

Dedicated to the Progress and Development of Bailey County and the South Plains of Texas

LITERA SCRIPTA MANET—THE WRITTEN WORD ENDURES MULESHOE, County Seat of Bailey County, TEXAS, THURSDAY, MAY 14, 1936

VOLUME 14 NUMBER 16

BACCALAURATE SERMON GIVEN BY REV. WATKINS

25 Graduates Sit Under Inspiration of Advice For Future.

There was an auditorium overflowing with an expectant waiting audience at the high school building last Sunday night when Glen Rocker...

The commencement services will be held Friday night of this week, the program being rendered by members of the graduating class...

Naming several prominent men in the various walks of life, he used them as an illustration of the result of diligence, showing how one may come from the very lowest status of the world to a place of prominence...

Every young man and young woman should have purpose in life, and whatever your distinctive work is, that is your vocation...

The minister suggested the motto: "Diligent in business, fervent in spirit serving the Lord..."

CAN OPENING WIVES, ATTENTION

Lubbock, May 13.—Wives who use can openers now have the last laugh. An exhibit at the Texas Technological College...

Vegetables And Fruit Included In The Soil Conservation Program

College Station.—Texas fruit growers, truck farmers and other vegetable growers will be able to earn payments under the Soil Conservation program...

Smith pointed out that land that has been in vegetable crops will be counted in acreage used in determining the soil-building allowance...

"In regard to fruit growers," Smith said, "land devoted to orchards, vineyards, small fruits and nut trees is included as crop land under the program."

Boy Scouts To Be Reorganized Here Committee Is Named

The local Boy Scout troop committee met Friday afternoon with Earl M. McClure, South Plains Area Council executive, for the purpose of reorganizing the troop here and putting it on a permanent basis...

Following a Washington national investigation, which was conducted by American Telephone & Telegraph, it was determined that a new rate cut in will be made on long distance calls at \$753,518.17 had been made.

THE COUNTY FAIR

By ANNE CAMPBELL.

The apple that hung on the gnarled brown bough
And dreamed of perfection the summer through,
Is wearing a blue satin ribbon now; and
Our Grandfather's peaches won first prize, too.
The biggest of pumpkins, the grandest squash
Have taken their place in the rustic square;
And Grandmother may tease and declare it's boss,
But Grandmother's jam won first prize at the fair.

There are quilts with patterns so intricate
You would scarcely believe a woman's hands
Could fashion a comforter delicate
As the varied tints of a rainbow's bands.
There's embroidery fine as a cobweb spun
On a rainy day in a spider's lair;
And many a task that was bravely done
Last year is now at the county fair.

The pickles and pies and the cakes and jell,
Examples of home and the kindly art
Of women who, doing a small thing well,
Learn to tackle life with a joyous heart.
And deeper than you and I see displayed
Goes the evidence of their loving care -
The symbols of beauty in homes they've made
Are plainly in view at the county fair.

SUGAR PARADOX OF FOODSTUFFS

Producer of Energy but Must Be Taken Moderately.

Written by EDITH M. BARBER

"We don't go to the doctor as food," writes a reader of this column. "In one article I read that sugar is necessary to the body. In another it is said it causes diabetes and tooth decay. Can you set me right?"

The answer is sugar is a good food which produces energy, and when taken in moderation and at the proper time will not cause diabetes or tooth decay. Sugar, however, is only one source of energy. Every food we eat gives us energy in proportion to its caloric content. Fats contain more calories than sugar, starch equals sugar and so do protein foods. We seldom get concentrated protein, however, and seldom concentrated starches. Sugar is a concentrated food and it takes only about ten tablespoons or a large piece of candy to give us 100 calories.

Sugar is absorbed very quickly after it is eaten and for that reason it is sometimes of great value. Sweet chocolate, for instance, is often used to keep up energy on long hikes. It was regularly rationed to soldiers during the war. The fat in the chocolate, which digests more slowly, puts off hunger, so that we have then an ideal combination of food for this purpose.

Sugar in its concentrated form blunts the appetite for other foods, and for that reason sweets should not be taken before meals. The custom of taking sweet desserts is based on the right theory, because sugar also has the property of causing the gastric juice to flow plentifully. Candy after meals is in its best place both because at that time it is not necessary to prom- ise appetite and because it is filled by the other foods we have eaten, so that when it is used as a flavoring for desserts.

Sugar or candy, the form in which it is usually eaten when not used as a flavoring, is irritating to the lining of the stomach. You know how sucking a piece of hard candy draws the lining of the mouth. It acts the same way in the stomach when taken alone, so that is still another reason why it is good custom to eat candy only after meals. It is also a good custom to brush the teeth and rinse the mouth well after eating candy because both sugar and sugar are acted upon by bacteria in the mouth, producing acids. Sugar is probably actually valued by most of us more for its flavor than for its food value. It has a place in flavoring vegetables and meats as well as desserts. It is used with these foods, however, as a condiment, about in the proportion we have said. I find that it brings out the natural flavor of fresh vegetables when I cook them as I always do, with a very little water. The average amount of sugar used for a vegetable is from one-fourth to one-half cup. To this I add one-fourth or one-half teaspoon of sugar and the same amount of salt. Or, course, vegetables cooked in this way must be tightly covered and unless heavy utensils are used a little more water will be needed.

RICHARD LLOYD JONES SAYS

Hike and Learn

No man can know the earth who has not walked upon it. The boy who drove a tow-boat along the Erie Canal knew New York as no boy ever who today rides from Albany to Buffalo on the Empire State Express.

Judges reckoned time by nights as we do by days, a place was so many nights away. The night measured their march.

Walk from night to night across the plains and lay your day's experience upon the map of Africa and you will begin to sense the lonely vastness of the Sahara's sands.

Life's gondola is found by tired feet. Get next to earth if you would know it. The youth who is carried by sense-manned handicapped. He has to learn how to march while the battle of life is on.

Bruksin said that the children of the rich often get the worst education of protection, whereas the poor often get the best education for nothing because they get into the common school of hard knocks.

A tired leg makes the whole world real. It will make a sunset glorious. It is a kind school that sets a boy down in the middle of a wild wood and tells him to walk out.

Privately we commend the Boy Scouts and the Camp Fire Girls. Many parents who approve of the "hike" would be the first to protest against its adoption as part of the school curriculum.

Privately conducted they call the "hike" wholesome and a helpful recreation. Publicly conducted they would call it imposition and unwarranted hardship.

Our private impulses are generally right. Our greatest difficulty is that we have not yet learned to set things together.

The campfire ennobles the heart and enriches the memories of comrades as no well-regulated sun-bather will ever do.

LOCALS

● J. L. Brooks, of Farwell, was here last Sunday visiting friends.

● Earl Booth, of Farwell, was here Friday of last week on business.

● J. M. Gay, of Sudan, was here on business last Monday.

● Vance Apple, of Perryton, was here last Monday on business.

● R. L. Brown was in Farwell last Sunday! ! ! Nobody knows why, and Booster Bob ain't saying a word.

● Marvin Campbell, of Roswell, N. M., was in Muleshoe Friday afternoon of last week transacting business.

● Corvela and Albert Smith of Farwell, visited friends in Muleshoe last Sunday.

● Attorney L. S. Matthews, of Floydada, was here on legal business last Monday.

● Born Friday of last week to Mr. and Mrs. W. M. Burtis is the Longview community, a baby boy.

● Mr. C. R. Stevens and Mrs. Ray Griffiths were Lubbock visitors Saturday of last week.

● Robert H. Bean, Lubbock attorney, was here Tuesday representing clients in District court.

● Mr. and Mrs. J. T. Gilbreath left Tuesday morning for Santa Anna to visit her brother who is seriously ill.

● Mr. and Mrs. Dick Rokey visited in Priona Sunday with her parents. Mr. and Mrs. Elmore, and friends.

● Mrs. W. H. White, of Sudan, has been visiting in Muleshoe this week with her son, H. C. Holt and family.

● Raymond Roubinek was in Clovis, N. M., Monday afternoon attending to business.

