

Local Farm-Market Road Acts Approved In County

Local Farm-to-Market Road projects in Haskell County have been approved by the Highway Department, O. E. Patterson and the Commissioners informed. One project is in Precinct 2, Section 4, Approval No. 4, F-M Road, which will be the first step to construction of the road, which will be maintained by the county.

Drew Leonard of the F-M Road No. 7, a 3.6 mile stretch of road, and deeds on this project approved and returned to Leonard.

No. 4, F-M Road has been designated as a stretch beginning with of Haskell and extending west to the community with Highway.

Farm-to-Market roads made by the county will be in the road building program being formulated by the county beginning Sept. 1, Patterson explained.

Gutter finished on Project

Stamford-Crane Softball Series Set For Week-End

Softball fans of this section are getting set for the game at its best when the Stamford All-Stars play host to Crane in three games, Friday and Saturday nights.

Crane and Lubbock are fighting it out for the top spot in the western division of the Texas Softball league, and will field one of the strongest and most colorful teams seen on the Stamford diamond this season.

The All-Star club has been revamped by Manager Merideth and has developed a lot of batting power and boast the best fielding record of any club in the eastern division.

Red Denham, well-known in this section, is with the Crane club and will no doubt pitch part of the game Friday night and one of the Saturday night.

Red Norman and Curtis Barrett, popular umpires from Lubbock will probably be on hand for the officiating chores.

There are plenty of comfortable seats in the stands and lots of parking space. A capacity crowd is expected for all three games.

All Teachers Of Paint Creek School Are Re-Elected

All teachers of the Paint Creek Rural High School have been re-elected for the coming year. They are John M. Ivy, superintendent; Warren Morton, principal; Mr. Riggan, Mrs. R. L. Foote, Mrs. J. M. Ivy, high school teachers; Ray Overton, Jr., Mrs. John Guillet, Mrs. Frank Hefflin, intermediate teachers; Mrs. J. M. Owens, Janice Pace, primary teachers.

ATTEND TEXAS UNIVERSITY GRADUATION IN AUSTIN

Adult Scout Leaders Told Plans For Council's Summer Camping Program

The bi-monthly meeting of the executive board of the Chisholm Trail Council, Boy Scouts of America, was held in Haskell on Thursday evening. Adult leaders who attended this executive conference heard a report on the summer camping program for the Council.

More than 300 boys of this area have already registered for the three one-week sessions at Camp Tonkawa, near Buffalo Gap, the council camping chairman George Swinney of Abilene reported. The second week of summer camp, July 10-16, is already filled, Swinney said. And only one or two more troops may be taken in for the first session, July 3-9. If it becomes necessary, a fourth week of camp may be held to take care of the overflow troops from the first three weeks.

Reports on the "Strengthening the Arm of Liberty" crusade objectives were given by various committee chairmen. Truett Walton of Abilene reported on leadership training; Bob Johnson of Stamford on advancement; Roy Arledge of Stamford on membership; and Nib Shaw of Abilene gave the financial report. A brief report on the regional meeting held in April at Waco was made by Arledge.

Plans to lease additional lands at Camp Tonkawa were announced by Pete Olds. Abilene, chairman of the camp development committee. The new lands will bring the camp's total acreage to 96 acres.

Four new sound movies in technicolor, for use in training programs, have been purchased by four Abilene businessmen. President Paul McCarty announced. These films will be given to the Chisholm Trail Council.

Dr. B. C. Robertson, Abilene, has recently made a complete inspection of Camp Tonkawa. He declared the camp in excellent condition for the summer camp program with the exception of proper refrigeration in the mess hall. However, following his report, the executive committee completed plans to have proper refrigeration units installed before the opening of summer camp.

Dr. Robertson, health and safety committee chairman, also announced that the new kitchen equipment had been purchased.

Nib Shaw, Abilene, spoke on plans for a council-wide finance campaign to begin in early fall. A budget committee was appointed by President McCarty.

Haskell Students Win Honors At McMurry

Several youth from the Haskell area have been elected to offices or received other honors from McMurry college, Abilene, where they are students.

Mrs. Hortense Marlow Ray, daughter of Mrs. Lucile Marlow, has been elected secretary-treasurer for the 1949-50 school year by the Gamma Sigma social club for women.

Scribe for the Ko Sari social club for men, for the coming year is to be Kenneth Tooley, son of Mr. and Mrs. O. W. Tooley.

Honored in the recent totem-burning ceremony at McMurry was Olin Ashley, son of Mr. and Mrs. Claude Ashley. Olin was editor of the War Whoop, student newspaper, and author of an editorial, both of which were awarded first place in the Texas Inter-scholastic press association. His name and achievements will be burned into the Alaska-made totem pole, one of the symbols of McMurry, along with other outstanding events and students.

Harry Cowan, son of Mr. and Mrs. H. H. Cowan of Weinert, recently gave his junior speech recital in the McMurry auditorium. His poetry selection was "Kid-die Kar Travel."

Rada Thornton, daughter of Mr. and Mrs. Curtis Thornton, also of Weinert, was awarded both her freshman and sophomore letters in the Women's Athletic Association. Basic for the athletic effort, achievement and participation in the athletic program including both class and instrumental events.

RETURN FROM EXTENDED VACATION TRIP

Combine Accident Injuries Fatal to Minnesota Youth

Orville D. Ausetz, 19, wheat harvest worker from Fergus Falls, Minn., died in the Haskell County Hospital at 12:20 a.m. Friday from injuries received when a combine machine on which he was doing repair work fell a part of the machine striking him on the head and shoulders.

The accident happened near the cattle shipping pens in southeast Haskell, where the youth and other members of a combine crew employed by Robert Weinbar, also of Minnesota, were at work assembling machines in preparation for start of the wheat harvest.

After being removed to the hospital following the accident, examination disclosed that Ausetz had suffered a fracture of his neck in addition to other injuries, and little hope was given for his recovery. His parents, Mr. and Mrs. N. R. Ausetz were notified and came by plane from Minnesota reaching the bedside of their son before his death.

Body of the youth was prepared for burial at Holden's Funeral Home, and sent by rail Friday to Fergus Falls, where funeral services were held Monday at Augustana Lutheran Church, of which the youth was a member.

Survivors in addition to the parents, include three brothers and a sister, all of Fergus Falls, Minn.

Atkeison Food Store to Reopen Next Week

Reopening of Atkeison's Food Store in this city early next week with R. D. (Dick) Atkeison of Munday as manager, was announced today. The store, owned and operated by Henry Atkeison of this city, has been closed for several weeks. Mr. Atkeison being unable to devote the necessary time to the business while convalescing from a serious illness which had confined him to hospitals and his home for the past year.

One of Haskell's leading grocers, Mr. Atkeison has been in business here for almost a quarter of a century. In 1946 he erected the large building which now houses the modern food store at the corner of North 2nd St. and Ave. E.

A complete stock of fresh merchandise will be featured in every department of the store when the business is reopened next week, it was announced by the new manager.

Association of the Atkeison brothers in operation of the store will be continued until health of Henry Atkeison will permit him to devote his full time to the business, they announced.

Man Stricken With Appendicitis Taken To VA Hospital

James A. Fox of Mountain View, Okla., who came to this section a short time ago to do farm work, was carried to a Veterans Administration hospital in Amarillo Monday in a Holden ambulance. Fox was stricken with an attack of acute appendicitis while at work on a farm between Weinert and Munday.

Weinert Officer High Point Man In AFF Meet

NAGOYA, Japan - Thinclads of the 20th Weather Squadron left no doubt in the minds of the spectators as to their ability as they entered a four man team in the Nagoya AFB track and field meet held at Nagoya recently, and walked off with a total of 18 points, good enough for a tie for third place.

Led by Lt. Willie T. Johnson, who took first place in the javelin throw, second in the pole vault, third in the shot put, and fourth in the 440 yard relay team, the squadron cinderman placed in all but three events entered, those being the mile run, 220 yard dash, and the broad jump.

Rounding out the team were Capt. Donald F. Moore, Lt. William G. Wells, and Sgt. Charles F. Behring.

Lack of Storage Critical Problem As Wheat Harvest Nears Peak

Hot, dry weather favored Haskell county wheat growers this week as harvest of this area's biggest wheat crop got underway in earnest, but lack of storage posed a major problem to producers, who found themselves unable to take advantage of the Government loan price while local buyers, unable to get any definite assurance of terminal storage, could only pay around \$1.55 per bushel on the local market.

