Alamo Hero's Monument To Be Erected at San Antonio.

Combining beauty, grandeur and usefulness and representing
the patriotic devotion of loyal Texans to the memory of the pi-
oneers who fought for and won liberty, the Alamo Hero's Monu-
ment to be erected in San Antonio on ground hallowed by the
blood of the fortress' defenders, who preferred death to surrender
will be one of the greatest works ever undertaken in Texas.

Its graceful lines that emphasize rather than conceal the rug-
ged strength of the structure will mark it as a work of art; its
great height and the massive character of the base, its columns
of statury within and without, will give it grandeur, and its use-
fulness to the people of the whole state will be realized in its gal-
leries, its auditoriums, its museums, its art galleries, its halls for
state and national patriotic societies or association, and its indi-
vidual rooms for each county in Texas for the maintainance of
art or historical exhibits.

The Alamo Heroes' Monument will rise to a height of 802 feet,
the highest structure in the world. It has been designed along
modern lines to possess strength and stability such as would not
have been possible when the Tower of Babel was built, for modern
engineering has made possible feats that were impossible then,
or for that matter, were impossible only a generation ago; yet
with all the advance the science of engineering has made, this
monument will be one of its greatest accomplishments. It
will contain four spacious auditoriums, a museum, an art gal-
lerp and statuary hall, and a separate room for every county in
in Texas to be devoted by each to the encouragement of art and
history by the maintainance of exhibits along these lines associated
with that county. Near the top balconies will be provided for the
visitors that wish to take a look into neighboring counties through
large telescopes provided for that purpose.

The base of the monument will be of solid granite, rising to a
height of fifty feet. On this base will be placed at each corner
of the monument and arranged around the shaft, huge pillars,
each eight feet in diameter and seventy feet high, all of solid
Texas granite. These pillars will be surmounted by heroicized
statues of Travis, Crockett, Bowie and Bonham, the four great
leaders who died in the Alamo with the men in their commands,
who had followed them devotedly in the early days of the cam-
paign for liberty, and who did not hesitate to follow them even
to death. Above these statues will be placed the six flags that
have waved at different times over Texas, the Lone Star and
United States flags in the center, and on each side the flag of the
Confederate States of America, of Mexico, Spain and France.
Place will be made, too for an emblem representing the Indian
tribes that possessed this land before the Spanish adventurers
found their way here.

BURMEISTER WAS HONOR GUEST.

Representative of 80th District Favors Woman
Suffrage and Champions Cause.

Austin, Tex.,—As soon as he
could get away from his duties
here today, Representative Frank
H. Burmeister left for San An-
tonio, where he is to be an honor
guest at the Woman's Suffrage
Convention. He is scheduled to
address the convention at a
luncheon during the conven-
tion.

As a farewell blow in favor of
the right of suffrage being
granted to women, Mr. Burmeis-
ter, when the Allison resolution
providing full citizenship as a
qualification for voting, together
with Representative McGill of
Galveston, who is a bachelor of-
fered an amendment striking
out the word "males" and leav-
ing the ballot open to both sexes.
It was a well delivered blow in
favor of the principles Mr. Bur-
meister is championing, but cer-
tain men inimical to those pro-
visions discovered the attempt
to change the provisions of the
resolution, and the McMullen
County Representative was
thwarted for one of the first
times during this session of the
Legislature.

Representative Burmeister is
the man who discovered even
from a hasty perusal of the Sen-
ate bill that the committee
they had omitted Kleberg
County, which has been formally
signed. "The McMullen County
Dutchman," as his colleagues
lovingly call him, has discovered
many things this season that en-
abled him to put through as
many things and kill as many
things as any other member of
the Legislature.

Operated On For Appendicitis.

Miss Imogene Lacey was oper-
ated on Thursday morning in
San Antonio for appendicitis.
She stood the operation splendid-
ly and reports from the hospital
say she is progressing favorably.

MADEROS TO AID CARRANZA.

Governor Meets Alfonso Madero on Interna-
tional Bridge at Eagle Pass.

Eagle Pass, Texas, April 4—
Alfonso Madero, head of the
Madero family, held a long con-
ference with Governor Carranza
today, the two meeting by ap-
pointment at the international
monument on the bridge between
Piedras Negras and this city.

While neither gave out state-
ments after the conference, it
was learned from reliable sources
that Mr. Madero came to Eagle
Pass especially to see Governor
Carranza and that during their
talk he assured the revolutionary
leader of his support in the fight
he is carrying on against the
Huerta government.

Shortly after the conference
it was learned at Governor Car-
ranza's headquarters that he will
leave Piedras Negras in about a
to meet Governor Maytorena of
Sorora at some point convenient
to them both, probably in the
state of Sonora. It is believed
here that Governor Carranza will
be the bearer of the news of Ma-
dero's support to the constitu-
tionalist movement with the un-
derstanding that all of the forces
now in revolt against Huerta get
together in a unified movement.

Mr. Madero had conferences
with a number of prominent
Mexicans here.

S. H. Anderson Dies

At Laredo.

Sam H. Anderson died at La-
redo last Monday and the body
was carried to Carrizo Springs
for interment. Mr. Anderson
was well known in Cotulla hav-
ing made his home here for sev-
eral years. He was 46 years of
age and had been in bad health
for the past couple of years. He
leaves a wife and three sons and
the family have numerous friends
here deeply sympathize with
them in their loss.

LOCAL AND PERSONAL.

Jos. Cotulla and son, Will Co-
tulla, came up from the ranch
Wednesday. They shipped out
some fat cattle to the Ft. Worth
market.

Mrs. Judd Holt and little
daughter of San Antonio return-
ed home this morning after a
visit to her sister, Mrs. J. L.
Stedham.

Fine line of summer straw hats
at Brown's.

Don't forget the date Friday
April 11th. Go to Windrow's
and get some of the delicious
Armones Grape Juice that they
are giving free.

Lee Edwards and bride of La-
redo are here on a brief visit to
their grandmother, Mrs. Sue
Dunham. Mr. Edwards was
married March 22nd to Miss Ida
Schultz, of Bartlett, Texas.

Henry C. Fullerton returned
Monday from Waco where he
went as a delegate to the Texas
Sunday Teachers Association
from the La Salle county organi-
zation. Mr. Fullerton reports an
enthusiastic convention and a
profitable trip. Mrs. Fullerton
and children, who visited rela-
tives at Devine during his ab-
sence, returned home with him.

METHODIST CHURCH.

Regular services at 11:00 a. m.
and at 8:00 p. m. Sunday school
at 9:45 a. m. Classes for all.
A welcome to all.

T. N. Barton, Pastor.

NOTICE

Rev. H. W. Hamilton will fill
his regular appointment in En-
cinal tomorrow.

\$5 Brings Oliver Typewriter

Send \$5 for The Oliver Typewriter—the machine will come a-flying. The newest Model—No. 5—the regular \$100 machine—with no extra charge for Printype.
For the price of a good fountain pen you secure the World's Greatest Typewriter. You can pay the balance at the rate of 17 cents a day.
This irresistible "\$5 offer" is sweeping everything before it. The era of universal typewriting is coming. The triumph of the typewriter over primitive pen-and-ink has been brought about by the same machine that introduced visible writing.

The OLIVER Typewriter

The Standard Visible Writer

This is the typewriter whose high efficiency has made it the choice of the greatest firms and corporations. It is the simplest of all standard typewriters, yet the swiftest and by far the most versatile. The moving parts work freely in a solid metal framework, making the machine so strong that the hardest usage has no effect upon it.

