HASKELL, HASKELL COUNTY, TEXAS, THURSDAY SEPT. 8, 1949

NUMBER 36

8-Year-Old Girl Dies Wednesday Night After Struck By Automobile West of Town

8-year-old girl who began her trip this week as a girl in the South was fatally injured Sunday night in an automobile accident, to be the first traffic victim, and third person to die as a result of mishaps.

SCOUT FINANCE DRIVE PLANNED SEPT. 13TH

The annual finance campaign for the Boy Scout program is set for Tuesday, September 13, according to an announcement this morning from R. L. Burton, chairman of the Haskell County District of the Chisholm Trail Council.

Hunters Finding Doves Plentiful But Wary

Since opening of the dove hunting season Sept. 1, sportsmen report finding mourning doves plentiful in most sections of Haskell county, but extremely wary after the first few days of the season.

FINAL PLANS FOR CWT FAIR WILL BE MADE AT SERIES OF MEETINGS

Final plans for the twenty-first annual Central West Texas Fair, which is to open in Haskell on October 3, are being completed in a series of meetings of committee chairmen, superintendents and department heads, this week end and the early part of next week.

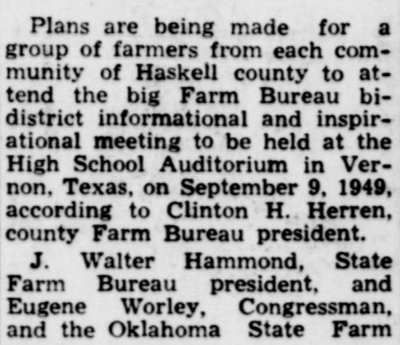

Thieves Hit Weinert And Rochester Sunday Night

Burglars struck three places in Haskell county Sunday night, and the same culprits are believed to have committed a burglary at Avoca, in Jones county, Sheriff Bob Cousins and other officers reported after checking the premises entered by thieves.

District Farm Bureau Meeting Set At Vernon

Plans are being made for a group of farmers from each community of Haskell county to attend the big Farm Bureau bi-district informational and inspirational meeting to be held at the High School Auditorium in Vernon, Texas, on September 9, 1949, according to Clinton H. Herren, county Farm Bureau president.

Takes School Post

Appointment of Mrs. W. P. Trice of this city, former superintendent of the Haskell County Hospital for several years, as County School Nurse under the new school program was announced this week.

Pumping Equipment Being Placed At Ballard Well; Rig Moved In For Stanolind Offset

Operators were installing pumping equipment Thursday in the Thos. D. Humphreys No. 1 T. L. Ballard, prospective extension of the South Haskell field from Palo Pinto reef, approximately a mile southwest of Stanolind's discovery well on the J. M. Pace tract.

HASKELL GINS PLACED IN READINESS FOR 1949 COTTON SEASON

Haskell's five ginning plants were being placed in readiness this week for what is expected to be one of the busiest and longest ginning seasons in many years, as the gathering of this year's cotton crop got slowly underway in the immediate vicinity of Haskell.

Record Enrollment In Prospect For Haskell Schools

Following an efficiently-planned schedule, Haskell public schools began the 1949-50 term Monday morning with first day enrollment and attendance totals indicating that attendance for the term will reach a record high.

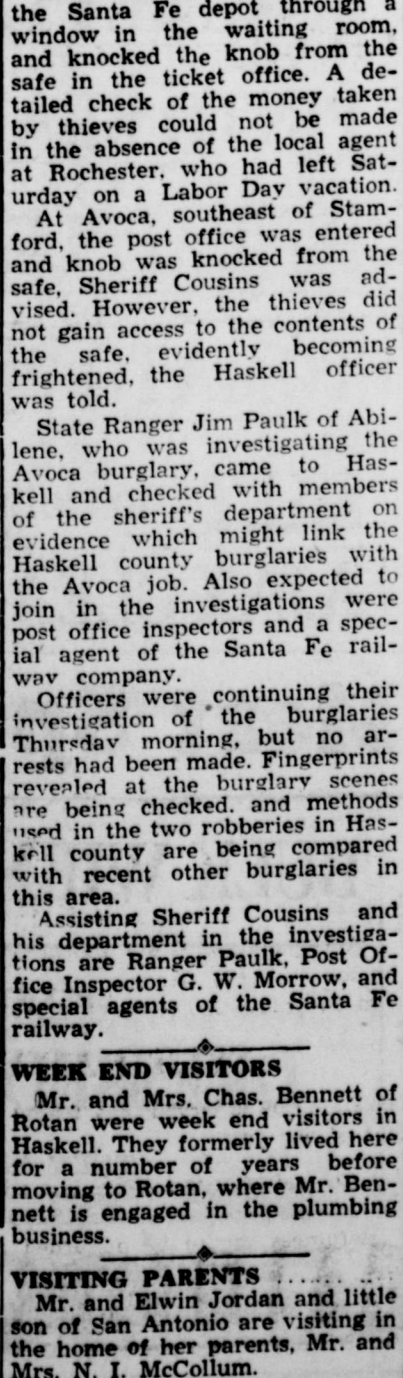

Autumn Rain Brings .61 Inch Moisture Today

A slow rain which began falling early Thursday morning ushered in a touch of autumn temperatures and brought .61 inches of moisture to bring the total rainfall during the past eight days to 2.03 inches.

New Hunting and Fishing License Being Issued

A few Haskell county sportsmen have secured the new hunting and fishing license since Sept. 1, according to Wallace H. Cox of Jones, Cox & Co., authorized issuing agent for the State Game Commission.

Returning Lettermen On HHS Indian Squad

Pictured are the lettermen returning to bolster the Haskell Indian squad this year. They are left to right, bottom row: Eldon Ammonette, Bobby Jack Price, Billy Davis, Kenneth Davis, Billy Lusk. Second row: Ernest Strain, Rufus Dodson, Edward Ammons, Tommy Rhoads, James Miller. Top row: Vernay Lusk, Billy Dilleck, and Royce Mullins. Not shown is Charles Cox, another letterman. (Photo by Steffa, courtesy of Abilene Reporter-News).