● John F. Downs, of Abilene was in Muleshoe this first part of the week attending to business.

● Miss Aveline Motheral was in Clovis, N. M., Monday visiting relatives and shopping.

● Mrs. W. G. Kennedy, of Progress community, accompanied by Miss Alma Stewart, Bailey county home demonstration agent, and other ladies from the Proerae and West Camp communities, went to Floydada Wednesday, where Mrs. Kennedy addressed a group of women of that county interested in securing a home demonstration agent. She talked of the value of such an agent to the women of any county.

PRO-GRAM

"PROTECT YOUR FAMILY"

Trench Mouth or Vincent's disease is highly contagious. Many people never realizing it carry the germ and unwittingly convey this serious streptococcal infection to members of their family. In this manner you leave unprotected your family and loved ones by allowing this condition to exist in your mouth. You owe to your family, friends and associates, as well as yourself, to take immediate action when nature first gives you warning of these existing conditions.

At the first sign of bleeding or receding gums use **PRO-GRAM SOL**, Western Drug Co.

Cream Flavored Pudding

- 1 package flavored pudding
- 1 cup figs or 1 cup fig jam
- 1/2 cup cream, whipped

Dissolve pudding in two cups boiling water and cook. Cook figs to a jam in double boiler with the remaining one cup water. Chill. When pudding is slightly thickened, beat with rotary egg beater until of consistency of whipped cream. Fold in whipped cream and figs. Turn into individual molds. Place in freezing compartment of automatic refrigerator. Chill one and one-half to two hours. Unmold.

Cream Tapioca

- 1 1/2 tablespoons minute tapioca
- 2 cups scalded milk
- 1/2 cup brown sugar
- 1/2 teaspoon salt

2 eggs
1 teaspoon vanilla

Add the tapioca to the milk and cook in a double boiler until the tapioca is transparent. Add to the sugar, salt and egg yolks, slightly beaten. Pour the hot mixture slowly over the egg mixture. Return to the double boiler and stir until it thickens. Add stiffly beaten egg whites and flavoring. Turn into serving dish. Serve with crushed strawberries.

Spanish Cream

- 1 1/2 tablespoons powdered gelatin
- 2 cups milk
- 1/2 cup cream, whipped
- 1/2 teaspoon salt
- 1 tablespoon grated orange rind
- 8 eggs
- 1/2 cup orange juice

Orange slices
Soak gelatin in milk 15 minutes; then add sugar, salt and orange rind. Boil in double boiler. Beat egg yolks slightly and pour a little of hot mixture over them, return to double boiler and cook, stirring constantly until thickened. Pour over egg whites beaten stiff, cool, add orange juice and turn into individual molds. Chill and serve with sliced oranges.

Quick Keweenaw Freezing

- 4 tablespoons butter
- 1 tablespoon cocoa
- 4 tablespoons cocoa
- 2 cups confectioner's sugar
- 3/4 cup nuts

Melt the butter in the mixing bowl. Mix sugar and cocoa and add gradually. Add the cream as needed. Spread on cakes and sprinkle with nuts.

A New Cotton Planting Attachment for the No. 3 Farmall Middle Buster

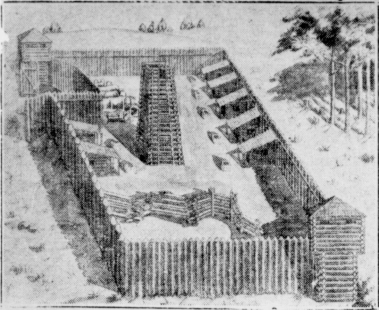

THE No. 22 planting attachment converts the McCormick-Deering No. 3 Farmall Middle Buster into a first-class cotton planter. The planting mechanism is driven from the right-hand rear wheel of the Farmall Tractor.

The No. 22 attachment is equipped with single-seed cotton hoppers and with corn cut-off and plates for planting corn or Kafir corn. It will plant from 13 to 40 pounds of cotton seed to the acre, and if a larger capacity is wanted, you can get plates which make it possible to plant from 50 to 70 pounds an acre. Plates are also available for planting beans, peanuts, and other seeds. Disk covers are regular equipment—shovel covers can be supplied on special order.

See us about this new McCormick-Deering planting attachment for the Farmall Tractor.

E. R. HART COMPANY

SITE OF FORT PARKER CENTENNIAL

For three days, beginning May 19, Grosbeck and Mexia will jointly sponsor as a Texas Centennial Celebration, a tribute to the early pioneers who lost their lives at the hands of Comanche Indians during the siege of Fort Parker a century ago. The historic fort, shown above, as visualized by the artist, is being reconstructed from Centennial funds on its original site in the new 1,600-acre Fort Parker State Park on Highway 14 between Grosbeck and Mexia.

Brought Chinaware Into Favor

The habit of drinking tea, coffee, and chocolate, which started in England in the seventeenth century and was carried over to America, was responsible for the first popularity of chinaware among the general public.

Progress News

Rev. H. H. Copeland preached here Saturday night, but on account of sickness in his home, did not preach Sunday morning. There was good attendance at Sunday school.

Rev. R. B. Walden will fill his regular third Sunday appointment here next Sunday and Sunday night.

Mrs. Russel Thompson, of Mangum, Okla., is visiting her parents, Mr. and Mrs. T. I. Hollis, and other relatives here. She attended Sunday school here Sunday morning.

Mr. and Mrs. Jess Pruitt, of Jenko, attended Sunday school here Sunday. Bill C'itwood made a business trip to Amarillo, Thursday.

Mr. and Mrs. Shorty Quier, of Leveland, visited in the home of her brother, Clarence Lobstein, Saturday night and Sunday.

H. C. Kennedy is visiting his son, Tom Kennedy, at Rails.

The school board elected their bus drivers Thursday night. W. M. Gaston will drive the north route to Muleshoe. Richard Meltzfeldt will drive the south route.

Those going to Canyon to the short course Thursday last week from here were Mesdames W. G. Kennedy, John Shipman, B. L. Hillock, Charles Baker, Amos Williams, J. J. Wilson, Clarence Lobstein, J. J. Cross, W. M. Gaston, Misses Bessie Vinson, Louise Gurley and Miss Dugger, W. M. Gaston and P. Stovall.

E. C. Whitwood of Muleshoe, attended church here Saturday night.

H. D. Club Meet

The H. D. club met in the home of Mrs. W. G. Kennedy, Tuesday of last week. The program was turned over to Miss Alma Stewart, home demonstration agent. She gave us a demonstration on staining wool blankets. "I wrapped in several thicknesses of newspapers and sealed the moths will not bother them, as the moths do not like the printer's ink," said Miss Stewart. "When I get ready to store my good fur I sew a newspaper and put my fur, or anything that I wish to keep the moths from, place it in the bag, take it to the machine and sew the bag up. I am never bothered with moths," said Mrs. Ruby Hillock.

Those present were: Miss Bessie Vinson, Mesdames Mamie White, Serena Johnson, Dollie Lobstein, Nora Williams, Maude Radney, Ruby Hillock, Ina Gross, Claudia Wilson, W. G. Kennedy, Charles Baker, John Shipman, Walter Gaston and Miss Alma Stewart. The visitors were: Mrs. C. A. Pruitt and Miss Vera Baker.

The next meeting will be May 19 in the home of Mrs. Amos Williams. The program will be of a Centennial nature, "Texas Under Six Flags," given by six members.

"The Texas Blue Bonnet," by Mrs. Vaughn Johnson.

"The Mocking Bird," by Mrs. Clarence Lobstein.—Reporter.

Enochs Echoes

Mr. and Mrs. G. P. Howell spent the weekend at Del Rio, Oklahoma, visiting her mother.

Lubbock visitors this week were Mrs. R. L. Patterson, Mrs. Chas Coffman, Mrs. John Alford and Maritta Parker.

Mrs. Alton Green, of Corsicana, is visiting her sister, Mrs. Roy Layfield, and brother Fred McQuary.

