NUMBER 8

BANK OPENS FOR BUSINESS; MUCH GOLD TURNED IN FOR TREASURY CONFIDENCE IS SHOWN IN FUTURE

That practically all local financial conditions are rapidly returning to normalcy as before the enforced bank closing, is the statement of Jess Osborne, cashier of the Muleshoe State Bank.

Following government certification, the local bank was promptly opened for full conduct of business, a limited form of business having been conducted for several days previous to full authorization. Confidence of the public generally was shown by an exceptionally heavy business transacted the first day of opening, deposits being fully large, owing to the take-up in the occasional accumulation during the days of enforced closing, and this week business is being transacted as though there had never been any rift of any kind of financial.

Gold Turned In
More than \$1,000 in gold and gold certificates have been turned in to the local bank during the past week, all of which have been turned into the Federal treasury, as per requirements.

Reports from the 11th district federal reserve banks, including banks in Texas, portions of Louisiana, Oklahoma, New Mexico and Arizona are to the effect that more than \$4,250,000 in gold and gold certificates have been turned into the U. S. treasury during the past week.

Penalty For Failure
There is little indication of much gold hoarding going on in this section, said Mr. Osborne, yet this bank, along with all others has been duly notified to keep a watchful eye for any who may be guilty of such offense. Last week a letter from the Federal Reserve department was received by the local bank, as follows:

"Pursuant to a request received from the Federal Reserve Board at Washington, we ask that you furnish us as soon as possible after March 15, 1933, as complete a list as can be made from information which you are able to obtain of the names and addresses of all persons who have withdrawn gold certificates or gold coin from your bank since February 1, 1933, and who have deposited it in a bank on or before March 15, 1933. If you are in position to furnish us similar information regarding withdrawals prior to February 1, 1933, it will be appreciated, although withdrawals before February 1, 1933, should be segregated."

Under the provisions of the emergency Banking Bill enacted on March 9, 1933, the hoarding, melting or earmarking of gold or silver coin or bullion or currency, is specifically prohibited and the prescribed penalty for violation is a fine of not more than \$10,000 or imprisonment for not more than ten years, or both.

Just how much money is being hoarded in Bailey County is very questionable, some business men placing the amount as high as \$50,000, while others declare there is not more than \$10,000 outstanding cash and certificates now due and returnable to the government.

That these hoarders, whoever they may be and the amounts they may have in private keeping, can help materially in restoring normal conditions.

CITY WANTS DUE BILLS TO BE PAID WITH R. F. C. FUNDS

It is requested by Secretary Al Isaacs that all persons business houses holding due bills for labor on the recent paving work on Main street should present them at the City hall for payment at once.

It was agreed by local merchants that payment of bills would be accepted in payment of groceries and other supplies when endorsed on the back by the holder. The bills to be redeemable by R. F. C. check when the funds were available.

The funds are now on hand to make the payments and Mr. Isaacs is anxious that the bills be presented quickly so that records may be brought up to date.

Fire Destroys Home Of Leslie Dodson Last Friday Morn.

Fire of undetermined origin practically destroyed the home of Mrs. M. Z. Dodson early last Friday morning between the hours of 3:00 and 4:00 o'clock. Local firemen made a heroic effort to quench the flames, but did not succeed until the fire had gutted the structure to the stucco walls.

Little is known concerning the origin of the fire. Leslie Dodson, son of the owner of the house, who with his wife and baby were occupying the place at the time, was unaware of the fire until burning embers from the ceiling started dropping down on his bed. Evidently the flames started in the ceiling, and it is thought the conflagration started by a short circuit in the electrical wiring. Mrs. Dodson is in California at the present time.

Work of fighting the fire was hampered by the fact that only one stream of water could be poured on the flames due to the amount of hoses consumed in making the connection with the fire plug.

Some of the furniture of the house was saved from the flames, although considerable loss of wearing apparel and bedding was sustained. The house was insured.

Sixteen Out of One Thousand Leading Scientists Texan
AUSTIN—Of 1,000 leading men of science recently named in New York by J. McKeen Cattell, psychologist and editor of the magazine "Science," eight-tenths are from Texas. In the original selection of 1906 out of 1,000 scientists selected, seven were from Texas. In this last addition to the list, out of 250 scientists added, five are Texans. The relative increase for representation from Texas in 26 years is therefore in the proportion of 7 to 20. Of eight-hundred persons appearing in the 1932 list, nine are in the 1932 list, nine are in the faculty of the University of Texas, six are in the faculty of Rice Institute and three are not connected with an educational institution, although one is a former member of the University faculty. These eighteen persons listed from Texas are distributed among the sciences as follows: Mathematics, six; zoology, five; geology, four; chemistry, two; physics, one.

HEALTH OFFICER FITS O. K. ON CITY'S SUPPLY OF WATER
Reports on City water for bacterial analysis received by City Secretary, Al Isaacs from the State Department of Health, Austin, again show "no contamination." These reports are on tests, for the month of February from samples of the City water supply taken in the residential district, and at city well. There are several long service lines and extensions of 2 in water mains which do not make a complete loop back to the main distribution system in which the water does not have complete circulation at all times because of low water consumption at these locations. The recent tests were made of samples of water from hydrants of consumers located on these "dead ends" and the fact that the tests showed "no contamination" is reason for continued gratification to city officials and water consumers at such places. Through the cooperation of the State Department of Health water samples are being taken and analyzed each month in order that an exact check on the condition of the City's water supply may be had each month especially during the summer.

Just as long as society makes it to our interest to pretend to be what we are not, that long will we court an hypocrisy that kills.

Phines Brock Dies Of Wounds Sustained In Thresher Mishap

Phines Brock, son of Mr. and Mrs. H. T. Brock of the YL community, died Friday noon as a result of an accident which occurred late Wednesday evening while working with a thresher. Internment was made Saturday afternoon in the Lashduy cemetery. Rev. Allen, M. E. pastor at YL officiating.

It is understood that the accident occurred while he was at work with a pitchfork near the belt that pulled the machine, his fork striking the belt and the handle jabbing him in the abdomen, just below the ribs.

His condition was not thought to be serious at first, as he rested quite well the day following the accident, however, he took a sudden turn for the worse Friday morning, and death came at 12:30 on the highway between Sudan and Amherst as he was being rushed to a Lubbock hospital. Death came as a result of a broken blood vessel, attending physicians said.

