feed to pay, compared with \$69 this year on the same acreage.”

“We combined 265 ACRES IN 7 DAYS. ONE MAN ran the whole outfit and handled it EASIER than he could have a binder. I HAD NO REPAIR EXPENSE, and the total cost per acre for oil and gas for both tractor and Combine was 1 1/4 cents per bushel. We hired NO EXTRA HELP. Our threshing bill has averaged \$900 a year, with extra hired help to pay and feed in addition, compared with \$69 this year on the same acreage—AN ACTUAL SAVING OF \$831. I am very much pleased with my Gleaner Baldwin.”—Mrs. Mary Bostrom, Buford, North Dakota.

Mrs. Bostrom's experience should interest every wheat farmer, large and small. Consider these facts again—265 acres in 7 days—one man—no repair expense—no extra help—an ACTUAL SAVING OF \$831.

Gleaner Baldwin owners everywhere appreciate what Mrs. Bostrom says because they realize the full measure of profitable Combine satisfaction that only the Gleaner Baldwin provides.

As a wheat grower, you want a machine that will save your crops and do the job under adverse, as well as normal conditions, with a minimum of expense, time, trouble, delay and labor.

THESE FEATURES MAKE THE GLEANER BALDWIN A BETTER BUY

Before buying a Combine study the Gleaner Baldwin construction, beginning with the rugged, powerful, all-steel frame. Note the harvesting unit, the steel pan, combining harvester platform and feeder housing into one unit; the all-steel spiral conveyor-feeder, which is the only moving part between sickle and cylinder. Note the absence of friction-creating power-consuming working parts throughout. You will be impressed with the simplicity,—the absence of canvas conveyors, feeder raddles, universal joints, rollers, and extra parts.

Study the action of the special rasped bar threshing cylinder. Note its forward location directly behind the harvester unit instead of half way back in the separator. See how it threshes the grain without chopping or pulverizing the straw.

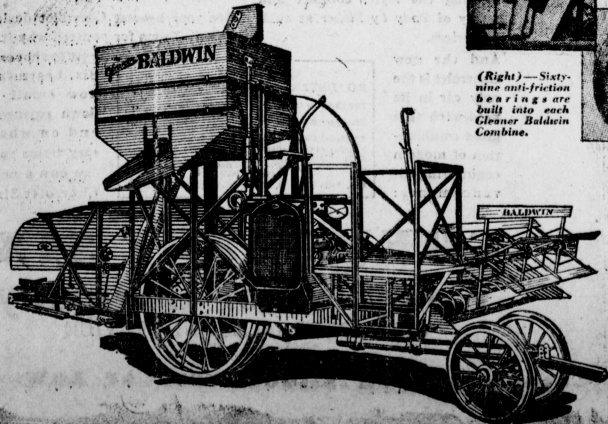

SELF-STARTER ON COMBINE ENGINE

You will want plenty of sturdy, dependable, economical power which is supplied on Gleaner Baldwin Combines by the Model “A” Ford Industrial engine, equipped with self-starter, the first Combine engine ever to be so equipped.

These are but a few of the hundreds of statements received from satisfied Gleaner Baldwin owners. We have a new 1930 Gleaner Baldwin Combine on display. Come in and see it, or if you feel the need of a windrow harvester or a pick-up attachment we can supply both, built by Gleaner to Gleaner standards.

If you are too busy to come and see us, call and we will come and see you. In either event there is no obligation. We merely want to show you why the Gleaner Baldwin is the best Combine ever built. We are also in position to offer attractive terms when desired.

Gleaner BALDWIN COMBINES

(Left)—Cut steel sprockets and roller chains are regular equipment on all Gleaner Baldwin combines.

(Right)—Sixty-nine anti-friction bearings are built into each Gleaner Baldwin Combine.

Compare the class of material built into the Gleaner Baldwin Combine.

Gleaner Baldwin Combines are proved grain savers. They not only save the grain but they clean it and put it in the bin in marketable condition. Because of the unusual light weight of Gleaner Baldwin Combines, made possible by the scientific design and superior construction features, greater separating capacity per pound of weight and per foot of cutter bar is made possible. Gleaner Baldwin Combines, because of their simplicity, may be operated by one man. High priced help is not necessary, thus another harvest time expense is reduced.

“PAID FOR ITSELF IN A YEAR”

Mrs. Bostrom, quoted above, saved more than \$800 in a single season. W. A. Holloway, Alton, Kansas, declares that his Gleaner Baldwin “paid for itself in a year.” Vernon C. Harm, Bertrand, Neb., says he harvested his wheat “at a trifle less than 25 cents an acre,” with a Gleaner Baldwin Combine.

