Alfalfa Cutting Underway Here

Muleshoe plant of the National Alfalfa Milling Co. is grinding away on first cutting day of the new season. Dear Bishop, manager reports.

However, because of the activities of green bugs and alfalfa aphids, the first cutting in the area has been greatly reduced, Mr. Bishop said. He said some fields were turned yellow by these insects, and although there were many ladybugs, they still got in their damage. He and the growers are hoping for a better second cutting.

Because of this reduced volume, the mill is still operating with only a day time crew. Dehydrating began May 9.

However, not all the hay goes to the mill, and loads of locally grown baled hay are being seen these days.

CONTROL WEEDS, MULCH SOIL EASIER

Progressive farmers have found a way to increase their crop yields by killing small weeds before they get started. They use the MM Avery Rotary Hoe to produce good mulch, save moisture and restore even the hardest caked ground to excellent growing conditions. The MM Avery Rotary Hoe is available in 2, 4 and 6 row sizes with optional V-type hitch attachments for combining sections to make 3 or 5 row sizes.

Long-Life Construction Means Bigger Value!

Oil-soaked, easily replaced wood bushings, are designed to assure positive and constant lubrication. Saturated bushings and sturdy hoe teeth are the only wearing parts and are easily replaced to provide long years of low cost and dependable service. A unique stone guard keeps stones from sticking between teeth. This also helps to break soil clods and to pulverize your ground. The wheel is made of two pieces of solid steel bolted together. It will not break or bend.

If ground is unusually hard, weights may be added to the built-in weight box to increase your soil penetration. Once you see the MM Avery Rotary Hoe in operation and the job it will do for you, you will want it for your farm. Come in and see us today for the complete facts on the Rotary Hoe and other MM Avery farm equipment.

Youth Recreation Board Is Elected

Approximately 25 young people met with the adult board of directors of the West Plains Recreation Association Monday, May 9, at Leigon's Cafe. The meeting was for the purpose of electing a youth board of directors to work with the adult board.

Todd Wilt was elected chairman of the board, Magann Lamb vice-chairman, and Robert Garlington secretary. Other members elected to the youth board are Mike Barron, Davy Jean Anderson, Kenneth Evins, Pat Thomson, Max King, Charlene Lindsey, Tommy Thomson and Jan McVicker.

Friday, May 13, the two boards met again at Leigon's Cafe. It was decided on Monday, May 23, to have another financial drive. At 10:00 a.m. Monday, all interested adults and young people are asked to meet at the First Christian Church to help with the drive.

It is hoped that the recreation program can be started during the last of May or the first of June. Before that time an equipment drive will be staged.

In Friday night's meeting the youth board decided to sell membership cards for a dollar each to the young people. The membership card will be signed by the participant and his parents. The youth board will only take care of the young people between the grades of this year's seventh graders to the 1960 seniors. The membership cards are only for these students. Older youth can attend the activities as guests.

The adult board is in charge of the planning of the activities for the adults and the younger children. They also are in charge of the finances with Buddy Blackman heading that committee. Max King and Pat Thomson are on his committee representing the youth.

The youth board of directors will meet Monday, May 23, at 7:30 p.m. in the home of Magann Lamb to set up rules and regulations for the summer recreation program.

Mr. and Mrs. Owen Roger went to Turkey Friday to carry Mrs. Rogers parents home, and they also visited his mother at Matador.

PCA Conducts Public Relations Program In Texas

The Production Credit Association of Texas, agricultural leading agencies, will conduct a statewide public relations and public information program, to acquaint the general public with activities of the associations.

W. M. Irwin of Stephenville, chairman of the FCA Executive Committee, has announced that Roy Scudday of Fort Worth, public relations counsel, has been employed to conduct the program. General problems facing the entire agricultural industry will also be studied in the program, Irwin said.

Capitalized in 1933 as a government agency to grant short term agricultural loans to farmers and stockmen, the 36 Texas Production Credit Associations have since paid back all government capital and are now wholly owned by association members in each individual PCA area.

David Anderson, Muleshoe, is a director of the Plainview Production Credit Association.

L. R. Durham of Plainview is president and Henry Hayes of Plainview vice president. Olan Alexander of Plainview is secretary-treasurer.

Raise a motor boat in a sorghum field?