NO EXTRA CHARGE FOR "PRINTYPE"

Most people prefer to have the machine equipped to write in Printype. This beautiful type is obtainable only on The Oliver Typewriter.
It is the greatest style improvement ever evolved for typewriters—the most easily read type in existence—the type which conforms to that in universal use on the world's printing presses!

Win Success With the Oliver

The Oliver Typewriter aids success-seekers in a multitude of ways. The real-life stories of achievement that center around it would fill volumes.

No matter what your work may be—in office, store, shop or home—The Oliver Typewriter will prove itself a great convenience and an actual money-maker.

It stands for order and system and success. It is the visible evidence of the progressiveness of its owner. Young people with brains, ambition and Oliver Typewriters are everywhere. Can you afford to let \$5 stand between you and success?

SEND FOR SPECIAL CIRCULAR AND ART CATALOG

Full details regarding the Oliver Plan—Purchase Plan, beautiful catalog and a specimen letter written in Printype will be sent you on request. Let this \$5 offer awaken you to your need of The Oliver Typewriter and the ease with which you may own it.

Remember—\$5 only and on comes The Oliver Typewriter!

ESSENTIALS IN PLANTING

One essential in starting the year's work is to start right. There are many things that belong in the category of "starting right," but none more essential than a good method for planting. There is sometimes a restless desire to plant various crops. This is often a fatal error. Corn is especially rigid in its requirements for suitable soil and

A THOUGHT FOR THE WEEK.

After all, morals sadly need buttressing in all of us. We are very much more trustworthy when we are amongst good people than when we are amongst bad people. A bad example is dreadfully contagious, even with the best of us. And it would not do for any of us to live too long in the environment from which some fallen girls have been rescued. It is almost terrible to think, aside from the providence and grace of God, how much our morals depend upon the watchful eyes of our neighbors.—Woodrow Wilson.

No woman is as truthful as her mirror.

MORE MADERO MEN SLAIN IN MEXICO

THREE ARE EXECUTED BY THE MILITARY AUTHORITIES.

Quiet in Northern Sonora and States Where Rebels Were Worsted by Federal Troops.

El Paso, Tex., April 1.—Three more adherents of the late President Madero have been executed. They were Juan Rosales, ex-estate senator; Jose Mena, former municipal officer; holder at Parral, and Juan Baca, capitalist.

Each was arrested on political charges at his home in Parral and removed to Jimenez, where the executions were made by military authorities.

Ex-rebel troops under Jose Inez Salazar have occupied the Casas Grandes district. Federal forces will be withdrawn. Salazar will become military governor, with headquarters at Casas Grandes, center of the American lumbering and Mormon colonial district, southwest of Juarez.

The arrangement was made through a telegraphic conference between Salazar and Huerta. The rebel general some days ago in a written proclamation denounced Huerta, insisting on the presidential claims of Emilio Vasquez Gomez. It is not made clear what the present position of Vasquez Gomez and his party will be.

TEXANS ARE ASKED TO AID

Governor Colquitt Issues an Appeal for Victims of the Flood.

Austin, Tex., April 1.—Governor Colquitt this morning issued a proclamation appealing to the sympathetic and charitably-inclined citizens of Texas for contributions for the relief of the flood sufferers of Ohio and Indiana. He requests that the contributions be forwarded either to him or to Mabel T. Boardman, chairman, National Relief Board, American Red Cross Society, Washington, D. C. The governor said that the flood waters of the Ohio river having inundated much of the country and many cities and villages in the states of Ohio and Indiana, causing the destruction of millions of dollars of property and the loss of many thousand lives, warrants the making of an appeal to the sympathetic and charitably-inclined citizen of Texas for contributions for the relief of the suffering.

"I make this appeal feeling confident that there will be a liberal response from the Texas people. We must never forget how nobly the people of other states came to the rescue of afflicted Texas communities in times past.

"I respectfully ask all the newspapers and boards of trade and commercial bodies in all cities and towns of the state to open subscription lists and request that all contributions be forwarded promptly by telegram either through me or directly to Mabel T. Boardman, chairman, National Relief Board, American Red Cross Society, Washington, D. C. Respectfully,

"O. B. COLQUITT,
Governor of Texas and Chairman Texas Red Cross Society."

YOU'VE NEVER USED THE BEST COFFEE unless you get "El Merito."

COLUMBUS' FLEET TO SAIL

College Students Will Sail Caravels to San Francisco.

Chicago, April 1.—Permission has been given to a group of Harvard University students to sail the three facsimiles of the vessels of Columbus, the Santa Maria, the Nina and the Pinta, from the Chicago lake front down the Mississippi river and to San Francisco by way of the Panama Canal.

Charles F. Stephenson, rowing instructor at Harvard, made the petition. He said the object would be to place the craft on exhibition at the San Francisco fair. He planned to have Harvard students and University of Chicago students man the vessels.

APPEAL FOR AID THROUGHOUT U. S.

SEVENTY THOUSAND STARVING PEOPLE IN THE MIAMI VALLEY TO BE FED.

RELIEF WORK BEING PUSHED

Cincinnati, Ohio, April 1.—Mayor Henry T. Hunt of this city has issued an appeal to the people of the United States asking aid for the flood victims in the Miami Valley. The appeal follows:

"Cincinnati is exhausting herself in attempting to feed 70,000 starving people in the Miami Valley. We must have financial and material assistance. Every city should appoint a relief committee to raise money both to us. Five hundred thousand dollars would not be enough to care for the situation. I will be responsible for the proper distribution of supplies and expenditures of money. This city is doing its utmost and the need is greater than it can supply. Let every generous American aid us as we would aid him if he were in our condition."

Maj. John A. Logan, Jr., of the quartermasters' department at Washington arrived here today to organize relief work for Dayton. Under his direction a special train was made up at Kenova, W. Va., which will be in charge of other army officers. An effort will be made to take this train into Dayton by way of Columbus, but it is feared it will not reach its destination.

Major Logan has already ordered army tents, blankets, etc., from St. Louis and other army depots to be sent to Cincinnati. He proposes to establish a line of communication from here to Dayton and, if needed, the engineering department is prepared to build temporary bridges across streams where the bridges have been washed away.

Immediately upon his arrival Major Logan consulted with Mayor Hunt to ascertain what relief measures had been taken. Major Hunt telegraphed Major General Leonard Wood at Washington, asking him to be prepared to send military assistance in case of flood at Cincinnati. He asks particularly for tents, coats and blankets.

Throughout the day trolley cars laden with food, clothing and filtered water went from here into the flood district. They were dispatched by the general relief committee.

WILD MAN IN A SWAMP

Negro Resembling a Giant Beast Is Caught After Pursuit.

Savannah, Ga., April 1.—A typical wild man of the swamp, a negro, covered from head to foot with black hair, was captured in a swamp on the edge of the Santee Swamp in South Carolina. The man was driven from the swamp by a freshet in the Santee. He hid in a barn near the edge of the marsh, and when discovered fought ferociously. He is evidently in a state of savagery. He can speak English intelligently.

How long he may have lived in the swamp is a matter of conjecture. Appearance would indicate that he had lived there for years. He is 6 feet tall and as strong as an ox.

