

### Save Feed When Its At Its Best

This is the season when the weather tells the story—will there be a corn crop or not? As everyone knows there is a critical period in which corn either makes or doesn't. We have been in the habit of taking a crop of nubbins with the best grace possible, but few tasks are more thankless than gathering a nubbins crop.

Fortunately it is easy to escape that discouraging job—driving over an acre to fill the wagon box with corn that is mostly cob and shuck. Besides, when corn matures in the field the nubbins is about all we get, while the stalks themselves—at the right stage—contain just as much digestible nutrients for livestock as a crop of half-filled, short ears of dry corn.

When drouth threatens to cut the corn crop short, when the lower leaves begin to "burn", when it is plain that the grain harvest will be light—then it is time to save stalk and all while it is still green enough to make good ensilage. The trench silo is the answer. It can be dug in a hurry, and cheaply, and the ensiled corn will retain all nutritive value it had when cut. Instead of permitting the corn to stand in the field and completely dry up, why not save stalk, foliage, grain and all in one operation.

The trench silo is not only emergency crop insurance, however; it is life insurance for the livestock. It is "production credit" to keep up the milk flow, fat-

ten the lean kine, or merely hold normal health and vigor in the growing animals through the months of drouth or cold. As such it is becoming as common on Southwestern farms as barns and corn-cribs. It is the cheapest storage known, and retains more of the digestible nutrients in the feed than any other form or method of curing or storing.

Now that the peak of crop cultivation is passing, there will be time in the next few weeks to get the trench silos ready.

The best ensilage is made by cutting the corn or sorghum after the grain hardens but before much of the foliage dries up—while the stalks themselves are still green and succulent, but not before the grain is well matured.

This is one of the things we have learned since the silo boom of forty years ago—the best ensilage is not made from immature crops, as used to be recommended. That we can make ensilage from even dry stalks by supplying enough water to saturate them and facilitate fermentation; but the natural juices of the plants are better, and the crop should be ensiled at its best.

Some other things we have learned about trench silos: the walls should not be perpendicular, the ensilage packs and keeps better in a trench with sloping walls because in settling downward it is wedged into narrower space and thus avoids shrinking away from the walls, which permits air to enter and spoil the outside of the mass. Also, sloping walls are easier maintained.

The walls should be as smooth as possible in any case. Old silos in which the walls have sloughed off in places should be smoothed up before filling. This will widen the trench to increase the area of the "face" from which the daily supply is cut. The relative width and depth are not as important considerations as keeping the square footage of the face in proportion to the number of animals to be fed. Talk it over with the county agent, or your neighbor who has one, follow proven recommendations.

### DOWN THE ROAD

By Charles M. Upham, Engineer-Director, American Road Builders Association

#### Good Roads Help Decrease Rural Crime

Crime doesn't pay in 1939. A few decades ago the professional bad man robbed, killed and escaped with comparative impunity. Jesse James might have continued his lawless activities for many years if a "friend" had not betrayed him. Outlaws today are fortunate if they evade the law-and-order forces for even a few months. The James brothers had the whole West to hide in. John Dillinger, Alvin Karpis and their fellow felons found the entire United States too small to conceal them from their pursuers.

Modern methods and materials are mainly responsible for the obstacles which today make the way of the transgressor particularly hard. Modern roads and radios are the twin foes of the twentieth century public enemy. Constant improvements in these two weapons of righteousness are making it more and more difficult for the robber or kidnapper to successfully ply his "trade".

The most important part of any crime is the getaway. Not so long ago, gunmen found the perfect answer to this problem in certain rural sections of the nation. High-powered automobiles brought metropolitan crime to the American countryside. The comparative isolation of these sections made them ideal for quick "jobs", easy getaways and safe hideouts. But times have changed. Federal agents and state police are now matching the fast automobiles of criminals with equally speedy vehicles manned by drivers trained in pursuit tactics.

The continued construction of a network of good secondary roads joined to main highways is making it possible for the country dweller to enjoy as adequate police protection as his city cousin. Sections of the United States in which the lawbreaker can feel safe from pursuit are steadily becoming fewer.

