

## FARMERS TURN OUT AND ENJOY DAY.

**Large Gathering at Rock-Daniel Dam on the Nueces--Experts Speak.**

The barbecue Thursday at the Rock-Daniel dam on the Nueces river eight miles South of Cotulla under the auspices of the Rock-wood Farmers' Institute was well attended. It was a farmers barbecue and farmers came from all parts of the county, many being from Millett, Dilley Woodward, and from the Artesia Wells section.

There was an abundance of barbecued beef, pickles, bread and good coffee. The meat was excellently barbecued, and with it all was dispensed good old Southern hospitality.

In the afternoon Captain J. C. Minus of Asherton, and Sam Neill and Paul Wiprecht of the State Agriculture department addressed the farmers. Capt. Minus in a general way outlined the onion industry and brought it up to the present point of over-production, and too great expense of marketing, which has put the farmers of the country in bad circumstances. He said the time had come when the one crop system must go and the farmer give his attention to diversification of crops, dairying and animal husbandry. First of all he thought a close organization necessary to carry out any plans that might be promulgated.

Sam Neill was next introduced by Matt Russell, master of ceremonies. Mr. Neill stated that he had been asked to use Jersey cattle as his subject, and being a native of the Isle of Jersey, which is located in the English Channel between Britian and France, where originated the Jersey breed, he felt that he could do justice to the subject. Mr. Neill stated that he farmed in Europe 25 years and 39 years in Texas, and during this period had continuous practical experience with Jersey cattle. He made the first shipment of this breed from Isle of Jersey to New York in 1861. He is of the opinion that a farmer can make no better investment in live stock than put in his money in Jerseys, and was certain that they would be money makers for the farmers along the river where irrigation makes certain all kinds of feed crops. He pointed out the necessity of a farm being self-sustaining to be profitable and called it rank mismanagement when the farmer went to the stores to buy concentrates for his dairy stock. He advised planting rye in August, oats, beets, etc. in the fall and cowpeas in the spring.

Paul Wiprecht was next introduced. He blamed present conditions to a certain extent to the fact that we had been used to too much money in the country; that all a farmer had to do when he wanted money was to go to the bank and get it; that he had been living too easy and not watching the corners, and instead of living at home had been buying his supplies from the grocery stores. "You've been living too high and the one crop gamble has got you in bad" he said. Mr. Wiprecht dwelt on the necessity of diversification, the importance of stocking the farm with good stock, the helpfulness of a few dairy cows. He took up dry farming and pointed out

## HIKE AND OUTING FOR BOY SCOUTS.

**Fox Patrol in Three Days Camp on Nueces--Enjoy Fishing, Boating, Bathing.**

The Fox Patrol of Boy Scouts under Master F. I. Rock went on a hike and three days camp this week to the Rock-Daniel dam on the Nueces. The boys met at the band stand on the plaza Monday night and slept there. At 4 o'clock Tuesday morning they arose and made the hike of eight miles before breakfast.

The boys remained in camp until Thursday and then took in the barbecue which was held at the dam, coming home that evening. They had a great time fishing and bathing.

Twelve of the Scouts have received their uniforms and much more interest is being taken in the work. A number of other suits have been ordered and are expected in due time.

Mr. Rock has labored faithfully with the boys in past months and has received very little help, and now that he is getting them up to where much interest is being manifested he hopes to have more encouragement from the parents, and also needs some assistance in training the boys.

Every parent who has a boy between the age of 12 and 18 should encourage him to become a Scout, and should lend their influence to the work. If your boy is interesting himself in a work of this kind, he is always in good company and learns valuable lessons that will benefit him in after life.

The Scouts that went on the hike and enjoyed the camping out, were: Rueben Cotulla, Arthur Knaggs, Merton Haynie, Thad Tarver, Vernon Widener, Amil Gilmer, Clark Jones, Earnest Rock, Marion Gaddis, Winfred Whitehead, Lonnie Jay, Marvin Burwell.

## Masonic Lodges Install New Officers.

Cotulla, Chapter No 825, R. A. M. and also lodge No. 629, A. F. & A. M. installed newly elected officers on the night of the 24th. inst.

The following were installed as officers of Royal Arch Chapter: E. E. Scoggins, H. P., J. W. Lacey, E. K., C. E. Manly, E. S., B. Wildenthal, Jr. P. S., J. P. Guinn, R. A. C., M. D. Cox, Secretary, H. W. Hamilton, Treasurer, P. A. Kerr, M. 3rd. V. W. H. Sylvester, M. 2nd. V., Vernon Smith, M. 1st V., C. F. Binkley, Guard.

Officers installed in Blue Lodge for ensuing year: H. W. Hamilton, W. M., C. E. Manly, S. W., P. A. Kerr, J. W., L. W. Gaddis, Treas., B. Wildenthal, Sec., C. F. Binkley, Tiler, W. H. Sylvester, S. D., M. H. Swisher, J. D., H. E. Miller, S. S., E. E. Scoggins, J. S.

the advantages of deep breaking and afterwards continuous shallow cultivating and harrowing. He said they call it scientific farming but that it was only good common sense farming and that there were very few years in this part of the state that good crops could not be raised if the farmer persistently pursued good old common sense methods. Mr. Wiprecht closed his talk by urging the farmers to get together in farm organizations to promote any plan that might be to their advantage.