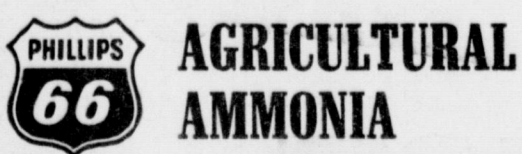

It's not fantastic! And here is why:

A well-known Texas farmer with 250 acres of maize reported a yield increase of 1625 pounds per acre after application of Phillips 66 Ammonia. He cut a total of 7250 extra bushels of grain and netted \$4050 in extra profits after deducting the cost of ammonia. You can buy a pretty classy boat and motor for \$4050.

Ask your Phillips 66 Distributor to show you the ways this 82% nitrogen fertilizer can help you live better through higher profits per acre.

	Using Phillips Ammonia	Without Ammonia
Fixed Cost Per Acre	\$ 39	\$ 39
Ammonia Cost Per Acre	\$ 7	—
Yield Per Acre	97 bu.	68 bu.
Net Profit Per Acre	\$ 31.60	\$ 15.40
INCREASED PROFIT PER ACRE \$ 16.20		

*Example only. Grain sorghum 80¢ bu. Results vary, according to soil fertility, available moisture and cultural practices.

Texas Highway Maps Full of Big State Data, Printed and Ready

AUSTIN, May 15—Texas' official Highway Travel Map, 1960-style, is now available to the general public. Free copies of the big, colorful map may be obtained by writing the Texas Highway Department, Austin 14, or at the highway district offices and travel bureaus. County tax offices have map cards on hand for requesting copies of the map.

The map reflects 1,933 miles of multilane-divided highway now completed, and includes the finished section of the seven National System of Interstate and Defense Highways located in the state. More than 1,500 farm-to-market road miles have been added to this year's map. Approximately 20,000 miles of the state's 30,000-mile Farm-to-Market Road System are shown on the map. All of the 26,378 miles of State and U. S. highways are shown.

Three new lakes have been added to the 1960 Travel Map, bringing the total shown in the major-lake-and-reservoir category to 64. New water attractions recorded are Buffalo Lake in Lubbock County, Campion Creek Lake in Mitchell County; and Lake Tawakoni in Hunt, Rains, and Van Zandt Counties. Countless rivers, creeks, and streams are also charted on the Travel Map.

The 816 roadside parks pegged on the map are those having full picnic facilities. Their locations are marked by a green dot. State Parks are indicated by a green triangle. "All of Texas Welcomes You" banners the pictorial side of the map — reflecting, in eleven full-color pictures, some of the outstanding recreational, scenic and historical attractions in Texas.

A section entitled "Facts About Texas" telescopes information on Texas' terrain, history, and industrial and recreational diversity.

Cities and towns shown on the map total 1,826. City route maps for the state's twelve largest cities are also included

—Amarillo, Austin, Beaumont, Corpus Christi, Dallas, El Paso, Fort Worth, Houston, Lubbock, San Antonio, Waco, and Wichita Falls.

More than half a million Official Highway Travel Maps of the 1959 edition have been distributed — in-state, out-of-state, and to dozens of foreign countries.

The map is used by all state highway departments in the state for determining official highway distances, mileages, zones, and like information.

Babson Discusses Individualism vs. Associations

Babson Park, Mass., May 19. In view of the recent shooting down of one of our spies, there is revived interest in the possibility of World War III. I therefore am repeating in this column the first four paragraphs of my Outlook for 1960. **MY REFERENCE TO RUSSIA FOUR MONTHS AGO**

- Naturally, as I am just back from Moscow and Berlin, my first thoughts are what will happen to Berlin in 1960. My answer is definitely, "NO-THING WILL HAPPEN." Mr. K will make no more ultimatums; President Eisenhower will continue his peace talks. Therefore the Berlin situation will be just the same in 1960 and 1961 as it is today.
- There will be no World War started between Russia and the United States in 1960.

EFFECT UPON THE NEXT FEW MONTHS

I am very sorry about the unfortunate shooting down of our spy. In addition to the apparent "lying" in Washington about our policy upon its first announcement, it should be recognized that this airplane was about ten miles above the earth when the shooting took place. This demonstrates how high fighting can occur and also the possible aim and speed of the missile which Russia used to shoot down our plane. The successful use of the parachute from such heights is also demonstrated. **Although the event, from a propaganda point of view, is important to the Russians, yet it does not delay or hasten World War III, in my humble judgment. It seems foolish to delay the Summit Meeting, although it may prevent its accomplishing as much as it otherwise would have.**

LET'S NOT FORGET CHINA
 As I said in Paragraph No. 9 of my 1960 Outlook, . . . the

Russians are afraid of China. Over the long pull, China is no more friendly to the Russians than she is to the United States, but she is playing one against the other. Russia feels that the Chinese would walk into Russia's "back door" if Russia should attempt a shooting war in the West. Thus, it is very important that we review our relations with China.

