VOLUME 15 NUMBER 39

GOV. ALLRED APPEALS TO PUBLIC AT LARGE FOR SUPPORT OF A PLAN TO CONTINUE PENSION PAYMENTS

Executive Over Radio Charges Biggest Lobby In The History Of The State Is Trying To Balk The Will Of The People.

Austin, Oct. 18 (Special)—Governor Allred charged in a firestorm Saturday evening that the most powerful lobby in Austin legislative history confidently awaited the verdict of no taxes while the "destiny of our unfortunate people rested in the hands of the State Senate."

"Unless this Legislature within the next few working days raises additional revenues," Allred declared, "payments to our needy old people will be absolutely suspended for two or three months after November 1st. Not only that, but unless this Legislature raises additional funds, even after the payments have been completely suspended two or three months, the amount of each check will have to be cut down."

"In addition to the urgent need for more money for our aged, we are obligated by a vote of the people to help the blind and to assist underprivileged, neglected, unfortunate children! As yet, the Legislature has not provided a dime for this purpose!"

The house has passed a tax bill on natural resources just as it did during the regular session. The tax bills they passed they tried to get through the Senate. The Senate refused to act on them. The committee was raised by special interests, said the governor, who charged a campaign of propaganda had been raised for the East Texas Chamber of Commerce for Congressman Marvin Jones, chairman of the House Agricultural Committee.

"The death bed converts to economic these advocates of taxes upon the poor, these men who indict social security as a dolo, do not represent the people of Texas. To them I say that when we have placed a just tax upon our natural resources, 85% of which goes outside the state, when we have passed an income tax levied upon the earnings of twenty pipe line companies who are a few million dollars net profit in one year, when we have done these things, then it will be time to talk about a sales tax!"

"Our task now is to plan a program which will maintain through the years the equality that agriculture has never attained," Jones continued. "We cannot lose the foothold we have gained."

"Farmers Is Forgotten Man. Historically, he said, the problem began when "section groups picked up one wing of the Alexander Hamilton philosophy and established the tariff system, but failed to bring forward the other part—that for restoring to the farmer that which was taken away from him under the protective tariff."

Anton Beats Muleshoe Yellowjackets In Hard Fought Game Friday

The Muleshoe High school football squad journeyed to Anton last Friday for a defeat of 15 to 12 by the host team; but Anton High squad knew they had been playing football when the game was finished, according to Coach Stevens, who said it was one of the nicest, yet hardest fought games of pig-skin he ever witnessed.

Both teams were strictly "up to snuff," in their playing, well balanced as to skill and weight, downs and penetrations were had by both teams. There were no spectacular plays; but just good old mud-watery football, played entirely in the rain.

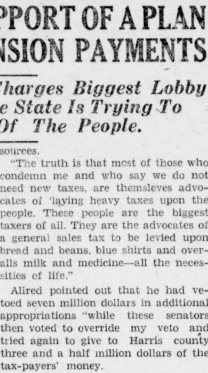

Notwithstanding Anton's first touchdown, Muleshoe Yellowjackets outplayed the opposing team during the first quarter, doing excellent passing and line-backing. Anton also scored again in the fourth quarter, while a 2-point safety was achieved in the first. Muleshoe made touchdowns in the second and third quarters.

Friday afternoon of this week Muleshoe is scheduled to meet the Amberst team here at Warren park gridiron in what is expected to be another giant tussle for pig-skin supremacy.

A bulletin entitled "Texas Legislature: One House or Two?" has been prepared by Dr. Joe M. Ray, former instructor in government at the University of Texas, and has been published by the University Bureau of Public School Interests, which is the State executive office for the League.

This bulletin contains both affirmative and negative briefs on the subject and reading material on both sides, including statements from members of the Texas Legislature, articles by authorities on government and newspaper and magazine editorials.

THE HOUSE BUILT ON A ROCK

"The record shows that I am stronger for economies than any one of the small group in the senate who howled to high heavens for 10 days if economies had been submitted to them they would work wonders. On the tenth day they declared by their votes that I had already submitted the subject of economies to them, but it remains to be seen whether they will perform in a statesmanlike manner all the wonders they promised."

"The biggest, most powerful lobby Texas has ever witnessed is gathered in Austin, completely and confidently awaiting the verdict, 'no taxes.'"

"Out over the state, others, unable to come to Austin, some of them with-out voting power, are watching too."

Denying that his program levied taxes upon the people, Allred said, "I have only proposed a reasonable tax upon those who are able to pay it, upon a few great pipe line companies, upon those who are darning our oil, sulphur and other irreplaceable natural re-sources."

Landlords Must Sign Cotton Loan Waivers Whether Interested

Instructions covering the making of loans by the Commodity Credit Corporation to cotton producers provides that if the borrower is a tenant, the landlord must sign the lien waiver whether or not he claims lien. According to recent advice to W. C. Taylor, county agent, from the AAA State office, such waiver by the landlord which requires his signature on the tenant's loan agreement does not bind the landlord to comply with the 1938 agricultural adjustment program. The regulation for compliance would apply to the tenant agreement, he also enters into a loan agreement.

The above question has arisen where landlords do not expect to apply for loans and where tenants of such landlords desire to enter into loan agreements. The division of cotton has been made by the tenant delivering to the landlord such number of bales as would represent the landlord's share in the crop.

Pupils Will Argue 'One Lung' House In School This Yr.

Austin, Oct. 18.—Schoolboy and schoolgirl orators will debate the question of making the Texas Legislature a unicameral body as this topic forms the 1937-38 subject for the Texas Interscholastic League debate tournament.

A bulletin entitled "Texas Legislature: One House or Two?" has been prepared by Dr. Joe M. Ray, former instructor in government at the University of Texas, and has been published by the University Bureau of Public School Interests, which is the State executive office for the League.

This bulletin contains both affirmative and negative briefs on the subject and reading material on both sides, including statements from members of the Texas Legislature, articles by authorities on government and newspaper and magazine editorials.

Applications For Farm Loans May Be Made At Any Time In Muleshoe

Applications are now being received by the Farm Security Administration for rural rehabilitation loans for the next crop year, according to J. W. McDermott, county supervisor in charge of the Rural Rehabilitation supervised loan program in Bailey County. He made the announcement early this week from his office in the court house.

Mr. McDermott stated that a considerable part of the work of his office consists in assisting rehabilitation farmers to make out practical farm and home management plans and in advising them in their farming and home operations. "That maximum attention may be given to that important phase of the work next spring, we are doing what we can to spread the lending activity over a longer period. Farmers thought to be qualified for these loans should therefore be advised to make their applications early this fall," the supervisor said.

"These loans are limited within the bounds of allotted funds to financially distressed farm families—whether on their own land or as tenants on rented land—and who are unable to secure proper credit from other sources to make a crop or to purchase needed livestock and equipment."

"Eligibles must be willing and able to work and show ability to profit from instruction and guidance. There must be sufficient credit available or obtainable, of sufficient reliability to promise a satisfactory return on human labor intelligently applied, and there must be a reasonable probability that a successful and sound home management plan can be worked out for the farm. In working out these plans special emphasis is placed on the production of sufficient food and feed crops for all the people and livestock located on the farm, thereby eliminating the necessity of producing large amounts of cash crops, the returns from which would have to be used for the purchase of feed and foodstuffs that should be produced on the farm. Thus cash crops are limited to an amount necessary to pay off the loan and meet other cash needs of the farm," McDermott said.

Congressman Marvin Jones Says The "Forgotten Man" Farmer To Be Fully Remembered In The Coming Farm Bill

"That the cotton farmer is the 'forgotten man' of the United States and that adjustment of his crop interests will be one of the paramount features of the agricultural bill, to be formulated during the coming special session of Congress called by President Roosevelt to begin November 15, is the statement of Congressman Marvin Jones, chairman of the House Agricultural Committee."

In an address delivered at Taylor Thursday of last week, Mr. Jones said: "It is important that farmers and farm groups present a united front."

"We are fortunate in having in the White House the greatest friend that agriculture has ever had—Franklin D. Roosevelt."

James spoke before a conference of farmers and farm leaders called by the East Texas Chamber of Commerce for full discussion of proposed new federal farm legislation.

Outlining basic provisions of the bill his committee will present, the Annual Report of the House of Representatives "should be broad and flexible in order to cover not only the various problems but also in order that the program may be adjusted to meet changing conditions."

Simplification Urged
Whatever measure is worked out, he said, should include the following basic provisions:

1. A continuation, improvement and simplification of the present program of soil conservation.
2. The securing for the farmer of a fair division of the national income, to which he is entitled "as a matter of right."
3. Provision for an "ever-normal granary," storage of warehouse program with adjustment or control provisions that will assure the consumer against scarcity and at the same time prevent the excessive surpluses and ruinous prices that inevitably follow. The commodity loan feature would be continued.
4. Search for new uses and new markets for farm products should be encouraged, so American farmers will grow all the market can absorb, both at home and abroad.
5. Provision for a graduated reduction in payments to large producers, so as to encourage individual farming.
6. Set up restrictions which will prevent land owners from receiving benefits of the program if they reduce the number of tenants without approval of the local committee, and at the same time, stipulate a proper division between land owner and tenant.
7. Provide for administration of the law by local people wherever possible, with greater responsibility in the hands of local committees in order to suit the diversion program to the needs of the respective localities.

Must Plan Program
"The agriculture committee has prepared a set of work-bench bill based on these principles," Jones explained. "It is only a basis for consideration and will be changed to fit the worthwhile suggestions made by farmers, groups of farmers and farm organizations."

The committee has been working for months, he said, in order to have legislation in the best possible form, and its 25 members, representing practically every part of the nation, are now conferring with farmers and farm groups in their respective areas in order to have every viewpoint represented when the committee meets again.

"Our task now is to plan a program which will maintain through the years the equality that agriculture has never attained," Jones continued. "We cannot lose the foothold we have gained."

Farmers Is Forgotten Man.
Historically, he said, the problem began when "section groups picked up one wing of the Alexander Hamilton philosophy and established the tariff system, but failed to bring forward the other part—that for restoring to the farmer that which was taken away from him under the protective tariff."

"Thus," he added, "the farmer became the first 'forgotten man.'"

