THIRTY TWO PRESENT FOR LIONS' MEETING

PAJAMA DAY POSTPONED INDEFINITELY AFTER A LONG DISCUSSION

Thirty-two Lions and five visitors attended the Lions luncheon Monday noon at the Methodist church. Visitors were Messrs. Banister and Kelley, who are holding a series of meetings at the Church of Christ; Frank Jackson, of San Angelo, Bob Vicars and Clyde Henderson of Sonora.

President J. D. Lowrey read a letter from the chamber of commerce, Llano, acquainting the Lions of the intended visit of the Llano boosters. A motion was made and carried that Sonora entertain the visitors with a sheep and goat barbecue. With one-half the amount of bread necessary secured by promise from Bob Steen, manager of the Corner Drug Store, the chair appointed Alfred Schweining, H. L. Taylor and Buzzy Stokes as a committee to solicit funds for the event. Muttons were donated by Robert Halbert and Alfred Schweining.

Monday next being the date for a group meeting the question of observing Pajama Day was brought up and after considerable discussion, the event was postponed indefinitely. Group 23 will meet Monday and all Sonora Lions are expected to be in attendance.

Group 23 is composed of San Angelo, Ballinger, Sterling City, Eldorado, Ozona and Sonora. Information from the above towns indicates the attendance of a goodly number of Lions. W. C. Gilmore, Rev. J. O. McMillon and W. E. James have the program for the group meeting in charge. Several program numbers will be furnished by visiting Lions.

CO-OPS TO GAIN TWO DIRECTORS ON NAT. BOARD

TEXAS DISTRICT NO. THREE GETS LARGE VOICE IN MARKETING PLAN

District No. 3 of the National Wool and Mohair Marketing Corporation, which includes the Del Rio territory, will have five directors on the board instead of three, it was decided at a meeting of the board in Denver last week. Judge Roger Gillis of this city, a member of the board as well as vice president of the corporation, has returned home, after attending the meeting. In the reappointment of the board of directors, he reported, this district was awarded five places on the board.

Members of the board are elected by the various locals which compose this district. A meeting for that purpose has been called for August 30 in El Paso. Judge Gillis, Floyd Lee of San Mateo, N. M., and Roy Davenport of Uvalde are the present members of the board from district No. 3, which includes Texas and New Mexico.

Orderly Marketing

The national corporation has handled 124,000,000 pounds out of an annual production in this country of 3,000,000,000 pounds of wool. Judge Gillis said that the corporation was not forcing the sales, although about 15 to 20 per cent of the wool has been disposed of in an orderly, gradual manner. Observers anticipate an increase of from 10 to 15 per cent in the price of the commodity, said Judge Gillis.

The directors of the national wool corporation had a joint meeting with the American National Livestock Association board of directors, which was in session in Denver about the same time. The two boards discussed the advisability of launching an advertising and marketing campaign for lambs and cattle.

Blames Retailers

Asked to comment upon the situation with reference to the retail prices of meat, Judge Gillis declared that the packers had reduced their prices by one-third. In some places, he pointed out, this reduction had been reflected in retail prices, but the bulk of the re-

Sonorans Fishing on Devil's River

Steen Wrecks Ford Coupe on the Way, But Was Not Injured in Accident

R. A. Steen, Jack Neill and wife, B. Hamilton, Miss Bertha Harris of Cuero, Floyd Ridley, Dorothy Baker, left yesterday for Devil's River on a fishing trip.

On their way Mr. Steen had the misfortune of turning his Ford coupe over three times. B. Hamilton was with Mr. Steen when the accident happened. Neither Mr. Steen nor Mr. Hamilton were injured. They were about seven miles south of town on the Del Rio road when dust from a rock crusher prevented Mr. Steen seeing a large truck until he was near it. He swerved his car and when doing this the car came in contact with loose gravel, the car traveling down the bar pit for about a hundred yards before turning over.

Mr. Steen and Mr. Hamilton continued their journey with their party. The wrecked automobile was towed to town by a Sonora Motor Company ambulance. About \$50 will repair the wrecked auto.

Mohair Advance to Be Thirty Cents

Directors of Co-Op Held Meeting San Angelo Monday—Mayer and Pierce to El Paso

The advance of the National Wool Marketing Corporation on fall mohair will be 30 cents a pound for adult hair and 40 cents a pound for kid hair, it was announced during the course of a meeting of the directors of the Lone Star Wool-Mohair Co-operative Association in the Naylor Hotel building yesterday afternoon. This meeting also voted to send E. S. Mayer and Victor Pierce to the meeting of the Wool and Mohair co-operatives of district 3, Texas and New Mexico, in El Paso August 30.

The purpose of the meeting in El Paso is to name directors to the National Wool Marketing Corporation, of which Roger Gillis of Del Rio is the vice president.

Those attending the meeting yesterday were, E. S. Mayer, president, San Angelo; J. T. Baker, Ft. Stockton; Arthur Harral, Ft. Stockton; Abe Mayer, San Angelo; Arthur Henderson, VanCourt; Jim Henderson, San Angelo; S. N. Allen, Christoval; and J. M. Lea, Texas agent for Draper and Co., sales agent for the National Wool Marketing Corporation.

It was said at the meeting also that less than one per cent of the ranchmen who had signed the co-operative contract in Texas had withdrawn during the 15 day period allowed for voiding of contracts made in the spring. These clips were of the smaller ranchmen.—San Angelo Times.

HAIL DOES DAMAGE NORTHEAST OF HERE

Judge Harvey Walker was here on business Monday. Mr. Walker reports a heavy hail and rain on his ranch Saturday afternoon. The hail covered a strip of country about a half mile wide, accompanied with a two and one-half inch deluge of rain. Some of the hailstones were about an inch and a half in diameter, he said.

The trees were stripped of their leaves, and Mr. Walker's garden plants were totally beaten into the ground, ruining everything.

Texas cotton acreage for 1930 is estimated at 17,500,000. Corn with 4,896,000 acres is in second place. Wheat 2,520,000 and oats 1,833,000 follow in the order given.

tailers have not reduced their prices. Judge Gillis branded the situation as a "disgrace."

Commenting on the local aspects of the matter, Judge Gillis said that he understood that retail prices of meat in Del Rio had been reduced on the basis of reduced wholesale prices, and, if so, he added, mention of it ought to be made. Del Rio Evening News.

Seventeen-year old Dorothy Dell Goff of New Orleans, winner of the international beauty contest held at Galveston

FORMER SUTTON JUDGE TAKES STUMP FOR 'MA'

L. E. LAURENCE SPOKE IN ROSEBUD FOR "MA" FERGUSON

Judge L. E. Laurence, of Taylor, Texas, and former county attorney of this county, is "stumping" the state in the interest of "Ma" Ferguson's candidacy, and when men of his ilk support and give their influence to the Fergusons it is conceded that they will win in a landslide.

A Sonora citizen heard Mr. Laurence speak in behalf of the Fergusons last week at Rosebud, Texas, and declared that the former Sutton attorney did as well or better than others he had heard who spoke for Ferguson.

Judge Laurence gained much notoriety while in Sonora, and will be long remembered, both by the law and citizenry. It was Mr. Laurence who stated in Taylor that he was district attorney of Sutton and Crockett counties, and during his time in office got 274 convictions out of 278 "hard" (?) cases.

It has been rumored here that The Devil's River News would not give the Fergusons any publicity, but this opportunity affords this paper a chance to put the Fergusons' name on the front page of this sheet, and the readers can read and weep.

Wears a New Collar

Gen. Charles G. Dawes, Ambassador to Great Britain, back in Washington to confer with the President still smokes his famous "base-burner" pipe but has changed the style of his collar.

Sonora Men Lease Ranch in Pecos

Will Stock Twenty-two Sections With Lambs Sometime in Near Future

B. W. Hutcherson and Joe Lancaster have leased 22 sections of grazing land east of Girvin for a period of from three to ten years. It is their intention to stock their new holdings with about 6,000 lambs in the near future.

Good rains have been falling recently in the Girvin section, and it is thought that sheep will winter well.

MRS. W. D. WALLACE ENTERTAINS WITH BRIDGE

Mrs. W. D. Wallace entertained the Merrimakers Club at her home Tuesday afternoon with bridge. A pink and green color scheme was carried out. At bridge, Mrs. Jim Cauthorn won high club, and Mrs. Tom Davis, high guest.

A delicious fruit course was served to the members and the following guests: Mrs. S. T. Gilmore, Mrs. Hi Eatsland, Mrs. Tom Davis and Libb Wallace.

S. O. (Sod) Durst, game warden of Kimble county, was in Sonora this week on business.

Church of Christ Revival Progresses

John R. Banister Is Preaching Splendid Sermons Morning and Evening

Much interest is being shown at the Church of Christ revival, according to John R. Banister, of Thalia, who is conducting the meeting. Mr. Banister is preaching twice daily, morning services at ten o'clock and evening services at eight. E. V. Kelley, of Uvalde, is in charge of the song services.

A welcome to everyone has been extended by the Church of Christ to attend services.

The revival will continue through Sunday, August 24, and perhaps longer.

Texas has three electrically lighted baseball parks for night games—Houston, Waco and San Antonio. In the United States 38 cities are playing night baseball.

Chris Meinecke and family, of Ozona, were Sunday guests of his sister, Mrs. R. K. James.