Harvest of the bumper crop got under way during the week-end, and by Monday combines were operating in all sections of the county. Haskell county sent the first two cars of new Texas winter wheat to the Fort Worth market last Saturday. The initial cars were shipped by J. L. Voss and A. R. Reeves of Weinert and consigned to Great West Grain & Seed Company and Transit Grain Company in Ft. Worth. Delivered price was \$2 per bushel.

Up to Thursday morning, 30 carloads of wheat had been shipped from Haskell over the Wichita Valley Railway. Porter Sadler, freight agent reported. At Weinert, where the harvest started three days earlier, between 65 and 70 cars had been shipped to date. All of the grain was consigned to Fort Worth elevators, it was reported.

Local buyers estimate that rail shipments of grain have been equalled or exceeded by the amount of wheat sent to terminal points by trucks. Many of the motor carriers transporting grain from this section to points as far away as Houston and San Antonio.

Farmers and buyers estimated Thursday that 25 per cent of the county's crop had been harvested, and believed that with another week of hot weather the bulk of the crop would be combined.

Practically all of the wheat is of excellent quality, grading No. 1 hard, with low moisture content.

A large part of the grain being purchased by Haskell buyers is being piled on the ground due to lack of storage facilities. A big portion of the early harvest of wheat has been delivered on prior contract, where producers sold their crop in advance of harvest. With the price drop to \$1.55 per bushel, it is estimated that between 30 and 40 per cent of the grain will be stored by producers where they have storage available to await a more favorable market or to place the wheat in Government loan.

With an estimated 100,000 acres of wheat in the county estimates of the average yield have settled at about 18 bushels per acre on the basis of the grain harvested. Much higher yields have been reported on individual tracts, some running as high as 30 bushels.

Another purpose of the summer school is the preparation for students who plan to become members of the High School band next year. Expanded plans are being developed for a full year of band activities in 1949-50.

A nominal charge is being made for music and instructions for the summer band program, and parents who plan for their children to enroll should contact Mr. Hobbs not later than the registration date of June 10-11.

Philip Cadenhead Will Receive Degree At Texas A&M

Philip W. Cadenhead, son of Mrs. James F. Cadenhead, 1302 Avenue F, will receive a BS degree in animal husbandry from A&M College in August.

To gain this distinction, he maintained a scholastic average in all of his courses which was among the top grades in competition with over 8,000 other students.

This week, he has just completed an organic chemistry course in which he emerged at the head of his class with a 97 average.

Cadenhead has applied for admittance into the school of veterinary medicine.

Meeting Of Farm Bureau Postponed Until July

Black Indians to Meet Munday Moguls Sunday

Haskell Black Indians, after a week's idleness following postponement of their game last Sunday, will meet the Munday Moguls at Fair Park field here Sunday, June 4. Manager Albert Sharp announced today. The game will start promptly at 3 p.m.

The Indians journeyed to Frederick, Okla., last Sunday for a scheduled game with the Blue Sox there, but the contest was cancelled after their arrival due to wet grounds.

Poppy Sales Net Legion Auxiliary Sum Of \$80

The sum of approximately \$80 was received from the sale of poppies last Saturday, sponsored by the Woman's Auxiliary of the local American Legion Post. Mrs. Gene Hunter is president of the auxiliary, and she said the amount raised compared favorably with sales in previous years.

The flowers were sold by Camp Fire Girls, who have generously contributed their services on Poppy Day for the past several years.

WACO VISITORS HERE

Mr. and Mrs. Ed Burleson and children of Waco were week-end visitors in the home of her parents here, Mr. and Mrs. John A. Couch. They were accompanied to Haskell by Joe Tull, also of Waco, who visited in the Couch home.

Hookworm Danger Pointed Out By Health Officer

Hookworm disease is found frequently in those communities where sanitary toilet facilities are inadequate, and where infected human excreta is permitted to contaminate the soil. Persons who come in contact with that soil, either by going barefooted or by handling the dirt, contract hookworm disease when the hookworms from such soil bore through their skin and make their way to the human intestine.

"The main characteristics of hookworm disease," says Dr. Geo. Cox, State Health Officer, "are listlessness and apparent laziness, and many a child and adult has been called lazy, when in reality he was suffering from hookworm disease. Sometimes there is abdominal pain, nausea and diarrhea, but this is unusual."

Inability to perform efficient work, and general weakness of the patient make this disease not only a public health but an economic problem, and it can be eliminated only by carefully following two steps: first, providing sanitary disposal for human wastes, and by treating until cured, all infected persons. When the infected persons are cured, and can no longer transmit the worms to others, and when safe sewage disposal is at the command of all homes and communities, the hookworm disease need no longer cost the people of Texas the tremendous sum that it now does, annually, both in money and sickness.

Dr. Cox stated that the treatment of hookworm disease should be done by a competent physician and not by self-medication. Full information for building sanitary privies may be had upon request, from the Texas State Department of Health, Austin.

The citizens of Texas have the right to know what happens at meetings of state boards and bureaus which spend state money and establish state policy.

"That is the contention of Representative Preston E. Smith of Lubbock, who pointed out today that the people who do not enjoy such a privilege.

Smith is author of a bill which would open the meetings to the press and public.

The bill passed the House of Representatives in March by a vote of 118 to 4. It has since awaited action in the Senate. Last week the Senate voted down a proposal to suspend the rules and take up the bill out of regular order.

"Time is getting away from us," Smith said "and there are going to be a lot of bills which will die for want of action." He continued:

"I hope that this bill, which opens the doors of board meetings to the public, will not die."

"The people of this state put up the money for its operation, and when any group of officials get together to talk about spending that money, the people are entitled to know what the officials say."

Smith suggested that civic-minded Texas might wish to tell their Senators of their interest in the measure, which is House Bill 428.

"I do not see how secrecy can be justified," Smith declared, "when these boards are discussing public policy and public funds. Too many times, controversial issues have been decided behind closed doors. That's not the way democracy ought to work."

There are teeth in the bill, Smith asserted: It makes it mandatory upon the attorney general to inaugurate quo warranto proceedings against offenders.

The bill provides that the 140 state boards which it governs must give to the newspapers written notice in advance of meetings.

"The House of Representatives has shown by its favorable vote of 118 to 4 what it thinks of this bill. Also, there has been widespread newspaper editorial comment for the legislation," Smith said.

"This is a bill that ought to be passed," he added.

Lubbock Solon Opposes Secrecy of State Boards

Senator Tom Connally of Texas supplies proof of the axiom that "if you want to get a job done, give it to a busy man."

Despite his heavy duties as Chairman of the Senate's Foreign Relations Committee, the tall Texas legislator is taking the lead in trying to solve a thorny problem in his own home state—how and where to sell the 1949-50 cotton crop!

Domestic cotton consumption, Senator Connally points out, cannot nearly take up what is expected to be another bumper crop of around 15,000,000 bales, 25% of which will probably come from Texas, the largest cotton producing state. ECA is expected to finance about 4,000,000 bales of the coming crop for foreign use, but that still leaves several million bales to be supplied to other outside sources if a serious surplus at home is to be avoided. Exports are the key to the cotton problem, says Senator Connally, and he believes ways can be found to expand exports without upsetting our foreign relations.

Cotton is in short supply across the world and many countries presently unable to obtain American cotton, need it desperately. It was this consideration that recently prompted Senator Connally to introduce a bill in the Senate (S 1570) which would direct the Export-Import Bank of Washington to establish credits for financing surplus agricultural commodities to countries not now receiving Marshall Plan aid.

Spain is the country presently being considered for qualification under Senator Connally's proposal to get Export-Import Bank assistance in buying U. S. surplus agricultural commodities, particularly cotton.

Shortly after Senator Connally's bill was presented to the Senate the State Department revised its policy toward Spain by announcing there was no longer political objection to the granting of a loan by the Export-Import Bank. At the same time, however, the question of Spain's ability to repay such a loan was raised.

In order to examine Spain's requirements and appraise her economic status, Senator Connally called a meeting of some 30 key Senate members. To provide first-hand information, Mr. Andres Moreno, President of the Espano-Americano Bank in Madrid, and Mr. Alfred Barth, Vice-President and foreign department head of Chase National Bank in New York, were invited to attend.

Before the Spanish Civil War, Spain bought between 250,000 and 300,000 bales of cotton from the U. S. annually, which accounted for 60% to 70% of all her purchases. During World War II, Spain received substantial amounts of dollar exchange through sale to the U. S. of strategic ores and metals, as well as foods and textiles.