## RECKLESS DRIVING TO BE STOPPED.

**Trouble Ahead for Automobileists Who Violate Speed Law.**

Reckless driving of automobiles on the streets of Cotulla is to be stopped. The officials have handed down the warning and woe be unto the speed fiend that heedeth not.

Of recent weeks reckless driving of automobiles have been a daily occurrence and several accidents have been narrowly averted. Machines have actually raced on front street. Just why this dangerous and flagrant violation of the law has not been stopped long before this is the question people have been asking but now that it is to be stopped there will no doubt be a sigh of relief.

A youth from a neighboring town was apprehended a few nights ago running without lights and hailed before Justice Stedham. He was assessed the minimum fine and given a warning. His arrest was brought about by a telephone message from the Rock settlement stating that the driver had demolished a gate on the road.

By request we publish below a copy of State statutes governing running of automobiles and it will be time well spent for automobile owners to read the same carefully and familiarize themselves with the provisions.

Art. 815. Speed of regulation. No automobile or motor vehicle shall be driven or operated upon any public road, street or driveway at a greater rate of speed than eighteen miles an hour, or upon any public road, street or driveway, within the limits of any city, town or village, at a greater rate of speed than eight miles an hour, except where such city or town may, by an ordinance or by law, allow a greater rate of speed.

Art. 816. No person in charge of an automobile or motor vehicle on any public road, street or driveway, shall drive the same at any speed greater than is reasonable and proper, having regard to the traffic and use of the public road, street or driveway by others, or so as to endanger the life or limb of any person thereon.

Art. 817. All drivers or operators of automobiles or motor vehicles are prohibited from racing upon any public road, street or driveway.

Art. 818. Any person operating or driving an automobile or motor vehicle shall, at the request of signal by putting up the hand, or by other visible signal from a person riding or driving a horse or horses or other domestic animals, cause such vehicle or machine to come to a standstill as quickly as possible, and to remain stationary long enough to allow such animal to pass.

Art. 819. Every driver or operator of automobiles or motor vehicle shall have attached thereto a suitable bell or other appliance for giving notice of its approach, so that when such attachment is rung or otherwise operated it may be heard a distance of three hundred feet, and shall carry a lighted lamp between one hour after and one hour before sunrise.

Art. 820. Every one who violates any of the preceding articles shall be punished by a fine of not less than five dollars nor more than one hundred dollars.

## RAIN MAKES FARMERS GLAD.

**Heavy Downpour Yesterday, and More Coming in Good Old Style Today.**

Although nearly every part of country has had good showers during the present month, none had fallen at Cotulla up to yesterday. But at last the flood gates were opened and Cotulla was drenched. The rain came up from the Northeast and in a short time streets were converted into streams. Creeks nearby were bank full. The rain did not extend further North than Gardendale, but down the Nueces it was good as far as the Dobie ranch, and on what is known as the Cameron, a very heavy rain fell.

This rain has made farmers glad as it came in time to keep cotton growing and the prospects for a good crop is very bright.

Rain fell continuously from early this morning until noon. Reports indicate that it was general from San Antonio to Laredo. The weather bureau predicts that more moisture is coming.

## HAD BIG WEDDING

Last Saturday evening at 4 o'clock Mauro Velis and Miss Elosa Garcia were married at the Catholic Church. Great preparations were made for the wedding and it was about the biggest affair that the Mexican part of Cotulla has had in quite awhile.

A supper was given and a big ball progressed until in the early morning hours. All of the Mexican population participated in the celebration and a large number of Americans attended the wedding and supper. Mauro is a very popular young Mexican, and has been employed at Gaddis' Pharmacy for the past ten years. The bride is the daughter of Mr. and Mrs. E. G. Garcia.

## WOODWARD NOTES.

Woodward, Texas, June 27—J. H. McGehee returned from San Antonio Sunday bringing the news of the arrival of a pretty baby daughter in his home. Mrs. McGehee and children at present are in San Antonio stopping with Capt. and Mrs. D. S. Combs.

Prof. Crosswhite and family have moved to Kingsville where the Prof. has accepted a position.

B. Vesper has gone to Laredo on a short business stay.

D. J. Woodward of San Antonio and L. J. Baker of Lockart were here Friday and Saturday.

Among those who registered at the hotel the past week were: John Judd, Boston, W. J. Armstrong, San Antonio, B. Neatherly, Dilley, Wm. Kelbery, Laredo, O. Olsen and Son, San Antonio, L. B. Miller Jr. San Antonio, I. J. Langsfad, San Antonio, D. J. Woodward, San Antonio.

Miss Dessie Coovert has gone to San Marcos to attend the normal.

## DIXIE THEATRE

It is the aim of the management to provide the best photographs filmed for exhibition at the Dixie Theatre. We believe we are doing it. Judge for yourself.

