Bailey County REA Co-op Expect An Additional \$100,000 For A Line Extension, Serving 300 More

That the Bailey County REA Co-op may soon begin work on a 190 line extension addition to their lines, is the statement of Cecil McLaury, superintendent.

Application for such extension was made last April 14 to serve 300 additional clients and there are now 114 more prospective clients. Just what allotment will be made by the Government for this extension is not known; but in the neighborhood of \$104,000 is anticipated, according to available information.

Service is now being rendered farmer citizens of Bailey, Parmer, Castro, Lamb and Cochran counties. The 263 miles of line now energize to 387 people of this area.

McLaury states that the monthly bills of customers has been gradually increasing until today the average service bill is about \$3.95 per month. There has been only one client whose service began for non-monthly bill. That the greatly appreciated is at the fact that the range is gradually being extended from the very first, collected been 100 per cent per-

50 per cent of the clients using current for refrigerators about 85 per cent for electric stoves and radios, about 15 per cent have motorized cream separators. One customer has an electric milking machine and another is irrigating 40 acres with an electric propelled centrifugal pump. There are nine electric ranges and 15 electric baby chick brooders. In fact, less than 10 per cent of the customers use current for lights only. McLaury said, the local cemetery has been equipped with lights and power is being served for pumping purposes.

The organization is in a flourishing condition, meeting all its current bills, McLaury said, and is paying interest regularly on government received funds. Payment of principal does not being for three years. It is stated there are about 50 per cent of the citizens along the REA lines who are not using the service, many of whom would like to have such, and if the majority of them are given service it is anticipated there can be a reduction made in the rate which is now \$2.45 for 25 kilowatts, this rate being further reduced according to quantity of current used.

Without an exception, people using this service express their appreciation for it, many declaring they would not be without it again for twice the cost.

A Preparedness Day Parade Is Held At Lubbock Saturday

Lubbock, July 8.—Saturday, July 13, has been set as South Plains Preparedness Day, according to an arrangement made by A. I. Glassman, commander, local American Legion post, Lubbock.

Beginning at 10:00 a. m., Saturday, a huge parade will be held in Lubbock, through the downtown business section. A special military band will head the parade to be followed by U. S. Army recruits, numerous mechanized units, armor-plated, battery equipped, truck and enlisted personnel. Others participating in the Preparedness day parade will be all veterans of foreign wars, Spanish-Americans war veterans, Boy Scouts, National Guardsmen, ROTC units and others, as well as members of the American Legion.

Plans are under way for a Patriotic rally to be held immediately following the parade. All military units from South Plains towns are invited to participate. Patriotic Americans are invited to take part in the Preparedness Day program, according to Commander Glassman.

DISTRICT SOUTHWEST SWIM IS HERE

The Northwest district Boy Scout swimming meet is to be held here next Monday, July 15, expert swimmers from Scout troops of Littlefield (Sudan, Amherst and Muleshoe) participating. The aqua sports are scheduled to begin at 3:00 p. m.

The meet will be held under direction of George Holland, field scout supervisor and J. S. Smith, local scoutmaster.

This meeting is preliminary to the "Bains Council annual swim meet" to be held at Plainview, July 19. Scout winners and third in junior and senior divisions of eligible to participate in swim meet.

LOOK BEHIND YOU, SAM!

Government Rulings Regarding The Storing Of Wheat, Charges Returns And The Payments

A loan on 1940 produced wheat of 61 cents per bushel basis No. 2 Hard Winter is available to wheat producers in Bailey County, who have not overseeded their 1940 wheat allotment. Protein premiums will be available to allow the above basic loan rate to be increased in those cases in which a protein content of 13 percent and over is indicated.

Because of certain changes in the regulations governing wheat loans for 1940, it is suggested each producer should fully inform himself of current regulations governing these loans. Detailed information can be obtained at the farm office.

Loans may be secured on eligible wheat stored in approved public warehouses, and 1 cent per bu. on wheat stored in farm bins will be paid by the producer. A preliminary fee, which is also a minimum fee, of \$3.00 on farm stored wheat will be collected at time application for loan is made; the balance to be paid at the time loan documents are completed.

Loans on farm stored wheat will mature on demand on or before 10 months from date, and loans on warehoused wheat will mature on demand, on or before 9 months from date or April 30, 1941, whichever is earlier.

Loans on farm stored wheat will not be approved unless the bin containing the wheat is in good condition. An eligible bin or granary is one which will protect the stored wheat from loss by leakage, or damage by unfavorable weather, and loss by birds, rodents and other animals. It should be suitable for effective fumigation and provide reasonable protection against fire and wind. Farmers who may desire to take a loan on wheat in farm storage should take whatever steps are necessary in putting their bins and granaries in such a condition that there will be no doubt of their

THE COUNTY LIBRARY HAS NEW BOOKS

Fifty new books have been received by the county librarian from the State library and the Historical Commission at Austin, according to Mrs. Minnie Solomon in charge and are ready for service to the many reader patrons.

Many of these books are fiction, quite a number adapted to older readers and several will delight younger children, she said.

There has also been a rental shelf installed in the library at the court house for benefit of those who do not hold membership cards.

The U. S. liner Washington has returned from Europe with another load of 1,500 refugees, while the Manhattan has left for Portugal to bring back a load. This will be the last trip across the Atlantic for American citizens.

Grade elevators of a post office is based on postal receipts of that particular office, Gardner explained, such receipts required being each \$8,400 annually, of which the office

Bailey And Parmer County Farmers To Save \$37,700 Annually On WFNLA Loans Over \$2,000,000

Farmers in Bailey county will save about \$13,800 a year as a result of legislation just enacted by Congress affecting interest rates on Federal Land Bank and Land Bank Commissioner loans.

There will be a saving to Parmer county farmers of \$23,900 annually on 419 loans aggregating \$1,594,400. L. W. Jordan, secretary-treasurer, was unable to furnish a report on the loans serviced by him on lands that are located in the counties of Lamb, Deaf, Smith and Cochran. The 913 loans serviced through the Western National Farm Loan Association total \$2,281,637.00.

The temporary rate of 3 1/2 percent on first mortgage Land Bank loans will be continued for two years ending June 30, 1942. During this period the interest rate on first and second mortgage Land Bank Commissioner loans will be reduced from 4 to 3 1/2 per cent. Land Bank and Commissioner loans were originally written at contract rates averaging about 5 percent.

At present about 313 Bailey county farmers have Land Bank and Commissioner loans outstanding aggregating \$920,750. The difference between the contract rate and the temporary rate thus effects a substantial saving for farmers.

In a statement from Washington, A. G. Black, Governor of the Farm Credit administration, said that the saving to farmers through the reduced interest rate will have the same effect as an addition to the farmers' net income.

"The ultimate purpose of the reduced interest rate on Land Bank and Commissioner loans is to help farmers keep down their fixed charges and thus leave more income for the retirement of debt, principal, or to meet necessary operating and living expenses," Governor Black said.

Money saved on interest charges will thus be reflected in increased purchasing power, benefiting both industry and agriculture, and also will help in a measure to raise farm living standards and safeguard farm ownership."

Texas Hi-way Users Paid Fourth State Income In 1939

Austin, July 9.—The highway users of Texas contributed more than one-fourth of the income for the State during 1939. Mr. Lynn Shaw, manager of the Texas Motor Transportation Association said today after studying a summary issued recently of the income and expenditures of the State for last year.

Actually, the highway users paid 29.73 cents of every dollar that the State Government took in. Mr. Shaw declared. With a total income from highway motor fuel taxes set at \$44,216,908.15 for the last fiscal year, the State report shows that this represents 25.24 cents of each dollar taken in. Added to this was the \$764,902.46 which was taken in for license tags and driver's licenses. This represents 4.49 cents of every dollar of income.

This 29.73 cents is by far the largest part paid by any single source into the revenue dollar of the State. Gross receipts taxes account for 11.24 cents of the dollar, and the ad valorem tax supplied 8.54 cents, to place second and third as money sources for the State. Next highest was the cigarette stamp tax which supplied 3.92 cents for each dollar. Mr. Shaw said.

Though the highway users paid a great deal more than any other group, they also received a large part of the State's dollar when it was spent. 34.94 cents of every dollar which the State expended went for highways. In figures for the total amount spent, this is \$55,934,368.56. Next highest came the 27.78 cents of every dollar spent for education in Texas. Third was the public welfare bill including pensions, benefits, and retirements, with 21.61 cents per dollar.

Total income for the State last year was \$175,216,238.99. Total expenditures were \$164,233,499.81.

