(UNINCORPORATED) SITUATED IN EDWARDS COUNTY, TEXAS. DOES THINGS DIFFERENT.

STUDY OUR PLAN.

A careful study of the Devil's River Oil & Gas Company's plan will convince the close student of investments that we are offering the BEST inducement in the OIL fields. Oil production in Texas fades the total gold production of Alaska in its best days into insignificance. Alaska's best production of cold was only \$15,000,000.00, while Texas is producing about \$150,000,000.00 worth of oil. Tue production is increasing so rapidly that it is conservafively estimated that the output will be close to \$300,000-000.00 in 1920.

NO is the time to get in the oil business in order to reap the early harvest. With 600 acres of oil lands to draw from, we anticipate making big profits on our most liberal pan, PROFIIS that will make fast friends for our com pany in future enterprises which we have in mind when The Company's present plans are in operation.

DO NOT DELAY your subscriptions. There is nothing to gain and NUCH to lose by deferring until some future date. NOW is the time to INVEST, and OUR company is the ONE to be in, for it gives you the biggest run for your money in the race for MILLIONS.

Fill in the subscription blanks NOW and gail in the good ship PROSPERITY.

Shall Chaos or Reconstruction in Europe Follow the Great World War?

RADICALISM IN THE SADDLE

Without a Definite Program, People Everywhere Are Demanding a Change in Present Conditions-Threat of "Direct Action."

Article XI.

BY FRANK COMERFORD. Radicalism in Europe is rampant. The workers are active, the middle class sympathetic. The industrial centers are hotbeds. The conservatism of the farmers and peasants is breaking down. It is hard to define this radicalism-it is without form. It isn't a definite program, it isn't even political. The people are dissatisfied. The red flag is popular. . It promises a short cut. It answers the cry of the impatient. I was surprised to see many of the very men who fought so gallantly under their country's flag and who but yesterday would have torn the red flag from the flagpole, now defending it, carrying it and folowing it. I am sure they do not know what the red fing stands for. To them t represents a protest against things as they are. Summed up in a word, the attitude of mind of the workers of Europe is engerness for a change -some change-any change. Every ne knows the symptoms, understands what is wrong, but the remedy is only aguely discussed.

I attach much significance to the ew attitude of organized labor in Europe. Labor unions formerly concerned themselves with wages, terms of employment, shop conditions, safety appliances, recognition of their right of collective bargaining. Since the war the labor movement has taken up questions entirely outside of its field. questions properly the concern of all the people, questions of government policy. I have in mind recent demands made by the working men in England, France and Italy. These demands were addressed to the regularly of the neople the governments. They pabled by threats of genral strikes if they were not acceded step is an innovation; it is

ing men are citizens and have a voice in the government equal with all other citizens. After the people have selected their representatives, the men chosen should be responsible to all of the people without regard to class or statica." A government by one ortion of Government of the people, for the people, and by the people, means all of the people. The effort on the part of a minority in the labor movement, who challengingly call themselves socialists, to dictate to the state, repreenting all of the people, is an attack upon democracy. If successful it would destroy the state and leave the great majority of the people, including the workers, less free than they are now. What sane man, whether he is a working man or not, is in favor of minority government? Demands Hard to Understand. I witnessed many demonstrations in Europe under the red flag, in which the leaders demanded three things from the government. First, they demanded the release of all the men in jall who were held for political crimes. These included men found guilty of sedition and treason during the war. I cannot understand this demand. Why should men be released from jail who sought to stab in the back the men who went to the trenches to fight and die for freedom? I should much prefer to see all of the burglars released. If I am compelled to choose between the traitor and the burglar, I will have no trouble in making my decision. Second, they demanded that no solit.

more than it should; that property has been given more thought than human beings. I am concerned with the danger that these innovations promise, a danger to the working men themselves, a menace to law and order, without which no one is secure, without which there can be no freedom.

Political Action Called Failure. I heard a speech in London that deeply impressed me. It was applauded by several thousand men and women-sverage good British working people. Most of the men wore service badges. The speaker, a clean young Englishman of about thirty-five, said: "Political action is a fuilure. We

vote and we are befrayed. Political parties are the agents of bands of capital. Their purpose is to keep the workers apart, knowing that divided we are powerless. The only time they are willing we should unite is when war calls for men. What did we win in the war? Nothing. We thought we had a stake in the game, that the hand we were playing was our own. Now that it is over we have discovered that we won nothing.