Texas Clip of Fall Mohair Under Way

Seven Million Pounds Estimated to Be Approximate Clip of Texas Fall Hair

The fall clip of mohair, some few clips of which have been shorn down in the Bracketville, Uvalde and Del Rio country, was estimated at seven to seven and a half million pounds by J. M. Lea, representative of Draper & Co., Boston representatives of the National Wool Marketing Corporation. He said the clip was expected to be good.

The cost of shearing the mohair has been reduced, Lea said. It had been six cents a head but is now five cents in most sections.

Texas has thirty-six towns and cities of more than 10,000 population. Seven of them are newcomers in the list and one of them had only 987 inhabitants ten years ago.

W. M. Pierson, who ranches on the Ft. Terrett ranch, transacted business here the first of the week.

Endurance Gives Out—On One Side— By Albert T. Reid

Utilities Announces New Rate System

Will Affect Twenty Per Cent Reduction on Second and Third Blocks

Abilene, Texas, Aug. 22.—A new system of domestic electric rates, measuring all service through one meter and affecting a 20 per cent reduction on the second and third blocks, has been announced from the general office of the West Texas Utilities Company at Abilene. The new rate schedule is effective on current billings.

With the object of encouraging a greater use of electric service, the new rate schedule allows a premium to those domestic customers taking fuller advantage of the conveniences of electric service.

The new schedule makes it possible to use all household appliances including electric refrigerators and ranges on a one-meter service. The company has been working the last two years adjusting its rate schedules through the properties so as to be able to perfect a plan allowing one-meter service and at the same time have a rate with a strong incentive for a customer to use several times as much service as under the old rate without materially increasing his total bill.

This is in line with long-established policies of the West Texas Utilities Company to lower rates as economies and increased business will permit.

It was pointed out that "costs are established by the customer's acts; by the amount of electricity he elects to use; by the time and place at which he chooses to use it, and by the duration of his use. The consuming habits of the company's patrons—and principally those patrons who comprise the domestic market—really control the cost of providing electric service."

The company plans to release, through the local newspapers in the towns served, a series of educational advertisements explaining the new rate schedule and enlarging upon the economical conveniences of increased electric service.

COACH TED WHITE WEDS BROWNWOOD GIRL

Announcements were received here this week announcing the marriage of Miss Jessie Ray, of Brownwood, to Mr. Ted M. White. The wedding took place in Brownwood, August sixteenth.

Miss Ray is the daughter of Mr. and Mrs. T. F. Ray, prominent citizens of Brownwood.

Mr. White has been coaching athletics in the Sonora schools for the past two years, and during that time he has made many friends. He developed a winning football team last year, and has been successful in other athletics.

The News, with their many friends, wishes them well.

ALDWELL BROS. SHIP 2,700 MUTTON LAMBS

Twenty-seven hundred head of February mutton lambs were loaded here Wednesday by Aldwell Brothers for Emporia, Kansas, feed lots. Nine double decked cars were required in moving the sheep.

Aldwell Brothers sold 2,000 February ewe lambs to Charlie Hull of this city at private terms. Mr. Hull will receive the lambs in October and take them to Kinney county where he will put them on his father's ranch.

Two cars of ewe lambs and two cars of aged ewes were loaded Wednesday by Aldwell Brothers to go to Lea Aldwell's ranch near Barnhart for grass.

PREACHING SERVICE AT LA VISTA THEATRE

Sunday morning at 11 o'clock Rev. W. B. Gray, D. D., pastor of the first Presbyterian church at Eldorado will preach at La Vista Theatre. Mrs. Steve Heather, of Brownwood, will sing. Dr. Gray is one of the leading ministers of the state in his denomination and has recently given lectures on trips to some of the Mediterranean countries which he visited last summer. Mr. Hether is a popular young singer of Brownwood.

LLANO BOOSTERS HERE WITH A 20-PIECE BAND

SONORA LIONS HOSTS TO THE BOOSTERS WITH LAMB BARBECUE DINNER

The Llano municipal band, composed of 20 members, and directed by D. W. Sauer, visited Sonora Wednesday, arriving at 11:30. A street concert was given after which the visitors were taken to the Methodist church where a luncheon of barbecued lamb was enjoyed.

The luncheon was presided over by Lion President J. D. Lowrey, who introduced Lion Caldwell. Lion Caldwell extended the hand of welcome and proffered the keys of the city. The response was made by Director Sauer, who spoke for several minutes. He told of the many advantages which his town had to offer; of its vast natural resources and the many industrial enterprises. His invitation to visit Llano was very broad and covered a lot of territory. Director Sauer took opportunity to praise Sonora and its representative club, for the manner in which his boosters had been received and entertained. Several visitors also made short talks.

After the luncheon the band rendered a short program which was heartily enjoyed. During an intermission Mr. Sauer talked band for Sonora. He said he was not open for an engagement, but wished to say that if Sonora ever succeeded in having a band an instructor would have to become a resident of the town in order to give the organization his full and undivided attention. Mr. Sauer has two bands in Llano and one in a nearby town.

The boosters left shortly after the luncheon for Del Rio where they played an engagement. Members of the Llano Chamber of Commerce making the trip with the band were Albert Schlormer, John Cumming and J. R. Decker.

MURPHY SPOKE HERE THURSDAY FOR STERLING

CITED FERGUSON RECORD AND PRAISED ROSS STERLING

E. E. (Pat) Murphy, who made the race for congress, spoke to about a hundred people here yesterday afternoon in front of the Corner Drug Store. During the middle of his speech Mr. Murphy was forced from the street to shelter when a light shower fell. Mr. Murphy's speech was interesting, condemned the Fergusons on their past record and what they were promising if elected to the governor's office again.

Mr. Murphy said that he was not being paid one penny to campaign for Sterling, and that the reason he was aiding the candidate for governor was that he believes in good government.

In condemning the Fergusons, Mr. Murphy obtained his information principally from the state records. He told of the Fergusons letting road bond contracts for sums that exceeded by four times those let while Sterling was chairman of the highway commission, and that Moody had recovered \$600,000 for the state.

Fergusons pardon record was discussed when Mr. Murphy said that about 4,000 criminals had been pardoned while "Ma" was in the governor's chair. "These criminals," he said "were composed of bank robbers, murderers, rapists and many other undesirables to prey upon the good people of Texas."

In his speech he drew fire from a few of the Ferguson supporters, but none of them challenged Mr. Murphy for debate.

J. F. Dexter, president of the Dexter Construction Company of Dallas, arrived last night in his airplane. His company has the contract to top 22.3 miles of road from Sonora to the Edwards county line.

PERSONALS

Miss Glenda Baker, of San Angelo, is visiting Miss Jo Nell Miers this week.

Misses Grace and Fay Walker, of Hillsboro, were guests at the Sykes ranch this week.

Mrs. Ellen Baker is visiting her granddaughter, Mrs. Taylor Emerson, of Big Lake.

Mr. and Mrs. Louie Stuart were visitors here Monday from their ranch east of town.

Mrs. Jack Earhart visited relatives and friends in San Angelo the first of the week.

Mrs. Gus Love has as her guest this week her brother, Paul Garrisonson, and wife from Medina.

Mr. and Mrs. R. W. Perrine were in Sonora Tuesday from their ranch in the eastern part of the county.

Mrs. W. E. James returned today from a two weeks' vacation trip spent in Mississippi, Alabama and Florida.

Mrs. Sim Glascock is in Del Rio this week with her mother who had the misfortune of getting a bad fall.

Friends of Mrs. Edgar Shurley are sorry to know that she is not doing well, and hope to see her recover soon.

Mrs. Anne Wynn, of San Angelo, and grandson were here this week, the guest of her sister, Mrs. Clyde Gardner.

Mr. and Mrs. O. B. McCalmont and children have returned from their vacation trip to San Antonio and other points.

Mr. and Mrs. Jack Sykes are the proud parents of a seven and one-half pound baby girl. Mother and babe are doing splendidly.

Mr. and Mrs. Frank Jackson, of San Angelo, were visitors this week in the home of his parents, Rev. and Mrs. F. M. Jackson.

Miss Madeline Cawyer, who has been a guest of her aunt, Mrs. Clayton Puckett at the ranch, left Tuesday for her home in Brady.

Mr. and Mrs. Bob Vicars returned Thursday from Mertzon where they had been visiting with Mrs. Vicar's sister, Mrs. Mans Hoggett.

Mr. and Mrs. Byron Newby and small son, of Batesville, visited here this week with Mrs. Newby's parents, Mr. and Mrs. Hi Eastland.

Miss Bernice Stokes, after a two-weeks' visit to the Gulf coast with her uncle and aunt, Mr. and Mrs. Joe Bridges, returned home Saturday.

Miss Laurel Persons and Miss Katherine Smith, of Hico, are here this week, the guests of Miss Greta Cawyer at the Clayton Puckett ranch.

Mrs. Herbert Blackwell and children arrived Tuesday from El Paso to spend a week with Mrs. Blackwell's mother, Mrs. Hugh Rutledge.

Mrs. Geo. M. Hopkins and three children, of Denton, are here this week, the guests of Mrs. Hopkins' father and mother, Mr. and Mrs. W. J. Fields.

Mr. and Mrs. E. W. McNutt and daughter, Miss Edith, of Amarillo, were visitors this week in the home of their daughter, Mrs. R. W. Gilliam and family.