Last summer, according to Chief Water Williams, superintendent of the Illinois State Highway Police, the middle west saw its greatest blockade. The Easton brothers, two Idaho youths, shot a police officer in Idaho and fled into Illinois in a stolen car. Immediately the State Highway police in Illinois went into action.

### Boll Weevil and Flea Hopper Control.

By T. C. Richardson, Editor Farm and Ranch Feeder-Breeder Association

It is one of the ironies of nature that soil and rainfall conditions which are most favorable for the growth of the cotton plant are also most favorable for the multiplication of insect pests. The more luxuriant the growth the better the boll weevil, the flea hopper, and the leaf worm like it. It is not uncommon for a casual observer to remark on the promising appearance of a field of cotton, in which a close examination will show the the flea hopper is destroying the fruiting buds, the boll weevil is laying eggs in the squares which escape the flea hopper, and the leaf worm moth has deposited her eggs on the lower side of the tender foliage—the more luxuriant the better she likes it.

None of these insects will attack slow-growing, drouth-stricken cotton by preference, but may do considerable damage on any kind of cotton if that is all they can find to feed on. What we are here trying to say is that when cotton is growing fast it is mighty important to watch for the insects and see that they do not destroy the fruit to such an extent that "weed" is all that is left.

At this stage cotton should rapidly set squares and the squares become blooms. If rank-growing cotton doesn't look "like a flower garden" every morning there is something the matter. Every cotton grower knows that cotton naturally "throws off" part of the embryo fruit, but natural shedding and insect damage are two quite different matters. The early and mid-season blooms and bolls are most important in the yield, and must be saved from insect damage in order to insure a normal yield.

With the greatly reduced acreage in cotton under the AAA it becomes the more important to secure good yields from the acreage we have, and controlling insect depredations is one proven means of so doing. Besides, insect control which permits the "weed" to hold all the early fruit it can carry brings in the main crop to maturity earlier in the season and a higher percentage of it is harvested at the first picking, when the grades are better than later.

A good many people do not get excited about insect pests until the leaf worm appears, and yet the leaf worm destroys far less cotton than either the flea hopper or the boll weevil. By the time the leaf worm becomes numerous enough to do real damage, the flea hopper and the boll weevil have already got in most of their deadly work.

The fight against cotton insect pests is greatly simplified by the fact that a good dusting machine will handle all four—flea hoppers, boll weevils, leaf worms, and boll worms—if used properly at the proper time. Dusting sulphur and calcium arsenate are the only insecticides necessary, if the campaign begins on time and is continued at intervals of five to eight days until the insects are under control. If no early dusting is done, heavier dusting, or extra arsenicals in the mixture may be needed to handle a heavy infestation of leaf worms, but it is both less effective and more expensive than a program which begins while the cotton is comparatively small and is followed up at regular intervals.

It is all right to make a count of the pests present if one knows how and wants to do so. The safest, surest, and in the long run, the cheapest, plan is to prevent rather than to cure. When the Radio kept them advised of the pair's progress. The shooting took place at 6:20 p. m. on June 26. At 8:52 the next morning, the police closed their records on the case. One brother had been shot down and the other placed under arrest.

The same systematic procedure is being successfully utilized to recover stolen goods and automobiles and to locate missing people. Between June, 1936, and November, 1938, the Illinois State Police recovered nearly \$2,000,000 worth of stolen cars and other property.

What is being accomplished in Illinois can be duplicated in other states. The building and maintenance of good secondary roads will bring police protection to citizens living in the most remote places.

flea hopper begins to destroy the little fruit buds use sulphur. When the boll weevil comes out of hibernation, or begin to sting the squares which have escaped the flea hopper, a one-to-two mixture of calcium arsenate and sulphur is best. When leaf worms appear calcium arsenate alone will handle them if properly applied. No wet spray is necessary.

### GOVT CHEMISTS DISCOVER NEW MINERAL

Discovery of a new mineral, officially named "shortite", was announced today by the Geological Survey, Department of Interior.

