The real need for a Farm Labor Housing complex to be constructed here was brought to light during a meeting held in Bailey County courtroom last Friday evening.

Many questions were answered concerning the repayment of the Farmer's Home Administration loan, the membership base, donations to the cause and the governing of the complex residents.

Arch Fowler, district supervisor of FHA and Clinton Kennedy, manager of the local office were present to answer the farmer's and businessmen's questions concerning the loan, and Beuford Scarbrough, manager of the Texas Employment office here, explained the crisis facing the farmer on labor shortage due to lack of housing.

Irvin St. Clair, a member of the steering committee, presided at the meeting.

The Farm Labor Housing project came into being here some two years ago and has been reactivated in recent weeks as the problem of adequate housing increased.

Farmer's Home Administration has approved a loan of \$550,000 for erecting the complex, to be repaid over a 33-year period at five percent interest rate.

However, it has been pointed out that Bailey County must raise \$20,000 to acquire the land and for operational expenses for the first year.

Members of the steering committee are striving to get 100 members to invest \$200 each in the local fund as stockholders in order that the loan may be obtained.

Fowler pointed out to the group, "These members of the non-profit cooperation, through a board of directors, will operate the housing program. By this, he explained, "they will set the rules by which the farmer will be assured that the hands he puts in the dwelling will be there for his use when he goes to pick them up to work in his fields."

In addition to the membership, called stockholders, any person who wishes to help with obtaining the structure here through adding to the financing fund, may make a donation to the cause.

Clinton Kennedy said the complex is designed to contain 96 two-family apartments and dormitory space for 50 single men. The family apartments will be partially furnished with built-in stoves, refrigerators and bunk beds. The dormitories will have a central cooking and eating place and bunk beds.

They are expected to rent for \$15 per week for the family apartments and \$20 per month for the dorm with utilities paid on both.

The proposed construction site is in the south part of the city just east of the Boy Scout Hut.

The structure proposed is to be twelve two-story buildings containing eight apartments each. The thirteenth building will be the dormitory.

FHA representatives explained that the membership is to elect a board of directors each year and a manager will be hired to make day-to-day decisions and care for the structure.

"As a condition of getting the loan," Kennedy said, "the membership would have to agree on an assessment, in the event that enough money did not come in through the rent, to pay operational expenses and make the loan payment in any given year."

"However," he continued, "after the board of directors make an assessment for deposit, an individual would be required to pay only this one assessment."

"After paying this assessment, a member would then be free to drop out of the organization without further liability."

This statement clarified the thinking of some that if the project would fail to be self-supporting project it is believed to be, that the membership would not be liable for the repayment of the \$550,000 loan.

Therefore, the larger the membership, the smaller the assessment.

District Supervisor Fowler said "Should the project completely fail here, then FHA would sell the building at auction."

"However, there is seldom a failure of this nature where there is soil, water and crops which demand as much labor as is used in Bailey County."

LABOR CONDITIONS
Thinking ahead toward the vegetable and field crop harvesting time, and even before to the time when care of the 1968 crop could make a tremendous difference when the farmer is actually faced with this need this year," Beuford Scarbrough, Texas Employment Commission manager, pointed out.

Scarbrough handles the majority of migratory labor, numbering 2,400 last year, to work in Bailey County fields and the demand will be even greater this year, he pointed out, "as at least 1700 acres of cucumbers are to be planted, in addition to increased tomato acreage and other vegetables which take migratory labor."

"Without adequate housing for these laborers, they are not coming here to work. Texas is the supplier for 36 states for this type of labor."

"Without this housing, why should these workers stop here? They can go on to other states where adequate, modern housing areas are waiting as accommodations.

Councilmen, School Trustees To Be Elected Saturday

A portion of the day Saturday, April 6, should be set aside for Bailey county residents to exercise their American rights . . . to vote for the candidate of their choice in elections to be held within the city and county.

The elections will be for placements on the school boards in Muleshoe and the county and to elect councilmen to two posts.

Candidates for city council are Alex Williams, Gene Winingham, Lindell Murray and Roy Dyer.

Ballots may be cast at City Hall from 8 a. m. to 5 p.m. In school board election for Muleshoe Independent School District, seven candidates are on the ballot, two of which are to be elected for two posts on the board.