Today's Program: "Omens of the Mesa," "An American Rhine," "The Shipboy's grit," "Pat the Soothsayer. A roaring Comedy.

Admission always 5c. and 10c.

## HIGH TEMPERATURES IN NORTH AND EAST CAUSES MUCH DISTRESS

The North is sweltering under high temperatures that is causing deaths, suicides and many prostrations. At Chicago yesterday five deaths from heat were recorded and more than a score of prostrations. The government thermometer on the street level at Detroit registered 105 degrees, and caused numerous prostrations. Twenty-two prostrations were reported from St. Louis. One suicide and a dozen prostrations occurred in Boston.

The heat wave covers a great scope of country. In Southwest Texas there has been no high temperatures this month and the past week has been extremely pleasant.

**ARE YOU GOING NORTH THIS SUMMER?**

Now is the Time to Plan Your Vacation.

**IT'S HOT** There is no use denying it. But there is some getting out of it. Away up in Wisconsin, Michigan and Canada, in the land of snappy days, and crisp, cool, restful nights, you will find that relief for which you yearn.

**A Woman's Crowning Glory**

You want to be attractive, know the importance of smooth, lustrous, well-dressed hair. You watch your "combing," dreading to find proof that you are losing part of your beauty.

Strong, fine glossy hair is your birthright. You are entitled to it. If your hair is falling out you will look old sooner than you ought to. And one night as well be old as look old.

**Rexall "93" Hair Tonic**

Is an ideal treatment for the hair. Experience shows that it tends to prevent baldness, to promote the growth of the hair and to give it a natural lustre. No woman, or man either, who is not already bald, need become so. Your hair may be saved if you will do the right thing before it's too late.

**50c and \$1 per Bottle. Money Back if not Satisfied.**

**N. C. Windrow**

S. A. U. & G. Railroad Added to List.

Austin, Texas, June 16.—The Railroad Commission has issued an order adding the San Antonio Uvalde & Gulf Railroad to the list of railroads in its circular of May 31, 1912, providing for re-consignment from market points on beef cattle.—Fowlerlton Reporter.

W. F. Sponseler is an applicant for postmaster and was circulating a petition today asking for his appointment, which was largely signed. Mr. Sponseler was one of the first citizens of the Frio Valley Winter Gardens, is courteous, affable and a man of splendid ability and will make a postmaster who will give satisfaction to the public.—Fowlerlton Reporter.

**"WE NEED WOMAN'S VOTE FOR JUSTICE"**  
SO SAYS U. S. SENATE COMMITTEE IN REPORT.  
Recommends Adoption of Amendment to the Federal Constitution, Washington News.

Washington, June 24.—Advocates of woman's suffrage are rejoicing over what they believe to be the greatest stride yet made towards the attainment of their goal. This is the report of the Senate Women's Suffrage Committee, presented through Senator Ashurst of Arizona, recommending that a constitutional amendment granting the franchise in national elections, be submitted to the various State Legislatures.

Whether the Senate will act favorably upon the recommendation at the present session of Congress is problematical, but even if it should not, the suffragists would still be satisfied, because of the influence on public opinion that the committee's finding is certain to have.

These suffragists believe this recommendation by a committee of the nation's greatest deliberative body will take their cause forever out of the joke class and make it, to every man, a matter for serious consideration.

The committee not only says it would be just to grant the franchise, but asserts also that the country needs the women's votes to insure the perpetuation of liberty, justice and law. Here are some excerpts from the report:

"The people constitute the Government. They are its creators and its maintenance; they are the government."

"That the granting of the elective franchise to women would add to the strength, efficiency, justice and fairness of government, we have not the slightest doubt."

"It is archaic, in a free republic professedly made up and controlled by and administered for all the people, to deny to one-half of its citizens the right of exercising a valuable function of citizenship, thus precluding that one-half from the right and power to say what law or policy shall be its rule of conduct."

"And this becomes odious and abhorrent when we reflect that the particular half of the citizenship thus excluded is the identical one-half from which springs so much wisdom, courage, cheer, hope and good counsel."

"This class of voters looks to all laws and movements as to how such laws and movements will affect her children, how such laws and conditions will promote morals, human health and human progress, more especially than as to how this or that particular law or policy will develop or serve material or property interests."

"In other words, 'man looks after the affairs of life, but woman looks after life itself.'"

**LOCO WEED KILLS WOMAN**  
Poison Cooked With Greens Causes Death After Stupor.  
Maxwell, N. M., June 24.—Mistaking loco weed for greens, Mrs. I. M. Head became ill after eating the weed and died after remaining in a stupor for two days. She had been here but a few weeks and was not familiar with the loco weed. It looked like weeds she had gathered with greens back in Texas. The greens were sorted for dinner but other members of the family ate only a little of it.

**KISSES A MULE AND IS FINED.**  
Ft. Worth, Tex., June 24.—Because he kissed a mule, J. H. Kelley, a laborer, was fined \$25 in the city police court.  
He was arrested by Patrolman Stanley, who explained to the court that he found Kelley on the street fondly caressing a big brunette mule, kissing it on the nose, even when the animal refused to reciprocate.  
Kelley declared he was intoxicated and pleaded for leniency, promising he never would kiss a mule again, but the judge sternly imposed the highest fine the law provides.

