LITTERA SCRIPTA MANET—THE WRITTEN WORD ENDURES

MULESHOE, County Seat of Bailey County, TEXAS, THURSDAY, JUNE 22, 1939

VOLUME 17 NUMBER 22

Muleshoe Will Get A Storage Ice Locker

That Muleshoe is well assured of a cold storage locker plant are present indications, according to Finley White, who states that \$750 of the required \$1,000 local subscription has already been pledged, and a meeting is to be held at the court house here Saturday afternoon, beginning at 3:00 o'clock to complete the organization.

Much of the first subscriptions for stock were taken at the Chamber of Commerce meeting Friday of last week when business men present subscribed for \$100 in stock at \$10 per share. Both town and country people are lending fine support to the place, White said.

The storage plant unit will be composed of 250 lockers, each 30x3x43 inches, capable of holding 300 pounds of fresh meat. Vegetables, milk or any other product may be stored in this locker containers and kept in fresh and wholesome condition for an indefinite period. The lockers will probably rent at \$1.00 per month or \$9.00 per year.

Following the raising of \$1,000 local stock, proponents have been assured they may obtain a loan of \$2,000 from the Co-operators Bank at Houston for completely financing the project.

At Plainview, Floydada, Petersburg and Lockney, where similar plants have been in operation for some time they have proven a great success, some of them now having from 15 to 75 patrons on the waiting list desiring locker boxes.

About \$250 has also been raised for locating of a similar cold storage plant at Needmore, this county, about 15 miles south of Muleshoe.

\$25 Are Given Away Here Saturday Trades Day

The usual crowd of elephants, proportions jammed the streets and highways in and leading into Muleshoe last Saturday, parking parking space at a premium early in the afternoon, when they came here for buying, enjoying the merits of Trades Day and fraternizing one with another.

Cares and troubles of all kinds were forgotten when farmers raised their tractors into the shed or unhitched their teams, for one and all were taking off for a holiday of visitation and bargain enjoyment.

Several business concerns of various kinds had advertised rare bargains in the local newspaper, where in savings of several dollars were enjoyed by the many who took advantage of them.

J. T. Huggins was the fortunate one to receive the \$10 award last Saturday. Mrs. J. E. Burton, M. L. Howard, Mrs. J. U. Dawson each received awards of \$2.00.

Another pot of \$25.00 has been posted to be given away next Saturday Trades Day, and folks for numerous miles around are cordially invited to attend.

MA Y PLANT FEED ON COTTON ALLOTMENT

Feed crops of any kind may be planted on government cotton allotted land, according to J. C. Smith local AAA assistant, and such crop may be harvested for sale or used on the farm just the same as if no government allotment was involved. The farmer will draw all benefit payments just the same as though the cotton was planted, he said. This ruling does not apply to soil land considerations.

The ruling has been made in deference to the fact that because of dry weather many farmers will not be permitted to plant their cotton allotments.

A. W. COKER GIVES BOND ON CHARGE

A. W. Coker, under a charge alleging attack on a girl, is at liberty following giving of bond in the sum of \$7,500 set by the County Judge of Bailey county and approved by the sheriff. The bond being signed by three friends residing in Cochran county, according to report.

Coker was brought here from Lubbock to make the bond. He waived preliminary hearing and is now said to be visiting with a brother residing in Lamb county.

It is said the case will be transferred to District court for hearing if the grand jury finds and indictment against him.

Keep advertising and advertising will keep you.

Bailey Co. To Have Good Delegations To Short Course

College Station, June 20.—Between five and six thousand farm people will visit the Texas A. and M. campus during the Short Course period of July 5-14, H. H. Williamson, director of the Texas Extension Service estimates.

Accommodations have been provided for 2,500 boys and girls during the 4-H Club Short Course of July 5-7, he said. Around 200 boys are expected to "camp out" and another 900 will be housed under the stadium, while the girls and the remainder of the boys will have dormitory rooms.

Registration of farm and ranch men and women at the July 12-14 Farmers' Short Course is expected to reach 2,500. In addition, a number of special groups will meet at the same time. These include the Institute for Cooperatives, the Texas Agricultural Workers, Texas Agricultural Writers, and Texas Horse, Jack, and Mule Breeders' Association.

County agricultural and home demonstration agents will gather July 10-11 for their annual session between the two Short Courses, as will workers of the Texas Agricultural Experiment Station.

D. L. Weddington, in charge of arrangements for accommodations, said rooms and meals would be available in excess of the expected attendance. "So no one who wants to attend the Short Course need stay away," he pointed out.

While it is not yet definitely known just how many will attend these short courses, Finley White, Bailey county farm agent and Miss Lillie Gentry, county home demonstration agent, state they are anticipating good representative delegations from both men and women organizations as well as from the boys and girls 4-H clubs. Bailey county has always in the past had good delegations to these short courses, programs bringing back with them some of the honors awarded.

Texas Home Owners Save \$12,209,000 On Interest Item

Over 44,000 Texas home owners with H. O. L. C. loans have saved at least \$12,209,000 in interest payments during the last six years, said J. C. Anderson, Jr., state manager of the H. O. L. C. on the occasion of the sixth birthday of the organization, celebrated this month. This amount represents the difference between the interest paid at the H. O. L. C. 5% rate and the higher interest being paid when the loans were refinanced. This \$12,209,000 has been put into circulation in towns and cities all over the state, said Anderson, and has had the effect of an increased income for these home owners.

In six years, \$23,666,376 has been repaid of the principal of H. O. L. C. loans in Texas he continued.

Of the original loans, 2,113 have already been paid in full, though most of them had 15 years to run. At present, 32,252 home owners in Texas have either paid out their loans or else are maintaining their loans in good shape and are well on the road to completely owning their homes.

In calling attention to the way the entire State has benefited from Texas home loans, Mr. Anderson said that over \$1970,000 had been loaned for the purpose of repairing homes, and that the H. O. L. C. itself had paid \$2,056,161 to persons in the building trades in its program of reconstruction and improving for sale the houses it has acquired. This besides providing a vast amount of work, has resulted in greatly improved neighborhood values.

BAILEY CO. 4-H CLUB BOYS ON S. F. TRIP

Bailey county 4-H club boys will be represented this year in the special train to be run by the Santa Fe system to the National 4-H Club Congress to be held at Chicago in connection with the International Livestock exposition, according to Finley White, county agent.

Club boys making this trip are chosen by various agricultural colleges on the basis of individual records made in farm club work as conducted by the Extension departments under direction of the county farm agents.

It has been awarded a quota of 19 boys to make the trip this year. Mr. White says he has about 14 boys who are anxious to go, and there will doubtless be one or more of them who will meet requirements.

TILL DEBT DUE US PART

L. R. Bartley Is A Victim Of Heart Failure Monday

Citizens of Muleshoe were exceedingly shocked early Tuesday morning when it became known that L. R. Bartley, "Uncle Pat" as he was familiarly known, had died suddenly the night before.

He had been talking with his brother, J. J. Bartley, near the Gulf Service station on State Highway No. 7, and they had just parted, his brother going upstairs in the service building to retire for the evening. Uncle Pat called him in the evening, in a distressed manner. He hurried back down stairs, but when he reached L. R., he was lying on the ground in an unconscious condition.

It was only a few minutes later when M. G. Bass, deputy sheriff, Dr. A. R. Matthews and some others passing by also stopped, the doctor pronouncing him dead from heart failure. While it was known by many of his intimate friends that he had been afflicted with heart trouble for some years past, it still came as a distinct shock to many of his death from this difficulty. Recently, it is said, his heart had been bothering him considerably more, he having a serious attack about two weeks ago.

Funeral services for deceased were held from the Methodist church, Wednesday afternoon, being conducted by Rev. Jim H. Sharp, pastor, and interment made in Muleshoe cemetery, members of the local Masonic order having charge of services at the grave.

The church building was filled to capacity by mourning friends and acquaintances. There was an exceptionally large and beautiful floral offering surrounding the casket, and banked against the casket. Mr. Bartley was born in Sullivan county, Mo., March 15, 1868, and at his death was 73 years, three months and four days of age. He came from a family of seven children, having three brothers and a sister still living at his death.

He was married in 1889 and to this union there were born five daughters. He first moved to Bailey county in 1925, and has made Muleshoe his home ever since then.

For several years past he served this municipality as its night police officer. He was a member of the Methodist church and of the local Masonic lodge. Mr. Bartley was one of the very highly respected citizens of this community. He was widely known for his congeniality, always having a kind and friendly word to speak to everyone he met. He was at all times faithful to his civic duties, loyal to his friends, of a charitable nature and kindly disposed to all responsibilities that became his part in life.

He is survived by six children: Misses Lucille and Leona Bartley; Mrs. Jess Murrah, Muleshoe; Mrs. Flora Jones, Slaton; Mrs. F. I. Morgan, Thackerville; Mrs. Alice Jackson, Elbert Rogers, a step-son, Thackerville; three brothers, J. I. "Shorty" Bartley; Bill Bartley, Slaton; "Squirrel" Bartley, address unknown; one sister, Mrs. Matilda Brady Webb, Durant, Okla.

Border Baby Wins In Coast To Coast Play Given Here

Thirty-two dollars was cleared from "Coast to Coast," a three act musical-comedy, presented at the Muleshoe High school building Thursday and Friday evening of last week, sponsored by members of the Muleshoe American Legion post.

The interesting and entertaining cast included all local people. The play had a fast moving plot, covering efforts of Joan, Jo Beth Solomon to raise a mortgage on her music store, her friends' efforts in assisting her and the final solution, in an amateur contest broadcast from "coast to coast."

Characters included many, chorus girls who did specialty numbers throughout the play, Mrs. Hertha Walker, Richard Smith, Tye Young, Connie Gupton as Sampson, a colorful character, Joe Beth Solomon, Clyde Holland, Miss Hazel Nelson, Leo Baker, Finley White, Wallace Solomon and Mrs. Walter Witte. K. K. Smith was master of ceremonies on the broadcast and Mrs. Clyde Holland was pianist for the occasion.

The Muleshoe Stringers, accompanied by Miss Gloria Gowdy, performed before the curtain raised and between acts.

An added feature was a "Beaux and Belles of 1939" contest. About 15 babies of Muleshoe were entered in the event and votes were counted the last night of the play, Ralph Norman Border, smaller son of Mr. and Mrs. Ralph Border, being winner.

NEGROES OBSERVE JUNE 'TEENTH'

Negroes of Muleshoe and surrounding area observed June "teenths" last Monday as per past custom. No matter the press of work, practically all of them took the day off for celebration of different kinds. Some of them went to church, and plenty of them enjoyed the day in hilarious manner.