He was a professed Christian, having been a member of the Methodist church at YL for the past year. He was in the 8th grade at school. Besides his father and mother, he is survived by four sisters and three brothers.

ENGINEERS BEGIN SURVEYING ON NORTH AND SOUTH HIGHWAY

A crew of engineers under direction of District Highway Engineer H. N. Roberts last Tuesday began location and surveying of right-of-way for the authorized highway leading north and south between Muleshoe and Morton, expense for such survey to be borne by Bailey and Cochran counties.

It is understood that later on when this road has been well established and the full 100 foot width of right-of-way has been obtained, it will be taken over and designated as a state highway, thus connecting State Highways 7, 28 and 24.

All the world loves a good loser.

BAILEY CO. INTERSCHOLASTIC LEAGUE MEET WILL BE HELD IN MULESHOE FRI. AND SAT. MARCH 24-25, MANY TO ATTEND

Literary and athletic events of the Bailey County Interscholastic League meeting will be held at the High school auditorium and on the campus of the Muleshoe school Friday and Saturday of this week, according to report of Superintendent W. C. Cox, director general for the county.

The program outlined is as follows:

Friday
10:00-11:15 a. m.: Welcome address, Judge J. E. Adams; response, Supt. B. M. Keese, Baileyboro; story telling, junior spelling; junior spelling.
11:15-12:00 a. m.: picture memory, arithmetic; senior boys' declamation.
1:00-1:45 p. m.: junior boys' declamation; senior spelling, music memory.

MATTHESEN-ENGLERING

Henry J. Englering, residing a few miles northwest of Muleshoe, as his bride last Saturday afternoon, Miss Vera Lenora Mathiesen, the vows being pronounced in the presence of Rev. C. K. Campbell, Methodist pastor, who performed the wedding rites at Clovis, N. M.

The bride is the daughter of Mr. and Mrs. Wm. S. F. Mathiesen, prominent and long time citizens of the community about eight miles northeast of Muleshoe. She is a talented and popular young woman, a graduate of the Muleshoe High school, class of 1927.

Parents of the groom reside at Newark, Oklahoma, and he has been living in this section for the past three years and is well and favorably known in the community of his residence as a young man of excellent character, high ideals and of an energetic business like disposition.

The happy young couple will make their future home on one of the Pochell farms about 10 miles east of Muleshoe.

SUDDEN ACTION ON REPEAL AT AUSTIN BRINGS PRO STORM

Somewhat surprised at the sudden action of the House in passing the Hughes bill calling a repeal convention for 1934, the State central committee of the United Farmers for prohibition met in special conference Saturday to discuss the situation.

W. N. Wiggins, recording secretary of the State dry groups, pointed out that the United Forces had declared in favor of the repeal election and convention being held in November of this year, in order to keep the matter separate from other political issues.

"We are not anxious to have the repeal amendment submitted at all," Mr. Wiggins said. "My own opinion is that by holding the election to name delegates at the 1934 general election, the prohibition issue will be mixed with other matters pertaining to the State election."

If money really talked what a picnic women would have as bank clerks.

Judge Rules Denison Has No Right To Act On Highway Com.

District Judge J. D. Moore of Davis County Saturday ruled that Frank L. Denison, of Temple, has no right to act as State Highway Commission member or chairman. The question had been raised in quo warranto filed by Attorney General James V. Alford. The ruling holds that the State Senate did not consent to the appointment of Denison as is required and that the Governor's commission to him was illegally issued, without authority. It orders Denison ousted.

Denison's attorneys already have announced they will appeal. Denison, former business associate of James E. Ferguson, was twice nominated for a place on the Highway Commission by Gov. Miriam A. Ferguson. The first time the State Senate voted, 19 to 11, on his confirmation, and the second time, 18 to 13.

Mrs. Ferguson contended that the ratification required only a majority, favorable vote, although "vacancy" appointments require two-thirds majority.

Denison had been named to succeed the late Cone Johnson, Tyler, whose term expired Feb. 15. Mrs. Ferguson contended that did not create a vacancy because it was provided that an appointee should continue to fulfill duties of an office until his successor was named and qualified.

When she asked for a report from the Senate on the vote it was refused, word merely being sent that Denison had not been confirmed. The court held that it had no right to go between this report on the executive session of the Senate. Testimony as to the actual vote was given by Senator John Hornsby, but only admitted for the purpose of permitting Denison's attorneys to take a bill of exception to Judge Moore's refusal to entertain such testimony.

The recent death of Mr. Johnson ends all doubt about a future appointment being to fill a vacancy and requires a two-thirds vote for confirmation of any other nomination for the place by the Governor.

RESUME MAIN STREET PAVING

Work on paving Main street having been delayed awaiting additional T. F. C. funds was begun again Wednesday morning and putting the street in shape for a "hot top" will be rushed to completion.

Superintendent John Benson, stated that excavation for the valley gutter at the intersection of Main street with Highway No. 7 would be finished and forms made ready for the pouring of concrete. Grade stakes will be set and approximately 50 loads of fine caliche will be used to bring the contour of the street up to 9 inches compacted caliche from the sub-grade.

An Indian girl, winner of a beauty contest is called "Pretty Bear." We understand that most of the bathing beach factories have been that way, too.

Swap Day Here Drew Bartering Crowd From Far

People from far and near were in Muleshoe Monday to attend the first "swap day" of the season, and they congregated on the vacant lot west of the business district where almost everything that could be used on the farm or in town was displayed for bartering purposes.

This was in response to the call made last week through the columns of this newspaper for such an event, and from all indications the day was a great success, at least from the attendance standpoint.

Everything from horses and cows in the livestock line to chickens and even guinea fowls were displayed for trade. Tractors, disc plows planters, a piano, automobiles and all conceivable articles were put up to be knocked down for cash or traded for something of more use to the owner.

Roubinek and his orchestra furnished music for the occasion. Trading was brisk for an hour or two following the noon hour.

Worst Year of Slump Has Been Best Year For Health, Report

AUSTIN—The worst year of the depression has been the best health year, according to Dr. Jofin W. Brown, State Health Officer, in commenting on the low death rate during the past year.

Of great importance was the almost entire freedom from epidemics, until the influenza epidemic in December. Weather conditions throughout the year were evidently more than counterbalanced the ill effects of worry incidental to unemployment and difficult circumstances.