Composed of a double carbonate of sodium and calcium, the new mineral was found and identified by J. J. Fahey, chemist, in the Geological Survey Laboratory. It was discovered as disseminated well-formed crystals in sections of core from the John Hay oil and gas well, drilled by the Mountain Fuel Supply Company on leased Government land in Sweetwater County, Wyoming, at depths of 1,250 to 1,800 feet below the earth's surface. Shortite was named in honor of Doctor M. N. Short, a former geologist of the Survey who now is Professor of Optical Mineralogy at the University of Arizona.

Although the commercial value of "shortite" is not definitely known, the new mineral is associated with considerable quantities of trona, sodium carbonate-bicarbonate, which does have potential commercial value. Trona was identified in a sample from this same well in 1938 by R. C. Wells, chief chemist of the Geological Survey. Additional samples for further laboratory examination will be collected by Mr. Fahey who has left Washington, for the shortite-bearing area. It is expected that sections of core, two inches in diameter, and totaling a few hundred feet in length will be transported to Washington.

### THE HOT CHECK LAW

Among the controversial measures which enlivened the 46th Session of the Texas Legislature, was the so-called "Hot-Check bill." Both the House and the Senate finally agreed on its passage. It is now on the desk of Governor O'Daniel.

The measure is said to have "Teeth in it."

Now the question is "Who will the teeth bite?"

Will it bite the State of Texas? The answer is "No."

This latter question is suggested by the virtue of the fact that Texas is the greatest writer of "hot-checks" known in the State today. For Texas has overdrawn many of its accounts and hard working men and women on the payroll of the government, who draw reasonably low salaries, as well as the more favored who get the biggest pay, are given "hot-checks", which they have to discount or wait an indefinite period for them to be accepted at their face value.

The lawyers will quote this law to the effect that anyone going into a court of equity should go with clean hands.

This is no defense of the man or woman who may write a check impelled by criminal intentions. But after all, should not a man be allowed to use his own judgement as to whose check he cashes and let him be the one to "beware"?

Mrs. Flem McSpadden attended the Luna-St. Romain wedding and reception at Plains last week, and had charge of the church decorations.