The new farm program of restoring to the farmer something to offset this loss through tariff, he said, "many people make the mistake of calling a subsidy a gift. It is neither, but simply a restitution, restoring his rights under the constitution."

"Three important matters have never been included in any major program," he continued. "They are: Reduction of payments to large operators; the search for new uses and markets; and correction of freight rate discrimination against farm products. I feel that all three of these are of great importance and will mean much to the future of agriculture."

Lamson's Position
Additional legislation is needed to strengthen the present program, he explained, because "not only may there be soil conservation, but the domestic allotment plan may be put into effect in reference to any commodity."

"To undertake to produce it regardless of price also is unthinkable," he added. "Proper adjustment and control is necessary. The better way would seem to be to link proper diversion and adjustment with a premium to be paid on a fair allotment to each cotton farm."

He added that "with patience, tolerance and constructive thinking, I believe that a program can be ultimately worked out that will produce greater returns without jeopardizing the position that cotton has always had."

LADS STARTING FOR SINO-JAP WAR RETURNED HOME

Considerable mental turmoil existed here Tuesday when it was learned Carroll Goss Jr., 12 and Garland Kennedy, 13, children of Mr. and Mrs. Carroll Goss and Mr. and Mrs. Earl Gilmer, had skipped out from home.

Officials were notified and traced them to the New Mexico state line where all trace of them was lost. Later the lads were located at Vaughn, N. M., Mr. Goss going after and returning them home Wednesday morning.

The lads were no worse off for their lack of adventure. Both had some money when they left.

POOL IS HEAD ST. CERTIFIED SEED COMBINE

1937 Expected Crop Is 500,000 Pounds On 2,000 Acres.

W. M. Pool Jr., Bailey county owner of the Purdy Seed Farm, about 15 miles southeast of Muleshoe in this county, was elected secretary of the Texas Certified Seed Growers association at a meeting of directors held in Littlefield last week.

George C. Beakley, Lovell producer, was elected secretary. Others present for the meeting were: Joe Hastings, Dimmitt; James Dunn, Lamesa; J. W. Hamcock, Sudan; H. F. Waldron, John L. Bowling and W. H. Cunningham, all of Littlefield.

There are 18 producers in Texas of state certified seed. This year a crop in excess of 2,000,000 pounds is expected. Harvesting is well under way. The expected crop is about 600,000 pounds greater than the previous crop, 1931.

Pool recently made a trip to South Texas to discuss sale of seed to jobbers and wholesale men. The association has set prices for seed lots and it is expected some 25 or 30 carloads will be available for sale this winter.

Dwarf yellow milo has the largest acreage, 600. Next comes hepari, 451. Others are: kafir, 300; sunma, 144; sudan, 131; 60-day milo, 900; dwarf sunma, 80; dwarf red top cane, 20; double dwarf yellow milo, 10; quadron milo, 65; wheatland milo, five; Spur festeria, 10.

Total acreage is slightly under 2,000 in all.

The seed was developed through the Lubbock state experiment station. Breeders obtain their foundation seed through Don L. Jones, superintendent. He has conducted experiments for years on improvement of seed. He is using new strains to meet requirements for drought or disease resistance qualities.

The seed is grown under strict regulations by the state seed and plant board of Austin, of which R. H. Miller is executive secretary and Jean J. E. Humbert, Texas A. and M. is a member.

Conservation Payment Will Be Made For 1937 In Announcement Mon.

The Agricultural Adjustment Administration, Washington, announced last Monday that maximum rates, equaling 110 per cent of contract provisions, will be paid farmers who participated in the 1937 soil conservation program.

AAA Administrator H. R. Tolley said the additional payments would be made because participation was somewhat smaller than expected. The program was based on expectations that 83 per cent of all farmers would participate.

Latest reports, AAA officials said, indicated that about 75 per cent of farmers participated, a smaller rate of participation than in 1936.

The AAA said it could "make no estimate" of what the 10 per cent "bonus" would mean to farmers in increased payments. Farmers last year received an average of \$110 to \$115.

Tolley said the added payments would keep the cost of this year's program "well within" the budget requirements set by Congress at \$500,000,000.

May Get Government Cotton Classifier And Warehouse Location

That Muleshoe may have a cotton warehouse and Federal cotton classifier located here in time to handle some of this year's crop, is the report this week, though nothing definite has yet been given out regarding arrangements.

Charles Leno, local cotton buyer, has qualified as a government classifier, it is said, and is now making arrangements for this convenience to cotton growers.

Plans are on foot for leasing some of the Santa Fe right-of-way east of the depot, also probably some of the nearest public grading, causing much loss of time and inconvenience.

P-T-A MEETS MONDAY

The regular meeting of the Parents-Teachers association will be held Monday night beginning at eight o'clock in the High school auditorium, the program being as follows:

Talk, "Why Parents Visit School," by a parent.

Comedy Farce, "Love and Lather," by a number of blackface characters.

Everyone is invited to attend and enjoy the evening.

WILSON FILLS BIG SILEO

Maple Wilson's new filling a new 200 ton silo with ensilage on his farm near Maple on the south part of this county.

It is understood several new silos of the "trench" type have been dug in Bailey county this year, and are now being filled with the "animal kraut."

Patronize home industries.

EDITORIAL AND FEATURE PAGE

THE MULESHOE JOURNAL

Entered as second-class matter at the Muleshoe Postoffice under the Act of Congress, March 3, 1919.

JESS MITCHELL, Editor.

L. F. MITCHELL, Bus. Mgr.

Subscription Rates: In Bailey County, one year, \$1.50; Outside of County one year, \$2.00.

Published every Thursday at Muleshoe, Texas. Advertising rates given upon application. Telephone No. 54.

Subscribers who change their addresses, or fail to get their paper, should immediately notify this office, giving both new and old addresses.

Communications of local interest are solicited. They should be briefly written, on only one side of the paper, and must reach this office not later than Wednesday morning of each week.

Advertising that does not show in its text or typewriting that it is paid for must be marked as an advertisement. All local advertisements in this paper for the time specified or until ordered out. All notices, it matters not by whom nor for what purpose, if the object is to raise money by admission fee or otherwise, is an advertisement and when sent in for publication must be paid for at the regular advertising rate per line for each issue printed.

Obituaries, cards of thanks, and resolutions of respect will also be charged for at the same rate. Any erroneous reflection upon the character, standing or reputation of any person, firm or corporation which may appear in the columns of the Muleshoe Journal will be gladly corrected upon its being brought to the attention of the publisher.

In case of errors or omissions in local or other advertisements, the publisher does not hold himself liable for damage further than the amount received by him for such advertisement.

Editorial

Every Great Attempt is Glorious Even if It Fails

A THOUGHT FOR THE WEEK: For with what judgment ye judge, ye shall be judged; and with what measure ye mete, it shall be measured to you again. Matthew 7:2.

The seat of knowledge is in the head; of wisdom, in the heart. We are sure to judge wrong if we do not first right—Hazzit.

BUSINESS COURTESY

Some stores believe they are rendering a service when they have scarcely begun. Advertising their goods and prices is one of the greatest services that can be rendered.

What with bathing and dressing the kiddies, preparing meals, sweeping and dusting, making beds, washing and ironing—and a hundred and one other odd chores, the average housewife has no time to waste in window shopping or going through stores to pick out the things she wants and needs.

An advertisement in the local newspaper saves much time and many steps for buyers which is greatly appreciated—and it is a courtesy to which such buyers are entitled.

Wide business concerns everywhere are turning to newspaper advertising, and consider themselves fortunate to be served by a weekly newspaper the public generally reads and appreciates—one that carries the local news and caters to their prospective customers.

WHAT DO YOU THINK?

Just suppose President Roosevelt, in his "Fireside" talk last week, had announced that the special session of Congress called to convene November 15 would devote itself to studying ways and means to reduce the present extravagant cost of government;

That it would adjust, reduce or eliminate special, punitive or class taxation that now hampers or discourages business—such as the capital gains and losses clause and the tax on corporation surpluses;

That it would adopt a strong and definite policy that would protect the rights of the worker, as well as the rights of the factory owner and the public;

That it would use all powers of the government to see that workmen or employees, union or non-union, were protected in their jobs and operations, and that infringers on their rights would suffer the full penalties of law.

This community is fortunate to have among its citizens a number of these true Americans—the Legionnaires. However, it is regrettable that the legion's gigantic parade up Fifth avenue could not have been made the entire length of the Lincoln Highway. Had this been possible, there would not be a man, woman or growing youth in America today who would not feel reassured that there is a strong patriotic fervor for defense of individual liberty.

Janty Journalettes

Horse sense is just as essential for the Muleshoe car driver as is horse-power.

It's easy to tell when a Muleshoe man is married. He invariably keeps both hands on the steering wheel.

Dieting, as is practiced by Muleshoe people, consists in not eating a lot of things they haven't got.

It very seldom occurs to a Muleshoe boy of 17 that some day he will know as little as his father.

In some respects Muleshoe women

are pretty much alike. They air their views when they see some other woman putting on airs.

Many families around Muleshoe would be in far better financial shape if it wasn't for the extravagant tastes of their neighbors.

Why is it the Muleshoe boy who can't sing and the girl who can't play are always the ones who do most of the practicing?

The Muleshoe man who distrusts everyone he sees probably got that way by standing too long in front of a mirror.

A real old-timer is the Muleshoe man who can remember when women were too bashful to even look into a barber shop as they passed by.

There seems to be little rhyme or reason for any Muleshoe man worrying about growing old as the same thing is happening to everybody else around here.

Governor Allred claims if the legislature passes a sales tax he will veto it. Plenty of Muleshoe folks would be satisfied if he would apply that statement to any other kind of taxes the solons authorize.

Pavement Pickups

Joe Damron had a suren't "kicken" customer the other day. He complained he got well before he had taken all the medicine he bought at that drug store. Joe is inclined to believe he must be Scotch.

Dr. Lewis was prodding for a fragment of a patient's tooth the other day. "That's funny," he remarked. "I don't seem to feel it." "Funny hell," replied the patient; "you're just lucky you ain't me."

A customer called Hart's over the phone the other day. Howard Carlyle answered the phone. "I wish you would send me a large mouse trap," she said. "Alright," replied Howard. "Who's it for?" "The mice," she said. "Good, don't sully, Mr. Carlyle."