This Chinese situation is the reason I am anxious to visit China this year; but whether I will get a visa from our State Department is very uncertain. There is no trouble in getting to Hong Kong, as I am in immediate correspondence with Hong Kong by air mail. The postmaster in Hong Kong tells me that any mail addressed to Peiping he forwards to Canton. As to what happens after that, he does not know.

EFFECT UPON OUR ELECTION IN NOVEMBER

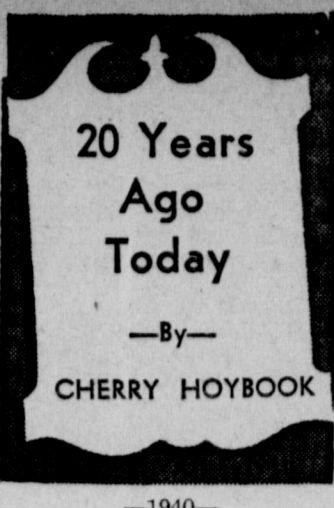

Surely the events of the past week will not help the Republicans, or the election of Nixon. How they will affect the Democrats, the next thirty days will probably determine. My present hunch is that the situation will help Srnington, Johnson, or one of the others familiar with the defense situation. Mr. Kennedy has not specialized in foreign affairs or defense.

Of course, the event may cause a decline in European travel this summer and it cannot be helpful to business. It will make people think more about the possibility of World War III and the serious fallout which may accompany it. On the other hand, companies actively engaged in defense work should be assured continued employment. Defense expenditures, however, will be directed to missiles and rockets, as I have said many times before in my column, rather than to airplanes.

INVESTORS WILL REVIEW THEIR HOLDINGS

Certainly readers should review their stocks and bonds at this time. I feel that as yet readers have not taken the possibility of World War III seriously. Recent events, however, should cause careful investors to make important switches in their holdings. Investor will seek the stocks of companies which have their assets well distributed over the United States, in place of those concentrated in large cities. This is a matter which should be taken up immediately with your investment counselor.

We will hear more about civil defense, bomb shelters, and protection against fallout. Certain real estate in large cities should decline in value. But and in small cities and towns in interior states should be in greater demand.

The Sandhills Philosopher Brings Up Some Unanswerable Questions About Spies And Who Owns The Sky

Editor's note: The Sandhills Philosopher on his Johnson grass farm has heard about the spy trouble, but it's hard to see where he sheds any light on it.

Dear editor:
 I have been thinking long and hard over the big spy question and so far I haven't come to any valuable conclusions, other than it might be better to spy with an atomic-powered submarine instead of an airplane, the kind of sub that just spent three months under water without coming up traveling around the earth. You may not see as much as you do from an airplane, but it's a whole lot safer.

On the other hand, the problem of who owns the sky has been engaging my thoughts, and while it's a hard problem, it's not as hard as forming.

You take my farm out here. My deed says I own the land and everything under it, and my neighbors own everything under theirs, but if you stop and think, you know that the deeper in the ground you go, the less you own, if the world is really round. The nearer you approach the center of the earth, the narrower your wedge of earth becomes, until finally, when everybody's property line reaches center, everybody is squabbling over a pin-point piece of ground. Wonder what Mr. Khrushchey has to say about this?

Now you take the sky above my farm. I don't know exactly where the sky begins, but I know I must own some space above the ground, at least. I don't believe the law would allow somebody to build a shed over my head, even if I did have room enough to drive a tractor under it without hitting my head. But after you get up a few thousand feet, I don't know. I do know though that I'd have a hard time proving an airplane flying mile high over my farm was trespassing, although if there was any way, I could charge for it, I would.

And as for space fourteen miles above, I can see how no country wants another country's airplane flying around up there photographing whatever it can find, but how about 200 miles up? 300? With a photographing satellite? You can see if every country owns all the sky above it, upward forever, and the earth is spinning through space, somebody is going to have a hard time marking his exact amount of sky and keeping track of it. It's pretty complicated.