Wincinger Bros., Alton, Kansas, “saved in harvest expense and by marketing grain on a higher market, \$1900” in a single season. Casper Boerner, Holyoke, Colo., had a repair bill of 60 cents after two years service with his Gleaner Baldwin.

1928 COST

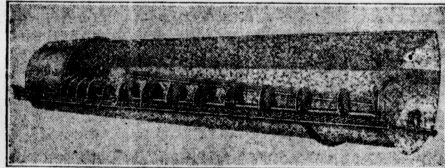

\$900

1929 COST

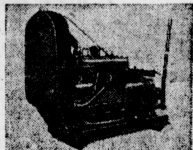

\$69

Mrs. Bostrom's letter below is only one of many unsolicited testimonials from satisfied Gleaner Baldwin owners.

EXCLUSIVE FEATURES

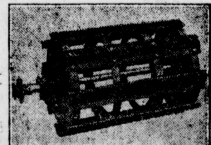

Above is shown the all-steel harvester unit and feeder housing which has revolutionized Combine design and construction. There are no canvas conveyors or feeder raddles. Combine design is simplified throughout; lost motion is abolished; weight and friction is reduced; steel replaces canvas and valuable space in the forepart of the Combine is utilized for separation in Gleaner Baldwin Combines, instead of being a part of the conveyor-feeder mechanism, as is the case with canvas equipped machines.

The Model “A” Ford Industrial engine, with self-starter, and equipped for Combine work supplies ample, economical power.

The new balancing and lifting devices make the Gleaner Baldwin Combine a one-man machine.

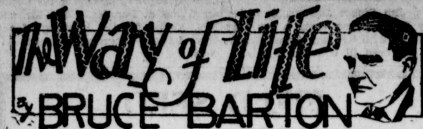

The rasped bar threshing cylinder used in Gleaner Baldwin Combines is the best type of cylinder for Combine work.

WHAT MAKES A JOB GOOD?
 One morning the elevator starter was breaking in a new elevator-boy.
 At noon the new boy was running the car alone. He had on a uniform and was starting and stopping with the confidence of a veteran.
 From apprentice to professional in a couple of hours.
 What thoughts are in that young fellow's head as he receives his instructions from the gray haired veteran?
 How can he fail to look forward and see in the older man a picture of himself twenty years from now.
 He is taking up a low paid job—a job with no future. Twenty years from now he will be just where he is today—only older, with a grasp on the job somewhat less secure. His experience will count for nothing, because it is experience that another man can gain in a couple of years.
 He may from time to time, force an increase in his pay. But the increases will not be large. Why?
 Because he learned the job in two days. And in any other two days the company can find plenty of men who learn just as fast and take the job away from him.
 Recently I met in a hotel restaurant a friend of mine who has just come back from England after taking special work in surgery under some of the greatest men in the world.

He is thirty-one years old: it is fourteen years since he entered college.
 For ten of those fourteen years he has been in medical schools, in hospitals, and in foreign countries studying.
 Fourteen long years of hard, unintermittent study. Years made more difficult by the necessity of self support: and filled sometimes with questionings, as he has seen his college classmates moving forward to their places as well paid physicians, and he lingering still in school.
 Yet with what result?
 He has acquired a specialized training such as only a few other men in New York possess.
 He will begin life with an income of several thousands; he will pay back his educational debts in a couple of years; in ten years his income will be tens of thousands.
 Fourteen years of his life went into the mastery of his profession. But he need have no fear of losing what he has gained. No other man can displace him, except at the cost of fourteen years of work.
 And when he said it he epitomized the philosophy of Business.
 The job that the gods sell for two hours' training is worth just what it costs.
 Only that job is worth much which has tied to it the price tag of constant unceasing study and work.