H. B. Iverson Is New District Game Warden

H. B. Iverson, deputy State game warden for the three-county district, composed of Haskell, Throckmorton and Young counties, was a visitor in Haskell Monday.

HASKELL INDIANS OPEN '49 SEASON AGAINST SPUR BULLDOGS FRIDAY

King Football will begin its reign as the Haskell Indians lift the lid from their 1949 schedule when they battle the Spur Bulldogs in a non-conference tilt at 8 p. m. on the Bulldog gridiron Friday night.

All County Schools Open

In addition to Haskell, all other schools in the county have opened for the 1949-50 term, with similarly large enrollment reported.

Black Indians to Play Haskell All Stars Sunday

Following their win over the Latin American baseball team here last Sunday, the Haskell Black Indians have matched a game with the Haskell All-Stars, to be played at Fair Park Field next Sunday beginning at 3:30 p. m.

Cotton Yard To Be Located Near South Ward School

Public Weigher George Weaver of Prec. 1 announced this week that a site for the public cotton yard had been secured just east of the South Ward school, on lands owned by G. W. Reese.

Relative of Haskell People Dies In Georgia Recently

Mr. and Mrs. J. A. Yancy of Haskell received a message this week from his sister, Mrs. C. P. Allen of Ben Hill, Ga., telling them of the death of her husband at that place on August 23. Death was attributed to a sudden heart attack, Haskell relatives were advised.

Eighth Grade Class Has Organization Meeting Monday

Sections one and two of Haskell Junior High met in room 4, on September 5, 1949, for the purpose of electing class officers.

PROCLAMATION

In keeping with the approach of the Autumn season, and by the authority vested in me as Mayor, I do hereby proclaim Saturday, September 10, 1949, as

FELT HAT DAY

in Haskell, to be observed in a fitting manner by every male resident of our city.

Table with 3 columns: Probable Starting Line-up, Pos. Name, Wt. Rows include LE Ammons (175), LT Cox (216), LG Mullins (133), C Rhoads (201), RB V. Lusk (132), RT Strain (195), RE Taylor (130), QB B. Lusk (187), LH B. Davis (145), FB Ammonette (180), and RH J. Miller (120). Assistant Coaches listed as Royce Smith and Ray Overton, Jr.

HASKELL COUNTY HISTORY

Brief Items Taken from Old Copies of The Free Press

20 Years Ago—Sept. 5, 1929
Directors of the Haskell County Fair Association announced this week that no exposition would be held this year, due to prevailing business conditions and the general farm outlook. This decision was reached at a meeting of directors and interested citizens, held Wednesday at the City Hall.

Former Governor James E. Ferguson of Austin was in Haskell Tuesday on business.

Miss Lois Norton has gone to Big Springs, where she will teach in the public schools this year.

Cotton ginned in Haskell from the crop of 1929 had reached 300 bales Wednesday at noon, which is far in excess of the amount ginned in any previous year at this time. Early opening of the crop is due to the prolonged spell of hot weather, ginner declare.

Miss Maurine Couch has returned from an extended trip to New York, Boston, Washington, and other points of interest in the North and East.

Misses Nettie McCollum and Lela Welsh returned last week from their vacation trip to Colorado.

Mr. and Mrs. J. E. Bernard and son, Ralph, went to Madill, Okla. last Wednesday and visited her sister, Mrs. J. W. Mundy and little son, Jim. They returned with the Bernard family to Haskell.

Mr. and Mrs. Claud Wheatley have returned from a trip to Glen Rose and other points.

Miss Mildred Jones returned from Amarillo Saturday, where she has been visiting her sister, Mrs. J. W. Hill.

Mrs. E. E. McElroy of Ballinger is visiting in the home of her daughter, Mrs. Leone Pearsey and family.

has covered the country from Jeff Davis county to Amarillo.

Dr. Frederick A. Cook, an American, has discovered the North Pole. He started on the expedition in 1907. The discovery was made April 21, this year. Wireless telegrams received in Norway told of the success of his expedition.

We are told that Mr. Buckner of Rochester, destroyed the bugs on two acres of watermelons by sprinkling with liquor of tobacco juice. He took fifty cents worth of tobacco and made a barrel of liquor and applied with a sprayer. Since treating the vines they are putting on melons and looking better, and insects have ceased their ravages.

J. W. Young of Stonewall county, sold two loads of broom corn to the factory here Tuesday at \$70 per ton. Mr. Young is not entirely at the mercy of the boll worm.

Miss Emma Nicholson of Hamlin visited relatives here last week.

Last Monday morning Messrs. J. V. Hudson, C. V. Long, F. M. Todd, H. S. Wilson and Joe McCree of this city and J. E. Robertson of Weinert left in an auto for Roswell, N. M. They will be gone ten days and will visit a number of points on the Plains.

R. B. Spencer of the Spencer Lumber Co., was up from Dublin this week.

Misses Lela and Mamie O'Dell attended the picnic at Throckmorton last week.

The residence of G. J. Miller burned Thursday morning about 2 o'clock. The building and contents were a total loss. Mr. Miller had some insurance.

J. D. Hughes of Georgetown is here looking after his ranch interests on Paint Creek.

'Feed the Land and Fatten the Crops' Proves Worthwhile

The slogan, "Feed the Land and Fatten the Crops," is a good one for Texas farmers to adopt. Plants need plenty of the right kind of food in order to thrive and produce profitable yields. It is not possible, says E. A. Miller, extension agronomist of Texas A. and M. College, to produce good crops unless sufficient plant food is available, regardless of how good the seed or cultural methods may be.

In addition to the plant food, plants also need a good home in which to live and lots of water to drink, adds Miller, and one of the best ways to provide these important items is to feed the land with inoculated and fertilized supply plant food—especially the high priced and badly needed nitrogen they get from the air—but they also make a better home for the plants. The action of the organic matter supplied by the legumes when plowed under improves the home for the plants and provides more water by increasing the waterholding capacity of the soil.