I sometimes get the idea the universe is just too big for man to handle.

It's all a problem I will leave to Washington.

Just looking at the shape of my Johnson grass farm, I figure it's more than I can handle.

Yours faithfully,
 J. A.

NOW! A low-cost way to control grass in

It's **DOWPON**—the economical grass killer. Instead of chopping or cultivating all season, just apply Dowpon to your fields—in the spring before planting, or in the fall, after harvest—and you'll be rid of tough problem grasses. That's because Dowpon, sprayed on the leaves, kills the whole grass plant, from the tops to the deepest roots—at a rock-bottom cost per acre. Also use selectively in some crops.

Chevy hums through Chicago traffic to the tune of 21 miles to the gallon!

Working for Bumper and Auto of Illinois, Inc., ten 1960 Chevrolet pickups battle Chicago traffic day after day. Each truck averages about 2,000 miles a month in this wearing stop-and-start delivery service. Mr. Harry Haller, General Manager of S & H Truck Leasing, who leases the trucks to the bumper firm, reports: "We provide full maintenance on the trucks—gas, oil and everything else—so it pays us to know just where we stand on costs. And our records show that the '60 Chevies are giving us as much as 31 miles per gallon... with an average of better than 17 miles per gallon. Mister, these are our kind of trucks!"

Truck owners have good things to say about all Chevy engines. And when they're not talking about Chevrolet performance and economy, they're telling you how great that new Torsion-Spring Ride is. How it soaks up road shock and vibration. Protects fragile loads. Lets you run at faster, safe speeds to get more work done in a day. Drive a torsion-spring Chevy soon. We'll rest our case on that one side.

Seniors Spend Last Week On MHS Campus

by Sue Logan

Monday, May 9, began the final and busy week for the senior class of 1960. The week was filled with paying all fines and fees, making sure that all class work has been handed in, and doing make-up work.

Everyone had a mixed feeling of sadness for leaving "old MHS", but each was eagerly looking forward to graduation and the senior trip.

The senior play cast are perhaps more rushed than the other seniors. They have been working for 2 months and now the time has come to present the outcome of that work to the public.

The senior class members are not the only ones who are in a tizzy. The senior class sponsors, Mrs. Jesse Stovall, Mr. Louis Powers, Mr. Bill Taylor, and Principal Bill Parker are also winding up their last week of school for the '59-'60 school year. The class of 1960 owes much to these persons and the rest of the faculty of MHS, but we cannot think of any words that would express our appreciation to the extent that we would like for it to be expressed.

Mullettes Elected Sanders and Melson

by Mary Gross

The Muleshoe Mullettes elected Janie Sanders and Brenda Melson captains for the 1960-'61 season. They also elected the managers for the coming year.

Brenda is a one year letterman and will be a junior next year. Brenda was elected to the All-district team of 1960.

Jana Goodwin, Judy Bishop, and Mary Sanders were elected managers. Jana and Judy will be seniors and Mary will be a junior.

Coach Louis Powers coaches the Mullettes. The Mullettes finished the season as co-champs of the district. Coach Powers is looking forward to another successful season next year.

Senior Play Seen By 400 Students

by Rita Lewis

The Senior Class of 1960 presented its senior play recently in the High School auditorium.

At the night performance there were approximately 300 people in attendance. There were approximately 400 students who attended the matinee.

This is the last money-raising campaign for the seniors. The money will be used for the senior trip. The money made on the play is approximately \$375.

H. Wagon, James Towns, Bobby Eason, and Don Ethridge. Mrs. Horace Blackburn, who sponsored the Muletrain this year, will also sponsor the group to Clovis.

At the party the staff plans to give Mrs. Blackburn a gift in appreciation for the effort, time, and help she has given them this year.

Lee Pool Speaks To 1960 Graduates

by Laquanna Stone

A special senior class meeting was called Monday, May 9, and Mr. Lee Pool spoke to the graduating class.

Mr. Parker called the meeting to order. The class discussed the problem of a recession. The class decided to have a recession with certain restrictions.

Mr. Parker then introduced Mr. Lee Pool, who gave his annual talk to the Senior Class. Concluding his talk, Mr. Pool gave to each of the Seniors a ball point and pencil set, compliments of the Pool Insurance Co.