There was no particular occasion observed by the Negroes in Muleshoe, many of them going to Glynn, N. M., during the day, and some from here attending a baseball game at Littlefield, Monday night.

Lamb Co. Will Vote On Legalized Beer Monday, June 26

Following presentation of a petition containing more than 300 citizens' names to the commissioners' court of Lamb county asking for privilege of again voting on the sale of beer in that county, and the granting of same, an election has been set for Monday, June 26.

Twice before that county has voted on legislation on both times it has failed. On election carried about 1,300 votes, while the next one polled around 2,100 ballots, there being a majority of about 300 against the beer measure. The town of Littlefield has generally been looked upon as wet area, while most of the remaining portion of the county has been considered in the dry column.

Lamb county ministers are unanimous against the election and the sale of beer, every Lamb county paper last week carrying strong protests uttered by the preachers.

It is said there has been a recent ruling officially made which permits certain precincts of a county to go wet or dry while the remaining portion of the same county may vote the opposite. Such a ruling has not yet been tested in the courts for its validity and it is not now known where such opinion will prevail nor what influence it may have upon the coming election in Lamb county.

CLUB GIRLS PLAN A CETA CANYON TRIP

Bailey county 4-H club girls are already looking forward and making plans for their vacation trip to Ceta canyon, August 18. Girls from this county will join the Farmer county girls in the trip, it is said.

Every girl who has completed five years of school will be entitled to make the trip. It's going to be a real camp trip, according to Miss Lillie Gentry, club director, so each girl will take along with her an assortment of grub as well as her own bedding, clothing, etc.

Girls are already working hard on their projects and saving the dimes and pennies needed for expenses. They will leave Muleshoe at 9:00 o'clock, August 18, returning late the afternoon of next day.

Former students of the old Seth Ward college, Plainview, will hold a reunion there at the Hilton hotel, August 29.

Expect To Ship 100 Cars Wheat From Here

Wheat harvest, just coming into full swing, was temporarily halted Tuesday when rain began falling in slow, steady manner, but it has since estimated there will be around 150,000 bushels harvested in this shipping area around Muleshoe. Probably 100 cars will be shipped from here.

The first load of this year's wheat came into Muleshoe last week, and since then several loads have been marketed. An average yield of 10 bushels is being expected, though some fields are yielding from 15 to 26 bushels per acre.

All wheat sold to date is strictly first grade, nice, clean grains showing full standard weight or over per bushel. While Bailey county is not essentially a wheat county, it has been estimated there will be around 2,500 acres to harvest, while much of the wheat in adjoining Farmer county will be marketed and shipped from here.

Eye, also, is showing a good yield, some fields being estimated will run as high as 40 to 50 bushels per acre, where it has been irrigated. The acreage of this grain, however, is small.

J. M. McADAMS OPENS SHOE SHOP HERE

J. M. McAdams, former Muleshoe citizen for about seven years and operator of a boot and shoe repair shop here for nearly four years, has moved his shoe repair shop from Elbert to Muleshoe, locating it in the McCarty building just west of Western Drug store.

Mr. McAdams is an experienced repair man and will be glad to again greet his old friends and former customers.

The Gallup Poll Is Unfavorable To Roosevelt

The Gallup poll, conducted by Dr. George Gallup of the American Institute of Public Opinion, and which has come to be recognized as authority in such straw voting, shows the number of citizens who think Roosevelt could win a third term as president has considerably shrunk.

Gallup asked two questions: Will Roosevelt run again, and if he runs will he be elected. Of course, no one but Roosevelt knows whether or not he will again be a candidate; but 41 per cent of those who answered they thought he would, while 52 per cent said no. There were 45 per cent thought he would be elected if he ran, while 52 per cent thought not. At last 39 per cent said they would not vote for him in 1940 no matter what the Republicans run against him, while 48 per cent favored and 52 per cent were unfavorable to a constitutional amendment forbidding election of any president the third time.

The last vote, compared with those of April and August 1937, and of July 1938, shows considerable change of opinion against Roosevelt.

BAILEY COUNTY HAS A FINE RECORD

J. C. Smith, Bailey county assistant AAA administrator, is in receipt of a statement showing number of applications and suspensions made in District 2 for AAA payments, which places Bailey county as second lowest of all counties in the district.

There were 24,253 applications made in the district during 1938, of which 7,450 had suspensions. Bailey county turned in 1,128 applications with only 130, or 11.3 suspensions, ranking second low, exceeded only by Swisher county. In some counties the suspensions raised as high as 40 to 50 per cent. The average suspension for the entire state was 23 per cent, this county being less than 50 per cent of the state average.

BUS TO PLAINVIEW IS DISCONTINUED

Passenger bus service between Muleshoe, Otton and Plainview was discontinued last Monday on order of the State Railroad commission.

More than three weeks ago Plainview petitioned the Commission to rescind the order permitting discontinuance. Muleshoe and Otton citizens both joining in the petition.

Due to a recurrence of infantile paralysis in the vicinity of the South ranch station, the Tenth Rationmen's round-up, originally scheduled for June 27-28, has been postponed indefinitely.

Baileyboro News

Aged Citizen Dies

A large crowd attended the funeral services held here Tuesday of last week for S. M. Blackshear, 86, Pettit, who resided here a few years ago. He was familiarly known as "Uncle Bud," and died the Monday night before. He had been in poor health for the past year. He is survived by three children, D. H. Blackshear, Cleburne; Callie Yochum, Inola, Okla., and G. L. Blackshear, Pettit, also 11 grand-children and 25 great-grand children.

Rev. Randall, pastor church of Christ at Farwell, officiating, and interment was made in the Baileyboro cemetery.

Mr. and Mrs. Lester Howard are the proud parents of an 8 lb. boy, named "John Lee." Mother and son are doing nicely.

Mr. and Mrs. Pete Blackshear of Scott City, Kans., and Mr. and Mrs. Dick Blackshear of Espanola, N. M., were here for a few days last week.

Mr. and Mrs. Royce Garth of Dallas have moved back here.

Mr. and Mrs. Dewey French and children of McAdoe, were here Tuesday of last week.

D. Warner returned Thursday of last week from San Antonio where he transacted business.

Mr. and Mrs. Shirley and daughter of Littlefield visited Mr. and Mrs. Grover Garth, Sunday.

Mrs. Reed of East Texas is visiting her daughters, Mrs. Wood and Mrs. Huckabee.

The community party was enjoyed by a large crowd Saturday night. Ice cream and cake were served to all present. Everyone enjoyed several musical numbers.

Everyone is invited to see the play "Hilbilly Courtship" at the Baileyboro school house July 8.

Mr. and Mrs. Peck Rogers of Lubbock visited friends and relatives here Thursday and Friday of last week.—Reporter.

Watson News

The Watson 4-H club met at Mrs. Bonnie Mae Long's, June 14. Six girls and the sponsor Mrs. Eiles, were present. The main discussion

was vitamins in diet. Mrs. H. C. Thomas of Maple Wilson, underwent an operation Thursday in a Littlefield hospital for removal of appendix. She is doing nicely.—Reporter.

Penalty For Checks That Are "Hot" Has Gone Up

Austin, June 19.—The cost of writing hot checks in Texas is going up. By vote of 103 to 9, the House has adopted a conference committee bill imposing stiff penalties for the writing of worthless checks in any amount. The existing law was heavy penalties only when the check exceeds \$50.

Under the bill, imprisonment would be possible for the first hot check offense and mandatory for subsequent offenses. Either a fine or a jail sentence could be assessed an initial offender. The penalty for the second offense would be imprisonment from 30 days to two years and that for the third and subsequent imprisonment from two to ten years.

Persons who filed a hot check complaint and then withdrew it because the debt was paid would be subject to a fine up to \$500.

BAPTIST BOYS TO CANYON OUTING

Rev. F. B. Hamilton has been sponsoring a group of boys of the local Baptist church at an intermediate and Junior boys' encampment at Ceta Glen near Happy this week.

They are as follows: Wayne White, Billy R. Inlow, Herbert Griffiths, Richard Dennis, Ray Riddle, Dick DeShazo, Bobby James and others.

A large crowd of boys from this part of the state have been enjoying the various entertainments at the encampment. Prominent speakers have been heard and a missionary from Africa has been present to lecture.

The group was accompanied by Miss Hattie Ray Griffiths, Miss Doris Hamilton and Mrs. F. B. Hamilton.

The current cost of being governed in the United States averages \$523 per family.

FARM TOPICS

PRODUCTION COSTS ARE DAIRY BUGABOO

Proper Choice of Feeds Results in Saving.

By R. H. RUFFNER
Low production costs are essential for profitable dairying, as for any other business, and the ability to choose and use feeds properly helps materially to reduce costs, according to the animal husbandry and dairying department of North Carolina State college.

Live stock farmers should take a tip from the automobile industry, which has lowered production costs by at least 25 per cent in the past 20 years, thereby making cars available to millions of Americans. Dairymen can reduce the cost of their products and make them available to more people by studying the advantages and limitations of feeds and their relative values.

A wide variety of satisfactory feeds are available for dairymen to choose the combinations which are most efficient and economical in balanced rations.

Among the low-protein, or carbohydrate feeds are corn meal, ground threshed grain sorghums, ground or rolled barley, hominy feed, ground wheat, or ground rough rice. About one-fifth to one-fourth more of the following bulkier feeds should be used when they are substituted in the ration: Ground ear corn with shuck, ground grain sorghum heads, and corn and cob meal.

Excellent feeds that give best results when they make up one-fourth to one-third of the total ration are ground oats, wheat bran, rice bran, and alfalfa meal, or other good quality legume hays that have been finely ground. These may be used interchangeably in dairy mixtures.

Milkweeds Poisonous, Sometimes Kill Stock

Whorled milkweeds are poisonous to live stock and sometimes cause losses among horses, cattle and sheep.

Whorled milkweeds have slender stalks. The leaves are narrow and are from two to three inches long. They develop in clusters or whorls of several needlelike leaves around the stalk. The flowers are of greenish white. The botanist's name for this weed is *Asclepias verticillata*.

Common milkweeds have a heavier stalk than the whorled variety. The leaves are comparatively broad, oblong in shape, and placed on opposite sides of the stalk. The flowers are of a rose purple. The botanical name is *Asclepias syriaca*. The swamp variety is known botanically as *Asclepias incarnata*. It has a larger, deeper-hued blossom than the common milkweed.

Milkweeds are deeply rooted perennial plants, producing seeds in pods, with a fleshy material inside the pods. The pods of the common milkweed are larger than those of the whorled or swamp milkweed.