Mrs. Nettie Marion left Friday for her home in Greenville after a visit of three weeks with her son, Vernon Marion, and sister-in-law, Mrs. Geo. B. Hamilton.

Mrs. Josie McDonald, proprietor of a hostelry here that bears her name, visited in Del Rio last week with her son, Dr. McDonald, prominent dentist of that city.

Mrs. Ada Brusenhan, of Coleman, is here this week for a visit with her son, Robert Brusenhan and wife. Mr. Brusenhan is a pharmacist at the Corner Drug Store.

Mr. and Mrs. W. C. Bryson, of Uvalde, were here this week on business and visiting with friends. The Brysons formerly owned one of the Wilson ranches south of town.

Mr. and Mrs. Billie Wyatt and small son, of Uvalde, passed through here Monday on their way to San Angelo. Mr. Wyatt said his range was getting dry, but stock were not suffering.

Mrs. Johnny Hamby returned last Friday from Burnett where she had been visiting with her sister, Mrs. Carl Morrow, and mother, Mrs. Stella Stanley. Carl Morrow, former Sonora druggist, accompanied Mrs. Hamby to Sonora.

Mr. and Mrs. O. K. McCawley of Cuero, and Miss Eula Williamson and Howard McKellar, of Austin, were Sunday morning guests of W. E. James. The party was

enroute for a vacation trip through California and other western states.

Mr. and Mrs. T. L. Miller, of Big Lake, were here Tuesday and Wednesday, guests in the home of Mrs. R. K. James. Mr. Miller recently underwent an operation at the San Angelo Hospital. From Sonora they went to the Gulf coast for a vacation.

Mr. and Mrs. Robert Halbert and daughters, Misses Allie and Bobbie and Miss Annella Stites returned Friday afternoon from a trip to Colorado. Mr. Halbert has 2,800 ewes and lambs in Colorado on grass that he expects to fatten for market. The sheep are above the timber line and will have to be moved before September on account of the heavy snows in the mountains.

GRATEFUL LADY PAYS TRIBUTE NEW KONJOLA

Now Giving This New and Different Medicine to Her Children Read Her Statement

MRS. J. D. RHYNE

There is a reason why Konjola is America's best known medicine, and that reason can be summed up in just three words—Konjola makes good, even when all else tried has failed. Consider, as a typical example of Konjola's 32 ingredients at work, the case of Mrs. J. D. Rhyne, 616 East Eleventh street, Amarillo, who says:

"I was in a terrible condition for many years, with constipation, nervousness, indigestion and kidney and liver ills. It seemed no use to try medicines and treatments further, for I kept growing worse right along. I lost weight and had headaches and dizzy spells and bilious attacks. Food caused indigestion, and many a night I lay awake until two or three o'clock. But words cannot express my surprise over what Konjola did for me. All of my ills have vanished and now I am giving Konjola to my children, and my husband is about to start the treatment."

Konjola is a medicine for all the family; old and young. That is why Konjola is a household word in tens of thousands of American homes.

Konjola is sold in Sonora at the Corner Drug, and by all the best druggists in all towns throughout this entire section.—Adv.

HUMBLE LETS CONTRACT FOR STATION IN SONORA

Humble Oil & Refining Company has let a contract for a wholesale oil station here to Murphy & Murphy of Mineral Wells. The contract was for a bulk sales station. This company plans other construction work in the near future.

O. A. Carr, agent for the Humble Oil & Refining Company at San Angelo, will have charge of the station here.

ATTEND CO-OP MEETING IN EL PASO FRIDAY

C. H. Evans, manager of the Sonora Wool & Mohair Company, and Ed C. Mayfield, president of that firm and also president of the Sonora Wool & Mohair Marketing Corporation, will leave Friday for El Paso to attend a Co-op meeting.

J. C. Rigney, of Lubbock, was here the first of the week the guest in the home of his father-in-law, J. D. Eaton and family. Mrs. Rigney has been here for several weeks visiting with her parents.

Will Eaton and wife, of Real county, visited in the home of Mr. Eaton's parents, Mr. and Mrs. J. D. Eaton and family. Mr. Eaton has sold his livestock and leased his ranch in Real county. He received \$4 for his goats and \$3 per head for his mixe dsheep.

Paul Turney and wife were business visitors in Sonora the first of the week.

With the Churches

BAPTIST CHURCH

Our Sunday school meets at 10 a. m. I hope that every teacher can be present. Preaching at 11 by the pastor. No preaching at the evening hour on account of the meeting.

J. O. McMILLON, Pastor.

METHODIST CHURCH

Sunday school 9:45 a. m. M. O. Britt, Supt.

Preaching 11 a. m. and 8:30 p. m. by the pastor.

Epworth League 7:45 p. m. Missionary Society meets Wednesday, 3:30 p. m. Mrs. Merton Shurley, president.

You are welcome to all these services.

F. M. JACKSON, Pastor.

BAPTIST W. M. S.

The Baptist Missionary Society met with Mrs. Gus Love at the Sol Mayer ranch Wednesday of this week. A very interesting and instructive missionary program was conducted by Mrs. J. O. McMillon.

The hostess assisted by Mrs. Clarence Love served an ice course to twenty members and guests.

A. B. Shoemaker and wife were in Temple and Waco this week. Mr. Shoemaker went to buy corn, while Mrs. Shoemaker visited with friends.

NOTICE! NOTICE!

Time for planting fruit trees, shade trees, shrubbery and roses will soon be here. Look over your need, I will call on you in the early yards and beds and see what you part of August.

SONORA, TEXAS

PRIEST SELLS INTEREST IN ROUNTREE COMPANY

O. F. Priest has sold his interest in the Dr. Rountree Stock Medicine Company, and will no longer be connected with that firm, he stated Tuesday. Mr. Priest has not decided what he will do, but said that he intended to remain in Sonora and engage in some business. In speaking of Sonora, he said he had been living here seven months, and liked the town and the people

and thought Sonora had a wonderful future.

Andrew Moore, of San Angelo, is succeeding Mr. Priest here as salesman for the Rountree Company, and it is understood that he will move his family here next week.

Lea Aldwell was here from San Angelo Wednesday when he and his brother, Roy, loaded 2,800 mutton lambs for Emporia, Kansas, for feed pens.

"Quality—Quantity—Service"

Miss Nobody From Nowhere
By Elizabeth Jordan

SIXTEENTH INSTALLMENT

"Then prove it. Open your mind and take in the fact that sterner measures are necessary. The important thing now isn't what you think, but what you've done. Have you done what I told you to do?"

"Yes."

"How did you manage it?"

"Well, I got the clothes from the East Side apartment. The janitor let me have them for a consideration," Eric finished with a wan grin.

"Now don't go up in the air, Doctor," he begged; "but I've simply got to make a suggestion and you've got to listen to it. I want to have a consultation before you go ahead with this experiment. I want you to discuss the case with two or three of the best psychiatrists in New York—the associates you have the greatest faith in—and see what they think of your experiment. I'll leave the selection of them entirely in your hands, but as I shall pay their fees I want the privilege of hearing what they say."

"A consultation now would excite her and to that degree might imperil the success of my experiment. That's why I didn't arrange it. But I've been wishing they could see her," Carrick admitted, "and since you feel that way I'm wondering if we could have them study her without her knowing it. Could you have all four of us to dinner tonight as friends of yours?"

It was an unusual dinner.

It is difficult to carry on a dinner conversation with a person whose conscious life is less than a month old. Again and again Mayer came up against the black wall.

He retreated from it so tactfully that he seemed not to touch it. But he learned young Mrs. Hamilton's present preferences, and something about the recent plays she had seen as well as her impression of a new book or two, and his interest in her deepened. He was vastly impressed as Carrick had been, by the poise and dignity of this groping figure that moved toward him through such a fog. His vivid imagination pictured himself as a victim of this girl's experience, and the flesh of his scalp tingled.

An hour later, in the hotel writing room, the physicians, joined by Carrick, passed on their conclusion to Hamilton. They were very frank with him.

"No one can promise you anything," Hazard confessed, "except that the experiment will not do Miss Carrington any lasting harm. If she had not wrung a promise from you to the contrary, we would suggest that her manager should be told the whole situation and consulted. But as there is in the case the element of his passion for her—"

Hamilton felt self-conscious. "And her obvious fear of him," he pointed out.

"Exactly. Considering those things, it would be better, perhaps, to proceed as Doctor Carrick suggests. The alternative is to let matters drag alone, and in that case you will certainly have to take Mr. Henderson immediately and fully into your confidence."

"Yes," Hamilton regretfully admitted; "I see that. We can't keep him in the dark any longer."

Carrick made no secret of his jubilation over the concurrence of his colleagues in his plan.

"Then we're all set," he declared. "I have an answer to that telegram I sent this morning to the Chicago hospital. We can stage our experiment the day after tomorrow if this fine weather holds, as I think it will. Ready for your part of it?"

"Of course." But Hamilton spoke from a black depression. He was still horribly afraid of that coming experiment, and he did not care how many doctors knew it.

The day set for the test was of the warmly mellow type that sometimes comes as the last gift

of a dying September. To that degree Nature worked with Carrick, as he pointed out to his nervous young assistant.

