

The Cotulla Record.

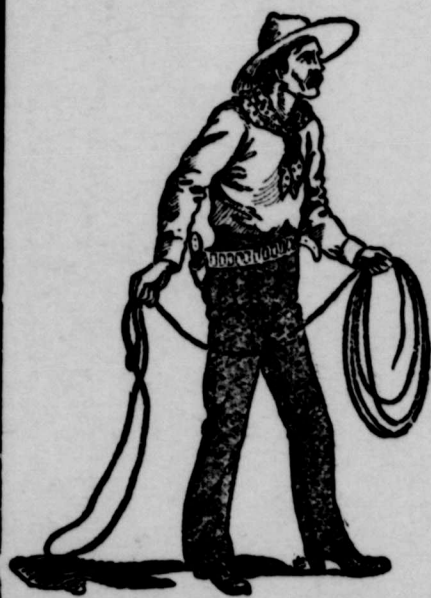

VOL. 6. NO. 28

COTULLA, TEXAS, SATURDAY, OCT. 3, 1903.

\$1. IN ADVANCE

MEN'S FURNISHINGS:

When it comes to talking about these things, we can't talk strongly enough. The neatness, cheapness and general excellence of those goods cannot be told on paper. You can appreciate their worthiness only when you see them, and we have such an assortment. 'T will do you good to see this stock, even if you don't need a thing. Don't be bashful about bothering us; we like to be bothered.

Supplies For Cowboys

We make it a point to please Cowboys. Stetson Hats, Gloves, Boots, Overalls, Duck Jackets, Shirts and anything else you want. We want your trade because we have the goods you are looking for and will sell them to you at prices you don't mind paying.

Be sure that you ask to see a pair of the famous San Angelo Cowboy Boots. They are the genuine article and can't be told from boots that you have been paying \$14.00 for. Our prices \$5.00 and \$7.00.

One Price Store.

IT SEEMS THE FASHION

in some stores to charge as much as they can for a thing, no matter what it is worth. Now, we don't do that. We are not claiming any extraordinary merit for ourselves, either. We are simply honest. We sell furnishings for every one. We sell for the man who wants his tastes satisfied, irrespective of cost, and for the man who doesn't want to spend his last cent on a tie. Satisfaction to all.

Wear a Suit of our Underwear

and you'll never care for any other kind. Soft and fleecy and full of comfort, with buttons sewed to stay, and stitches that would not rip under any reasonable strain, these comfortable and healthful garments cost no more than the unsatisfactory kind.

When we sell anything we want the customer's friendship. There is a mutual understanding always that you get your money's worth. If you think you don't you're entitled to get more goods for nothing, or you are entitled to your money back.

MOST COMPLETE LINE OF TEXAS.

MORE THAN HALF A HUNDRED YELLOW FEVER CASES AT LAREDO.

Malady is in Mild Form and the Death Rate is Exceedingly Low.

THREE HUNDRED CASES REPORTED IN NUEVO LAREDO.

FEVER ALSO EXISTS AT COAL MINES ABOVE LAREDO—ALL POINTS ARE MAINTAINING A SHOT-GUN QUARANTINE—TWO THIRDS OF AMERICAN POPULATION OF COTULLA HAVE FLED.

The Yellow Fever situation at Laredo is certainly not very encouraging. Last night at midnight there were 51 cases.

Although the physicians in charge have been very successful in treatment, only four deaths having occurred in all, they seem powerless to check the spread of the disease. From four to eight cases develop every day and now the list is swelled to more than half a hundred.

In Nuevo Laredo, just across the river from the Texas town over three hundred cases is reported with from 2 to 5 deaths per day. Much complaint is being made as to conditions over there. The Mexican physicians do not believe in the mosquito theory and no patients are protected by mosquito netting. It is feared that all efforts to stamp out the fever on this side will be futile until the rotten conditions on the other side are remedied.

All counties are maintaining a shot-gun quarantine and every effort is being made to prevent the spread of the fever.

FIVE CASES AT COAL MINES.

The fever has broken out at the Coal Mines, 30 miles Northwest of Laredo. Yesterday Dr. Tabor reported five cases there and two deaths. Plenty of physicians are attending to matters there and Dr. Tabor says he has no fear but

that the spread can be checked.

FLEEING FROM COTULLA.

Yellow Fever at Laredo has brought business almost to a standstill at Cotulla. People have been fleeing for the past ten days and the streets now present a deserted appearance. It is estimated that fully two-thirds of the American population have fled.

Although there is not a case nearer than Laredo, the people seem to have a mortal dread of the fever and do not intend to take any chances. Many have gone to higher altitudes, while the majority have gone to distant ranches or are camping.

NO FEVER AT ENCINAL.

It has been rumored that a suspicious case of yellow fever existed at Encinal. We questioned Dr. J. M. Williams, County Health Officer, in regard to this and he stated that the rumor was absolutely false, and without any foundation whatever. The citizens of Encinal are using every precaution against the introduction of the fever into our county and are giving the guards every assistance possible in guarding the line. The guard force was doubled up this week.

WILL NOT USE SOLDIERS.