**"CREBOL"**

## OTHER STATES WATCH TEXAS.

The Texas Industrial Congress is an object of interest in so remote a province as Moose Jaw, Saskatchewan, Canada. In a letter to the Congress, the editor of the Saskatchewan Farmer compliments the organization and requests further information concerning the methods whereby its results are obtained.

The Boston Chamber of commerce also comments upon the work of the congress as a result of a study of the 1913 map showing contestants in 215 counties. In a personal letter the agricultural committee requests a supply of these maps and other printed matter for distribution.

That the work of the congress is attracting national attention is further evidenced by the following from the Cincinnati Star in an editorial outlining the general plan of the congress and closing with this praiseworthy paragraph:

"The value of such a system should commend itself to agriculturists of other states. The Texas Congress furnishes an excellent mode. This institution disseminates instruction to the farmer students by means of personal letters and printed bulletins, the cost being covered by the organization, which believes that already the agricultural output is on the threshold of a material increase."

Use brains as well as brawn, is the keynote of Texas Industrial Congress. The prizes it gives away each year are merely inci-

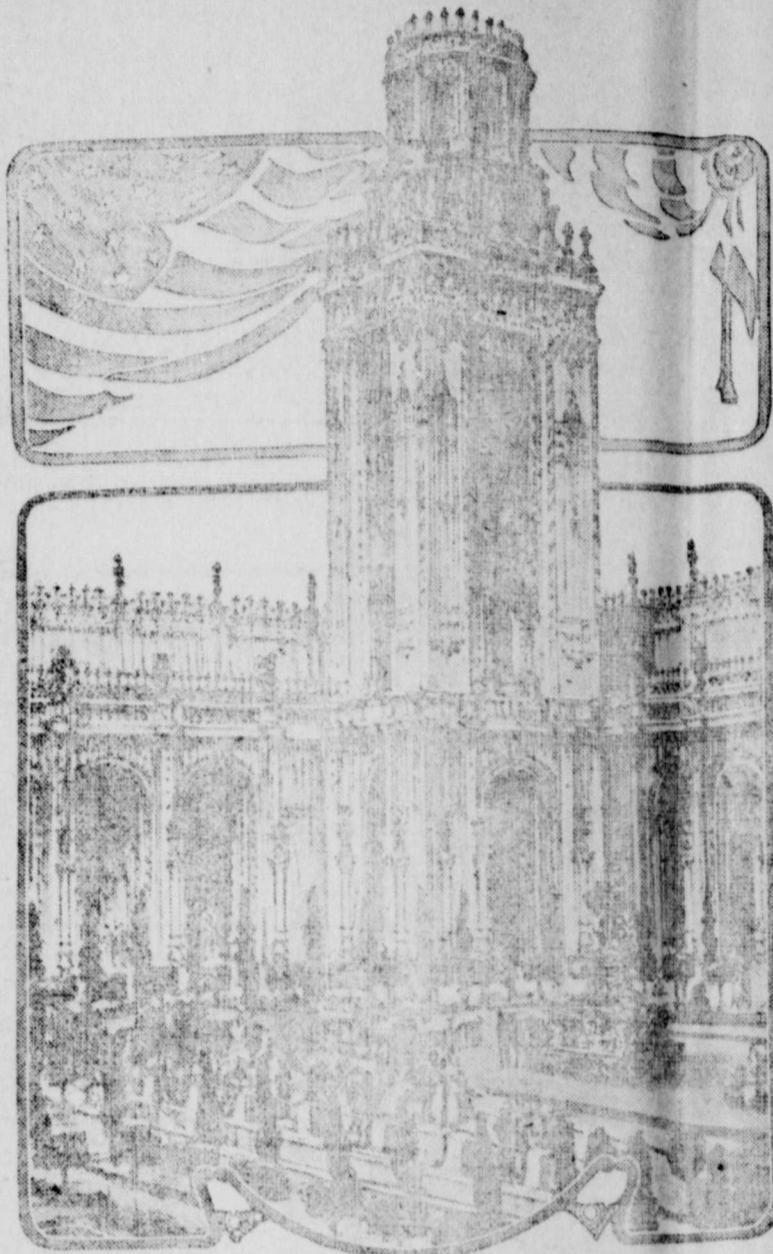

dentals. The farmers do not claim that prizes, not prizes, are what the farmers want. We might as well say that the college students want education without honors, that the professional man wants money without prestige. According to the price theory the principle of giving premiums at the Great State Fair of Texas, an institution that has proved its usefulness to the farming classes, is wrong and unsound. The man who is willing to be taught, or better still, teach himself how to make one acre of crop prove more profitable to him than five acres did before, is not only helping himself; but he is aiding in the solving of the world's economic problems.

The Texas Industrial Congress is doing much for Texas. Its usefulness will be greater as the years roll by. It stands for brains as well as brawn. The right combination of these two elements in man means success, both in prices and prizes.