Of great importance was the almost entire freedom from epidemics, until the influenza epidemic in December. Weather conditions throughout the year were evidently more than counterbalanced the ill effects of worry incidental to unemployment and difficult circumstances.

Muleshoe Won All Tennis Events In League Meet Tues.

Throughout the entire school district system of Bailey County this week try-outs and preliminaries and some scheduled contests are being held in the Interscholastic events for this year. Practically all the schools of the county are entering the various events, with indications that honors will be well distributed this year.

Friday of last week and continuing Tuesday of this week tennis events were held at Muleshoe, games for honors being played in straight elimination style, several teams participating.

Boys Doubles
In the boys doubles game the first contest was between Longview and Baileyboro, two sets being played, Baileyboro winning, and the score being 6-1, 6-3. Bula then won from Y L.

SUBSCRIPTION RATES

In Bailey County, one year, \$1.50; Outside of County one year, \$2.00.

Published every Thursday at Muleshoe, Texas. Advertising rates given upon application. Telephone No. 54.

Subscribers who change their addresses, or fail to get their paper, should immediately notify this office, giving both new and old addresses.

Communications of local interest are solicited. They should be briefly written, on only one side of the paper, and must reach this office not later than Wednesday morning of each week. The right of revision or rejection is reserved by the publisher.

Advertising that does not show in its text or typography that it is paid for must be marked as an advertisement. All local advertisements remain in this paper for the time specified or until ordered out. All notices, if matters not by whom nor for what purpose, if the object is to raise money by admission fee or otherwise, is an advertisement and when sent in for publication must be paid for at the regular advertising rate per line for each issue published.

Obituaries, cards of thanks, and resolutions of respect will also be charged for at the same rate.

Any erroneous reflection upon the character, standing or reputation of any person, firm or corporation which may appear in the columns of the Muleshoe Journal will be gladly corrected upon its being brought to the attention of the publisher.

In case of errors or omissions in local or other advertisements, the publisher does not hold himself liable for damage further than the amount received by him for such advertisement.

COUNTRY LIFE

New evidence to support the belief that country life is healthier than city life has just been offered by the U. S. Public Health Service. It shows that the smoke from factories, office buildings and homes often shut off as much as 50 per cent of the total light from the sun. The light cut off includes not only visible daylight but also the health-giving ultra-violet rays so necessary to good health, and which the rural resident receives in abundance.

The survey shows that on clear days the city averages close to two per cent less sunshine than is enjoyed by those who reside on the farms and in our smaller towns. Just what effect this has on health is clearly revealed in the mortality reports, which continue to show a greater percentage of deaths in the cities than in rural communities.

By recounting the advantages of living in town or on the farm is nothing new to Muleshoe people. Those who were not actually born here learned soon after they came here to live that from a standpoint of health it is far ahead of any of the larger cities of the country. There are so many other advantages in living in a community like this that it would be a waste of time and space to reprint them. You don't have to keep harping on them to keep local residents from forgetting them. The newcomer has only to live here a very short time until he is as strongly impressed with them as those residents who have spent their entire lives here.

BAD MOTORING YEAR

It ought to interest everyone around Muleshoe who has a car to know that while motor vehicles and gasoline already bear a tax burden eight times as heavy as that imposed on real estate, 41 legislatures in session since January 1 have actually considered additional taxes on both the auto and the gas it uses.

Eighteen states have voted an increase in gas taxes since January 1; nine states have under consideration laws that would burden the motorist with an inspection fee, and seven are considering a tax on gasoline stations which, of course, would be passed on to the car owners.

So it looks like motorists are in for a bad year, even if not half of the pending legislation should be passed. Twenty legislatures are considering truck and bus legislation on a higher scale, and that just about covers everything in the country that moves by gasoline.

OLD FRIENDSHIPS

Many years ago John Wanamaker, the great Philadelphia and New York merchant said: "Don't let old friendships be easily broken. Try to cement them more and more closely as time goes on. Neither prosperity nor poverty should be the relation of old friends."

For us all to make mistakes we have all to cross the same line sooner or later if we expect to be forgiven. Shaken down as we have been by the economic depression, we perhaps realize as never before that there are only a few things that count, vitally and forever. One of those things is a continuing friendship.

No man has too many friends, if they are of the right variety. And just now when everything else vanishes like the morning dew before a rising sun, it is a wise citizen who puts a high value on his friendships, and who takes care to see that none of those friendships are broken.

COURT ATTENDS CONVENTION

All members of the Bailey County Commissioners, except Duane Daniels, will attend the convention of West Texas County Judges and Commissioners to be held at Wichita Falls Friday and Saturday of this week.

Of the important matters coming up this body will be drafting of a plan of county government toward less expense.

TODAY AND TOMORROW

By FRANK PARKER STOCKBRIDGE

PRESIDENTS . . . and double O
Franklin Roosevelt is the third successive President to have a double "O" in his name. He is also the third President whose surname is the same as that of one of his predecessors. We have had two President Adams, two Presidents Harrison, and now two Presidents Roosevelt.

Mr. Roosevelt is the third President of Dutch descent, Martin Van Buren and Theodore Roosevelt being the other two. He is likewise the third President elected in his fifty-first year.

If there is any luck in odd numbers President Roosevelt ought to have plenty of it.

MASONS . . . as Presidents

President Franklin Roosevelt is the thirteenth member of the Masonic Order to be President of the United States. I have often heard some of my Masonic brethren say that every President has been a Mason, but that is not true.

Washington was Master of his Lodge, Monroe, Jackson, Polk, Buchanan, Johnson, Garfield, McKinley, Theodore Roosevelt, Taft and Harding were Masons. There is no Masonic record to prove that Jefferson was a member of the Order, but there is collateral evidence which is taken and accepted Masonically as indicating that he was.

Mr. Taft was not a Mason before he was elected, but the Grand Lodge of Ohio made him a "Mason at sight," between his election and his inauguration.

President Roosevelt was recently initiated into one of the Masonic societies, the Tall Cedars of Lebanon.

RELIGIONS . . . of Presidents

President Roosevelt will be the ninth member of the Protestant Episcopal Church to be President of the United States. It is a curious thing that this small denomination should have had more representatives in the White House than any of the other branches of the Christian Church. There are more than two million Episcopalians in America compared with nearly eight million Baptists, but only one President, Harding, was a Baptist.