The Seniors were reminded to sell tickets to the Senior Play. They were also told that Sam Damon would take the Senior's pictures the night of Commencement if they desire.

Jana Goodwin, Judy Bishop, and Mary Sanders were elected managers. Jana and Judy will be seniors and Mary will be a junior.

Final Project For Home Ec Girls

by Alice Gordon

Superintendent and Mrs. Jerry R. Kirk, and the new and retiring board members for Muleshoe High School and their wives were the guests at a dinner given by the Home-making department Thursday night. The dinner was the final project for the third year foods class.

School was the theme of the dinner. The tables were decorated with books, slates, and apples.

The fourth period home-making girls planned, prepared, and served the meal. The menu consisted of baked ham, creamed English peas, buttered new potatoes, butter-flake rolls, and strawberry shortcake. Ice tea and coffee were also served.

JETS Vote It A Successful Year

by Darrell Lancaster

The Junior Engineers Technical Society of Muleshoe High School, building several projects, has had a most successful year this past school term. JETS, a national organization, was founded for the future engineers and scientists of America.

The projects assembled were a Van de Graff generator used for producing static electricity, a solar furnace used for melting various metals, a short wave radio, and a stroboscope used for measuring rotary motion.

In order to be a member of the club, one must be a junior or senior, and be taking a science above general science.

The sponsor of the club is W. O. Haffrell, a science teacher at MHS.

Letters To Father Contest Announced

by Goldie Lowery

portunity to express just why they think their father excels above all other fathers. This highly successful project focuses on the man-in-the-house, his place in the home, and his role in the family.

This year marks the fourth consecutive year of the "Letters to Father" Contest. This contest gives students the opportunity to express their appreciation to their fathers.

The previous year there were more than 30,000 participants. The Letters to Father Committee has again invited high school students and under to tell their father means to them in terms of love, companionship, guidance, humor, or any other outstanding traits.

Both the winning student and their fathers will be awarded prizes. The first prize for boys will include a radio, a world atlas, and a one year's subscription to National Geographic Magazine. The prize for girls will be a portable sewing machine, a sewing course, and a sewing kit. The fathers of the first place winners will be awarded a lounge chair, cigars, and a copy of the top best selling novel on Father's Day.

Any boy or girl of high school age or younger may enter the contest. Each entry must be sent to "Letters to Father Committee", Post Office Box 533, Radio City, New York 19, N. Y. The letters must be postmarked no later than midnight, May 31, 1960.

Today's Meditation

Read Romans 12:1-8
Having gifts that differ according to the grace given to us, let us use them. (Romans 12:6, RV.)

Ready to embark on his life work, a young man asked himself: "Shall I devote my life to a church-related occupation, or shall I seek a career in business?" He loved the church and had been active in its program. He also had qualifications for a successful business career. The conflicts of indecision raged within him for many weeks.

One day he went alone to the mountains to pray and ask for guidance. The answer came, as clearly as if the words had been audibly spoken. "Go into the business for which you are fitted. The coming of God's kingdom depends as much upon true Christian laymen as upon preachers, teachers, and other workers in the church." He followed this guidance, and throughout his life there was never a question but that it was God's leading.

He believed that a Christian should put into his work just a little more than is expected. He faithfully continued his church activity and became a leader.

PRAYER: Our Father, help us to place our lives in Thy hands and to follow Thy leading wherever it may take us. Help us to show by our everyday living that we are doing our best to follow the teachings Thou hast given us through Thy Son. In His name we pray. Amen.

CHRISTIAN SCIENCE SERVICE

Man's age-old longing for a clearer understanding of God and his own identity is a central theme of the Lesson-Sermon to be read at Christian Science services Sunday.

Scriptural selections in the Lesson-Sermon on the subject "Soul and Body" will include the following from Isaiah (55:6): "Seek ye the Lord while he may be found, call ye upon him while he is near."

One of the correlative citations to be read from "Science and Health with Key to the Scriptures" by Mary Baker Eddy states in part (428:8): "To divest thought of false trusts and material evidences in order that the spiritual facts of being may appear—this is the great attainment by means of which we shall sweep away the false and give place to the true. Thus we may establish in truth the temple or body, whose builder and maker is God."

The Golden Text is from Psalms (84:2): "My soul longeth, yea, even fainteth for the courts of the Lord; my heart and my flesh crieth out for the living God."