Since 1947, however, Spain's dollar balances have been very low. This has been due largely to termination of U. S. buying and because adverse weather conditions resulted in short crops of commodities, principally olives and citrus upon which Spain normally relies to produce the necessary dollar credits. Her imports of U. S. cotton totaled only 10,000 bales in 1947 and last year dropped to 6,000 bales.

Being unable to secure U. S. cotton, Spain has been forced to buy in the sterling markets, principally Brazil and India. Sterling purchases, however, have become more difficult since such nations as Brazil have more sterling than they need. Also, cotton supplies in these countries have become limited.

It is estimated that Spain's requirements will total 600,000 bales of U. S. cotton in the next two year period. She will also need substantial quantities of wheat, tobacco, and edible oil—principally those derived from cottonseed and soybeans. It is believed Spain can repay the loans for purchase of these commodities from her exports of olives, olive oils, fruits, and strategic and critical ores such as antimony, lead, mercury, manganese, tungsten, and zinc.

Following the meeting attended by the American and Spanish bankers, a committee of the Senate headed by Senator Connally was appointed to explore further the question of extending Spanish credits.

At the same time, Senator Connally is studying other foreign market potentials for cotton—the leading money crop in the Lone Star State.

Senator Tom Connally Works On Problem Of Selling South's '49-50 Cotton Crop

Senator Tom Connally of Texas supplies proof of the axiom that "if you want to get a job done, give it to a busy man."

Despite his heavy duties as Chairman of the Senate's Foreign Relations Committee, the tall Texas legislator is taking the lead in trying to solve a thorny problem in his own home state—how and where to sell the 1949-50 cotton crop!

Domestic cotton consumption, Senator Connally points out, cannot nearly take up what is expected to be another bumper crop of around 15,000,000 bales, 25% of which will probably come from Texas, the largest cotton producing state. Farm Bureau Queen Contest Announced

The Haskell county Farm Bureau is sponsoring a Queen Contest again this year like the one they sponsored last year.

To be eligible to enter the contest you must be:

1. A daughter or sister of Farm Bureau members.
2. 16 to 22 years of age—unmarried.
3. Exceptions — daughters of state directors, employees, and county officers are not eligible.

Awards in the contest will be:

1. Expense paid trip to State convention for district winners—at county expense.
2. District runners-up will serve as attendants to district queen at State convention.
3. State Farm Bureau queen and matron escort allowed \$400 toward expenses to the national American Farm Bureau convention, Chicago, Illinois, December 5-8.

The county winners from each county will wear formal in the district elimination contest. Money will be awarded to the county winner in Haskell county to help buy a formal if she does not have one.

The young ladies are to be judged on grace poise, personality, charm, and vivaciousness. There will be out-of-county judges to judge the contest.

You girls that are eligible to enter please send your applications to enter in the contest to any of the following women who were chosen to work with the Queen Contest in Haskell county:

Mrs. Joe B. Cloud—Rule, Texas; Mrs. C. H. White, Rochester, Mrs. Clinton H. Herren, Rt. 2, Rule; Mrs. Bob Edwards, Weimer; Mrs. Laverne Kunstler, Rt. 3, Haskell.

Just write them and tell you want to enter in the Farm Bureau Queen Contest and give your name, address, age, and who in your family is the Farm Bureau member.

Our county contest will be held here about the first part of August. As you send in your applications we will send you further information. Please get your name in as soon as you can.

FELKER MEN'S WE

THE STORE OF FAMOUS BRANDS

You ought to be driving a **49 PONTIAC**

America's Lowest-Priced Straight Eight!

Until they see the actual figures, few people realize that the big, beautiful Pontiac eight is America's lowest-priced straight eight. Not only does it undersell all other straight eights by a substantial margin, but it actually costs less than many six-cylinder cars!

The fact that the Pontiac eight gives so much for so little is the basic reason for the great and growing popularity it enjoys.

Pontiac has distinguished appearance, and distinctive Silver Streak styling. Its spacious Body by Fisher is handsomely upholstered and appointed.

And finally, it is powered by the world's sweetest engine—a great straight eight which is supremely smooth and quiet, instantly responsive to the accelerator, packed with power—an eight which gives peak performance and economy.

We honestly believe that no other car carries such definite assurance of really enjoyable performance at so low a cost. We invite you to come in and take the wheel yourself. We're sure you'll be very pleasantly surprised.

New Officers of Progressive Study Club Installed

Mrs. Jack Roten was introduced as incoming president for 1949-50 of the Haskell Progressive Study Club at the annual dinner and installation of officers Friday evening which marked the close of the 1948-49 Club year.

Presiding over the meeting was Mrs. Carrol Dean Bledsoe, retiring president. The three-course dinner was served in the club room of the Texas Cafe. Decorations for the room and tables were of a Hawaiian motif, with each guest being presented with leis.

Principal speaker was Madelin Hunt, class room teacher of the Haskell schools, who had recently spent more than two years in the Hawaiian Islands. In her talk she told of the history and customs of the Islands and presented a display of native crystal, china, mats, and other articles of her collection of the Islands. Entertainment for the program included piano selections by Bobbie Ann Herren.

The program was under the sponsorship of the social committee, with Mrs. S. L. Carvin as chairman. Other officers for 1949-50 who were introduced by Mrs. E. M. Frierson, an honorary member of the club, were: Mrs. Joe Tyson and Mrs. R. A. Lane, vice presidents; Jane Holt, recording secretary; Mrs. Joe Thomson, corresponding secretary; Mrs. Corvin, treasurer; and Mrs. Hugh Watson, Historian.

Three officers yet to be named are the liaison officer, counselor and parliamentarian. Club activities are suspended for a three-month period, with the first meeting of the new year scheduled for early September.

Club members and guests who attended included Mrs. W. A. Lyles, Mrs. James A. Byrd, Mrs. Austin Coburn, Mrs. S. E. Corvin, Mrs. James E. Ferguson, Kathleen Crawford, Mrs. Eugene Frierson, Mrs. J. B. Gipson, Mrs. Cecil Gregory, Mrs. R. W. Herren, Mrs. W. O. Holden, Jane Holt, Mrs. R. A. Lane, Mrs. F. W. Martin, Mrs. Alton Middleton, Mrs. LeRoy O'Neal, Mrs. W. H. Pitman, Mrs. Harold Spain, Mrs. Hugh Watson, Mrs. W. E. Woodson, Mrs. J. E. Walling, Jr., Mrs. Pyeatt McCollum, Mrs. Joe Harper, Mrs. Joe Tyson, Mrs. Wix Currie, Mrs. S. H. Vaughter, Mrs. Joe Thomson, Mrs. E. M. Frierson, Mrs. Jack Roten, Madeline Hunt, Bobbie Ann Herren, and Mrs. Carrol Dean Bledsoe.

HERE FROM HOUSTON A. Tonn of Houston, former resident here for many years, was a week-end visitor in the home of his son, Eugene Tonn and Mrs. Tonn.

After cleaning and moth-proofing your clothes, you can store them in trunks, chests or pasteboard boxes, first lined with paper. Be sure the containers are airtight. After placing the garments in the boxes, lay a piece of tissue paper over the top and sprinkle about four ounces of paradichlorobenzene crystals on the tissue.

HASKELL COUNTY HISTORY

Brief Items Taken from Old Copies of The Free Press

20 Years Ago—May 30, 1929
Mr. and Mrs. M. S. Shook are announcing the marriage of their daughter, Maurine, to Troy Post, son of Mr. and Mrs. Sid Post of Fort Worth. The ceremony was solemnized May 18 in Abilene. The couple will make their home in Fort Worth.

Miss Ilena Thomas of Lexington, Texas, is visiting her aunt and family, Mr. and Mrs. W. T. Zarrells.

Burglars broke into the office at R. B. Spencer Lumber Company sometime Sunday night, failed in their attempt to open the safe, after breaking off the knob and combination handle.

"Biggest fish catch of the season is reported by Tom Holland

and John E. Fouts of this city, who came in Tuesday after a night's stay on Paint Creek. Their largest fish was a 29-pound yellow cat which they proudly exhibited on their return.

Mr. and Mrs. F. T. Sanders and son, Fred Jr., left this week for Austin where they will visit their sons and brothers, Earnest and Roy, who are students in the University of Texas.

David Smith accompanied his sister, Mrs. Abdon Holt, to Lubbock this week and will spend several weeks there.

Martelle and Tommie Lee Clifton, children of Mr. and Mrs. Mart Clifton, are visiting relatives in Wichita Falls this week.