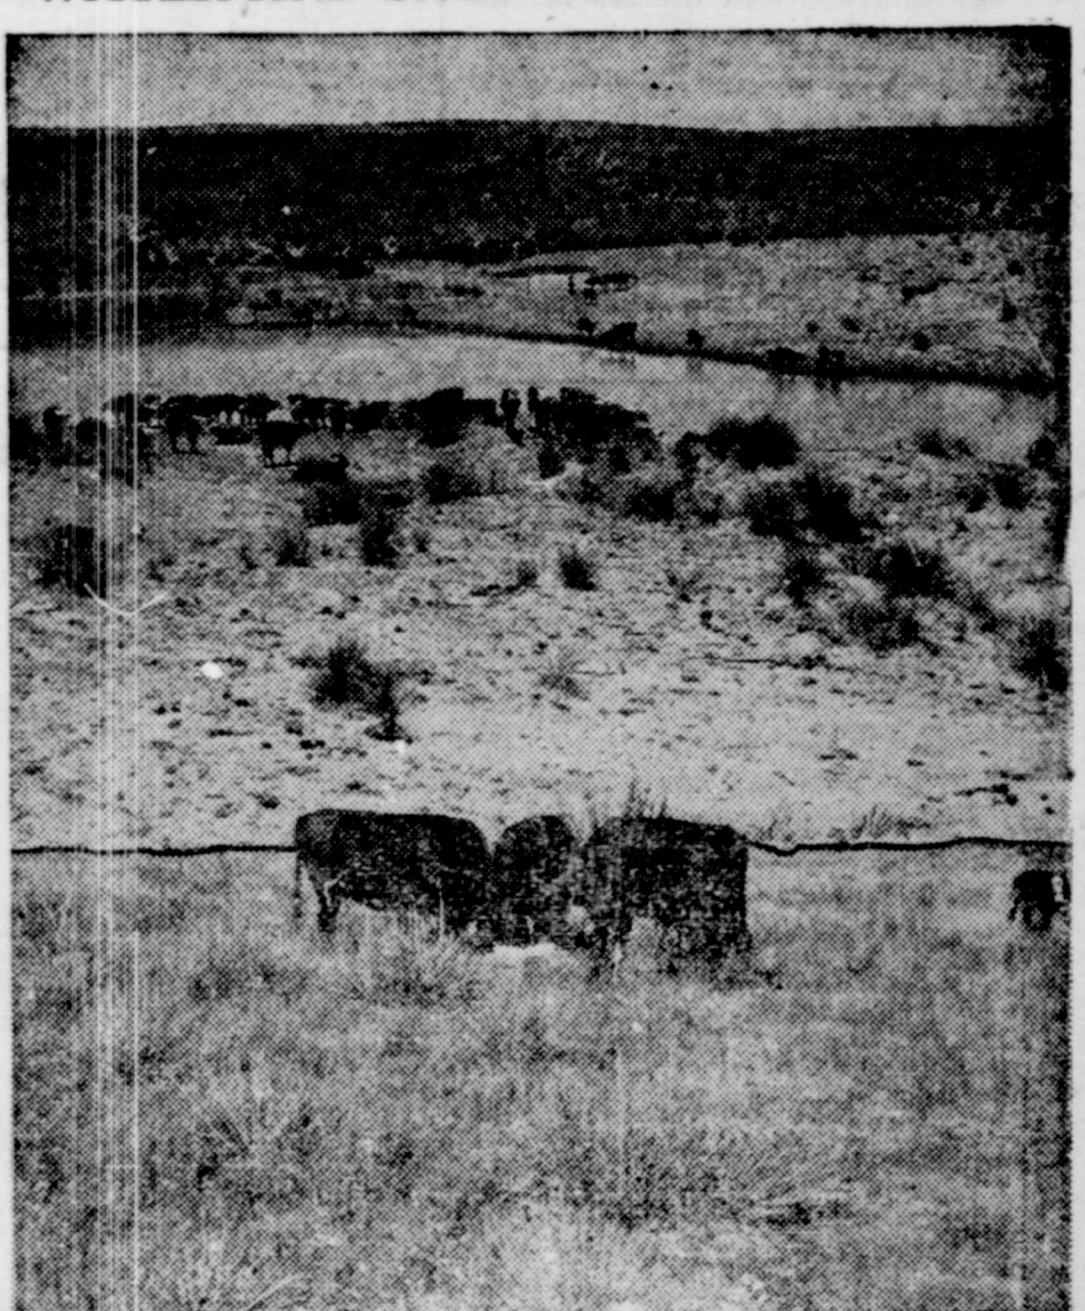

The new find probably will be one of the few mineral discoveries for the year. So thoroughly has the earth been combed that, during the past two years only about twenty new minerals were discovered in the entire world.

A full, technical description of the metal will be published in The American Mineralogist.

We thank Willie Winn for a nice bag of peaches from his fine farm at Gomez. Also, thanks go to Eldon Brewer who shared with us some nice peaches sent him by his father at Cleburne, Texas.

H. D. Heath, Jr., was in Wednesday from their Stanford Valley farms, and have reported good rains, and grass coming along nicely in that section of old Yeakum.

### WATER AND SALT CONTROL GRAZING

Proper location of stock water ponds and salt licks is doing much to improve grass land in the Southern Great Plains.

Livestock will travel as far to reach a salt supply as they will for water. Distribution of water holes over the range and location of salting places in remote spots, as shown in the picture, result in better utilization of grass and guard against overgrazing. In carrying out the program of better range management in the Plains region the Soil Conservation Service has aided ranchers and farmers in constructing more than 1200 ponds similar to that shown at the top.

The Dean Ranch since co-operating with the Lamesa Camp have built nine new dams, repaired five old dams and put up several new wind mills to better distribute grazing. In addition to this they have built 60 miles of fence, dividing the larger pastures into one to two section pastures. This makes it possible to give the pastures a rest period and allow them to reseed at regular intervals.