Buddy Taylor's teacher asked him the other day to use a sentence with the word "Egypt" in it. "Buddy, who had attended the carnival during the recent county fair here, promptly replied: "I asked for my change but E gypt me."

A Muleshoe woman asked Dr. Williams the other day if he couldn't give her husband something to make him quit talking in his sleep. The doctor said, "No," he couldn't. "Then please give him something that will make him talk more distinct," she said.

A friend of Buford Butts was visiting him the other day, and remarked he was going to marry a woman who had already been married three times and every one of her husbands had been named William. "She must be a regular Bill collector," thought Buford; but he didn't say it out loud.

E. R. Hart, who is generally regarded down by the droll affairs of business, yet occasionally lets out a flash of humor said the other day that "classic dancing was probably invented by some young woman trying to get into a union suit in the upper berth of a Pullman; but of course, that was several years ago, women don't know what that kind of undies are today."

A Muleshoe husband and wife were discussing finances a few days ago. "Any installment due today?" asked the husband. "No," replied friend wife. "Any payments due on the house, the radio, the refrigerator, the vacuum cleaner, the furniture, the rugs or anything else we bought on the installment plan?" "No." "Then I've got \$10 we don't need. What do you say we buy one of those new 1938 model Chevrolet Alex says will be out Saturday?"

It is said John Lucy was in one of the local restaurants a few days ago, and withheld for safety first reasons) and gave an order for boiled eggs. When served he noticed an inscription on one of them which read: "Should this meet the eye of some good looking bachelor who desires to marry a farmer's beautiful daughter, address the young lady. Yesterday he received a note from her which read: "Your letter too late. Have been married five months."

Sam Perry, recently appointed chief of police, says he has been having some difficulty in stopping center street parking on the Main drag. Making appropriate complaints to the City Fathers, it is reported an ordinance has been passed instructing the official of brass clothes and blue buttons to arm himself with a horse-pistol, take his stand at the head of Grand avenue and spray bullets down that portion of the artery of travel to be kept clear of traffic. At first bluish the procedure may appear quite dangerous; but when it is considered how long it would take the chief to load and reload that old cap and ball relic, law violators may be quite tame.

O'Neal Rockey, after visiting his brother Richard, and family about a month up in Washington state, returned home last week. Telling of his visit, he also spoke of a cow belonging to Richard, who is foreman of a Ford garage in that state. The cow died in a very peculiar manner. In some unexplainable way she got into the garage one night, swallowed several nails, an automobile key, three screws, a long strand of electric ignition wire, drank half-gallon of gasoline, and gulped down most of the Ford repair parts and accessories carried in stock. The next morning, when the garage was opened, the pretty Jersey was found lying apparently in a state of coma on the garage floor, and was terribly bloated. Richard, assisted by some of his fellow workmen, in trying to get her out, twisted her tail, which made her jump into high and run herself to death. O'Neil is said, is willing to make affidavit as to the truth of this statement.

SNAP SHOTS

Some of our modern songs need ventilating—the air is bad.

A finished fight between armed bandits and reckless drivers should now be in order.

Sometimes it's better to have loved and lost than to get tangled up in a breach-of-promise suit.

Would one say that at a nudist convention all resolutions are passed by a "bare" majority?

Teeth are the things one has pulled out before the doctor finally decides the trouble was with the tonsils.

Maybe that governor who appointed his wife to a \$10,000 a year senatorship only wanted to be sure his family budget would balance.

A straight line is the shortest distance between two given points; but some folks have already discovered that a crooked path is the shortest way to the pentagon.

BLIZZARD BRINGS FROST HERE: Following a blizzard blow straight out of the north Monday afternoon, thermometers here tumbled down several degrees and people scurried about for more wraps.

Slight sleet was reported a few miles north of Muleshoe, while west and south of here spotting snow was reported. Monday morning citizens looked out upon the ground while with frost, being the first of the season; but no reports of damage of any kind to vegetation have been heard. Tuesday was much warmer.

A. L. CARPENTER HOME BURNED MONDAY IN LONGVIEW; INSURED

Mr. and Mrs. A. L. Carpenter, residing 12 miles southwest of Muleshoe in the Longview community had the misfortune of losing their home by fire last Monday morning.

The fire was reported to have been started by the exploding of an oil stove about 11:00 o'clock that morning. Mr. and Mrs. A. L. Carpenter were in Littlefield at the time but his brother Ford Carpenter and wife were at the place when the fire began. They were in the yard, and seeing smoke streaming from the house rushed to the scene and tried to extinguish the fire. They were unable to save anything except a few articles of house-hold goods.

Approximately 50 percent insurance was carried on the furniture and 70 per cent on the building. The loss was adjusted the day following the fire and a total of \$1,200.00 insurance was allowed.

Mr. Carpenter plans to start rebuilding immediately, according to report.

MANSFIELD Cord-Lock makes them 31% SAFER. Mansfield Cushion Balloons for new fast Cars.

Mansfield Cushion Balloons are built the Mansfield way—three ways differently from other tires. They have Cord-Lock construction that gives a 31% greater safety factor in the sidewalls—anchored-in piano wire beads, seven times stronger than actually needed—wide, flat, tough Duro-mix tread that wear like iron and grip tight on slippery pavements.

MANSFIELD EXTRA Mileage Tires. SAFE • STRONG • SILENT.

1938 Chevrolet Master De Luxe Four-Door Sedan. NEW 1938 CHEVROLET CARS ON DISPLAY HERE SATURDAY. First showings of the 1938 model Chevrolet automobiles, will be made here the Valley Motor Co., local agent headquarters, next Saturday, according to A. A. Alexander, manager, at which time a half-carload of the new cars will have arrived. Especially on display will be samples of the new sport sedan and new town sedan. Mr. Alexander says there have been a large number of important improvements made in the coming model, both as to mechanical efficiency and outward beauty, which will be appealing to the public at large. Several prospective buyers have already made reservations for one of these new cars and are anxiously looking forward for their first vision of the creation of this very popular automobile. The public generally is cordially invited to call at the company's headquarters and see these new models, said Mr. Alexander.

BAILEY CO. HOME DEMONSTRATION CLUB NEWS

By Miss Alma Stewart
Home Demonstration Agent

Wraps Apples for Storage

"I have just finished wrapping two bushel of apples," said Miss Dottie Wiltedinger of Y. L. She wraps each apple separately and packs them in boxes so they will keep for winter use.

"Helps Child Help Himself"

"I have found an old upright Victrola cabinet makes a good wardrobe for a child," announced Mrs. Lena Daniell, clothing demonstrator of Joyland home demonstration club.

She is teaching her child to help herself by making the wardrobe low enough that a small child can reach it and learn to hang up her own

clothes. Her husband made a rod for hangers and she put shoe and sock pockets on the door. This makes a nice looking piece of furniture and was easily made.

PREPARE BASKETBALL COURT

An out-door basketball court is being built at the Muleshoe High school this week and girls and boys in the school will begin practice in the near future, according to report.

C. R. Stevens will coach the boys and Miss Addie Bell Fort will coach the girls team.

It is expected the school will have good teams this year and judging by the number of students who plan to come out to make the teams, there will be no reason for them not to have the strongest and most efficient players in the district. It is said.

Buy it in Muleshoe.

NET OVERHEAD EXPENSE FOR COTTON PICKERS RUNS FROM \$25 TO \$50 PER SEASON DEDUCTED FROM NET PROFITS

Every big industry has a corresponding big "overhead" of expense before operators can begin figuring profits, and the cotton picking business, one of the largest businesses of Texas, is no exception. When one stops to figure up the actual overhead for cotton pickers, they may stop again while figuring their net profits. Some of these actual expenses are borne by the pickers themselves, while some of it must be deducted from the growers gross income.

To begin, frequently the grower must spend considerable time in trying to locate cotton pickers, also the added expense of using his own or hiring a truck to bring them to the fields of operation. Then, there is frequently the item of housing of some description, which sometimes means the purchase of a tent or tents and cooking equipment.

The average cotton picking sack costs about \$1.40 each, lasts on an average of 90 days, which means an investment of \$8.40. Each picker wears out at least one set of knee pads, during

the season, which cost an average of 70 cents each, and a pair of cotton gloves wear out each day, which adds another \$8.00 to the bill, Sundays being excluded.

Cotton pickers must also have clothing, a pair of overalls, jumper, shirt, pair of socks, hat and pair of shoes, averaging in cost about \$7.50. As weather gets cooler, underwear and heavier outside clothes is required, hence purchase of "long-handles," sweater or jacket of some kind is added to the list, representing another cost outlay of from \$3.00 to \$5.00 for the average picker. Taken all in all, scarcely any grower who has much cotton picking to do, can get along with much less than \$25.00 picking expense, while some of them will probably run as high as \$50.00, especially if much housing expense is demanded and he has to go much distance to get pickers. True, in some cases, part of this expense is passed on to the pickers; but whoever pays it, must realize it is an initial overhead that must be met before net profits are figured.

What's Happening In Washington And Other Cities Of Importance

Episcopalians and Presbyterian churches of the U. S., are considering a consolidation.

A six inch snow covered Chicago last Saturday, also sweeping into Iowa, Nebraska and the Dakotas.

A move is now on foot for the amalgamation of all different Methodist churches in the U. S., with indications of favorable action.

Accidents and deaths from automobiles is running about 20 per cent ahead of last year, according to a Washington report.

Mrs. Narzia Lakov, 26, Moscow, Russia, is said to have the world's modern marriage record, having been legally divorced 29 times—and is now married again.

Henry Ford has threatened to abandon his automobile assembly plant at Kansas City because of strike conditions. Officials there are trying to get him to reconsider the matter.

Lack of sufficient federal tax income has convinced President Roosevelt the national budget for this year can not be balanced. The estimated gross deficit is going to run around \$890,000,000.

U. S. Department of Agriculture officials have announced the federal government will participate in the purchase of cottonseed oil, buying it thru the Surplus Commodities corporation in an effort to hold up and stabilize prices. This oil last month sold for \$19.25 a ton, compared with an average price of \$35.41 last year and of \$31.19 in 1935.