It was easy for Eric to persuade Eve to take an automobile spin early that morning; easy to drop unobserved, in the back of the roadster, the carefully packed suitcase; easiest of all to turn from the city's roar, flash out across Long Island, and bring up at a remote stretch of beautiful seacoast that lay shimmering but lonely in the sunshine. Indeed, it was almost deserted. Only two figures, women in bathing suits, gave life to it.

"It's rather late in the season for bathing," Eve said, with a glance at the backs of these ladies. She spoke with a great effort, her eyes away from the water.

"Those nurses are almost too realistic," he muttered.

"It won't be October till tomorrow, and people bathe on this coast till the ice forms," Hamilton reminded her. "There's a bathing club called the Polar Bears or something of the sort."

"I . . . I don't think I want to stay here," Eve faltered.

Apparently Hamilton failed to hear the words. He stopped the roadster, jumped out, and offered her his hand.

"Let's sit down a little while and look at the sea," he casually suggested. As she reluctantly descended from the car he added, "You settle comfortably in the sand while I park the machine on the other side of that bank."

He was not sure of his voice, for his nervousness was increasing. He could see that Eve was shivering—that a slow tremor shook her entire body as she now turned and stood staring at the ocean. There was a rowboat rather far out—too far for her to see what was in it.

She followed its progress with quickening breath and eyes that steadily widened.

Eric got into the roadster and started the engine.

"It may take a few minutes to park and lock this," he called to her over his shoulder. "I'll be back as soon as I can."

He caught one look she turned on him as he drove away, and he never forgot. But he set his teeth and played his part of Carrick's drama. The next moment he was out of sight around the bank, where Carrick, Mayer, and Hazard were awaiting him behind another bathhouse, in company with a rowboat and a lifeguard in bathing trunks. If, in her growing panic, Eve had followed him she might have discovered them all; but both Hamilton and Carrick had rightly reasoned that she would not do this. She ceased to think of him after that one wild look. Still violently trembling, she stared out to sea.

When the distant boat overturned she did not need the shrieks of the two women on the beach to tell her of the accident. Yielding to something as definite as the push of powerful hands, she kicked off her pumps, threw her hat on the sand, and was running into the water even before the women cried out. Their shrieks were excellent ones; and the urgent appeals to "save the children," which they sent after her as she began to swim, could not have been more realistic. They drew to the spot the only natives in that lonely region—two men whose zest for rescue had to be sternly dealt with by Carrick.

"Moving picture stuff," he curtly explained. "Merely rehearsing a scene. Get out, or sit down and keep quiet."

They sat down and kept quiet while the lifeguard got the rowboat into the water with the assistance of Hamilton; and one of the two nurses in the bathing suits bore Miss Carrington's pumps into the convenient bathhouse. It was an unusually well-fitted bathhouse, for it held not only a fine assortment of Turkish

towels, but a cot, an alcohol stove with a kettle of hot water on it, a thermos bottle full of coffee, and a suitcase containing dry underwear, stockings, and the gown and hat Eve had worn on the day of her memory lapse.

One of the nurses was Miss Adams. The other, who had arrived from Chicago late the night before, was not so imperturbable as her professional sister. The shrieks she still sent after the swimmer, to preserve the proper atmosphere, had the ring of genuine excitement.

"I've never been so thrilled in my life," she confessed to Miss Adams, "or so nervous! You see, I nursed her for ten days, and I got very fond of her."

Miss Adams let her finish and then sent forth another shriek. It was a fine, full-voiced, far-carrying outcry, meant to emphasize the difference between nerves in New York and those in Chicago. Notwithstanding her agitation, the Western nurse caught the idea and promptly topped Miss Adams' shriek with a better one. Emerging from behind the sand-bank with

his associates, Dr. Carrick grinned nervously.

"Doctor, she may get tired. Hadn't I better swim out there, to be on the safe side?"

"Don't be an ass. A lifeguard is just behind her, there's another strong swimmer back of the cap-sized boat, and Miss Carrington herself is cutting through the water like a fish. What more do you want?"

Why worry when a want ad will solve the problem

?

If you need a job or want help, have lost an article or found one, want to exchange an article for another, want to find the whereabouts of a lost relative or friend—whatever perplexing problem may face you, the surest way to solve it is to place a WANT AD in this newspaper. Past experience proves that they bring results.

PUZZLES FOR SPELLERS

Years ago one of the tests of a "good speller" was his or her ability to spell such words as "Constantinople" and "Christiania" correctly. But the young people of today have some altogether new problems in spelling.

There isn't any Constantinople any more. The name of the old Turkish city has been changed to Istanbul. Likewise Norway has thrown Christiania into the discard and calls its great port Oslo.

To simplify the use of foreign place-names and make their spelling easier to those familiar only with their own tongue, the English centuries ago coolly changed the names of many places on the Continent. They altered Roma to Rome, Napoli to Naples, Firenze to Florence, Livorno to Leghorn, Wien to Vienna, and Gravenhage to The Hague. We in America have followed that style, but now that international relations are closer than ever before and the nations of Europe are feeling their individual importance more than ever, an international movement has been set on foot for the uniform spelling of place names everywhere.

The standard, of course, is that of the local official usage. Thus the town in Silesia which the Germans called Lemberg now appears in Polish as Lwow, and you can guess at the pronunciation as well as anybody else can. The Finnish people resent the use of Helsingfors, a Swedish corruption of their own name of Helsinki. On old maps you will find a town in Europe called Philippopolis, but Poles are incensed if you write it any way except Plovdiv.

The patriotic young republic of Estonia has changed the name of its capital from Reval to the more ancient name of Tallin. Smyrna is no longer spelled correctly except as Izmir.

The United States government is trying to get people used to these modern and corrected spellings. The U. S. Board on Geographic Names has in preparation a complete list which will be available in a few months for everybody interested. But so long as the old maps and geographies are in existence, there will always be a high percentage of children growing up to be familiar with the Anglicized spellings that are not only out of date but incorrect and, moreover, offensive to the nationals of the countries which they misrepresent.

THE BOOK OF BOOKS

We hear a great deal of loose talk about the decline of religion.

People are no longer interested in the ancient beliefs, so the critics of religion say. The church has lost its hold and nobody reads the Bible any more, if you believe them.

It is encouraging, therefore, to those who hold fast to the faith of their fathers, to learn from the report of the American Bible Society that more Bibles were sold and distributed last year than ever before in the history of this great organization.

The figures themselves are amazing. Eleven million, one hundred and two thousand Bibles in 179 different languages were printed and distributed by the American society last year, while the British and Foreign Bible Society in the same period distributed nearly twelve million. In the United States alone more than four million Bibles were bought by people, presumably, who wanted to read them. That does not sound as if interest in religion were dying out.

As a matter of fact, more people are reading the Bible than ever before. Whatever other religious books they read, they must have the Bible. It is the Book of Books in every sense of the word. No "best seller" ever approached it in point of sales; none of the standard classics has endured in popularity as has the Bible.

Consciously or unconsciously, almost everybody who speaks the English language quotes from the Bible almost every day. The words and phrases, proverbs and other quotations of every-day life, a good half of all the allusions in modern literature, are from the King James version of the English Bible. For that reason, if for no other, familiarity with the Bible is an essential part of the education of everybody who would call himself an educated man. One not familiar with the Book of Books loses the savor and the intimate meaning of half of the world's great literature.

We have not found any better way of expressing many of the great truths and eternal facts of life than the way in which they are expressed in the Bible. How a single phrase expresses the whole ideal of tolerance: "Let him that is without sin among you cast the first stone." Or how has the penalty of evil-doing been better phrased than in: "Whatsoever ye sow, that shall ye also reap?"

The Bible out of date? It is the only book that is always and forever up to date. And that, beyond doubt, is the reason why it outsells all the fiction and all the philosophy of the moderns.

THE "LITTLE RED SCHOOL HOUSE"

It is becoming more and more the custom for people on their summer vacations to go back, for a brief visit at least, to the homes of their childhood. Perhaps that is because automobiles and motor highways make it easier to do that than it used to be, perhaps it is because city folks are beginning to realize that the country towns they came from are changing, growing themselves into cities, and that soon the old landmarks will be gone, swallowed up by the relentless maw of Progress.

One of the vanishing landmarks is the old fashioned country school. The old schoolhouse—we don't

SAYS WILLY ROGERS

BEVERLY HILLS.—Well all I know is just what I read in the papers. And outside of the thermometer reports, there just ain't much in the newsprint nowadays. This heat thing accompanied by drouth has had everybody pretty had scared up. Course there is not much a man can do when its heat thats bothering us. We can advise everybody to sit in the shade, and avoid the sun as much as possible. Then if its rain they need my advise them to raise crops that dont need much rain.

There has been a good deal of trouble out in the Dakotas about the history that our ExPresident had supposed to write on a rock. It was to run 500 words and give the history of America and still not go into details.

Well the Scriptor didnt like the history that our ExPresident had cooked up so he made as we say in the eighth art, (the Movies) why he made some re-takes on the manuscript. It seems that Mr. Coolidge had with an eye to future Campaigns given our History from a Republican standpoint. There had been Democrats engaged in our history but only in the capacity of Villains.

Well, poor Dakota didnt know what it was all about, all the interest they had in the matter was to furnish the Mountain. They just wanted something that a Tourist could read, or have read to him. In fact the more controversy the more would come to read. The Dakotas just said "we got the rock. Print an Aimee McPherson sermon on it. Just so somebody will burn out his break bands to come and see it." If they leave the Coolidge version on there, they should advertise it. "Come and see the Republican history of America in 500 words."