Muleshoe visitors this week were Mesdames Roy Layfield, Roy Helson, Alton Green, Allen Antry, A. C. Donahy, E. N. McCall and Homer Green.

The Mother's Day program last Sunday was well attended at the Baptist church. The ladies served lunch and Rev. Coffman preached in the afternoon.

Members of the Methodist church invite each and everyone to church Sunday. They have their new church almost completed and plan to have services in it Sunday.

H. D. Club Meet
The Home Demonstration club met at the home of Mrs. L. G. Harris last week with six members present.

"Texas Under Six Flags" was the subject discussed. Mrs. Harris had pamphlets advertising the centennial. Patterns were discussed and some waist patterns fitted.

Those present were: Mrs. Roy Helson, Mrs. A. D. Calvert, Mrs. T. A. Thomas, Mrs. Roy Seagler, Mrs. Homer Green and Mrs. L. G. Harris.—Reporter.

WEST CAMP 4-H CLUB MEET

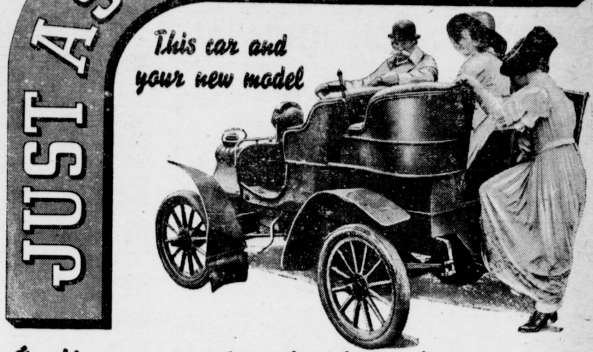

"Pick a color," your pajamas, or slip that is suitable for your type," said Miss Alma Stewart, Bailey county home demonstration agent to the West Camp club girls May 6 at the West Camp school house.

Miss Stewart lectured on the different types of seams for slips and pajamas. The kinds of seams that can be used are plain, French and flat felled. However the plain or the flat is better for the two garments than the French. Miss Stewart also talked about the kinds of soft materials suitable for making dresses. She showed samples of material she thought were the most suitable for the club dresses.

Two delegates were elected to go to Short Course which was held at Canyon May 8. The delegates chosen were Pauline Adair and Flora Lee Williams; alternates were Wilma Smith and Louise Adair.

Those present were: visitors, M. A. Snider and H. C. Robertson; sponsors,

JUST AS DIFFERENT

Ordinary motor fuel and PHILLIPS 66 POLY GAS

Before you laugh at this stem-winding, stem-loading, hoseless carriage... remember that it is no farther behind the times than the gasolines of yesterday.

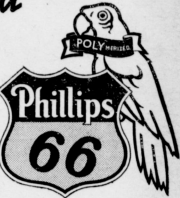

Modern engineering and chemistry, modern production and refining equipment, modern ideas and ideals: All make Phillips 66 Poly Gas today's outstanding motor fuel... genuine 1937 model motor fuel... great for this year's cars... ready for next year's!

It's a truly sensational performer. Leveler, smoother, faster. Higher test and higher anti-knock. Packed with extra energy units by the scientific POLYmerization process.

Besides, it is 100% custom-tailored, rebalanced to the weather every month. So it delivers unchanging, money-saving performance at any and every temperature from below zero to over 100 in the shade.

Practically every place it is sold, Phillips 66 Poly Gas is growing in public favor faster than other brands. Check to see that its extra benefits cost nothing extra.

Isn't that a good reason for you to look for the Orange and Black 66 Shield the very next time you need gasoline!

Phill-up with Phillips for Greater Mileage

Mrs. M. A. Snider and Mrs. B. B. Dickenson; members, Pauline Adair, Louise Adair, Nora Lee Dotson, Juanita Hughes, Naomi Smith, Wilma Smith, Wilma Louise Snider, Elva Lou Stone, and Flora Lee Williams.—Reporter.

BURKHEAD BORDER
Miss Mildred Burkhead became the bride of Ralph Border last Sunday afternoon at 4 P. M., the ceremony being performed by Rev. Clyde Campbell, pastor of the Methodist church at that place. Only a few friends witnessed the ceremony.

The bride, one of the charming members of the younger set in Muleshoe, is the daughter of Mr. and Mrs. J. B. Burkhead, while the groom, one of the members of the Muleshoe High school graduating class this year, is the son of Mr. and Mrs. J. D. Border.

EDITORIAL AND LITERATURE PAGE

THE MULESHOE JOURNAL

Entered as second-class matter at the Muleshoe Postoffice under the Act of Congress, March 3, 1879.
JESS MITCHELL, Editor. I. F. MITCHELL, Bus. Mgr.

SUBSCRIPTION RATES

In Bailey County, one year, \$1.50; Outside of County one year, \$2.00.

Published every Thursday at Muleshoe, Texas.
Advertising rates given upon application. Telephone No. 54.

Subscribers who change their addresses, or fail to get their paper, should immediately notify this office, giving both new and old address.
Communications of local interest are solicited. They should be briefly written, on only one side of the paper, and must reach this office not later than Wednesday morning of each week. The right of revision or rejection is reserved by the publisher.

Advertising that does not show in its text or typography that it is paid for must be marked as an advertisement. All local advertisements remain in this paper for the time specified or until ordered. All notices, it matters not by whom not for whose purpose, if the object is to raise money by admission fee or otherwise, is an advertisement and when sent in for publication must be paid for at the regular advertising rate per line for the same publication.
Obituaries, cards of thanks, and resolutions of respect will also be charged for at the same rate.

Any erroneous reflection upon the character, standing or reputation of any person, firm or corporation which may appear in the columns of the Muleshoe Journal will be gladly corrected upon its being brought to the attention of the publisher.
In case of errors or omissions in local or other advertisements, the publisher does not hold himself liable for damage further than the amount received by him for such advertisement.

Editorial

Every Great Attempt is Glorious Even if It Fails

A THOUGHT FOR THE WEEK

Go therefore now, and work; for there shall no straw be given you, yet shall ye deliver the tale of bricks.—Exodus 5:18.

A man is a worker. If he is not that he is nothing.—Joseph Conrad.

SPIRITUAL NEEDS

Much of all government has to do with the physical, some with the mental; but comparatively little with the spiritual only as result of contributing to the first two factors mentioned.

True it is difficult for a man to be very religious on an empty stomach; but it generally takes more on the fact given quantity of food to cause one to be the best spiritually.

During the past few years billions of dollars have been spent to keep people from starving, but largely on the basis of saving their hides and with little thought of saving their souls.

That such salvation is largely of a material nature, is deduced in the fact that argument is frequently set forth to the effect that feeding the poor and hungry is necessary to keep down revolution, avoid strikes, forestalling the drift toward communism and anarchy, etc., with little thought of the real brotherhood of man, man's responsibility to man or the solidarity of society under jurisdiction of the Creator.

Such attitude, at least appears to represent an applied selfishness rather than an act of brotherly compassion. Apparently it is a case of giving a man a sandwich or bowl of soup because if allowed to go hungry too long he may rear up on his hindlegs, turn green about the gills and start smashing up your property.

A hamburger probably tastes the same to a hungry man when given in fear or self defense as when proffered from the standpoint of brotherly interest and social responsibility; but it reacts upon the given in a lower manner because the underlying promptings are not fundamentally properly based.

Perhaps government has cut the pattern and established precedent for its citizens, at any rate spiritual entities should be given more consideration in regulation of economic conditions. It would produce much more wholesome results. No doubt about that!

REPUBLICAN CANDIDATES

Who the Republican candidate for the U. S. Presidency will be is just a matter of question now as it was 60 days ago, and all notwithstanding the fact there have been five or six leading citizens making urgent bids that honor. One of them will carry out state primary, another obtain a majority in still another state—and still none have any assurance of plucking the coveted plum at the coming national convention.