Secretary Hull, Washington, last Saturday accepted a formal invitation to attend and participate in a nine-power treaty conference of nations over the far eastern crisis, at Brussels, October 30, and designated Norman H. Davis to head this government's delegation. Other delegates will also be in the party which will sail for England sometime this week. Peace by agreement will be one of the principal topics for discussion.

STATE FARM CHECKER HERE

Laymon N. Miller, state compliance supervisor, AAA State office, was in Bailey county Friday and Saturday of last week to spot check farms for compliance under the 1937 program. He worked in cooperation with Cecil Mc-

Laury, county compliance supervisor and W. C. Taylor, county agent. The purpose of this check work by a representative of the State office was to determine the accuracy of measurements made in the county by local supervisors.

SLEEPING SICKNESS AMONG HORSES GROWING LESS WITH COOL WEATHER VARIOUS REMEDIES ON THE MARKET

The sleeping sickness (encephalomyelitis) which, during the past month has spread over this part of West Texas and Eastern New Mexico, claiming victims of several horses, appears to be lessening in its ravages following the recent cool spell, and veterinarians say that with the arrival of killing frost it will be entirely eliminated.

Bailey county, along with other political subdivisions of this area has lost several valuable animals from this disease, a few miles being included in the list. It is generally attributed to a fungus which grows on weeds and other plants, setting up a poison action in the animal. Outward appearances are somewhat similar to "blind staggers," but the animal apparently has good sight throughout the entire course of the disease.

Veterinarians treat it with a specially prepared serum, which has been diffi-

cult to obtain because of excessive demand. However, it is said by druggists there are other remedies on the market prepared by chemists which are just as effective toward a cure, and may be obtained at most local drug stores. Some are using these proprietary preparations and finding desirable results, according to reports.

This serum is known as Polyvalent Botulin antitoxin. This given to the animal in two doses of 25 cc from 8 to 100 hours apart has been found to give very good results in all cases. As a preventive for horses, a vaccine is on the market which is used and is claimed to give permanent immunity with two vaccinations. The name of this vaccine is Encephalomyelitis vaccine. A dose consists of 25 cc, followed in 15 days by another 25 cc for permanent immunity. There are probably other curative remedies also on the market.

General News Over Texas And Adjoining States For The Week

A hole 16 feet deep and 42 feet long was recently formed by a mysterious sinking of the soil in southeastern Cottle county.

The U. S. A. Presbyterian synod meeting at Plainview last week voted unanimously to favor teaching of the Bible in public schools.

The annual convention of the Will Rogers (No. 66) highway association will be held at Amarillo Monday, Nov. 22.

Texas Tech livestock judging team won first place at the American Livestock show at Kansas City last Monday.

The next annual convention of the West Texas Teachers association will be held at Big Spring, March 4 and 5. It was announced last Saturday.

John Stovall, farm agent in Castro county, reports 129 trench silos will be in operation in that county this year. 99 more ones have already been dug and filled.

An oil portrait of U. S. Senator Morris Sheppard has been accepted by the State Senate to be hung within those walls, occupying a place near the painting of the late Senator Joe Bailey.

Contracts totaling \$256,769 for a new library building at Tech college, Lubbock were awarded last Saturday, Nathan Wohlfeld, Dallas, receiving the general contract on a low bid of \$219,490. Other contracts for heating, plumbing, furniture, etc., were let.

Granting of charters for new business concerns in Texas declined 27.5 per cent in September over the preceding month, capitalization of such also showing a decline of 24.1 from September of last year and 49.6 per cent over July this year, according to Texas Bureau of Business research.

Work of tearing down the old Roosevelt county court house at Portlan, N. M., was begun last week to make room for the new \$120,000 structure, erection of which will begin early in December. Salvaged material from the old temple of justice will be used for construction of permanent buildings at the Roosevelt county fair grounds.

CHILD LABOR DECLINES

Child labor has shown a striking decline since 1900, the number of children employed in manufacturing industry today amounting to but one-half of one per cent of total manufacturing employment.

All the time there are fewer and fewer children at work and more at school.

France imported American fishing tackle to the value of \$42,694 in 1936.

Old Shoes Count In Votes For Queenly Honors At Carnival

Arrangements are being made for the annual Halloween carnival to be held Friday night and each group of last week's work and each group chose their queen as follows: Miss Lorena Wills, seventh grade; Miss Nona Johnson, freshman; Miss Lela Mae Barron, sophomore; Miss Joe V. Gools, junior and Miss Rosa Renfro senior. Each class is diligently selling votes for their queen... High school class meetings were held Friday afternoon of last week... The votes are one penny each and each pair of old shoes given counts 25 cents... Judge R. C. Hoping, former official in both Lamb and Parmer counties, will know here, is displaying in his Elwood farms office at Lubbock a prize Porto Rico yarn weighing nine pounds and one ounce, that was grown on his farm near Roundup, just over the line in Hockley county. The yarn measures 22.5 inches around the center, is 14 inches long from tip to tip, being 33 inches in circumference the long way. Yarns raised on this six acre irrigated tract are averaging from one to two pounds each, the Judge said. He harvested over 1,000 bushels last week and expects between 1,600 and 1,800 as the total yield. All of them go into a curing house except those to be used for seed next year. More and more Texas cotton growers are coming to realize the benefit of growing just one kind of cotton in a given community, and requiring that shall be one of at least medium length staple. The East Texas Chamber of Commerce encouraged such procedure this year. For instance, in Harrison county

444 CLUB HAS MEETING

Members of the Triple Four club met Friday afternoon of last week at the home of Mrs. Dick Rockey, with six members present. This club was formerly called the 'Sew and So' club and was disbanded during the summer months but was reorganized the first of September. New officers were elected then and 12 members joined with spinners. It costs the postoffice department between five and six million dollars to handle the mail at Xmas time.

JUDGE RAISES SOME YAM!

More and more Texas cotton growers are coming to realize the benefit of growing just one kind of cotton in a given community, and requiring that shall be one of at least medium length staple. The East Texas Chamber of Commerce encouraged such procedure this year. For instance, in Harrison county

ONE VARIETY COTTON GROWERS

More and more Texas cotton growers are coming to realize the benefit of growing just one kind of cotton in a given community, and requiring that shall be one of at least medium length staple. The East Texas Chamber of Commerce encouraged such procedure this year. For instance, in Harrison county

OBS Initiate Member; Will Hold Carnival of Spooks Friday Night

The local chapter of Eastern Star organization at the Masonic hall Tuesday evening of last week. The purpose of initiating Mrs. Opal Brooks into the order. Several members of Morton and Sudan chapters of the O. E. S. are present. After the chapter was duly opened and the candidate initiated, she responded with a very appropriate talk. Delicious refreshments were served by the refreshment committee. Mrs. Evelyn Boone and Mrs. Inez Bobo, Miss Evelyn Boone and Mrs. Brown Cox, assisted by Mrs. Zulu Carlie. Among out of town guests were: Mesdames Ethel, Pearl, Beth Salton, Catherine Peachey, Catherine Dean, and Lett Johnson of Sudan. Mesdames Rachel Turner, Roney Rockey, Nellie Brown, Mattie Lou Newkaver, Ethel Fausel, Erna Wier, Mr. and Mrs. Henry Johnson, Mrs. Wood and Mrs. Mae Taylor. The initiation of Mrs. Opal Brooks into the order. Preparations are complete for the 42 tournament and Halloween party to be given by the local chapter at the American Legion hall in Muleshoe Saturday night. The evening tickets are practically all sold and much enthusiasm is evidenced by all. The local chapter is fortunate in securing a lot of town fortune teller who will be on hand to furnish services prophesying the future for all who desire. An interesting program has been arranged for the refreshment hour. Ladies at Sudan. His mother, who had been ill for several weeks, passed away late Monday night and funeral service was held Wednesday afternoon, several from here attending. BEST by in Hereford Shallow-water District. 125 acres almost adjoining town. \$1250 for quick sale. Terms. See J. R. Lewis, 501 N. Taylor, Major, Box 475, Hereford, Texas. 11p. K. J. Edwards, district extension agent, was in Muleshoe Monday, October 18, to confer with County Agent W. O. Taylor on extension work in the county. This was Mr. Edwards regular monthly visit. MALE HELP WANTED 'Steady reliable man to retail Watkins milk products among rural families. Watkins Dealers are successful and prosperous. No cash required. Apply to J. R. Lewis, 501 N. Taylor, Major, Box 475, Hereford, Texas. 36-32c. Miss Estell Lackey, Morton, who was among the pep girls in the auto week a couple weeks ago, left Friday of last week for Littlefield where she still remains a while with her sister and receive medical treatment. She was among the seriously injured ones, sustaining three broken ribs, spine injury and system shock. The accident was when she was picked up from under the tonneau of the car where she had been wedged as the car tumbled over. The Foot of the Fly According to the United States Bureau of Entomology the foot of the fly contains two curved lateral claws, between which is a pair of membranous pads. These pads are covered below with innumerable closely set hairs which secrete a small amount of viscid liquid. This liquid enables the fly to walk upside down on a smooth surface.

1,245 farmers bought and planted 11,000 bushels of state certified cotton seed of one variety, which is said, when all picked, will yield around 50,000 bales, and an increased income of \$150,000 to those growers.

Specialists now say that Texas cotton has been so blacklisted by buyers it is going to take several years of better staple growing to bring it back into repute with spinners. It costs the postoffice department between five and six million dollars to handle the mail at Xmas time.

SAVE BEST OF COTTON SEED

Notwithstanding the fact present cotton market conditions are far from being desirable by growers, ginners and far-sighted growers have already begun suggesting that the best of growth cotton seed should be saved for next year's plantings.

The idea of growing better cotton of longer staple has already begun to take hold in this area with indications that more of the longer type staple will be grown in the future. The federal government has indicated it will step into the game with an effort to hold cotton seed prices up. Should that become a fact it will be much cheaper for growers to save such good seed as

they now have for this season's growth. Many cotton growers of this area who had to repent from one to three times this year have not forgotten the difficulty in obtaining desirable seed, some of them finally having to plant an inferior quality. Good seed may be quite scarce next year.

THE CUB SCOUTS' PROGRESS

NEW MEMBERS ARE ADDED Slowly but surely the Cub Scout organization has been going forward, according to Director Claude Gallman. It is our hope to have everything in full swing by the end of the week," he said. Since all officers have not either registered or been appointed, no report will be given this week. Announcement will be made next week concerning the entire organization.