There are nearly twenty million Roman Catholics and none of them have been President. One President, Coolidge, was a Congregationalist, one, Garfield, a member of the Disciples of Christ, one, Hoover, a Quaker, two, Wilson and Theodore Roosevelt, belonged to the Dutch Reform church, one, the Adamses, Episcopate and Taft, were Unitarians, Johnson, Grant and McKinley were Methodists, Jackson, Polk, Buchanan, Benjamin Harrison and Woodrow Wilson were Presbyterians. The Episcopalians include Washington, Madison, Monroe, William Henry Harrison, Taylor, Pierce and Arthur.

I don't imagine it makes any particular difference to what Church the President belongs. Two of them Lincoln and Coolidge had never been members of any Church before they became President. But every President of the United States has been a very religious man, as every man must be if he is to command the confidence of the people.

GRANDFATHERS . . . a few

Although one of the youngest Presidents, Franklin Roosevelt, was a grandfather at the time of his election. Washington had no children at all. Johnson, Adams and Jefferson were grandfathers, and so I believe was Monroe. William Henry Harrison, who lived but a month after his inauguration, has a grandson who later became President, but I believe there was no other President than those I have named who had grandchildren at the time of his election.

Mrs. Warren Harding was a grandmother, through her son, by her first marriage.

Not that any of that is important but I set it down as of possible interest while we are talking about the new President.

BLUE . . . inaugural gown

Thirty years ago a President's daughter gave her name to a new shade of blue. "Alice Blue" was so named because it was the favorite color of Alice Roosevelt, now Mrs. Nicholas Longworth.

Mrs. Franklin Roosevelt has given her name to another new shade of blue. It is called "Eleanor Blue" and she wore a costume of this color at her first White House reception on March 4. It is described as a shade of hyacinth blue, between a gray-blue and a blue-gray—if anybody knows what that means.

If this starts the women of America to buying new dress materials it will be a good thing for the revival of business.

Childish Guidance

Parents must remember that no rule of thumb can be laid down for guiding their children. Let your child meet new situations and try out his own methods; interfere as little as possible, especially in the beginning, but be on hand either to take the keenest edge off failure or to add a not too complacent thrill to success—Parent's Magazine.

Upper, A moment crowded with history making as President Roosevelt delivered his inaugural address, immediately after taking the oath of office. Center, the Roosevelt family at the White House, left to right, Mr. and Mrs. James Roosevelt, Mrs. James Delano Roosevelt (the President's mother), Mrs. Franklin D. Roosevelt (first lady), President Roosevelt, John Roosevelt, son, Mrs. Curtis Dall, daughter, and Franklin D. Roosevelt, Jr. Lower, President Roosevelt saluting the passing colors from behind the bullet-proof glass in the Court of Honor.

Water in the Sahara

In almost the entire region of the Sahara desert there are no permanent water courses, but from time to time temporary and even tempestuous streams are developed by heavy rain falls, which soon dry up or are absorbed by the desert sands.

"Ladder of Life"

Life is a ladder. You can moon and groan if you will, because there are others above you. You can be thankful, if you will, that you are above 10,000 others below who would be glad to change places with you.—Dr. Bruce Brown.

MECHANIC SCHAFFNER REPORTS ON DISCOVERY:

"I never did believe what Conoco Germ Processed oil would do: not until an Essex owner, with 25,000 miles on his speedometer, asked me to check his motor and put in new parts where necessary. It surely surprised me: clearance of pistons was only four 1-thousandths; of bearings only three 1-thousandths of an inch.

"This owner said he had used Conoco Germ Processed oil since the car was new. I have overhauled many another Essex at 25,000 miles, which has not used this oil, and found the wear 50% to 60% greater. Now I recommend Conoco Germ Processed Oil to my friends, and have changed to it in my own car."—Elder Schaffner, Highland, Ill.

Stop Cruel Motor Wear . . . Escape its Painful Cost
Don't Wait Another Day to Drain and Refill
With Conoco Germ Processed Motor Oil

To a motor, lack of lubrication is cruelty indeed. You are too "humane" to permit it, if only you knew the truth. But motors suffer in silence till costly damage is done. Then you pay . . . and pay . . . and pay.

50% of motor wear occurs in the moments following a cold start. Ordinary oil drains back into the crankcase and leaves the motor dry, till it is pumped back up again. Not so, with Conoco's hidden quart. It stays up in the motor and never drains away.

JIG-SAW PUZZLE PARTY

Miss Rheta Wilmon entertained a group of her friends last Wednesday evening with a Jig-Saw Puzzle Party. However, many gave up and started other games such as forty-two and rummy.

Cookies and cocoa were served at a late hour to the following guests: Melzine Rockey, Ruby Kingley, Florence Soles, Carrie Agnes Lee, Mary Frange Willis, Crystal Kennedy, Jim Brunkhead, Donald Eason, Francis Gilbreath, R. B. McHone, Tommie Kennedy, Cecil Malone, Claud and Roy Wilmon, and the hostess.

CITATION BY PUBLICATION

TO THE SHERIFF OR ANY CONSTABLE OF BAILEY COUNTY—GREETING

YOU ARE HEREBY COMMANDED TO SUMMON MORRELL W. VANATTA, by making publication of this citation once each week for four consecutive weeks, previous to the return day hereof, in the Muleshoe Journal, a newspaper published in Bailey County, Texas, to appear before Wm. S. F. Matlock and T. E. Arnold and Roy Sheriff, Special Commissioners, heretofore appointed by J. E. Adams, County Judge of Bailey County, Texas, to appear on the 1st day of April, A. D. 1933, at 10 o'clock A. M., at the office of J. E. Adams, County Judge, aforesaid, then and there to offer any evidence that he may desire as to the amount of damages to be assessed against the State of Texas, and to be paid to the defendants Morrell W. Vanatta, Abbie G. Patterson, Lester D. Moss, and wife, Harriet R. Moss, Byron R. Healea, and wife, Helen Zoe Healea, Grover I. Scott, and wife, Myrtle A. Scott, John A. Roberts, and wife, Ellen E. Roberts, for the right of way and strip of land described in Plaintiff's Original Petition filed in the County Court of Bailey County, Texas, on the 19th day of December A. D. 1932, in case Number 122, wherein, The State of Texas, acting by and through the Commissioners Court of Bailey County, Texas, composed of J. E. Adams, County Judge and A. J. Hicks, Commissioner Precinct Number 1, D. W. Danielson, Commissioner Precinct Number 2, F. N. Hood, Commissioner Precinct Number 3, and W. R. Carter, Commissioner Precinct Number 4, of said County, referred to as Petitioner, and Morrell W. Vanatta, Abbie G. Patterson, Lester D. Moss, and wife, Harriet R. Moss, Byron R. Healea, and wife, Helen Zoe Healea, Grover I. Scott, and wife, Myrtle A. Scott, John A. Roberts, and wife, Ellen E. Roberts, defendants, that the Petitioner and Defendants have failed to agree on damages for the land being acquired, in the above styled and numbered suit, wherein the State of Texas, instituted suit, against the above named Defendants for the condemnation of right of way and strip of land described in Plaintiff's Original Petition filed in said County Court.