Infertile Eggs Will Hold Flavor Better

Infertile eggs will hold their flavor better and will keep fresh longer in hot weather. To obtain this type of eggs, all male birds should be sold when hatching is completed, and plans made to replace them for another year with pedigreed males from a dependable breeder or at least with males from a reliable source.

Experts offer these other suggestions for successful flock management: Don't sell out the flock of hens but cull out instead. Keep the birds that are and have been heavy layers as indicated by worn feathers, plump red combs and wattles, bright and wide-awake eyes, bleached beak and shanks and a full, spongy, flexible abdomen free from hard lumps of fat.

Since summer days are long enough for birds to consume enough mash without stimulating them, as is the case when a wet mash is fed, it will pay to start cutting down on the amount given each day until the practice is stopped entirely.

Farm Topics

Cold frames, hot beds, and sash houses are used to start early or tender crops.

Farm economists are recommending that farmers pay cash and buy in quantity.

Protection from dampness and from drafts are the two requirements that most poultry houses fail to meet.

Feeding experiments indicate that beef heifers fatten faster than steers in a feeding period of less than 150 days.

Ten per cent of the total of eggs produced in the United States in recent years is estimated to have gone into cold storage.

Buckwheat is good when mixed with other grains but in small quantities, not more than one fourth of the total ration. It is better to feed it in winter than in summer.

Buffalo Bill's Spirit Still Rides From His Tepee High in the Rockies

Under a roof of bright red asphalt shingles stand the simple pine walls of Pahaska Tepee—the spirit home of Buffalo Bill.

HIGH on the slope of Lookout Mountain near Golden, Colo., and overlooking the distant city of Denver, stands Pahaska Tepee. It was built in memory of one of the western frontiers' most famous sons, Buffalo Bill—William Frederick Cody—called Pahaska, the "Long Haired" by the Indians.

The building houses the personal collections of Colonel Cody, including the knife with which he scalped Yellow Hand, the Sioux Chief who engineered the Custer massacre, and Yellow Hand's scalp. It also contains "Lucretia Borgia," the gun with which he killed 4,000 buffalo in one year for the Union Pacific and thus gained the name of Buffalo Bill.

Pahaska Tepee—the spirit home of Buffalo Bill—is typically western. Its walls are of undressed pine and its roof is covered with asphalt shingles of a bright red color, which have replaced the wood shingles first used.

The asphalt shingles give the isolated building much needed protection against sparks and embers from the huge chimney and their bright redness conforms well with the brown sides of the building, the green foliage and grey-gold hills around them.

Pahaska Tepee is managed by Johnny Baker, Cody's foster son. It contains a restaurant, recreation and display rooms as well as Baker's own collection of souvenirs of the great scout.

Col. Cody achieved world-wide renown in 1871 when he conducted a great buffalo hunt for Grand Duke Alexis of Russia, son of the Czar, and Paris and other capitals of Europe as he was with the frontier posts and dim trails across the plains in the early days, when he served as a scout under 22 generals in the Indian War.

In this "Fair" year of 1939, it is interesting to note that Cody presented his world-famous cowboy show at the Chicago Columbian Exposition of 1893. He died in 1917 and is buried beside his wife in a simply marked grave near the Tepee. To millions the world over, however, his spirit still rides the western plains—a symbol of a glorious, adventurous trek into the heart of a continent, of Indian fights, buffalo hunts and quiet in the cathedral-like canyons of the Rockies.

Buffalo Bill, or Pahaska, the "Long Haired," as the Indians called him, was as handsome as he was daring. A dead shot, a skilful guide and scout, his exploits are a real part of the making of America.

Here, beneath this simple monument, lie the bodies of William Frederick Cody and of his wife, Louisa Maud Cody.

Heat Wave Is Broken When 1.38 Inch Rain Falls

The excessive heat wave which has prevailed over this area for several days past was broken slightly Tuesday morning when 1.6 of an inch of rain fell in Muleshoe. However, rainfall of from one to two inches is reported in other sections of the county south of here. Tuesday night there was a heavy rainfall here totaling 1.22 inches, and some portions of the county reporting even more.

The heat wave of June has been the greatest at this time of the year since August 14, 1926, according to

Judge R. J. Klump, local U. S. weather man, who says the temperature on that date shot up to 109 degrees. June 8 and 9 this year, the government thermometer registered 107 and 108 degrees, respectively. Excessive heat in this area is generally delayed until in July and August.

Rainfall to date this year is 6.43 inches, while to the same date for 1938, the total rainfall was 9.02 inches.

The rains this week will be a wonderful invigoration to planted crops, many of which were showing the need of moisture. Even some farmers are now planting cotton with the hopes of a late fall permitting

it to come to maturity, while sudan and all kinds of sorghum grains may yet be planted and mature.

Famous Astronomical Observatory
Like a cubist sculptor's paradise, the astronomical observatory of Sawai Jai Singh stands in the garden of the maharajah's palace in Jaipur, India. It is in strange contrast to modern domed observatories on bleak mountains. Jai Singh, a maharajah, was one of India's most noted scientists. He founded the city of Jaipur, one of the few well-planned communities in the country, in 1728. His observatory was used with the astrological purpose of guiding him in matters of state and personal affairs.

TAX NOTICE

THE LAST HALF OF 1938 TAXES ARE DUE ON OR BEFORE JUNE 30, 1939

SAVE ON 1938 DELINQUENT TAXES

During the month of June you may pay your delinquent 1938 taxes at considerable saving. The penalty of 5% now, will be increased to 8% on July 1st; in addition interest of 6% will be added after July 1st and \$1.00 costs will also be added.

It will be to your advantage to make arrangements to pay your 1938 taxes on or before June 30, 1939.

Statement of taxes which are due will be cheerfully furnished to all property owners upon request.

SUBSCRIPTION RATES

In Bailey County, one year, \$1.50; Outside of County, one year, \$2.00.

Advertising that does not show in its text or typography that it is paid for must be marked as an advertisement. All local advertisements remain in this paper for the time specified or until ordered out. All notices it matters not by whom nor for what purpose, if the object is to raise money by admission fee or otherwise, is an advertisement and when sent in for publication must be paid for at the regular advertising rate per line for each issue printed.

Obituaries, cards of thanks, and resolutions of respect will also be charged for at the same rate.

Any erroneous reflection upon the character, standing or reputation of any person, firm or corporation which may appear in the columns of the Muleshoe Journal will be gladly corrected upon its being brought to the attention of the publisher.

In case of errors or omissions in local or other advertisements, the publisher does not hold himself liable for damage further than the amount received by him for such advertisement.

Editorial

Every Great Attempt is Glorious Even if It Fails

A THOUGHT FOR THE WEEK

He that loveth not knoweth not God; for God is love.—1 John 4:8. The heart of him who truly loves is a paradise on earth; he has God in himself, for God is love.—Lamenais.

WHEELS FOR ALL

We used to think the bicycle was disappearing, along with the horse and buggy. Seldom did you see anyone except the very young riding a bicycle, as of yore, but they became very popular on college campuses and transporting youth to school and men to work, for delivering messages and small merchandise from stores.

Today we think nothing of seeing folks on bicycles. It is a wide move, this one of pedal and coast. It is a healthy move the "bikes" which exercise than this for a muscular workout.

Last year there were about 1,500,000 bicycles sold in this country. That is nearly 250,000 more than were sold at the beginning of the century when the "bikes" was king. Our reason for quoting these figures is to show how necessary it is for more caution when traveling by auto or by bicycle.

It is a traffic problem which calls for every rider and driver to use his head. Wise heads in Muleshoe will tell you there is need for care whether the wheels be two or four local officials might begin by stopping their parking on sidewalks. They have already produced much inconvenience and some damage.

COUNTRY DOCTOR

It pleases us that there is more recognition given yearly to our country doctors. They have been the material for a revival of interest in movies, fiction and on the radio, and it is high time their services and abilities are noted.

There are those who believe that the training and equipment of the country doctor is not up to modern standards, but that is not as true today as in past years. We must remember that the country doctor made up for a technical knowledge with a personal knowledge of the patient and his family for many generations back, and this is an important item in present day medicine. They call it case history.

The country doctor was a pioneer in this field, he battled against fear, superstition and ignorance. He was handicapped by poor roads and unsanitary conditions. He dwelt with all civilization and made the way easier for the modern physician. The country has been given a back seat as eyes turn to large hospitals and expensive laboratories, equipment and training. The time is indeed ripe to speak of the nation's debt and obligation of science, to these our country doctors.

NO AGE LIMIT

What of it, if he is getting up in years? Many a man is at his best after youth has been left behind. At 75 Ford still makes good automobiles. Often one will insist that age is against many a man in being competent. While youth is necessary in business, age has had its experience and the judgment of men over 50 is an assistance in the efforts of the young man.

There is not an age limit to be

put on man's usefulness. The era of the young would be sad indeed without the experience of age to guide it. Business in the hands of the old would become laggard and dull, but all business in the control of the young would perish suddenly. Both the mind of the aged and the energy of the young have their uses in Muleshoe.

Jaunty Journalettes

There are Muleshoe folks who believe that bluffing will cure more ills than preaching can touch.

One nice thing about vacations for some Muleshoe families is that the youngsters from college at least sleep at home.

Beware of the Muleshoe man who says, "I let the other fellow worry about what I owe him." That man is already dishonest.

It doesn't take very long to teach the dumbest man in Muleshoe that he can't get something for nothing if he answers mail-order ads.

There are probably plenty of Muleshoe people who can listen to a movie with their eyes shut; but there are some who can't possibly listen with their mouths shut!

"Is this horseshodish hot?" asked a customer of a Muleshoe restaurant waiter the other day. "It shouldn't be," she replied. "It's been in the refrigerator all day."

Home means lots of things to Muleshoe people; but one important thing that should not be overlooked is that it's a place where one can scratch where it actually itches.

We learned sometime ago there are some men in Bailey county who are really important in public affairs, while there are others who just act that way.

Don't be misled: The Muleshoe man who will come to you with a tall story about another man will also go to the other man with a tall story about you. We've seen that happen here more than once.

There is always something for Muleshoe folks to be thankful for—some of them don't get killed in highway accidents and some of the government calamities hasn't visited others—yet.

SNAP SHOTS

This is some crazy world even our own budgets remain unbalanced.

Life at best is quite a gamble, and especially so when buying cantaloupes this time of the year.

It usually happens that every time something is done to relieve the farmer he has to turn around and put a mortgage on the property.

There may be two sides to every question, but as a rule we don't care much for the other fellow's side.

It doesn't make any difference how pretty the color of the atso, the pedestrian has to settle for black and blue.

Plenty of folks are already planning on the Fourth of July, but enthusiasm for holidays comes close to hitting zero in the average newspaper office.