Apparently Governor Landon, of Kansas and Senator Borah, of Idaho, are now the leaders for this high office, yet that is no sign either will obtain the nomination for it. Politicians have a habit of not nominating men for high office who happen to be the choice of the people and have never been a single instance a publican history where a man prosecuted an active campaign for the national convention, no how favorably received, was instructed to that office by the people.

It appears that the monarchical folk decide upon a Republican and then the people becomes a signal for

the political leaders to knife him personally and pin down his campaign balloon. While on the other hand if the voters in general take little interest in a given candidate it is a frequent passport to that coveted office.

Wise politicians are more reluctant to enter primaries of the different states. They don't fall readily for the unstructured delegation and favorite rackets. Politics are controlled as much today as they ever were. It's no wonder half the voters don't go to the polls to express their personal opinion with ballots.

BAILEY'S BOAST (?)

Bailey county boasts that it is strongly democratic in its political fiber; yet how much has it ever really done for the party at large. True, it has always elected Democrats to office in the county, and in the large majority, has voted for district and state Democratic candidates; but it has contributed little in funds and influence to party work outside the county. Apparently, its voters are content to merely ride along on the political band wagon, following the line of least resistance as nearly as possible, and with little outward manifestation as to favorable results.

Last week precinct and county conventions were held in counties all over Texas, largely for the purpose of electing delegates to the district Democratic convention. None of these preliminary conventions of any kind were held in Bailey county, consequently the party in Bailey county will not be represented in district convention. It will have no voice whatever in matters of state, and can have no legitimate kick coming if important deliberations do not turn out as citizens of this county would desire.

Not only were there no precinct and county conventions held by Democrats in Bailey county this year, but there never have been. Hence, it is easy to raise the question: "Are Bailey county Democrats not good Democrats, and are they not vitally interested Democrats as they should be?"

It is certainly a reflection upon partisan politics to not be supported by adherents in various units of activity. It is not the best recommendation of loyal citizenship. We believe in people standing up for their convictions. In the coming primaries voters should see to it that a chairman of the County Executive Democratic committee is elected in this county who will see that the county is properly organized and the proper conventions and other meetings are held. The same suggestion holds good in behalf of Republican organization and caucuses; though probably not so important anywhere in Texas.

SEN. NELSON'S IDEA!

Recently Senator H. G. Nelson, Tahoka, elected last year to succeed the late Senator Arthur P. Duggan, this district, pleaded dire poverty and asked newspaper editors of his district to announce his candidacy for reelection without cost to him. Several of the editors, including the one of this newspaper, promptly complied with his desire.

A few days later his initial request was followed by mailing out to newspapers a series of stories favoring an extension of legislation in Texas, which very few papers published. Perhaps some favored the one-house idea, but there were others who clasped the publicity as free advertising such as they get from big business concerns, constantly endeavoring to get some-

LEST WE FORGET

To Commemorate the Tragic Deaths Occasioned by the New Deal Airmail Contracts Cancellation.

Nothing for nothing, and promptly consigned it to the waste basket.

Nelson's idea of an unicameral legislature may be alright and again it may not be. The idea is still in its infancy. The State of Nebraska has adopted it, but is still to test out its merits of efficiency. When the Texas senator sprang it in the special session of this state's legislature last year, it was greeted with anything but majority favor. If we recall correctly, it received six favorable votes in the Senate and only a few more in the House.

Innovators of every kind generally have hard sledding putting over their ideas, and Senator Nelson's crusade in this particular respect, will doubtless prove no exception. Legislative reform of every kind are not generally gobbled down quickly by the citizenry.

Theoretically, the idea bears probable merits. It will doubtless speed up some legislation, curtail some expense of that body, probably be conducive to greater efficiency; but when the Senator again springs in on the floor at Austin he will not only immediately run against the protest of fellow legislators, many of whom will lose their jobs if they approved the idea; but he will later have a big task of convincing the voters, no matter how much taxes they pay and how anxious they are to cut down public expenditures. Human beings seem to naturally be built that way!

ONE FARMER'S VIEW

A farmer well-known around Muleshoe who has three sons now grown to manhood recently told a friend that he thought he made a big mistake in educating them off of the farm. None of these sons has a steady job and none can enough about farm life to stay at home and help him. When out of a job they find it convenient to "put their feet under Dad's table," but that is about as far as their farm interest goes.

This farmer blames the attitude of his sons toward farm life on the kind of school in which they received an education. At school a few years ago, little attention was given to farm life and agricultural problems; the big idea seemed to be to get a white collar job in some city. He contends, and he may be right, that those who teach rural boys and girls should take more interest in farm life and farm homes. As a result students who graduate from such schools would choose their vocations accordingly, and both they and the farm would be better off.

DONT SPECULATE

Federal reports indicate that there has been a tendency all over the country during the past few months to speculate in farm property and real estate. Prices are constantly going higher, and today grave fear is experienced in some sections that the country is going to see another speculative wave such as that which followed \$220 wheat prices during the World War.

Muleshoe citizens who recall that will sincerely hope the country doesn't experience the same thing again. Then farm prices were driven to a height that was just about double what they should have been. Practically no good came out of it, but a lot of sorrow and grief did. Thousands of farmers in every section of the country are still suffering from the evil effects of it. Good land is always worth a fair price, but it becomes a hazard if the price is

GAS AND BEAUTY

boosted to the point that encourages speculation.

KEEPING POSTED

It seems almost unbelievable that intelligent young people can get along without reading their home paper or a good daily, or both. The average weekly home paper does not cost more than three cents a week and excellent dailies not more than a penny a day. There is no investment of so small a sum that will furnish as much enjoyment, good reading and general enlightenment as the weekly and daily newspapers. They are not only almost indispensable for our own advancement but for our country as well.

With all the heavy problems of government resting upon the voters it seems absolutely necessary that they be informed on the great issues of the day in order that they may decide wisely.

Thomas Jefferson once said that democracy cannot survive when half of the people are ignorant. Reading our home and daily newspapers thoughtfully is one of the best ways possible to keep ourselves well informed on the current problems.

Jaunty Journalettes

Most Muleshoers believe in equal rights for others; but occasionally one seeks special privileges for themselves.

This day in June it's easy for any Muleshoe woman to stop loving a man. All she has to do is marry him.

Sometimes it happens that the Muleshoe motorist who insists on doing 70 miles an hour or bust, does both.

Muleshoe husbands will now please spit on their hands and get their lives in condition for working wife's garden.

Probably one reason Muleshoe business concerns don't advertise "summer accessories" is because it's too darned hot to wear them in the summer.

Every Muleshoe man who delights in being his wife's mother or sister wears a hair net in public please hold up his hand so she can see it.

Perhaps after all, no Muleshoe person who knows everything would be any more content than the one who just thinks he knows it all.

It occurs to some conditions around Muleshoe might be much better if there were not so many people contenting the world over than a living.

Bad things sometimes serve a good purpose. If some Muleshoe men never got sick they'd never find an excuse for reforming.

Anyway, the modern Muleshoe wife is useful. She may not mend her husband's clothes; but she sometimes does mend his manners.

Proof of the Muleshoe woman's charm is her ability to be attractive in spite of the funny things she wears on her head.

A New York restaurant man says Americans are forgetting how to eat. We know some around Muleshoe who during the past three or four years haven't had a decent chance to demonstrate their ability along that line.

Muleshoe women get quite a kick from rotating their "major operations" every day in the year; and right now they seem to be getting much satisfaction in dropping and breaking dishes.

As spring advances and vacation time draws nearer, it gives them a chance to constantly remind their husbands they are "nervous wrecks."

SNAP SHOTS

A politician is frequently a man who is afraid to endorse what is right unless his party thought of it first.

Careful breeding might improve people as it does dogs; but it hasn't made hogs any smarter.

We decided sometime ago that a job assurance was as important as job insurance.

With some people the chief objection to taking a daily bath is that it doesn't give a fellow a chance to feel especially clean on Sunday.

Everybody who reforms; but what the most of them really want is a law that will abolish hard work, thrift and good sense.