Candidate Kenneth Precure, John W. Gunter, Jr., Roald (Buck) Johnson, Dillard Morris, Carl Bamert, Don Bryant and Joe Smallwood.

Muleshoe Junior high school is the polling place for this election.

For Commissioner's Precinct 1, Robert Blackwood, is the only name which appears on the ballot for County School

Trustee and for Commissioner's Precinct Four, Bill Sower is a lone candidate for County School Trustee.

Candidates for two places on the ballot for Bula Independent School District Board of Trustees are Edward Crume and E. M. Autry.

One-Man, One-Vote Rules Supreme Court

"It could conceivably cause far-reaching changes in all governing bodies," was the initial comment by County Judge Don Cihak when asked about the new Supreme Court ruling concerning one - man, one - vote, or, in other words, redistricting of county precincts.

The decision, originally brought about by what has been called the "Midland Suit," was handed down by the U. S. Supreme Court, Justice Byron R. White, who spoke for the Court said: "Although the forms and functions of local government and the relationships among the various units are matters

of state concern, it is now beyond question that a state's political subdivisions must comply with the 14th Amendment . . .

"A town, city or county may no more deny the equal protection of the laws than it may abridge freedom of speech, establish an official religion, arrest without probable cause or deny due process of law."

Bailey Demos Lends Support To Connally

Concerning President Lyndon B. Johnson's statement this week that he would not be a candidate for President in the coming election, Bailey County Democratic chairman Harvey Bass said: "I believe that this announcement came as quite a blow to America. We were stunned that a man as strong as President Johnson is will not be a candidate."

"I do not want Bobby Kennedy for President," Bass continued, "and it is my belief that all our area congressmen and representatives will come out against him."

"I would also like to see Governor John Connally announce as a candidate and believe he would have the full support of the local party."

"I believe that the President proved himself to be a great man and a man who is in earnest about doing all in his power about the Vietnam war."

"It is my true belief that a majority of the nation is disappointed," Bass concluded.

Crop Insurance Improvements

Improvements in the All-Risk Federal Crop Insurance program on irrigated grain sorghum in Bailey county for 1968 were announced today.

Leon Stancell, FCIC representative from the District Office at Lubbock, says the program has been readjusted to more adequately reflect the demands of farmers and the insurance experience here.

On a 33-county basis where the changes have been made, readjustment for grain sorghum has resulted in an eight percent average increase in the hundred-weight guarantee while premium rates have been decreased 7.6 percent on the average.

Stancell is now in the county for a limited time explaining provisions of the FCIC insurance programs to farmers and taking applications. Insurance also is available on irrigated cotton.

Two New Records Set By Eighth Grade Team

Although they were one point away from first place at the Springlake meet last Saturday, Mulshoe's eighth grade track team set two new school records during the meet.

With more than 20 teams from many schools entered in the meet, the Mulshoe team made 85 points, as compared with 86 for Floydada.

One new school record was set by a team of Lee Clodfelter, Randy Field, DeWayne Williams and Sammy Finch in the 440-yard relay. They ran it in 48 seconds flat.

Second new school record was in the 880-yard relay when a team of Lee Clodfelter, Randy Field, Sammy Finch and Armando Parras ran it in 141.4.

In the 220-yard dash, Randy Field ran second, after a preliminary time of 23.9 which is considered amazingly good time.

land, amount of risk involved and estimated costs of production. FCIC by Congressional Act is allowed to insure only production costs or the farmers' investment in his crop.

When crop production falls short of the guarantee due to drought, excess, heat, flood, too much moisture, insects, disease or any other natural cause, Federal Crop Insurance picks up the tab paying a cash loss sufficient to meet the guarantee.

Some additional benefits gained by Bailey County farmers through the insurance, Stancell says, include premium discounts for good experience, use of the protection as additional collateral to assist in securing the credit financing so vital in today's farming and added stability to individual farming operations.

A shortage of seat belts may develop here because automotive equipment suppliers are reluctant to build up a stock of belts for fear there will be no market for them after this year's inspection program, so most suppliers are holding their stock to a minimum.

Therefore, it is urgent that motorists have vehicles inspected now to be assured of obtaining the belts.

Captain Johnson called attention to the fact that since the beginning of the inspection program in 1951, vehicles having

Initial reaction of county officials to the ruling indicated that few if any counties will escape some move to bring about redrawing of commissioner precinct boundary lines.