Results of experiments and hundreds of extension service demonstrations furnish the proof that it pays to feed the land with inoculated and fertilized legumes, Miller says. Hairy vetch increased cotton yields on the Texas Agricultural Experiment Stations at Naacogoches and Tyler by more than 100 pounds of lint per acre and doubled the corn yields.

At the Temple Station in the blackland area, cotton, following Hubam sweetclover, which was harvested for seed, produced a five year average of 315 pounds of lint per acre as compared with 165 pounds from cotton grown continuously without clover. The yields of corn, oats, barley and wheat following clover were also increased. Similar results have been obtained from demonstrations conducted by county agents.

Cotton root rot is again taking a heavy toll of cotton on many farms in the blackland section this summer where clover was not used in the rotation. The best method so far developed to increase cotton yields and reduce the losses from cotton root rot in the blackland section is by using sweetclover in the rotation plans for the farm, says Miller. The recommended varieties are Hubam, Madrid and annual yellow blossom—the latter mainly in South Texas and the Gulf Coast Prairie.

Hairy vetch, Williamette vetch, winter peas and other legumes also increase yields and reduce root rot losses but they are not as effective on the blacklands as sweetclover. This may be due to the fact that the clovers with their opens up the soil and this in turn extends and deep root system permits better soil aeration, allowing more water to be absorbed, in addition to adding nitrogen. This leaves the soil in very fine shape to produce, says Miller.

been off on pretty extensive trips says that the cotton in this county shows less damage from the drouth and that corn and feed crops are better here than they have seen elsewhere.

Jerome Hills came in this week from Round Mountain X ranch where he has been at work all summer, to spend a few days with friends before entering Reynolds Presbyterian Academy at Albany next week.

Joe Makeig is a newcomer to Haskell and works a razor at the Parsons barber shop, where he is permanently established.

Miss Ethel Mason went to Albany Wednesday to attend the Reynolds Presbyterian Academy, which opens next week.

Sam Ramsey went to Anson Tuesday for his father and mother, who have been visiting relatives at that place.

The young folks enjoyed a very pleasant social entertainment at the residence of J. N. Ellis Wednesday night.

Joe Ferguson returned this week from an extensive trip in New Mexico, looking for a ranch location.

J. P. Ashley of Stonewall was over Thursday and bought three residence lots on the west side of R. D. Smith. We are informed he plans to build a residence on the lots and move to Haskell.

Miss Sallie Ramsey entertained the little folks Tuesday night.

Joe McCreary got home Thursday evening. He's the same old jolly Joe.

J. S. Boone brought three of his children in this week to attend the town school.

J. E. Fitzgerald left Thursday on a trip to King county to look at a ranch location.

F. E. Turner has bought the stock cattle, about 70 head, and the ranch of J. K. Cawthon.

T. J. Smith, a prominent cattleman of Stonewall county, brought his children over this week and entered them in the Haskell schools.

Jot Guntner, mentioned last week as buying 3,000 acres in the north part of the county, has since purchased three more sections of 640 acres each.

R. M. Ferguson and Thom McCreary returned to Haskell here this week and loved T. G. Carney's farm and ranch in the northwest part of the county for a period of five years.

Soils stay cooler in the summer and warmer in the winter when they are protected by a cover crop.

NURSE INDISPENSABLE HERE

New baby is seen by mother, a polio victim. Nurse is from Des Moines, was recruited by American Red Cross which today appealed for at least 100 more nurses to care for polio-stricken. In no other disease is nursing care more important for recovery. Nurses are asked to contact local Red Cross chapters for details about polio service.

West Texas Utilities Company Using Two-Way Radio in Maintenance Work

Effective today, "trouble-shooters" of the West Texas Utilities Company, Stamford District, will get their orders by radio.

The work of linemen, installation servicemen, emergency repairsmen, power dispatchers, and substation operators will be directed by two-way radio. According to an announcement by K. K. Francis, district manager, the West Texas Utilities Company has received authority from the Federal Communications Commission covering the operation of a two-way high frequency, FM radio system. The FCC license was issued on the basis of public welfare. "The new system will materially help the WTUco, in its effort to maintain and provide uninterrupted electric service," said Mr. Francis.

The system is authorized a 250 watt central station, which is located at the WTUco, Stamford Plant. The antenna extends 8 feet above a 180 foot antenna tower; total height being 188 feet.

This central station, which has been assigned call letters KKA791 and which according to FCC regulations will operate on assigned frequency of 37,700 kc with a maximum variance of .01% from assigned frequency allowed, cannot be heard on standard radio receivers. Only receivers designed to use this frequency will be able to pick up signals from this station.

A dispatcher located in the WTUco's district distribution office at Stamford district office operates the central station by remote control. The dispatcher maintains two-way communications with the operators of mobile units which are installed in service and line trucks operating in the Stamford district. These mobile units have a range of from thirty to sixty miles, depending upon the surrounding terrain. They can communicate with each other as well as with the central station.

In case of disaster, public need, national emergency, or in instances when existing means of communication fail, these mobile units and this fixed station can, by relaying from station to mobile unit to other mobile units, provide emergency communications with all communities of the surrounding area.

Recent surveys conducted by WTU engineers under FCC experimental license show how this

system can aid the company in rendering better service to the public by speeding the handling of many orders, varying from routine to emergency switching orders.

Cottonseed Products Are Evaluated In New Book

Merchants, farmers and others interested in cottonseed oil, cottonseed meal and hulls, or cotton linters may find a new book on cottonseed products by Dr. A. B. Cox, University of Texas cotton marketing professor, a source of valuable and up-to-date information.

Each of the principal products—oil, cake or meal, linters and hulls—of cottonseed is discussed in a separate section. In addition to 90 tables and 45 figures used as illustrations and basic data, there are 71 pages of tables contained in the appendix.