See where one of these young boy tree sitters has just passed his 500 hours sitting in a treetop. There is a good deal of discussion as to what to do with a civilization that produces prodigies like that. Why wouldn't it be a good idea to take their ladder away from them and leave 'em up there?

Pretty near all of us out here in California during these hard times are selling our homes, and they tear 'em down and put in these prema-

ture golf courses. You can't sell for much, but they give you a free ticket to play. The jails are putting 'em in now to get prisoners' minds off mutiny.

Say, that little jacking up I gave Mr. Hoover about the weather did some good. You know these Republicans just get careless that way. They are so used to running everything for so long they just think it will go without them.

China is having a new war, and we are having trouble getting into it. We always have gunboats there, so if there is any shooting why one of our boats will be shot at and that gives us the usual alibi.

But this time it seems we only had one gunboat and it had to manoeuvre around for days before it could get in the line of fire.

Now, Mr. Hoover being a business man, I bet you he takes that Senate and House of Representatives space in the Capitol building and turns it into miniature golf courses.

Would you believe it, there is 3,500 of 'em in the city of Los Angeles. Then people ask what's the matter with this country. Nothing, only there is millions got a "putter" in their hand when they ought to have a shovel.

Half of America is bent over. In two more generations our children will grow upwards as far as the hips, then they will turn off at right angles and, with their arms hanging down, we will be right back where we started from. Darwin was right.

I thought the California papers were exaggerating, as usual, the heat in the East, but I guess the rascals were right at that. What has the poor farmer done against the Republican administration that he should deserve all this? If it's not the boll weevil, it's the tariff. If it's not the cinch bugs, it's the Federal Reserve. If it's not relief he needs, why, it's rain. But there's one pest that he is always free from; that's the income tax.

those who never had such advantages.

Somehow the old fashioned country school seems, in perspective, closer akin to the pioneer spirit which is the spirit of America, than any modern structure with its graded classrooms, steam heat, electric light and wholesome ventilation. But, like the ox-team and the covered wagon, it is disappearing. Our advice to every reader who ever attended such a country school is to take a good look at it this year, for next year it may be gone forever.

BAKER SELLS HEIFER YEARLINGS AT \$30

Sterling Baker has sold and delivered 99 head of heifer yearlings to a Mr. Franke, of Uvalde, at \$30 per head. The animals were loaded here the first of the week on Santa Fe cars and were shipped to Uvalde.

There has been little livestock trading in this section lately, but it is thought that the feeder buyers will be here next month making purchases.

Bread Best Single Food

(By Caleb Johnson)

That "bread is the staff of life," is an old saying familiar to everybody.

It was a wise man, whose name I have been unable to find, who added, "but bread and butter is a goldheaded cane."

For the experiments in diet conducted by the United States Public Health Service, while they indicate that the nearest approach to a perfect food is whole wheat bread, fully bear out the truth which is set forth in the Bible, in both the Old Testament and the New, that "man cannot live by bread alone."

There is no single perfect food, though there are so-called "diets" and food experts who claim that all bodily needs can be satisfied by a single substance. If that were so, and we could find that substance, what a carefree world this would be! No more worry about choosing our meals, only one thing to grow to feed everybody—it would be marvelous. But that isn't the way Nature works, the men at Washington say whose business it is to keep their finger on the Nation's pulse.

There are only a few substances which contain the proportions of protein and the fuel foods necessary for human needs.

If, for instance, you eat enough beef to satisfy the protein needs of the body and eat nothing else, you will have an insufficient supply of fuel. If you eat enough beef to supply the fuel needs of the body you will take in too much protein. On the other hand, if you try to live on fruit you will have to eat about the equivalent of 35 pounds of apples to supply the necessary protein whereas 9 pounds would supply sufficient energy but there would be a shortage of protein. Baked potatoes, onions, corn, almonds and bread approach a balanced diet, but even these fall far short. Potatoes and corn alone would have to be consumed in quantities to meet the needs. Made of whole grain, comes the nearest, perhaps, of all food articles to furnishing a balanced food diet of satisfactory bulk. With bread is included a variety of flour preparations such as macaroni, biscuits, Vienna rolls, and crackers, but to try to live on these alone would be manifestly absurd.

If we cannot live on bread alone, certainly we shall not be able to find any other one substance that will meet the dietary requirements of the day. It is necessary to combine high protein foods with low protein foods in such proportions as will furnish bulk, the proper nutritive ratio, and will, at the same time, suit the taste. Protein foods are, as you know, mostly of animal origin and foods low in protein value are mostly vegetable origin. A balance ratio, selected to meet all three requirements, bulk, protein ration, and taste, is likely, therefore, to contain materials of both animal and vegetable origin. At any rate it is only by means of a mixed diet that we are able to maintain a satisfactory ration. For infants milk is, of course, a complete food, especially mother's milk—but as the child develops this even does not suffice.

A large part of the malnutrition in children is due to the lack of a balanced diet. People who are unacquainted with the importance of a balanced diet often purchase food entirely on the basis of appetite or the temptations of market. Also there are those who are so poor as to be unable to buy anything but the cheapest articles to be obtained and such persons often suffer from malnutrition.

In the case of school children the indulgence of the appetite in an excessive amount of sweets and the consequent throwing of the diet out of balance has been found to be one of the most frequent causes of malnutrition. The resort to cheap foods may lead to malnutrition through an excessive amount of starches. Starchy foods are usually the cheapest foods that can be purchased, and while good foods, should not be used to excess.

There are two serious objections to the excessive use of meats. The first objection is concerned with the chemical side. There are substances produced in the digestion of meat which may prove to be injurious to the cells of the body, particularly if too much is eaten. Some individuals are able to throw off these substances more easily and as a result do not suffer. Other people, however, accumulate these products in the body until they result in injury.

With the excessive use of meat a person is likely to accumulate an

excess of protein. This is a danger which should not be minimized because any excess of proteins, unless burned up by physical exercise, must be thrown off from the body by the action of the liver and kidneys because the body has no way of storing up a surplus of proteins. If we take too much fat or carbohydrates we are usually able to convert some carbohydrates into fat. This is deposited in cells under the skin, and likewise should be gotten rid of by proper habits of exercise.

Most of us sedentary habits could probably get along with much less meat than we use and most of us would probably benefit by reducing the amount of meat in our daily diet. Some people depend more upon meat than do others and in favor of meat it may be said that proteins which are contained in meats are apparently more easily digested and more easily absorbed than are proteins contained in vegetables.

There is an old superstition that has gained much general credence. You probably have heard it said that "every part feeds a part," that is, that certain foods should be eaten for the benefit of special parts of the body. Some people believe that beef should be eaten to develop muscles, fat should be eaten to preserve the hair, fish should be eaten for brain food, and celery for nerve food! If you stop to consider that in the process of digestion all carbohydrates are changed to simple sugars, all fats to simple soaps and glycerines, and all proteins to simple nitrogenous compounds you will see how absurd it is to claim a special value for one kind of food in connection with the building up of any special part of tissue.

All products of protein, fat and carbohydrates after digestion are distributed in great measure, without discrimination by the blood, and the cells of the body draw their supply of nourishment from this general store.

Another fact should not be lost sight of. Ordinary food materials contain an abundance of salts in their natural condition and it is rare to see a person suffering from lack of minerals in the diet. With the development of manufacturing processes, however, and the overrefinement of certain foods which are prepared for the market, some lime, much of the phosphorus, and other of the mineral substances are frequently lost. The advice holds that the nearer you can secure your foods in nature's original packages the less you need to concern yourself with your ration of minerals for the day.

It should be borne in mind that the digestive system is subject to individual peculiarities but that there are some woods that are more easily digested than others. Milk contains fats, carbohydrates, proteins and salts in a very easily digested form. Milk proteins and fats of all kinds are digested with relative ease but the protein and fats of meat are inclosed within cell walls. The material of which these cell walls are composed is not easily digested. In cooking much of this material is broken up but here again the manner of cooking has an influence upon digestion.

Emil Vander Stucken, young attorney of San Angelo, was here Tuesday on business, and visiting with relatives and friends.

W. D. Young, DeSoto automobile salesman of San Angelo, was in Sonora Tuesday.

The Very Latest

(By Mary Marshall)

A faggot is a bundle of sticks of the sort that poor little girls in the story book gather when their parents are too poor to buy wood, and these selfsame faggots were sometimes used in crisscross or parallel arrangement to make small fences or palings. And so no doubt

came our use of the word faggoting to indicate a similar arrangement of embroidery stitches as used to connect two strips of material. No one knows where or when this sort of embroidery was first invented but it was doubtless a very long time ago and has always been well liked in France, the home of almost every sort of fine hand work.

Needless to say faggoting can never long remain out of style, and this season it has come up for a revival. It is used on many of the smart new dresses from France and is sometimes seen on the better sort of dresses made in this country. Some of the new collar and cuff sets show faggoting between strips of the material. A printed cotton dress may have a band of

white organdie attached by a row of faggoting or colored pique may have a band of white pique attached in the same way. The sketch shows a dress of printed chiffon with edge of plain colored chiffon attached by a row of faggoting done with fine rope silk.