Welcome to the HOTEL COFFEE SHOP or HANCOCK CAFE

It's Degrees Cooler Inside---Both Places Air Conditioned.

If you happen to be on the west side of the business district or the east part of it, one of these cafes will be near you to serve you with a full and complete menu of well cooked foods of every description in season.

We must please you before we are pleased.

Mr. and Mrs. B. C. Hancock, Props.

"Behind The Scenes In American Business"

NEW YORK, July 3—BUSINESS—As the third quarter of 1939 gets underway, a business man looking backward with one eye and forward with the other might well say to himself, "business fared not so badly as it might have, and from now to Christmas it ought to progress very nicely."

The first admission would be in order because, despite confidence-shaking war scares earlier in the year and a prolonged labor dispute in the important bituminous coal industry during April and May, activity in most industries and trades has worked doggedly upward again to near the level of operations prevailing at the start of 1939.

WASHINGTON—Federal officials and statisticians currently are

enjoying a field day in determining who is and who is not a monopoly, investigating all and sundry charges of monopolistic control. The Bureau of Economic Agriculture has just completed a survey of chain store distribution of fruits and vegetables in the northeastern states, concluding with a refutation of the charges made by wholesalers that the chains are monopolizing the field.

"There are many competing handlers," the report states, "not only in retailing but at all points in the distributive process. That any single chain could exercise much control over their prices and margins under present conditions is therefore not probable." Food distribution monopoly, it declares, is harmful to growers and consumers when it results in marketing "spreads" greater than usual. In this respect the bureau notes that charges commonly made against the chains are not that they have enhanced prices and taken unduly wide margins, but rather that they have "reduced prices to the consumer."

SUCCESS PATTERN—Particularly at this season of the year, industry renews its faith in youth and education by combing the colleges for promising honor men, whether or not they have been voted by their classmates "most likely to succeed." American industry itself may well earn the verdict "most likely to succeed" if it learns from the example which figured in the news of business last week.

John Hay Whitney, chairman of Freeport Sulphur Company, announced the election to the board of Dr. Alan Valentine, 38-year-old president of the University of Rochester.

Valentine is a man who, Mr. Whitney said, "as a result of his attainments in a broad field, has a practical understanding of present trends and will contribute greatly to the further development of the company in the best interests of the stockholders and the public."

"It is the feeling of our board," Mr. Whitney further explained, "that industry must recognize an American people on the part of enlarging responsibility to the American business. The future of the country and all its citizens is closely bound up with the contributions of corporate business to the job of making democracy work. In our opinion, there is a real need in business for men with broad experience in current sociological and economic problems, as well as administrative ability."

THINGS TO WATCH FOR—A new bicycle speedometer which records speeds up to 50 miles an hour and distances up to 10,000 miles for a trip... More young men are getting a chance to learn aircraft building as a result of Lockheed Aircraft plan, dictated by shortage of skilled aviation workers, to start an apprentice school. Apprentices will be paid about half of journeymen's prevailing wage rate for part-time work between classes during a four-year period... A new furniture finish is said to have the quality of lacquer to "build" of varnish, but drying from three to five times faster than either... Cinecolor, Cosmocolor and Dunningcolor, up-and-coming rivals of Technicolor... A new type of ironing cord for housewives. It stretches easily to a seven-foot length, but automatically snaps back to an eight-inch coil when not in use... a new air-conditioning unit using natural or artificial gas to provide both heat in Winter and to run the cooler in Summer.

ALAS, TOO TRUE Teacher (in a hygiene class): "Billie, how does starch affect the body?" Billy: "Well, if you eat too much of it, you die and get stiff!"

H. G. Garner is entitled to pass to see at RIALTO Fri.-Sat.

"THE GORILLA" (pass good for one only)

Frank Ballard is entitled to pass to see at RITZ, Fri.-Sat.

"TEXAS STAMPEDE" (pass good for one only)

Ed Thompson says that his crop is making fine progress since the rains.