Cub Scouts officially enrolled are as follows: H. H. Carlyle Jr., Nevt Holt, Noah Holt, Billy Pierson, Dick De Shazo, Frank Foster, Paul Gardner, Ray Riddle, Billie Jim St. Clair, Buddy Taylor and Loyd Alsop. Tentative members are expected to complete their enrollment blanks and return them with their fees before the end of the week. The total enrollment is expected to exceed 160 by the end of the month. The above named members had a great day last Saturday. In one of their dens we assembled to build tool boxes for the tools. Hammer, saw and re-sounded until late afternoon. Before they were dismissed however, three tool boxes were completed and painted. The boxes were constructed from 1x12 lumber with a length of five feet. Lids were placed on with hinges and gaskets attached to lock them," said Prof. Gallman.

Next Monday afternoon at 4:30 and each Monday afternoon thereafter, the Scouts will have their regular meeting. It is urged that parents make a special effort to enroll their boys so that they can be one of the gang at the first meeting.

Gases in Sea Water

The water of the ocean, like any other liquid, absorbs a certain amount of the gases with which it is in contact. Sea water contains dissolved oxygen, nitrogen and carbonic acid absorbed from the atmosphere.

WEST CAMP H. D. CLUB REPORT

The H. D. club met with Mrs. Roy Sheriff, Wednesday, Oct. 13. Four different salads were made by Miss Alma Stewart: beet, carrot, bean and cabbage, and served in pottery dishes, were very attractive. Mrs. M. A. Snider gave a report on the Texas Home Demonstration convention she attended at San Antonio. The hostess served delicious cake and nuts to Miss Glen Bell Rice and Miss Alma Stewart, Muleshoe; Messdames Willie Williams, Johnnie Williams, Jodie Bright, Grady Sheriff, M. A. Snider, E. L. Smith, Luther Blakley and Claude Gallman, Lubbock. Next meeting will be with Mrs. B. Walter, Oct. 27.—Reporter.

MANAGEMENT IS CHANGED

Audie Marcus of Portales, N. M., took over management of the Lubbock Poultry and Egg Co., and Crystal Ice business in Muleshoe Friday of last week. The concerns having formerly been managed here since the new building was erected by Mr. and Mrs. O. J. Aycock. Mr. Aycock had been in Lubbock for the past few weeks working for the Crystal Ice Co., and his family moved there Friday of last week. Mr. Marcus had previously been employed with this same company in the Sunshine state and moved here with his wife Friday of last week.

RECORD EMPLOYMENT

Employment in U. S. manufacturing today is at the highest point in history, with 500,000 more persons on the payroll than in 1929 and 5,000,000 more than the low point in 1932.

PROFIT AVERAGE LOW

Profits in American industry for the eleven year period 1923-1933, including both boom and depression years, averaged but 4 per cent of capital invested.

Parents Are Warned To Protect Children From Diphtheria

Austin, Oct. 18.—State Health Officer Geo. W. Cox urges all parents of children between the ages of six months and ten years who have not been immunized against diphtheria, to take them to their family physician and have this done at once.

The first ten months of 1937 saw 1,637 cases of diphtheria reported to the Texas State Department of Health. This is an increase over 1936's figures, and shows the need of immunization of children in this age group. It was not many years ago that parents dreaded diphtheria because of inability of the medical profession to either prevent or cure the disease. But today when we know both the cause and the cure there is no obstacle but negligence which will prevent the complete elimination of the disease in Texas.

Diphtheria is most dangerous to the very young children, and it is especially important that immunization against it be given early in a child's life. In young children there is practically no reaction to the injection. Immunization has been proven to give absolute protection. "It is in the power of the parents of Texas, cooperating with their physician and the Health Department, to eliminate the disease," Dr. Cox stated. "In about six months after immunization the child should be given a Schick test to determine whether further treatment is necessary. Early immunization against diphtheria is a routine procedure with up-to-date doctors. Cooperate with your family physician and your community and make early immunization a regular practice in Texas."

"WORTH THINKING ABOUT"

In a recent Saturday Evening Post, John Fort writes, "I Work For A Power Company."

He describes himself as a typical white-collar worker approaching middle age. His salary is less than \$200 and more than \$100 a month. He has a wife, three children, and "a small house on which there is a big mortgage." The power company is in the Southeast. The Tennessee Valley Authority has taken over the power business with government money—taken from all taxpayers—is paralling his company's lines and preparing to take away a substantial part of its business.

John Fort is wondering what is going to become of him and his job—the man that stands between his family and the job that owns the mortgage on the home, the doctor, the groceryman and everyone with whom he does business. "So far as I am concerned," says John Fort, "my government is taking sides with the crowd which tries to gobble up my best check, so right at this point I stand up and ask, 'Why? I ask why because I'm one of the class of citizens for whose benefit it is said that all this whooping and hollering about utility has been done.' Frankly speaking, I am about to lose my patriotism, so I am."

The jobs of many John Forts are supported by the government's policy of competing, on a tax-free, subsidized basis, with private business which is heavily taxed and stringently regulated and has long served the public efficiently and economically. There is no reason for believing that government, unless it is checked, will be satisfied with gobbling up the power business. Already the politicians are looking toward the railroads, WPA, and other government agencies, banking, printing and publishing? If government is justified in producing and selling electric power, why not other things from their experimenting and look for the heavy-shouldered family men to withstand the attack which they provoked—and that that was gone.

That eventually it is worth thinking about—even worth the politicians' thinking about."

EDITOR'S EXPERIENCE IN GETTING SUB. RENEWALS

A few days ago the Journal sent out a letter to 10 each of its most valued subscribers, reminding them their subscriptions were about expired, and gently begging them for their re-acceptance would be appreciated. Five of them promptly paid up. One replied that he would pay 'next week'—but he died. Another said he would pay 'the next time he saw us.' He went blind. Still another telephoned he would rindown and pay some time soon.' Now he has rheumatism and can't even walk. The number said he would 'see us in h--' first. He got religion the other night and won't be able to keep the appointment.

The tenth one has not yet been heard from, and for ought is known at this office he may be the party who is now reading this experience. His name has not yet been taken off the list because (never send) material to see it there. The management feel it has been a pretty good sport to leave it there, and will appreciate him being an equally good sport and see that it stays 'put'!

There are 48,208,310 pieces of the old large size currency still in circulation.

OUR PROGRESS

From 1879 to 1929 horsepower used in industrial plants increased 12 1/2 times; factory wages 124, times and jobs 2 1/2 times. During that period our population increased only 2 1/2 times.

Conquering Difficulties

READY TO BRING YOU RELIEF IN MINUTES

THE REASON BAYER ASPIRIN WORKS SO FAST

Drop a Bayer Aspirin tablet into a tumbler of water. By this time it hits the bottom of the glass it is disintegrating. This speed of disintegration enables genuine BAYER Aspirin tablets to start "kicking heat" at headache and minor pain a few minutes after taking. YOU can pay as high as you want for remedies claimed to relieve the pain of Headache, Rheumatism, Neuritis, Sciatica, etc. But the medicine so many doctors generally approve — the one used by thousands of families daily — is Bayer Aspirin — 15 a dozen tablets — about 1 1/2 apiece. Simply take 2 Bayer Aspirin tablets with a half glass of water. Repeat, if necessary, according to directions. Usually this will ease such pain in a remarkably short time. For quick relief from such pain which exhausts you and keeps you awake at night — ask for genuine Bayer Aspirin.

15c FOR 12 TABLETS Virtually 1 cent a tablet

DELINQUENT TAX NOTICE!

Notice is hereby given that October 30th has been set as the final date on which delinquent taxes may be paid without penalty or interest. You may pay your delinquent taxes any time up to and including October 30, 1937 without penalty or interest. After that date action will be taken for the collection of delinquent taxes, to which will be added all penalty and interest.

This notice is given in order to give you the opportunity to save the additional cost of penalty and interest on your taxes. —CITY OF MULESHOE, TEXAS Issued by order of the City Commission, October 12, 1937.

It's Here!

THE REST OF THE RECORD

By James V. Allred
Gov. of Texas

The last week of the special session has rolled around and throughout the State there are sightless eyes, withered hands and helpless baby arms raised in supplication to the Legislature of Texas. There are others going about the daily class-room duties of educating the youth of the State, bending under the weight of years, and wondering "if" a retirement system will be set up for the teachers.

These are the ones who have watched the legislative session from a distance. Unable to come to Austin, some unable to vote, they have waited patiently for the Legislature to do its duty and raise revenues for old age assistance, aid to the needy blind, dependent children, and for the teachers' retirement fund.

There has been another group stalking the corridors every day since the session began, crowding the legislative galleries, and intently watching the efforts to raise revenues by taxing the pipe line companies, the oil, sulphur, and other natural resource groups.

It has been the biggest, most powerful lobby Texas has ever witnessed in Austin. It is confidently and complacently awaiting the verdict of "no taxes."

Meanwhile the destiny of our unfortunate people lies in the hands of the Legislature.

The people have been told that I want to lay heavy taxes upon all the people. That is not true. A "hullabaloo" against this session has been raised and the cry swelled in volume that we must not levy taxes for the social security program voted by the people. When did this "hullabaloo" first arise? I'll tell you when it was.

After the Legislature voted these appropriations and went home last June everyone knew then that we were going to have another session in September to raise the money to pay the bill. But when I announced six or seven weeks ago that I was going to recommend taxes on the big pipe line companies,

and others who have been growing pompous and prosperous by draining our natural resources—then the hue and cry started.

When I said that I had recommended these same taxes before, that the program had been scattered and that I was going to find out at this special session who was running Texas—that's when the selfish interests, through their mouthpieces, started a campaign of propaganda.

They tried to make real estate owners believe that the people's program would raise their taxes; but they overlooked the fact that I had helped to lower these property taxes to the lowest point in over twenty years. They announced a great taxpayers march on Austin, 68 marchers finally rolling into Austin in Cadillacs and limousines, headed by a man whose chamber of commerce organization receives two thousand dollars a year contribution from the sulphur company alone.

The attitude of these people may well be judged by the leader they have chosen in the Senate against taxes for the needy. He is the same man who last year voted for a sales tax upon the poor; and then, when an income tax on the earnings of the rich was proposed, walked the floor and ranted that it would ruin Texas.