Herein fail not, but have you before said Special Commissioners, aforesaid, on the 1st day of April, A. D. 1933, at 10 o'clock A. M., this writ showing how you have exceeded the same.

J. B. BURKHARD, Clerk of County Court, Bailey County, Texas.

Given under my hand and seal of said Court, at office in Muleshoe, Texas, this 1st day of March, A. D. 1933.

BAPTIST W. M. U. MEET
Circle No. 1, of the Baptist Church, met Monday afternoon with Mrs. Byron Griffiths, five members attending.

Mrs. Barron led devotional, reading for the lesson the 14th chapter of St. John.

We had our mission study lesson in the W. M. U. manual. We had a very interesting business session. The most important thing up for discussion being the installation of a library at the church.

At the close of the meeting the hostess served lovely refreshments consisting of sandwiches, cake and hot chocolate.—Reporter.

Set Great Value on New Lepespedeza
Experts Extol Its Drought-Resisting Qualities.

Prepared by the United States Department of Agriculture.

A new, hardy, drought-resistant, early strain of Korean lepespedeza introduced from Manchuria, and under trial by the department promises to fill a big gap in New England and other northern pastures and to push the American lepespedeza belt 200 miles or more north, say specialists of the department say.

Many New England pastures become brown and bare in summer, and the new lepespedeza makes its best growth there. Although ordinary Korean lepespedeza do not mature north of the southern boundary of Michigan, the new strain has matured at Middlebury, Vt., and at Augusta, Mich. It grows readily in sandy soil, such as many New England pastures have.

The department has also been working on a new fall and winter pasture plant for the Gulf coast region to keep pastures green after the commonly grown grasses die down in the fall. A new clover, named cluster clover and known locally as McNeill's clover, received from Hungary, shows surprising winter growth in the region in that region and to make fall and winter pasture.

A third pasture plant under observation is the wolly-finger grass, brought here from South America. It does well on poor, hilly land in such states as Alabama, Georgia and Florida, and thrives where other grasses can scarcely grow.

Although these three crops are not yet available for general use, federal experimenters are optimistic over their possibilities.

WOMEN: watch your BOWELS

What should women do to keep their bowels moving freely? A doctor's' would know the answer. That is why pure Syrup Pepsin is so good for women. It just suits their delicate organism. It is the prescription of an old family doctor who has treated thousands of women patients, and who made a special study of bowel troubles.

It is fine for children, too. They love its taste. Let them have it every time their tongues are coated or their skin is sallow. Dr. Caldwell's Syrup Pepsin is made from fresh laxative herbs, pure pepsin and other harmless ingredients.

When you can't eat, are and at the time to be constant in this famous stores keep it and you'll know Syrup Pepsin is of over a million.

Dr. W. E. Caldwell's

Hog Population Showed Some Increase in 1931

In Illinois the fall pig crop was 18 per cent larger in 1931 than in 1930; in the corn belt as a whole it was 21 per cent larger; and in the country as a whole 20 per cent more pigs were saved than a year ago, according to the Illinois State Department of Agriculture survey. Combining the spring and fall pig crops of 1931 showed an increase of 10 per cent for Illinois and 9 per cent for the corn belt. This increase amounted to approximately 4,500,000 head in the corn belt, where 80 per cent of the commercial hog supply is produced.

An increase of about 7 per cent in Illinois and 2 per cent for the whole United States but a decrease of 5 per cent in the corn belt in number of pigs farrowed in the spring of 1932 compared with the previous spring, was indicated by the survey. The survey showed about 4 per cent more hogs over 6 months old on farms of the corn belt on December 1, 1931, compared with the same date in 1930. —Prairie Farmer.

Bees and Clover

Bees apparently have a great liking for sweet clover and sometimes there is evidence that they leave alsike clover and white clover to work on sweet clover, but when all three clovers are abundant and all yield well, the flavor of the incoming nectar is usually that of white clover and alsike clover until the bloom of these plants begins to wane, then the bees turn to sweet clover. In exceptional seasons when white clover or alsike continues yielding through the blooming period of sweet clover, meager pollination of sweet clover might be expected. Red clover is used only when other clovers fall and under such conditions the red clover is well pollinated. The value of bees in the pollination of red clover and sweet clover depends to some extent at least upon whether the other clovers are yielding at the same time.

Soybeans and Pork

The principal objection to the use of soybeans in their natural state as a fattening food for hogs has been that they produce soft pork. As yet no methods have been evolved that will entirely avoid this result, although there seems to be evidence that when the beans are fed merely for growth and the fattening process carried out with corn and tankage the undesirable effects of the beans may be avoided.

Soft hogs mean lower prices. One packing firm states that six times as many soft hogs came into the slaughter houses this year than three years ago, presumably because of the growing practice of feeding raw soybeans. The results of experiments with soybeans as a hog feed are being watched with interest by farmers and uncorkers alike.—Indiana Farmer's Guide.

Agricultural Squibs

Portugal's wheat crop last year broke all records.

Cane fodder seems to be a palatable and good roughage for fattening lambs.

Proso or hog millet did not prove as efficient as corn in a fattening ration for lambs.

As soon as the frost is harvested pruning may be started. Pruning can be done without injury at any time other than the growing season.

Honey bees need a good supply of food to carry them through the winter. To generate heat and feed the young bees 40 pounds of honey are needed until a new supply can be gathered in the spring.

Pigs on Pasture and on Dry Lot
Results of Feeding Trials Conducted in North Carolina.

By EARL H. HOFFMEIER, Animal Husbandry Department, North Carolina Experiment Station, Raleigh.

Four feeding trials indicate that when young pigs have access to grass and pasture before they are put in the feeding lot, the pasture is not so necessary for gains and profits thereafter.