Mr. and Mrs. J. E. Bernard and

children, Vivian and Ralph, and Mrs. Theo Wright are in Mineola, Texas for a visit with Mrs. Warren.

Mr. and Mrs. George Cannon and daughter, Rachel, of San Antonio, arrived this week for a visit in the home of her parents, Mr. and Mrs. H. S. Post.

Mrs. Scott W. Green, Jr., will leave Sunday for Deming, N. M., where she will join her husband, who has been there for the past two months. They plan to make their home in that section.

40 Years Ago—June 5, 1909
Last Monday night the whistle at F. T. Sanders gin announced the closing of the ginning season at his plant. The local gins here have ginned nearly 6,000 bales of cotton from the crop of 1908.

Misses Norma Cobb and Lillian Chancellor visited friends at Stamford Thursday.

Press, Frank, and Miss Mable Baldwin came home yesterday from Texas Christian University. Brick work on the new Smith & Sutherland building on the north side has been finished by Contractor D. Scott, and plasterers are putting the finishing touches on the walls.

The Wichita Valley has made some changes in its passenger schedule. The morning southbound is three minutes earlier, evening 35 minutes earlier. The morning northbound is 45 minutes earlier and the night train 35 minutes later.

Gus Grusendorf says he has 150 acres of cotton and 50 acres of feed up to a good stand. He says this is about 15 days earlier than last year.

Earl and Miss, Lela Odell have returned from Waco, where they have been attending TCU.

There have been several local showers this week, and we look for general rains before the weather clears up.

A New York astronomer has reported sighting a huge comet which is flying through space at the rate of many million miles each minute. He estimates that within a few days the heavenly body will become visible to the naked eye just after sunset in the southwest horizon.

50 Years Ago—June 3, 1899
Rev. D. James came home a few days ago from Aspermont where he has been carrying on a protracted meeting.

Dr. J. G. Simmons tells us that a man here from Jacksboro this week said that grading was in progress on the Circle Belt Railroad from Gainesville to Jacksboro and that it was the general belief there that the Rock Island would move out of Jacksboro ahead of the C. B. and go to Graham and possibly on to Haskell.

Miss Stella Dodson, who has been attending Patton Seminary at Oak Cliff, is expected home today.

W. D. Garren and J. F. Armstrong have gathered their range horses, about 300 head, and are on the way to New Mexico with them.

Roy Burnett, a prominent young stockman of Knox county, spent several days here this week.

The town was full of piano agents this week. We understand that the Texas Central people have laid off the town for the terminus of their extension about 18 miles south of Haskell and just east of the Haskell and Anson road.

J. E. Fitzgerald is off on a business trip to Louisiana.

Our former citizen, M. H. Lackey of Amarillo, was down this week looking after some litigation in district court.

Henry Johnson got home Wednesday from Comanche, where he assisted Mr. Rhome in driving his cattle.

We are told that Mr. Pidecock intends moving his horses to New Mexico at an early date.

Watt Fitzgerald went to Albany Wednesday to meet his daughter, Miss Ada, and Miss Edna Ellis who are returning from Sam Houston Normal Institute.

Mr. Hatcher of Albany, who owns the UK brand of horses, many of which have been starving around town and in the lanes, is here gathering the remainder to move them away.

J. C. Jones, one of our large woodgrowers, who ranches on the T. G. Carney place, has finished shearing his flock of 4,000 sheep from which he got over 30,000 pounds of wool.

Mrs. M. A. Clifton and children took occasion to spend a few days with friends in town this week while Mr. Clifton was engaged with grand jury work.

M. S. Pierson left on Monday to look after his business interests at Emory and will be gone several weeks.

T. G. Carney, one of Haskell's grocery merchants, quotes the following prices: 8 pounds coffee 95c; 2 pound can imported French Peas 12c; gross of Diamond parlor matches 12c; one package corn flakes 5c; extra fine molasses, gallon 32c; 40 bars soap \$1.00; 3 pound can best tomatoes 10c; 100 pounds best flour \$2.15.

Complete All-New Heavy Duty Line Of Trucks Announced By GMC

In a statement released today, M. D. Douglas, General Manager of GMC Truck & Coach Division of General Motors, revealed the first details of the GMC Division's new "H" series heavy duty trucks.

"The most complete range of all-new, all-improved heavy duty trucks ever to be announced at one time," Mr. Douglas stated, "this new GMC line will be comprised of 61 basic models. Weight ratings for straight trucks range from 19,000 to 75,000 pounds. Tractor-trailer combination weight ratings go up to more than 90,000 pounds for mining, logging and other off-the-highway operations."

"Benefiting by all the outstanding engineering and manufacturing facilities of the nation's most complete truck plant," he continued, "they are by far the most advanced line of GMC trucks yet introduced."

More powerful, economical, dependable performance is the keynote of the complete heavy duty engine line. There are five new, more powerful gasoline engines, all are GMC-built valve-in-heads, including a big new 225-horsepower model of 707 cubic inches displacement.

Diesel power plants include the famous 4-71 and 6-71 GM 2-cycle four- and six-cylinder models, plus a giant new 6-110 developing 300 horsepower which is now in the development and test stage.

New front-end styling is distinctive and functional, similar in appearance to the current light-medium duty models. Radiator grilles are frame-mounted, angle-braced, and have top and side bars of heavy spring steel bumper stock for front-end protection. Channel-type bumpers are wider, deeper and stronger. Fenders are heavy and solidly mounted, yet easily removed for easier engine accessibility.

Heavy duty GMC cabs are all new, all steel, and really tailored to trucks divers' needs. They provide more room and more vision, increased comfort and convenience, improved ventilation.

Shock-free cab mountings and fully adjustable seats with snubbed spring action contribute to a smoother, more comfortable ride.

GMC heavy duty chassis are stronger and sturdier than ever before, with along list of improved, life long features.

All frames have deeper side rails, a new type front cross-member and an "alligator" type

rear crossmember. All side rails are the straight type, providing better engine accessibility and wider spacing of front springs. And all models have wide-track front axles and longer, easier riding front springs, with shock absorbers as standard equipment.

Syncro-Mesh transmissions are standard or available for every model, and GMC's famous recirculating Ball Bearing Steering, standard throughout the line, is even better than ever.

New and improved hydraulic and air brakes are safer, faster acting, easier to operate and offer greatly increased lining life. "Tru-Stop" vertical pull-up type hand brakes are standard on all of the heavier models.

There are eight basic rear axle designs, providing exactly the right axle option for every hauling job.

The first all-new models of GMC's new heavy duty line are scheduled to roll off the assembly lines around June 1st. It is planned to have all models in production by early fall.

Concurrent with this introduction of new heavy duty trucks, GMC also announces a new, more complete pricing policy on these models. New prices will include needed items of equipment which, in general practice now, are added to the base price. This policy represents substantial savings to the purchaser on his original investment.

This world of ours is never more than a year from starvation.

"My Servel Gas Refrigerator operation cost as low today as it was 16 years ago"
says Mr. Nolan Hayden, Belton, Texas

Proof: Servel Gas Refrigerator Stays Silent, Lasts Longer

"I used my Servel Gas Refrigerator in my Cafe for several years. It withstood the rigors that only a Cafe can give a refrigerator, with flying colors," says Mr. Nolan Hayden. "Later I moved it to my home and it is still giving the best of service after all these 16 years."

"Best of all," he continues, "the operation cost is just as low today as it was 16 years ago—less than one dollar a month."

Servel Gas Refrigerator has no moving parts in its freezing system to wear and lose efficiency. That's why thousands of homemakers are not buying just any new refrigerator. Upon learning about silent, longer-lasting Servel Gas Refrigerator, they, like Mr. Hayden, insist, "When I am ready for a new refrigerator it will be Servel Gas Refrigerator for me."

"Where Friend Meets Friend"

Man Can Toward Kitchen

of the house is han- ter tools, he can do prove an old, incon- venient kitchen. Mrs. Claytor, extension ment specialist of College, says that movement in storage work space of an try, requiring tools familiar to a farm remodeling or build-

ing," she says. "plan on cabinets for food preparation utensils, materials and serving. Storage space for work clothes and cleaning supplies helps greatly in keeping the house more orderly." Cabinet units can be grouped or built individually between doors and windows that so often break up wall space in an old-fashioned kitchen. The most difficult construction program in good cabinets may be the drawers; if the farm shop does not have a routing plane for cutting grooves for the drawers, Mrs. Claytor suggests that this work usually can be done at a local lumber yard. "Sliding trays are more con-

venient for base cabinets than shelves," she says. "Such trays will save a great deal of tiring stooping and reaching to the back of a space nearly two feet deep. Adjustable shelves are most essential if cabinets are to be of the service we expect them to be." Many families in Texas have the problem of remodeling old farm-houses, but the large number of new homes which are being built means that a great deal of thought needs to be given to planning for new kitchens, too, Mrs. Claytor concludes. Check your kitchen plans before the house is built to be sure that all time- and work-saving features are included.