How Foolish.
To suffer from rheumatism, Itch, Eczema, Ringworm, etc., when one 50c box of "Hunt's Cure" is positively guaranteed to cure or your money refunded. Every retail druggist in the State stands behind this guarantee. Ask your druggist for this guarantee with each box. You don't risk anything in giving it a trial.

JUSTICE COMES TOO LATE

Welch, Who Got a Life Term for Stealing a Piece of Bacon, Will End Days in Asylum.

Columbus, Ohio, April 1.—William Welch is no longer a convict. Governor Cox has pardoned him. But the governor cannot restore Welch's reason, which left him after five years behind gloomy prison walls.

Welch is 35 years old. He received a life sentence in the penitentiary for stealing a piece of bacon. Delayed justice has come to him but it is likely that the unfortunate man will have to spend the remainder of his days in the insane asylum.

A little more than five years ago Welch, a New York City waif, was arrested for the theft of a piece of bacon, valued at \$1. He had taken it from a farmer of Greenville, Ohio, because, he said, he was hungry and unable to get work.

Welch pleaded guilty to the charge of burglary, believing that leniency would be shown him. Instead, the judge sentenced him to a life term. His case was forgotten, but a few months ago a lawyer accidentally discovered that Welch had become insane. Application for his pardon was made and now the man's name has been erased from the prison records. But it has been entered anew on the insane asylum books.

Saved Him.
It didn't kill me, but I think it would, if it had not been for Hunt's Cure. I was tired, miserable and well nigh used up when I commenced using it for an old and severe case of eczema. One application relieved me and box cured me. I believe Hunt's Cure will cure any form of itching known to mankind. CLIFTON LAWRENCE, Helena, Okla. (adv.)

POWERS ARRANGE TERMS OF PEACE

Ottoman Claim to Crete Shall Be Abandoned—Indemnity Demand of the Balkans Not Favored.

SOFIA, April 1.—Representatives of the powers called on Professor Gusehoff separately this afternoon and handed him the following note: "The governments of the great powers take note with satisfaction of the acceptance of their mediation by the allied states and point out to them that before the discussion of the terms of peace is begun, it is for the powers to formulate their views as to the basis of negotiation to be adopted."

"The great powers are of the opinion that they should be as follows:

"1. The frontier of the Ottoman empire in Europe shall start at Enos, and following the course of the Maritza river and then that of the Engene, shall end at Midia. All territories situated to the west of this line shall be ceded by Turkey to the allied states with the exception of Albania, the delimitation of which shall be fixed by the powers.

"2. The question of Aegean islands shall be settled by the powers.

"3. Turkey shall abandon all claim to Crete.

"4. The powers cannot favorably entertain the demand for indemnity, but they will admit the allies to participate in the discussions of the international commission in Paris for an equitable settlement of their participation in the Ottoman debate and in the financial charges of the districts to be handed over to them. Turkey is to be asked to take part in the labors of this commission.

"The great powers declare at the same time that as soon as these bases are accepted hostilities shall cease."

Premier Gusehoff thanked the ministers and informed them that Bulgaria would have to consult with the allied governments before replying.

A MAN'S NARROW ESCAPE

William Scott Holds Self Between Two Bullet-Like Express Trains, Escaping Unhurt.

Hartford, Conn., April 1.—By standing sideways and holding himself perfectly erect between two express trains that whirled by him in opposite directions, William Scott of Westminster, B. C., escaped unhurt at the Avon street crossing here today. His companion, Thomas H. Ryan, of Southampton, N. Y., tried to dash into the tracks. One of the trains was 200 yards down the track.

The two men had started across the tracks oblivious of the fact that either train was approaching. When the cars bore down upon them, Scott realized it would be death to run in either direction. With rare presence of mind he recalled there was a way of an inch or so between passing trains for a man of average size. Scott did not find it easy to hold his feet. The air suction produced by the two trains nearly pulled him over, but he set his muscles so firmly that when the train passed he could not unlimber until he was assisted.

TEST NEW AREOPLANE GUN

Can Be Aimed at an Elevation of 70 Degrees.

Washington, D. C., April 1.—A new aeroplane gun to be tested at the Sandy Hook proving ground is declared to be the most powerful in the world. It fires a six pound projectile filled with one of the highest explosives known. It can be aimed at an elevation of seventy degrees. So terrific is the force driving the shell that when leaving the muzzle of the gun it has a velocity of 2700 feet per second.

Because of a peculiar curve taken in the air by a shell it is necessary to arrange sights to automatically follow for the curve. In the complicated sights of this gun the variation caused by each degree of heat from the sun, each breath of air, the height and distance of the aeroplane is provided for.

You can prevent "Grip," Chills and fever by taking Oxidine, the best general tonic known to medicine. It gets rid of the blood and quickly destroys malarial germs. 50c the bottle at druggists. Oxidine Cold Tablets quickly relieve the worst colds.

SUN A BIG MAGNET, HE FINDS.

Dr. Hale of Mount Wilson Says It Has Magnetic Poles.

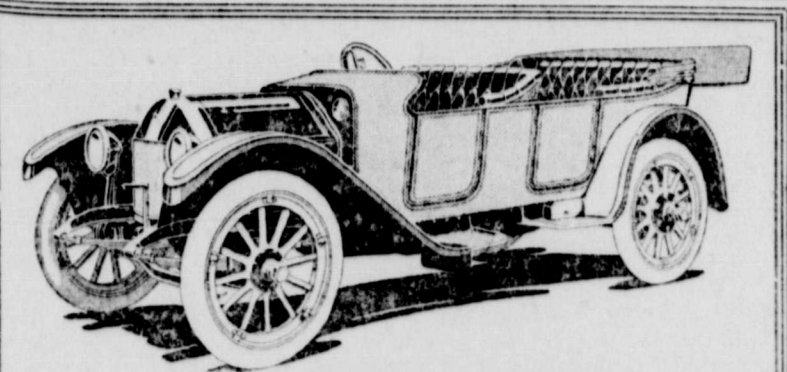

PASADENA, Cal., March 3.—In a lecture on "The Earth and Sun as Magnets," Dr. George Ellery Hale, director of the Mount Wilson solar observatory, announced that observations made on Mount Wilson during the past year proved the sun to be a magnet.

Its magnetic poles lay near the poles of rotation and correspond with the magnetic poles of the earth, he said. The rotation of the sun on its axis will account for its magnetism, on the theory that the sun contains nearly equal charges of positive and negative electricity the negative charge being predominant. The magnetism of the sun has no appreciable effect on the earth.

Educators Going to Beville.

Austin, Tex.—Austin is to be well represented on the program at the fifth district meeting of the Texas Congress of Mothers and Parent-Teachers' Association to be held at Beville, April 2 and 3. State Superintendent of Public Instruction F. M. Bralley will deliver an address on "Compulsory Education." Dr. A.

The Cotulla Record

Established 1898.

C. E. MANLY, Publisher.

Entered in the Postoffice at Cotulla, Texas as second class mail matter.
Published Every Saturday.

Subscription: \$1.50 per annum

Texas responded to the appeal from the flood victims of Ohio and Indiana in a manner that makes one feel glad that he is a Texan.

Hundreds of people have visited the artesian well on the Cotulla property west of town since last week. Now everybody is talking waterworks for the town. Let's get down to business before we quit talking.

Suppose the farmers of the Nueces valley had fifty cars of good hogs to ship in the next sixty days instead of 300 cars of onions. Get the get-rich-quick idea out of your head Mr. Farmer, and get down to safe business. The percentage is too great against you.