Our tests show that a well-balanced ration will produce just as satisfactory results when pigs are fed in a dry lot as when fed to comparable pigs on pasture. However, we want it kept in mind that the pigs we used in these trials had access to nutritious pasture grasses from soon after birth until they were started on the tests. If pasture had not been supplied during this period, it is likely that the pigs in the dry lot would hardly have had sufficient vitamin A to carry them through the fattening period.

The pigs full-fed a balanced ration on pasture did make slightly more rapid gains and were ready for market five days earlier than those in the dry lot. When this pasture was changed at its actual cost, however, the pigs in the dry lot were more profitable.

This test was conducted to learn if pastures are more valuable to the breeder here, to young pigs or to fattening pigs; or, are they essential to the well being of all three groups. The results seem to indicate that they are valuable to the breeding herd and to young pigs but not so vital to those animals which have been selected for finishing and market at an average weight of about 200 pounds.

Values of Corn Silage Depend on Conditions

The usual method of estimating the value of corn silage, says H. H. Haysman, is to compare it with hay on the basis that one ton of hay is equal in feeding value to three tons of silage. In other words, if hay in the silo is worth \$18 a ton, then silage in the silo would be worth \$54 a ton. Another method of estimate is to use a comparison that a ton of corn silage is equal in feeding value to 3 bushels of corn and 230 pounds of hay. With corn at 85 cents and hay at \$20 a ton, this would indicate a value of \$5.75 a ton for corn silage. It is to be remembered that this comparison is based upon the silage in the silo and the hay and corn in the barn and ready for feeding. If the silage must be hauled away from the farm, it is possible that some discount should be allowed for the cost of the hauling.

There is no accurate method of arriving at the value of silage, because it is not a product that is bought and sold on the market. The estimates given above are only a rough approximation and might need some amendment to meet local conditions. There is also the problem involved as to the quality of the hay and the quality of the corn and silage are used in the comparison. Consideration should be given to this when arriving at an agreement as to the price to be paid.

Feeding Soybean Oilmeal

That soybeans fed to market hogs are likely to produce soft pork, which sells at a discount of from 1 to 2 cents per pound, was a fact brought out at swine feeders' day at the Minnesota University farm. The general conclusion is that if there are sufficient advantages in the feeding of soybeans to hogs to make it worth while to use the crop for this purpose at all. Extracting the oil from soybeans in the making of soybean meal removes the softening fat, and leaves a valuable hog protein. Therefore the most logical plan is to feed soybean oilmeal to market hogs, rather than include soybeans in the ration. Soybeans, however, are well adapted to use for breeding stock, and may be used in this way when the price is low. Whole soybeans give better results than ground soybeans.

Control of Hog Cholera

The ultimate objective of hog cholera control is the suppression of hog cholera virus. This job depends upon improved sanitary measures voluntarily applied by every farmer raising hogs. It is a community effort and at no time in the last 20 years has there been great need for co-ordination in the suppression of hog cholera. The procedure is simple. Initiative on the part of community leaders in the application of simple procedures will go a long way in checking the spread of hog cholera.

Obviously, much depends upon a correct diagnosis, and veterinary assistance is important in this technical service. A prompt diagnosis, plus proper treatment, plus sanitary measures means a potential protection against loss in every community.—Prairie Farmer.

Wins State Lamb Contest

Frank Passi, Pitt, Lake of Woods county, is winner of first place and the title of "Champion Flockmaster" in the 1932 Minnesota lamb production contest, which set a new record for the number of contestants finishing, says a bulletin issued by the Minnesota Agricultural Experiment Station. Mr. Passi's 50 ewes produced an average of 154 pounds of lamb apiece. It was Mr. Passi also who set the previous record of 150.8 pounds of lamb per ewe when he was 1930 champion.

General News Over Texas and Adjoining States For The Week

More than 1,000 farmers attended the two days state convention of New Mexico Farmers' Holiday association held at Portales last week. Several prominent speakers were present for important addresses and officers for the coming year were elected. O. P. Bartlett, of Portales, being named president.

There have been 139 bills passed by the New Mexico legislature and approved by the governor. Thirty-four were left unsigned and three definitely vetoed.

With the re-opening of banks all over the country and the increased prices of stocks and bonds in the financial centers, there is also a noted increase in prices of various farm commodities in Texas. Groceries and provisions are being affected, buyers noting in many instances price increases of from two to eight per cent on purchases during the past week.

The Floydada City Commission has granted a new and lower water irrigation rate for city users, effective this month. The charge is \$1.00 for the first 3,000 gallons and 20 cents per each additional 1,000 gallons.

Over \$5,000 in hoarded gold was turned into the bank at Plainview the first week after its re-opening.

The New Mexico Legislature last week made an appropriation of \$57,000 for the East New Mexico Normal, located at Portales, which will be opened next year.

Governor Ferguson Tuesday signed a bill providing for enforced collection of the state's four-cent gasoline tax, effective immediately.

Guymon, Okla., has voted to install a municipally owned gas system.

More than 300 druggists attended their associational meeting held at Amarillo, Wednesday.

Another Defense Mechanism
A soft answer turneth away wrath and a long answer prevents people from asking you questions in the future.—Terre Haute Tribune.

Wilson News Items

The Methodists of this community went to Progress Sunday for quarterly conference. They reported a nice time and a good dinner.

The Baptist meeting is in progress here. There is being great interest manifested. We hope to be in the tabernacle Tuesday night. The building is nearing completion. We certainly appreciate the way the people of the community and outsiders have helped with the building.

Mr. and Mrs. H. H. Snow visited in the home of Mr. and Mrs. Robinson Friday afternoon.

A large crowd of young folks were the dinner guests of Mr. and Mrs. S. P. James Sunday. They all reported a very enjoyable time.

The Robinson family and Mrs. Bybee and children were the dinner guests of Mr. and Mrs. Jordan Sunday. The Hanover girls from Canyon attended church here Sunday night.

Mrs. Mead's sister and daughter of Levelland visited in the home of Mr. and Mrs. Mead Sunday.

METHODIST MISSIONARY MEET

The Methodist Missionary Society met at the home of Mrs. A. P. Stone, Monday afternoon.

Mrs. Tom Davis was leader of a very instructive program on prohibition.

Several ladies discussed important topics relative to the subject.

Mrs. Faye Elrod gave an instrumental number.