Boys who leave the old home town don't all succeed. It just seems that way because the failures don't come back to show off.

Marriage is like an automobile in that it is much more enjoyable when it reaches the point where a little scratch doesn't matter.

Every man is entitled to his share; but it isn't our best American liberty that he has any right to separate any

POLITICAL ANNOUNCEMENTS

The Journal is authorized by the following citizens to announce their candidacy for the respective offices under which their name is listed, subject to action of the Democratic primaries.

For Representative, 129th Dist: A. B. TRAWATER, (re-election)

For District Judge 64th Judicial District: C. D. RUSSELL

For County Judge and Ex-officio County School Superintendent: O. N. ROBISON WARREN POWERS DR. A. M. MATTHEWS M. G. MILLER

For County and District Clerk: H. J. WILLIAMS W. R. (Ray) CARTER ELIZABETH HARDEN MRS. I. S. BARRON MRS. A. M. MATTHEWS A. L. (Looman) CARPENTER

For County Attorney: CECIL H. TATE, (re-election)

For County Treasurer: HELEN JOHNSON, (re-election)

For Sheriff, Tax Assessor and Collector: JIM COOK, (re-election)

For County Commissioner, Precinct 1: H. E. SCHUSTER, (re-election)

For County Commissioner, Precinct 2: JOHN S. WILLIAMS, (re-election)

For County Commissioner, Precinct 3: CHAS. SHAW GEORGE HENDERSON D. WARNER

For County Commissioner, Precinct 4: J. W. (Johnnie) ALFORD, (re-election)

For Justice of the Peace, Precinct No. 1: J. F. VAUGHAN, (re-election)

other man from his share.

Man has invented machinery to free himself from labor, and now there are plenty of men who wish they had the labor instead of the machines.

Hitler says that food is God's. Germany is right. Seems like we ought to have more stock in the food store.

It's about got so that if the little man goes into business Big Business chokes him, and if he buys stock in Big Business then the government soaks him. What's he to do about it?

Pavement Pickups

Several citizens report they have heard Dr. Am'thew's ask where the churches are located in this town since he announced for county judge.

Attorney Cecil Tate says he long ago gave up the idea of ever discovering a gold mine and is now concentrating his efforts in being a client who is both rich and scared.

A Muleshoe man, who shall be nameless, told us last week that while his wife permitted him to pick his stupa and neckties, she did the picking of his pockets.

Dr. McCarthy says while the East may boast of its faded toemals and tinted fingernails, West Texas also has its mottled teeth—two it's not particularly proud of 'em.

Upon being told that men now days use only about 10 per cent of their energy, Clyde Holland remarked this week, "that is all the government requires anyway, so why worry!"

Someone in the blacksmith shop of the gray dog suggested there were lots of other 'men born in the cities; but Jim Cox protested only babies were born the leaman casquin w/22 Onborn there, same as in Muleshoe.

Pat Bobb recently wrote a compliment last week He was walking up and down the upstairs corridor with his hands in his pocket, and some one stopping him said, "You are the first lawyer I ever saw with his hands in his own pockets."

Customer in grocery store last week: "How much do you want for this suit?" he queried. "If I pay cash?" "Only \$20," replied Virgil. "And how much if I buy it on instalment?" "Just \$50," replied Virgil, "and the best part of it is that we require only half down."

Judge Russell says there is plenty of uss added by people wanting to abolish the Supreme court because it vetoes the work of Congress; but the President goes right ahead with his veto and it isn't our best American liberty that he has any right to separate any

WEEKLY LAY SERMON

HOME

By ZEP

Some one has said: "Home is the golden setting of earth in which the brightest jewel is mother." It is that place to which one may retire and shut out a world of strife and shut in a world of love. It is a center of affections around which the heart's best wishes entwine. It is a working model of heaven with real angels in the form of sainted mothers and devoted wives—the father's kingdom, the children's paradise, the mother's world—"Home, Sweet Home."

Ask a dozen men the meaning of home, and no two will give the same answer. To some it is a place of joy and happiness, of love and plenty—a greeting at the gate and a smile at the doorway. All is serene and peaceful. Life is as tranquil as an autumn lake. It is a center of affections, and with only the zephyrs of love to arouse the emotions of the heart. To others, home has a far different meaning. Instead of quiet there is quarreling. Instead of quiet there is an un-

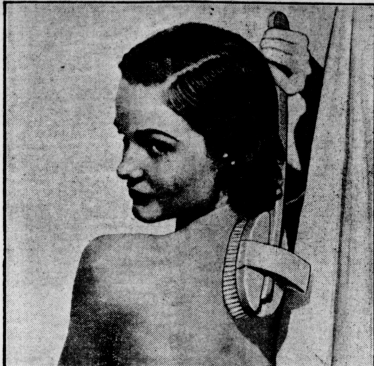

pleasant, no harmony of thought, no peace of mind, no rest of soul. All is weeping and woe, sorrow and despair. Home becomes a crime factory, a school for the training of outlaws, vagabonds, thieves, and murderers.

The home is a powerful test of character. Actors on the stage present a beautiful appearance. When the curtain rises everything is in perfect order, and the actor, arrayed in his best, greets the audience with many smiles; but behind the scene everything is turmoil, and there are said and weary faces.

So some people, clad in joyful apparel, greet the world with a cheery disposition, while at home their garments are dark and gloomy; their smile changes to a frown, and the impatient temper, the grouchy disposition, reveal the true character. They are a Dr. Jekyll in public; but the moment they step through the front gate of their home they become metamor-

Yours For a Youthful Back

—By Gloria Lane

PATTI PICKENS, NBC radio star and youngest of the three singing Pickens sisters, knows the value of a good back-scrubbing daily to keep her back flawless and satiny-smooth. She makes it a definite part of her bath routine in order that the beauty of her back will not be unfavorably affected by the sheer loveliness of the season's new decollete gowns and swim suits.

And it is just this time of the year that a special inventory should be taken not only of your back, but your arms and thighs as well. An extra scouring seems to be in order to keep the skin fit.

All winter long, the wearing of heavier fabrics has had a tendency to buffet the skin, and with the combined heat and excessive moisture, many a skin blemish and blackhead has made its appearance. During cold weather, the skin around the upper arms and thighs often develops little hard plugs when the pores have been clogged, preventing the normal excretion of oil and body wastes. In too, there is always that constant shedding of dead scales. A good rub with a brush hastens their departure and makes way for a fresh new layer of skin.

In selecting your bath brush, make certain that it has a long handle, especially curved to fit the back. It will work wonders in radiating the effects of skin blemishes caused by the friction of fabrics. A brush made by a well-known firm has a grand maple handle with a head that slips off and has a strap for scrubbing immediately.

The soft, white bristles are resisters of delicate skin and yet are firm enough to thoroughly rout any foreign particles which may have lodged on the back or anywhere else on the body that may have found a resting place.

In scouring the skin, use warm water—if it is hard, soften it with almost neat, starch or one of the water softeners. Use a toilet soap, and warm water and get up a generous lather. Begin by working on the spine, thoroughly massaging the vertebrae. This speeds up the circulation and sends the blood surging through the body. An extra rub at the base of the neck is very relaxing. After thoroughly scrubbing the body, rinse off the lather with a shower of cool water, or by cupping fresh water from the faucet with your hands.

What's Happening In Washington And Other Cities Of Importance

Daylight saving is now effective in 17 different states.

Milo Reno, 71, Des Moines, Iowa, president of the National Farmers Holiday association died suddenly from heart trouble last week.

A gift of \$3,000,000 from the Rockefeller Foundation is announced to be used in treatment of cancer and allied diseases.

About 10,000 federal employes are soon to be dropped from federal jobs, according to results of a recently completed survey.

The Hudsons, newest and largest of the German zeppelins, completed its first trip across the North Atlantic last Saturday in less than two and a half days, landing at New York city.

Wm. Ma'on, recently arrested by G-men in connection with the George Weenerhauser kidnaping, pleaded guilty to being the brains behind the deal and was given a 63 year sentence.

