## Woman's Club Report

The Sonora Woman's Club, organized in 1916, has a theme this year entitled "Showcasing Sonora". The purpose of Woman's Club is to promote the culture and entertainment of its members, and to work for the general good of the community. In light of this, the club's sole project is our library.

Four of the eight monthly meetings will include the Ice House Museum, the Wellness Center, Eaton Hill, and the Caverns of Sonora. Our most recent October meeting was held at the Caverns of Sonora, and we were entertained and enlightened by Bill Sawyer, an employee of the Caverns. Gerry Ingham and Sherry Ingham are owners of the cave and served as hostesses.

## The Wellness Ministry

Life is about balance. How we balance family, work, church, varied obligations and sleep can determine our quality of life. Too much focus on one leaves another area lacking, and ulti-

mately, leads us to feel imbalanced and stressed. We must exercise the same balance in our food choices. Our bodies need

Strive for a 40-30-30 approach: 40% carbohydrate (mostly vegetables and fruits)- 30% fat (olive oil, nuts, high quality butter, coconut oil)- 30% protein (meat, poultry, fish, eggs). This balance will help us get the right nutrients to our bodies. Start making the connection between quality food and quality health.

I will live a balanced life because God's word states that if we are not well balanced we open a door for Satan to come in and devour us. - 1 Peter 5:8

Chelsea Blackbird is in nutrition school studying to be a nutritional therapist.

Nancy Bryan Hunt Powell died on October 7, 2013 at her home in San Angelo, Texas surrounded by family and friends. Nancy was born in San Antonio, Texas on October 21, 1938 to Velma Savell Hunt and Zimri Bryan Hunt. She married James L. Powell February 27, 1960.

The fabric of her life was a tapestry of time shared between town and ranch. Her devotion to her faith, family and friends, led her to travel far and wide as she fostered those connections with adventures that left a positive impact on those with whom she came in contact. Nancy's involvement in the community around her started at a very early age participating in sports, dancing, and as a twirler and drum major at Sonora High School. She was also involved in agricultural endeavors dear to her heart and served as Mohair Queen for the Texas Mohair Association.

After graduating from Sonora High School in 1956, she attended the University of Texas where she enrolled in Plan II Liberal Arts Honors Program. She was an active participant in the Pi Beta Phi Sorority, the Spooks freshman honorary organization and Orange Jackets. Through these experiences, she forged lifelong friendships. Those friendships, along with her undying faith, would be what would sustain her throughout her adult life. As her friends can attest, underneath Nancy's joyful nature was an unparalleled strength and determination. Her contagious laughter concealed a determination and tenacity masking the effort required for her to work through the thirty years of health challenges. The professionals at MD Anderson were astounded at her enduring resilience. She faced the beast of cancer with immense strength. She was a warrior. She was courageous. She possessed a deep spiritual strength which provided her with the fortitude to bear the unbearable with patience and dignity. Throughout her life, her church family, the First Presbyterian Church of Eldorado, was of utmost importance. She actively participated with the Women of the Church serving wherever there was a need, and also as an Elder. In recent years she served on the board of the San Angelo Museum of Fine Arts and chaired the Endowment and Capitol Campaign for the museum. Family came first for Nancy. As a couple Jimmie and Nancy were an example of an extraordinarily bonded partnership, supporting each other in equal measure. Nancy's priority was her two daughters and their families. She traveled regularly to support her children and grandchildren in their pursuits. She was their greatest champion. Her faith manifested itself in the way she lived and in her ability to sense the need to support and encourage others. Making friends came easily to her. Engaged in life as she was engaging, she leaves an echo of laughter like footprints throughout her life and the lives of others.

Nancy is survived by her husband, James L. Powell; daughter Lorrie Uhl her husband Arthur Uhl and their children James, Elisabeth and

Scott; daughter Victoria Johnson her husband Ken and their children Leon, Eli, and Carmen and her husband Stephen Flora. Also surviving are her brother James Hunt, wife Linda, niece Hillary Whitfield and nephew Bryan Hunt.

A memorial service will be held at 3:00pm in the First Presbyterian Church in Eldorado, 2 North Cottonwood Street.

The family would like to thank the staff at MD Anderson Medical Center, especially Dr. Gabriel Hortobogyi and Juana Castañeda; Dr. Tom Granaghan at San Angelo Community Medical Center and Dr. David Cummings at Shannon Medical Center; Hospice of San Angelo, Inc.; the wonderful nurses that aided her in the final days and the many friends and angels that surrounded her throughout her life.

## Meet The Black Widow

AgriLIFE EXTENSION

By Pascual Hernandez, Sutton County Agricultural Extension Agent

With Halloween just around the corner, I thought it'd be fitting to write about the "creepy crawlies". You can't get more creepy crawly than widow spiders, so let's discuss them a little bit. There are four species of widow spiders found in Texas, though the best known is the black widow. Coloration can vary, but they are usually black with two reddish-orange triangles on the underside of the abdomen, forming an hourglass shape. Males and juveniles are smaller and often show more color, with bright markings on their sides or back. Females lay eggs in an oval sac which can hold from 25 to over 900 eggs. Depending on temperature and time of year, eggs usually hatch after about 20 days. Spiderlings will stay near the egg sac for several days where they consume their brothers and sisters. The survivors throw a thread of silk to the wind and are carried off in a process called "ballooning". They eventually locate a sheltered spot where they build a loosely woven web and remain for the rest of their lives. In time, the spiders build larger webs to capture larger prey. Males eventually leave their webs to find females for mating. Most females do not eat the male after mating. Widow spiders do not like being in the open. They can often be found outside in protected areas such as rainspouts or firewood piles. You will also find them in garages, cellars, attics, or water meter boxes. Widows are shy creatures and people are bitten when they accidentally disturb a web. The bite of a black widow sometimes is not noticed, but when it is, it often feels like a pin prick. The bite location will have two red marks surrounded by redness and swelling. The bite reaction is systemic and intense pain usually occurs within 1-3 hours and continues for up to 48 hours. Other symptoms include tremors, nausea, vomiting, leg cramps, abdominal pain, profuse perspiration and rise in blood pressure. It is also possible for breathing difficulties and unconsciousness to occur. If bitten by a black widow, you should immediately seek medical attention. When working in the yard, it is best to wear leather gloves to avoid being bitten by venomous arthropods.