Fly swatting time is here again and let every household swat. Get the children swatters and give them prizes for the greatest number of flies killed in a certain period of time. Keep your home free from the nasty, disease spreading pests. It means better health and less doctor bills.

The San Antonio Press Club is busy arranging to take care of the Texas Press Association next month. The boys from the forks of the creek just as well make up their minds that they are going to have the time of their lives, for those fellows up at San Antonio don't half way do things.

Go cast your vote in the school election today. The election for school trustees is one of the most important we have, yet one that is given the least attention. When you vote, vote for men that have the interest of the school at heart, and will give the matter some of their time and attention.

When the Carranzites capture Huerta we would suggest that they bring him over to the border and pull off a public stunt about sunrise some fine morning, and give the information to the railroads so they could arrange for a few excursion trains. Well, the railroads would do some business, wouldn't they?

Two of our farmers shipped in registered hogs last week. Good hogs and good cattle will be plentiful on the river farms in another couple of years, and with diversified crops it will be a sure crop.

If you are holding them and there is a big jack pot. That condition don't come around often enough however. The gamble on only one crop is too great.

The Record acknowledges receipt of a little booklet, "Old and New Ways of Cooking Onions," issued by the Southern Texas Truck Growers Association. It contains numerous recipes for serving the famous Texas Bermuda onion, and will be sent to anyone on receipt of ten cents. One pound of onions will also be sent along with the booklet. This is one of the plans of advertising adopted by the Association.

One of the good laws passed at this session of the legislature was the illiteracy bill, which is intended to purify the ballot and we believe it will. Our Representative, Hon. F. H. Burmeister led the fight for the passage of this bill in the house and the great majority of the people of his district approve of his course in the matter. Mr. Burmeister was on the right side of nearly all questions that came up, and he wielded quite an influence.

Cattle on the range are reported to be doing well, although rain is needed for the tallow weed crop. This weed came so thick this year all over the country that it required a large amount of moisture to keep it growing. The high winds the past ten days had the effect of drying out the ground, and more moisture is needed at present. However, stockmen say that cattle will take on considerable flesh before the crop dries up completely if further rainfall does not come.

J. Pierpont Morgan, one of the greatest men in American finance is dead. He accumulated billions of glittering gold, but when he was called to the other side he had to leave it all behind. Mr. Morgan was a wonderful man, and stood the strain of the great money game for many years. It was thought that his death would have effect on the stock markets, but there was not the least disturbance for no doubt the Morgan interests had been aware that the great chieftain was about to fall, and had prepared to protect his interests against any slump in values.

If things could be distributed a little more over this great country of ours how much better would it be to mankind. For instance, if some of that water that has been destroying lives and property in Ohio and Indiana could have been distributed over the Western part of Texas it would have been of great value. But there are other things dealt out by the weather man, that we do not care to participate in—that Omaha storm, for instance. However, the Lord probably has a reason for all these things that is beyond our understanding.

The onion crop will be ready to harvest in another couple of weeks, and the growers face a very unusual condition this year—a condition they have not confronted before in the history of the industry. As a usual thing the first cars of onions brings excellent prices, but this year nobody is breaking their necks to get out the first cars. The Northern markets are jammed full of old onions that are selling for storage charges. Mexican onions are netting the growers 25 cents per crate. The only hope for fair prices is to hold back until warm weather sprouts the old onions and put them out of commission. The outlook may yet aright itself.

The Huerta government has made formal protest to the United States government against the laxity in enforcing the neutrality laws, claiming that great quantities of ammunition and even machine guns are being carried across the border. The rebels are in complete control of the border country and it would be necessary to have a soldier every hundred yards on this side to prevent supplies from being carried across, then they would be successful in a measure because the Huerta government has no sympathizers in Texas nor any of the other border states. We have not yet recognized the gang of traitors now in power and do not feel inclined to prevent anything that would hinder their overthrow. Of course we are on the lookout all the time, but then we have to take a little siesta once in a while, and the wily rebel seems to know when to "hit the water."

Government scientists have announced that it will be at least one month before they can make an authoritative statement as to whether the vaccine discovered by Dr. Friedmann will cure consumption. Numbers of cases are now being treated by the German doctor who has all faith in this discovery, and who announces that he is willing that his vaccine shall be put in general use. He has suggested a gathering of physicians from all parts of the country that they might be instructed in the method of inoculation, and proceed to treat the thousands of sufferers at the quietest possible moment. When Dr. Friedmann first reached New York he was not given a very glorious reception by the medical fraternity, but time and public sentiment, and the earnestness of the German has changed things to a considerable extent, and there now seems to be a general feeling that he has made a discovery that will successfully combat the great White Plague.

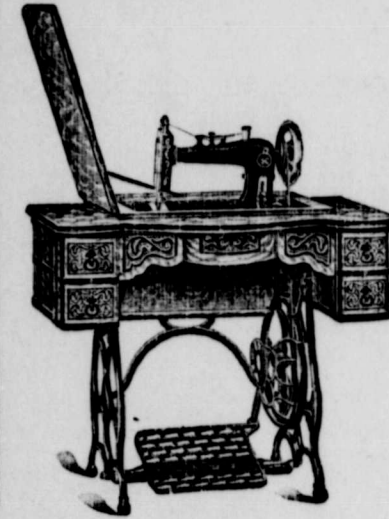

Dr. A. R. C. Campbell of San Antonio some time ago conceived the idea of the propagation of bats for the extermination of one of the worst enemies of mankind—the mosquito. Dr. Campbell has been studying the habits of the little mammal for several years and finds that he bat preys almost entirely on mosquitoes. He believes he has struck the key for ridding the country of the pest. It has been long since scientists convinced the public that mosquitoes were responsible for all malarial fevers, and in the swampy sections of our country the problem of combatting the venomous insects, which flourish in countless millions is yet unsolved. The legislature of Louisiana has appointed a "mosquito commission" which will study conditions with the view of putting into effect some plan that the insect can be kept down. Dr. Campbell has put his plan before this commission, and has convinced that body that he has made an exhaustive study of its plausibility. He has established "bat roosts" at Mitchell lake near San Antonio, and the mosquitoes in that neighborhood have disappeared. An ordinary size roost will accommodate half a million bats, and Dr. Campbell says one bat will destroy an average of 520 mosquitoes in a single night. If the half million bats are all on duty every night it can be readily seen that the mosquito army will fade away in any neighborhood where these "bat roosts" are located.

In the shipment of the lettuce crop this season the greater per centage of it was handled by Roy Campbell of the Association and a result has arisen that the growers do not quite understand, but would like to know the reason therefor. With the machinery of the organization that has been years in building it would appear that Mr. Campbell would be in a position to put the product on the best markets and get the grower the best prices. But, this does not seem to be the case. A large quantity has been shipped by local express. These shipments went to all parts of the country, and the growers tell us that the net returns, after paying the high express rates, have been considerably better than those made by Mr. Campbell. One grower showed us returns, Monday evening on a shipment made to Little Rock, which netted \$2.80 per hamper. The same date he had returns on a shipment made by the Association which netted 9 cents per hamper. The grower stated the lettuce was of the same quality and was loaded at the station practically at the same time. The quality was not first class, but was freeze damaged. Mr. Campbell has notified the growers that he has no market for anything except first class stuff, yet this grower said he was getting orders every day from other sources for this quality, and was getting good returns for it. We are a strong believer in organization and association handling of products, because there is no question the farmer can best be served by this method. Mr. Campbell may have done his best for the grower, but why was he unable to get the prices that have come from other sources? We say he should have been able to get more money! We would like to know and the growers would like to know why he did not get as much.