If you are faggoting together two strips of material, then cut a strip of stiff paper, mark it off in straight ruled lines, and then baste the strips of material—which have been blind stitched in a bias or straight fold—neatly and firmly on it, a quarter inch apart, more or less as you want. Then work your faggoting stitches. After unbasting the paper, turn the frock wrong side out and blind stitch or hem down the material on the wrong side.

Several faggoting stitches are shown.

At the left is simple faggoting. Bring the thread up at the left side of the opening between the two pieces of material, bringing it down a little to the right, put needle through from the under side. Now take the thread back to the left strip of material, passing the needle under the stitch already made. Bring it up from the under side and down again to the right, passing the needle under the stitch just made. You can understand just how to do this by looking at the diagram, which shows the thread much enlarged.

In the center is a more elaborate stitch. The thread is carried from right to left, and then buttonholed back. You can make the buttonhole stitches close together or far apart. The result is a pretty sort of ladder.

The faggoting shown at the right is similar. Make a very loose ladder across from left to right. Then pass the needle and thread in the fold of the cloth forming the hem edge for a quarter of an inch. Bringing it out, catch it in the center of the completed ladder, take a stitch in the left margin, and buttonhole back again. The result is a ladder of x-like figures.

R. & W. BATTERY CO. IS IN NEW LOCATION

The R. & W. Battery Company, Monroe Wright and J. W. Rampt, is now located in the K. V. R. Scott Building behind the Gilport Hardware Company. This new firm is prepared to build and repair any make battery at prices that are charged by larger battery firms in the cities. They have recently completed making 100 new batteries

for various automobile concerns in West Texas.

In connection with their battery work they do repair work. Monroe Wright is in charge of that department, and G. W. Rampt, experienced battery man, is in charge of the battery department.

OZONA LIONS REGRET NOT HAVING PARADE

According to information received here, the Ozona Lions had planned to come to the Group 23 meeting here Monday in full force and dressed in their pajamas or shirt-tails for the big annual event.

One Ozona Lion was heard to remark that he believed the Lions at Sonora would gain nation-wide publicity in such an event. Other Lions clubs had anticipated wearing their pajamas and join in the parade.

The Sonora Lions, after much discussion, decided to abandon the pajama parade and postpone it indefinitely. It was voted a year ago, at which time the Sonora Li-

"The Supreme Authority"

WEBSTER'S NEW INTERNATIONAL DICTIONARY

Here's the EVIDENCE

Hundreds of Supreme Court Judges concur in highest praise of the work as their authority.

The Presidents and Department Heads of all leading Universities and Colleges give their endorsement.

The Government Printing Office at Washington uses the New International as the standard authority. High Officials in all branches of the Government endorse it.

The Colleges voted overwhelmingly in favor of Webster as standard of pronunciation in answer to questions submitted by the Chicago Woman's Club.

Equivalent in type matter to a 15-volume encyclopedia, 2,700 pages, 452,000 entries, including thousands of NEW WORDS; 12,000 biographical entries; 32,000 geographical subjects; over 6,000 illustrations. America's Great Question-Answer.

Get The Best At Your Bookstore, or send for free illustrated booklet. G. S. C. MERRIAM COMPANY Springfield, Mass.

ons paraded in their pajamas, to make the event an annual one.

R. W. K. Mallet, newspaper man of Boston, Mass., said here that if the Lions paraded in their pajamas he would see that the pictures and a story got into the Boston, Chicago and New York papers. Mr. Mallet believed that the parade would have been of much value to Sonora from a publicity standpoint.

BIG LAKE MAN WAS VISITOR HERE TODAY

J. M. Moore, former mayor of Big Lake, was a business visitor here today. Mr. Moore says that the Big Lake oil fields will likely be prorated, and if this is done it will affect Big Lake in a business way. He said Big Lake and the surrounding country was in need of rain.

**Earliest Hawaiian Map
Discovered in England**

The first recorded map of the Hawaiian islands has been brought to light in England, identified authoritatively and acquired for the Archives of Hawaii, a territorial institution, says the San Francisco Chronicle.

This map was drawn by Thomas Edgar, master of the sailing ship Discovery, which accompanied the Resolution, flagship of the famous James Cook, on the explorer's voyage to Hawaii. Cook brought his ships to anchor at Waimea, island of Kauai, in January, 1778, and about this time the map was made by Edgar. The log of the Discovery, nearly all written by Edgar, was recently identified in England, and was accompanied by various maps and drawings.

Edgar, as well as Cook, drew into his maps the details of only those portions of land that were seen, indicating other supposed parts by hazy outlines. The Hawaiians had no maps when the first white man came. They had no written language, yet were remarkably skilled mariners, traversing thousands of miles of open sea in their large canoes, steering by the stars, and with extraordinary knowledge of practical navigation.

**No Freedom of Worship
Under Peter Stuyvesant**

Early in his administration Peter Stuyvesant issued a proclamation forbidding the people to assemble for any religious service other than that of the Dutch Reformed church, which was the established church in the fort, writes P. B. Cole in the New York World, in telling "The Story of New York."

This law was vigorously enforced. Stuyvesant banished from the colony a Lutheran minister who had come from Holland to minister to the large number of Lutherans in the colony and even imprisoned Lutheran parents who failed to have their children baptized in the Dutch Reformed church.

Stuyvesant's iron hand fell heaviest, however, upon the Quakers, a large number of whom had settled on Long Island, in Hempstead. In this settlement was Robert Hodgson, who began conducting Quaker meetings among his townfolk. Stuyvesant haled him to New Amsterdam, and without allowing Hodgson to speak in his own defense, sentenced him to two years hard labor or a fine of 500 guilders.

Bees and Their Owners

Entomologists hold that there is nothing to the common notion that honey-bees recognize the beekeeper and distinguish him from other individuals. Although some bees hatched late in the fall survive the winter, the average life of a worker bee during the active honey season is only about six weeks, two of which are spent in the hive. It is not likely that a beekeeper would examine a hive frequently enough to be recognized by creatures with such short lives even if they had the ability to distinguish between different human beings. Good beekeepers do not provoke bees so much as others do because they are familiar with their habits and know how to handle them.—Pathfinder Magazine.

Subjection of Wives

Some 400-year-old rules for handling wives have been published in London in connection with the new book on Rabelais.

The rules were drawn up by Tiraqueau, friend of Rabelais, who had considerable experience with wives.

First of all, he sets forth the dicta that "woman is man's inferior."

Having established his premise, Tiraqueau goes on to say, "She is not to be struck or mistreated in any way."

"The wife is to be educated by example and by caresses mingled with severity. She may be threatened when necessary."

Dahlia Cultivation

Dahlia history commences in 1791, when Cavanilles, the dictator of the Botanical garden of Madrid, Spain, described the flowering of a set of dahlia roots received in 1789 from Vincente Cervantes of Mexico. Dahlias first reached England in 1789 through the agency of the Marchioness of Bute. This had little effect on the history of the plant, however, as all these plants perished from a lack of proper understanding of their needs. They were re-introduced successfully in 1804 through the interest of Lady Holland.

Oyster Cultivation

Oysters are now planted and cultivated like so much corn or turnips. Herbert F. Frytherch of the United States bureau of fisheries tells us that the oyster industry of the United States now constitutes its most valuable fishery, yielding annually about 73,000 tons of food, employing over 65,000 persons, and producing each year a crop valued at over \$14,000,000 as it is taken from the water. It is conducted, he says, in every seacoast state from Puget sound to San Francisco.

Ascribed to Franklin

"Co Ira" was a popular song of the French revolution. The words are of uncertain origin, one version probably being the composition of Ladre, a street singer. The air was a popular carillon by Buccourt, and a favorite of Marie Antoinette's. French writers say that Benjamin Franklin in speaking of the American revolution often used the expression "Co Ira," which means "It Will Succeed." The phrase was caught up by the French.

**REDUCTION OF
SHEEP HERDS
IS ESSENTIAL**

**BOSTON WOOL DEALERS SAY
THIS POLICY WILL BE
CARRIED OUT**

Boston, August 21.—Sheep growers are recognizing the fact that they must reduce their herds and it is apparent from reflections noted in this, the largest wool market of America, that this policy will be followed not only in the United States, but throughout the world in the next year.

Such a change, it is declared, would place the industry in a far better economic position. In support of this is instanced the tremendous decrease in the lamb price this year, the low price of wool all over the world, and the large number of sheep now on the ranges and the feed lots. Demand, according to market leaders, has failed to keep up with supply.

The lamb crop of 1930 was about 2,000,000 head, or 8 percent larger than in 1929 or 1928. The hay crop is short. The ranges are bare. Losses from lamb feeding operations last winter were heavy. The drought in the corn belt is reducing feed supplies in that region.

As a result the demand for stocker and feeder sheep and lambs is materially below that for the corresponding period of 1929.

Present indications point to a world wool clip in 1930 of approximately 3,240,000,000 pounds although this may be cut down by a drop in the Australian and the Union of South Africa are gradually increasing wool production. This is coming into acute competition with the shorn wool in the United States where the 1930 clip was 326,000,000 pounds. In addition, the carryover of wool in the five Southern Hemisphere countries will be well above that for the last four years. Stocks there are approximately 350,000,000 pounds, or 15 percent above those of last year. Stocks in London and Liverpool and Hull aggregate 550,000,000 pounds.