If the balance of the summer continues as cool as the month of June there is no need of looking for a cooler climate. There has been no heat to speak of, every day being pleasant and the nights cool enough for light cover after midnight. Take it all around our summers are not so bad, anyway. It is true the thermometer goes pretty high, but there is always a breeze, and prostrations are unknown.

The speed fiend had better look out hereafter when he approaches the town limits, for it has been handed down that no mercy will be shown.

## PANAMA-PACIFIC INTERNATIONAL EXPOSITION, SAN FRANCISCO, 1915.

Copyright, 1912, by Panama-Pacific International Exposition.  
 An echo tower in the Festive or East Court. At night the East Court, with its pavements of gold, its great banks of flowers, and its lofty palms, will be flooded with light. Musical masterpieces of the world will be rendered by the chimes in the towers. Great saengerfestes and choral festivals will assemble upon the floors of the court. In the Festive Court, the visitor will behold a vision surpassing the richest dreams of Oriental or Moorish architecture. The floors of this court will be in tessellated pavements of gold in the center of the court will be great groups of sculpture with fountains, dancing nymphs and satyrs. There will be great fountains upon which magic lights will play at night and at night this mystic court, as all others, will be flooded by a glow of indirect light which will resemble a bright moonlight. At the south end of the court will be a huge tower 270 feet in height in which will be a great organ with echo organs in smaller towers of the court. The Festive Court will be a court of music, of acting, and symphonic dances. Here will assemble many of the great segments of Oriental nations that will take part during the exposition; here too will come many of the processions from the amusement center, which will be designed to draw attention from the more serious phases of the exposition.

### 1912 COTTON CROP

The cotton crop of 1912 is the most valuable one in the history of the cotton industry according to preliminary estimates furnished the Commercial Secretaries and Business Men's Association by the Federal Census Bureau. The Texas yield in 1912 was 4,880,210 bales of 500 pounds or 624,000 bales more than the 1911 crop, while the 1912 yield in the United States was approximately 3,000,000 bales less than in 1911. The excessive yield in Texas was absorbed by floods, droughts and unfavorable conditions in other southern states. The world's consumption of cotton in 1911 is reported by our Census Bureau to be 20,402,000 bales of 500 pounds net and the 1912 production will, according to reliable estimates, fall slightly under these figures. The 1911 world's production amounted to 22,297,000 or an over-production of approximately 2,000,000 bales. The average price of cotton for 1911 was 9.9 cents per pound and in 1912 the price was 12.05. The 1912 Texas crop, including seed, sold for \$338,538,822 which is an advance of \$90,658,000 over the 1910 crop, its nearest competitor. The effect of over-production in 1911 made itself manifest in the price per pound. The 1912 world crop while 2,000,000 bales under the 1911 production, will, in all probability sell for several million dollars more than the 1911 crop. It will be 60 days before complete reports on the world production and prices are announced.

There were 4103 equivalent 500 pound bales of cotton produced in La Salle County from the crop of 1912 and the lint and seed sold

for approximately \$1,000,000. The lint sold for \$247,200 and 2,051 bales of seed produced in this county brought \$37,192.

### LOCAL DRUGGIST MAKES STATEMENT

Says Dodson's Liver Tonic is the Best Remedy for Constipation and Shifting Liver he has Ever Sold.

Every person who has tried Dodson's Liver Tonic and knows how surely and gently it starts the liver to working and relieves biliousness will bear out the Gaddis' Pharmacy in this statement about Dodson's Liver Tonic.

"It is a purely vegetable liquid, that entirely takes the place of calomel, harmless and pleasant to the taste, that has proved itself the most satisfactory remedy for a slow-working liver that most of our customers have ever tried. A large bottle sells for fifty cents and we do not hesitate to give the money back to any person who tries a bottle on the strength of statement and is not satisfied with the result."

In these days of doubtful medicines and dangerous drugs, a statement like the above is a pleasant assurance that Dodson's Liver Tonic is a reliable remedy for both children and grownups. In buying a bottle for immediate or future use it is well to make sure you are getting the genuine Dodson's Liver Tonic and not some spurious imitation that has copied our claims, but do stand back of their guarantee. You may be certain of getting the genuine if you go to Gaddis' Pharmacy for it.

### "MISCELLANEOUS SHOWER"

Miss Alma Coleman, the bride of the week, was complimented Monday afternoon by the Philaetha Girls who gave her a miscellaneous shower at the beautiful home of Miss Binkley.

The rooms were beautifully decorated with ferns, cut flowers, and pink and white hearts. The decorations together with the beautiful afternoon dainties of the guests made a scene that was truly beautiful.