General News Over Texas And Other States For Week

Texas now has five state forests totaling 6,400 acres, also four national forests totaling 1,714,000 acres.

Preliminary figures indicate the population of Texas has increased about a million people during the last 10 years.

The Littlefield Co-op frozen food locker opened last Saturday. It has facilities for 400 lockers of 300 pounds capacity each.

Earl Paqua, well known Amarillo banker and oil man, died Sunday afternoon in a Fort Worth hospital from heart ailment. He was 45 years of age.

Pirate Jean LaFitte's ship, reputed heavily laden with gold, and which was scuttled 120 years ago to escape an U. S. revenue cutter is soon to be raised to the surface.

An \$8,000,000 airplane factory to build bombers and pursuit ships for the U. S. army will be established near Dallas as soon as suitable location can be decided upon.

Allotment of \$767,500 for construction work on the army's subtraining base to be established at San Angelo was made by the U. S. War department last Saturday. The total cost will be over \$1,000,000.

Italy, Texas has petitioned the U. S. Post Office department for privilege to change its name.

There were five million young fish hatched in Texas last year and the number will be considerably increased this year.

D. C. Greer, former chief of construction and design of the Texas State Highway department, has been appointed state highway engineer, succeeding Julian Montgomery, resigned, because of ill health.

Hale county has been designated as a tenant relief county under the Jones-Bankhead farm tenant purchase law, and several farms will be purchased by the Government in that county this year for those desiring them.

Thirty-nine great rainstorms have occurred in Texas since 1891. Probably the greatest in Texas history was from September 6 to 10, 1920 at Taylor, where 17 inches were recorded the first day and 13 the second day, for a total of 30 inches in two days.

ANESTHETIC MACHINE ADDED TO CLINIC

The Lancaster - Green Clinic, Muleshoe, is adding new equipment to their hospital service, the latest being a McKesson-Nargraf anesthetic machine which handles all types of anesthetics administered to patients in an effective manner.

\$25 Put In The Pot For Next Trades Day Saturday

Crowding several blocks of Muleshoe's principal streets last Saturday and filling adjacent street parking places, the thousands of guests here for Trades Day took advantage of numerous bargain prices advertised in the Journal, thereby saving many dollars in purchase of both necessities and luxuries.

In the afternoon the poungster's band gave a concert and there were the usual cash awards made a total of \$35 being given away to parties whose names were called, as follows: Mrs. E. J. Gully, route 2 Progress community, \$20; Mrs. V. W. Randle, nine miles north of Muleshoe, \$5; Herman Burris, nine miles south of Muleshoe, \$3; Ed Powell, Muleshoe, \$2; Mrs. Roy Jones, whose husband is a state highway employee, \$2; M. F. Robbins, Muleshoe, \$2.00.

The usual \$25 will be awarded again next Saturday.

THE WEATHER PLENTY HOT TUESDAY

The Government thermometer at Muleshoe showed a temperature of 101 above zero last Monday. Farmers report growing feed crops needing rain.

Tuesday the temperature shot up to 107 1/2, according to Judge R. J. Klump, local government, as follows, who said it was a record height so far this year.

Last year the record high was 108 degrees in June.

A great to was made over Hitler in Berlin last week when he made his triumphant entry following settling war affairs with France. He rode down streets strewn with flowers, while every other conceivable honor was accorded him, including clearing him with Napoleon and Caesar.

Muleshoe Post Office Jumps Up To Second Class, Showing A Gain Of \$2,365. Business Last Year

Muleshoe post office went to second class designation July 1, according to Postmaster A. J. Gardner, who has received such information from the U. S. Post Office Department, Washington.

A few years ago this post office was elevated to that distinction, but because postal receipts did not keep up to par, reverted to the lower class at the end of the year. Since then, because of growth of the town and surrounding country, it is being held the present designation will be held for the future.

Grade elevation of a post office is based on postal receipts of that particular office, Gardner explained, such receipts required being each \$8,400 annually, of which the office

LOCAL HAPPENINGS

Mr. and Mrs. Et Evans and daughter of Taft, California, accompanied by her brother, Herbert Griffiths, who spent the past month with them in California, arrived in Muleshoe Saturday to spend several days with her parents, Mr. and Mrs. Ray Griffiths, before going on to Lubbock where they will make their future home.

A marriage license was issued last Saturday from the County Clerk's office to Curtis McDaniel and Gusie Mae Simpson, negroes from Sudan. The couple was later married by County Judge M. G. Miller who at the end of the official ceremony, in his mental confusion, told the groom it was "kistomary to cuss the bride," according to report.

Mrs. J. F. Wallace, Miss Norma Erud, Mr. and Mrs. Mills Barfield and son returned Sunday from a week's visit with Mr. and Mrs. E. B. Boyle at Las Cruces, N. M. While there they were guests at a typical Mexican lunch at LaPosta in Old Mesilla. A visit to Billy the Kid museum was enjoyed. Before re-

turning to Muleshoe they visited at El Paso.

Mr. and Mrs. M. G. Bass and son Raymond attended a family reunion at Slaton last Sunday at which time she had the pleasure of seeing some of her sisters and brothers she had not seen in 10 years. The occasion of the get-together was the 40th wedding anniversary of her parents, Mr. and Mrs. J. C. Reynolds the wedding anniversary of two of their sons and a daughter, also the birthday anniversary of two grandchildren. Those present were Mr. and Mrs. J. F. Reynolds, of Caradan; Mrs. F. A. Stevens and two children of Goldthwaite; Mrs. Leslie McCauley, of Lorenzo; Mr. and Mrs. W. D. Reynolds of Lorenzo; Mr. and Mrs. Luther Reynolds and son of Lubbock; Mr. and Mrs. Jess Reynolds and daughter of Lubbock; Mr. and Mrs. Wade Reynolds and son of Lorenzo; Mr. and Mrs. J. L. Phipps and son of Goodland. All of the children of the honored couple were present. A big dinner was enjoyed by all.

Heavy Water is Stimulant
Tests on animals show that when heavy water is administered it produces an effect similar to that of adrenalin, a hormone, which throws the body into its greatest state of activity.

TREASURER'S QUARTERLY REPORT

Report of Helen Jones, County Treasurer of Bailey County, Texas, of Receipts and Expenditures from April 1, 1940 to June 30, 1940, inclusive:

THE STATE OF TEXAS, County of Bailey. Before me, the undersigned authority, on this day personally appeared Helen Jones, County Treasurer of Bailey County, who being by me duly sworn, upon oath, says that the within and foregoing report is true and correct.

HELEN JONES, County Treasurer.

Sworn to and subscribed before me, this 6th day of July, 1940.

J. J. WILLIAMS, Clerk, County Court, Bailey County, Texas.

(SEAL)

Baby Heaven

By ILA LEWIS
(McClure Syndicate—WLU Service.)

"I HAVE just the place you are looking for!" confided the real estate agent. "No radio playing after eleven p. m., no saxophones, no dogs or musical students allowed—why, you couldn't ask for a quieter place than Bayberry Haven!"

"What was the name?" inquired my wife in a startled tone. "Oh—I see." She added. "For just a moment I thought you said 'Baby Heaven!'"

"Ha! ha!" laughed the agent, in what I thought at the time was a remarkably hollow tone. "Ha! ha! ha!"

And so we moved to Bayberry Haven. A little far out, but sunlight in every room, an outside entrance to every apartment, and a real grass lawn in the middle—these were the features that attracted us. "Welcome to Baby Heaven!" cried the iceman gaily as my wife led him in at the front door the next morning.

And Baby Heaven it was. As I ran for my train in the morning, I would leap over a toy automobile, broad jump over eight kiddie cars in a row, pole vault over a scooter bike and roll merrily down the sidewalk with two roller skates under one foot.

True, there was no radio playing after eleven at night. There were no dogs, there were no saxophones, there were no musical students. But there was no law against the infant above us, and the infant below us, and the infant to the right of us, and the infant to the left of us, taking regular turns all night to disrupt the peace and quiet for which I had come to Bayberry Haven.

Sometimes, when starting out in the morning, I would look about me at the beautiful sunshine and at the little porch of green lawn, and I would determine to ask some of the boys from the office out to dinner that night, so the poor city-bound oats could see what a blade of grass looked like.

But ah, the kiddies! The kiddies! By dinner time, what with the abandoned dollies, and their lost caps, and their paper airplanes—you know, you fold up little pieces of paper and sail them all over the place and hear the janitor swear—well, what with them scattered knee deep all over our little green lawn space, I don't believe the boys from the office ever did get to see a blade of grass.