As science continues its research concerning the contents of the cottonseed, the greater becomes the value of the seed. For example, scientifically-balanced rations now fed to dairy cattle call for specific amounts for such protein which is found in cottonseed meal or pellets. The demand for such protein feed now far exceeds the supply, Dr. Cox explains.

Refined cottonseed oil has long been one of the country's most valuable fats, and cotton linters, once a waste product, are carefully graded for exacting markets. The standardization, markets, market organization and trade procedures in marketing cottonseed products and for cottonseed provide material for two of the 10 sections of the book.

Dr. Cox, who is an accepted authority in this country and abroad on matters pertaining to cotton and cotton marketing, has spent a great deal of time during the last two years in preparation of the present volume. The publication is 350 pages and is entitled, "The Cottonseed-Crushing Industry of Texas in its National Setting."

There is a lot more to growing a good small grain pasture for and winter grazing than putting the seed into the ground, M. K. Thornton, extension agricultural chemist of Texas A. and M. College, says plenty of the right kind of fertilizer and early planting will help you grow a crop that your livestock will appreciate.

Scarce food items in the winter rations are abundant in small grains such as wheat, oats, barley and rye, says Thornton. These grains contain over 20 per cent protein when they are at their best stage for grazing. Rye grass and rescue also supply good winter grazing in the areas where

adapted.

If moisture conditions permit, September seeded small grain pastures offer the best possibilities for good fall grazing, and the use of fertilizer will improve those chances, says Thornton. On the sandy soils of East Texas where legumes have not been turned under, small grains should be fertilized with 300 pounds of 5-10-5 or 4-12-4 per acre at the time of planting. To keep the pasture really producing, Thornton says, top dress later in the fall with 20 to 40 pounds of nitrogen per acre and another similar application next spring will pay you well. From 65 to 135 pounds of ammonium nitrate; 130 to 250 pounds of sodium nitrate or 100 to 200 pounds of sulphate nitrate of ammonium per acre will supply this nitrogen.

An application of 30 to 40 pounds of nitrogen per acre made before or at the time of seeding

Vacation Trips, Out-of-Town Visits In Rochester News Spotlight This Week

Mrs. Will Betticks and her sister-in-law of Abilene are visiting their daughter and niece, Mrs. Paul Golden and family at Lubbock. They also plan to visit a son and nephew, R. B. Betticks and family at Midland.

Mrs. John Scoggins and little son returned last week from Arkansas after spending a three weeks vacation there with her parents and Mr. Scoggins' grandparents.

Henry Cooner of O'Brien was in Rochester on business Thursday.

Mr. and Mrs. Henry Perry are visiting their children, Bruce Perry and family and Mrs. Bill Kinman and family in Eunice, N. M.

Glenn Cox returned from the Valley last week for a short visit with his parents, Mr. and Mrs. Odell Cox and other relatives before going to McMurry College, Abilene, for the coming term. He is a second year student at McMurry.

Mrs. Swain Burkett and sons, Joe and Mike, of Dimmitt, spent last week here with their parents, Mr. and Mrs. A. M. Reeves.

Mrs. Hap Smith and children and Mrs. L. M. Kay visited in the Bob Weimer home last week in Mineral Wells. Mrs. Weimer is Mrs. Kay's daughter.

Paul Russell and children visited relatives in Abilene Tuesday.

Mrs. D. G. Day of Olton spent last week here in the home of Mr. and Mrs. W. L. Ray.

Mrs. Tinker Guffy has returned to her home in Munday after visiting here in the homes of her daughters, Mrs. Theo. Epley and Mrs. Doc Carmack and other relatives.

Bob Dillard of Clovis, N. M., is here at the bedside of his brother, Boon Dillard who is critically ill.

Mr. and Mrs. Carl Moppin and son, Doran, of Austin visited her parents, Mr. and Mrs. Doran Brown and other relatives last week.

Mr. and Mrs. Engle Lea of Levelland were visitors in the Doran Brown home last week.

"Aud" Marcy and daughter, Audrey, of Pyote visited here in the home of his sister, Mrs. Sallie Fields, a short time ago.

Mr. and Mrs. Dow King and son, Reeves, of Pampa, spent the week end here with her parents, Mr. and Mrs. Andrew Reeves.

Mrs. B. C. Cooner of Olton was a visitor here last week in the home of Mr. and Mrs. Bud Corley.

Soil Temperature Is Controlled By Cover Crops

Can you remember how hot bare ground felt when you used to go barefooted? How you hunted grassy spots to walk on? That was just probably what you called a natural reaction, but the matter of soil temperature is a very important item in a soil building program, says Roy L. Donahue, extension agronomist of Texas A. & M. College.

A summer cover crop keeps the soil cooler in hot weather and a winter cover crop helps to hold the temperature up in the winter time. This cover is important for Donahue says that for every 10 degree rise in temperature most chemical reactions are doubled and there are plenty of chemical reactions taking place in the soil. The rotting of organic matter is a chemical reaction.

So when the soil is allowed to go without summer cover, it gets very hot and this causes the organic matter to burn up faster. Soil low in organic matter does not take up moisture when it rains and is drier when the rains don't come often. In areas where wind erosion is a problem, it blows away easily, and in areas of heavy rainfall, it washes badly, says Donahue.

It may be too late to plant a summer legume or grass crop this year, but it is not too late to plan your cover crop for this winter, next summer or for that matter for each season over a 5-year period.

What can you expect from such a program? Donahue says averages from extension service demonstrations in 86 counties show that when corn followed a soil building legume, yields increased 41 percent. When the soil building legume was fertilized, the corn produced an additional 8 bushels per acre on the average.

Reports from 21 counties showing that grain sorghum following a fertilized legume made a 70 per cent increase in yield and cotton yields were increased 60 per cent, says Donahue.