The guests were received by Mrs. Binkley and Miss La Uretta, and then passed on seeking out the blushing "bride to be." Miss Coleman was found looking lovely in white marquisette over white satin, with large picture hat. After all had collected a lively debate was had, the question being resolved: Married life is happier than single loneliness. Miss Borchers and Miss Jessie Copp had the negative and were strong for single bliss, but the judges decided to leave this decision with "Old Father Time." A Musical Romance was given by Mesdames Binkley and Wickmann, that was interesting. Miss Alma Coleman won the Philaetha Pin, for the best guesses as to the musical numbers in the Romance. The piano selections given by Misses Borchers, Lacey, and Wheeler were appreciated. Mrs. Wickman was the fortune teller, who while holding Miss Alma's hand, bade her follow the line in her hand, and seek her fortune in the next room; this line of thread led the mystified young lady to the room where the shower was arranged; this line being tied to the numerous and various gifts of linen, silver, glass and etc. that were too numerous to mention.

In the refreshment room Mrs. Seefeld poured tea and Miss Binkley and Miss Lacy, served a delicious two course luncheon from the buffet. After lunch each guest was given a paper heart, on which she wrote in rhyme her wishes for the prospective bride. The hearts were collected, the wishes read, and then the hearts were bound together, and given to the honoree as a souvenir.

This little affair was beautifully arranged, showing in every detail exquisite taste, in fact, it was a splendid success.

The out of town guests present were, Mrs. Seefeld, Big Wells, Miss Julia Porter, Virginia, Miss Borchers, Laredo.

The party given by Mr. and Mrs. Henry Fullerton last week, complimentary to the Presbyterians, ladies, their husbands and men, friends, was in every sense a success.

The midnight lunch of fried chicken, salads, sandwiches and other dainties, was specially appreciated by the men, who noted that Mrs. Fullerton had learned well the quotation from Lucille: "Men may live without friends; Men may live without books; but civilized man cannot live without cooks."

The out of town guests were Mrs. Miller of Houston (who is a house guest of the Fullertons) Mrs. Rogers, of Luling; Miss Edna Earl Douglas, San Antonio, and Miss Borchers of Laredo.

### RECHENTHIN-COLEMAN

A pretty wedding ceremony was performed by Rev. T. N. Barton, at 8:30 Wednesday morning, June 25th, inst. uniting the Eves of Miss Alma V. Coleman of Cotulla and Mr. J. A. Rechenthin of San Antonio.

The ceremony was performed in the home of the bride's mother Mrs. J. B. Coleman, with only the immediate family and a few very intimate friends present.

Miss Coleman has been raised in Cotulla where she has a large circle of friends who have admired and loved her, for her many charming traits of character and bright personality.

Mr. Rechenthin's home is in San Antonio where his parents and other members of his family reside; he is conductor on the I. & G. N. and has been running into Cotulla for 12 years, and is well and favorably known here, where he has many friends.

Those who saw the bride said she looked lovely, in white embroidered voile, over white mesaline, with accessories to match.

Mr. and Mrs. Cohenour drove the wedding party to Gardendale where they took the train for Galveston to be gone about ten days. This young couple bear the good wishes of Cotulla's people for a bright and prosperous future. The out of town guests were Miss Rechenthin, San Antonio, Miss Annie Mae Ehlman, Pearsall, Miss Ethel Reed, San Antonio.

For Sale—Jersey cows fresh in milk. Will sell \$10 down, \$5 per month.—J. H. Gilbert, Cotulla, Texas.

## FEED CROP STORED IN SILO.

The first silo to be erected in this section of the country was put up last week on the J. G. Childers ranch west of Cotulla and this week has been filled with ensilage. The size of the silo is 20 feet in diameter and 30 feet in height and has a capacity of 185 tons.

Mr. Childers had a good corn crop and also a good crop of sorghum, and the entire acreage on the place was put up in a short time. The machinery cut the corn and cane up and delivered it into the silo as fast as six teams could haul it out of the field or at the rate of about ten tons per hour.

Mr. Childers has also put up a silo on his ranch east of Millett. These silos are made of lumber. They can be made of any kind of material just so they will be air tight. In this dry climate it is the opinion of many that they can be constructed more cheaply in the ground. No water is encountered for twenty or thirty feet, and the formation is such that only cement plaster is needed on the walls. The only objection to the ground silo is the trouble in getting the ensilage out, but it is thought that this can be overcome in an inexpensive way.

Mr. Childers believes the silo will revolutionize this part of the country in the next five years.

The Texas industrial congress recently issued a bulletin on the Silo, and for information of the general public we herewith reproduce it.

It is said that there is nothing new under the sun, and the truth of this saying is well brought out in the present agitation among the well-informed to induce the farmers of this State to give more attention to the silo. So many the name silo convey no

meaning, as they are in ignorance of what it is, and the ancient Egyptians used the silo thousands of years ago. Reduced to its simplest terms, a silo is really a big can, corresponding in nearly every way to the cans in which the housewife preserves her fruit, and it is intended to, and does serve, the same purpose.