TIME IS THE BEST TEST
No remedy without merit can long hold a place in public favor.

Ballard's SNOW LINIMENT

Has Stood the Test of Time.

Another proof of the great merit of this remedy is the continually increasing number of people who use it; not for some temporary ailment of the flesh, but as a regular family remedy. It is a standard that never fails when used for the purposes for which it is intended.

Try it for cuts, burns, bruises, sores, swellings, frost bites, chilblains, rheumatism, neuralgia, sciatica or the many external ailments of horses. It will do its work so quickly and effectively you will not be without it.

Price 25c, 50c and \$1.00.

O. A. BROWN

LOCAL NEWS

A milk cow of P. A. Kerr's died one morning last week very suddenly. In order to determine the cause of her sudden death an autopsy was performed and it was found that her death was caused by a piece of baling wire about 3 inches long which had pierced an artery in her insides, and she bled to death inwardly. It is suggested that hereafter Peyton feed his cow the hay instead of the baling wire, as it is easier digested.

In the last year considerable sand has accumulated on the business streets, and when the wind blows there is considerable dust, which could be eliminated to a great extent if this sand was removed. It would cost but a few dollars to shovel it up and haul it away. We offer this suggestion to the Council. It will be money well spent, and will be worth much to the merchants.

Are we going to oil or sprinkle the streets this year or just sit down and take the dust like we did last year. Mr. Merchant, it seems that you would be interested in this matter sufficiently to get out and start something. The dust ruins many dollars worth of goods for you and it is a matter of dollars and cents to you, to say nothing of the more pleasant conditions for your customers. Waiting for the other fellow to take the lead, eh? That's the way we do things in Cotulla.

The sidewalk in front of the new bank building was put in this week and now there is a continuous walk on two sides of both the business blocks. Mr. Guinn, the contractor has made a good job of this work, and the walks are down for a good long time to come. They have been a little expensive to the property owners, but we dare say no one would trade the new back for the old. We would like to see some of this work started in the residence section.

It don't take a very close observer to see the bad of a lot of good paint in the residence portion of the town. Some dwellings have not had a new coat of paint in several years, and of course it is need-

less to say the appearance of these places are not very inviting. There are a lot of good painters looking for work, and there are certainly lots of people that need their services.

M. D. Cox has the contract for the building of a pretty bungalow for P. A. Kerr and has commenced the work. Mr. Kerr had his old dwelling torn down completely.

The "Grasshopper," which changed its schedule Monday last, has been making a bad record this week. Instead of arriving at 10 o'clock it gets in some time during the afternoon. However, after carefully reading the new time card we find it says: "Train will not leave the following station BEFORE time indicated below," and this covers a wide range of time. If a passenger wanted to go to a point South on the train it would be necessary for him to be at the station at 10:40, because the train might (?) leave at that time, but the chances are he would have to wait three or four hours.

We understand there were two or three bids for the post-office as the result of the recent advertising for new quarters. A. R. Butler, postoffice inspector was here a short time since and personally went over the propositions submitted, and expressed himself that he would probably recommend one of the propositions. We should hear from this matter soon, and we hope so, for the present location is a miserable hole. What's the matter with Cotulla going after a Federal appropriation for a postoffice building. It would probably take some time to get it, but if we never ask for anything, it's a cinch we'll never get it.

There might have been something to that clean-up campaign ordered last week, but we didn't hear the noise. The ordinances of the city have not been enforced, and the orders of the Council, nor the Mayor nor the Marshal appear to be heeded by the populace. What's the use of having ordinances if they are not enforced? We would suggest that the next time an order is issued for a clean-up, or for burros to be kept off the street, or for anything else, that the fol-

lowing be added: "This order is merely issued to be doing something, and you are at liberty to disregard it at will, as you have done in the past." Of course, this is merely a suggestion, and really we think it unnecessary, for judging from the attention given such matters heretofore, no such explanation is needed.

The ice plant is in good working order now and turning out a first class quality of ice. There was considerable dissatisfaction about the plant put in last season, but an entirely new outfit has now been installed, and those who subscribed for stock are being called on to finish paying their installments. This plant is owned principally by home people and all of Cotulla should give it support. That is the way to build our town. You get the quality and at a cheaper price than you can ship in ice, so leave your money at home and forget your little personal or factional differences. Help make the plant a paying proposition and you will help your town and your fellow man who put up his money in order that the town might have such a plant.

FEEL RIGHT ALL THE TIME.

Don't let Periodical Spells of Lazy Liver Ruin Your Temper and Spoil Your Work.

If your liver doesn't behave right all the time—if it sometimes stops working and you become bilious and "headache"—don't take calomel, but try Dodson's Liver Tone.

You are safe in taking Dodson's Liver Tone. It's a harmless, pleasant vegetable remedy that starts the liver without stirring up your whole system as calomel often does. It is especially good for children who need a liver tonic once in awhile but who should not be dosed with strong drugs.

Dodson's Liver Tone is sold by Gaddis Pharmacy. This drug-store guarantees it with a clean open and shut guarantee—your money back with a smile if it fails to satisfy you. Price, 50 cents a bottle, and your money is as safe as if you had it in your pocket. If you need the medicine you need it badly—if it doesn't satisfy you—your money back. Buy a bottle from Gaddis Pharmacy today under this guarantee.

School Picnic.

The school children enjoyed a day's outing yesterday on the Nueces. The picnic was a result of a promise made to the pupils by the Superintendent on April Fool day. He assured them that in consideration for "being good" on that date school would be dismissed yesterday.

DOUGHT TO PAINT.

I ought to have painted last year, but I hated to pay \$2.25 a gallon.

I've got to paint this year; it'll take a little more paint; I suppose 1 gallon in 10; and a little more work, I suppose 1 day in 10.

My job would have cost last year about \$52.50; it is going to cost this year \$55.00.

\$2.50 gone. I suppose it'll be the same again. If I wait again.

What if paint goes down to \$4 a gallon? \$2.50 on the job!

I shan't wait; what a fool I was!

Devos, sells it T. R. Keck.

The novelty in jewelry is the missing Link Cuff button at Gaddis Pharmacy.

Producing Education.

Our school would not be the largest business training school in America if it was not the best. With our original copyrighted, Bryne practical business system and methods, we produce a good bookkeeper, stenographer or operator in a short time and place him a good paying position.

The Business World holds out splendid opportunities for those trained to do its work. Seventy-five per cent of the bank presidents hold their present positions through their knowledge of bookkeeping that enabled them to start into the banking work. Andrew Carnegie and many other great financiers, also railroad presidents started at the telegrapher's key. Ex-Senator Wm. E. Mason started as a stenographer as did Geo. B. Cortlyou, now president of the Consolidated Gas Co. of New York City; also Wm. Loeb, Jr. now collector of the port of New York. There is no better way for a young man or woman to become familiar with the affairs of business than to secure a thorough, practical business training then go into a good salaried business position.

Don't lay aside this paper without sending for a catalogue of America's largest business training school, the only one enrolling from 1500 to 2000 students annually, the only one giving thought and complete courses of

bookkeeping and business training, shorthand, telegraphy and business administration and finance, the only one that has an employment department with facilities for placing its graduates in the very best positions with mercantile firms, railroads, state and national government positions. We have furnished Uncle Sam with some of his very best clerical and stenographic help. Attend a school with a national reputation whose diplomas are pass-ports into the very best salaried positions.