I'm not the only chief executive criticized for calling special sessions. When a few days ago President Roosevelt called a special session of Congress to help the farmers, he said: "I know that many enemies of democracy will say that it is bad business, bad for the tranquility of the country, to have a special session."

Fewer turkeys will be shipped this year from south Texas than went out last year, it was said; but the quality will be much better. Four or five cars is the indicated shipment from Burnels county area. San Angelo will have about the same quantity. Brady will have less; but better birds. Plainview expects to ship about five cars.

I've done my part. I've called this Legislature in special session and made my recommendations. For these things I shall continue to fight, but the destiny of our unfortunate people lies in the hands of the Legislature.

Indications For Better Turkey Price Says An Easterner At Meeting

Six pools of dressed turkeys were provided for last week when directors of the Southwestern Turkey Raisers association met at Plainview. Present indications are that between 25 and 30 carloads of these birds will be handled by the association this season.

Ben L. Brown, eastern sales representative of two large cooperative marketing associations, who attended the meeting, said:

"The surplus in storage stock of turkeys will practically be absorbed by November 1, he said. There is an estimated supply ten per cent less than last year, consumption is good and the price outlook is favorable. Poultry supply is short and quoted at eight to ten cents above last year, he said, which is another factor pointing toward good turkey prices. Other meats will be in short supply until the feeding belt has finished large quantities of beef and pork and the price will be relatively high until after the Christmas market, despite recent declines in beef and pork products."

Fewer turkeys will be shipped this year from south Texas than went out last year, it was said; but the quality will be much better. Four or five cars is the indicated shipment from Burnels county area. San Angelo will have about the same quantity. Brady will have less; but better birds. Plainview expects to ship about five cars.

OIL WELL DEVELOPMENT

No definite reports are available as to the two oil test wells going down in southern Bailey county. Tuesday night it was reported the McCelvey well was down a little over 4,000 feet, drilling in anhydrite. The Enochs well is said to still be trying to case off contacted water below the 3,100 foot level.

HALF THE RADIOS

The Bureau of Foreign and Domestic Commerce has reported that in the United States there are approximately 50 million radio receiving sets—more than half of the total of the 56,225,000 sets in the entire world.

Wages in the Irish Free States are declared to be the highest in Western Europe at present.

BAILEY CO. HOME DEMONSTRATION CLUB NEWS

By Miss ALMA STEWART
Home Demonstration Agent

Wraps Apples for Storage
"I have just finished wrapping two bushel of apples," said Miss Dottie Witherling of Y. L. She wraps each apple separately and packs them in boxes so they will keep for winter use.

"Helps Child Help Herself"
"I have found an old upright Victoria cabinet makes a good wardrobe for a child," announced Mrs. Lena Dantell, clothing demonstrator of Joyland home demonstration club.

She is teaching her child to help herself by making the wardrobe low enough that a small child can reach it and learn to hang up her own

clothes. Her husband made a rod for hangers and she put shoe and sock pockets on the door. This makes a nice looking piece of furniture and was easily made.

PREPARE BASKETBALL COURT

An out-door basketball court is being built at the Muleshoe High school this week and girls and boys in the school will begin practice in the near future, according to report.

C. R. Stevens will coach the boys and Miss Addie Bell Fort will coach the girls team.

It is expected the school will have good teams this year and judging by the number of students who plan to come out to make the teams, there will be no reason for them not to have the strongest and most efficient players in the district, it is said.

Say it in Muleshoe.

NET OVERHEAD EXPENSE FOR COTTON PICKERS RUNS FROM \$25 TO \$50 PER SEASON DEDUCTED FROM NET PROFITS

Every big industry has a corresponding big "overhead" of expense before operators can begin figuring profits, and the cotton picking business, one of the largest businesses of Texas, is no exception. When one stops to figure up the actual overhead for cotton pickers, they may stop again while figuring their net profits. Some of these actual expenses are borne by the pickers themselves, while some of it must be deducted from the growers gross income.

To begin, frequently the grower must spend considerable time in trying to locate cotton pickers, also the added expense of using his own or hiring a truck to bring them to the fields of operation. Then there is frequently the item of housing of some description, which sometimes means the purchase of a tent or tents and cooking equipment.

The average cotton picking sack costs about \$1.40 each, lasts on an average of 90 days, which means an investment of \$8.40. Each picker wears out at least one set of knee pads, during

the season, which cost an average of 70 cents each, also a pair of cotton gloves wear out each day, which adds another \$8.00 to the bill, Sundays being excluded.

Cotton pickers must also have clothing, a pair of overalls, jumper, shirt, pair of socks, hat and pair of shoes, averaging in cost about \$7.50. As weather gets cooler, underwear and heavier outside clothes is required, hence purchase of "long-handles," sweat or jacket of some kind is added to the list, representing another cost outlay of from \$3.00 to \$5.00 for the average picker. Taken all in all, scarcely any grower who has much cotton picking to do, can get along with much less than \$25.00 picking expense, while some of them will probably run as high as \$50.00, especially if much housing expense is demanded and he has to go much distance to get pickers. True, in some cases, part of this expense is passed on to the pickers; but whoever pays it, must realize it is an initial overhead that must be met before net profits are figured.

What's Happening In Washington And Other Cities Of Importance

Episcopalians and Presbyterian churches of the U. S., are considering a consolidation.

A six inch snow covered Chicago last Saturday, also sweeping into Iowa, Nebraska and the Dakotas.

A move is now on foot for the amalgamation of all different Methodist churches in the U. S., with indications of favorable action.

Accidents and deaths from automobiles is running about 20 per cent ahead of last year, according to a Washington report.

Mrs. Narzia Lakov, 26, Moscow, Russia, is said to have the world's modern marriage record, having been legally divorced 28 times—and is now married again.

Henry Ford has threatened to abandon his automobile assembly plant at Kansas City because of strike conditions. Officials there are trying to get him to reconsider the matter.

Lack of sufficient federal tax income has convinced President Roosevelt the national budget for this year can not be balanced. The estimated gross deficit is going to run around \$890,000,000.

U. S. Department of Agriculture officials have announced the federal government will participate in the purchase of cottonseed oil, buying it through the Surplus Commodities corporation in an effort to hold up and stabilize prices. This oil last month sold for \$19.25 a ton, compared with an average price of \$35.41 last year and of \$31.10 in 1935.

Secretary Hull, Washington, last Saturday accepted a formal invitation to attend and participate in a nine-power treaty conference of nations over the far eastern crisis, at Brussels, October 30, and designated Norman H. Davis to head this government's delegation. Other delegates will also be in the party which will sail for England sometime this week. Peace by agreement will be one of the principal topics for discussion.

STATE FARM CHECKER HERE

Laymon N. Miller, state compliance supervisor, AAA State office, was in Bailey county Friday and Saturday of last week to spot check farms for compliance under the 1937 program. He worked in cooperation with Cecil Mc-

Leary, county compliance supervisor and W. C. Taylor, county agent.

The purpose of this recheck work by a representative of the State office was to determine the accuracy of measurements made in the county by local supervisors.

SLEEPING SICKNESS AMONG HORSES GROWING LESS WITH COOL WEATHER VARIOUS REMEDIES ON THE MARKET

The sleeping sickness (encephalomyelitis) which, during the past month has spread over this part of West Texas and Eastern New Mexico, claiming victims of several horses, appears to be lessening in its ravages following the recent cool spell, and veterinarians say that with the arrival of killing frost it will be entirely eliminated.

Bailey county, along with other political subdivisions of this area has lost several valuable animals from this disease, a few mules being included in the list. It is generally attributed to a fungus which grows on weeds and other plants, setting up a poison action in the animal. Outward appearances are somewhat similar to "blind staggers," but the animal apparently has good sight throughout the entire course of the disease.

Veterinarians treat it with a specially prepared serum, which has been diffi-

cult to obtain because of excessive demand. However, it is said by druggists there are other remedies on the market prepared by chemists which are just as effective toward a cure, and may be obtained at most local drug stores. Some are using these proprietary preparations and finding desirable results, according to reports.

This serum is known as Polyvalent Botulinus antitoxin. This given to the animal in two doses of 25 cc from 8 to 100 hours apart has been found to give very good results in all cases. As a preventive measure, a vaccine is on the market which is used and is claimed to give permanent immunity to two vaccinations. The name of this vaccine is Encephalomyelitis vaccine. A dose consists of 25 cc, followed in 15 days by another 25 cc for permanent immunity. There are probably other curative remedies also on the market.

General News Over Texas And Adjoining States For The Week

A hole 16 feet deep and 42 feet long was recently formed by a mysterious sinking of the soil in southeastern Cottle county.

The U. S. A. Presbyterian synod meeting at Plainview last week voted unanimously to favor teaching of the Bible in public schools.

The annual convention of the Will Rogers (No. 66) highway association will be held at Amarillo Monday, Nov. 22.

Texas Tech livestock judging team won first place at the American Livestock show at Kansas City last Monday.

The next annual convention of the West Texas Teachers association will be held at Big Spring, March 4 and 5, it was announced last Saturday.

John Stovall, farm agent in Castro county, reports 129 trench silos will be in operation in that county this year, 80 new ones have already been dug and filled.

An oil portrait of U. S. Senator Morris Sheppard has been accepted by the State Senate to be hung within those walls, occupying a place near the painting of the late Senator Joe Bailey.

Contracts totaling \$256,769 for a new library building at Tech college, Lubbock were awarded last Saturday, Nathan Wolfel, Dallas, receiving the general contract on a low bid of \$219,400. Other contracts for heating, plumbing, furniture, etc., were let.

Granting of charters for new business concerns in Texas declined 27.5 per cent in September over the preceding month, capitalization of such also showing a decline of 24.1 from September of last year and 49.6 per cent over July this year, according to Texas Bureau of Business research.

Work of tearing down the old Roosevelt county court house at Portales, N. M., was begun last week to make room for the new \$120,000 structure, erection of which will begin early in December. Salvaged material from the old temple of justice will be used for construction of permanent buildings at the Roosevelt county fair grounds.

CHILD LABOR DECLINES

Child labor has shown a striking decline since 1900, the number of children employed in manufacturing industry falling from 1,000,000 to 400,000, according to a report by the U. S. Department of Labor.