It is a means of preserving green feed in its original form for stock of all kinds. Just as the housewife can insure a plentiful supply of both fruit and vegetable for the use of the family during the whole year, so the provident farmer who provides himself with a silo can be assured of an abundance of wholesome nutritious food for his stock in times of scarcity. The principle upon which the silo is founded is the fact that decomposition and decay can only take place in any material through the agency of germ life, and in the presence of air. If this material is placed in an air-tight vessel, the germs it contains are killed, the air surrounding the material withdrawn, and if no new germs are allowed to

# O. A. BROWN.

enter, the material will remain in the same condition in which it was gathered for an indefinite time, and will be just as valuable as feed when fresh. The housewife accomplishes these desired results first by heating the material and then by sealing up the can. This would not be practical with the large quantities of feed required for our stock. So the same result is accomplished in a different way. Using the ground

as a bottom a structure is erected the sides of which are air-tight, or made air-tight, when they get wet. These sides are made of a variety of material, the most common being lumber, stone, cement and brick. It does not make much difference what the material used just so the sides are made airtight, and that they will hold the pressure of the material with which the structure is filled. What is known as the stave silo is usually made of pieces of two by four lumber, set upon end, just as the staves of a barrel are put together and bound around with hoops that can be drawn together. It is usual to have these staves twelve to sixteen feet in length, and often two are placed upon end, so that the structure is from thirty to thirty-two feet high. The diameter of the silo will vary, for reason given later, with the number of stock that it is desired to feed. After the silo is erected it is filled with such material as green corn sorghum, kaffir, milo, or almost any green feed which is chopped into lengths, varying from one-half to three quarters of an inch and packed firmly into the silo. When first placed in the silo the material undergoes quite a heat and some souring. This heat, however, expels the air that is held between particles of material, and at the same time goes so high that it kills all germs life. As in the meantime the material has packed down very closely, no new air or germs can enter; so the material soon cools off and remains unchanged for an indefinite period. This first heating has done two things. It has generated a small amount of acetic acid, a substance that aids digestion and has also acted upon many of the substances of the food and rendered them easier of digestion when taken into the animal's stomach. The result, then, is preserved green feed for stock for any time of the year and that green feed is even more digestible than when it was first

cut. A silo can be built at a cost of a little over a dollar per ton capacity to two or three dollars, depending upon the material and the finish. No cover is necessary, as rain does not injure the ensilage. Even a pit in the ground can be made to do service as a silo, especially in the dryer sections. After the silo is filled to the top, two or three inches of material spoils, so in designing the silo it is necessary to calculate to a layer over the top surface each day. In this way it is fed up before it has time to spoil.

Ensilage keeps better in a deep, than in a shallow silo, so it is customary to build them twenty to twenty five feet in height. A silo ten feet in diameter and twenty five feet high will hold about thirty-six tons of ensilage. A well fed dairy cow will consume from thirty to forty pounds of ensilage a day. From this data one should be able to calculate the size of silo needed.

Ensilage can ordinarily be grown and put up for about three dollars a ton while in feed value, when properly combined with other materials, it is easily worth six dollars. Outside of the actual nutrients it contains it is of especial value to the dairyman because it enables him at all times to have green feed. It is of equal value to the beef feeder as it is well known that animals never take on flesh as rapidly and as cheaply as when supplied with a certain amount of green

succulent feed. Besides proving of value during winter, the Texas feeder will find ensilage of inestimable use in helping him tide over the hot, dry summers and falls. While almost any feed material, except those consisting of hollow stems, will make valuable ensilage, there is nothing quite so good and so valuable as corn and the grain sorghums. Ordinarily for each five bushels of corn that a field will yield it will make a ton of ensilage.

The corn from a thirty bushel field would be worth, at fifty cents, fifteen dollars, while the ensilage from the same field would be worth twice as much. So, besides being a means of supplying green food to stock, the silo is also a means of adding very materially to the value of feed stuff, and also of utilizing the cornstalks that constitute forty per cent of the value of a cornfield, and that are too often lost. Again, it costs less to save ensilage than to save the crop in any other form. At the same time a man with a silo is independent of the weather. He can fill his silo while the rain is pouring down. On the other hand, should there be danger of losing his crop from dry weather, he can cut it and place it in the silo and so save it. Corn makes the best ensilage when cut after it is well glazed, but it can be cut at any time during its growth and will still make valuable feed. The farmers of Texas therefore cannot afford to further neglect it as means of adding to the value of their feed crops.

The trade is offered some rare bargains in this Slaughter Sale---some bargains you can hardly afford to miss. We hope you won't miss them. Come in and let us show you, and we will convince you that now is the time to buy.

IF YOU DELAY THE BEST WILL BE GONE.

K. BURWELL.

## SOCIETY

### KECK-SIMPSON

A wedding occurred at Vilonia Ark., early Wednesday morning, that united the lives of Mr. Frank R. Keck of Cotulla and Miss Fannie Mae Simpson of Vilonia.

The ceremony was solemnized at 7 o'clock, the morning of the 25th. of June, at the home of the brides mother, Mrs. G. N. Simpson; the Methodist minister of Vilonia officiating.

A large number of the relatives of the bride, a few close friends and the mother of the

groom [Mrs. T. R. Keck] were present.

The bride is a lovely young woman, beautiful in face, manner, and character, and she has many friends in Cotulla where she resided for 2 years. The groom has been raised in Cotulla and counts as his friend every one who ever knew him: Integrity of character together with a kind and affable disposition, has given this young man a host of friends. He is well known and highly esteemed in Austin, San Antonio, Tyler, San Marcos and other places.