IT WAS A HUMMER

Trade Excursion Was a Great Success—Much Enthusiasm Shown in the Towns Along the Line.

San Antonio manufacturers and jobbers reached out after fresh territory and new trade Tuesday of this week, when the business men of the Alamo City paid a neighborly visit to the business men of the San Antonio, Uvalde & Gulf Railroad territory, through the medium of a trade excursion given under the auspices of the San Antonio Jobbers and Manufacturers' League of the Chamber of Commerce. The visit was made in a special train of six standard Pullman sleepers and buffet car, leaving San Antonio at 7 o'clock in the morning and returning at the same hour Wednesday morning, and the party was composed of 138 professional and business men, the latter representing the principal manufacturing and jobbing houses of the city.

While the trade excursion meant much to the local firms represented it meant even more to the merchants visited in the towns along the railroad from San Antonio to Uvalde, as it gave to them a speaking acquaintance with the men with whom they are dealing; it showed to them the value of patronizing home industry; it indicated the merit and worth of "made in San Antonio" goods and it pointed out the fact beyond all question of doubt that San Antonio is not only Texas' largest city, but it is a thriving, hustling, manufacturing city, the central distributing point for the entire territory of the Great Southwest.

The local business and professional men did not go into their neighbors' towns to talk past history. They went to convince their neighboring merchants and customers that as a business community, San Antonio stands for wide-awake progressiveness and a square deal and that San Antonio delivers the goods in every case. They accomplished all of this and more, and new business and friendly ties were made and old bonds were further cemented.

The merchants were urged to come to San Antonio and see what the city's business men were offering, if they were not already patronizing home industries and selling home goods. The service was promised and it was strongly pointed out that a night lettergram or telephone message to any mercantile house in San Antonio meant the prompt delivery of goods ordered, on the following day. The merchants and salesmen of this city have long been catering to the needs of the Texas merchants and those who buy from them profit by these years of experience and their expert knowledge of the wants and fancies of the consuming public.

San Antonio has taken first rank as one of the great market centers of Texas, and is the greatest in the Southwest. Every known

tions, hats, shoes, harness, saddlery and leather goods, groceries and grocers' sundries, liquors, lumber, crockery and house furnishings is handled by the jobbers of this city. Its manufacturers include malt liquors, confections, macaroni, chile and chile products, the latter being shipped to every portion of the United States. Iron, steel and wooden ware of all kinds, overalls, shirts, ties, leather goods of all kinds, ice machines, agricultural implements and a hundred other articles upon which the trade of the United States as a whole has placed the stamp of approval and par excellence.

It was to the merchants and business men of Luling, Pleasanton, Jourdanton, Charlotte, Hinder, Fowler, Gardendale, Woodward, Big Wells, Brundage, Carrizo Springs, Crystal City, La Pryor and Uvalde that these advantages to be derived by patronizing home industries were pointed out. The trade excursionists made stops in all of these places and at each were given an enthusiastic reception.

FIESTA NEWS

From all over Texas, thousands of people will come to San Antonio next month to attend the festivities of the Fiesta San Jacinto and historic Battle of Flowers, April 21 to 26, inclusive. Never before in the history of these events have preparations been made for such elaborate and gorgeous displays, parades, pageants and entertainment for the armies of visitors as are being made this year by the Fiesta Association of the Chamber of Commerce and the allied organizations, the Battle of Flowers Association and the Order of the Alamo. Notwithstanding the great crowds which are expected, every visitor is assured of accommodations and entertainments, as San Antonio has long been noted as a convention city, and with the probable exception of Los Angeles, Cal., no city in the South or West is better equipped to handle large crowds in the way of hotels and boarding houses than San Antonio.

For the week, a round trip rate of a fare and a fifth will apply, and even lower rates have been granted for special days during the week.

THE "STAR" FIRE BRICK
 Made by the Star Clay Products Company, Whose Products Are Known as "Best by Test and Better Than the Rest."

The plant is located in Elmendorf, Bexar County, Texas, just 15 miles south of San Antonio, on the San Antonio & Aransas Pass Railway. The material from which they manufacture their Star Fire Brick is obtained from mines located on their property.

For the past twenty years or more the local potteries in this little town were making, in a very crude way, their own fire brick, to line their kilns and flash walls. They used these crude brick because the fire-brick gave longer and more satisfactory service where the intense heat was required, than any fire brick that they could buy. In the burning of stoneware a tremendous heat is attained, and the kilns are heated to a temperature, where it is most intense, to a degree of over 2000 Fahrenheit.

When they bought out this pottery, some four years ago, together with all clay beds out of which they get the finest fire clay, they foresaw the great possibilities of this branch of the business. They have now created another plant, equipping it with the very latest brick machinery of a modern type, that could be bought, and are producing a fire brick that is better than any other that can be bought in the United States or Europe. While the brick during the course of manufacture receive the most severe test in these kilns, still they have had others 'try out the brick in many ways. Also have them in the linings of coke ovens, where the blast heat is extremely severe on a brick, and they have stood that test satisfactorily. Those who have used them pronounce them better than any fire brick on the market.

U. S. geologists say that fireclay of the quality that this company has is very seldom found in its natural state. To get fireclay that is usually found to stand even ordinary temperature, it is necessary to mix the clay with various ingredients such as burnt clay (grog), bauxide and other clays. They use this clay in its natural state, the way nature put it there and do not mix with any other ingredients. Eastern manufacturers burn their brick with 1800 to 1900 degrees and it is necessary to make this mixture to even stand that heat. This company has no competition, as to grade, in Texas. There hasn't been any real fireclay discovered in Texas outside of their territory. Some Texas manufacturers use a building brick clay, add a little grog to it and stamp it firebrick.

This company has the most wonderful material ever discovered—almost a pure silica clay.

The best Missouri fire-clays have.....57.13 silica
 The best French fireclays 71.71 silica
 The best German fire-clays.....71.38 silica
 The best New Jersey fire-clays.....71.80 silica
 From Houston laboratories report, 7-19, 1912, this fireclay has.....83.81 silica

By this you will see that they have the highest per cent of silica in this clay ever found in this country or Europe. Under date of 8-27, 1912 the Houston laboratories gave us their report on the fusing point of the clay as cone 28 or 3074 degrees Fahrenheit.

Does it pay to buy cheap, so-called fire brick?
 An oil refining company recently bought some other Texas fire brick because these were a few dollars per thousand higher. After four months' use these brick were burned out and exposed the iron supports, which were melted by the heat, and the whole boiler caved in. They were now put to the double expense of removing the old brick, replacing the iron pillars, doing all the mason work over again and buying new brick, being obliged to shut down their plant at the height of their season to make these repairs. Just figure their loss in their business on account of these bad brick. They bought Star Brick this time. Said they wanted the best they could get and would gladly pay double the amount for Star Brick.

You will make no mistake in buying these brick as this company guarantees them to last three times longer than any other brick on the market.

They guarantee their Star Fire Brick to be a superior fire brick in every respect, and will be pleased to submit samples upon application. Having received such wonderful results from their brick, they are now making fire brick exclusively. They use crude oil as a fuel and attain a temperature of 3028 degrees Fahrenheit before finishing burning and the brick really receive more in intense heat in their manufacture that they are usually subjected to afterwards.