The household furnishings of the late Charles Coolidge home at Northampton, Mass., were last week sold at auction. It is reported his widow who is now in France is to be married soon.

Personal histories of 50 child prodigies of 10 years ago are cited by the Midwestern Psychological association convention members to show that "gifted" children grow duller as they grow up.

The U. S. Treasury officials last week revealed that two-thirds of the 48 states received in the past nine months more money in relief payments than they contributed in taxes during the preceding fiscal year.

Washingtonians were surprised and shocked Thursday of last week when they awoke that morning and beheld a communism flag floating from the pole atop the Supreme court building. Much difficulty was found in getting it down.

AGRICULTURAL COOPERATION

L. J. Taber, Master of the National Grainmen, has recently put forward the following five reasons why cooperative marketing can do for the farmer what no other method can accomplish.

1. It gives him a voice in the control of his own affairs; increasing his sense of responsibility, his value as a citizen, and his independence.
2. It permits him to control quality of purchases, and standardize his products.
3. It enables him to secure the type of merchandizing, packaging and distribution service that best meets his needs, as well as the needs of the consuming public.
4. It makes it possible for him to use the law of supply and demand to better prices.

5. It permits him to own his marketing machinery, and keep open his avenues of credit, production and sales. This is a great stabilizing influence.

These are basic virtues of agricultural cooperation. They show how cooperation in farm production and marketing enables farmers to achieve sound "farm relief" through their own efforts and abilities.

MORE TEACHERS ARE ELECTED

Monday evening a school board meeting was held at the High school building at which time the following new teachers were elected: Miss Stella B. Jackson, Littlefield, High school English teacher; Mr. and Mrs. Claudie Gullman, Dimmitt, to teach in the grade school.

Mrs. W. C. Cox, who has been the primary teacher for several years resigned from that position. Two more positions are yet to be filled.

C. R. Stevens, former High school history teacher will in the future teach science and Miss Addie Belle Fort, English teacher this year, will be changed to the history department. Several changes will be made in the grade school that have not yet definitely been worked out.

The end of passion is the beginning of regret.

"Don't you play football, grandpa? Daddy said we would get a new car as soon as you kicked off."

A TICKLER FOR THE PALATE

People live to eat as well as eat to live. They want food that is not only wholesome; but appetizing—that's what you get at this store.

Folks who eat Red and White Groceries get an exceptional zest and delight from that daily pleasure.

Also, there's much satisfaction in knowing that food you eat is of unquestionable quality. It's worth a lot to buy at a grocery store where you don't have to ask: "Is it fresh?" It's good to deal where you are never in doubt on that point.

Visit our store often and check the constant new arrivals of wholesome, appetizing foods we are receiving!

STEP UP TO THE V-8 CLASS
WITH THE MOST UNDER PRICED CAR IN AMERICA

V-8 Engine—Only car under \$1600 with a V-type 8-cylinder engine.
Center-Poise Ride—Only car under \$1400 with this feature.
Super-Safety Mechanical Brakes—Also used on Lincoln and Lincoln-Zephyr.
Six-inch Air Ballon Tires—Only car equipped with these "oversize" tires at no extra charge in the lowest-price field.
Safety Glass All Around—At no extra charge. No other car within \$100 of the Ford V-8 price has this Safety Feature as regular equipment.

Motor Co.

PROVED BY THE PAST—IMPROVED FOR THE FUTURE

Mercandize Awards Given Saturday Were Scattered Over Co.

Strange as it may seem, and for the first time during the Muleshoe Trade Expansion campaign the name of every honored customer called by Col. Cook for reward was present to receive it. Generally from 10 to 15 names are called before any response is given; but in the past, there have been times when some party's name has been called two or more times, so it is evident folks are taking no chances of missing the awards that may come to them.
J. A. McGee, route 1, Muleshoe received the first award of \$10; E. M. McDill, Goodland, received the second award of \$3; while Mrs. Cecil Davis, Muleshoe received the third award of \$2.00.
There was a big crowd here as usual the majority of them coming in during the afternoon to visit, trade and make new acquaintances.
The usual awards will be made again next Saturday.

Poultry

SELECT, HANDLE EGGS CAREFULLY
Hatchability Is Important to All Poultrymen.

By Dr. W. C. Thompson, Professor of Poultry Husbandry, New Jersey College of Agriculture—WSU Series.
Much of the profit-making possibilities of next season's pullet flocks will be determined by the type and character of hatching eggs used in incubators. Good chicks and good pullets will come only from good eggs. The ideal weight of hatching eggs is from 25 to 28 ounces to the dozen and not less than 24 ounces to the dozen. Although the matter of weight in egg selection should not be carried to the extreme, next year's pullets will tend to produce eggs of the same type of those from which they were hatched.

Hatching eggs from poultry breeding flocks should be gathered two or three times daily during cold weather because chilling, to say nothing of freezing, ruins chances of a good hatch. Store the eggs in a cool place, preferably at 60 degrees Fahrenheit, in clean trays or cartons, as possible. The air in the storage room should not be too dry, or moisture in the eggs will be evaporated. Placed in clean trays or cartons, the eggs should be turned two or three times daily.

Do not wash hatching eggs, but remove any dirt with a fine sand paper or emery cloth. It is far better, however, to have produced hatching eggs perfectly clean than to have to clean them after they are gathered. Discard the abnormally colored and oddly shaped eggs and set the selected eggs in the incubator within two weeks, and preferably within 10 days of the time they are laid.

Gravity Principle Used to Ventilate Hen Houses

While there is some difference of opinion about the best way to ventilate poultry houses, a simple system based on the principle of gravity has been used effectively in New Jersey multiple-unit laying houses for more than a decade, says E. R. Gross, professor of agricultural engineering at the New Jersey College of Agriculture, Rutgers university.

The only changes made in the gravity system during the last ten years are the adaptation of new materials for construction and successive increases in the size of the flue. Professor Gross reports. Under this system, the front windows of the house serve as intake openings and are regulated according to weather conditions. The air passes through the room to an outside flue which is located at least six feet from the window and extends from two feet above the floor straight upward through the roof to a light pipe to form an airtight box or tube and is located in each unit accommodating 100 to 150 birds. A large cap prevents rain and snow from entering the house through the top of the flue.

For most effective operation of this system, the flue must have a cross section area of at least two and a half inches per bird and, in most cases, this area may be advantageously increased to three and a half inches per bird. A flue which is too small does not afford sufficient air change to carry away the moisture and keep the litter dry.

Odd Ibs
The ibex, also known as the stink-buck or bonghuqua, one of the hand-somest of all wild goats, has the forelegs shorter than the hind legs.

Black Widow Spiders Bite When Disturbed Beware Of The Poison

Austin, May 12.—The "Black Widow" spider continues to be a menace even though the number of persons bitten is comparatively small, according to morbidity reports received by the State Department of Health. The habit of this spider in building its web in dimly lighted places makes it difficult to establish any effective method of control.

Though the "Black Widow" is frequently found in basements, wood sheds, and other places which have dark corners or recesses, more cases of spider poisoning that have been reported in past years have occurred in old toilets in the rural districts. The spraying of creosote in cracks and crevices, particularly around the seats of old toilets, is an invaluable procedure, but precautions must be taken against fire. The egg cocoon may also be crushed.

The adult female spider is about half an inch long and has a shiny black body with a brilliant scarlet hourglass marking on the under surface. The name, "Black Widow" is derived from the fact that the female kills and eats the male after mating.

The web of the "Black Widow" is characterized by the fact that the strands are tough. If a straw is applied to the web of an ordinary house spider, the web will immediately break, but if a straw is stroked through a "Black Widow" web, the strands will be found to be so tough that the straw will bend or even break. The female spider stays close to her web but will rush out and attack violently any object disturbing the web.

The "Black Widow" is not an aggressive spider, and rarely bites unless disturbed. Actual pain develops in the region of the surface bitten, spreading to other parts of the body. There is a general muscle contraction, difficult breathing, cold perspiration, nausea and an extreme rigidity of the abdomen.