High Plains Water Warning Is Issued

The state board of water engineers reports that some parts of the irrigated southern High Plains will be "seriously affected" within the next 14 years "if present trends of pumping and water-level decline continue." "The rate of ground water recharge in the southern High Plains in Texas is so small compared to present pumping that for practical purposes withdrawals may be considered as coming from storage," the report said. The progress report was the seventh in a series of the area by the state agency in cooperation with the U. S. Department of Interior and the Geological Survey. From March, 1948, to March, 1949, the underground water table fell an average of 1.9 feet throughout an irrigation region covering 6,500 square miles in 17 counties. In some heavily irrigated areas the water table fell seven to 10 feet. The report estimated that 97 per cent of the water used and pumped in 1948 was used for irrigation.

DDT Effective In Controlling Ticks And Hornflies

Hornflies and Lone Star ticks are a couple of pests Texas stockmen ought to be on the lookout for, warns James A. Deer, assistant extension entomologist of Texas A. and M. College. Both are showing up on cattle along about this time of the year, Deer says, and both of them should be controlled in order to keep up beef and milk production. Insects keep cattle in a nervous condition and often cause wounds that come infested with screw worms. The most effective control for hornflies is DDT. Animals sprayed or dipped with eight pounds of 50 per cent DDT wettable powder in 100 gallons of water will be protected from hornflies for at least 10 to 15 days. Two or three treatments of DDT in the spring and early summer and one more in the fall usually kills the hornflies for a year. Dipping or spraying at two-week intervals will put a stop to the Lone Star tick. Control should be started in the spring as soon as the ticks are found and continued until no more are seen, Deer says. A combination of BHC and DDT is recommended for tick control. The same amount of DDT is used here as in the hornfly remedy. Mix this with four pounds of 6 per cent wettable gamma BHC in 100 gallons of water. Mix the chemicals first in a small amount of water, then add this mixture to the spray tank or dipping vat. But whether you're chasing away the hornflies or getting rid of ticks, Deer reminds the cattle owners not to use DDT on dairy cows nor beef cattle that will be slaughtered in 30 days. Livestock will be better producers if they don't have to fight off flies and ticks.

Diphtheria Test Advised For All Children

With 14 reported cases of diphtheria within the past week, and a total of 391 cases reported in the first 19 weeks of this year, Dr. Geo. W. Cox, State Health Officer, is urging Texas parents to have their immunized children Schick tested to determine immunity, and if inoculation is necessary, to have it done immediately. "There is a widespread belief that once immunity is established, it lasts forever," the State Health Officer said. "This is not always true. In some cases it diminishes and finally dies out, and reinoculation is necessary in order to protect the child. "Every child who will enter school next term should be inoculated or Schick tested now, because it takes from three to nine months for immunity to be completely established after the injection is administered." As long as cases of diphtheria occur, a child is in danger unless protected by immunization. The germs throw off a powerful poison which goes all through the body. It is particularly harmful to the heart, blood vessels, nerves and kidneys, and serious complications are broncho-pneumonia, to which the patient is particularly susceptible; paralysis, which may last for days or for as long as 3 or 4 months; or permanent injury to heart, nerves or kidneys. "The best thing to do with diphtheria is to stop it before it starts," Dr. Cox said. "When toxin is injected under the skin, the system manufactures a disease-fighting antitoxin which can successfully resist the disease. Children of school age should be inoculated or Schick tested now, so that immunity will be established or nearly so before the opening of the next school term."

VISITING HERE FROM AUSTIN

Mr. and Mrs. Paul Roberts and children, Paula Jo and James Arnold, are here this week from Austin where Paul is a student in the University of Texas. Paula

Jo underwent a tonsilectomy at the Haskell County Hospital Monday morning, and is recovering rapidly from the operation. Ninety per cent of all cropland is endangered from soil erosion.

Fun In Summer Can Be Spoiled By Home Mishap

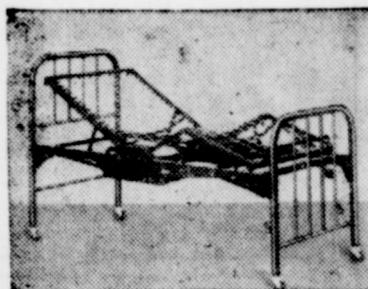

Summertime is fun time—but the fun will be short-lived if a member of your family is the victim of a summer accident, the National Safety Council says. "Since much of the summer activity revolves around the home, the Council offered these tips for summer safety at home: Store storm windows and other winter equipment safely. Poor storage is one of the big reasons for accidents and fires. Repair broken outdoor furniture, broken porch floors or steps, railings and fences. Clean up winter yard debris—broken glass, nails and other objects. Be sure the children's sand pile is clean. Check the condition of window screens. Repair weak frames and wire, and be sure they are fastened securely to keep children from falling out. Have a place for garden and yard tools and put them away after each use. Lock up insecticides, weed killers and the like. Have guards for all electric fans and place them out of the reach of children. Don't forget that open windows increase the possibility of gas pilot lights blowing out. Be sure kitchen curtains will not blow over stove.

Friendship H-D Club Meets With Mrs. Newton

The Friendship H-D Club met May 20th, in the home of Mrs. Edward Newton. Opening exercise was a group song led by Mrs. H. Grimsley. Old business of Our Amateur Hour was completed with the sum of \$99.10 going to the March of Dimes. Three slick tricks were given. Mrs. Edward Newton gave a demonstration on making corsages from garden flowers. The roses and Cedar was furnished by Mrs. Beth Edwards. The love pal gifts were placed into a grab bag. Each member paid 25c and took a gift. The money will go to the club treasurer.

Refreshments were served to the following: Mrs. Beth Edwards, Mrs. Leon Newton, Mrs. Ted Jettison, Mrs. Otto Vaughn, Mrs. H. Grimsley, Mrs. Ollie Vaughn, Mrs. Dewayne Vaughn. One new member, Mrs. Carl Cover and the hostess, Mrs. Edward Newton.

Mrs. C. L. Gordon Named Honoree at Bridal Shower

Monday afternoon, May 30th, the annex of the First Baptist church was the scene for a bridal shower in honor of Mrs. C. L. Gordon, the former Wilma John Coffield. Hostess for the occasion were Mrs. Drey Lowe, Mrs. Bob Barnett, and Miss Billie Reynolds. Guests who attended or sent gifts were: Mesdames Claude Ashley, Ben F. Roberts, Edd Fouts, Jimmy Nix, H. E. Medford, Claude Warren, H. H. Sego, R. T. Landess, B. T. Gordon, C. G. Covey, Jerry Harrell, Lynn Tolliver, W. L. Glover, Cliff Chamberlain, B. Gilliland, Jeter, C. E. Harrell, Minnie Glover, T. R. Foster, N. F. Foster, Hallie Chapman, Ray Merchant, Alvis Bird, W. N. Harrell, A. C. Pierson, W. A. Lykes, Frank McCurley, Jessie B. Smith, O. E. Webb, Stone, Mrs. John Ivy, R. E. Tidwell, Tom Robinson, Burson, C. E. Tidwell, P. G. Kendrick, A. T. Ballard, Mary Kingston, Wint Adams, Leslie Collins, I. H. Harrell, A. D. Heath, E. A. Howard, John Brock, Ita Parish, J. E. Redwine, Mary Spillers, O. N. Harrow, Bennie Bassing, Wallace Cox, W. C. Collins, Hess, Hartsfield, Mildred Opitz, W. A. Montgomery, Onelia Ellis, Lola Lemmon, Lynn Pace, Misses Flo Tibbits, Pansy Moore, Carolyn Turner, Katherine Strickland, Betty Landress, Betty Jo Clanton, Jean and Sis Bird, Geneva Stone, Marie Ivy, Brucilla Gardner, Ruby Ejezza, Frankie and Flora Sego, Jeffie Tolliver, Marnie Jones, Nita Fay Jeter, and Mildred Chapman.