This company has its own railroad tracks through the yards, carry a good stock of standard shapes on hand and can ship promptly.

ETHEL SMITH WELL AGAIN

Girl for Whom Billy Ruge Gave Life Is Entirely Well.
 Gary, Ind., April 1.—After being away from work for eight months, Miss Ethel Smith, the girl for whom Billy Ruge, the crippled newsboy, laid down his life, is able to again take up her position as cashier in a Gary department store. Miss Smith was burned in a motorcycle accident last summer and was near death when Ruge gave up the skin from his crippled limb which was amputated. Following her benefactor's death Miss Smith a second time came near losing her life when pneumonia set in.

HUNDREDS KILLED IN FIVE STATES

Weston, Iowa	2	2
Noola, Iowa	28	2
Glenwood, Iowa	5	5
Malvern, Iowa	1	1
Walton, Ill.	1	1
Sterling, Ill.	1	1
Traverse City, Mich.	1	1
Terth, Ind.	1	1

The storm spread death and devastation in its wake through five States Sunday night and early Monday and did vast property damage in seven States, collected a toll of more than 250 lives, injured more than 600 persons and destroyed property valued at millions.

The history of the Middle West contains no record of storms of such violence and attended by such appalling loss of life.

By far the greatest damage was done in and near Omaha, Neb., in that city the wreckage wind carried away houses and snatched out the lives of men, women and children. In the scores, tens, hundreds and thousands of homes were destroyed and 230 were injured.

Outside of Omaha no great number was killed in any one place. The wind swept along, taking its toll here and there. The gate left Omaha only in attack towns in Iowa in its sweeping destructive passage it had swept down upon villages in Nebraska.

What seems to have been a separate storm swept portions of Indiana, the greatest damage in and near Terre Haute. There nearly a score of persons were slain and hundreds were injured. Other places in Indiana report lesser damage.

The storm lost its worst force from the east of the world for hours by breaking down all wire communications. Wires were snapped off in all directions and it took many hours to gather and circulate the meager news of the disaster.

Nineteen persons are known to be dead, ten are missing, 250 are more or less badly hurt, 300 families are homeless and a property loss of \$1,000,000 is the total of the tornado that swept south Terre Haute, Ind. Scarcely had the terrific blast of wind passed than rain began to fall in torrents. It continued all through the day.

The Wabash river rose so rapidly that residents of the section of the city west of the river prepared for a disastrous flood.

Heavy Rain Quenches Fire.
 Lightning and short circuiting electric light and trolley wires started several fires, though all were quickly extinguished by the heavy downpour of rain, so that within twenty-four hours this city has been the victim of fire, flood and tornado.

Many of the survivors of the tornado virtually lost their minds and women and girls were wandering around in the rain, sobbing and wringing their hands, and even fighting when rescuers sought to take them to places of safety.

Three Hundred Homes Demolished.
 More than 300 residences, many of them owned by their former occupants, were leveled.

There had been considerable rain early in the evening. Then with a roar that drowned the noise of the falling rain and the occasional thunder claps, came the fury of the tornado. Striking from the southwest it came, moving down everything in its path for the short radius of not more than one-quarter of a mile. For a distance of about five miles in length the blast struck homes, manufacturing and stores. Scarcely any spot underwent the blow for more than two minutes and on went the storm. Striking across country almost due east, just as it was crazing the handsome residential district of the city toward Indianapolis.

Then came the rain in such terrific downpour that the fires started almost before the firemen arrived on the scene and began the work of rescue. Men, women and children, attired mostly in night clothes, were running about. Here and there a rescuer would find a man or woman screaming frantically and trying to lift debris from the body of a relative.

Two can live almost as expensively as one.

No Caramel Necessary.

The injurious effects and unpleasantness of taking caramel is done away with by Simon's Liver Purifier, the mildest known Liver medicine, yet the most thorough in action. Put up in yellow tin boxes only. Price 25c. Tried once, used always.

Some people waste a lot of time trying to devise cures for other people's bad habits.

COIN IN HIS HEAD

SURGEON PLUGS HOLE WITH A DOLLAR
 Victim of Arkansas Fight Will Never Be Broke by Ho-Cheese Spending the Money.

OMAHA, April 2.—John Crickmore is one man in the States who will never be totally broke, for he always has at least one dollar in his pocket. Crickmore, a 35-year-old farmer, was in the front part of his head, under the scalp, and covers a jagged hole in his skull over two inches long and an inch wide.

Crickmore is just recovering from the dangerous wound, which he received in a fight several days ago and which nearly ended his life. The fight was one of the bloodiest ever known in this section, the weapons being knives and rocks. When the battle was over Crickmore was down with a crushed skull from a rock thrown by his adversary.

Dr. W. A. Butts was called to attend the wounded man. The protruding and frontal bones of the skull were crushed in against the brain. The physician made an incision in the scalp and removed the bone.

He had to have something to cover the opening with which to protect the brain. The patient was in too critical a condition to be removed to a city hospital and there was no time to order a silver plate. He made one. He took a silver dollar and a heavy hammer and beat it out on a piece of iron to fit the hole. He placed this home-made plate in place and sewed up the scalp, and nature is doing the rest. Dr. Butts says his patient is recovering nicely, and that Crickmore's mind is not impaired by the accident or the operation.

Lots of penitentiary cells are occupied by men who believed in reform for revenue only.

As a general tonic and preventive for "Grip" and malarial conditions, nothing so good exists. It kills poisonous germs, cleanses the blood, and purifies the system, especially in malarial regions. Oxidine Cold Tablets relieve bad colds at once immediately.

ARABS ROUT THE FRENCH

Paris, April 1.—Dispatches today told of the virtual annihilation of a small column of French troops by Arabs in the Adera region of the Western Sahara. A body of one of the intractable Berber tribe of Awelend swooped down and surrounded the French detachment, which was marching through the desert about three days' journey from Timbuktu, the French military station. After a fight lasting all day the French troops were overcome. Their commander, Lieut. Martyn, and four sergeants were killed, together with fifty-three native troopers.

A few of the troopers escaped and brought the news to headquarters in Timbuktu. They declared that the Arabs suffered tremendous losses before the annihilation of the French troops was exhausted.

Men Cured Forever
 I offer certain permanent cures for Blood Poison, Ulcers, Stricture, Contracted Diseases, Nervous Debility, Lost Vigor, Varicocele, Hydrocele and all lately or long contracted Diseases of Men. I will charge you nothing to prove that my present-day, scientific methods are the surest to effect cures. If corroborative evidence of my success is required I refer to my extraordinary record of pleased and satisfied patients that I have dismissed sound and well during the year just gone. Many of these had been unsuccessfully treated elsewhere.
 I hold out no false hopes to incurable persons nor do I resort to injurious, quick-cure operations to establish my claims. If you desire to consult a Safe Specialist come to see me and learn what satisfied patients have to say about me.
 You can profit by a prompt visit. Advice honest and candid. Examination free and strictly confidential. If out of town, write. Prices moderate, including medicine.

K. Burwell's Ready to Wear and Millinery DEPARTMENTS ARE THE PLACES THAT ATTRACT NOW.

We are making a special effort in both of these departments this season. Each week we receive new goods in our Millinery department, and in that way we keep the latest shapes and trimmings. Our Ready-to-Wear lines are the latest models.

Infants size to extra large sizes in excellent lines.

