Longevity of Women. From the Baltimore Sun: A report from the office of the registrar general of England shows that there are more reak their big hearts. Although ap- 1,000,000 people 225 women reach the age of 100 years, while only 82 men round out the century. Now, the great conundrum which is proposed is, "Why is this so?" According to the popular superstition it takes much longer for a than it takes for a man to reach that age. If this is true it makes the showers may be traced by the trail left ing all the more remarkable. It has with women makes a man live longer, as shown by the fact that the average life of the married man is longer than the average life of a single man. The fact, however, is denied by the end man at the minstrels, who says that the ife of the married man is not really onger, but only seems so. So there is no satisfactory explanation of he original proposition why more women live to be a hundred. Some say is because women are less addicted tobacco and strong drink, others ay that it is because it is more healthy has made up his mind to bolt, he has all. Possibly the English registrar tion is replete with possibilities.