Attend Patterson Family Reunion in Oklahoma

Mr. and Mrs. W. F. Patterson, accompanied by their two daughters and son attended the family reunion of Mrs. Patterson which was held at Turner Falls, Okla., over the past week-end. (The two daughters were, Mrs. Slover Bledsoe of Haskell, Mrs. Taylor Alvis of McCamey and Mr. Perry Patterson of Graham. This is the first time that all of Mrs. Patterson's brothers and sisters have been together since the oldest was married. There were 48 descendants of the family present. It was a most wonderful occasion and everyone enjoyed it immensely. There are 10 of the brothers and sisters. They meet every two years on Memorial Day.

Three Types Barley Suited To Texas, Experts Say

There are three types of barley available that may be grown successfully in Texas, according to J. E. Adams, head of the Texas A&M College department of agronomy.

Results of recent tests by Texas Agricultural Experiment Stations in the northern part of the Rolling Plains indicate recommendations of fall seeding of the true-winter type varieties in this area, as well as in the Panhandle. These barley variety tests were conducted under the supervision of Superintendents J. Roy Quinby, of the Chillicothe substation; L. E. Brooks, of the Iowa Park substation, and Dan I. Dudley and I. N. Atkins, of the Denton substation. Other tests were run at the Greenville substation, where D. I. Hooten is superintendent, and at Stephenville under the direction of Superintendent B. C. Langley.

The cold resistant true-winter type varieties recommended for the Rolling Plains and the Panhandle areas include Reno, Ward, Wisconsin Winter, Michigan Winter, and all strains of Tennessee Winter. None of these varieties is recommended for spring seeding, these substation superintendents say.

The fall habit growth of these strains is similar to that of winter wheat with narrow, dark green leaves that lie flat on the ground, says Dr. Adams. For Texas conditions, Reno and Ward are the best varieties. At the Denton, Greenville, Iowa Park, Chillicothe and Stephenville substations, Reno yielded 24.5, 22.7, 40.3, 42.3 and 23.4 bushels per acre respectively. At these same stations, Ward yielded 27.2, 22.2, 42.8, 34.6, and 20.6 bushels respectively.

Intermediate winter-type varieties for Texas, are Wintex, Tenkow, Texan, Smooth Awn 88 and Texas Winter. These varieties are less cold resistant but usually survive. And where they can be grown are generally more productive than the fall seeded types, Dr. Adams says. They also have the advantage of being planted as late as February 1 with fairly satisfactory results. The intermediate varieties produce quicker and more abundant fall pasture than other barley types.

Wintex and Tenkow are the high yielding strains well suited to fall seeding in the North Central and Rolling Plains of the state. They do have their disadvantages, too, however, in that they have heavy, rough lawns, and are susceptible to mildew and stripe.

Texan barley is a smooth awned variety that is resistant to mildew and moderately resistant to other barley leaf diseases. It is rather widely adapted producing high yields from fall seeding. And it's better adapted to spring seeding than any other winter or intermediate winter type.

Further results of tests run at these substations show that the best spring planted varieties are Stravropol, Flynn, Beacher, Vaughn and Coast. These varieties should not be fall seeded. However, they may be used for spring seeding in the Panhandle area or in extreme South Texas.

The county extension agent or the nearest Experiment Station has information on the prevention and control of smut and such leaf diseases as leaf and stem rust, mildew and stripe, Dr. Adams concludes.

**75th Milestone Is
Just Another Day
For This Man**

Milestones in the life of G. R.
(George) Gibbs of Haskell extend
so far into the past that birth-
days have become commonplace
events to him.

For that reason he had placed
no special significance on the
fact that June 1 was another
birthday until he went to work
as usual Wednesday morning and
was presented with a cake bear-
ing 75 candles given by his em-
ployer, J. M. Crawford, joined
by others in the office of Craw-
ford & Hunt. It was a complete
surprise to the 75-year-old Gibbs,
who works daily at tasks that
would ordinarily tire a man many
years younger. Years rest light-
ly on his shoulders, and after a
hard week's work putting up
combines and other machinery
for Crawford Implement, Gibbs
finds relaxation by heading for
the nearest stream to fish for a
night and day. "Fishing keeps a
man up to snuff," he says.

Gibbs was born in 1874 at
Youngport settlement in Bell
county. At the age of five his par-
ents moved to Nolan county,
where he spent his boyhood.
When the Spanish-American war
broke out, he went into the Army
where he spent a year or so. Later
he lived in various parts of
Texas until moving his family to
Haskell in 1919.

HERE FROM ABILENE
Mr. and Mrs. Alvah Crandall
of Abilene spent Sunday with
relatives and friends in Haskell.

Overton of Haskell. The wedding
will be in the home of the bride-
elect, June 26, 1949.

**ATTEND BEAUTY CULTURE
MEETING IN LUBBOCK**

Mrs. Sibyl Graham and operat-
or, Sue Stone, attended the meet-
ing of the TAABC in Lubbock
last Sunday. They were accom-
panied to Lubbock by Bob Gra-
ham and his mother, Mrs. C. L.
Graham who went on to Anton,
Texas, to visit in the home of his
sister and her daughter, Mr. and
Mrs. LeRoy Anderson and family.

CALIFORNIA

Mr. and Mrs. George Yancey
and his mother, Mrs. Blanche
Yancey have returned from a
two weeks visit in Selma, Calif.,
with Mr. and Mrs. John Yancey
and family.

**TWO SONS IN J. M. CRAWFORD
FAMILY RECEIVE DEGREES THIS
WEEK AT SEPARATE SCHOOLS**

Members of J. M. Crawford
family were busy this week at-
tending graduation exercises at
two State schools at which two
sons of the family received de-
grees.

Set at identical hours on Mon-
day night, the family found it
necessary to attend by dividing
the trips to Austin and Lubbock.

Mr. Crawford and daughter,
Kathleen, were in Austin Mon-
day night to attend the Com-
mencement exercises of Texas
University at which a son, Paul,
received his Ph.D. degree in
chemical engineering.

At the same hour, Mrs. Craw-
ford was in Lubbock to attend the
Commencement exercises of Tex-
as Tech College at which another
son, Horace, was awarded his
Bachelor of Science degree in
chemical engineering.

A former Haskell citizen, Bates
Thornton, delivered the Baccalaure-
ate sermon at Tech College.

The services of the two State
schools completed the graduation
of all children in the Crawford
family. Having finished high
school in Haskell, all members of
the family have received their
degrees either at Texas Universi-
ty, Texas Tech College or Har-
din-Simmons University.

The first to receive a degree
was a son, Maurice, who attend-
ed Simmons University in 1928.
All members of the family with
the exception of Maurice receiv-
ed their B.S. degrees from Tex-
as Tech College. There are a total
of eight college and university
degrees in the family, six Bachel-
or of Science degrees, one Mas-
ter, and one Ph.D.

Four boys of the family have
B.S. degrees in chemical engi-
neering from Tech, one son a B.
A. degree from Hardin-Simmons.
A daughter, Kathleen, receiving
a B.S. degree in Education from
Tech College in 1938.

**Willing Workers
Club Meets With
Mrs. Powell**

The Willing Workers 4-H Club
met Thursday May 26, in the
home of Mrs. D. N. Powell of
Jud, for the regular meeting.

Eleven members answered roll
call with "Guessing Who My Se-
cret Pal Is" as pasts were reveal-
ed and new names drawn.

Mrs. S. E. Lewis made a cor-
sage using garden flowers, stress-
ing the points to remember in
making a corsage.

Mrs. Ira Short gave a timely
topic when she discussed "Better
West Texas—Mexico Relations
Urged." The Texas Good Neighbor
Commission met in Saltillo,
Coahuilla, Mexico, Saturday, May
7, to talk international business
and friendship with Gov. Raul
Lopez Sanchez. Four projects
were listed as discussed: (1) Linking
of Chicago and West Texas with
Mexico by a Direct Rail Route
with Construction of 93 Miles
of New Santa Fe Line Linking
Sonora, Texas, with Del Rio
and 22 Miles in Mexico from
Del Rio to San Carlos. (2) Con-
struction of Missing Links from
Alaska to West Texas and Mexi-
co. (3) Construction at Del Rio
of the First Texas-Mexico border
toll-free International Bridge.
(4) Expansion of the Big Bend
National Park in Texas into an
International Playground.

Mrs. H. B. Yarbrough gave the
stick trick demonstration when
she used denatured alcohol to re-
move indelible pencil marks from
fast-color fabrics.

Education reports for March,
April and May were turned in to
the Education Committee to be
reported to the county chairman.

After a recreational game the
hostess served angel food cake
and punch.