And the chalk marks on the walk! How my friend, Hobbnoboth, of the Evening Graphoneus, used to pore over them! He was writing his book then—you know, "Sally in Our Back Alley"—and of course he wanted to get it suppressed in Boston. He needed the money. He has claimed ever since, with tears of gratitude in his eyes, that his success dates from the first time I asked him out to dinner and he read the words that the innocent little kiddies had chalked on my front steps.

One Saturday afternoon I went to the grocery store on an errand for my wife. I thought at first I was back on the East Side. But I soon realized that they were not push carts—they were baby buggies. A sea of baby buggies. I counted eighteen of them in one block. You can depend on the number, because I am a certified public accountant.

If you saw a young couple strolling down to the grocery without a baby buggy, you just knew that they had one at home, with a nice-reliable-colored-girl-by-the-hour-that-loves-children wheeling it up and down the sidewalk.

Or if they didn't have any baby buggy at all, you knew that Santa Claus had them down on his list, and they would find one in a stocking on Christmas morning.

I should have known it would be like that. I should have known that every couple with one or two or three or four or five children—or even those young couples whose mamas are still squabbling over which one shall make the basket—I should have known that they would all move out here: It's so good for the children, you know.

And so the stork hovers over Bayberry Haven constantly. It's not his fault. It's the sunshine, and the fresh air. And you know how it is, in an epidemic of that sort you begin to get panic-stricken. Fear of contagion; force of example; power of suggestion; and all that sort of thing. You, too, may fall a victim!

A stork, after all, is only human. Or inhuman, whichever way you look at it. He might, some day, get mixed up in his chimneys. And, frankly speaking, being a man who is fond of his peace and quiet, I had rather be elsewhere when it happened.

So that is why, last week, we gave notice to the landlord that we were leaving Bayberry Haven on the first of the month.

But only this morning my wife whispered to me that it might be just as well to stay . . .

Offending a Fender
It is against the law in Butte, Mont., to sit on car fenders. The police told the court that H. M. Spearman was in the habit of lounging all over automobiles. His fender sista cost him \$25.

MOVIE STARS AND BUSINESS CHIEFS DOMINATE THE BIG MONEY BRACKET L. B. MAYER'S PAY CHECK FATTEST

That aspiring and enterprising Muleshoe citizens may have to go elsewhere if they are to draw down some of the big, juicy salary plums, is clearly evident in a recent statement published of the nation's leading salary receivers. From this statement it is apparent little towns of small numerical denominations do not offer much in the way of plutocratic financial rewards for would-be money-bags.

This story, emanating from the national capital, says that Louis B. Mayer, motion picture magnate, and F. A. Countway, Massachusetts soap manufacturer, were the two highest salaried men in America in 1938, Mayer receiving \$588,369 and Countway, \$469,713. Muleshoe folks have an inkling there may be a reason for a movie boss drawing such a big salary; but scarcely anyone suspected there was that much money in soap, and it is being wondered just how many people were "taken to a cleaning" to justify all this award.

As a matter of fact, the report says Mayer's salary was 40 per cent below his paid income the year before when in 1937 he received \$1,101,783. Claudette Colbert ranked as the nation's highest paid woman, when Paramount and M-G-M paid her \$426,944. She ranked fourth place in a list of about 650 people whose salaries and bonuses in 1938 were above \$75,000.00.

Shirley Temple, retired and beloved kid actor, was the highest child star on the financial list, receiving \$307,014.00. Bing Crosby ranked fifth in a draw-down of \$410,000 and Irene Dunne was sixth with \$405,222. So the list gradually slips downward, but all movie actors and actresses pulled down a plenty.

Janet Heifetz, movie musician, received a flat \$100,000 from Samuel Goldwyn Inc. and Leopold Stokowski got \$80,000 from Walt Disney, while Disney himself got \$104,111.

Among publishers there were several whose salaries ran between \$75,000 and \$100,000. The publication ramifications of William Randolph Hearst are of such diversification and wide extent, and the Government takes so much of that income for federal taxes, he don't dare report much more than \$100,000 annual net income, though his receipts may run into millions. Joseph Pulitzer, St. Louis, received \$180,461. Several other publishers in the up-

BUSINESS CHIEFS DOMINATE THE BIG MONEY BRACKET L. B. MAYER'S PAY CHECK FATTEST

per brackets got similar amounts. No data at all was given regarding country newspaper salaries and incomes it being generally conceded such may be found in the records of FSA, PHA, WPA and similar organizations.

Controlling Weeds In Pasture Is A Good Trick If Known

College Station, July 9.—There's a trick in controlling weeds in pastures by mowing.

The trick, according to R. R. Lancaster, pasture specialist of the Texas A and M. Extension Service, is to mow the weeds when they reach their maximum growth at about the time flowers form.

Mowing earlier than that does not weaken the weeds to any great extent and later mowing allows seeds to ripen. If the mowing happens to fall in a dry period of the year, so much the better.

Mowing of pastures to control weeds and to keep grasses in a growing, vegetative state is proving the easiest and most profitable form of pasture improvement.

Reports from county agricultural agents in East Texas, the Gulf Coast and the central part of the state in-

dicating that regular mowing often doubles the carrying capacity of pastures. Results from tests at the Angleton substation of the Texas Agricultural Experiment Station were even more profitable.

WENDELL WILLKIE'S PETITION

A Plea From The Republican Nominee For Return of Government By The People Back to The People

Wendell Willkie, recent Republican nominee for president, the man who drew down a salary of \$75,000 per year, yet doesn't own an automobile and never carries a watch, is making, in a rushing but business-like manner, all plans for his coming political campaign.

He has resigned all corporate connection, including his position as head of the \$2,000,000,000 Commonwealth and Southern Corporation. He has appointed his official steering committee and is rapidly whipping into organization all other details for his campaign. He has declared, "I hope Roosevelt runs for a third term. I want to beat the 'mp'."

Willkie, through his "People's platform," published in Fortune magazine last April had already received a boost for presidential nomination that could not be halted by any of his opponents. Not until after the Republican convention at Philadelphia did it ever become generally known the place he held in the hearts of the people. That platform is already being recognized by citizens of every political faith as a classic of supreme statesmanship. Willkie declares he has no interest in party labels as such; but rather in MEN and the principles for which they stand, and his past record of voting for men regardless of partisanship, conclusively proves his contention.

While Willkie has publicly avowed to uphold the Republican platform, yet it is generally conceded he will give it a "Willkie interpretation" of road humanitarianism regardless of its particular label. He insists he is one of the "people." Here is Will-

kie's platform and petition as published in Fortune magazine:

Mr. Willkie's Petition

"In the decade beginning 1930 you have told us that our day is finished, that we can grow no more, and that the future cannot be the equal of the past. But we, the people, do not believe this, and we say to you: give up this vested interest that you have in depression, open your eyes to the future, help us to build a New World.

"In this decade you have separated 'business' and 'industry' from the ordinary lives of the people and have applied against them a philosophy of hate and mistrust, but we, the people, say: business and industry are part of our daily lives; in hurting them you hurt us. Therefore, abandon this attitude of hate and set our enterprises free.

"In this decade you have undertaken vast new obligations, which we support. But because you have not applied to these obligations the ordinary standards of business judgment, you have lost our money, by the billions and we, the people, say: give us a businesslike administration that will act as the steward of our prosperity; that will insure the social progress that is now threatened; and that will manage our affairs at least as intelligently as we manage our own enterprises.

"In this decade, under the banners of reform, you have usurped our sovereign power by curtailing the Bill of Rights, by short circuiting the states, and by placing in the hands of a few men in executive commissions all the powers requisite to tyranny; and we, the people, say to you: we do not want monopolistic

monopolistic industry. Give us back the powers that our forefathers declared to be ours; liberate us to govern ourselves by law.

"Because you have concealed from us the amount of our real taxes, and because you have hidden from us the real nature of our expenditures, you have specifically usurped our power over the public monies, and we, the people, say: give us as much information concerning our government as we expect to get concerning our own enterprises, so that we may

"This declaration will not interest those who regard the United States as a laboratory for social experiments.

"It will not interest those who regard the United States as a free-lunch counter.

"It will certainly not interest those who regard the United States as a somewhat impoverished gold mine out of which they can still scrape a nugget or two for themselves.

"It will interest only those who think of the United States as their land—a land that they know and love—a land that became rich through the industry, thrift and enterprise of its people, and will never regain its prosperity in any other way.—W. L. W.

"You—the politicians of both parties—have muddled our foreign affairs with politics; with vague threats and furtive approvals; with wild fears and inconsistent acts; and we, the people, say: give us a foreign policy that we can trust and upon which we can build toward the future. We are against aggressors; we are for foreign trade; and we recognize that our own standard of living can be improved only by raising the standard of the other countries of the world."