All the time there are fewer and fewer children at work and more at school.

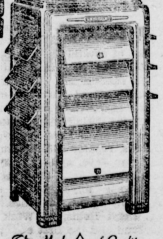

France Imported American fishing tackle to the value of \$42,694 in 1936.

● Mr. and Mrs. R. L. Brooks attended the funeral services of Mrs. J. B. Shorter, held from her late home at a few miles north of Levelland, Thursday of last week.

Old Shoes Count in Votes For Queenly Honors At Carnival

Arrangements are being made for the annual Halloween carnival to be staged Friday night, October 29 at the Muleshoe High school building, at which time all citizens of Muleshoe and pupils of Bailey county schools and the public in general are invited to attend and enjoy this gala affair.

High school class meetings were held Friday of last week and each group chose their queen as follows: Miss Lorene Willis, seventh grade; Miss Nona Faye Johnson, freshman; Miss Leila Mae Farron, sophomore; Miss Joe V. Goins, junior and Miss Rosa Renow senior.

Each class is diligently selling votes for their queens aspirant and up to early Tuesday morning the Sophomores were almost up to the mark.

The votes are one penny each and each pair of old shoes given counts 25 votes. All citizens of Muleshoe and old shoes collected will be auctioned off, and whatever price they bring will be given to the queen.

Flaudie Gallman will have charge of the queen coronation. The races are to start promptly at 10 o'clock on the night of the carnival.

The building will be decorated appropriately with pumpkins, black cats and the regular orange and black streamers of Halloween. An interesting program will be given in the auditorium, some of the numbers to be by the grades of primary and secondary.

There will be dancing in all rooms and up and down the halls to entertain the crowd. Flaudie Gallman and Dr. Stevens have charge of the bingo and ring board booth. Members of the senior class will sponsor a linen table set in the dining room. Belle Reed will manage a shooting gallery and all hunters in this vicinity are asked to exhibit their skill and aim. Miss Lucille Beatty, sponsor of the junior class will manage various booths of miscellaneous articles.

Fort will manage a novelty booth and all other teachers in both schools will be asked to contribute.

Pop corn, peanuts, candy, sandwiches hot and cold drinks will be sold by the students.

Girls will be asked to come masked and costumed, to help carry out the Halloween motif; but it will not be compulsory.

Delicious refreshments of pumpkin pie, topped with whipped cream, and other refreshments will be served by a committee: Mrs. Elizabeth Gardner, Mrs. Inez Bobo, Miss Evelyn Boone and Mrs. Bronza Cox, assisted by Mrs. Zulu Carley.

444 CLUB HAS MEETING

Members of the Triple Four club met Friday afternoon of last week at the home of Mrs. Dick Rocky, with six members present.

This club was formerly called the "Sew and So" club and was disbanded during the summer months but was reorganized the first of September. New officers were elected then and 12 members joined.

One guest, Mrs. Howard Elliott of Lubbock, was present at the last meeting. A delicious refreshment course was served by the hostess, Mrs. Rocky.

Members present were Mesdames A. E. Lewis, Jay Wyrer, Morris Douglass, Finley Pierson, and Cecil H. Tate.

Mrs. Jay Wyrer will be hostess to the club Friday afternoon of this week at their regular meeting.

1,245 farmers bought and planted 11,000 bushels of state certified cotton seed of one variety, which is said, when all picked, will yield around 50,000 bales, and an increased income of \$150,000 to those growers.

Specialists now say that Texas cotton has been so blacklisted by buyers it is going to take several years of better staple growing to bring it back into repute with spinners.

It costs the postoffice department between five and six million dollars to handle the mail at Xmas time.

● Word was received here Tuesday morning of the death of Joe Covington's mother who resided at Sudan. He was former construction superintendent on Highway 214 here but now re-

JUDGE RAISES SOME YAM!

Judge R. C. Hopkins, former official in both Lamb and Parnier counties, and well known here, is displaying in his Elwood farms office at Lubbock a prize Porto Rica yam weighing nine pounds and one ounce, that was grown on his farm near Roundup, just over the line in Hockley county.

The yam measures 22.5 inches around the center, is 14 inches long from tip to tip, being 13 inches in circumference the long way.

Yams raised on this six acre irrigated tract are averaging from one to two pounds each, the Judge said. He harvested over 1,000 bushels last week and expects between 1,600 and 1,800 as the total yield. All of them go into a curing house except those to be used for seed next year.

ONE VARIETY COTTON GROWERS

More and more Texas cotton growers are coming to realize the benefit of growing just one kind of cotton in a given community, and requiring that shall be one of at least medium length staple. The East Texas Chamber of Commerce encouraged such procedure this year.

For instance, in Harrison county

SAVE BEST OF COTTON SEED
Notwithstanding the fact present cotton market conditions are far from being desirable by growers, ginners and far-sighted growers have already begun suggesting that the best of grown cotton seed should be saved for next year's plantings.

The idea of growing better cotton of longer staple has already begun to take hold in this area with indications that more of the longer type staple will be grown in the future. The federal government has indicated it will step into the game with an effort to hold cotton seed prices up. Should that become a fact it will be much cheaper for growers to save such good seed as

they now have for this season's growth. Many cotton growers of this area who had to replant from one to three times this year have not forgotten the difficulty in obtaining desirable seed, some of them finally having to plant an inferior quality. Good seed may be quite scarce next year.

THE CUB SCOUTS PROGRESS

NEW MEMBERS ARE ADDED
Slowly but surely the Cub Scout organization has been going forward, according to Director Claudie Gallman. "It is our hope to have everything in full swing by the end of the week," he said. Since all officers have not either registered or been appointed, no report will be given this week. Announcement will be made next week concerning the entire organization.

Cub Scouts officially enrolled are as follows: H. C. Carlyle Jr., Newt Holt, Noah Holt, Billy Pierson, Dick De Shazo, Frank Foster, Paul Gardner, Ray Kiddie, Billie Jim St. Clair, Buddy Taylor and Loyd Alsop. Tentative members are expected to complete their enrollment blanks and return them with their fees before the end of the week. The total enrollment is expected to exceed 16 by the end of the month. The above named members had a great day last Saturday. In one of their dens we assembled to build tool boxes for the tools. Hammers sounded and resounded until late afternoon. Before they were dismissed however, three tool boxes were completed and painted. The boxes were made of 1x2 lumber with a length of five feet. Lids were placed on with hinges and gadgets attached to lock them," said Prof. Gallman.

Next Monday afternoon at 4:30 and each Monday afternoon thereafter, the Scouts will have their regular meeting. It is urged that parents make a special effort to enroll their boys so that they can be one of the gang at the first meeting.

Gases in Sea Water
The water of the ocean, like any other liquid, absorbs a certain amount of the gases with which it is in contact. Sea water contains dissolved oxygen, nitrogen and carbonic acid absorbed from the atmosphere.

INTERMEDIATES HAVE PARTY
Friday evening of last week members of the Intermediate Epworth League of the Methodist church were entertained with a delightful party given at the Education building of the church.

Various indoor games were enjoyed after which delicious refreshments of jelly, whipped cream and vanilla wafers were served to the following: Willis Farrell, Billy Beavers, Gale Jackson, Theresa, Mary Sue Osborn, Betty Joe Jordan, Clea Nell Bayless, Juanita Farrell, Ida Jane Pool, Sam Damon, Marshall Morris, Barbara Mae Morris, Connie Dale Gupton, Leona Bartley, Geraldine Taylor, Norma Lee Pool, Frank Elizabeth Harden, league sponsor and the Methodist Sunday school and wife.

WEST CAMP H. D. CLUB REPORT
The H. D. club met with Mrs. Roy Sheriff, Wednesday, Oct. 13. Four different salads were made by Miss Alma Stewart: beet, carrot, bean and cabbage, and served in pottery dishes, were very attractive.

Mrs. M. A. Snider gave a report on the Texas Home Demonstration convention she attended at San Antonio. The hostess served delicious cake Miss Alma Stewart, Muleshoe; Mesdames Willie Williams, Johnnie Williams, Jodie Bright, Grady Sheriff, M. A. Snider, E. L. Snider, Luther Blackley, and Miss Wilma Louise Snider. Next meeting will be with Mrs. B. Walter, Oct. 27.—Reporter.

MANAGEMENT IS CHANGED
Audie Marcus of Portales, N. M., took over management of the Lubbock Poultry and Egg Co., and Crystal Ice business in Muleshoe Friday of last week, the company having formerly been managed here since a new building was erected by Mr. and Mrs. O. J. Aycock.

Mr. Aycock had been in Lubbock for the past few weeks working for the Crystal Ice Co., and his family moved there Friday of last week. Mr. Marcus had previously been employed with this same company in the Sunshine state and moved here with his wife, Friday of last week.

RECORD EMPLOYMENT
Employment in U. S. manufacturing today is at the highest point in history, with 500,000 more persons on the payrolls than in 1929 and 5,000,000 more than the low point in 1932.

PROFIT AVERAGE LOW
Profits in American industry for the eleven year period 1923-1933, including both boom and depression years, averaged but 4 per cent of capital invested.

Goodland News

The sun is shining after a week's misty, cloudy weather. More than an inch of rain fell during the week. Miss Geneva McPiercen of Plainview was given in Miss J. A. Newman home over last weekend.

Pauline Tiller had as her guests Sunday afternoon, Fern and Lena Smith, Betty Jo and Norma Lee Pool, Frank Harvey, James Warren, Don Moore, Henry Carpenter, Christine Mendeney, Odessa Luther and Jack Kuykendall, Mildred and Jessie Ray Carter.

Miss June Glascock was in Muleshoe on business Saturday afternoon.—Reporter.

Parents Are Warned To Protect Children From Diphtheria

Austin, Oct. 18.—State Health Officer Geo. W. Cox urges all parents of children between the ages of six months and ten years who have not been immunized against diphtheria, to take them to their family physician and have this done at once.

The first ten months of 1937 saw 1,637 cases of diphtheria reported to the Texas State Department of Health. This is an increase over 1936's figures, and shows the need of immunization of children in this age group.

It was not many years ago that parents dreaded diphtheria because of inability of the medical profession to either prevent or cure the disease. But today when we know both the cause and the cure there is no obstacle but negligence which will prevent the complete elimination of the disease in Texas.