Washington, D. C., Oct. 1.—Fearing an epidemic of yellow

fever a number of persons living along the Rio Grande have appealed to the War Department for the establishment of a "shot-gun" quarantine, and that soldiers be ordered to the duty. While the officials of the department are alive to the necessity for action to prevent the spread of the disease they have concluded that the present outbreak does not justify such radical steps as contemplated by the request for the troops.

SCHOOL CENSUS IN HIDALGO.

Austin Statesman.

The officials in the various state departments encounter strange things sometimes in statistics, history and social economy.

For instance, yesterday in the school warrant department in the comptroller's office the last census returns give Hidalgo county a population of 6837, while the scholastic census furnished that by the officials of that county show 2691 school children between 7 and 17. The per cent of children between these ages in the state is 20, while in Hidalgo county it is 39 per cent.

On this basis the county will receive \$13,455, while Jackson county, with a population of 6094 reports a scholastic population of 883 and receives \$4415, and Stephens, with a population of 6466 reports 1519 children and receives \$7595 as their part of the state appropriation for the support of their public schools.

These two counties have been selected for the reason that they report about the same general population, Jackson being only 743 less and Stephens only 371 less. The combined population of Stephens and Jackson is 12,560, their combined scholastic population 2492, or 283 less than Hidalgo. Stephens and Jackson receive from the state \$12,010, while, as noted, Hidalgo receives \$13,455, or \$1455 more than both Stephens and Jackson combined.

THE PRESIDENT AND THE LABOR UNIONS.

Special Correspondence to Record.

I said, some time ago, in this correspondence, that the President had "budded in" to union labor by his order reinstating a man named Miller in the Government Printing Office, who had been "fired" at the request of the Bookbinder's Union, and by his further order that the Government Printing Office and all other departments of government labor should have an open door, and that there should be no man discriminated against on account of the fact that he did not belong to some labor union. I also said at the time that it was up to the labor unions to make the next move. Well, they have made the move, and now the President is requested to move. It is up to him in such a shape that he must either fish, cut bait or get out of the boat. Some of the commentators on current events in this city are trying to make the people believe that this is a move on the part of Mark Hanna to get Roosevelt embroiled with the labor unions of the country and "do him" out of the nomination. Well, may be it is, but if so you can anger your life that the Hon. Marcus Alonzo Hanna will offer a strenuous denial of the same, for he is now engaged in the struggle of his life to get back to the Senate, and if it came to the ears of Roosevelt in an authoritative way that Hanna was putting the knife into him in any such way he would forthwith announce that the Federal patronage of the stage of Ohio would be under the control of the Senator Foraker, and that would eternally crucify Hanna, and he knows it better than anybody. Whoever put up the job on Roosevelt, is a "corker." He must either "fire" Miller and

take back water on his order "knocking" union labor or go under; must either "crawl" or be crucified. If he refuses the unions that now occupy the high seats in the offices of the government will say nothing, but they will saw wood, and their confederates on the outside will begin whetting their knives for the gentleman in the White House to be put in use at the election next year provided the democrats have sense enough to nominate a man who is acceptable to the labor interests of the country. It is folly for labor, Hanna or anybody else to talk of defeating Roosevelt for the nomination. He now practically has enough votes pledged to nominate him, and no matter how much the senatorial cabal against him desire to see him defeated for the nomination, he will, nevertheless and notwithstanding, be the republican standard bearer in the campaign next year. If the democratic party will nominate some man in whom labor has confidence the game is won, for no matter what action is taken by the President now, in this case in the Government Printing Office, labor is done with him and only waiting an opportunity to swat him good and hard. Verbum sap.

The "Iowa idea" and the blasts against the high tariff wall made from the bugle of the Hon. Joseph Weeks Babcock, of Wisconsin, which he swallowed in the last campaign, are not the only notes of discontent we hear nowadays from some of the former faithful of the protection propaganda. Congressman Lovering, of Massachusetts, is out in a statement that "in the case of all articles used in the manufacture of goods, which are exported, he would remove the duty altogether." He said in an interview, not long ago, that "there is a growing demand for relief from the tariff burden and it will make itself felt before long." He also said that he believed that "President Roosevelt meant to do the right thing, but he is surrounded

by all sorts of advisers who oppose tariff changes and is influenced by them. It seems to be the policy now to smother all agitation for tariff revision." So the President is struggling, poor man, "to do the right thing," but the bad men of the trusts have control of him and his policy now is "to smother all agitation" for tariff reform. That means that he has joined Hanna and the "standpatters" and for political reasons is content to "let well enough alone." It is well enough for the trusts and the combines, but high prices and extortion for the American people.

BROWN'S EARNINGS.

Bull Leader Has Made \$7,000,000 On September Option.

New York, Sept. 29.—With September cotton at an advance of 145 points for the day and more than 200 in two days, and likely to go higher, and with news of private settlements 100 points higher, the New York cotton exchange today saw the culmination of the most successfully carried out corner in cotton in the history of this market, a corner which has made for W. P. Brown of New Orleans, the leader, at the least calculation, between \$7,000,000 and \$8,000,000 in the September option alone.