Judge Marshall Formby of Dickens county will bring his candidacy for State Senator here Saturday afternoon when he speaks on the streets in behalf of his campaign at 2:00 o'clock.

Judge Formby is using his own loud speaking system, one recently presented to him by his Dickens

Local supporters of Judge Formby are urging their friends to be out Saturday afternoon at 2:00 o'clock to hear the Dickens Judge.

Banana Known to Ancients
The banana's history is old. Alexander the Great found the fruit three centuries before Christ.

Man, Not Machine, Chief Cause of Traffic Deaths

In the majority of automobile accidents throughout the country during the past year the driver and not the car was at fault, according to research experts of The Travelers Insurance Company.

They estimated that 93 per cent of all automobiles involved in fatal crashes in 1939 and 95.5 per cent of those in non-fatal accidents were in good mechanical condition.

Of 37,000 cars dealing out death, only 670 were found to have defective brakes and 510 had faulty lights. A puncture or blowout was reported as the primary cause of accident in but 440 cases.

While it stressed man-failure rather than machine failure as the chief cause of accidents, the report was careful not to minimize the importance of keeping vehicles in good condition.

"It is known that many accidents attributed to some failure

on the part of the driver would be averted if the car were in perfect or near-perfect condition," the report stated. "As an example, an investigating officer writes into his report as the cause of an accident: 'Operator drove off the roadway.' The driver may have been inattentive; however, is it not possible that with perfect brakes, perfect steering mechanism, and good tires he could still have pulled himself out of the hole into which his inattentiveness placed him?"

In other words, the report concludes, mechanical failure is often cited as a contributing cause but not the principal cause of accidents.

Male of Species More Dangerous Than Female

Women have the reputation of being worse drivers than men but where accidents are concerned, statisticians can find no figures to substantiate this popular belief.

These facts are revealed in a new booklet "Smash Hits of the Year" just issued by The Travelers Insurance Company as the tenth in its annual series of bulletins dedicated to street and highway safety.

Despite the fact that a Gallup Poll showed a large majority of persons feel safer riding with a man at the steering wheel, the company's statisticians found that

more than 90 per cent of all fatal and non-fatal accidents in 1939 involved male drivers. Where fatal accidents alone are considered, the female of the species has an even better record, being charged with the responsibility for less than seven per cent.

The answer undoubtedly rests in the fact that a greater number of men drive more miles each year and under more hazardous conditions, the article concludes. No method has yet been found to determine the relative risks faced by males and females and until such data are available no one can say with accuracy which sex is safer at the wheel.

Irvin St. Clair and family left last Monday for a two weeks trip of visits and vacation. First they expect to visit their parents, then go on to the Gulf coast country, touring the area from Corpus Christi east to Galveston. Irvin said before leaving, he might go on to the Panama canal to inspect the Gatun locks so he could intelligently advise the in-coming president, Wendell Willkie, the degree of danger from German bombardment.

Identity of Junius Unsolved
The identity of Junius, famous political letter writer of the Eighteenth century, still is debated.

SUBSCRIPTION RATES
In Bailey County, one year, \$1.50; Outside of County, one year, \$2.00.

Advertising that does not show in its text or typography that it is paid for must be marked as an advertisement. All local advertisements remain in this paper for the time specified or until ordered out. All notices of matters not by whom nor for what purpose, if the object is to raise money by admission fee or otherwise, is an advertisement and when sent in for publication must be paid for at the regular advertising rate per line for each issue printed.

Obituaries, notices of thanks, and resolutions of respect will also be charged for at the same rate.
Any erroneous reflection upon the character, standing or reputation of any person, firm or corporation which may appear in the columns of the Muleshoe Journal will be gladly corrected upon its being brought to the attention of the publisher.
In case of errors or omissions in local or other advertisements, the publisher does not hold himself liable for damage further than the amount received by him for such advertisement.

Editorial

Every Great Attempt is Glorious Even if it Fails

OUR PLEDGE

We pledge allegiance to the Flag of the United States, and to the Republic for which it stands, One Nation, indivisible, with Liberty and Justice for all.

A THOUGHT FOR THE WEEK

Verily, verily, I say unto you, Thy servant is not greater than his lord; neither he that is sent greater than he that sent him.—John 13:16.
Command thy servant adroitly with few plain words, fully, freely and positively, with a grave countenance and settled carriage: These will procure obedience, gain respect and maintain authority.—Fuller.

FACTS OF DEFENSE

In any sound defense program, the heavy responsibility of providing adequate arms and supplies must fall upon industry. It is no wonder, therefore, that the public is turning these days towards industry's leaders, anxious for their views on this number one problem.
It is encouraging, on this account, to hear H. W. Prentiss, Jr., who because of the fact that he heads the National Association of Manufacturers expresses the attitude and the experience of thousands of industrialists, declare: "Just as American manufacturers have excelled the world in mass production for peace, they can also surpass the world in its use for defense."
Mr. Prentiss, however, adds a note of warning that should also be heeded. He points out that vast appropriations are not enough. We must have speed and surety on the part of government in deciding what is needed. And we must have a reasonable attitude—
"It will be damaging to real defense, disappointing to the nation, and unfair to industry," he warns, "to expect thousands of airplanes and tanks to roll off production lines in a week or two. Production lines of that magnitude simply do not exist in America today. You can't appropriate" battleship a tank, or an airplane—you can only appropriate the money..."
Mr. Prentiss drives home another point with needed force when he reminds us that "physical defense is not enough."
"The American people must rearm themselves spiritually and mentally. They must rededicate themselves to the institutions and the high principles they are preparing to defend. They must recognize that there is no substitute for personal toil and sacrifice and devotion. Only by firm adherence to our traditional American ideals, coupled with adequate military defense, can we be sure that the terrible price the democracies abroad are now paying will not be exacted from us."
Surely all Americans unite in the hope and the prayer that similar clear-headedness, similar understanding of our needs, will exist in the same measure in the minds of the responsible leaders of other groups in our nation!

"FERNEST IT"

Under a Hyde Park headline, the daily newspapers last Saturday carried a story which quoted President Roosevelt as saying the world now pouring billions into war machines must dump their armaments onto the scrap heap, if a lasting peace is to be secured.
Seems like we recall hearing that statement before, and we rise up on our hind legs to protest it. We are

OTHER USES

Man has missed many of those inventions that science originally intended for purposes not so harmful or destructive. The cases of man turning various implements of inventive genius into forces that kill and maim, are numerous. The Chinese, when they invented gunpowder, were interested principally in turning this discovery into the manufacture of firecrackers. Gunpowder has gone too far since those days.
The parachute schools of Germany schooling in the landing on enemies during this war, date back to 1783 for the first recorded parachute leap. At that time a French doctor guided this contrivance to the ground after leaping from a tower. He hoped his invention would prove beneficial in assisting people trapped on the roofs of burning buildings. The deluge of chutes in 1940 on the land of the French doctor was a far cry from the intended purpose.
We must not put all the blame on science.

AN ESSENTIAL

Wanted: the spirit of sacrifice. This was one of the four reasons attributed to the failure of France

"fernest it." That is we are for it if it applies just to those warring European nations, and against it if it also includes the United States of America.
During past years since the World War innumerable suggestions have been made to produce a lasting peace, and various organizations have been devised to accomplish that end, all of which have come to naught. There have been peace conferences, the League of Nations, the Geneva pact, the World Court, the London Naval Treaty, the Kellogg Anti-War Pact, and probably several other well meant humanitarian stunts we do not now recall—all of which have cracked like blown-up bubbles.
Now Uncle Sam and his democratic form of government has been put on the spot. Let it stay there. Now we have already appropriated \$5,000,000,000 dollars for defending our national principles and ideals, and may have to spend up to \$20,000,000,000 before we convince the rest of the world of our seriousness and ability to preserve those fundamental facts. Let's go ahead along this line!
This editor has always been a poor hand to start trouble, but a good hand to carry it on when once started, and we have no spirit of compromise in the present situation. As we see it, this world's warring will never stop until the United States puts a stop to it. It's up to America to eventually enforce peace upon practically all other nations of the world.
So we say on with the army and navy, the airplanes and tanks and every other conceivable form of war implement and munitions necessary to enforce our contentions. We have tried humanitarianism sufficient. Our peace talks have been of no influence whatever. All arguments have proven futile. Apparently nothing but force remains. Clearly nothing but the U. S. army and navy enlarged to the nth degree, fully equipped and highly trained will ever bring about that much longed for and prayed for peace so sincerely desired. With all appreciation of the President's desire to end war, scrapping armaments, if they include those of the U. S., will never do the job.