Diphtheria is most dangerous to the very young children, and it is especially important that immunization against it be given early in a child's life. In young children there is practically no reaction to the injection. Immunization has been proven to give absolute protection.

It is in the power of the parents of Texas, cooperating with their physician and the Health Department, to eliminate the disease," Dr. Cox stated. "In about six months after immunization the child should be given a Schick test to determine whether further treatment is necessary. Early immunization against diphtheria is a routine procedure with up-to-date physicians. Cooperate with your family physician and your community and make early immunization a regular practice in Texas."

WORTH THINKING ABOUT

In a recent Saturday Evening Post, John Fort writes, "I Work For A Power Company."

He describes himself as a typical white-collar worker approaching middle age. His salary is less than \$200 and more than \$100 a month. He has a wife, three children, and "a small house on which there is a big mortgage."

The power company is in the Southeast. The Tennessee Valley Authority, paid for and subsidized with government money—taken from all taxpayers—is paralyzing his company's business and preparing to take away a substantial part of his business.

John Fort, a private business man is going to become of him and his job—the job that stands between his family and the man who owns the mortgage on his house, the doctor, the groceryman and everyone with whom he does business.

"So far as I am concerned," says John Fort, "my government is taking sides with the crowd which tries to gobble up my pay check, so right at this point I stand up and ask why. I ask why because I'm one of the class of citizens for whose benefit it is said that all this private business which is going about uplift has been going on."

Frankly speaking, I am about to lose my patriotism, such as it is." The jobs of many John Forts are imperiled by the government's policy of competing on a tax-free, subsidized basis, with private business which is heavily taxed and stringently regulated and has long served the public efficiently and economically. This is no reason for believing that government, unless it is checked, will be satisfied with gobbling up the power business.

Already the politicians are looking toward the railroads. Why not insurance, groceries, banking, printing and publishing? If government is justified in producing and selling electric power, why not other things? And then millions of John Forts will see their jobs destroyed and given to political appointees.

John Fort concludes his Saturday Evening Post article with, "I'm supposed to be steady in a pinch. It's going to be the hell of a note when these youngsters and the jobless are dissatisfied come back from their experimenting and look for the heavy-shouldered family men to withstand the attack which they provoked—and find that they were gone."

"That eventually is worth thinking about—even worth the politicians' thinking about."

EDITOR'S EXPERIENCE IN GETTING SUB. RENEWALS

A few days ago the Journal sent out a letter to 10 each of its most valued subscribers, reminding them their subscriptions were about expired, kindly gently hinting that an early remittance would be appreciated. Five of them promptly paid up. One replied that he would pay "next week"—but he died. Another said he would pay "the next time he saw us." He went blind. Still another telephoned he was getting up and pay some time soon. Now he has rheumatism and can't even walk. The ninth said he would "see us in h--l first." He got religion the other night and won't be able to keep the appointment.

The tenth one has not yet been heard from, and for aught is known at this office he may be the party who is now reading this experience. His name has not yet been taken off the list because it seems "sorter" natural to see it there. The management feels it has been a pretty good sport to leave it there, and will appreciate him being an equally good sport and see that it stays "put!"

There are 48,208,310 pieces of the old large size currency still in circulation.

OUR PROGRESS

From 1879 to 1929 horsepower used in industrial plants increased 12 1/2 times; factory wages 12 1/2 times and jobs 3 1/2 times.

During that period our population increased only 2 1/2 times.

CONQUERING DIFFICULTIES

The wise and the active conquer difficulties by daring to attempt them.

READY TO BRING YOU RELIEF IN MINUTES

THE REASON BAYER ASPIRIN WORKS SO FAST

Drop a Bayer Aspirin tablet into a tumbler of water. By the time it hits the bottom of the glass it is disintegrating. This speed of disintegration enables genuine BAYER Aspirin tablets to start "taking hold" of headache and similar pain in a few minutes after taking.

YOU can pay as high as you want for remedies claimed to relieve the pain of Headache, Rheumatism, Neuritis, Sciatica, etc. But the medicine so many doctors generally approve—the one used by thousands of families daily—is Bayer Aspirin—1/2 a dozen tablets—about 1¢ apiece. Simply take 2 Bayer Aspirin tablets with a half glass of water. Repeat, if necessary, according to directions.

Usually this will ease such pain in a remarkably short time. For quick relief from such pain which exhausts you and keeps you awake at night—ask for genuine Bayer Aspirin.

15c FOR 12 TABLETS Virtually 1 cent a tablet

DELINQUENT TAX NOTICE!

Notice is hereby given that October 30th has been set as the final date on which delinquent taxes may be paid without penalty or interest. You may pay your delinquent taxes any time up to and including October 30, 1937 without penalty or interest. After that date action will be taken for the collection of delinquent taxes, to which will be added all penalty and interest.

This notice is given in order to give you the opportunity to save the additional cost of penalty and interest on your taxes.

THE REST OF THE RECORD

By James V. Allred
Gov. of Texas

The last week of the special session has rolled around and throughout the State there are sightless eyes, withered hands and helpless baby arms raised in supplication to the Legislature of Texas. There are others going about the daily class-room duties of educating the youth of the State, bending under the weight of years, and wondering "if" a retirement system will be set up for the teachers.

These are the ones who have watched the legislative session from a distance. Unable to come to Austin, since unable to vote, they have waited patiently for the Legislature to do its duty and raise revenues for old age assistance, aid to the needy blind, dependent children, and for the teachers' retirement fund. There has been another group stalking the corridors every day since the session began, crowding the legislative galleries, and intently watching the efforts to raise revenues by taxing the pipe line companies, the oil, sulphur, and other natural resource groups.

It has been the biggest, most powerful lobby Texas has ever witnessed in Austin. It is confidently and complacently awaiting the verdict of "no taxes."

Meanwhile the destiny of our unfortunate people lies in the hands of the Legislature.

The people have been told that I want to lay heavy taxes upon all the people. That is not true. A "hullabaloo" against this session has been raised and the cry swelled in volume that we must not levy taxes for the social security program voted by the people. When did this "hullabaloo" first arise? I'll tell you when it was.

After the Legislature voted these appropriations and went home last June, everyone knew then that we were going to have another session in September to raise the money to pay the bill. But when I announced six or seven weeks ago that I was going to recommend taxes on the big pipe line companies,

and others who have been growing pompous and prosperous by draining our natural resources—then the hue and cry started.

When I said that I had recommended these same taxes before, that the program had been scuttled—and that I was going to find out at this special session who was running Texas—that's when the selfish interests, through their mouthpieces, started a campaign of propaganda.

They tried to make real estate owners believe that the people's program would raise their taxes; but they overlooked the fact that I had helped to lower these property taxes to the lowest point in over twenty years. They announced a great taxpayers march on Austin, 68 marchers finally rolling in to Austin in Cadillacs and limousines, headed by a man whose chamber of commerce organization receives two thousand dollars a year contribution from the sulphur company alone.

The attitude of these people may well be judged by the leader they have chosen in the Senate against taxes for the needy. He is the same man who last year voted for a sales tax upon the poor; and then, when an income tax on the earnings of the rich was proposed, walked the floor and ranted that it would ruin Texas.

I'm not the only chief executive charged for calling special sessions. When a few days ago President Roosevelt called a special session of Congress to help the farmers, he said: "I know that many enemies of democracy will say that it is bad business, bad for the tranquility of the country, to have a special session."

I'm glad the President has called Congress to try to do something for the farmers of the nation; and I have no apologies for calling this special session to help our own needy.

I say that when we have placed a just tax upon our natural resources, 8 per cent of which goes outside the State, when we have passed an income tax levied upon the earnings of twenty pipe line companies who made over seventy-eight million dollars net profit in one year, when we have done these things, then it will be time to talk about a sales tax.

I didn't have to call this special session except for my conscience. I could have taken the easy route; and then these special interests would have called me great, but I've gone about

the State, and I've seen misery and want.

I've done my part. I've called this Legislature in special session and made my recommendations. For these things I shall continue to fight, but the destiny of our unfortunate people lies in the hands of the Legislature.

Indications For Better Turkey Price Says An Easterner At Meeting

Six pools of dressed turkeys were provided for last week when directors of the Southwestern Turkey Raisers association met at Plainview. Present indications are that between 25 and 30 carloads of these birds will be handled by the association this season.

Ben L. Brown, eastern sales representative of two large cooperative marketing associations, who attended the meeting, said: "The surplus in storage stock of turkeys will practically be absorbed by November 1, he said. There is an estimated supply ten per cent less than last year, consumption is good and the price outlook is favorable. Poultry supply is short and quoted at eight to ten cents above last year, he said, which is another factor pointing toward good turkey prices. Other meats will be in short supply until the feeding belt has finished large quantities of beef and pork and the price will be relatively high until after the Christmas market, despite recent declines in beef and pork products."

Fewer turkeys will be shipped this year from south Texas than went out last year, it was said; but the quality will be much better. Four or five cars is the indicated shipment from Runnels county area. San Angelo will have about the same quantity. Brady will have less; but better birds. Plainview expects to ship about five cars.

OIL WELL DEVELOPMENT

No definite reports are available as to the few all test wells going down in southern Bailey county.

Tuesday night it was reported the McCelvey well was down a little over 4,000 feet, drilling in anhydrite. The Enochs well is said to still be trying to case off contacted water below the 3,100 foot level.

HALF THE RADIOS

The Bureau of Foreign and Domestic Commerce has reported that in the United States there are approximately 30 million radio receiving sets—more than half of the total of the 56,225,000 sets in the entire world.

Wages in the Irish Free States are declared to be the highest in Western Europe at present.

BUY NOW!

No more bar-room AROMAS

IF YOU use Eveready Prestone, the ONE-SHOT anti-freeze, in your car this winter, you won't be bothered with fumes, odors, over-heating or evaporation. But you will have all-season protection. One filling lasts all winter!

Drive in today, and let us service your car with Eveready Prestone, now green in color.

WARNING!

Before real cold weather arrives, it will pay you to let us check your Radiator for leaks, change the water and heater hose, examine your water Pump for leaks and lost efficiency. If you do not let us HEATER on your car, let us install one—priced very reasonable.