**Jetton Reunion
Held Sunday In
Wheeler Home**

Thirty relatives gathered in
the home of Mr. and Mrs. Jas-
per Wheeler of Haskell Sunday,
May 29, for a fried chicken din-
ner served buffet style.

Those present were Mrs. Chas.
W. Jetton and her children and
grandchildren. They are Mrs. H.
E. McCasland of Los Angeles,
Mr. and Mrs. Joe W. Jetton of
Long Beach, California, Mr. and
Mrs. Cecil Jetton, Bobby and
Mary Lou of Rochester, Mr. and
Mrs. Aubrey Shelley, Daisy Belle,
Charlie and Patsy Ann of Olton,
Texas; Mr. and Mrs. Clyde Dye,
Bill Claudine, Jimmy and Evelyn
of Abilene, Texas; Mr. and
Mrs. Herbert Ray and David
Gene of Haskell; Mr. and Mrs.
T. C. Jetton of Haskell; and the
hosts' family, Mr. and Mrs. Jas-
per W. Wheeler and James, Gene,
Geneva, Dorothy and Maxine.

The afternoon was spent in
chatting, games, singing and ko-
daking.

Rochester News

Mr. and Mrs. H. L. Funk and family of Carlsbad, N. M. are here visiting her parents, Mr. and Mrs. Jim Cameron and their relatives.

George Turner presented his piano pupils in recital Wednesday evening at the Methodist Church. Those on the program were Barbara Myers, Ann Davis, Nancy Russell, Patricia McWhorter, Eileen King, Bettie Sue Mitchell, Lynda Hamilton assisted in announcing the program numbers.

Mr. and Mrs. Joe Watkins of Knox City, Mrs. Andy Norris of Haskell, Mr. and Mrs. Herman Reeder and children of Melrose, N. M., and Mr. and Mrs. Holt Moseley of Muleshoe, were guests here Sunday in the home of their parents, Mr. and Mrs. Ed Watkins.

Mr. and Mrs. Ingle Lea of Levelland spent Monday night with their parents, Mr. and Mrs. Doran Brown. They were on their way to Washington, D. C., to visit their daughter, Mary Nell Lea, who is secretary in the office of Hon. George Mahon.

Mr. and Mrs. Joe Scheets of Haskell were guests here Monday in the home of Fred Davis and his mother.

Mrs. W. T. Couch of Merkel visited her daughter, Mrs. R. A. Shaver and family here last week.

Rev. and Mrs. R. O. Browder and son Bobby and Mrs. Bess Porter attended the Northwest Texas Conference of the Methodist Church in Amarillo last week. Vacation Bible School is in progress at the Methodist Church here this week. All Rochester children are invited to attend the school.

Mrs. Jack Davis and baby of Wichita Falls were here Thursday to attend the graduation exercises of her sister, Ina Bud Clark.

Mrs. Tom Buckner spent last end in Wichita Falls with relatives.

Miss Lucy Stoy of Dallas spent last week here with her sister and family, Mrs. Kenneth Roberts.

Mr. and Mrs. Billie Reeves and baby of Corpus Christi visited in the home of his grandparents, Mr. and Mrs. A. M. Reeves Monday.

Members of the Senior Class, accompanied by Coach Phil Simmons and Mrs. Simmons returned Friday from their ten-day outing trip to Colorado.

Mr. and Mrs. Rice Alvis and children, J. C. Alvis of Haskell, Mr. and Mrs. Bill Johnston and family of DeWitt, Ark., were guests Monday in the home of their brother, Isaac Alvis and family.

Mr. and Mrs. Lynn Knouse and children spent Saturday night in the home of her parents, Mr. and Mrs. James A. Greer.

CARD OF THANKS

Many are the friends who we hold in our grateful hearts for the kindnesses done in the trying period of sickness, death, and burial of our loved one. For these spoken messages of condolence, handclaps of sympathy, ministrations of tender hands, flowers and visits, we thank our many friends—Mrs. Joe A. Jones, Mr. and Mrs. J. W. Hill, Mr. and Mrs. Raymond Taylor.

VISIT BROTHER IN SAN ANGELO

Mr. and Mrs. E. D. Arnold spent Sunday in San Angelo, where they visited his brother, Jim Arnold, who is a patient in a hospital in that city.

Silo Termed Best Storage For Green Forage Crops

A feast or a famine is a pretty good description of the feed situation many cows face every year. Green growing crops have plenty of all the nutrients needed in a good ration, especially protein and vitamin A.

And the silo offers the best storage means for these nutrients until they're needed, says C. G. Gibson, extension dairy husbandryman of Texas A&M College. Making good hay early in the season presents a problem because spring weather favors growth rather than drying out processes needed for silage.

As a result, lots of good hay is lost or hay of poor quality is made into silage. With every crop, there's a best time for harvesting to get the highest nutrient value. Good silage can be made from hay and grass crops without the use of preservative by means of the wilting method, says Gibson.

With a little practice farmers can learn to tell the best time the crop is ready for siloing. When a crop has wilted slightly, it appears a little lighter in color, and the leaves and stems will be limp but not dry and curled. Twisting will bring the moisture out of the stems, but no free moisture will run off.

Too much of the Texas grass and hay land yields a low tonnage per acre, Gibson says. However, through fertilization, pasture management and seeding many farmers are changing this situation. High yields are becoming more common.

The silo is the best method for storing the early growth. Hay can be made later in the season when curing conditions are more favorable.

ATTEND COMMENCEMENT AT TEXAS TECH

Mr. and Mrs. C. L. Lewis attended commencement exercises at Texas Technological College in Lubbock Monday night, where their nephew, Allen Jefferson Lewis Jr., was a member of the graduating class of 1232 students. Commencement address was delivered by Bates Thornton of Culver City, Calif., another nephew of Mr. and Mrs. Lewis. The exercises were attended by an estimated ten thousand persons.

EDWARDS VISIT MUNDAY AND GOREE

Mr. and Mrs. J. B. Edwards attended 5th Sunday meeting of the Primitive Baptist Church in Knox county Saturday and Sunday. Also visited with friends in Munday and Goree.

4-H Youth Build Nation's Future Dairy Herds

Production of milk for human consumption is one of the oldest farm enterprises. Yet today—because of modern scientific research and invention—it is one of the newest and biggest of all agricultural activities. There are some 27 million dairy cows in the nation. One of the objectives of the National 4-H Dairy Production program is the building of a successful dairy herd from an original investment in a 4-H Club calf.

Guided by county agents and local 4-H Club leaders, more than 1,890 boys and girls are participating in this "learn by doing" 1949 project. They acquire knowledge to grow fine pastures, build healthy herds and produce good, clean, wholesome milk. Not content to stop there, these future dairymen pass along their knowledge to the community by demonstrating at clubs and meetings procedures such as "Dairy Problems on the Farm," "Dairy Cattle Management" and "Care and Handling of Milk."

To further encourage 4-H'ers in this endeavor, the Kraft Foods company for well over a decade has donated awards for outstanding records. This year there will be a gold-filled medal for first place county winner, and a silver

ling silver medal for second place. Eight \$25 U. S. savings bonds will be presented to state winners, while all-expense trips to the National 4-H Club Congress in Chicago will be arranged for 10 sectional champions. From this sectional group, six will be selected to receive a \$300 award to attend a cultural college school. State winners in 1948 were: Doyle Davis, Hart, Bill; More; Billy Fowler, L.

Advices Harvesting Grass And Legume Seed For Planting

If the trend on your farm is toward more pasture and forage production, you'll need seed for new plantings or reseeding. Grass and legume seed are not too plentiful, and they are expensive, says R. R. Lancaster, extension pasture specialist of Texas A&M College. Growing and saving your own is mighty good insurance and therefore less expensive.

There is plenty of some pasture grass seed ready-grown and waiting for someone to harvest them, adds Lancaster. One of these is rescuesgrass. It grows in abundance along roads, ditches, fence rows and in other protected places, and is well known to most Texans. Its seed branches droop with the heavy ripening of seed while merchants import seed from Australia.

Rescue can be harvested with a combine. When the seed are ripe enough to shatter, it's ready for combining. Before shattering begins, it can be mowed with a windmower or windrowed with a rake or cut with a broadcast binder but not tied. The seed-hay should be allowed to dry for about four days, depending upon the weather. Threshed seed must be spread under a shelter until it is dry enough for storage, cautions Lancaster. But if you plan to plant immediately by spreading the seed-hay, most any method of harvesting can be used.