YL News Items

Mr. Arthur Richardson of Norman, Oklahoma, is visiting his nephew, Mr. T. L. McKillip.
 Mr. Hugh Gainer and children, Isabella and Leonard and Miss Audice Cox of Amberst visited friends and relatives in Snyder and Sweetwater this week-end.
 Mr. N. H. Durham of Dunn, and Mr. and Mrs. Carl C. Wilson of Rotan, visited Mr. and Mrs. Byron Durham Saturday and Sunday.
 The men and boys of the YL community gave a Mother's Day dinner for the ladies and girls last Sunday. All the lunch was prepared and served by the men.
 Mr. W. J. Shaver of Granite, Oklahoma, is visiting in the Hugh Gainer home.
 Kline and Luther Buhrmann, Emmett Traveck and Dean Stevens spent Sunday afternoon with Dick Willman.
 James Bushnell and Orval Sawyer visited friends in this community last week-end.
 Mr. and Mrs. L. Day and children and Mr. L. E. Wilson and family, Mr. J. H. Harrel and family, Mr. D. R. Pichel and Mr. O. E. Burnham enjoyed a picnic supper at the sandhills Sunday night.
 Mrs. Ed Hupp is on the sick list this week.
 The Senior class and the school faculty together with a group of their friends enjoyed a theatre party at Clovis Friday evening. They had refreshments in the Tea Room of the Murry Cafe before returning home.
 Mrs. Sam Lane and son John, from Rocky Ford, Colorado, were visiting relatives and friends here the first of the week.
 Miss June Beller made the best grades in High School during the past term of school. She was given the Honor Student's medal.—Reporter.

W. M. U. MEETING

The W. M. U. ladies of the Baptist church met Monday at the home of Mrs. Motheral. We completed our study course on "How to Pray." Examination questions were given some to be answered and handed in not later than next Monday. We have all enjoyed the lessons so much. The society voted to meet during the summer months at the church at 3 o'clock. Lesson for next Monday will be taken from the missionary lesson in Royal Service. It is urged that all our ladies be present at the meetings from time to time.

Would like to add that the report failed to arrive at its destination in

regular business and social. Mrs. Motheral our second vice-president. Mrs. Winn was elected to take her place. All of the officers had a good report. There were 14 members present and one visitor. The class was entertained by Group No. 1.—Reporter.

Ill 12 Years Konjola Wins Real Victory

Stubborn Case Soon Yields To Power Of New Medicine—Grateful Lady Eager To Tell Others.

MRS. LILLIAN LORANE

"I suffered for twelve years from kidney trouble and nervousness," said Mrs. Lillian Lorane, Mablevale, Ark., near Little Rock. "My kidneys were in a very bad state and I was forced to rise many times each night. This naturally made sleep difficult. My nerves were in very bad condition and this seemed to affect my eye sight. I could scarcely go about my work and I was worried and discouraged. I seemed to have no energy for anything."

"I tried a great many medicines and treatments but nothing seemed to do me the least bit of good. I finally decided to give Konjola a trial and the benefit which I received from this medicine is almost unbelievable. Konjola built up my health until I am in better condition than I have been in years. My kidneys are normal and I can sleep without interruption. My entire system seemed to respond to this modern medicine and my friends all remark upon the improvement in my appearance."

Konjola has become the most talked of medicine in America because it makes good. Taken after meals over a period of from six to eight weeks, this great medicine has made a remarkable record in the most stubborn cases.

Konjola is sold in Muleshoe at McCarty drug store, and by all the best druggists in all towns throughout this entire section.—Adv.

Texas is not among the leading states in metal production, but in 1928 its mines produced \$28,000 worth of gold, 1,050,000 ounces of silver, 1,000,000 pounds of lead and 400,000 pounds of copper.

More Eggs All Year With this New Panhandle—Plains LAYING HOUSE

Especially designed for this section of the Southwest by our Extension Service Department—meets the exact requirements of the climate and altitude, and assures the ample sunlight, scientific ventilation, and cold protection necessary for the health and high egg production of your hens. Cleans quickly—practical—economical and easy to build. Accommodates 125 to 150 birds, with provision for 30 nests. Here is a laying house that will quickly pay for itself in added eggs and the improved health of your flock.

Stop In, Phone Or Write For CONSTRUCTOR No. 1

This new four-page illustrated folder completely describes the specifications and advantages of the Panhandle—Plains Laying House. It is yours free on request. Also valuable additional information, cost estimates and construction details, if desired.

Our Aim—To Help Improve the Panhandle

Progress News Notes

The Union Missionary Society met Monday at the school house with 10 members present. After a short business session the meeting was turned over to Fern Gross, leader for the afternoon. A very interesting program was rendered from "The Voice."

It was decided to have two lessons from our Bible study every month instead of one.

Mrs. Frank Snyder reported that we had 104 baby chicks for the Orphan's Home at Portales. We meet next week at the school house in our regular Bible study. This study has just begun and we will have the first two chapters of Exodus. Everybody is invited to meet with us at 2:30.