To recognize the "Black Widow," to take the necessary precautions, and to consult a physician immediately, if bitten.

DRUG EASES CHILDBIRTH

A drug which gives the greatest relief though possible from the pains of childbirth was described recently before a medical gathering in Washington. Composed of a mixture of paraldehyde and benzyl alcohol the drug produces a deep sleep which does not interfere with the muscular activity necessary for normal birth. Drs. Howard F. Kane and George B. Roth, both of George Washington university, who discovered the drug have tested it in more than 100 cases and found no ill effects. Administered at the onset of labor pains the new anesthetic causes sleep within about 30 minutes which additional doses will prolong through the longest periods of labor. During the final brief stage of the birth a small dose of a more powerful anesthetic such as ether may be given.

STEEL MAKERS say—"Ford buys the best steel." Other suppliers of materials and parts will tell you—"Nobody checks up as closely on quality and price as Ford."

This means a great deal to you as a motorist. It is our way of safeguarding the interests of every purchaser and it leads to this—"The mechanical depreciation on a Ford is less than most cars, especially after the first year."

This is one sign of the extra value in the Ford V-8. Accuracy in manufacturing is another. (The Ford is made to unusually close precision limits.) And there is a long list of fine-car features that are exclusive with Ford in the popular field.

Have you a V-8 engine in your car? You pay \$1645 for it in any other car but Ford.

Does your car have Center-Poise Riding? Ford gives you this modern feature—"a front-seat ride for back-seat passengers."

Does your car have fool-proof Super-Safety Mechanical Brakes? The Ford V-8 gives you this proved design, with 18" square inches of braking surface.

Does your car have a genuine steel body structure? Does it have Safety Glass all around? Ford is the only low-price car that gives you this extra protection without extra cost.

You get these fine-car features in the Ford V-8 because of Ford manufacturing methods and low-profit policy.

\$25 A MONTH, after usual down-payment, buys any model of the new Ford V-8 car—from any Ford dealer—anywhere in the United States. Ask about the new UCC 1/2% per month Finance Plans.

A Bad, Bold Pirate!

ALTHOUGH she is an expert shot, Carol Hughes, Warner Bros. actress, is really not a pirate. She is just playing at it with her air rifle at the beach. Shooting is the newest form of relaxation in the movie colony.

is fat enough only for braising—generally with a little liquid added. The less connective tissue there is in beef—the more tender: if cooked as pot roasts, “smothered” or braised steak, or stew, or if ground or chopped and cooked tender meat in hamburger steak or meat loaf. Fat usually is added.

To pan-broil tender steak or chops, brown both sides in a lightly greased, sizzling hot skillet, lower the heat and cook slowly, turning the meat to insure even cooking. Pour off accumulated fat or the meat will fry. Never cover or add water in pan-broiling.

How many minutes per pound a roast takes depends mostly on oven temperature and whether the meat is to be rare, medium, or well done. A standing beef roast, seared for 20 minutes in a hot oven (about 500 degrees F.) and finished in a moderate oven (about 300 degrees F.) usually is rare in 16 to 19 minutes to the pound, medium is 22 to 24 minutes, and well done in 30 minutes. Rolled roasts take from 10 to 15 minutes more per pound than standing roasts. The only sure guide, however, is a roast meter. Therometer inserted into the thickest part of the meat. Beef is rare at about 140 degrees, medium at about 160 degrees, and well done at about 180 degrees.

BE CAPTAINS OF THE ROAD

There is an unwritten law of the sea that is followed religiously—namely, the desire to save life. Why can't we have the same high purpose on land? Such voluntary action is always based on necessity. Life-saving in automobile traffic is now as important as life-saving in sea traffic. Such rules as the following, adhered to with sincerity, would save life a hundred-fold.

- 1. Before making a turn, get in traffic lane nearest desired direction.
- 2. The rear vision mirror is for something besides looking for traffic officers—watch cars behind you.
- 3. Never take chances in passing and do not crowd the right-of-way. Saving seconds is no excuse for causing one unnecessary risk of life.
- 4. Learn the feel of the car on the road, like the captain does his ship. Study the action of the car on the pavement, wet pavement, gravel road and icy road. Even the highest ability is not one hundred per cent perfect in driving.
- 5. Take driving seriously; you are probably no smarter than the last person whose neck was broken on a windshield. The smartest men (supposedly) meet with unfortunate disaster through gross carelessness.
- 6. Courtesy is not a sign of weakness; it is a sign character and wisdom, and the ability to be foresighted and obliging.
- 7. The sea captain doesn't unnecessarily take chances when they can be avoided, but he willingly risks life and his ship to prevent an accident or aid another vessel in distress. But automobile drivers willfully risk their own lives as well as the lives of others, for no good reason at all; it doesn't make sense.
- 8. Ordinary rules of common sense and courtesy were followed in driving (unwritten laws), accidents would be caused only by freak circumstances.

Accept Things as They Are
Demand not that events should happen as you wish, but wish them to happen as they do, and you will go on well.

Houses Built of Lava
Petrified lava in Ani, ancient capital of Armenia, burned a thousand years ago, is utilized in building Soviet houses.

Pond of Water Is Valuable on Farm

Fish Will Provide Supply of Meat; Water Plants Are in Demand.

By L. A. Whitford, Associate Professor of Botany, Iowa State College.—WNT Service.

A good pond of water, adding beauty to the landscape and providing a source of profit and pleasure, is a valuable asset to almost any farm. Nestled in a small hollow by a woodland, a pond may be made one of the most attractive places on the farm. If the pond is large enough, part of it may be used for boating and swimming. The overflow may be utilized to develop water power.

Well stocked with fish, the pond should supply the farm home with a good meat supply the year around. Often the water plants may be gathered and sold to local fish and pet stores or for planting in garden ponds and aquaria.

Under ideal conditions, a pond should produce as many pounds of fish per acre as pasture will produce pounds of beef.

Although a water area cannot be “farmed” on as scientific a basis as land, due to the antiquity of land culture now available regarding the care of fish and ponds, it can be made to produce a good supply of vegetation and fish.

Where fish are raised, the water should be kept at a fairly constant level, and there should be shallow areas where the smaller fish can feed and breed. Aquatic plants in the shallow give additional food and protection to the young fish, Whitford stated.

Improved Rules Outlined for Measuring Hay Stack

New rules for measuring stacked hay, more accurate than those used in the past, have recently been worked out by the experiment stations in several states, co-operating with the United States Department of Agriculture. L. P. Garey of the division of agricultural economics, University farm, is Paul Carter of the Iowa farm are the only rules based on research.

Three dimensions of the stack must be determined: its feet; another the length, “L”; the width, “W”; and the over, “O”. The over means the distance from the ground on one side to the other side. The average of several measurements should be taken for the over, if the stack is irregular. Knowing the above three measurements in feet, the volume of the stack in cubic feet should be computed according to one of the following methods:

- Flat-topped stacks (0.56xO) — (0.55xW) x (WxL).
- High round-topped stacks (0.52xO) — (0.6xW) x (WxL).
- Low round-topped stacks (0.52xO) — (0.44xW) x (WxL).

Here is an example that will make clear the use of the rules: A high round-topped stack is 50 feet long, 20 feet wide, and has an over of 45 feet. 0.52 x 45 = 23.4; 0.48 x 20 = 9.6; 23.4 x 9.6 = 142.20 x 50 = 7110; 142.2 x 1000 = 14,200 cubic feet.

The number of cubic feet to allow per ton for hay stacks 90 days or older is as follows: alfalfa, 470; wild hay, 450; other hay, 625. If the stack in the example above were alfalfa hay, the 14,200 cubic feet divided by 470, giving the amount as 30.2 tons.