IT'S UP TO YOU

Despite the fact that most towns have public playgrounds for the pleasure of the children during summer months when idle hours are occupied in health building, there are still too many youngsters who insist upon playing in the streets.
Though they have been cautioned by parents and press of the danger in darting back and forth in traffic as they dodge and sidestep in front of cars. The number of accidents caused is enough to make the plea worthy: If the child persists it is up to the motorists of Muleshoe to look out for them and slow down when a group of children are playing in the street. Several accidents of this kind have recently been averted by narrow margins.

WE EAT WELL

Europe's refugees are depending upon this hemisphere to draw upon their surplus wheat to give bread. We are better able to supply food stuffs than we were during the war of twenty-five years ago. Our food basket has been overflowing and the emergency has found our relief work including a goodly share of produce sadly needed by hungry people.
We are informed by economists that this coming winter will see one of the worst famines in history. As we look out over our hardy gardens and growing expanses of fields, as we sit ourselves down to Muleshoe tables laden with fresh vegetables and fruits, let us give thanks deeply and sincerely.

Wanted: the spirit of sacrifice.

This was one of the four reasons attributed to the failure of France

Jaunty Journalettes

Sometimes the sweetest natured man in Muleshoe gets nasty when he finds hair in the comb.
We know a Muleshoe man who thinks he is witty because his wife laughs every time he opens his mouth.
The Muleshoe fellow who is doing a lot of verbal worrying about our European debts may be running an over-due account at some local store.
Times are certainly getting better. We notice several of Muleshoe's gentlemen farmers are now wearing neckties.
Some of us in Muleshoe remember how we laughed when Hitler said he had a man already picked out to rule Britain.
Strange, but it seems no two Muleshoe women can agree on where their waistline comes. And since we think about it, there is quite a difference!
We've never been quite able to understand why a woman will labor for hours over a fancy dessert that doesn't taste nearly as good as apple pie.
Actuaries claim it takes a population of 10,000,000 people before one of them has the chance to live to the age of 116 years. Evidently Muleshoe must grow some!

SNAP SHOTS

We have now found out that what was "just around the corner" was only another filling station.
Columbus only discovered America. We're the folks who are supposed to do something with it.
Always expect bad news when they start out with: "I'm going to be perfectly frank with you."
We are now in the season when post office clerks have to hurry to get all the postal cards read.
During the U. S. war men were accused of hiding behind women's skirts; but now they have to use billboards.
Some folks are getting jittery because they think America has no defense against the Germans; but it's dollars to doughnuts Hitler's bunch would never get by the U. S. WPA army. Those birds simply won't move.
With the billions of dollars of foreign silver purchased by the U. S., if the European war shuts off the supply of tin, it is suggested housewives, when canning this fall get the government to let them have some of that silver with which to thin their cans.
Should America again come to war, we are in favor of enlisting women as soldiers. There have got to be entirely too many of them in the world of today, plenty of whom are more or less miserable themselves and make the other sex miserable because of them. From time immemorial men have slaved for them and fought their battles. Now

that they are taking men's jobs, drinking the liquor, smoking their cigarettes and taken to hoisting their dictatorially let them shoulder rifles and get in the ranks of soldiers!

Pavement Pickups

Prof. Dickinson suggests perhaps the hour-glass was squeezed together in the middle just to indicate the waste of time, but admits he don't know why women used to squeeze their waists together.

A negro in Judge Klump's court the other day was charged with desertion. "The ain't no deserter, judge, he insisted. "I you know that which like I see do you'd know I see just a refugee."

A bunch of Muleshoe Isaac Walton were fishing at Alamogordo dam a short time ago when it was discovered they all had plenty of cigarettes but not a single match in the crowd, according to report. Roy Jordan threw out one cigarette and made the boat a cigarette lighter.

Mary Hart says she has at least three types of people who eat at her cafe, the optimist, the pessimist and the skeptic. The optimist says "Please pass the cream." The pessimist says, "Please pass the milk." The skeptic says, "Please pass the pitcher."

A cute little lass approached Date Plummer at St. Clair's the other day and asked if he had any notions "Sure," replied Date, "but we suppress them during business hours."

The good looking nurse at the local clinic complained to Dr. Lancaster the other day that she had a male patient and every time she took his pulse they always got faster. "What shall I do," she asked. "Just blindfold him," the doctor replied.

THE JOURNAL'S Weekly Scrapbook

WEEK'S BEST RECIPE:

Caramel Bread Pudding: 3 eggs, 1-2 c caramelized sugar, salt, 3 C hot milk, 1 t vanilla, 6 slices of bread. Beat eggs enough to mix then add sugar, salt, milk and flavoring. Stir until the caramel is dissolved. Line dish with bread, pour in custard mixture and set in pan of hot water. Bake in moderate oven about 50 min. until it is until custard is cool.

FOR FISHERMEN:

If a spring flows in to your favorite stream that is well. Fish usually stop feeding when water temperature is over 72 degrees. Today there is a new gadget on the market used as a fish thermometer. When held in the water it registers the temperature according to depth. This gives the fisherman an idea of where to fish for the kind of prey he wants.

NOT SO EASY!

A favorite game with a subscriber we pass on to you. He calls it "Cards in your Hat" and plays it alone or as a contest. Place a hat, bottom side up, about 5 feet in front of where you stand. This goes on the floor by the way. The crown acts as a bowl to hold the cards that you try to place inside, one at a time. There is a trick to the flipping and it takes practice to be good at this. If playing in a contest use two hats, two different decks of cards and score by points as, Aces 15 pts., face cards 10 pts., others 5 pts.

FOR PICNICS:

A nice picnic refrigerator can be made by packing a large tin can tightly with ice and cover it securely. Place this in the center of a hard can and line the hard can with newspaper to keep the inside cool. Pack your foods around the center can of ice to keep them fresh. This acts as a cooling unit for a long enough time for your picnic.

INSPIRATIONAL

If for the age to come, this hour Of trial hath vicarious power, And blessed by Thee, our present pain Be Liberty's eternal gain: Thy will be done.—John G. Whittier.

Watson News

Rev. Badley filled his regular appointment here Sunday morning. Mr. and Mrs. Bill Key of West Camp visited Mr. and Mrs. Fort, Sunday.
Miss Inez Henderson of Odessa, is visiting in the home of her brother, James.
Elmita Reed, Darlene and Robert Wood were baptized at Mr. E. R. Wittner's Sunday afternoon.
Rev. Fred Kirbo, began a 10 days meeting Sunday night.
Mr. and Mrs. Adolph Neutizer visited in the community Sunday.
Edward Peters of Waco is visiting in the home of his sister, Mrs. Andrew Wittner.—Reporter.

POLITICAL ANNOUNCEMENTS

The Muleshoe Journal has been authorized to announce the following candidates for the respective offices named subject to the Democratic primary to be held Saturday July 27, 1940.

J. A. (Allan) MCGEE
H. L. (Possun) LOWEY
C. E. (Jack) KING

For County Commissioner
Precinct 2:
JOHN S. WILLIAMS (Re-election)
HAROLD MARRDIS

For County Commissioner
Precinct 3:
D. WARNER (Re-election)
WILLIAM H. EUBANKS
GEO. W. FINE

For County Commissioner
Precinct 4:
JIM CLEMENTS
A. J. (Arthur) SHAFER
W. R. (Bob) ADAMS

For Constable, Precinct 1
J. N. JAMES

THE MULE

Alas Alas! The poor old mule. He works from morn 'till night. And all he needs is just some feed 'To keep his skin on tight.
O'er hills and rocks, with sheer hard knocks To beat him on his way. Down rows of corn until the horn Is blown at mid of day.
And very soon in afternoon, We start him out again. In cold and sleet, he sows the wheat That bring us golden grain.

And how he glats upon the oats We feed to him at night, While farmers dine on wine And fruits in great delight.

No pleasure e're his lot befalls He knows no joy nor thrills The poor old fool is just a mule That toils beneath the hills.

But up above where all is love, And God is hard to fool, Doth he not see the way which we Have treated the poor mule?
Johnnie Harris

SAVING MONEY With Cotton Bags

Easy to make—and pretty enough to please any little girl from 2 to 8 years old. And it's made from laundered cotton bags! This little dress for play or school is cut in six gores, with tiny puff sleeves. Use just two large cotton bags that originally contained flour or sugar. They are soft and white when laundered. The neck and sleeves and bottom of the skirt are bound with colored bias tape, with an extra row about an inch above the bottom edge, and little colored buttons to match the tape the only extra trimming needed. Only a few cents—and how delighted the small daughter will be! Extra cotton bags can be obtained from your nearest baker or department store. Other Cotton Bag Sewing ideas are illustrated in a free booklet. Send to Textile Bags, 100 N. LaSalle St., Chicago, or National Cotton Council, Box 18, Memphis.