Exclusive Handler of Queen Quality Shoes. **K. BURWELL.**

Social and Religious

WOMANS MISSIONARY ENTERTAINS

The women of the Methodist Missionary society beautifully entertained fifty or more guests at the parsonage on Tuesday evening. Rev. Barton and his gracious wife assisted by Mdms. L. W. Gaddis, P. A. Kerr and R. L. Graham, making welcome the guests. The entire house was a bower of cut flowers, lending enchantment to the participants as the perfume made mellow the breeze. A fern bank artistically decorated the hall, in the center of which was a cut glass punch bowl, from which Misses Woods and Mendell dipped the cooling fruit beverage.

Upon the dining table was a beautiful lace mat upon which a cut glass bowl of pink roses held prominence. The evening was spent in games and conversation. Messrs Keck and W. A. Tarver formed the company into two lines for a clothes pin contest, awarding a souvenir of the occasion to the winner. Mrs. Tarver was given a neatly prepared box for her heroic effort in holding the "pins." The contents was soon opened and its freedom(?) brought about consternation from the number who sought the chairs.

The ladies could not let "All fools day," pass without some joke enjoyed. Another amusing game came when the vocal ability was tested, upon the spur of the moment each one was called upon to sing a verse of a song that was suggested upon a slip of paper they held. Many and varied tunes were heard making fun for all. Rev. Barton distinguished himself as a mind reader. The orchestra furnished music for the evening. Mdms. L. W. Gaddis, T. R. Keck, R. L. Graham, P. A. Kerr and Miss Woods passed a salad course which came as a finale to this beautiful party.

MISS BURWELL ENTERTAINS.

Thursday afternoon Miss Kate Burwell was hostess to the Presbyterian Union. Ferns and roses were placed about the house where best to be seen, bespeaking the spring days are here. The serving of punch upon the arrival made pleasant the welcome, attended with the cordiality of the hostess. After the conclusion of the business period the devotional was led by Mrs. E. A. Keck, the reading of the fourth chapter of Phil. followed by repeating the Lord's prayer in unison. The Bible study brought to a close the book of Leviticus.

Mrs. J. H. Gallman as leader made the lesson most interesting.

Round table talks were a certified feature of the fact. Miss Gilmer will be hostess next Thursday and Miss Pearl Guinn will conduct the Bible lesson.

For roll call a favorite scripture verse will be expected.

The Mizpah benediction brought the meeting to a close.

The social hour was ushered in by Mrs. Whitehead and Miss Childs rendering two duets which met the applause of all. The serving of ice cream a la mode gave each one the privilege of pleasant conversation.

Twenty seven ladies enjoyed this meeting. The guests were Mdms. E. A. Keck, Marshal McMahan, W. B. Guinn, Misses Davis and Lucy Burwell.

MRS. ROWLAND HOSTESS.

Mrs. Rowland welcomed her guests Tuesday afternoon in her charming manner as they gathered for their Bible study. The business period occupied only a short period. The fifteenth chapter of John was read by the hostess with Mrs. Chevalier leading in prayer. The Bible study was led by Mrs. W. A. Tarver most interestingly. Light refreshments were served before the home going.

THE FRESHMEN MADE MERRY.

The freshmen have been all during their preparatory course a notable class and this year, have won marked distinction both in school work and deportment.

Since Xmas their work has been exceedingly good. Complementary to their efforts of untiring energy the past month Miss Gardner, teacher of English and Latin proposed to entertain them, doing special honor to Norvell Graham who made the highest average this month.

Miss Laura Brown's home proved an ideal place for the party. The Freshmen made merry until ten o'clock when Norvell Graham read a poem to the class and Arthur Knages followed by a very interesting and remarkable class prophecy. Delicious refreshments were served after which many old fashioned games were played.

At a late hour the Freshmen bade Miss Gardner goodnight, having enjoyed themselves more than in the Latin class??

Class Reporter.

Mrs. M. T. Davis and Mrs. C. B. Jones continue on the sick list, but friends of both parties are hoping to see them out again soon.

Mrs. Ray Seefeld of Big Wells is spending the week visiting friends. Mr. Seefeld and children joined her the last part of the week.

Report of Delegate to Texas Sunday School Convention.

It was just 7:00 o'clock Wednesday morning March 25th when we reached the beautiful little City of Waco resting peacefully in the broad valley of the winding Brazos. I say we, because there were other delegates on that train to the great Texas Sunday School Convention which convened in that City day before and now which is a matter of history, the memory of which will linger long in the hearts and minds of those who participated in the feast.

From a number of view points this convention, which is The Thirty Ninth Annual, is peer of all. Especially is this true with reference to representation. Ninety one counties were represented, delegates coming as far as 750 miles, El Paso County having sent three. The majority of these counties sent two delegates who will return home as Sunday School workers, enthused and filled with good common-sense-thought in regard to carrying on a live wide-awake Sunday School. Bell County sent two special train loads of over one thousand delegates.

Waco local men were wise in selecting the beautiful auditorium of the magnificent First Baptist Church as the convention hall. This auditorium with balcony is claimed to seat 3500 people; on Wednesday and Thursday nights it was filled to the limits, chairs were placed in every available space and men stood in aisles and around the wall. A wonderfully impressive and beautiful service was when this vast audience raised-as one man its voice in song led by the wonderful Prof. E. O. Excel the world famous song-bird.

We feasted at the feed of such men as the Rev. W. B. Spillman of North Carolina, field secretary of the Southern Baptist convention abroad; Rev. P. H. Welshimer, pastor of the first Christian Church, Canton, Ohio, which has 43000 Sunday school members 35000 of which are regular in attendance; W. C. Pearce, Mrs. Mary Bryner, Supt. of the International Association Elementary Dept., and a number of other men and women who brought us wonderful help from a deep experience, ripe with old age, and who spoke out of the depths of their heart and not for display.

Aside from the educational feature of the conventions it got right down to business as regards the future work. The General Secretary's report showed the majority of Counties organized, therefore time was not spent on organizations, but a goal was set and plans laid whereby those goals could be reached. The Resolutions Committee said that the great Empire State of Texas should enroll within the next twelve months

1000 Teacher Training Classes.

1000 Cradle Rolls.
1000 Adult Bible Classes.
50,000 Pledge Temperance workers.

335,000 New members brought in.

\$20,000.00 for the promotion of the work.

The Texas Sunday School Association is the only organization in Texas which calls under one roof, and for one purpose (that purpose being "better equipment" for our fathers work) every evangelic demonstration within its domains. It is interdenominational and has for its mission "increase in efficiency." It inspires its army, numbering some 1200 volunteers, through the medium of Precinct, County township, District, State, National and World wide conventions. The Association organizes no

schools, supports no schools, but gives assistance to every boy and girl belonging to any Sunday school, anywhere, and at all times.

The crowd gathered at Waco soundea as one voice the "Onward March" of the Sunday School. Lives are being burned out for the work, the majority of them being unpaid workers; gifts are coming as never before and by placing the field glass to the eye and scanning the field from the Convention view-point you see the greatest of conquests wrought by the Sunday School.

A complete Convention report will be made on the night of the 15th, at Fowlerston; also one later in Cotulla the exact date of which will be announced next week.

Delegate.

Wear a Cuff button you can not lose. The Mission Link is it. Visit Brown's millinery Department our line is complete.

For Sale—2 cars Jersey cattle. Some cows in milk for sale. Will sell on easy terms.—J. H. Gilbert.