Pavement Pickups

Noticing where Mr. Roosevelt was suffering from a cold in the head, Jess Osborn, nonchalantly remarked most people around here are suffering from cold in their feet.

Irvin S. Clair, who took his boys fishing a few days ago, swears

THE POCKETBOOK OF KNOWLEDGE BY TOPPS

THE AVERAGE AMERICAN FACTORY WORKER CAN BUY MORE THAN 5 TIMES AS MUCH ELECTRICITY WITH AN HOUR'S WAGES AS A GERMAN WORKER AND ALMOST 11 TIMES MORE THAN AN ITALIAN WORKER.

LAST MONTH FOR THE FIRST TIME IN HISTORY AMERICANS WERE ABLE TO BUY BANANAS—AND AT A COST OF 10 CENTS PER POUND. THIS LUXURY FRUIT WAS DISCOVERED IN 1918.

THE SEWING CIRCLE met with Mrs. W. O. Barber, Wednesday of last week. Some very useful hints were given when the roll was called.

Our hostess served us very refreshing cold drinks. While some were busy sewing, others played Chinese checkers.

These present were Mesdames: W. C. Barber, Bruce Burrisson, J. J. Lawler, Johnnie Johnson, W. O. Barber, J. W. Barber, R. D. Gilliland, S. L. Rollins, I. A. Welch.

Great Understanding "A pretense to great understanding," said Hi Ho, the sage of Chintown, "is at first amusing. It becomes dangerous when it requires you to undertake responsibilities you cannot meet."

These Wisconsin Chester Whites have a bedroom in the middle of a strawstack. Before the straw was thrashed the farmer built a skeleton shed frame with poles—with a pole tunnel—and a pole fence around the edge of his pole stacked stack. Then he blew the straw stack over the pole framework, thus making a hog shelter that was cool in summer and warm in winter.

FARM TOPICS

FARMER CAN SAVE BY CENTRALIZATION

Cornell Experiments Show Benefits of Plan.

By L. M. HURD Centralization of buildings and operations to save travel, time, and labor is the main idea in planning a modern poultry plant, according to experiments in Cornell university's poultry department.

In a study of "chore routes" made in Oregon on 125 farms, it was learned how much time is spent and the distance traveled in a year going to and from the laying house, the brooder house, and pullet range.

Poultrymen who traveled the least, going to and from the laying house, covered 62 miles a year and took 37 hours for the chores. Those who traveled the most covered 450 miles in 270 hours. The long-distance group traveled from seven to fourteen times as far as the short-distance men.

As a rule all permanent buildings should face toward the south and be on land that slopes gently in the same direction. They should, however, be far enough below the crest of the hill to be protected from strong northern and western winds.

Karakul Sheep Raising Of Questionable Wisdom

Stockmen interested in raising karakul sheep should compare the karakul industry with the regular sheep industry before making their investment, says Con S. Maddox, Washington State college extension animal husbandman.

Stallions Should Have The Best Feed Rations

The choicest, soundest feeds should be reserved for a valuable sire. Main reliance will be placed on oats, bran, and light-mixed clover and timothy or timothy hay. A few ears of corn are of benefit to a stallion that is inclined to keep thin.

Shorts and Middlings

Each American farmer produces food and fiber for an average of three and a half persons in town. American agriculture is now said to use more machinery than any other industry in this country.

THE JOURNAL'S Weekly Scrapbook

Week's Best Recipe Sun-cooked Strawberry Preserves—Stew the berries. Drain and measure the berries. Allow an equal weight of sugar for fruit. For each lbs. of berries measure 1-4 cup berry juice and heat with sugar. Cook and pour over whole berries in shallow trays. Stand in sun for 3 or 4 days, bring indoors each night, dampness will spoil sun-cooking. Allow fruit to remain in sun until syrup has thickened to jelly. If sun does not shine, keep preserves in cool oven. Pack in sterilized jars and seal.

Household Hints Sprinkle dry salt on new fruit stain to prevent it from becoming permanent. Scissors will tarnish if you do not dry them after cutting stems of wet flowers. Cutliss should be washed first in warm water then plunged into cold water to which a teaspoon of starch has been dissolved. A piece of flannel or felt placed in a jar into which used gasoline is emptied, will absorb all particles of dust and leave gasoline clear. To separate leaves of lettuce, after removing outside leaves and core, place under running water.

Kitchen Kinks Broken walnuts mixed with hot maple syrup makes a sauce for vanilla ice cream. Always beat rather than stir cake batter. Beating introduces air into batter. If serving iced tea, a good idea to freeze iced tea into cubes which can be used to chill drink. Steaming is a good way to cook vegetables as it reduces loss of minerals and vitamins.

Sandwich Filling A sweet filling for sandwiches can be made by mixing chopped dates and figs and raisins with little sweet cream. Spread on buttered slices of graham bread. Ordinary cheese grated and mixed with salad dressing, mustard and onion juice for seasoning, makes a good spread.

Inspirational Knowledge and timber shouldn't be much used till they are seasoned.—Holmes.

WATSON DEMONSTRATION CLUB MEETING

"Work saved is time saved," was the discussion theme Wednesday, June 14, at the home of Mrs. Garvin Long. Many helpful thoughts were brought out.

SMART BRIDE- LETS GAS DO THE 4 BIG JOBS IN HER HOME

- 1 GAS FOR COOKING—makes the cooking job easy, New Gas Ranges are faster—easier to keep clean—give finer results than ever.
- 2 GAS FOR WATER HEATING—Plenty of hot water at the turn of the tap with an Automatic Gas Water Heater. Come in and see all these gas appliances.
- 3 GAS FOR REFRIGERATION—Gas refrigerators are silent. No moving parts to rattle and wear. All latest advantages. Economical to use.
- 4 GAS FOR HOUSE HEATING—Nothing to "tend" with a Gas Furnace. No fuel to order or store. No noise, dust, soot. Units are smart, compact.

WEST TEXAS GAS COMPANY

WEEKLY LAY SERMON
SUPEFFLUITIES

By JESS MITCHELL

Every few days we read where Dame Nature has got her methods inextricably confused and produced a monstrosity of some kind. Not long ago I read of a hydra-headed calf born on a farm near Lockney, this state. Just a few days ago many of us saw the picture of a colt having two hooves on each front leg. Recently the x-ray in a Plainview hospital revealed a man had all the internal organs of his body in reverse position. Occasionally people are born with deformed hands or feet, perhaps having too few or too many fingers or toes than was originally designed for human beings to possess. I remember reading in the Bible one time of a giant Philistine who had six toes on each foot and six fingers on each hand. He was an egotistical sort of a fellow. Perhaps because of his size and his enlarged feet and hands he thought himself quite superior to the ordinary run of human beings; but one day his boasting cost him his life, for a fellow by the name of Jonathan, a considerably smaller man, slew him. In these later days we don't have physical giants, only in very rare instances, and it is not often people are born with a superfluous number of digits on their extremities; but there are still plenty of people born and grow up into manhood who have a superabundance of egotism which frequently proves a real hindrance, rather than a help to them. It may sometimes be a hindrance for one to be of dwarf size; but most of us prefer to be of average size rather than being a dwarf or a giant. Nor do I think I would care to have six fingers or six toes on a hand or a foot. Like other folks, I have become quite accustomed to the regulation five, and am inclined to believe the extras would prove quite cumbersome. There are some folks in this world who are classed as the "ten talent" folks; but I have always been partial to the folks of just ordinary talents. During the World War the Germans had a giant gun called the "Big Bertha," that would shoot an

immense projectile 75 miles; but there was no record of it having ever done much damage. The armies of that world-wide conflict also had hundreds and thousands of ordinary guns and rifles which were continually popping off with great damage to their foes. I long ago decided that the curse of this world was its big guns. Every two and four years the politicians of our country go booming all over the nation, making a terrific noise. They get hot and hoarse with vituperation and discussion and condemnation and exploitation; but it's the millions of people who go to the ballot boxes the next day, and with their little white slips of paper, make final decision of the great questions being discussed. Down "among the sticks," at the forks of the creeks and out on these broad prairies there are plenty of workers wearing calico dresses who are cuddling babies in their arms that may some day be Gladstones or Lincolns, Edisons or Mayos, Beethovens or Rufus Chokes. Less than a hundred years ago one of our famous presidents said: "God must have thought a lot of common people, because he made so many of them." I think he was correct in that statement, and while here and there are outstanding geniuses who accomplish great things in life, yet for the most part this old world is kept going in progressive manner by the just ordinary folks. No general could ever win a battle without the multitude of soldiers in the ranks, yet we find plenty of people who are terribly dissatisfied because they are just the ordinary kind. Instead of going ahead and using the ordinary endowment of five fingers and five toes on each hand and foot, they yearn for more of these digits and appendages. They are not satisfied to use the ordinary talents they possess; but yearn for the extras. Of course, we all want to make a success of life. We want to enjoy as much of its comforts and blessings as possible, and I am inclined to believe more of us could

do so if we would only coordinate the work of our hands and feet with our brains. The trouble with most of us is not the lack of opportunity, but rather the ability to use such opportunities. I have consistently coming to me. I firmly believe, many of us would find it a decided hindrance rather than an advantage to possess the fabulous sums for which we strive. I have been intimately acquainted with many people of their vocations and worries, to which they were subjected because of their riches. I have been intimately acquainted with many people who occupied positions of great prestige and power, and I positively know of their vexations and worries. I would like to see every man own his own home, enjoy a reasonable competence through industry; but no one has any business hoarding up more money than they can reasonably use themselves while a citizen of earth. There are plenty of folks in this world today who find their possessions of wealth as awkward and cumbersome as would the man who had a superfluous number of fingers and toes. I do honor and appreciate the man who, being extra successful in the business affairs of life has accumulated great sums and then devotes it to the helplessness of his less fortunate fellow creatures. Philanthropists, to my mind, are not only folks with skilled fingers; but of keen brains and immense hearts. When they manifest their unselfishness in rearing hospitals and homes and institutes for the care and comfort of unfortunate humanity, they are performing a noble work. After all, it is not so much how many fingers and toes one has as it is the use he puts them to. Reinforced by the heart, directed by the brain, the use we put these two implements of work and locomotion to, spells the difference between success and failure.

Sir Charles Bell, famous English surgeon, was so obsessed by the wonders of the human hand that he wrote an entire book about it, going into ecstasies of description and delineation of its twenty-seven bones, its cartilages, its ligaments and its phalanges. Likewise, the twenty-six bones of the human foot are the admiration of anatomists, and whole treatises have been written about them. I could not begin to enumerate to you the wonderful accomplishments of both these physical extremities, for practically every boon and blessing humanity today has, came from the hand or foot while directed by the brain. My heart always wells up with sympathy for the one who has lost a hand or a foot. Such an one may get along with artificial limbs, but they are never so satisfactory. The custom of just shaking hands one with another is one of life's greatest blessings. All the marvelous inventions of today are brought about by human hands and feet. The human hand was made as a grasping organ for grasping as was the foot for walking. It is a marvelous tool to be able to balance one's body upright on their feet. Feet of animals are invariably made for specific uses, but the foot of human beings is made for a wide variety of purposes.