THIS BUSINESS OF Living
BY SUSAN THAYER

THE SPIRIT "QUICKENETH"

When the lawn has to be mowed, the big plot out by the garage and he's all worn out. He flops down on the ground and chews a blade of grass as he gazes up at the puffs of clouds in the soft blue sky or aims a stone at some marauding cat.

But when "the gang" comes by to get him to go swimming it's quite a different story! His tiredness vanishes as if by magic and he's rarin' to go. He can spend the whole live-long afternoon down at the pool—diving—swimming under water—racing the crawl and never feel the slightest bit of tiredness. The only result seems to be wet hair and a prodigious appetite when it's over and he's home again full of satisfaction and stories of his own prowess. The difference? He wanted to swim. His heart was in it! While the lawn mowing was something he was told to do and was uninterested in.

The same kind of thing holds true with growing people. We do well, and easily the thing we put our heart into. It is the "spirit that quickeneth"—even literally.

That's why there's a lot of meaning in the fact that the National Association of Manufacturers, an organization representing many of the leading industrial concerns of this country, on whom we must depend for equipment for national defense, has gone on record as being in the necessity of rearming virtually as well as materially. Its statement issued by this organization of realistic business men a few years ago, they say:

"Physical defense is not enough. American people must rearm themselves spiritually and mentally, they must rededicate themselves to

the institutions and the high principles they are preparing to defend. They must recognize that there is no substitute for personal toil and sacrifice and devotion. Only by firm adherence to our traditional American ideals, coupled with adequate military defense, can we be sure that the terrible price the democracies abroad are now paying will not be exacted of us."

Maple News Items

Rev. S. H. Crockett filled his regular appointment here Sunday. Mrs. Pruitt Johnson of Okla., is visiting her daughter-in-law, Mrs. John Tyson.

Mr. and Mrs. B. E. Christie and children of Monroe and Mr. and Mrs. M. W. Holloway of Lubbock visited relatives and friends here Sunday.

Singing was held here Sunday afternoon and many were present. The ladies soft ball team went to Oasis Wednesday afternoon of last week to play. They won with a score of 26 to 19. The Oasis ladies are planning coming here Wednesday.

Mr. and Mrs. J. L. Kirkpatrick have been entertaining relatives from Wichita Falls.

The Methodist revival began Wednesday night. Rev. Charles Martin is conducting services.

Misses Nola and Dene Ball are spending the summer at Hereford.

Pep N. M. men's ball team defeated the Maple team Sunday afternoon.

Rev. Stovall of Levelland filled his appointments at the Baptist church Sunday—Reporter.

1 bale of cotton gives

218 hours of work to a cotton farmer

Making this cotton into 2,270 yards of cloth gives

126 hours of work to a textile-mill operative

Making this cloth into 13,600 5-lb bags gives

106 hours of work to a bag-factory employee

In these hours of work American labor earns its wages, builds up its purchasing power, increases its effective market for the retailers who sell their product in bags, creates business on which the income of many related American businesses depends. The cotton dollar, whether it goes to farmer or mill hand, is cash on the barrel head, spent quickly, spent powerfully—guides the economy of not only the Cotton Belt but also the sections who sell to the Cotton Belt.

No substitute for cotton in bagging spreads work and wages over as broad a consumer base as cotton does. No other dollar reacts as powerfully in American business as the cotton dollar. Fellow consumers would do well to insist that the articles they are packed in cotton bags.

OLD TIMER SEES EXTERMINATION OF PRAIRIE DOGS IN THIS AREA AS CIVILIZATION ADVANCES

"Times have certainly changed during the past 20 or 25 years," remarked H. C. Kennedy a few days ago. He was speaking about prairie dogs, how numerous they used to be in this section.

When Mr. Kennedy came to this Plains country years as one of the early settlers prairie dogs were here by the millions, and every few miles there were big towns of them; but now all that has changed, and these little rodents with the wagging tails are actually becoming scarce, so scarce, in fact, that only a few weeks ago R. L. Brown, local citizen, received an order from a museum for a half dozen and it took him about two weeks to fill the request.

The range conservation program with benefit payments for rodent eradication has already sounded the death knell for the prairie dog in this area, and it is only a matter of time until this little quadruped will become entirely extinct.

For the past 25 or 30 years this little brown-pawed animal has withstood all kinds of punishment. Professional dog poisoners, visiting dog towns year after year with strychnine, cyanide and sweetened grain, have decimated once vast villages of them.

Rambling tunnels branch out from the top shaft and a listening post is established near the branches where a "guard" may carry on secret observations from a niche in the wall.

Prairie-dogs feed on various grasses and forage plants. Uncontrolled, they do vast injury to range lands. They also have a carnivorous taste and destroy many grasshoppers each season.

Prairie-dogs do not dig "water wells" as it is popularly believed. They shun moisture in their dens and build elaborate crater-shaped mounds about their burrows to protect them from rain. According to biologists they water themselves by chemical action in their stomachs, converting starchy foods into water. Nor do they live in harmony with owls and snakes. Owls live only in deserted dens and snakes visit dens to seek "dogs" to devour.

Prof. Gallman Gives Approval of Article In The Journal

Pampa, Texas, June 26, 1940. Dear Editor: You, like Lord Byron, frequently have very illuminating spear-like projections of self into the vast realm of intangible truths and grim realities to such an extent that the reader is ushered onto a fertile plain abounding in cultural and intellectual resources. Obviously, you are enabled to do so by extensive knowledge, psychological approaches, logical analysis, profound reasoning, sound interpretation, and a generous recognition and application of spiritual values. Frequently, the reader can find plenty for personal enrichment, area for meditative but constructive thinking, insights conducive to correctly formed ideas and opinions, and appeals to the urge to do much reading, thinking and research.

Frankly, I would not have you consider this tribute as merely an outburst of mental indulgence. I have just read your recent article "America I s Not God," and shall state that it was excellent. I have enjoyed it to the fullest extent. I dare say that your picture added to my enjoyment, although I'll assure you that it did not detract any whatever.

Anticipating that more and similar articles may be forthcoming soon, I beg to remain,

Respectfully yours, Flaude Gallman

Many thanks Professor for your courteous letter of commendation. Unlike Lord Byron, however, we do not have a club foot; but instead a bald head on the outside, though we trust not entirely so interiorly. There has recently been much unnecessary hysteria, we believe, about the war situation as it may affect America, and we shall have more to say in the near future along this same line as space in the Journal affords. In a near issue we expect to run an article entitled, "The Omnipotent Nation," which we trust may also meet with your valued opinion. Incidentally, we received numerous comments on the article, "America I s Not God" and a previous one, "The New World, or America As It May Be."—Editor.

Cashew Nuts From Trinidad
The first cashew nut came from Trinidad. The trees were transplanted to India and East Africa, where hundreds of millions of pounds of the nuts are harvested annually, but Trinidad remains its birthplace.

Human Race Blamed
"Human misfortune," said Hi the sage of Chinatown, "cannot be cured by censure. The human race has only itself to blame for all the unpleasant things that have happened to it."

Burrows from six to 10 inches in diameter descend abruptly to 18 feet and are prolonged on a horizontal plane 12 to 30 feet further. By a series of steps they terminate in small dens and storage pits where young are reared and debris piled.

The "Bugge Bible"
The "Bugge Bible" is an old edition, so called because in the Ninth-first Psalm where it says, "Thou shalt not be afraid for the terrors by night," the "Bugge Bible" reads: "Thou shalt not be afraid for any bugs (our word 'boogy') by night."

Statue for Columbus
Christopher Columbus, who discovered the Haitian-Dominican island in 1492, is commemorated by a statue in Santo Domingo city. Directly east of Cuba, the island is called officially Hispaniola after the discoverer's original title, La Española.

WEEKLY LAY SERMON
VISION AND LIFE

By JESS MITCHELL

It is a great thing to enjoy life, for life itself is the most marvelous, the most intricate and unexplainable thing we have. I have always been intrigued by those who have taken the simple fact of life at birth and built upon it in a...

finding his method and motive in everything touching human existence, and that arduous culture and steadfast tenacity are necessary to see the unseen, recognize the importance in the present passing and understand the future yet to be revealed.