"What did the working man ever get by voting, except the worst of it? The word vote comes from a Latin word, meaning 'to wish.' Who ever got anything by wishing?

"We are like the story in Bellamy's 'Looking Backward.' You remember he spoke of a coach. On top of this coach the capitalists sit in the sunshine enjoying the ride. On the side of the coach, hanging by their fingernails and toenails are the hundreds of thousands who make up the middle class. Millions of men are pulling the coach. They are sweating and trudging-they are the working men. Running along the side of the coach are millions more, fighting to get a chance to get hold of the rope and pull the coach. They are the idle. There is only one thing to do. That is to stop pulling the coach, let go of the rope. Don't wish about it; do it. The fellows

on the top of the coach don't do any wishing-they boss and drive."

The crowd cheered. There is some truth in the speech. It is true that the working man has not had a square deal, but the fact that he has not had fair treatment does not make the plan of direct action a sane, wise plan. Revolution would only lead to blood and disorder and leave the very men who revolted in a worse plight than they are now. The millions who are the majority have an infinitely better weapon than force. They have the ballot. They are in the majority. Men must think their way out of the wiland properly elected representatives, derness. They cannot fight their way out. When they try to they go deeper 10

Bolshevism Finding Favor.

I found the word bolshevism in the minds and on the lips of the working people of Europe. I expected to find them antibolshevik if for no other reason than that bolshevism came from Russia and the bolsheviks made peace with Germany while the allies were in a death struggle with her with the result in doubt. I found them confess-

Animals Develop Cure for Olive Poisoning.

It was seruin prepared by veterinary scientists of the bureau of animal husbandry for experimental purposes in treating forage poisoning of horses that saved the life of Lena Delbane, after the other six members of her family had died from eating poisonous olives in New York recently, according to the department of agriculture. The serum was made from the blood of a sheep that had been immunized against bacillus poisoming. In investigating forage polsoning of

horses the bureau made extensive experiments with serums and discovered there were two strains of bacillus botulinus. They look alike and the polsons they create produce the same effect, but immunization against one does not afford immunization against the other. The two strains are commonly known by the government investigators as "the olive strain" and the "cheese strain." Three instances of olive poisoning, one in Michigan, one in Ohio and the third in Montana,

were all caused by the "olive strain." The veterinarians, therefore were reasonably certain that the serum affording protection against the poison generated by the "olive strain" would be effective in the New York cases, and it proved to be in the one case where it could be given a fair trial.

tonic, helped Mrs. Wil-liam Eversole, of Hazel Patch, Ky. Read what she writes: "I had a general breaking-down of my health. I was in bed for weeks, unable to get up. I had such a weakness and dizziness, ... and the pains were very severe. A friend told me I had tried everything else, why not Cardui?... I did, and soon saw it was helping me ... After 12 bottles, I am strong and well."

on this point was so strong that when the British government attempted to send soldlers to Russia last summer (1919), the soldiers mutinled, and so

far as I am able to learn the feeling was so strong, the situation so critical, the government did not dare courtmartial them. Third, they demanded that all conscription laws be abolished. It is apparent that these demands,

coming from a minority, backed by a threat, constitute an invasion of the rights of the people. The question isn't whether or not one believes these things should be done; the issue is the method resorted to. Personally I do not believe soldiers should be sent to Russia. In my opinion allied intermeddling has been stupid and harmful, but if these matters of general public pollcy are to be decided, all of the people should have a vote in making up the verdlet.

When you consider this new attitude of labor in conjunction with the growing popularity of "direct action," it indicates that the labor movement is losing fulth in law and political ac-

tion. I arm not saying that their experience with politics, their betrayal by men they have supported, the default of political parties to carry out pre-election pledges, may not be responsible for a distrust in political government. I am not denying that capital has had the car of government

ing their faith in bolshevism, speaking of it as a new religion, resenting the obstacles their own governments had placed in its way.

In Ireland, the last place I expected to find a leaning toward bolshevism, I found an open devotion to it. The Irish people are in many respects the most conservative in the world. The only Dat-so-la-lee, the famous Indian radicalism they have ever shown is the artist, is receiving more than \$1.000 revolutionary spirit expressed in upeach for the woven baskets he makes. risings for freedom. The Irish are a He is the possessor of a secret which people of reminiscence and tradition. has been handed down for generations The Celtic mind is devoted to form in the Washo tribe, whose members and custom.