I have a great deal of appreciation for the soldier who has lost a foot or a limb in service for his country. I honor the horny hand of toll possessed by the father who labors for the welfare of his family, or the frail, boy hands of the mother who sacrifices in behalf of her children. There are plenty of folks who will leave behind them mighty monuments as the result of the labor of their hands, and their footprints will be forever marked in the granite of earth where once they walked and lived. They had no extra talents, no superfluity of fingers or toes, just the ordinary physical equipment and spiritual graces with which nearly all of us are endowed; but they used them carefully and diligently while here on earth.

The story is told of four men who were one time conversing on different subjects, and finally began talking about human hands. One of them declared he liked a hand of long, slender fingers. The second favored a big hand that could be developed into a mighty fist when doubled up. The third expressed his favor for a hand of ordinary size but developed by skill. Just then a beggar in dirty rags stepped up and asked for alms. Neither of these three had anything to give him, but the fourth reaching into his purse drew forth and gave to the stranger such change as he had with him. Then with one accord they each asked the beggar what kind of hand was the most beautiful, and he replied, "The most beautiful hand is the one who gave to my necessity." Then the wrinkles and rags began to disappear from the dejected body of the beggar and in his place stood the Christ who long ago said: "Inasmuch as ye did it unto one of the least of these, my brethren, ye have done it unto me."

Caribbean Days of Week Days of the week in the Spanish-speaking countries of the Caribbean are: Sunday, Domingo; Monday, Lunes; Tuesday, Martes; Wednesday, Miercoles; Thursday, Jueves; Friday, Viernes; Saturday, Sabado.

4-H Clubbers Making Plans For Short Course Trip

July 3, at 7:00 a. m., is leaving time for the 4-H club boys who will attend the Short Course at C-lege Station, according to Finley White, 4-H county club leader, and a good delegation is expected, he said. All boys who are doing good work on their projects are entitled to make the trip, since size of delegation is unlimited. There will be plenty of room for all, White said. Some lads will be housed in dormitories while others will be advanced for camp style. There is a \$2.50 reservation charge to be paid in advance, which covers bed and room while attending the Course. About \$3.50 extra will be needed for grub, gas and oil. Saturday, July 4 is the limit for sending in the reservation fee. If it develops any member cannot attend, this amount will be returned to them. The trip will be made in school buses, several club fathers will also make the trip. Going on to the Gulf of Mexico with a swim at Galveston via Austin, and several other educational and vacation features are included. White says he is anticipating a large number of boys to make the trip.

Progress News

Rev. King filled his regular appointment here Sunday. Cleburne Gray is in a hospital at Clovis, N. M., for an appendicitis operation. Mr. and Mrs. Dave Stovall visited her sister Mrs. Pearl Bridges, at Morton Sunday. Her mother returned home with her to spend a few weeks. W. B. Harlan made a business trip to Seagraves last week. Lois Johnson of Wilmington, Calif., arrived Sunday to spend the week in the home of her aunt, Mrs. W. M. Gaston. Vess Garner of Circelback, visited his sister, Mrs. Dave Stovall, Sunday. Mr. and Mrs. Byron Griffiths and Rev. F. B. Hamilton of Muleshoe, visited Morris Gaston, Sunday. Mrs. Dave Stovall shopped in Lubbock last week. Mr. and Mrs. W. B. Harlan and son, W. G., visited her brother, Rev. Charles Griffiths at Olton, Sunday. Morris Gaston returned from Lubbock, Thursday last week and is able to be up after undergoing an appendicitis operation.—Reporter.

WEST C A M P CLUBBERS STUDY REFRIGERATION

West Camp home demonstration club met at Mrs. Lois Baily's, June 17. Miss Lillie Gentry, Bailey county H. D. agent gave very helpful hints on care of the refrigerators. Every family should use their refrigerators to best advantage by placing food that require a high temperature close to the ice compartment. Wash the refrigerator with soda water, which will prevent odor," she said. "If vegetables are gathered too long they will lose their vitamin C." The exhibit committee will show how to set a table and use vegetables for decoration at the garden show in Muleshoe, June 24.

Our new member this week was Mrs. Pat Sanders. Club members present were Mrs. M. A. Snider, Bonnie Williams, Elsie Tar, Iona Miller, Beulah Williams, W. L. Kep, H. S. Gibbs, E. L. Smith, Dixie Dickinson, Roark and Charlie Sellers.—Reporter.

4-H GIRLS WILL GO TO SHORT COURSE

Bailey county 4-H clubs will have a good representation of members at the Short Course to be held at College Station next month, according to Miss Lillie Gentry, county demonstration agent. Among those slated to attend are Sue Leathers, Progress and Alice Hicks, Muleshoe. Mrs. J. J. Gross, Progress, will represent the Home Demonstration council. Other representatives for women's clubs will be Mrs. W. G. Kennedy, Progress, Miss Janie Lou Garth, Baileyboro and Mrs. Clay Truitt, Enochs.

Miss Ila Lee Herrington of West Camp 4-H club has been recognized as the "Gold Star" club girl from this county and will be awarded the gold star pin in recognition of outstanding club work. Members present were Mesdames Alice Dameron, George Garner, E. J. McColum, Jim Clements, J. E. Moore, W. W. Walker, Jerry Phipps, Reba Paton, Jim Robbins, Vess Garner, J. E. Perkins and Clayton Wells.—Reporter.

CIRCLEBACK WOMEN ARE ELECTRICALLY MINDED

The Circleback H. D. club met with Mrs. E. J. McColum, June 15. "Ice boxes should be kept scrupulously clean with the walls dry. A solution of water and soda is an excellent cleanser," said Miss Lillie Gentry, H. D. agent. Instructions were given the ladies in a talk by Cecil McLaury, of the REA office in Muleshoe, on "Electric Service." Members present were Mesdames Alice Dameron, George Garner, E. J. McColum, Jim Clements, J. E. Moore, W. W. Walker, Jerry Phipps, Reba Paton, Jim Robbins, Vess Garner, J. E. Perkins and Clayton Wells.—Reporter.

A Government Wheat Allotment Of Over 4 Million Acres

College Station, June 20.—Texas wheat farmers, who trimmed their acreage drastically last fall in line with a nationwide attack on the wheat surplus, had reason this week to celebrate. The AAA announced a 1940 state wheat acreage allotment of 4,221,706 acres, an increase of 576,533 acres as compared with the 3,644,533 acres allotted for Texas wheat this year. Farm leaders here point out that rejoicing is not solely by reason of the fact that farm program cooperators will have more acreage to seed in wheat this fall. More significant, they say, is the cause behind it. The larger allotment means that wheat farmers have not striven in vain to bring supply and demand more nearly into balance. "Cooperative efforts of the nation's wheat farmers, through the federal wheat program are bearing substantial fruit, asserted V. L. Cade member of the Texas Agricultural Conservation Committee. National harvest of winter wheat this year was estimated June 1 at 523,431,000 bushels, compared with 686,637,000 last year. While drought has done its part, most of the drop is credited to acreage curtailment by farmers who took part in the Agricultural Conservation program. Cade advised producers not to let an optimistic picture cause them to forget the trials undergone as a result of unbridled wheat production. "We mustn't forget the cost at which we have secured the production of an improved wheat outlook has been gained," he commented. "Just because things are beginning to look up is no sign we should toss caution to the winds and under-estimate the need for a high degree of compliance with acreage allotments this fall. Export subsidy and acreage control have gone far to remove the weight of a back-breaking surplus, but the bear isn't whipped by a long shot."

FOR HARVEST! Avoid Tire Troubles and other inconveniences by equipping your truck with MANSFIELD EXTRA MILEAGE TIRES Cord-Lock Sidewalls, Alloy-Rubber tread, new 6-bar thread, other features, backed by a 6 year record of satisfaction from coast to coast. ARNOLD MORRIS AUTO CO. Muleshoe, Texas

Make Every Farm a Factory Every Day of the Year UNITY AND STRENGTH

A father in one of Aesop's fables, wished to prove to his sons that unity is strength. He asked each of them to break a single stick, which they did with ease. However, when he gathered several sticks into a bundle, none of the sons could break it. The same principal of united strength applies to our country's progress and prosperity. As long as separate groups, such as business, labor and government stand alone, the structure is weak. But when all groups decide to go ahead together, nothing in the world can stop us.

MOLINE WHEATLAND LAND AND MONEY SAVERS Cut your plowing costs in half with the original M-M big disc Wheatland plow—because of its wide cut and light draft in comparison with any mold-board plow. The Moline does a better job of plowing, from 3 to 9 inches deep. It scours well and is remarkably free from clogging with its big 26-inch discs, spaced 10 inches apart. The plowing job compares favorably with a moldboard plowed field that has been nicely harrowed. It is strong, sturdy and rigid, prepares ideal seed bed for small grain. Farmers say it "can't wear out." Come in and let us give you free literature and explain more fully to you its superior merits. Fry & Cox Brothers DEALERS Blacksmith, Welding & Machine Shop

LOCALS

- Mr. and Mrs. George W. Fumiller of Morton were here last Saturday on business.
- George Nelson spent the weekend in Amarillo visiting his mother, Mrs. Minter and other relatives.
- R. M. Armstrong of Brownfield was in Muleshoe on business Friday of last week.
- Tye Young was in Lubbock the first of this week attending to business.
- Mr. and Mrs. Earnest Menyard of Sudan, attended the baseball game in Muleshoe Sunday afternoon.
- Jess Osborn has been driving a new Dodge sedan since the latter part of last week.
- FOR RENT: Four room modern apartment. See Helen Jones. -1tc
- Woodrow Lambert of Lubbock, has been visiting relatives and friends in Muleshoe the past few days.
- Mr. and Mrs. Bill C. Williams of Portales, N. M., were in Muleshoe on business Friday of last week.
- S. R. Ellison of Lubbock, attended to business and visited various acquaintances in Muleshoe, Saturday of last week.
- Mr. and Mrs. Howard Elliott of Lubbock, spent the weekend in Muleshoe visiting homefolks and friends.
- Mrs. Myrtle Warren of Amherst, spent the weekend in Muleshoe the guest of Miss Estelle Bates and other friends.
- Mrs. J. H. Sharp and son Wilburn returned from Dallas where the latter was given a medical check-up.
- Miss Elsie Turpin, sales woman in St. Clair Variety store, has gone to her home at Ropesville for a vacation.
- Mrs. J. J. D-Shazo and children returned last Monday from Snyder where she has been visiting her mother and other relatives.
- Miss Edith Simms, who underwent an emergency appendicitis op-