According to early reports, county officials feel that voluntary action will be taken by county governments.

Judge Cihak said, "This county could be affected by the decision as it is entirely conceivable the county will be asked to re-district to allow one commissioner's precinct to show the same population in relation to another precinct."

Two cases of long-standing attempts to re-district larger populated counties had much attention focused on them by the Supreme Court decision. One, which is patterned after the Midland Suit, is the six-year-old Moore County suit which was filed in 1962 by Precinct 1 Commissioner Don Hatter and 14 other Moore County residents.

Reports indicate the Moore County suit is seeking the first redistricting of commissioners precincts in the 75-year history of the county.

The case had been delayed until the decision was reached

on the Midland suit. Action is expected to be taken now at the regular county commissioner meeting on Monday, April 8.

A two-year old case in Hutchinson County for redistricting is under study at this time by County Judge Norman Coffee. This suit asked for the redistricting include the removal of the county seat from Stinnett to Borger.

Food Packages

COLLEGE STATION -- Food packages can help the consumer, but they can also deceive her. They protect food and add buying and storing convenience; some are to eat from, cook in or reuse.

But packages in certain colors and shapes look larger and some are not always full. Gwendolyn Clyatt, Extension consumer marketing specialist, suggests the wise shopper look at the net contents on the package. Contents in the same size packages may differ.

Consumers can help stop package deception by reporting to the store manager misrepresentation and any attempt to deceive, says the Texas A&M University specialist.

And stop buying that brand. Purchase of a product is a vote for it with the manufacturer, so make choices carefully.

Loaves Misery

A man walked into a restaurant, ordered three hamburgers, two steaks, a shrimp salad, fried rice, a side order of dill pickles and ice cream.

The waitress was amazed. "Boy!" she exclaimed. "You sure like food."

"Matter of fact," said the customer. "I hate it. I'm just crazy about bicarbonate of soda."

HALLMARK ART CONTEST WINNER---Senior art students of Muleshoe High School participated in the Hallmark Art Contest which was held in Lamesa on March 22-23 when the Federated Clubs had their convention. Beth Black, an entry in the contest and daughter of Mrs. Elizabeth Black, won first place on her drawing at the convention.

Recipe of Week

Today's working wives and busy mothers often haven't time to produce company dinners as frequently as they'd like. But everyone welcomes invitations to coffee and dessert parties and they're especially good ways to entertain friends on week-nights when you want to avoid lots of late evening cleanup. An electric percolator is a handy aid for this kind

of informal entertaining, and makes itself right at home at the scene of the party. Now you can select a quality coffee made especially for electric percolators and your guests will compliment both your coffee and your dessert.

One dessert that's always a hit is Lemon Angel Pies, which are meringue shells filled with a fluffy lemon pudding. Buy

the meringues from a bakery, or if you have time the night before, make your own, using egg whites remaining from the two yolks that go into the making of the packaged lemon pudding and pie filling.

LEMON ANGEL PIES
1 Package 9 3/4 oz. lemon pudding and pie filling

1/2 cup sugar
1/4 cup water
2 egg yolks or one egg
2 cups water
1 cup prepared whipped topping or whipped cream
6 baked meringues, cooled.

METHOD
Combine pie filling, sugar and 1/4 cup water in saucepan. Add yolks or egg and blend well. Then add 2 cups water. Cook and stir until mixture comes to a full boil and is

thickened - about 5 minutes. Remove from heat. Pour into bowl and place wax paper directly on surface of pudding. Chill. Beat with rotary beater until smooth. Fold prepared whipped topping into filling. Spoon into meringues. Makes about 3-1/2 cups filling or 6 servings.

"From Milan, Italy, we continued to Venice. Here, we toured the city via gondolas on the streets. We visited the church of St. Mark, the Papal Palace and saw the flight of pigeons. We visited the glass and lace factories and browsed through the shops.

"Leaving Venice, on the Mediterranean Sea, we continued once more over the Alps to Innsbruck, Austria, scene of the former winter Olympics. From there, we drove to Munich, Germany, through Stuttgart and arrived back in Zweibrücken.

Washington Report

From Congressman

BOB PRICE 18TH DISTRICT, TEXAS

1022 LOGANWORTH OFFICE BUILDING, WASHINGTON, D. C. • 222-7306

Crime, lawlessness, and the implied threats of more violence this spring, and summer continue as the top domestic problem facing the nation.