On the other side of the picture, there has been a decreased domestic demand for wool which has been reflected in reduced consumption and smaller imports. During the first six months of 1930 only 145,000,000 pounds were consumed,

a drop of 31,000,000 pounds as compared with 1929.

Wool prices have fallen 25 to 35 percent in the last year, although they are fairly stable at present. In view of these figures, the outlook for the sheep grower is temporarily beclouded.

The woolen manufacturer is still finding acute competition from the fur trade in women's coats, although the styles are favorable this year for a somewhat improved consumption of woolen textiles. The difficulty, however, is that many of the most successful woolen manufac-

turers are depending on Australian wool for their supplies and are going into the wool business themselves in the Southern Hemisphere, using the clips from their own flocks.

Frank James, who is employed in the Meinecke store in Ozona, was a guest Sunday in the home of his parents, Mr. and Mrs. R. K. James.

W. A. Miers and son, Willie, left Tuesday morning for points in West Texas looking for grass.

Now Prepared

To build any part of any make battery at reasonable prices. We have finished making new batteries for the following automobile companies:

Scott Replacement Company, San Angelo, 25; Evans Motor Co., Eldorado, 10; Auto Brokerage Co., San Angelo, 15; Powell Motor Co., Junction, 15; Ford Motor Co., Brownwood, 25, and rebuilding 10 for Stites Motor Co., Sonora. That is evidence of our ability to build or rebuild any make battery. All work is guaranteed. Mr. J. W. Rampt, experienced and expert battery man, is in charge of our battery department. All batteries are guaranteed for 90 days against defective material and workmanship, and a 12-month guarantee on adjustment basis.

AUTO REPAIR WORK

Is in charge of Monroe Wright, experienced mechanic who will guarantee every job to give satisfaction at reasonable prices. Give us a trial and let us convince you.

IT'S WISE TO  CHOOSE A SIX

**Announcing a new
production record**

2,000,000 Chevrolet Sixes now on the road

Since January, 1929, Chevrolet has produced over 2,000,000 six-cylinder automobiles—nearly five times the record of any other manufacturer over an equal length of time.

These 2,000,000 buyers have chosen Chevrolet because it offers scores of desirable qualities not obtainable in any other car so low in price.

Yet, despite its many fine car advantages, the Chevrolet Six is unusually economical. Its gas, oil, tire and upkeep economy is unsurpassed. And any model can be bought for

The Coach, \$565, f. o. b. Flint factory

a small down payment and exceptionally easy monthly terms!

Some Distinguishing Features

50-horsepower six-cylinder motor . . . full-length frame . . . four semi-elliptic springs . . . fully-enclosed four-wheel brakes . . . four Lovejoy hydraulic shock absorbers . . . dash gasoline gauge . . . Is Your Account Appreciated or Tolerated?

CREDIT

Is the Badge of Honesty

Credit came in with civilization—when man began to have faith in his fellowman. To revert to a no-credit plan would be equivalent to redersion to savagery. Germany lost the faith of humanity when she abused the faith all nations held in The Hague and other treaties.

The entire financial system is based on the faith men have in each other's honesty. YOU are a more or less important cog in the financial system of the country.

If you pay your bills promptly the whole set of machinery works right—if you don't pay promptly the machinery is disrupted and a certain cog may have to be removed.

CREDIT IS FOR YOUR CONVENIENCE!

It is the easiest thing in the world to get—if you play square—the hardest if you shirk your responsibilities.

Credit is based solely and absolutely on past performances.

If you have always paid your bills promptly you can obtain credit easily anywhere in Sonora or United States. It will make you feel better—it will strengthen your credit—and the financial machinery will function properly.

If you have evaded payment, even though your intentions are ever so good, you will be listed far and wide as "bad pay" and your credit is gone.

THIS IS THE TWENTY-SECOND OF AUGUST

HAVE YOU PAID YOUR BILLS?

All in two hours of Uvalde. Burns & McKinney, Uvalde, Texas. 42 2tc.

NOTICE TO PUBLIC

Dr. J. C. Anderson, state health officer, says that all children in cities and towns and rural communities should be immunized against diphtheria; that it is a disgrace to have so many children die from this easily preventable disease. In 1929 there were 446 children died in Texas from diphtheria. If that many white faced calves had died from blackleg there would have been a big campaign for inoculation, regardless of cost.

Children over nine months of age should have this protection before school begins. Those not financially able to pay for the serum will make the required affidavit and I will try to see that they get it.

A. G. BLANTON, County and City Health Officer.

Plant your dollars at home.

Miss Nobody from Nowhere
by Elizabeth Jordan

(Continued from page 3)

"I want this over," Hamilton groaned, eyes glued to his binoculars.

"So do I," Carrick admitted. Eve's mind held one idea and only one—the need of reaching that capsized boat. She could see no figures in the water, for the young fisherman who had been the boat's sole occupant was now up to his neck on the far side of it.

The two nurses continued to shriek.

Eve was very near the upturned boat when in response to a long whistle from shore the lifesaver at last put his back into his strokes and reached her.

"All a mistake, miss," he cheerfully cried out, repeating the lines taught him by the guys on shore. "There ain't no children there. There's only a man, and he's all right."

There was something funny about that, too, he reflected. If this was only a picture, why had he been told to learn and speak these words?

Eve got into the boat without difficulty and sat dripping in the stern, blindly looking about her. Her companion, having helped to right the other boat and rescue the oars, rowed her back to shore swiftly and in silence.

On the beach Miss Carrington found a waiting group of sympathetic and helpful strangers, who showed a solicitude for her welfare that would have surprised her if she had not been past reasoning. Four of them were men and two were women, the women who wore the bathing suits. These ladies hustled her into the convenient bath-house, and insisted on taking off her wet clothing and rubbing her down with coarse towels and giving her hot coffee which it appeared to be their pleasant habit to carry about with them, and urging her not to talk.

They also re-dressed her in dry garments—fortunately her own. She had an odd feeling of having entered the bath-house in garments that were not her own. The two women explained that these must have been bathing clothes. The clothes themselves had strangely disappeared, and she was now wearing her green and gold one-piece gown. . . . But where was she? What did it all mean?

The four gentlemen who had so opportunely been passing along the shore in a big automobile insisted on taking her home.

"I'm . . . at . . . the . . . Garland . . . I think," she managed to bring out. "But . . . how . . . did I . . . get here? . . . I . . . merely meant . . . to take . . . a walk . . ."

They were vague about that, but obviously they were also men to be trusted, and one of them said he was a doctor and made a fuss about cold and exposure and insisted on having her put to bed and given medicine as soon as she was back in her hotel rooms.

It was all a dream of course . . . a chaotic dream with something horrible in it. . . . There was a younger man in the group, with a tragic sort of face. . . . That face haunted her.

(Continued next week)

ARTHUR SIMMONS TO BUILD BRICK HOME

Material is being laid on the ground for a modern \$15,000 brick and tile home for Arthur Simmons at the ranch eight miles west of Sonora. Work is to start immediately on the eight-room residence. J. T. McClelland, local contractor has the labor contract and the West Texas Lumber Company is furnishing materials.

Sweetwater Editor Pays Sonora Visit

Millard L. Cope Sees Wonderful Future in Store for Little City of Sonora

Millard L. Cope, editor of the Sweetwater Reporter, was here Tuesday in company with his father, Teed Cope, livestock commission man of Eldorado.

Mr. Cope was well pleased with the progress Sonora has made during the past few years. It is his opinion that Sonora will be a much better and larger town since the Santa Fe laid its rails into this section. He thinks that this town will be one of the largest livestock shipping points in Texas, and will be a distributing point serving a large area.

The Sweetwater country is in need of rain, the newspaper man said, and crops will be short.

REFRIGERATOR PROVES WORTH AS FIRE VAULT

Necessity again proved to be the mother of invention when Griswold-Rogers, Inc., General Electric Refrigerator distributors, made the temporary substitution of an all-steel refrigerator for a safe as a fireproof storage cabinet for valuable business records. Hot checks can be seen in the super-freezer being restored to their proper temperature.

It has been repeatedly proven by fires in different sections of the country that a house may burn to the ground without melting the ice inside of the General Electric all-steel models, according to Mr. Rogers and valuables would unquestionably be safe from such a hazard inside a refrigerator of this type.

So, ladies, if you have treasured recipes, hubby's insurance policy or other valuables that you want to be sure will not be destroyed by fire while you are away on vacation, file them away in the refrigerator, provided, of course, that it is a General Electric "all-steel" model.—Ft. Worth Press.

Joe Hearne was up from his ranch below Fredericksburg Tuesday, and reports range in excellent condition in that country. Mr. Hearne recently traded his residence here to W. A. Miers for sheep. H carried his household goods to his new location Wednesday.

FARM STOCK

MOLDY BEET TOPS FED FARM STOCK

Used in Moderation Product Is Not Harmful.

Moderate feeding of moldy beet tops to cattle and sheep is not harmful, although excessive feeding may be dangerous, declare authorities at the Colorado Agricultural college.

For two years very moldy tops have been fed to calves in the college experiment station feed lots there without any indication of trouble, according to E. J. Maynard, associate animal husbandman. The calves have been eating 12 to 15 pounds each daily, of the moldy tops in the composite piles, as similar lots of calves did last year, Mr. Maynard says.