There was an attendance of 111 in Sunday school Sunday. There was no preaching.

Mrs. M. S. Packer and daughters, Ada and Florence, of Crosbyton and Mrs. Theo Packer of Littlefield, visited in the home of Elgin Fowler last Sunday.

Mr. and Mrs. M. L. Fenton visited Mr. Fenton's mother in Snyder last week-end.

Mrs. Shirley and children, Mrs. Morgan and children took Sunday dinner with Mr. and Mrs. Cecil Robertson.

Iola Shirley spent Sunday with Ella May and Julia Belle Morgan.

Arnold Atkinson spent Sunday with George Gross.

Miss Delma Fenton is visiting her grandmother, Mrs. H. C. Fenton of Snyder, Texas.

Pauline Benton spent Sunday with Ruby Nell Morris.

Velma Hay spent Sunday with Betty and Hazel Nelson.

Elgin Fowler, Ira Packer and Buster Reid went to Tularosa, N. M., Saturday. Mr. Fowler and Mr. Packer returned Sunday.

The children put on a very interesting Mother's Day program Sunday night. There were several visitors out from Muleshoe and Longview.

M. L. Fenton is in Dalhart this week

on business.

Mr. and Mrs. Clarence Kimore and children took Sunday dinner with Mr. and Mrs. Allen Fenton.

Quite a bit of hail fell in this community Tuesday. Some of those that have cotton and feed planted will have to plant over.

Mr. and Mrs. Frank Snyder and son, Carroll, and Mr. and Mrs. Verlice Snyder visited relatives in Pampa over the week-end. Mrs. Tyson going with them as far as Amarillo to visit her daughter and son.

BIRTHDAY PARTY

Mrs. E. McWilliams entertained her little niece, Betty Jo Holland with a party celebrating her seventh birthday.

Games were enjoyed for some time, after which Betty Jo led the guests into the dining room, where a beautiful white cake with pink forget-me-nots and seven candles in the center of the table.

Baloon favors and animal place cards were laid for the following:

Mary Dennis, Hattie Ray Griffiths, Wilton Brooks Winn, Weta May Danner, Lela Mae Barron, Ross and James B. Glaze, Christene Hicks, Francis Coker, Loyd Akup, Charles Edward McWilliams and her Sunday School teacher, Mrs. Alton Coker. The honoree received many pretty gifts.—Reporter.

MISSIONARY SOCIETY IS ORGANIZED AT YL LAST WEEK

The Y. L. Ladies met at the parsonage last Wednesday afternoon and organized a missionary society.

The meeting was opened by song and prayer and Scripture reading by Sister Jones. An interesting talk on the missionary work was given by Sister Jones, after which the following officers were elected: Mrs. I. F. Willman, president; Mrs. H. M. Shofner, vice president; Miss Julia M. Harre, corresponding secretary; Mrs. Clara M. Harre, recording secretary; Miss Dottie Wilterding, treasurer; Mrs. E. H. Buh-

mann, supt. of mission and Bible study; Mrs. Arthur Ryan, supt. of publicity; Mrs. O. N. Robison, supt. of social service; Mrs. Mervin Wilterding, supt. of supplies.

The next meeting will be May 20 at the home of Mrs. Mervin Wilterding.—Reporter.

KIWANIS CHARTER—

(Continued from page 1.)
ner, J. M. March, C. S. Holland and T. E. Arnold, directors; Connie Gupton, Cecil H. Tate, D. L. Kendrick, M. P. Smith, R. L. Brown, Garland McCoy, A. R. Matthews, H. A. Eckler, A. E.

Lewis, Jack McIntosh, R. B. Canfield, H. C. Henington, Wm. Mathiesen and V. B. Rogers.

Mrs. Jim Stokes and granddaughter, Patsy Ruth Gaston, spent a few days in Pampa with her son, Alfred Spicer, who has been ill with pneumonia.

CARD OF THANKS
We wish to take this opportunity to thank Mr. McDadds for the eggs he donated to this Society for the Orphan's Home at Portales. Also Mr. and Mrs. Young for the hatching of the tray of eggs.—Progress Missionary Society.

FORD MOTOR COMPANY

To Our Many Customers

Every person in our whole trade territory is a prospective customer.

To make them satisfied customers it is only necessary to offer a variety of bread that will appeal to them.

To many people, bread is just "bread," a staple article of diet, but a loaf of bread different in taste and looks means quality. So, that is what we are about to offer soon. Watch for the new loaf.