He adds that if you are interested in getting a soil building program started on your farm, visit the local county agent and talk the situation over with him. Chances are good that he can show you demonstrations where soil buildings crops are being used

Legion Auxiliary Elects Officers For Ensuing Year

At a call meeting of the American Legion Auxiliary of Rogers-Cox Post No. 221, Wednesday night, August 31, officers for the ensuing year were elected and plans discussed concerning future activities of the Auxiliary.

Officers elected were: President, Bessie Rich. Vice-President, Ethel Kirkpatrick. Secretary-Treasurer, Jane Holt. Sergeant-at-Aram, Gerry Cox. Reporter, Annie Reynolds. Chaplain, Mrs. J. M. Diggs.

The next meeting of the Auxiliary will be a social meeting on the third Thursday night (Sept. 15) and all members are urged to attend and bring a prospective member, if possible.

Advance Planning For Winter Cover Crops Advised

Now is the time of year to start making plans for winter cover crops. District Supervisors of the Wichita-Brazos Soil Conservation District are urging farmers to start making plans early enough this year to get their seed for planting early, where it is possible to do so.

The Supervisors are planning to fix their grain drill so that it will be possible to seed the cover crops of rye and hairy vetch or Austrian winter peas in cotton fields.

Some remarkable results have been experienced by several farmers who have planted a cover crop of hairy vetch and rye or Austrian winter peas. Production was almost doubled, and results were seen on the land for two years afterward.

Technicians for the Soil Conservation Service are helping the Supervisors and the farmers and ranchers with this cover crop program.

ed to increase crop yields and too, he can help you make that long time plan for your farm.

Cancer Rated As One of Nation's Greatest Killers

Dr. Geo. W. Cox, State Health Officer, in speaking of cancer, said that it ranked second as a cause of death in Texas, being exceeded only by heart disease. Last year approximately 6900 Texans died of this disease. One of the reasons so many people die of cancer is because the disease usually exists some time before it is recognized. By then it has progressed from a small local cancer to a large and dangerous one.

In the beginning cancer is not painful so many persons do not consult a doctor. Any lump, especially in the breast, should be looked upon with suspicion. Other suspicious symptoms are any sore that does not heal about the tongue, mouth or lips; sores caused by broken teeth or ill fitting dental plates should receive attention; irregular bleeding or discharge from any opening of

the body is a danger signal. Persistent indigestion with loss of weight is a symptom of cancer of the stomach. With any of these signs one should go immediately to a doctor. Many times the suspicion of cancer will have been unfounded but it is much better to be safe.

It is desirable to treat all diseases in their early stages, but in no case is it more important than cancer. Periodic examinations made with cancer in mind affords the best protection against this disease. Surgery, X-ray and radium are the main weapons which are used to combat cancer.

Ira Blair of Rochester, Commissioner of Precinct No. 1, was a business visitor in Haskell Monday.

**SEE IT and you want it -
PRICE IT and you'll buy!**

FOLKS take a look at those bumper-guard grilles - built as a unit and proof against "locking horns" - and say "Hmmm! Nice!"

They sweep their eyes over tapering fenders, with a suggestion of jet power in their after contours - and say, "That's for me!"

They eye-measure windshields that are 48% bigger and rear windows with 56% more area - and know without being told they can see the road up closer, both fore and aft.

So they say - "That's for me - IF!"
"What does it cost me to get this handy-sized dandy with the roomiest interiors ever found on a Buick Special?"

"What do I pay for high-compression, high-pressure Fireball power from a big Buick straight-eight engine?"

"What's the tag on that swell Buick ride, with coil springing, extra-wide rims, seats between the axles and all that?"

"And what about Dynaflo Drive -

When better automobiles are built BUICK will build them

understand I can have that at extra cost - how much?"

Well, sir, the news is good. Plenty good. Because this honey's priced well under your expectations. It's a straight-eight that's priced under a lot of sixes - over the years your investment will be no more than for any other car.

So better not stop with looking. Better price it too - delivered at your door. Your Buick dealer will give you the figures, even demonstrate.

After which you'll do as others are doing - you'll get a firm order in.

- TEN-STRIKE!**
Only Buick SPECIAL has all these Features:
- TRAFFIC-HANDY SIZE • MORE ROOM FOR THE MONEY • DYNAFLOW DRIVE optional at extra cost • JET-LINE STYLING • NON-LOCKING BUMPER-GUARD GRILLES • HIGH-PRESSURE FIREBALL STRAIGHT-EIGHT ENGINE • COIL SPRINGING ALL AROUND • LOW-PRESSURE TIRES ON SAFETY-RIDE RIMS • GREATER VISIBILITY FORE AND AFT • SELF-LOCKING LUGGAGE LIDS • STEADY-RIDING TORQUE-TUBE DRIVE • THREE SMART MODELS WITH BODY BY FISHER

Prison Rodeo Will Open At on First Sunday In October

The "Big-Game Earth", the rodeo will open in Huntsville, on Sunday, Sept. 10, at 2 p. m. and on Wednesday, Sept. 14, at 2 p. m. French Robert, board member, made for the history of the rodeo and the breaking stamper and wildness and performed up.

Each performer of the greater new 1949 Prison Rodeo will include novelty acts, standard rodeo events such as calf roping, bareback and saddle bronc riding, bull riding, etc., and exclusive Prison Rodeo features such as the hilarious chariot race, the huge prison military band, the Goree Cowgirls, wild horse race, the breathtaking mad scramble, wild cow milking and the music of the Prison Stringsters. Moore promises, "a spectacle they'll never forget."

"Prices for the greater 1949 show will remain the same as last year," Roberts emphasized. "Two dollars for reserved seats and one dollar for 'standing room only', tax included. Reservations may be made any time after September first by writing or wiring the prison ticket office in Huntsville."

There will be six performances: October 2, 9, 16, 19, 23, 30.

FARM FACTS WORTH KNOWING

1. Will range livestock take more salt if it is placed near water?
Research workers of the Soil Conservation Service in Texas report that cattle eat nearly twice as much salt when it is distributed at several places in a pasture as when all the salt is placed near the watering trough.