- eration in a Clovis, N. M. hospital several days ago, was brought to her home northeast of town the latter part of last week.
- Mrs. Charles Harris of Sudan, visited in Muleshoe the latter part of last week with her parents, Mr. and Mrs. Will Harper, and friends.
- FOR RENT: Nice 2-room house well located. Gas, electricity, city water available.—JESS MITCHELL.—1fdh
- Mrs. Bonnie Isaacs and two children returned to Muleshoe last weekend from a two week's vacation in Waco where they visited relatives.
- Dick Rockey, formerly of Muleshoe but now of Levelland, spent the week end in Muleshoe visiting homefolks and friends.
- Mr. and Mrs. J. C. Smith returned last Saturday from a weeks vacation amid the mountains of New Mexico.
- FOR SALE: Small scratch pads, 10c pound. Journal office. -1fdh
- Finley White, Bailey county agricultural agent, went to Friona Monday to bring back a truck load of calves for some of his 4-H club boys.
- Mrs. F. C. Skeeters and daughter Miss Geraldine returned Saturday afternoon from Idalou where they spent a week visiting her parents, Mr. and Mrs. A. E. Thornton.
- Miss Eunice Florence, Bailey county farm security economist, left last Saturday for San Antonio to attend the National Home Economic convention.
- Mrs. E. R. Hart has had as her guest for the past few days her mother, Mrs. M. A. Goodson and a niece, Miss Naomi Goodson of Childress.
- C. J. Roach, former Muleshoe business man, now operating a cafe at Lamesa, was here last weekend visiting with his daughter, Mrs. Bill Collins.
- Mr. and Mrs. Buford Butts, Mrs. Beulah Carles and Mrs. Sallie Harden returned to Muleshoe Saturday afternoon of last week from an extended vacation to San Francisco, California where they visited the Golden Gate exposition. They visited other places of interest in numerous states while absent.

- Mr. and Mrs. W. L. Koen of Clovis, N. M., accompanied by his brother-in-law, T. Self of Mountainaire, N. M. visited here Wednesday with Mr. and Mrs. Julian Lenau.
- Dr. Aday's offices are now over Western Drug store, office hours during the afternoon "till 5:30 p. m. Mrs. D. D. Evans, nurse, is employed in this office both day and night. 22-2tc
- Mr. and Mrs. J. D. Boone, of Snyder, who have been visiting their daughter, Mrs. Bentley Gwyn, and husband, returned home last weekend. They were accompanied here by Miss Evelyn Pollard.
- Members of the Half Century club will meet with Mrs. Beulah Carles Thursday afternoon of this week in honor of Mrs. M. A. Goodson who is visiting here from Childress.
- Mrs. Nora Westerfield and Mrs. Cecilia Womack and little son of Clovis, N. M., spent this weekend in Muleshoe the guest of their daughter and sister respectively, Mrs. Louie Rice, and friends.
- Morris Gaston, son of Mr. and Mrs. Walter Gaston, of Progress community, was brought home last week from a Lubbock sanitarium and is recuperating nicely from an appendicitis operation.
- Irvin St. Clair and two sons, accompanied by Bill Stell of Brownfield and James St. Clair of Morton returned the latter part of last week from a fishing trip of several days near Brownwood.
- D. Warner, Johnny Alford, Bailey county commissioners, Attorney Cecil H. Tate and Judge M. G. Miller returned the latter part of last week from a business trip to Austin.
- Harley Sadler, showing here the first of this week, received a telegram last Sunday night announcing the death of his brother Luther at Abilene, from a heart attack. He left Monday night after the show to attend the funeral.
- Miss Elizabeth Harden spent the weekend in Amarillo visiting her sister, Mrs. Mary McLaughy and other relatives. She was accompanied home Sunday evening by her nieces, Misses Wanda and Moietta McLaughy.
- A son was born to Mr. and Mrs. Lowell Dalton last Saturday evening at a Clovis, N. M. hospital, the little one dying the following morning. Interment was made in Muleshoe cemetery.
- Claude Wiseman was here Tuesday visiting friends. He was formerly employed in a local drug store. He recently completed his four year course in pharmacy at State university, Austin and has also taken the state examination.
- Mr. and Mrs. Morris Childers returned home to Muleshoe Thursday evening of last week from Wellington where they attended funeral services of her sister, Miss Ora Land, 22, who died Wednesday, following a prolonged illness.
- Miss Lois West, daughter of Mr. and Mrs. Bert West of Muleshoe, was taken to a Littlefield hospital Sunday evening where she underwent an emergency appendicitis operation. She was recovering nicely, according to last report.
- Dr. J. W. Boyle, accompanied by his wife and daughter are here from Shiner looking after property interests, he owning a good farm in this county. While in this section, they also visited at Clovis and Kenna, N. M.
- Mr. and Mrs. A. W. Copley and family, accompanied by her sister, Miss Maida Chandler, who had been visiting here from Dallas for several days, left the latter part of last week for Austin and other Texas points to visit.
- A marriage license was issued in Muleshoe Friday evening of last week by J. J. Williams, county clerk, to Miss Grace Stapleton and Kyld Flippin of Earth. The couple was married here at the Methodist parsonage the same evening by Rev. Jim H. Sharp.
- Miss Jewell Gentry, nurse in a Bowie hospital, traveling with Mr. and Mrs. Bob Ferguson and children also from Bowie, visited here last weekend with her sister, Miss Lillie Gentry, county home demonstration agent, while returning from a vacation trip to California.
- Mr. and Mrs. S. C. Patton of Tucson, Arizona, were visitors last week with Mr. and Mrs. Roy Bayless and family. They also visited with other friends and relatives near Muleshoe, while enroute to Lubbock, where they visited Mrs. Patton's aunt, Miss Josephine K. Lee, a former teacher in the Muleshoe high school and with other relatives. Mrs. Patton is the former Miss Flora Mae Lee, a graduate of Muleshoe high school.
- Mr. and Mrs. J. D. Border and daughter, Miss Frances Border returned home to Muleshoe Friday of last week from Los Angeles, California, where they visited their sons and nephews respectively, David and Keith Border and families.

Enochs Echoes

- P. A. Altman and Jno. Gunter transacted business in Littlefield, Tu sday.
- Miss Virginia Ruth Crockett of Morton is spending two weeks here with her sister and husband, Mr. and Mrs. R. P. McCall.
- Jess Osborn of the Muleshoe State Bank was in Enochs on business Wednesday of last week.
- Mrs. H. W. Weathers is spending a week at Hot Springs, New Mexico, with her daughter and husband, Mr. and Mrs. L. Star Blackstone.
- Mrs. Carl Mobley, assisted by her sister, Mrs. Chas. Calvert, entertained at her home south of Enochs Thursday afternoon of last week for Mrs. P. A. Altman and Mrs. R. P. McCall, with a miscellaneous show of refreshments of punch and wafers served to the guests.
- Mr. and Mrs. W. E. Kirkland were Morton visitors, Saturday.
- Miss Helen Alsop, granddaughter of Mr. and Mrs. Kirkland left Saturday for Austin, where she will enter a business college. She has been a frequent visitor at Enochs.
- Wedrow Howell and Hulet McCall, students at a business college in Lubbock, came home for the weekend.
- Mrs. J. W. Alford and daughter, Doris and Philip Snow, who are in school in Lubbock, spent the weekend at home.
- Mrs. G. W. Dick, who has been visiting in Weatherford and Borger, for the past month, returned home Saturday morning.
- Mr. and Mrs. Homer Dick accompanied her to Enochs where they will visit a few days before leaving for California on a two weeks vacation.
- Rev. Peters of Bula, filed his regular appointment at the Methodist church Sunday. He was accompanied by his wife. They received a nice response for their members and friends Sunday morning.
- Mrs. L. H. Bates spent Monday in Littlefield with her son, Crawford.
- Mr. and Mrs. Zed Robinson and daughter, Nelouise, went to Lubbock Saturday evening to attend the Stamps Singing convention.—Reporter.

State Doctor Urges Vaccination Against Typhoid Fever

Austin, June 20.—If you have not been vaccinated against typhoid fever within the last two or three years, go to your family physician and have him give you the three "shots" that will protect you against that disease.

This advice comes from the Texas State Health Department, and is addressed particularly to those persons planning vacations away from home or those who regularly go on camping, fishing or such trips.

Typhoid is contracted the way of the mouth. Each can come directly or indirectly from some previous case. You eat or drink the germs that cause the disease, in food, water or milk contaminated by the discharges from persons who are ill with the disease, or who have had it at some time.

Modern medical and public health practices have greatly reduced the occurrence of typhoid, but it is still a menace to those unprotected against the disease. Protection of public water supplies from pollution, pasteurization of milk, inspection and supervision of food supplies, improvement in household sanitation and hygienic habits, better sewage disposal and careful investigation of typhoid outbreaks to

determine the source of the disease are measures which have contributed to the diminution of the incidence of typhoid in Texas. But there are still sources of infection to which individuals are exposed, that cannot be reached by public measures, and for which vaccination affords additional protection.

Persons who are apparently well, but who have had the disease at some time, may continue to discharge the typhoid germs. Such persons are known as "carriers" and if they are not careful in their personal habits they are liable to contaminate any food they touch. Files carry germs from contaminated sources to food, and are another source of typhoid infection.

Health departments, state, city and county, are waging constant warfare against typhoid all the year. Special efforts are made during the vacation period through the sanitary supervision of summer camps.

● O. B. Castleberry, of Wellington, is here this week visiting his uncle, Pat R. Bobo.

CAMERAGRAPHS

HIS MAJESTY, KING GEORGE VI, carries on with the duties of a visiting ruler as he inspects troops drawn up in his honor immediately after his arrival in Montreal.

HERE'S ONE REASON why Meredith Wilton is one of radio's best-dressed maestros—he has a musical tailor! When Wilton stops in visiting he usually ends up by spending two or three hours with tailor Jens Nees (left), discussing the Concert Hall selections on Good News of 1939 and swapping tunes on the violin. The maestro is heard on Good News of 1939 every Thursday over the NBC-Red network from 9:00 to 10:00 P.M., EDT.

NEW YORK'S Museum of Natural History supplied radio program on Jim McWilliams with the right answers to some of the questions used on a recent broadcast of his Ask-It Basket program. Checking authentic sources, McWilliams' research activities took him far afield. Here he's studying animals at the Museum by examining the Orang Outang Group of the famous Cary Haskay collection. Ask-It Basket is broadcast over CBS every Wednesday at 7:30 P.M., DST, and 6:30 P.M., PST.