Dallisgrass seed likewise is going to waste in the Gulf Coast area and in many sections of East Texas. It can be mowed, raked and the seed-hay spread or scattered where you want it. Disk it in, says Lancaster, for dallisgrass grows better from that method of seeding than any other.

Many of the clovers produce heavy seed crops that can be saved by similar harvesting methods or by sweeping up the seed by hand. Then there is a commercial, tractor operated machine that sucks up the seed and blows them back into a trailer. Regardless of the harvesting method used, save the seed that can make your pastures better, concludes Lancaster, you may have trouble finding a supply of seed when you need it.

U-T Students Will Make Five Weeks Zoology Field Trip

Students will receive college credit for catching snakes this summer in the second annual University of Texas zoology field trip.

In a five-week study course on animal life in the Trans-Pecos Edwards Plateau region, students will substitute vans and traps for books and collect as many specimens of wild life as possible.

Accompanied by Zoology Professor W. Frank Blair, 20 students will leave June 6 for the Blackstone Ranch, 15 miles south of Sheffield and will continue their work through July 12.

Dr. Blair says specimens should be of particular interest because the area of study represents a change from the Trans-Pecos region wild life to that of the Edwards Plateau.

Specimens will be brought to the University for addition to the zoology museum and plants as well as animals will be included.

They will be utilized in carrying the distribution and manner of life habits of animals and plants in the state.

Wheat Loan—

(Continued from Page 1)
 sary that the grain be weighed.
 10. Calculated bushels in a granary will be reduced by 5% for estimated shrinkage.
 11. The quality and quantity of the grain is at all times the responsibility of the producer, and treatment is required by him if any damage develops.
 12. Insurance is not required.
 General comments on types of Storage Granary:
 1. Must be weather proof.
 2. Must be substantial enough to hold the grain.
 3. Must be ventilated beneath the floor with an air space off the ground.
 4. Loans will not be approved if wheat is stored directly against concrete or dirt floors. This can be corrected by laying tar roofing paper between the grain and the floor.
 5. Bins should be sprayed with 50% DDT before storing wheat.
 6. Grain must be thoroughly dry before storing wheat, and each load should be tested for moisture before putting it in the bin. One bad load can spoil the entire granary.
 After the Grain has been in storage for at least 30 days, producers can proceed with the loan by notifying the county FMA office in Haskell, where every effort will be made to make prompt inspection.

Tips On Clothes Selection Offered By Specialist

Choosing the summer wardrobe to suit the home laundry equipment is an idea suggested by Gladys Darden, extension assistant home management specialist of Texas A&M College.

The Texas homemaker can save time and energy, especially in the summertime, if the family's clothes are well fitted to the washing and ironing equipment. By this, Miss Darden means that the homemaker can put an ironer to the fullest use if she chooses styles that are easy to iron flat—dresses that fasten all the way down the front, for instance.
 In contrast, puffed sleeves, embroidery, lace and small ruffles are difficult to iron by machine. Small, flat buttons on clothes will go through the wringer better than large buttons or buckles, and the smaller buttons are easier on the rubber rollers, too. There's less chance for deep creases in the thinner fabrics than in the heavy linens and the napped fabrics like bath towels and corduroy, Miss Darden says. Sashes and ties are extra trouble not only in the washer, but also in the wringer. Fold them inside the garment before wringing to keep them from catching and tearing.
 Clothes, which need little ironing—if any—save much tiresome labor in hot weather. These include terry cloth and corduroy robes and coats, seersucker dresses and suits, and knitwear, especially for children.
 In an automatic dryer these fabrics keep their shape and avoid creasing. A dryer is excellent for fluffing any napped fabrics, says Miss Darden. But she warns that if the clothes are left too long in a dryer so that they become "bone-dry" the dryer may crease them, especially if there is a heavy load.
 Time and labor may be saved by wearing clothes that fit the equipment.

Bitterweed Poses Serious Threat To Livestock

The bitterweed may become a serious problem to livestock producers in this area according to the Soil Conservation Service. It is a poisonous plant that seems to be increasing in this section of the country. Bitterweed is a low bushy-like weed with small yellow flowers that is so common in this area at the present time.
 A few years ago the bitterweed caused the death of a number of sheep in this vicinity and it will also kill cattle if they consume enough of it. The bitterweed makes its growth in areas that have been overgrazed to such an extent that the grass has been destroyed.
 Range technicians of the Soil Conservation Service report that resting the land is the most practical method of eliminating the bitterweed after it has established itself. If the grass is given a chance to grow it will take over and choke out the bitterweed.
 A large, thrifty animal will always be able to take more of the feed from the small, weak animal. The same principle applies in the case of plants. Therefore, in the

Poultrymen Given Timely Suggestions In New Circular

The five "S's" of poultry laying house sanitation introduce the new poultry circular recently released by extension poultry husbandmen of Texas A&M College.

Cleaning and disinfecting the poultry house and equipment makes for healthier disease-free flocks. And it's one of the first important steps in getting maximum egg production. The five "S's" of laying house sanitation are scrape, sweep, scald, scrub and spray, say the extension poultry specialists.
 The new circular, officially known as C-260, Keep Hens Happy, also has information on disease and parasite control including coccidiosis, fowl pox vaccination, and the reduction of internal parasites by frequently moving the range shelters to clean areas.
 Two other points brought out in the new circular are the separation of old hens from the younger pullets and the space needed per bird in the henhouse. Older birds are sometimes disease carriers of roup and range paralysis, and for this reason the old hens should be kept apart from the young pullets.
 Each hen needs three to four feet of floor space, eight to ten inches of roosting space, three to four inches of feeder space and one nest for every five hens. And keep them supplied with plenty of clean water and feed, the specialists say.
 Texas poultrymen who are interested in this circular may find one available at the county agent's office.
 Happy.

Farm Loan Assn. Pays Borrowers 5 Pct. Dividend

Checks representing a five percent dividend were mailed May 15th by the Haskell County National Farm Loan Association to all borrowers who owned stock in the association on Dec. 31, 1948. W. H. McCandless, secretary-treasurer, announced.
 Since organization the Haskell County National Farm Loan Association has loaned to Haskell County Farmers and Ranchers in excess of four million dollars and about three million of these loans have been fully repaid. McCandless declared.
 For 32 years farmers and ranchers of Haskell County have been pledging their lands as security for loans through the Haskell County National Farm Loan Association. These loans being endorsed by the Haskell County National Farm Loan Association and passed on to the Federal Land Bank of Houston and used by this bank as collateral for bonds. These bonds are sold to the investing public—commercial banks, business men, doctors, lawyers, school teachers and others.
 The Federal Land Bank of Houston is owned by the National Farm Loan Associations operating in Texas and the Associations in turn are owned by the borrowers, being co-operative organizations chartered under the laws of the U. S. Government. Therefore any accumulated profits by the Associations are passed back to the borrowers in the form of annual dividends.

Home Storage Of Butter Practicable With Freezer

Good spring pastures mean lots of milk. And that leads to lots of butter. But dry pastures later on this summer may cut butter production.
 So, here's a suggestion from Margaret Jackson, assistant foods and nutrition specialist of Texas A&M College. You can freeze your butter at home and store it in the home freezer for as long as six months if it is good quality. This way you'll have plenty of butter when the milk production drops off during the later part of the summer.
 Miss Jackson says it's best not to even try to freeze poorly made butter. It doesn't keep well, even in the freezer.
 Before freezing the butter, wash it well to get all the milk out. Mold it and wrap it in parchment paper. Then press all the air out that gets caught between the paper and the butter. Then it's ready to pack in wax cartons.
HERE FROM CALIFORNIA
 Mr. and Mrs. Miriam Beard of Orosi, Calif. are here for a visit with relatives and friends.
VISITS PARENTS
 Miss Wynelle Hellums of Dallas spent the week-end in the home of her parents, Mr. and Mrs. W. D. Hellums.
VISITING PARENTS HERE
 Dr. and Mrs. William J. Kemp of Kansas City, Mo., are visiting his parents, Mr. and Mrs. Giles Kemp.
 Green manure, fertilizer, organic matter, crop rotations add fertility to the soil.
 management of grassland for the control of noxious plants, the principle that should be followed is that of permitting the better plants to maintain themselves on an area leaving no room, no food and no moisture for the undesirable plants.

MOODY VISITORS IN HOME OF RELATIVES HERE

Mr. and Mrs. Horace Payne and children, Anne and Bill, of Moody, are visiting in the home of her mother, Mrs. Lola Lemmon and other relatives here.