2. How can onion flavor in milk be prevented?
If weedy pastures are used, return the milking herd to the barnyard or dry lot several hours before milking.

3. How does the birth weight of pigs correlate with the health, vigor and livability of pigs farrowed?
Experience at the Ralston Purina Research Farm proves that the birth weight of pigs is an excellent indication of vigor and livability. Of pigs weighing one and one-half pounds at birth, only 13% were alive at weaning time. Of pigs weighing three pounds or more at birth, 77%-85% were weaned.

Send your questions about livestock or poultry problems to FARM FACTS, 835 South Eighth Street, St. Louis 2, Missouri. Questions will be answered without charge, either by mail or in this column, as a service of this newspaper.

Rabies Shown In About 25 Percent of Cases Investigated

The Texas State Department of Health during the first seven months of this year has a record of the examination of 2709 animal heads for rabies and of this number almost one-fourth were found positive, said Dr. Geo. W. Cox, State Health Officer.

Rabies is transmitted to man through a bite or having a cut exposed to the saliva of a rabid animal. If a person is bitten, the offending animal should be penned, if possible, for a period of at least ten days. If the animal is in the infective stage, he will die within this time. This does not mean that he may not be in the noninfectious stage and develop rabies later. All dogs bitten by a rabid animal should be confined six months. If it is necessary to kill the animal, this should be done in such a manner that the brain is not destroyed.

When sending a head to the State Laboratory it should be put in a container, sealed and packed in ice to prevent decomposition.

Dr. Cox said that rabies is a hard disease to eradicate, but that it could be done if all owners would have their dogs vaccinated each year and eliminate all stray dogs. If you have a dog, get him vaccinated the same as you have your children immunized against diphtheria and smallpox.

Rabies is commonly supposed to be a disease of warm weather, but it is more prevalent during the spring and fall because the dogs congregate and move about more, therefore, the chance of exposure is greater during this time. It is true that more dogs are killed during the summer months, but the percentage of rabies is low.

Taffeta and Bold Lace

Listen to his heart lilt when he sees you in this dancing dress that's as soft and rustling as a September evening. Comopolitan magazine's Male Jury succumbed to its romantically-whispering taffeta, gossamer-like lace and bare shoulder styling. Choose from gold, Kelly green or bronze taffeta and dapple it with the black lace overshift—for about \$40.

Civil Service Measure Gets Top Place On Ballot For November 8th Election

Top ballot position of the 10 proposed constitutional amendments to be voted on Nov. 8 will go to a proposal to authorize counties to adopt civil service by popular vote.

Last on the ballot will be the proposal to qualify women to serve on juries.

The order was determined by a drawing in the secretary of state's office as prescribed by law. Secretary of State Ben Ramsey drew numbers representing the 10 proposals from a glass bowl in the presence of a representative from the governor's office and the attorney general's department.

This is the order in which the proposals came out of the bowl and will go on the ballot:

1. To authorize counties to adopt civil service systems for county employes by popular election.
2. To provide annual legislative sessions and annual salaries for legislators.
3. To provide for creation of hospital districts.
4. To abolish the poll tax voting requirement.
5. To authorize creation of city-county health units.
6. To authorize a statewide system of retirement and disability pensions for appointive county officials and employes.
7. To require district judges to conduct proceedings at the county seat of the county in which a case is pending; except as otherwise provided by law.
8. To authorize creation of rural fire prevention districts.
9. To provide for trials without a jury in lunacy cases.
10. To qualify women to serve on juries.

HERE FROM AUSTIN

Mr. and Mrs. Paul W. Roberts and children, Paula Jo and James Arnold, returned Tuesday to their home in Austin after spending the past week in Haskell visiting in the home of their parents, Mr. and Mrs. J. H. Free and Mr. and Mrs. Sam A. Roberts.

WEEK END VISITORS IN A. D. ADAMS HOME

Mr. and Mrs. A. D. Adams had the following visitors in their home over the week end: Mrs. Golda Adams and son, Ronald, of Denton, Mr. and Mrs. Jess Adams and daughters, of Rochester, Mr. and Mrs. Doyle Eastland and daughter, Jan, and Mrs. Sue Eastland and Mrs. Thurman Bynam and daughter, Terry, of Haskell, and Mr. and Mrs. Floyd Bledsoe and daughters, and Mrs. Maude Bledsoe of Lubbock.

Survey Shows More Texans Work For Higher Pay

The survey of salary and wage scales in Texas cities shows more people working and getting higher pay over the period of the past six years.

A study of 61 cities with a population of 5,000 indicated annual salary wage totals to be almost tripled and the total number of employees doubled in the past six years.

In January, 1942, the salary total of the cities was \$2,377,000 and the employees total 19,682 non-school workers. By October, 1948, the figures were \$6,542,000 and 38,212 respectively.

Half the cities have made cost of living wage increases during the past two years. Retirement benefits and group insurance have been added or expanded and work hour schedules and overtime pay systems have been set up in many places, the survey indicated.

CARD OF THANKS

We want to thank this means of thinking each one for their words of sympathy and comfort in the death of our dear son and brother. Especially for the beautiful floral offerings and the ones who sent and served food. Our earnest prayer is that God will richly bless you all. Mr. and Mrs. Rice Alvis and family.

Specialist Urges Fall Garden; Gives Tips on Soil

Why not grow a fall garden this year? There is no substitute for the superior flavor and delicious goodness of vegetables grown in your own garden, says John E. Hutchison, associate extension horticulturist of Texas A & M College.

Soil preparation is simple. The residues of the previous crops, the stems and the vines should be removed along with all grass and weeds, he adds. If well dried barnyard manure is available, spread a layer over the surface and turn it under four to five inches deep. Commercial fertilizer can be used in areas where there is adequate rainfall—about 30 inches per year—and three pounds of 5-10-5 for each 100 feet of row space is sufficient. Over the planting furrow and mix the fertilizer into the soil.