"Molds themselves are not harmful, but they tend to change the chemical reaction from acid to alkaline, thus allowing bacteria of all kinds to develop," says I. E. Newson, veterinary pathologist at the Colorado experiment station. "In rare instances botulism has been found in moldy silage, and of course the moldy silage has been blamed for the trouble rather than the botulism."

"Although we have done no experimental work with beet tops in the field, the same is probably true with them as with silage. In a reasonable amount, tops seem to be perfectly harmless, but when cattle get too many tops, trouble starts," continues Doctor Newson. "Certainly it would be safer to feed the tops in the field rather than as silage, for then there would be less chance for spreading bacteria."

Molasses Proves of No Benefit in Fattening

Molasses proves of no benefit in fattening calves where a good balanced ration of high class feeds is used. That is the conclusion arrived at by the Ames experiment station after conducting two tests using two lots of five calves each in each trial. The average weight of these calves at the start of the first test was 436 pounds and of those used at the start of the second test, 381 pounds. The feeding periods were 270 days and 240 days, respectively.

The check ration in the first test consisted of shelled corn, linseed meal, alfalfa hay, and salt. The second group received the same ration plus 1 pound of cane molasses per head daily after the first 150 days. In the other study, the check ration was similar to the above, except that corn silage and minerals were added and the experimental lot was self-fed cane molasses in addition to the ration after 150 days of feeding.

In neither case did the cane molasses increase the rate of gain. The check lots gained 2.42 and 2.32 pounds per head, while those receiving the molasses in addition gained 2.38 and 2.31 pounds per head respectively.

Shipping Hogs

Because of high prices being paid for finished hogs and the increased losses in shipment due to summer heat waves, farmers will be well repaid for extreme care in getting their hogs to market, according to the swine department, University of Illinois. Shipping conditions may be improved by hanging ice in burlap bags from the roof of the car. This will cool the air and the drippings will provide a cool place for hogs to lie in.

Keep Fowls Separate

It is not a good plan to try to keep hens, ducks and geese together. They differ in their requirements and habits and do not mix well. Geese are grass eaters, needing plenty of good pasture in addition to a small amount of grain. Ducks are also heavy consumers of green food and sloppy about their quarters when watered as hens are.

LIVE STOCK FACTS

It helps materially in the control of stomach worms to provide annual pasture crops such as rye or wheat pasture, sudan grass and rape.

Manure is an ideal grass fertilizer and increases timothy yields. Manured timothy has fewer weeds than that grown by the use of commercial fertilizer.

Except for hogs, horses and mules, there was more live stock on the farms of this country on January 1 this year than at the same time a year ago.

Horses and mules doing hard work must have plenty of grain. Horses cannot stand up to hard work on a light grain ration, which forces them to eat too much hay.

The Big Ten ration figured out by Iowa State college points out an important lesson in swine feeding, as they show the need of a variety of proteins combined, rather than a dependence on the one or two sources.

The loss of pigs at farrowing time frequently amounts to nearly 50 per cent. A considerable part of this loss can be prevented by proper feeding of sows during the gestation period, attention at farrowing time, and providing suitable quarters for the sow and litter.

Today and Tomorrow

(By Frank Parker Stockbridge)

ACCIDENTS—

The most dangerous occupation, according to an industrial survey of New York, is window-cleaning. The chance of accident to a window cleaner is nearly nine times as great as that which the artisan making fine machinery and instruments runs, the latter being the least hazardous occupation.

Everybody who has ever watched the window cleaners at work on the outside of a skyscraper has shuddered at the thought of what would happen if the worker's safety belt broke while he was cleaning the thirtieth story windows. The belts do break, occasionally, or the cleaner's foot slips and he falls to his death.

Windowsash made with a pivoted interior frame which can be rotated so that both sides of the glass can be cleaned from inside are used in a very few buildings. They cost a little more than the ordinary kind, but in a completely civilized world their use will be compulsory.

FINGERPRINTS—

Every reader of detective stories knows that two individuals never leave the same sort of fingerprints, and that the fingerprint records of the great police departments are organized so that the imprint of any known criminal can be referred to at once.

Few realize that in the Department of Justice at Washington is maintained the largest international collection of fingerprint records in the world, comprising photographs of the fingermarks of more than 2,100,000 persons who have been accused or suspected of crime.

Some have proposed that every child's fingerprints be taken when he first enters school, and preserved as a permanent record of his identity. There are many cases in which such records would be invaluable, but we are lax about such things. Half of the states do not even keep a record of births.

BOOKS—

Not more than three or four perfect copies are known of the first book printed from movable type, Gutenberg's Bible. The United States of America now owns the finest example of this precious volume. The last session of congress appropriated \$1,000,000 with which to buy the Vollbehr collection of rare books, for the library of congress, which contains not only this famous Bible but more than 3,000 other splendid examples of the work of the earliest printers. It has been estimated that it would cost more than \$5,000,000 to duplicate this collection, if duplication were possible.

A thousand years from now men will point to these books and say: "Here are the seeds of our civilization. It began when man learned how to duplicate knowledge by printing and made it free to all sorts and conditions of men."

RADIUM—

The world's most precious metal, worth \$2,000,000 an ounce, now comes exclusively from the Belgian Congo, in Africa. Originally discovered in pitchblende ores in the Joachimsthal, Austria, radium was for a while mined commercially in Utah, but the discovery of a bed of very rich uranium ore in Africa has put the other producers out of business and enriched the prospec-

tors who made the lucky strike.

The cost of radium is due to the difficulty of extracting it from the ore and the danger in handling it.

Radium's value is due to the fact that it is constantly changing into other substances, and in the process gives off rays and emanations. These have effects upon the human system similar to those of the x-ray. Its use in medicine is still in its infancy, but commercially, as the basis of luminous paint for the hands of watches and clocks, air navigation instruments and the like, the demand is large. A single ounce is enough to supply this industrial demand for several years, but no amount of radium as large as one ounce has ever been assembled in one place.

COLOR—

In the Middle Ages the rich merchants of Venice spent much money in painting their gondolas in brilliant colors, trying to outshine each other, that an edict was passed by the Council of Ten that other color but black might be used on these floating vehicles of the Venetian canals. And all gondolas have been painted black for five hundred years.

Some have wondered whether there might not be a revival of the old Venetian rivalry in the gaudy colors of modern automobiles.

The matter is one of personal taste. Conservative people and those who do not court attention will always prefer black or plain blue, while the spirit of youth and modernity will continue to express itself in gay green, yellow and red cars.

John and Dan Cauthorn, prominent young Sutton county ranchmen, were business visitors in Sonora Monday.

SONORA CLEANERS HAVE NEW DELIVERY

Keeping in step with Sonora progress the Sonora Cleaners put on a Chevrolet sedan delivery wagon on this week. Curtains on either side of the delivery bear the following: "Sonora Cleaners, Laundry and Dry Cleaning, Phone 103."

Messrs. Robinson and Taylor are well pleased with their business, and state that they are gradually improving their plant and can do all classes of work satisfactorily.

Pat Lee, prominent Crockett county ranchman, transacted business here the first of the week.

STERLING FOR GOVERNOR CLUB ORGANIZED HERE

A Sterling for Governor Club was organized here yesterday immediately after E. E. Murphy spoke for Sterling, candidate for governor. Among the signers were various business men and ranchmen. About 100 signers indorsed Ross Sterling for governor.

It is thought that Sterling will carry Sutton county by about a two to one majority.

Seventeen towns in the Rio Grande Valley had 37,227 population in 1920 and 92,784 in 1930, average gain of 149.2 per cent.

LOWEST ESTIMATES ON HIGH GRADE

Job Printing

Look no further—our job printing department can take care of you adequately. Equipped with the very best printing machinery, manned by experts, and operating under a system eliminating every particle of waste, we are prepared to quote you the lowest possible price on any job, big or small, simple or elaborate.

In addition we are prepared to turn out work that reaches the very peak of perfection—extremely neat, and up to the highest standards of modern typographical art.

Work finished as soon as promised and delivered on time.

Devil's River News
JOB DEPARTMENT

Thousands of New Words

are included in the Merriam Webster, such as aerograph, broadtail, credit union, Babeism, patrocenitis, etc. New names and places are listed such as Carter, Sandberg, Stalin, Latvia, etc. Constantly improved and kept up to date.

WEBSTER'S NEW INTERNATIONAL DICTIONARY

Get The Best

The "Supreme Authority" in courts, colleges, schools, and among government officials both Federal and State.

452,000 entries including 408,000 vocabulary terms, 32,000 geographical subjects, 12,000 biographical entries. Over 6,000 illustrations, and 100 valuable tables.

Send for Free, new, richly illustrated pamphlet containing sample pages of the New International

G. & C. Merriam Company
Springfield, Mass.

but first He Saved

What a lucky guy HE is sitting in the President's chair! No luck at all. Just sound, common sense. He invested his money safely in a Savings Account until he had enough to start his own business. Ben Franklin once said "Save and Have!" He was right.

First National Bank

GOOD YEAR

Here, too!—More people ride on GOODYEAR Tires—ask us to PROVE why!

The TIRE of T-I-R-E-S

For greatest safety at high speeds on hot roads—for the most security against punctures and tire-changing—for the surest grip on sharp curves, wet pavement and in mud—

Double Eagle

This is the finest tire the world's largest rubber company can produce with its vast resources and experience. Worth more than it costs, considering the extra comfort and peace of mind you enjoy.