BEAUTY REIGNS: Beautiful girls all over the country are competing for the title of Miss America. Here now that College Commencement time is here again.

FELIX ADLER has the "time of his life" at the biggest little show on earth on the Big Top Stage of the New York World's Fair. He stands in one of the three rings of the Circus surrounded by acrobats and bareback riders, inspecting with evident pleasure the aerial clowns who brave such dizzy heights. About 100 performers take part in the complete Circus and Circus Parade. The show is continuous and there are two revolving stages presenting different scenes every few minutes.

NOTICE OF ELECTION FOR WATER SYSTEM IMPROVEMENT BONDS, SERIES OF 1939

STATE OF TEXAS, COUNTY OF BAILEY.

TO ALL QUALIFIED VOTERS OF THE CITY OF MULESHOE, TEXAS, WHO OWN TAXABLE PROPERTY IN SAID CITY, AND WHO HAVE DULY RENDERED THE SAME FOR TAXATION: TAKE NOTICE that an election will be held on the 8th day of July, 1939 in the City of Muleshoe, Texas, to determine whether or not the City Commission of the City of Muleshoe, Texas, shall be authorized to issue General Revenue Bonds of said city in the sum of (\$8,000.00) Eight thousand dollars for the purpose of improving the present water system of said City, and whether or not a tax should be levied upon the property of such city for the purpose of paying the interest on the bonds and for the payment of the principal of such bonds at their maturity, and which election was duly called and ordered by that certain ordinance of said City Commission of the City of Muleshoe, Texas, passed and adopted by said City Commission on the 20th day of June, 1939, and which ordinance is made a part of this notice, and is in words and figures as follows, to-wit:

AN ORDINANCE BY THE CITY COMMISSION OF THE CITY OF MULESHOE CALLING AN ELECTION ON THE QUESTION OF THE ISSUANCE OF GENERAL REVENUE WATER SYSTEM IMPROVEMENT BONDS IN THE AMOUNT OF EIGHT THOUSAND DOLLARS (\$8,000.00) THE PROCEEDS OF SUCH BONDS TO BE USED TO IMPROVE THE PRESENT WATER SYSTEM OF SAID CITY, SAID BONDS AS TO BOTH PRINCIPAL AND INTEREST TO BE SECURED BY THE GENERAL REVENUE OF THE CITY OF MULESHOE AND SUBMITTING THE QUESTION OF WHETHER OR NOT A TAX SHALL BE LEVIED UPON THE PROPERTY OF SUCH CITY FOR THE PURPOSE OF PAYING THE INTEREST ON THE BONDS AND FOR THE PAYMENT OF THE PRINCIPAL OF SUCH BONDS AT THEIR MATURITY, DESIGNATING THE PLACE FOR HOLDING SUCH ELECTION AND NAMING THE OFFICERS THEREOF; PRESCRIBING THE FORM OF NOTICE OF ELECTION; AND DECLARING AN EMERGENCY.

WHEREAS, the City Commission of the City of Muleshoe, Texas, has determined the necessity for making certain improvements to the present water system of the said city; and WHEREAS, it is considered to be to the best interest of the City that such improvements be financed by

the issuance of General Revenue Bonds of said city; and WHEREAS, the City Commission has determined that an emergency exists requiring the calling of an election for the purpose of submitting the question of the issuance of such General Revenue Water System Improvement Bonds, and submitting the question of whether or not a tax should be levied for the purpose of paying the interest on such bonds and for the payment of the principal of such bonds at their maturity, to a vote, for the preservation of the public peace, property, health and safety;

NOW THEREFORE, BE IT ORDAINED BY THE CITY OF MULESHOE, TEXAS:

That an election be held on the 8th day of July, 1939, at which election the following proposition shall be submitted:

"Shall this City Commission of the City of Muleshoe be authorized to issue General Revenue Water System Improvement Bonds of said city in the principal sum of Eight Thousand Dollars (\$8,000.00) maturing serially August 1, 1940 to 1955 inclusive, bearing interest not to exceed Six per cent (6%) per annum, payable semi-annually, for the purpose of improving the present water system of the said City of Muleshoe, and levying a tax, and shall there be annually levied and collected on all the taxable property in said city for the current year and annually thereafter while said bonds or any of them are outstanding a tax sufficient to pay the annual interest on said bonds and to pay the principal thereof as the same becomes due, said bonds to be General Obligations of the City of Muleshoe as authorized by the general laws of the State of Texas."

The polling place and the officers of said election shall be as follows: At the City Hall, Muleshoe, Texas. Connie Gupton, R. J. Klump, Judges.

Mrs. J. L. Alsup, R. L. Brown, Clerks. That said election shall be held under the provisions of the Constitution and Laws of the State of Texas, and only qualified electors of the City of Muleshoe, who own taxable property in said City and who have duly rendered the same for taxation, shall be qualified to vote.

That all voters who favor the aforesaid proposition shall have written or printed upon their ballots, the words: "FOR THE ISSUANCE OF WATER SYSTEM IMPROVEMENT BONDS AND THE LEVYING OF THE TAX IN PAYMENT THEREOF."

And those opposed, shall have written or printed upon their ballots, the words:

"AGAINST THE ISSUANCE OF WATER SYSTEM IMPROVEMENT BONDS AND THE LEVYING OF THE TAX IN PAYMENT THEREOF."

That notice of said election shall be given by posting and publication of a copy of this order. Said notice shall be posted in each of the election precincts in said city and at the City Hall, not less than Fourteen (14) days prior to the date of said election to be held, and be published on the same day in each of two successive weeks, in The Muleshoe Journal, a newspaper of general circulation published in the City of Muleshoe, the first of said publications to be made not less than Fourteen (14) days prior to the day set for said election.

That the fact that the immediate passage and adoption of this ordinance is necessary for the preservation of the public peace, property, health and safety, and the further fact that its immediate adoption and approval is necessary for the efficient operation of municipal government of said City, constitute and create an emergency requiring that this ordinance be adopted on the date of its introduction.

PASSED AND APPROVED this 20th day of June, 1939.

A. E. LEWIS, Mayor City of Muleshoe, Texas Attest: FEREL LITTLE, City Clerk, City of Muleshoe, Texas, June 22, 29, 1939

NOTICE OF ELECTION FOR PAVING BONDS, SERIES OF 1939

STATE OF TEXAS, COUNTY OF BAILEY.

TO ALL QUALIFIED VOTERS OF THE CITY OF MULESHOE, TEXAS, WHO OWN TAXABLE PROPERTY IN SAID CITY, AND WHO HAVE DULY RENDERED THE SAME FOR TAXATION: TAKE NOTICE that an election will be held on the 7th day of July, 1939 in the City of Muleshoe, Texas, to determine whether or not the City Commission of the City of Muleshoe, Texas, shall be authorized to issue General Revenue Bonds of said city in the sum of (\$4,000.00) Four Thousand dollars for the purpose of constructing, grading, paving and improving the streets of the City of Muleshoe, and whether or not a tax shall be levied upon the property of said city for the purpose of paying the interest on the bonds and for the payment of the principal of such bonds at their maturity, and which election was duly called and ordered by that certain ordinance of said City Commission of the City of Muleshoe, Texas, passed and adopted by said City Commission on the 19th day of June, 1939, and which ordinance is made a part of

this notice, and is in words and figures as follows, to-wit: AN ORDINANCE BY THE CITY COMMISSION OF THE CITY OF MULESHOE CALLING AN ELECTION ON THE QUESTION OF THE ISSUANCE OF GENERAL REVENUE PAVING BONDS IN THE AMOUNT OF FOUR THOUSAND DOLLARS (\$4,000.00). THE PROCEEDS OF SUCH BONDS TO BE USED TO GRADE, IMPROVE, AND PAVE THE STREETS OF THE CITY OF MULESHOE, SAID BONDS AS TO BOTH PRINCIPAL AND INTEREST TO BE SECURED BY THE GENERAL REVENUE OF THE CITY OF MULESHOE AND SUBMITTING THE QUESTION OF WHETHER OR NOT A TAX SHALL BE LEVIED UPON THE PROPERTY OF SUCH CITY FOR THE PURPOSE OF PAYING THE INTEREST ON THE BONDS AND FOR THE PAYMENT OF THE PRINCIPAL OF SUCH BONDS AT THEIR MATURITY, DESIGNATING THE PLACE FOR HOLDING SUCH ELECTION AND NAMING THE OFFICERS THEREOF; PRESCRIBING THE FORM OF NOTICE OF ELECTION; AND DECLARING AN EMERGENCY.

WHEREAS, the City Commission of the City of Muleshoe, Texas, has determined the necessity for making certain improvements to the streets of said city; and WHEREAS, it is considered to be to the best interest of the City that such improvements be financed by the issuance of General Revenue Bonds of said city; and WHEREAS, the City Commission has determined that an emergency exists requiring the calling of an election for the purpose of submitting the question of the issuance of such General Revenue Paving Bonds, and whether or not a tax shall be levied upon the property of said city for the purpose of paying the interest on the bonds and for the payment of the principal of such bonds at their maturity, to a vote, for the preservation of the public peace, property, health and safety;

NOW THEREFORE, BE IT ORDAINED BY THE CITY OF MULESHOE, TEXAS:

That an election be held on the 7th day of July, 1939, at which election the following proposition shall be submitted:

"Shall the City Commission of the City of Muleshoe be authorized to issue General Revenue Paving Bonds of said city in the principal sum of Four Thousand Dollars (\$4,000.00) maturing serially August 1, 1940 to 1947 inclusive, bearing interest not to exceed Six per cent (6%) per annum, payable semi-annually for the purpose of improving, grading, and paving the streets of the said City of Muleshoe, and levying a tax, and shall there be annually levied and collected on all the taxable property in said city for the current year and annually thereafter while said bonds or any of them are outstanding a tax sufficient to pay the annual interest on said bonds and to pay the principal thereof as the same becomes due, said bonds to be General Obligations of the City of Muleshoe as authorized by the general laws of the State of Texas."

The polling place and the officers of said election shall be as follows: At the City Hall, Muleshoe, Texas. Connie Gupton, R. J. Klump, Judges.

SHORTAGE OF SEED PREDICTED FOR '38

Caution Urged in Alfalfa, Red Clover Purchases.

Supplied by the College of Agriculture, University of Illinois—WGU Service.
 Faced with another shortage of adapted legume seed, farmers will need to be cautious in their purchases of alfalfa and red clover for 1938 plantings.