Germination at this season is usually poor and Hutchison advises using about a fourth more seed in order to get a good stand. Seed with a hard seed coat, such as beets and carrots, should be soaked overnight before planting but don't plant soaked seed in dry soil. Irrigate before planting if the soil is dry.

In many sections of the state, it is time now to make your first plantings. You can include beans either Pinto or Stringless Green Pod; Irish potatoes, Bliss Triumph or Katahdin; onions, use sets or plants for the Bermudas and shallots for the Creole; mustard, Tendergreen or Southern Curled; turnips, Purple Top or Shogoin; radishes, Scarlet Globe or Icicle; and for something new Hutchison suggests you try the Great Lakes variety of lettuce.

For the second planting, you can include semi-hardy vegeta-

bles that are able to withstand a light frost; carrots, Chantenay or Danvers Half Long; cabbage, Jersey Wakefield, All Head or Copenhagen Market; beets, Detroit Dark Red or Crosby's Egyptian; Swiss chard, Lucullus.

For the third planting, you can include the hardy vegetables. They are the ones able to withstand a heavy frost; collards, Georgia or Louisiana Sweet (use plants); English peas, First and Best (smooth) or Marvel (wrinkled); lettuce, (head) New York No. 12 or Imperial; spinach, Bloomsdale Savoy (crinkle), or Giant Noble (smooth); and another planting of onions is in order, says Hutchison.

The suggested dates for first planting are August 15-30; for the second, September 1-15 and

for the third, September 15 to October 15. These suggested dates according to Hutchison are for Central Texas and in North and Northwest Texas earlier plantings should be made while in the southern part of the state plantings can be made at a later date.

Hutchison says, it is still hot in August and the soil will dry out very rapidly after you have made your plantings. If you'll cover your planted rows with boards or old sacks, it will help keep the soil cool and conserve moisture. But don't forget to remove them when the plants start coming up, he cautions. Don't cultivate deep but stir the soil after each shower or irrigation, says Hutchison.

School Bells Will Mark Opening of New Chapter in Lives of Many Rural Children

The ringing of school bells will soon start thousands of rural boys and girls back to school, and many will be leaving home for the first time. This first day at school will be long remembered not only by the pupil but probably by dad and mother as well.

A complete physical check up is in order, she says. Special attention should be given to the ears, eyes, teeth and throat. If it hasn't already been done the child should be immunized against diphtheria and vaccinated against smallpox.

even save your life, should you ever develop this disease.

Here's how it works: Last year the Postoffice Department in Washington decided to aid the national fight against cancer by authorizing a simple mailing address for all requests for cancer information.

Why don't you write to "Cancer" today? Do you know the seven danger signals of a disease? "Cancer" will tell you.

Agriculture Show Will Be Outstanding At State Fair

The dirt farmer of Texas will achieve a large measure of glamour in the fresh, living Agriculture Show now being readied for the 1949 State Fair of Texas, Oct. 8-23.

"There will be more actual growing plants exhibited at the Fair this year than at any fair anywhere before," declared E. C. English, chairman of the Fair's Agriculture Committee.

A fabulous exhibit of more than 40 varieties of Texas grass alone is worth a trip to the fair, Mr. English said.

The leaves on rose plants infected with mildew have a grayish white appearance as if flour or ashes had been dusted on them.

Premarital Health Examination Law Effective Oct. 15

County Clerk Horace O'Neal has been advised by the Texas State Department of Health of certain provisions of the Premarital Health Examination Law passed by the Fifty-First Legislature.

The law, which becomes effective Oct. 15, 1949, provides that every man and woman marrying in Texas must obtain a medical examination which includes a standard blood test for syphilis from a physician before a marriage license can be issued.

The new law contains one exception, which provides that on joint application by both parties to marriage, any judge of a county or district court within the county in which the license is issued may waive the requirements as to medical examinations and laboratory tests and certificates and may order the county clerk to issue the license.

Chaplain Robert Barnett Writes of Work in Berlin

Capt. James R. Barnett, Jr., of this city, who is currently stationed with U. S. Army forces in Berlin as Chaplain, is finding his work interesting in that zone, according to a letter to The Free Press.

Things are getting down to normal now, since the airlift has been completed. We have most everything we could ask for and more too. Potatoes are very cheap in Germany, bringing less than one mark for 10 pounds.

We hear very much concerning the Russians here which we are not allowed to write except through censorship. People disappear and no one knows just what happens to them.

The Russians do not believe in God, but in Lenin and in Stalin. When you pray they laugh and say you are crazy. They tried to take a picture of our Lord from John, but John told them they would have to kill him to get it.

We have really enjoyed our automobile since it arrived; it has made living here much more convenient for us. We are free to drive our car anywhere in the American, British and French sectors of Berlin.

Friendship HD Club Meets With Mrs. Ted Jetton

The members of the Friendship H. D. Club met Monday night, Sept. 5, in the home of Mr. and Mrs. Ted Jetton for an ice cream supper.

Home Gardeners Should Plan Fall Planting Now

It is time to begin the fall garden. Recent rains over most of the state should make it possible to get the gardens off to a good start, and you'll want to include in the early plantings, Irish potatoes.

Home gardeners may select seed potatoes from the spring crop, says Hutchison. Small potatoes may be planted whole. Larger potatoes should be cut into pieces about half the size of hen eggs.

Seed potatoes from the spring crop must have a rest period of six weeks from time of harvest to planting time. It is often a good idea to sprout the potatoes before planting and Hutchison says this can be done by spreading them on the ground in a cool shady place.

The rows should be three feet apart. Drop the seed potatoes about 14 inches apart and cover three to four inches deep as soon as possible.

After the potatoes are up to a stand, they should be worked every few days. If the plants will during the day, it is an indication they need water and should be irrigated.

Full grown potatoes keep well in storage, but don't let them freeze. Cellars and sweet potato curing houses can be used for storage. The cotton seed house on the farm is a good storage place.