The bride and groom, and Mrs. T. R. Keck left Vilonia at 8 o'clock Wednesday morning, the bride wearing a beautiful costume of tan cloth with accessories to match. The party stopped in Little Rock for a brief visit, then came on to San Antonio, where the happy young couple stopped to by furnishings for their pretty new home. They motored down from San Antonio Friday, and be with Mr. and Mrs. T. R. Keck a few days previous to house-keeping. This popular young couple, have the very best wishes of their many friends in Cotulla, and other places, for a happy and prosperous life.

Mrs. T. N. Barton was hostess to the young people of the Methodist Church Tuesday evening, in compliment to her guest Miss Borchers of Laredo:

About 30 young ladies and men enjoyed the informal hospitality extended by Mrs. Barton, and were pleased to be with Miss Borchers, who has become very popular in Cotulla.

At a late hour the hostess served fruit punch and cake.

Mrs. Will Tarver entertained the high school girls and boys Tuesday evening in compliment to Miss Williams of Yancey, who is a guest of Miss Pearl Evans. The young folks can always depend on Mrs. Tarver for a good time and this party was most enjoyable.

### LOCAL AND PERSONAL

Take advantage of the Slaughter Sale at K. Burwell's on Ready to Wear.

Mrs. G. M. Soles and children returned Monday from a visit to relatives in San Antonio.

Miss Abbie Mae Williams of Yancey is here spending the week with her cousin, Miss Pearl Evans.

Mrs. R. H. Seefeld and sister, Miss Julia Porter, of Big Wells were here this week, guests at the home of Mr. and Mrs. C. F. Binkley.

The Glorious Fourth is fast approaching. Nothing of unusual occurrence has been scheduled for this immediate neck of

the woods.

Jas. Bell and family are on their annual visit to relatives at Cuero. They left Monday night and expect to be gone about three weeks.

Miss Tehula Coleman returned to Galveston Tuesday after a couple of weeks stay here with her parents, Mr. and Mrs. W. J. Coleman.

When in need of Coffins, Caskets or Burial Robes, H. B. Stedham will appreciate a call day or night.

The property Fullerton & Son recently purchased from Mrs. Landrum on Center street is being remodeled and painted up. Mr. Fullerton contemplates moving in his business to this stand in about thirty days.

H. W. Earnest, business man of Millett, was here Thursday and left a couple of stalks of cotton at our office that came from fields East of Millett. This cotton was heavily loaded and Mr. Earnest says the prospects are exceptionally good. West of Millett but little rain has fallen and crops are not in such fine shape.

F. I. Rock has had on the local market this week some fine plums grown at his farm down the river, and in a way demonstrates that plums are one of the things that can be produced abundantly to take the place of onions, that have proven a loss to our growers the past three years. Mr. Rock's trees bear heavily each year. He brought to the RECORD office yesterday a twig eight inches long that contained thirteen plums, the weight of which was 24 ounces.

J. T. Maltzberger has an orchard that has been bearing splendidly every season but this year a hailstorm stripped the trees and he has very little fruit. Every farmer who has ever tried plums finds that it is an easy matter to get a large production each season.

### Pearsall Walloped in The Mud Yesterday.

The Pearsall ball team was walloped in good old style on very muddy diamond yesterday by the local team. The score was 12 to 3. Cotulla had the game all her way from the beginning and the visitors were kept from scoring until the seventh inning.

The Pearsall boys came down in automobiles and arrived during the rainstorm. Rain intervals after the downpour but after it ceased the game was played.

Cotulla went to Devine yesterday and lost by a score of 3 to 3. The game was a

the boys say, and they were beaten simply because they could not help themselves.

Telephone 24, and report your parties and other social affairs. The editor of this department is at your service up to noon Fridays.

### NERVITE

Nervite is the great nerve and brain remedy. It helps form gray brain matter. A simple home remedy made attractive for even the smallest children. If any cause produces nervousness, feed it to them. Nervite is a food and has absolutely no relation to opiates, stimulants and the like. Large box, \$1.00. Nervite is staining to any woman or man who is nervous, tired, worried or brain-fagged.

Amo House, Box 363. Atlanta, Ga.

### Charge Against Allee is dismissed.

The charge of murder against A. W. Allee for the killing of Manuel Guterrez last August in Webb county, was dismissed this week at Laredo by District Attorney Valls. Allee was acquitted a short time ago for the killing of Francisco Guterrez, and as the evidence was practically the same in both cases, the District Attorney could not expect a different verdict, consequently the dismissal.

### CHURCH NOTICE

Tomorrow being Fifth Sunday there will be no preaching at the Presbyterian church. The pastor will give the day to service at the Rockwood church.

### METHODIST CHURCH

Sunday School at 9.45 a. m. Classes for all. Jr. Epworth League meets at 2.45 p. m.

The pastor will be in Artesia Wells Sunday to preach morning and night.

T. N. Barton, Pastor.