The carryover of alfalfa seed is unusually small, and the 1937 production of seed adapted to the corn belt was short, the report stated. On the other hand production in the Southwest, which produces seed not well adapted to the corn belt, is reported to be 50 per cent above 1936, and the heaviest importation of foreign unadapted alfalfa seed in ten years was made in 1936-37.

Supplies of red clover seed are also short for 1938. United States production in 1937 is estimated at 30,000,000 pounds—only half the average annual consumption and the smallest crop since 1926. Great decreases occurred in the corn belt states, where the seed is grown. Although there is little if any carryover of domestic red clover seed from the 1937 crop, approximately 3,000,000 pounds of imported seed not adapted to the corn belt are carried over.

The 1937 crop of sweet clover seed, estimated at 54,000,000 pounds for the United States, was the largest since 1929. However, the carryover is comparatively small despite a larger crop than estimated and importations of more than 7,400,000 pounds, the largest importation on record. The rapid disappearance was caused by the low price as compared with red clover seed.

Even with a below-normal carryover of lespedeza seed into 1938 from the short crops of 1936 and 1935, supplies for 1938 plantings are believed to be ample.

Supplies of most grass seed seem adequate. The large 1937 timothy crop assures a supply in excess of anticipated needs in 1938. Total United States production is estimated at 90,000,000 pounds, one of the largest crops in recent years.

Likewise, the 1937 bumper crop of Kentucky bluegrass seed assures adequate supplies for 1938. Production of red top seed is estimated at 18,000,000 pounds, which is in excess of annual consumption, and a liberal carryover of Sudan grass seed and a large 1937 crop will be ample for 1938 seeding.

Holds Heat Reflection Affects Poultry House

It is a matter well known in the industrial and scientific world of today that under certain conditions heat is reflected, and under certain other conditions it is absorbed. Heat reflection and heat absorption are matters of degree, note a correspondent in Hoard's Dairyman, and as one increases in any given case the other decreases. Owners make a difference in this respect, dark colors absorbing heat while light colors reflect it. It would be good business to have a poultry house painted black in the winter but for summer it will be better to have it painted with white paint or aluminum paint.

It is also an established fact that a dirty window will absorb heat to a far greater extent than will a clean one. Thus, while it might not pay to be overscrupulous in keeping poultry house windows clean in winter, it will be a paying proposition in the summer, especially if one has trouble with the houses becoming excessively hot.

Around the Farm

Leguminous vegetables are beans, peas, lentils and soy beans.

There are about 8,000 selected and catalogued varieties of apples.

Barley substitutes for corn in the laying mash though it should not be used exclusively in its place.

Oats rank first among grains for producing growth in chicks; wheat, second; and corn, last. Oats should not be used as the only grain.

Prices of lambs for the next two or three years are expected to decline less than prices of other meat animals, according to the "Agricultural Outlook for Illinois—1938."

More than 700,000,000, nearly half the chicks hatched annually, are produced by commercial hatcheries, according to a survey by the Department of Agriculture.

True red Rhode Island Reds have a beautiful sheen or shine when seen in the sunlight and a smooth flat feather.

Wisconsin was the largest producer of the 26 states which reported either or both condensed or evaporated whole milk last year.

Milk is one of the most valuable feeds for poultry. Skimmed and buttermilk, if not diluted with water, are almost as valuable and much cheaper than whole milk.

FARM TOPICS

NAIL ASSORTMENT HELPFUL ON FARM

Cost Negligible, but Uses Numerous.

By E. R. GROSS
 The well-equipped farm shop includes an assortment of nails so that the proper size and type may be chosen for any job, whether it be repairing a building, constructing a fence or mending a fragile chair, says the agricultural engineering department at the New Jersey college of agriculture, Rutgers university.

The cost of an adequate variety of nails is negligible. From one-half pound to three pounds, according to size, of each of a dozen varieties makes an excellent kit of nails. Tin cans are handy containers. The sturdiness of the nailed joint depends upon the friction between nail and wood, hence it is determined by the choice of size and kind of nail, the number used and the proper assembly of the wood parts. Good nailing is important, not only to get lasting results, but also to avoid accidents due to improper nailing.

Using the proper length of nail requires that two-thirds of the nail should penetrate the piece of wood receiving it. Thus the length should be at least three times the thickness of the outer piece. When thin materials prevent proper penetration, use additional nails to provide an equivalent area of surface contact in the wood receiving the point.

Farm practice allows "clinch" nails which penetrate through the wood. Bending the point of the clinch nail across rather than with the grain of the wood greatly increases the strength of the joint. A firm blow in clinching should form a hook, embedding the nail point in the wood. Use plenty of nails as the strength of the joint increases directly with the number of nails. When the wood tends to split, use boxing nails which are thinner than common nails.

Whenever the use permits, drive nails perpendicular to the surface. The slanting drive to "draw the wood" is a little advantage, "Shiners" or nails coming out of the side of the piece, weaken the joints and are likely to cause injury, hence should be removed at once. Nails in green wood, wet wood, or those driven into the end of the grain are not effective. Use dry, seasoned wood. Properly constructed joints usually permit driving the nails into the side of the grain and not the end.

Consider Price Programs In Planning Egg Program

In urging poultrymen to study monthly egg prices before outlining their year's management program, F. P. Jeffrey, poultry instructor at the New Jersey college of agriculture, Rutgers university, offers some figures which indicate that large eggs are relatively more valuable in the fall, while small eggs are generally more profitable during spring months.

"According to the United States department of agriculture figures," he says, "53 per cent of the annual egg production occurs during the four spring months of March, April, May and June. Management factors such as use of artificial illumination in the laying house and date of hatch become some relationship to the seasonal distribution of the egg yield."

"During the last eight years, there has been a tendency for a rapid decline in the egg market during December and January because of greater receipts during these months. At New York, in the period of 1924-30, 5.6 per cent of the annual receipts of eggs arrived during January, while in the period of 1937-74, 7.4 per cent arrived during the same month."

Apple Is Popular

"Certain it is the apple has, on the whole, no rival among fruits. There are fruits of more pronounced and even of more delicious flavors. There are fruits which present a high proportion of nutriment. But in variety of color and flavor, in satisfying qualities, in ability to hold its place as a fruit staple against all comers, no other fruit equals the apple."—National Apple Institute.

Lights for Poultry Houses

Once a mining post, Fort Yukon is now chiefly noted for its fur trade. Like other towns of Alaska, its chief problem used to be its chickens, for those canny birds tried to take advantage of their sun-baked nights and to work and scratch around the clock. Distracted by their worthy efforts, they lost weight and would not lay, until Alaska solved the problem by providing them with artificially darkened houses for nights.

Picking Pullets Fed Oats

The picking pullet's desire to eat up her sisters is easily overcome by adding oats to her diet, says the Washington Experiment station, in the Country Home magazine. Oat hulls or oat millfeed will do the trick. But oat hull or oat ash will not cure cannibalism.

General News As Reported From Over The U. S.

At the annual meeting of the Texas Motor Transportation association held last week at Houston, Leonard B. Brown, was elected new president.

During the past four years, hourly wage rates of representative classes of oil field employment have shown an increase of over 18 per cent, according to a survey recently completed by the Texas Mid-Continent Oil & Gas association, Dallas.

After 40 years service, Frank L. Myers, assistant manager of the Southern district, Santa Fe Western lines and the Panhandle and Santa Fe Railway Co., has announced his intention to retire from duty July 31.

A billion dollar operation on the public payroll to cut more than a million employees from national, state and local rolls is being advocated by Attorney General Murphy. Present public employees, he says now cost the average family about 13 per cent of their total income.

The French submarine Phenix sank Thursday last week off the coast of Indo-China in deep water. It is feared the 63 persons on board are all lost. There is some suggestion that the loss of this sub, also recent loss of the American and British subs, may be from sabotage.

Following Japan's demand of unconditional abandonment of British support to China, involving a blockage of the British and French concessions at Tientsin, a tension of feeling both in Great Britain and France is said to be growing tighter, such feeling also extending to the U. S. A merchandise ban may go

on shortly wherein business will be largely suspended with Japan. The U. S. is now considering curtailing one-third the shipments of scrap iron to Japan.

Headed by Senator Carter Glass of Virginia, President Roosevelt's new deal money policy is drawing considerable fire in Congress. A bill to renew presidential power to devalue the dollar is expected to be up for discussion this week, it also involving appropriation of a \$2,000,000,000 stabilization fund. It is being urged by some congressmen that a price of \$1.04 per ounce be set for purchase of domestically mined silver and no foreign mined silver be acquired. The former law expired June 30.

Be proud of your home town.

TEXAN THEATRE

SUDAN, TEXAS

Thursday and Friday, June 22-23
"IT'S A WONDERFUL WORLD"
 with Claudette Colbert, James Stewart.
 Sat. Matinee and Night, June 24
"BROTHER RAT"
 with Wayne Morris, and Priscilla Lane.
 Sat. Night, 9:30, June 4
"THANKS FOR THE MEMORY"
 with Bob Hope & Shirley Ross
 Sat. Midnite, Sunday & Monday
 June 24, 25 and 26
"TARZAN FINDS A SON"
 with Johnny Weissmuller, Maureen O'Sullivan.
 Tuesday and Wednesday, Bargain Nites, Adm. 15c, June 27-28
"PYGMALION"
 with Leslie Howard, and Wendy Hiller.

ARE YOU IN LOVE ?

Every Housewife Falls In Love With an Electric Range in the "Good Old Summer Time!"

And who can blame her?
 When the weather hits the zenith, the mercury in the thermometer climbs up to the tip top and Old Sol beams down upon the home with all his warm and glory; when the family cooking has to be done just the same, then is when the Electric Range Is Appreciated

Of course it's hot—the hottest kind of heat. It has to be to satisfactorily do the cooking and baking; but most of that heat is insulated within and not dissipated throughout the kitchen. In any way, it's cool-hot cooking—the most pleasing and efficient kind of cooking known to the scientific world.

Electric Cooking is new as the dawn of day. The new low cost, new quick heat, new cleanliness and coolness, new modern designs, new, tastier and better results, in fact everything about electric cookery appeals to every homemaker whether living in town or country.

DROP US A LINE, we'll be glad to have our representative call on you, giving more information regarding this most desirable type of cooking—THE ELECTRIC WAY.

TEXAS NEW MEXICO UTILITIES COMPANY

MODERN FOOD MARKET

SPECIALS FOR SATURDAY

A BARGAIN IN FLAVOR

Schilling's Coffee
Schilling's Coffee, 1-lb .23; 2-lbs .45

- LETTUCE, per head 02 1/2
- MIRACLE WHIP 32
- CABBAGE, per pound 03