Public service organizations, schools, churches, labor unions, business groups, and many other organizations and individuals are cooperating in the drive to cut fire losses.

With fires burning up two million dollars in property and taking approximately thirty lives every twenty-four hours, fire departments and civic groups in nearly 10,000 communities are organizing wide support for the 1949 Fire Prevention Week observance, Oct. 9 to 15.

EMERGENCY POLIO FUND DRIVE LAUNCHED OVER NATION TODAY

People of Haskell county were called on Thursday to join in a nationwide all-out financial fight against polio.

The plea was issued jointly by A. C. Pierson, chairman of the Haskell county chapter for Infantile Paralysis, and J. M. Crawford, who is slated to succeed Pierson in that post.

The nationwide emergency fund drive was announced in a coast-to-coast radio broadcast Wednesday night by Basil O'Conner, president of the National Foundation for Infantile Paralysis.

Pierson, who has headed the county chapter for some time, and Crawford, incoming chairman, Thursday expressed their fullest confidence that Haskell county people would respond generously to the emergency fund. "Our citizens have a first-hand knowledge of the great assistance rendered by the National Foundation in the fight against polio," Pierson said. In Haskell county alone, the Foundation has given unlimited assistance in the care and treatment of seven polio cases during the past two years, and has advanced more than \$10,000 to the local chapter.

The emergency drive has been necessitated because of the current polio epidemic, it was explained. "Proceeds of the drive will go to supplement funds of local chapters which have been exhausted in the expense incurred in the care of patients of the 1949 epidemic," Crawford said.

All of the money raised during this emergency campaign, to extend through Sept. 15, will go to patient care, Crawford pointed out. "Reliable estimates are that

a total of more than \$1 million will be needed by Texas chapters during 1949 from the National Epidemic Aid Fund," he said.

Contributions to the drive are to be mailed to "Polio", in care of the local postmaster. The postmaster will in turn forward the unopened envelopes to the postmaster at Dallas. They will be opened in Dallas. Only information available concerning amount of donations will be on a statewide basis.

Fair Plans—

(Continued from First Page)

to be a popular show at the area exposition.

Plans are progressing for this year's parade which will officially open the Fair at noon on Thursday. Expected to be the best in the history of the Fair, the parade is under the direction of W. O. Holden, Stanley Furrh and R. P. Hattox. Invitations for participation of entrants in the parade are being mailed at this time, and a personal visit by the committee to all area schools and colleges will be made early next week.

School children's day at the Fair is being expanded to handle an expected record attendance. Thursday has been designated for this day and all area school children are to be admitted free. More than 8,000 school children attended last year when many of the schools of the section were dismissed.

Scheduled for an early morning breakfast at the Texas Cafe on Wednesday morning is a meeting of all department heads and superintendents and their assistants for a final meeting before the Fair opens.

A discussion and report of exhibits, displays, rules and policies of all departments will feature this meeting. Also exhibit space for the various departments will be allocated at this meeting. Departments to be represented include all branches of agriculture and livestock, including adult, F. F. A. and 4-H and open classes; all branches of the Women's divisions which include adult, junior, girls 4-H and future home-making clubs, art and curio departments.

A final decision on all judges for the Fair will be made at this meeting.

Presiding over the Friday session will be E. R. Lewis, association president. In charge of the Wednesday meeting will be Mrs. Vee Howle, head of the Women's Division, who is county home demonstration agent; and F. W. Martin, county agriculture agent.

CARD OF THANKS

We wish to take this opportunity to thank each of our friends and neighbors for the kind deeds shown during our hour of sorrow. We especially thank those who brought food, and for the lovely floral offering.

May God bless each of you.—The E. B. McDonald Family.

M. V. Bland, Area Resident Since 1915, Dies At Stamford

M. V. Bland, 80, who came to Haskell county in 1915, died Friday Sept. 2 at the family home in Stamford. He had been in failing health for several years and had been critically ill for the past few weeks.

Funeral service was held Sunday at 2:15 p. m. at the First Baptist Church, Stamford, of which

he was a member. The pastor, Rev. Miles B. Hays, officiated, and burial was in Highland cemetery near the grave of his wife who died in 1942. Kinney Funeral Home was in charge of arrangements.

Mr. Bland was born in Dallas County, Arkansas, on July 13, 1869. He married Mary Ann McCombs at Ennis Jan. 11, 1894. They lived at Ennis for a time and then moved to Dublin and from there to Haskell County in 1915 and on to Jones county in 1927, and to Stamford in 1938.

Mr. Bland is survived by three daughters, Mrs. B. H. Connally, Misses Orié Lee and Valentine Bland, all of Stamford; two grandchildren, D. P. Connally of Abilene and Nauta Faye Connally of Fort Worth, and a brother, W. P. Connally of Stamford.

VISITS PARENTS HERE

Mr. and Mrs. Jesse B. Smith had as their guests over the week end their sons, J. B. Smith and family of Fort Worth and Mr. and Mrs. Chas. H. Smith of Fort Worth.

Bowie R. Andrews, Former Resident, Dies In Ft. Worth

Bowie R. Andrews, 59, former Haskell resident, died Sunday night, August 23, in a Fort Worth hospital after a brief illness. He was employed as a welder at Con-vaire plant in Fort Worth. He came to Haskell with his parents when a boy, but had made his home in Fort Worth for the past 36 years.

He was a member of the Baptist church.

Survivors include his wife, Mrs. Imogene Andrews; two daughters, Mrs. Helen Littlefield and Mrs. Mildred Crittenden; his mother, Mrs. Minnie Ruth Andrews, all of Fort Worth; four sisters, Messdames Nellie Elder of Arlington, Beulah Lackey of Haskell, Fay Allen of Cameron, Willie May of Fort Worth; and five brothers, Sam Andrews of Paradise, H. J. Andrews of Morton, Walter and Johnnie Andrews of Fort Worth, and E. W. Andrews of Haskell.