Today, in one hour, cotton rose more than \$6 a bale, because men who had sold cotton by thousands of bales were not able to find it to buy to make deliveries tomorrow and had to buy it of the man to whom they had previously sold it. One house had to pay an advance of more than \$10 a bale. In order to prevent the market rising to absolutely ruinous figures many of these have made settlements within the last two days with figures a cent a pound above the market rate.

For the first time in the history of cotton selling on a world wide basis the market is absolutely cornered, if the market tells the truth.

Would "Sign" E. A. Poe.

Max Silver, manager for F. J. Mills, who publishes songs, is an earnest and conscientious man who does not desire anyone to suffer injury as a result of his literary or musical labor.

Monument to Arthur.

The dedication of a monument to be erected at the birthplace of President Chester Alan Arthur, in Fairfield, Vt., by the state of Vermont, will occur some day during the month of July, the precise day not having been fixed.

Leeches as Weather Prophets.

A common leech makes a good barometer. Fill a tumbler half full with water, put the leech into it and tie a piece of muslin over the top to keep the leech from getting out.

ONE IDENTIFIED THE SOUND.

And Also Gave the Teacher Some Excellent Advice. The morning had drifted along until the teacher found herself opposite that period of time on her program devoted to "phonics."

"And what do you think the sound of 'S' is like Jacob?" asked the teacher. Jacob (the school was in a suburb) thought it was like the sound the old gander made.

Otto jumped to his feet and announced that "if you are down by the station yet, when the train comes in and stops you can hear it make a lot of 'S's'."

The teacher readily discerned the hissing nature of escaping steam and commended Otto. It remained, however, for Annie, skinny and dreamy-eyed, to evolve the definition that lived.

Interposed John Kendrick Bangs. John Kendrick Bangs, riding in a Broadway surface car the other day, overheard two kindergarten youngsters discussing the question that has been giving Mr. Kipling so much trouble, viz., whether bananas grow up or down.

"Well, Miss Harrison says they grow down," said one tot, authoritatively. "And I've seen them growing up my ownself," said the other. It was a case of authority versus assurance, and the perky humorist diplomatically interposed.

Imagination and Illness. An interesting experiment was recently made by a Dr. Durand, in reference to the relative power of imagination of the two sexes. He gave to one hundred of his hospital patients a dose of sweetened water, and shortly afterwards entered the room, apparently greatly agitated, saying he had, by mistake, administered a powerful emetic. In a few minutes four-fifths of the subjects affected by the supposed emetic were mainly men, while all of the rest affected were women.

HOW TO SUCCEED IN LIFE.

Problem That is Always Good Subject for Discussion.

The problem of how to succeed in life will always excite human minds and human curiosity. Every successful man has, no doubt, a theory by which to explain his own success, and some of them have been generous enough to publish those to the world.

Dr. Nordau warns us not to despise money, which we should hardly have looked on as necessary advice in these days. He also considers that unusual qualities go to make money; qualities "not possessed by one man in a million."

Shoes as Nerve Restorers. Eastern travelers say the reason there are no nervous women in China is because they wear soft shoes.

MARRIAGE MADE A DIFFERENCE.

Contentment of Crusty Old Bachelor Was Appreciated.

In the yard of a large manufacturing plant up town there is a tall flag-pole which occasionally gives the firm some trouble by its pulley ropes becoming twisted and tied up so that it is impossible to move the flag.

It was a bitterly cold day, and the courage, skill and endurance he displayed were remarkable. On the slender pole he climbed, and after unloosening the flag and waving it from its elevated perch, he descended, to be greeted by the senior partner, a pessimistic old bachelor.

Navigation in Red Sea. The difficulties in navigating the Red Sea are such, from reefs and shoals, that no sailing vessel has passed the Suez Canal in twenty-seven years.

PEDIGREES MADE TO ORDER. Latest Form of Snobbery in New York's Smart Set. There is a shop in Fifth avenue, New York, which sells pedigrees and out-of-guns to those people who have seen too busy making money to keep their genealogies posted up to date.

After your family is located and traced as far back as possible the ingenious maker of pedigrees gets to work on the coat-of-arms. He pitches on the latest picturesque or notable thing done by "a forefather," and makes a device of it.

CLANG OF COLLEGE MEN. Words in Use Among Students on the Pacific Coast. To the collection slang words and phrases of the college men that was printed in the Sun recently should be added some of the slang used by students on the Pacific coast.

Recd's Advice to Congressman. When Thomas B. Reed was speaker of the house he was approached by a member who asked his aid in securing an appropriation for improving a stream in his district.

Goodnight. Goodnight, my burden Rest you there, The working hours are over, Four weight, that had to be my care-- And why, let time discover!

Death of Dickens' Son. News has just reached London of the death at Sydney, New South Wales, of Charles Dickens' youngest child, Edward Bulwer-Lytton Dickens, who went to Australia in 1862.

CAUTION.

This is not a gentle word—but when you think how liable you are not to purchase the only remedy universally known and a remedy that has had the largest sale of any medicine in the world since 1868 for the cure and treatment of Consumption and Throat and Lung troubles without losing it.