The world owes much to the men who speak with final and approved authority, and these kind of men do stick up through history like mountains here and there pushed up through a great plain. Their speeches imperative, their information to the rest of us little folks demanding.

In every age since history began to be written there have been outstanding personalities, men who have stood head and shoulders above their fellowmen, so to speak, who have had enlarged visions of the opportunities and responsibilities of life and have striven to perform them in the most possible perfect manner.

Seemingly many have become renown who had little but the fact of life to begin with. They were naturally restless as they grew mentally and spiritually. They were iconoclasts, never satisfied with the present, but always looking forward to something greater.

Even when perfection is apparently attained it is often unsatisfying, for ideals have a habit of growing as they are approached and becoming more illuminating and appealing as they are realized, simply because the soul of man grows bigger and bigger, more encompassing and comprehensive as he steps forward.

Newspapers of today have a custom of printing at the beginning of a new year a review of the high spots of last year's occurrences, and the most outstanding events are printed in black face type, while frequently the climaxial facts of the previous year are emphasized with capital letters.

and women of last year's history, those who, like Martin Luther declare, "Here I stand, I can do no other," or like Simon Peter of old declared "We must obey God rather than man." They represent a kaleidoscopic review of those of unswerving convictions, ultra-determined principles and indomitable courage who drove ahead regardless of determining influences to the consummation of their heaven-given task and the achievement of their duty toward the ideal which lead them onward and upward.

Popular acclaim never appeals to the one with a real vision. No earthly plaudits ever affect him. If worldly emoluments come to him, they are purely incidental in his journey toward the ideal. That inner compulsion always drives him onward regardless of any personal consequences.

Even when perfection is apparently attained it is often unsatisfying, for ideals have a habit of growing as they are approached and becoming more illuminating and appealing as they are realized, simply because the soul of man grows bigger and bigger, more encompassing and comprehensive as he steps forward.

So the world is what it is today because of the visions of men with sincere purposes and tireless endeavor. In every department of life the race has climbed a little higher, come a little closer to the summit of perfect life and arrived a little onward toward the goal of the ideal because of its outstanding characters which history records.

Patience Exhausted
Industry Rises To
Large Patriotism

Commenting on the fact that socialist experiments and political interference with the normal growth and expansion of industry in our country have proven a snare and a delusion, the Bucyrus, Ohio, Telegraph-Forum says editorially.

The American spirit America's industry is beginning to fight back at the forces which have been making unreasonable and unconstitutional demands in a fashion bordering too closely to totalitarian policies.

It is industry's right to protect its own interests and when industry protects its interests, it protects, too, the interests of practically all American working men and large and small communities.

It is time that America awaken to the true facts and compare them with government waste and foolishness. The ideals of the truly great continually haunt them, and like Dante's ghost, will not be downed.

Home Demonstration Agent of
Bailey County

Jelly makers used to cross their fingers and hope for good luck this time of year, but modern science has taken much of the guesswork out of jelly-making.

Now specialists in food preservation of the A. and M. College Extension Service, have compiled a list of rules for each step in the jelly-making process, and if these are conscientiously adhered to success in the undertaking is virtually assured.

Select good quality fruit that is fresh and firm. A mixture of ripe and slightly underripe fruit is usually best since overripe fruits are low in acid. But they will make jelly if one tablespoon of strained lemon juice is added to each cup of fruit juice.

To know when the sirup forms jelly is important in cooking it the right length of time. The jelly test most commonly used is called "sheeting off." To make the test, dip a large spoon into the boiling sirup and lift the spoon so that the sirup runs off the side.

In preparing plum jelly one-half cup of water to each pound of prepared fruit is the best proportion for extraction of juice. Time of boiling for the extraction should be from 15 to 20 minutes.

Fairview Items

Sunday school was attended by a good number. Rev. Vernon Grieg filled his regular hour at the Church of Christ services Sunday morning.

A good crowd was at singing Sunday. Everyone is invited to singing next Sunday night.

A miscellaneous shower was given to Mr. and Mrs. Bill Feagun last Tuesday night by the young couple's friends at the home of Mr. and Mrs. Everett Wallace.

Mr. and Mrs. C. S. Gaddis of Lubbock and Mrs. J. E. Higdon of Pearsall spent the 4th visiting Mr. and Mrs. Everett Wallace.

A group of people, from this community went on a picnic at Buffalo Springs near Lubbock, Sunday.

Miss Virginia Whittington visited in the Longview community last weekend.—Reporter.

CAROLINE SUE McNEESE HAS BIRTHDAY PARTY

Mrs. Catherine McNeese, assisted by Mrs. R. L. Hobbs entertained with a lawn party honoring the third birthday of little Caroline Sue McNeese, at their country home, Friday of last week.

Many outdoor games were enjoyed by the little girls, after which they were invited into the dining room, where a lovely cake adorned with three candles, which were blown out by the honoree, the cake then cut and served with punch to Caroline Holt, Jimmy Holt, Mary Jo Holt.

SAVING MONEY
With Cotton Bags

Are you upset about the cigar burn in the leather top of your new bridge table? Don't worry about it—because a washable cotton sugar bag or flour bag will make a cover just the size of the bridge table. A bolt of hush tape can be used to bind the edges and make the ties to hold the cloth secure. Add a little starch when laundering, and your cotton bag bridge table cloth looks like linen and gives a smooth playing surface which resists soil.

Extra cotton bags may be obtained from your nearest baker or department store. Many Cotton Bag Sewing ideas are illustrated in a free booklet. Send to National Cotton Council, Box 18, Memphis, or Textile Bags, 100 N. LaSalle St., Chicago.

SODIUM FLUORIDE GETS
THE COCKROACHES

Sodium fluoride, either pure or mixed with equal parts of flour, is the ticket for killing cockroaches. For control, dust sodium fluoride in the places frequented by the roaches, especially along the edges of the rooms. The best results will be obtained by use of a dust gun which will force the dust into cracks and crevices.

The insecticide is most effective when applied in the evening, since roaches do not move around much in the day time.

Sodium fluoride is toxic to man and animals and should not be used where children may get at it.

Trout Favored by Fishermen

Great strength and a fighting heart in a small body make the trout a favorite of fishermen. No fish as small fights so long when hooked. It protects itself by changing color to blend with that of the bottom of a stream. It is something of a weather prophet, too. Eight or nine hours before a freshet, caused by rains miles away, floods its home stream, a trout stops feeding.

SAVING MONEY
With Cotton Bags

A series of containers for liners, lingerie, handkerchiefs, hose, shoes, etc., can be made from cotton bags. The items pictured were made from laundered cotton bags, which are gleaming white, bound with colored bias tape. A personal touch can be added by applying an embroidery initial of the user. Extra cotton bags can be obtained from your nearest baker or department store.

Other Cotton Bag Sewing ideas are illustrated in a free booklet. Send to National Cotton Council Box 18, Memphis, or Textile Bag 100 N. LaSalle St., Chicago.

What's Happening in Washington; Other Important Cities

It is now claimed the U. S. navy is the largest in the world, considerably exceeding that of Great Britain.

Two more French gunboats were sunk last Saturday by the British, several others being damaged at the same time.

The Packard Motor Co., Detroit, has contracted to build 33,000 Rolls Royce airplane motors for England and 900 for the U. S.

Compulsory military training of men between 18 and 60 years of age, is being considered in Congress this week.

Mexico D. P., counted more than 100 dead and at least two U. S. citizens wounded in election fights in that country last Sunday.

It is reported Postmaster Jim Farley will head the New York Yankees baseball club if he don't get nominated as president by the Democrats next week.

Mrs. James H. R. Cromwell, the former Dorris Duke, has offered to take 500 English refugee children and spend \$250,000 a year for their support.

Report that the U. S. destroyer Barry had been torpedoed off the coast of Spain is said officially to be untrue. The report emanating from some other source.

Germany claims to have lost only 160,000 men against the French 1,500,000 during the recent invasion of France and the low land countries.

Whether war or peace lies ahead, congressional sources have estimated the nation's defense bill will run to more than \$3,000,000,000 annually from now on and a good deal more than that for the next seven years.

An estimated 1,000 German prisoners were drowned Wednesday last week when a German submarine sank a British vessel that was transporting them to Canada for safe-keeping.

Receiving another shipment of \$1,500,000,000 in gold from France, England and other European nations classed as neutral. The U. S.

now has more than \$20,000,000,000 or over 80 per cent of the world's entire gold supply.

Representative Joseph W. Martin, Massachusetts, House minority leader, has been appointed to direct Republican activities toward election of Wendell Willkie as next U. S. president.