Mrs. Stone, vice-president, presided over a short business session at which time Mrs. Harold Weyer, president, was selected as a delegate to the annual conference to be held in Vernon, April 4th to 8th, inclusive.

The next meeting of the society will be of a social nature, to be held at the home of Mrs. Albert Isaacs, March 27.

Kidneys bother you?

Head promptly bladder irregularities, getting up at night and nagging backache. They may warn of some disordered kidney or bladder condition. Users every where rely on Doan's Pills. Praised for more than 50 years by grateful users the country over. Sold by all druggists.

The flag of Afghanistan is a black banner on which appears the Afghanist... seal, which consists of a white octagonal-shaped figure upon which is superimposed a black circle within which again is a white mosque.

The FAMILY DOCTOR

By JOHN JOSEPH GAINES, M. D.

"PLEURISY"

Here is a disease of the winter month Pleurisy, usually resulting from exposure to violent cold. It should not be mistaken for pneumonia, so, you better have the doctor and be sure you are right.

Pleurisy announces itself by PAIN. Not necessarily much fever, unless it begins with a pronounced chill. Remember—pleurisy is outside of the lungs; pneumonia inside. The pleura is a tough, smooth membrane that lines the chest-wall—and also covers the body of the lung. If the membrane is normal, it will glide over its neighboring surfaces without sensation; inflamed it at once becomes very painful. A cough, if any, is excruciating—it hurts to take a full breath—hurts at the point inflamed. If the spot remains sore long enough adhesions may form, which starts a very chronic condition, hard to cure.

I have many times taken out from three to twelve pints of dropsical fluid from an old case of neglected pleurisy—"pleurisy with effusion." It should never be permitted to get that far.

Your duty when attacked is, to go to bed, at least lay in the house, where the air is dry and warm. Get up a sweat as quickly as possible. See that the bowel is "open." Get the blood to the surface and keep it there—it is possible only in warm atmosphere. Pneumonia may be mistaken for pleurisy—a dangerous mistake. See your doctor, and take no chances. Simple pleurisy is not dangerous if promptly attended to; pneumonia may be deadly if neglected.

The real name of pleurisy is "pleuritis." But I am inclined to use plain, understandable language for my readers. I hope this short sketch concerning a common complaint may do good somewhere.

The man who makes a fool out of himself always claims someone else did it.

Cabinet Finch-Hitter

A new photo of Homer Cummings of Connecticut who was drafted by President Roosevelt to fill in the vacancy of Attorney General in the Cabinet, brought about by the sudden death of the late Senator Thomas Walsh of Montana.

Point for Horse Raisers to Study

All Needs Met by Breeding Associations.

By PROF. H. W. HARDER, New York State College of Agriculture and Mechanic Arts. A group of farmers, self-organized to buy a breeding stallion adapted to the horse needs of the community, and to buy a stallion bred from a breeder, is a horse-breeding association.

The horse-breeding association is similar to the old-time horse company, but lacks the outside promoter who has a horse price, and who goes to be paid for his sales-promotion activities. The old horse company, which made horse breeding too expensive in New York state, was usually organized by an agent who sold about twenty-five farmers each a hundred-dollar share of stock, and then sold the company a horse.

It is unnecessary for farmers to pay the added expense of the horse-breeding association in both cheap and workable. When in need of a stallion, the association may send a committee of its members to horse-breeding sections, where they not only buy a stallion at a fair price, but also good breeding establishments, learn to know the better breeders, and make contacts with prospective buyers. The cost of a stallion under the breeding association plan is usually about half the cost in a horse company.

Repellent Washes That Cause Injury to Trees

Many repellent washes, such as whitewash, diluted lime-sulphur, soap suds, coal tar, gas tar, axle grease, paint, various oils, and other substances are often recommended as washes or paints for fruit trees to prevent injury by rabbits and field mice. During mild winters all of these materials may work very well. If winter is unusually severe, however, for a week or more and rabbits and mice need food badly, serious injury may be done to the trees where washes of the above substances have been applied.

Such substances as paint, coal tar, gas tar, axle grease, concentrated oils, and combinations of such materials may do serious injury to the tree trunks and even cause the trees to die. To be on the safe side, the grower should not use such substances, as there are others which may be used with as good results without danger of harm.

Y L News Items

Mr. and Mrs. Ward Bruton are the proud parents of a baby girl, born Thursday, March 16th.

Miss Edna Mathieson and Mr. Harry Engleking of the YL community were married Saturday. Everyone is wishing them a long and happy married life.

The young people of this community enjoyed a very enjoyable party at the Burnham last Monday night. All left at a late hour wishing them a long and happy married life.

The YL school and community regrets the death of their former classmate and friend, Phineas Brock, who died Friday afternoon very unexpectedly. He had been hurt Wednesday while working with a threshing machine.

MRS. W. B. FRUIT DIED

Mrs. W. B. Pruitt, 66, died Thursday of last week at her home in West Camp community, the body being taken overland for burial at her former home, Reed, Oklahoma.

She was born Jan. 31, 1867, in Upshur county this state and early in life became a member of the Missionary Baptist church. She was married to W. B. Pruitt in 1893, and to this union there were three girls and two boys born: Jess and Chas. Pruitt and Miss Everett Smith, Muleshoe; Mrs. Joe Thompson, Reed, Okla., and Mrs. Hue Thompson, Port Isabel, Texas. There is also a son, J. W. Blankenship, from a former marriage, residing in Los Angeles, California.

NEWLY WEDS CHARIVARIED

There were about 75 friends and neighbors that gathered unannounced Monday night at the home of W. M. Mathieson for the purpose of giving a big send-off to his son-in-law and daughter, Mr. and Mrs. Harry Engleking, who were married last Saturday afternoon at Clovis, N. M.

The newly weds anticipating some form of charivari from their friends and the crowd, after perfunctory introductions, congratulations, etc., adjourned to the Pleasant Valley schoolhouse nearby, where a delightful social evening was given. "Chunky" Morris and wife furnishing the instrumental melodic inspiration for the terpsichorean numbers that followed.

Before departure the bride and groom, assisted by friends, served refreshments of bread, coffee, cigars and candy to those present.

THANKS TO FRIENDS

My greatest thanks and appreciation to members of the local Fire Department and to all friends and citizens who labored to save my home and contents Thursday night—Leslie Dodson.

Horses are being... not to be... are... where... on.