In a recent message to Congress, the President pointed out the problems of the Nation's Capital and urged home rule for the District of Columbia. His message said of the Capital, "Washington--the city of noble monuments, quiet splendor and the close touch of history -- is truly the nation's pride."

But there are many who live in the District of Columbia who feel something less than pride in the Nation's Capital. At the cashier's desk in a suburban drug store, I stood behind a lady who was comparing her experience of being held up and robbed with the cashier who had recently been hijacked at closing time by three armed men. The lady was payroll clerk for a university whose \$26,000 payroll in cash had been taken from their office at gunpoint.

Serious crime is up 17% over last year in major cities including Washington. In the city of "quiet splendor" where murder, rape, robbery, and assault are so common place that they are buried back in the third section of the newspaper, the news media reported at the same time that Howard University, a federally supported institution, had been taken over by militants who demanded the resignation of the University President and creation of a "black democratic university" under a new president.

Other news stories noted that union officials said they may take drivers off bus routes where holdups have been most frequent. There have been more than 130 holdups of bus drivers in the city so far this year. There were 326 last year.

In February, the President delivered a crime message to Congress indicating that he not only is concerned but also that he finally means to do something about the problem of crime in the nation. I welcome the President's pledge to fight crime but have some doubts about the effectiveness of his proposed program. An analysis may reveal more of a political document than a much-needed plan for nation action.

Crime must be brought under control and substantially reduced. Republicans last year developed and introduced specific legislative proposals designed to control and prevent crime and lawlessness. The Republican Task Force on Crime, on which I serve, has drafted legislation and substantially improved administrative anti-crime legislation in this and the previous session of Congress. This includes an anti-crime legislation in this and the previous session of Congress. This includes an anti-riot bill and other legislation including amendments to the Law Enforcement Assistance Act of 1967 which was passed by the House but has not been acted on by the Senate. Wire tapping legislation which has been endorsed by the Task Force has received almost universal endorsement -- except from the U. S. Attorney General.

after adjournment of Congress in 1966. But he signed a similar bill at the last minute after Congress adjourned in 1967.

Apparently there has been a change in attitude and hopefully recognition of the inadequacies of measures taken so far to effectively combat the continuing rise of crime.

Crime is an issue in 1968 because the President did not make it an issue in 1967 or 1966 or 1965 or 1964. Since 1960, the reported rate of crime has increased over 88%.

There has been an obvious failure during this period in the Administration of justice and the day of reckoning is now here.

AIDS FOR FIGHTING WEEDS IN COTTON

Farmers have a wide choice of chemical and mechanical aids for fighting weeds and grass in their cotton this year. Fred C. Elliott, Extension cotton specialist, says a control program using chemical and mechanical means is not only cheaper but faster and easier to carry out than the old hand hoeing method. He suggests a visit with the local county agent for full details on a complete weed and grass control program.

Growers bought every pound of Planavin® Herbicide they could get their hands on last season. Read why.

Planavin is the cotton-soybean herbicide that gives you more than your money's worth.

Shell's Planavin® Herbicide gives you more than just excellent preemergence control. Nothing on the market does a better job.

It had to be more than just another good weed killer in order to break in against established competition. Growers found out *how good* last season. Planavin proved itself under the worst weather conditions in years. It held the fort against most annual grasses and many broadleaf weeds—right through the early period when control really counts. Growers got what they paid for—freedom from weed problems during the time when weeds can strangle young cotton and soybeans. Plus a sound control base that makes season-long control programs simpler and more economical.

Planavin also gives you a bonus. It frees you from immediate incorporation. Takes the pressure off. And it can save you hours of application time.

With Planavin you can spray by ground or air. You can use large rigs, wide booms. Covering large acreage fast saves you hours. There's no waiting for incorporation equipment to catch up. No downtime for custom applicators. The reason? Planavin doesn't require immediate incorporation. You can take your time. Even a few hours of exposure to air and sun won't wipe out your weed control when you use Planavin. Note: When you do incorporate, keep it shallow—no deeper than 1 to 1½ inches. Don't bury your Planavin below the sprouting weeds.

Get Shell's Planavin® Herbicide early—to keep the pressure on weeds and off you.
