#### A \$4,000 DINNER.

#### How Forty Philadelplans Fnjoyed an Extravagant Repast.

New York can not claim all of the famous banquets that have tickled the palates of the gourmets. Other cities have served feasts which have an almost historic interest. In Philadelphia forty friends of the late F. B. Gowen, who was then president of the Central railroad of New Jersey, once gave that gentleman a dinner at the Bellevue which, says Current Literature, was a marvel in its way. The room in which in which it was served was thirtyeight feet square. Every foot of the wall was covered with green foliage. in which were concealed small electric lights of various colors. -The room itself was a veritable flower garden. So abundant were the masses of blossoms that it was almost impossible to move from the table without crushing some of them. The table was oval in shape, the center being filled with American

national reputation as a leader in re- beauty roses. From these radiated maipublican politics and a man of large denhair ferns across the table, thus attainments. How to Keep Flowers.

bler. Most flowers will retain their freshness for several days if kept over

night in the open air. Any one pos-

sessed of one of those delicate French

clocks that have to be covered with a

glass dome cannot do better than sell

or pawn the clock, usually an object

of neither use nor ornament, buy

flowers with the proceeds, and use

the glass dome as a protector for the

flowers at night. It will keep them

Aluminum.

Aluminum has the property, when

used as a pencil, of leaving an indeli-

ble mark on glass, or any other sub-

stance having a siliceous base. A

deposition of the metal takes place,

and while this may be used by a suit-

able acid wash, the mark itself can

not be removed by rubbing or wash-

ing. This property is susceptible of

decorating glass.

#### The Prix de Rome.

The Prix de Rome, once the object of the ambition of every art student in Paris, has declined so much in full moon." January and March of value that it is proposed to abolish it. that year had each two full moons, It carries with it a traveling scholar- while the intermediate month did not ship in Italy, and the plea of those have one. Says a writter in an aswho attack it is that a student possessing it wastes his talent in slavish fact: "Do you realize what a rare imitation of the Italian masters, thing in nature it was? It has not rather than developing it by the in- happened before since the beginning terpretation of nature. The sculptor, of the Christian cra. or probably since Rodin, the leader of the antagonists, maintains that this prize has only retarded the progress of the great men tations of the astronomer royal of who have obtained it in the past.

Not until after 2,500,000 years Columbus, Ga., is one of the best from 1866." paved cities in the country. It has 100 miles of paved streets, and no other city has so varied the paving Lovers of flowers who are not rich material to suit the varying conditions of different streets. The city enough to buy them have various has paved 87 1-5 miles of street with ways of prolonging the life and freehasphalt, stone blocks, paving brick ness of the few they for Violets and other materials at a cost of about they be kept if placed in fresh water and covered over night with a tum-

FOR WOMEN AND HOME

#### The Reason For It.

It is a common belief among women that the moth will not attack any green material, and many of them make it a point to buy stuffs of green dye whenever the color is not incompatible with the purpose for which the material is intended. Green dyes often contain arsenic, and that may account for the antipathy of the moth to the color.