A new stratosphere airplane record was established last Tuesday when a plain flew from Los Angeles to New York in 12 hours and 14 minutes, being about two hours shorter than any previous flight. It came through the stratosphere, averaging 17,000 feet height.

The British navy captured a large part of the French fleet Thursday last week in a battle off of the northern coast of Africa, obtained were two light cruisers, two battleships, some submarines, eight destroyers and 200 small mine sweepers and anti-submarine craft. Other French vessels marooned in British territory were taken over without any fight.

Before another year rolls 'round Texas will be possessed of about 400 more land-owners who, for years past, were not sure they lived in Texas or Oklahoma. It took a S. survey to finally determine that answer on a trip of land lying between the two states. The strip is about two-thirds of a mile wide at one end, 135 miles long and running to a point at the other end.

Typhoid Unnecessary Evil in Texas But Still Persists

Austin, July 9.—The control of typhoid fever in the United States represents an outstanding achievement in preventive medicine. In 1900, the national death rate from this disease was 31.3 per hundred thousand; today, the rate is 1.9. This marked decrease in typhoid deaths is based on knowledge of its cause, how it is spread, and the application of control measures.

Perhaps at this time, no other disease is more vulnerable to scientific attack than typhoid fever. "Indeed, it is no exaggeration to say that from a public health point of view, there should be no typhoid fever," declares Dr. Geo. W. Cox, state health officer.

However, Dr. Cox pointed out that typhoid, while an unnecessary evil, was a persistent attacker of Texans. Each year about four hundred Texans die of typhoid, and approximately four thousand are ill. The average duration of illness is about six weeks, which makes typhoid responsible for the loss of 168,000 man days in Texas each year.

Typical prevention is a simple procedure. Typhoid vaccine is injected under the skin in the upper part of the arm, in three doses, usually at weekly intervals. It ordinarily protects against the disease from two to three years or longer, although one who is definitely exposed to infection should be re-vaccinated at more frequent intervals.

Typhoid fever can be controlled by the use of pure water, pasteurized milk or clean milk, clean foods, proper disposal of sewage, screening against flies and destroying their breeding places, by search for and care of human typhoid carriers, and by the general practice of vaccination.

Certain people, apparently healthy carry the germs of typhoid in their intestines or urinary tract and cause many cases of typhoid each year by unsanitary personal habits. They are called typhoid carriers, and many cases of typhoid result from personal contact with these carriers.

In selecting a place for a vacation, choose one where the water and milk supplies are pure. Be sure that the food supply is screened against flies. When camping, it is best to boil water used for drinking, unless its purity has been certified. Clear, sparkling stream water may be polluted.

FARM TOPICS

DEVICE DETECTS IODINE IN FEEDS
Colorado Scientist Develops Important Testing 'Torch.'

By DR. FRANK GASSNER
Use of a special torch, recently developed at the Colorado State college experiment station to determine iodine content of feedstuffs, may prove tremendously important to dairymen, live stock and poultry growers of the nation.

While the experiments were confined to feed grown in Colorado, the general results will be important to livestock industries all over the nation where the feed grown is low in iodine content. Colorado feeds are very low in this element—so low that the state should be included in the so-called "goiter belt" of the Midwest.

Investigations carried on at the experiment station have shown that poultry and rats in some cases will eat feedstuffs when they are fed ordinary rations. Work by the poultry and pathology sections of the station was the first in which it was shown possible to produce goiter in poultry experimentally. Similar investigations are being carried on with lambs and cattle, and there is evidence that goiter may be produced in these also. Thus it is probable that feed formulas must include ingredients rich in iodine to prevent goiter.

The torch was developed in the pathology section of the experiment station. It is made of specially resistant stainless steel of chrome and nickel alloy and will reveal iodine in as small a proportion as 10 parts per billion.

This is a considerable improvement over the brass torch previously used for this type of work. The disadvantage of the brass torch was that it had to be lacquered often to prevent contamination of the sample by excessive corrosion.

The only torch known by the department to be as satisfactory as this stainless steel instrument is one at the University of Minnesota which is made of platinum. This torch cost approximately \$2,900 as compared to a cost of less than \$25 for the steel torch.

The torch is useful in ascertaining not only the iodine content of feedstuffs, but of biological material as well. Anything that can be made to burn can be tested with this torch.

Power Line Building Cost Is Cut to \$900 Per Mile
Engineers of the Rural Electrification administration are constructing electric lines into rural areas at an average cost of about \$900 per mile. These costs prior to the REA ran from \$1,500 to \$2,000 a mile because private engineers were using for rural lines the heavy construction used in city and suburban areas.

The REA engineers dropped the cross arm from the single-phase lines and simplified pole assembly for the two- and three-phase lines. New, stronger conductors allowed longer spans with fewer poles.

Several Texas projects have been built recently at a cost of about \$500 a mile. The construction was light because sleet and ice do not have to be reckoned with in Texas. But even under sleet and wind conditions, the lines have held up well.

Durability of the light construction was demonstrated last year when a series of destructive tornadoes struck southern Minnesota. At Anoka, near Minneapolis, although the substation was destroyed, practically no line was destroyed. Near Melrose, west of Anoka, during the same week, greater damage was inflicted on lines of a utility than on REA lines in the same territory. Service of the co-operative was restored in less than half the time required by the utility.

Many private utilities are following the lead of the REA engineers in using lighter construction on their rural lines.

Dipping for Mange
Mange in hogs may be controlled by dipping with a solution made at the rate of one gallon of liquid lime sulphur to 25 gallons of water at a temperature of 100 to 105 degrees F. Siccotone sulphate, 40 per cent strength, used at the rate of one ounce to three gallons of water, has also proved effective. Dip the hogs twice about ten days apart, although in severe cases three or more dipplings may be necessary to clean up the skin.

Horses in Wartime
During the first three years of the Boer war, 1900-1902, inclusive, prices for horses in the United States advanced to \$93.76 per head. During the three-year period 1906-1908 the average price had been \$75.56. During the five years 1909-1913 prior to the World war the average price of horses in the United States had been \$148.02. During the five years 1915-1919, inclusive, the average price in this country advanced to \$191.72.

Progress News

Miss Hazel Parker has been receiving treatment in a Lubbock hospital for an eye injury, caused by being struck in the eye by some small object, while hoeing cotton. It was feared she might lose the sight in that eye.

Mr. and Mrs. Vernon Vinson and children visited her parents, Mr. and Mrs. J. L. Herrington in West Camp community last Sunday.—Reporter.

Electricity Demonstrated
The Progress H. D. club met with Mrs. W. G. Kennedy, Tuesday of last week.

Miss Lillie Gentry demonstrated the use of electric equipment by mixing gingerbread, using an electric mixer and baking it on an electric range. Butter was made by churning in an electric churn. The use of the electric refrigerator was also shown.

Cecil McLaury gave a very helpful talk on electrical equipment. Another part of the program was on knowing Texas. Miss Gentry read some delightful poems written by poets living in Texas.

Mrs. Ada Murrah gave the council report. The county wide picnic was discussed. The annual club trip was discussed. Miss Besse Vinson and Mrs. Ada Murrah were asked to find out about a school bus and to give reports on places of interest that might be visited.

Pineapple punch and gingerbread were served to all present: Visitors—Mrs. Arthur Tucker and Mrs. Jess Murrah; Members—Misses Besse Vinson, Jerene Murrah, Vera Baker, Eunice Humphrey, Mesdames E. W. Gray, Anna Mae Bearden, Ada Murrah, J. J. Bross, L. H. Hogan, Fern Davis, Katie McLaren, Etelle Holley, Leona Mitzelreit, Lela Gulley, Charles Long, Dave Standifer, T. A. McLaren, Charles Willie, Roxie Lowry, Miss Lillie Gentry and the hostess, Mrs. Kennedy.

The next meeting will be with Mrs. Carrie White, July 16th. Everyone is invited.

Weiner Roast Enjoyed
Members of the Progress H. D. club and their families met at the home of Mrs. W. G. Kennedy for a weiner roast or what have you, the night of July 4th.

An open fire was built in the yard and the weiners roasted, bacon fried and eggs scrambled on it. There was in addition to this, bread, pickles, potato salad, potato chips cookies, marshmallows and iced 'club punch' galore.

After everyone had eaten their fill numerous games were played under the direction of Miss Besse Vinson, recreation leader. One family was represented by four generations, being, Mrs. J. F. Shelton of Peaster, her daughter, Mrs. Marie Dickinson and granddaughter, O'Wanda Dickinson all of this community.

The party adjourned at a late hour with everybody tired but happy. About 80 people attended.