Up on Farm

AUSTIN—An important factor in the tax situation is to secure legislation that will give some degree of permanence to economies effected during the present period when economy has become a matter about which there is no debate. It is obvious that conditions are propitious for changes and reforms that will extend benefits of retrenchment beyond the period of the present emergency. It is equally obvious that little will have been accomplished if measures of economy gain approval simply as emergency matters.

It is necessary to bring expenditures down to the capacity of the people to pay in order that the present unbalanced condition of State and local budgets may be corrected. To stop there, however, would leave the larger task of providing proper safeguards and eliminating wasteful expenditures practically untouched. Many people are likely to be misled concerning reports of flat reductions. Such treatment should be applied to necessary functions of government. Unnecessary services should be abolished.

Agreement is general among students of government education that the most costly and possibly the most wasteful practices are to be found in local affairs. Organization of county government is notoriously conducive of waste. Constituting and legislative requirements are largely responsible. County commissioners have only very limited control over the affairs for which they are in theory responsible.

Fees of certain officials are fixed under the constitution by State law. Ridiculously high earnings are common, and County Commissioners are powerless to make reductions. There are many needless offices, especially in counties of small population, but they cannot be abolished any more than the office of Governor. Practically, County Commissioners must levy the taxes and watch others whom they have little or no control, spend the money. They have responsibility without authority.

Several constitutional amendments designed to correct this condition have been introduced in the Legislature. A committee is now trying to combine them into a single measure.

Another proposed amendment designed to provide an automatic check on State expenditures is the one which would limit the total State taxes to \$10 per year per capita.

The sales tax proposal has been received in a measure prepared by a subcommittee of the House committee on taxation and revenue. The rates are generally proposed at the beginning of the session, but the measure is fundamentally the same.

Enochs Echoes

Carlos Strickland went to Canyon, Friday to bring Miss Fern Elms home. She is attending school there.

Asa Dunnaway and J. D. Blalock made a business trip to Muleshoe, Monday.

Fred McQuary and Pat Woolley attended the Fat Stock show in Ft. Worth last week. Fred for some unexplained reason Fred was left there. According to report he came in Monday, via the "hitch hike" route, broke and hungry. He cannot praise the Salvation Army too highly, and declares he will never fail to donate to them again.

Mr. and Mrs. A. N. Pepper, Mr. and Mrs. Blackstone, Mrs. J. D. Blalock and little daughter, Velouise, went to the singing convention at Sudan, Sunday, and report a nice time.

Then Enochs gin run Monday, cleaning up the last of the cotton for this season.

John Beck, who has been visiting his grandmother at Kress, returned home last week.

Ray Helson made a business trip to Dora, N. Mex., Friday.

J. F. Strickland went to Muleshoe, Saturday on business.

Mrs. Ray Helson shopped in Lubbock Friday.

We have been wondering why Ray Allen was getting so poor and we find that he is batching.

Douglass Howell left Sunday for Lubbock, where he will enter school.

The friends of Mr. and Mrs. Sam Patterson gave them a shower Saturday. Many useful gifts were received. They just recently married.

We understand the engineers will start work on the State highway soon. Commissioner Carter was in our community Monday and as usual the boys were telling him how rough the roads were, but Carter said he knew they were rough—Reporter.

Roman Bread

Various kinds of bread were used by the Romans. Wheat bread was the most common variety. Barley bread was eaten by soldiers and slaves. It was prepared by moistening the flour with water, adding salt and kneading in a trough of wood or pottery. The leaven was added, the dough shaped and placed in an oven to bake. The bread was sometimes made of malt.

Martyrdom

It is the cause and not the death that makes the martyr—Napoleon.

METHODIST CHURCH

Sunday school at 9:45 a. m., preaching by the pastor at 11:00 a. m. The leagues and adults meet at 7:15 p. m. This means all ages from the Juniors up to ages 60 and on. We realize that the older women are not included in any of the meetings before church. Wonder if the men had rather not have them.

The preaching hour is at 8:00 a. m. every evening and we would like for the other meetings to be ready for that service. So far as it concerns the pastor, it makes no difference to him when we have the services, but others who come at night for that preaching hour want to begin then and "to begin on time" should be the rule of all services. Furthermore, it is a rule of the church that the "services begin at the hour appointed."

The ladies of the missionary society will meet with Mrs. Albert Isaacs next Monday at 2:30 p. m. They desire all who will to meet with them and become a part of this worth while work. Mid-week meeting at 8:00 Wednesday in the annex. Some people have come to the church and did not see the church lighted and went away; we meet for this service in the annex. The choir meets at the home of the Davis family. Due to sickness and the sand storm we had to lose out on the choir's special last Sunday. Come on with them each service, they are worth their cost!

The pastor is careful of the sort of men who come into the pulpit and what they say but when a Presiding Elder enters the pulpit of a pastor the pastor has nothing to say but to sanction what he said. All preachers who come up to the conference for full connection must take a vow that they will be subject to those superiors who are over them. The Elder last Sunday night said some needed words and at the same time did not speak in any uncertain terms.

We are having some excellent congregational singing at the evening services now. Come, help, and enjoy them with us and bring your friends. —E. C. RANEY, Pastor.

HOME ECONOMICS CLASS PREPARE FOR SCHOOL MEET

The Foods 1A class met last Monday in the classroom. It was decided what will be served at the track meet this coming Friday and Saturday. The money made will be used to buy supplies for our Home Economic department.—Reporter.

CARD OF THANKS

We wish to express our sincere appreciation to our many friends for their expressions of sympathy and the kindnesses shown us in the death of our son, and for the beautiful floral offerings. H. T. BROCK and family.

WE'RE CLEANING UP The Town

Are You A Well-Informed Person?
Every week this newspaper is filled with news, and our experience is that the news which interests you most is the news which affects you most. When one of your friends has participated in a minor accident, you are more interested in that than in a major accident in another city.
Advertising, too, is news of the first importance. It affects you. It is intimate local news addressed to you. It deals with your comforts, your pleasure and your business. It saves you time by telling you where the merchandise is. It saves you money by announcing fair prices. It is the guide to efficient spending. When you fail to read the advertisements you do not keep up with the news that is most important to you. You miss many opportunities.
The best informed people are those who read advertisements regularly. In fact, in this modern age, when each day brings forth new things which directly affect you, you cannot ignore the advertisements in your weekly newspaper and still be well informed!