The First Tile Drain

It is just a hundred years since the first tile drain was laid in this country by a man Scotchman named John Johnston. Born in 1791, he had come to America at the age of thirty and bought a farm near Geneva, N. Y. The soil was so poor that he was rather poor and wet. Remembering lessons learned from a wise old grandfather, John Johnston set back to Scotland in 1825 for some open horsehoes tile, with which he began drainage experiments. As usual with pioneers, the neighbors scoffed, but the experiment worked out so well that by 1856 he had 56 miles of tile on his farm. His wheat yields jumped from 15 to over 50 bushels to the acre. In October of last year, says the Country Home, a group of agricultural engineers gathered at the old Johnston farmstead, overlooking beautiful Seneca lake, to dedicate a monument to the memory of John Johnston and to celebrate “one of the most significant events in the history of American agriculture.”

Farm Cullings

Stable manure should not be applied to a good stand of pasture grasses and clover.

On eight out of every nine farms in the United States water is carried by hand.

Approximately a half million calves were marketed in Ohio in 1934 at an approximate market value of \$4,500,000.

Winter is a good time to study fertilizer needs.

To make one pound of dry alfalfa hay the cow must graze 500 to 750 pounds of water.

Control of temperature, ventilation and humidity is necessary for successful storage of apples.

When farm machinery is left outdoors for long periods the depreciation caused by weathering frequently exceeds that due to actual use.

YOUR CHRISTIAN DUTY

When the soul comes thoroughly awakened, it cries out in deep anguish, “What shall I do to be saved?”

The great work of the Church is to awaken the sleeping souls of lost men. The soul filled with the Holy Spirit should testify in season and out of season that Jesus Christ died to save men, and that they should be saved.

Every Christian should carry on his person a copy of the New Testament, and whenever and wherever the opportunity is offered he should give a copy of that Bible to some lost soul and should urge him to read it.

By personal evangelism. Each Christian should do a hand-picked piece of work. Let each Christian find his man, present Christ to him, pray with him and lead him to see Christ as his personal savior.

Personal evangelism is needed more today than in any period of the world's history. If each Christian could be made conscious of the fact that it is his responsibility to awaken some sleeping soul, the work would be speedily done. It would not take long to evangelize the world if each Christian would hand-pick his man each day.

Suppose each Christian did the work of awakening some one each week. It would not take long to evangelize the world. Each Christian could bring four men to Christ each month—fifty each year. The whole world, if they could be reached, could be that method evangelized in one year's time.

There are sixty-three million people in America who are lost and who need to be awakened. They need to be shown the awfulness of sin, the horrorfulness of hell. Church members are asleep, indifferent, and because of their inactivity they will be held responsible for people who are going to hell every day.

Oh, listen to the agony of his awakened soul, “What shall I do to be saved?” Hasten to his side, answer his question, and lead him to Christ.

Smiles and tears speak all languages.

Circleback News

Raymond Dameron and a boy friend from San Antonio, spent their three days vacation with Raymond's parents Mr. and Mrs. Walter Dameron, Sixty-two relatives and friends ate dinner spread in the yard last Sunday. Mr. and Mrs. Clie Dameron gave a party in his honor Tuesday night.

Rev. Clint Malone preached both morning and evening last Sunday. The church in regular conference called him as their pastor for another year. He has not yet given the church his answer.

Mesdames Sam Sims and George Dameron went to the women's club meeting held at Canyon, Thursday of last week.

Mrs. Hall visited her mother at Saint Jo last week. Claude Dameron, who was seriously hurt by falling from a windmill tower recently, will soon be able to return from the Littlefield hospital where he now is.

H. D. Club News
“El Paso is one of the oldest communities in Texas,” said Mrs. Lee Cagle “It is now one of the five leading cities of Texas.”

Those present at the club meeting Thursday, May 7 at Mrs. Lee Cagle were: Mesdames Lee Cagle, O. R. Wilson, E. B. Wilson, George Glavin, George Garner, Elmer Garner, Vern Rogers, and W. A. Elmore. The visitors were Mrs. O'Kief, of Sudan and one of her daughters from Post. The next meeting will be with Mrs. O. R. Wilson, May 21.

Gift of Cheerfulness

Be cheerful always. There is no path but will be easier traveled, no load but will be lighter, no shadow on heart and brain but will lift sooner for a person of determined cheerfulness.

Poem by Uncle John

Some folks may think a bride in June is sweeter'n any other bride—while others claim the harvest moon hold virtues not to be denied. . . Still others, that become engaged from courtship in the regular way, would like to have their wedding staged about Thanksgiving Day! If nuptials on an April moon endows the bride with smiles and tears, December's bride might dwell forlorn—with frosty heart, for fifty years. . . And so—with every month—we hear some hoodoo in its call or threat—and that's the reason now—I fear—that some of us ain't married yet!

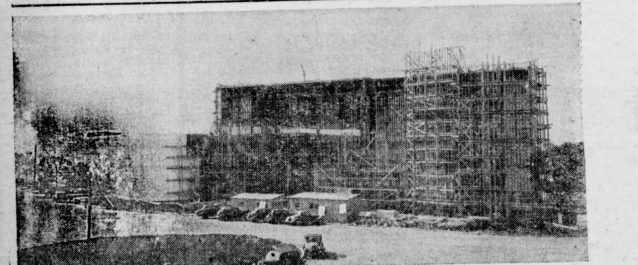

Facts is, there ain't no certain as that governs Cupid in his game; most married folks that I have saw, were tied up, pretty much the same way. And, while the scientific mind explores the matrimonial pulse, we mighty nearly always find that dates don't figure in results. . . If fellows fall to grab their peach till rosy June has fitted by, I'd stick around in easy reach, as I try to last here in July. . . There's bliss enough in married life for lads and lassies, one and all—and, even a plain or common wife is better'n havin' none at all. . .

SPARE THE HEAT—AND SAVE THE MEAT

Cook meat a moderate temperature, says the Bureau of Home Economics. Meat is a protein and like white of egg is toughened and hardened by long heating at high temperatures. Broil, roast, or fry tender, well-fattened cuts from young animals, in an uncovered dish without water. Braise, simmer, or stew less tender; leaner cuts with a cover, with or without water. All cuts of pork, lamb and veal are roasted. Pork and lamb are fat enough for roasting and broiling. Veal usually

is roasted, or fry tender, well-fattened cuts from young animals, in an uncovered dish without water. Braise, simmer, or stew less tender; leaner cuts with a cover, with or without water. All cuts of pork, lamb and veal are roasted. Pork and lamb are fat enough for roasting and broiling. Veal usually

Ford Exposition to Show How Southwest's Products Are Employed in Manufacture of Modern Motor Car

The opening in Dallas June 6 of the great Ford Exposition will show to the Southwest how its own products make the Ford, the Lincoln and the Lincoln-Zephyr automobiles which will be housed an exhibition showing the vast proportions of the Ford Exposition building, in which will be housed an exhibition showing how important Southwestern raw materials enter into the making of modern cars.

The huge Ford Exposition building, erected especially for the Centennial Exposition in Dallas, Texas, opening June 6, will be devoted largely to showing how important the raw materials of the Southwest enter into the manufacture of Ford V-8, Lincoln and Lincoln-Zephyr motor cars. Forty-three thousand of a total of 60,000 square feet in the grand, air-conditioned structure will house an interesting group of exhibits, including and testing exhibits, a pageant of transportation, dioramas showing the use of raw materials in the Ford plants, and an exhibit of the Henry Ford trade school at Dearborn, Michigan. Displays carrying out the principal theme of the Ford Exposition—each Southwestern product, such as wool, corn, grain and rice are employed in the making of Ford automobiles. At the same time, cotton batting is fed into the machine, sewed into place, and the cushion cover is sewed to the cotton sheeting. The machine in regular production makes 24 car cushions a minute and turns out 12 to 14 cushion tops every sixty seconds. This machine is but one example of how the Southwest contributes to the automobile industry. With the Firestone Tire & Rubber Company, exhibiting in the Ford Exposition building showing another important use of cotton, the making of tires, a sign on the building revealed that for one million Ford units, 25,000,000 pounds of cotton are required. It has been estimated that the production of Ford units this year will amount to 116,000,000 four-cylinder cars, eight pistons are made simulta-