Bruce Hancock has purchased the furniture and fixtures of the Hotel Brownfield, and now is proprietor of that as well as the Coffee Shop. He is to have an announcement soon for the public which will include air conditioning of the whole building.

Postmaster James H. Dallas, was able to be moved home from the hospital this week.

Geo. A. Powell of Dallas was here last week to install the new Simplex-teletype or Teleprinter in the downtown office of Western Union, now in the lobby of Hotel Brownfield. A man will be sent here soon to instruct Geo Breneman in its use. In the meantime, the old Morse machine will be kept.

ONLY 3 OUT OF 100 SEE THEMSELVES AS OTHERS DO SAYS PSYCHOLOGIST

Only three out of 100 persons see themselves as others see them in business. Eighty-two rate themselves lower. So Says William Moulton Marston in the current Rotarian Magazine, reporting on a survey in which he asked more than 10,000 people to score themselves on qualities which personal experts deem essential for success in business.

"The tendency of the average person is, naturally, to think more highly of himself than anyone else does," the psychologist writes, "and, consequently, to follow his own dictates rather than those of his superior. 'But,' he adds, 'until the ambitious worker learns somehow or other to evaluate himself through the mind of his chief, he is likely to be more bother than benefit to his employer.'"

"A successful business career," according to Marston, "boils down to this: the worker must master his own job thoroughly in such a way as to please his business superior. He must compete aggressively and courageously with his rivals, but at the same time he must cooperate with them to turn out a maximum of group product. 'To keep from landing in jail, or at least from being fired,' he continues, 'an ambitious worker must develop his social-control traits before turning loose his self-seeking drive. Submission to superiors is and always will be the first business trait which everyone must acquire. Submission by no means implies servility, a bootlicking attitude, or a 'yes-man' technique, but it does mean the ability to understand the boss's point of view and the willingness to be governed by it.'"

The average person, he believes, is unable to understand other people's opinions of him because of a "deep-seated determination to assert oneself over others and never permit them to exercise control over you. In short, there exists a widespread delusion that success is attained by leading others; never by following somebody else. The truth is quite otherwise. The world needs many more followers than leaders, and, consequently, yields its rewards more readily to those who know how to take orders. Moreover, willingness and ability to follow furnish one of the best possible and most practical preparations for future leadership, but the average individual, unfortunately, refuses to be led, and therefore never gets an opportunity to lead."

TOURNAMENT BOWLING 4 nights weekly.

THREE FROM BROWNFIELD TRAINING AT FT. SILL

Vacation started today for many mothers of Oklahoma and mothers of Texas, as 615 of their sons arrived here to begin their month's training in the C M T Camps here which opened today. Among those who will help consume half a ton of Grade A milk a day until August 1, from Terry County, Texas are Buster Beck, John W. Chambliss and Orval M. Pickett, all of Brownfield.

VERY THING

Mr. Henpeck was being shown over the large works. "That machine," said his guide, "does the work of 30 men." "Ah," sighed Mr. Henpeck. "At last I've seen what my wife should have married.—Minneapolis Journal.

THE DOCTOR'S ADVICE

Doctor: "What you need, my dear young lady, is a little sun

and air."

Sweet Young Thing: "Why Doctor, how dare you! Why, I'm not even married!"

"That is a fine looking horse, said the preacher. 'Is he as good as he looks?' 'Yes, He will work any place I put him.' 'I wish he were a member of my church,' said the preacher.

Our scissors and paste pot are writing our editorials this week.

People and Spots in the Late News

BASEBALL OWLS... Three baseball veterans, left to right, Connie Mack, manager of Philadelphia Athletics, William Harridge, league president, and Oscar Vitt, pilot of Cleveland Indians, are shown just before first American League night game played in Quaker City. Indians won, 8-3.

GET ROYAL RECEPTION... Excellent coup of Britain's reigning monarch, King George VI, and Queen Elizabeth as they enjoyed homage paid by thousands of cheering Canadians during triumphant tour of Dominion prior to visit to United States.

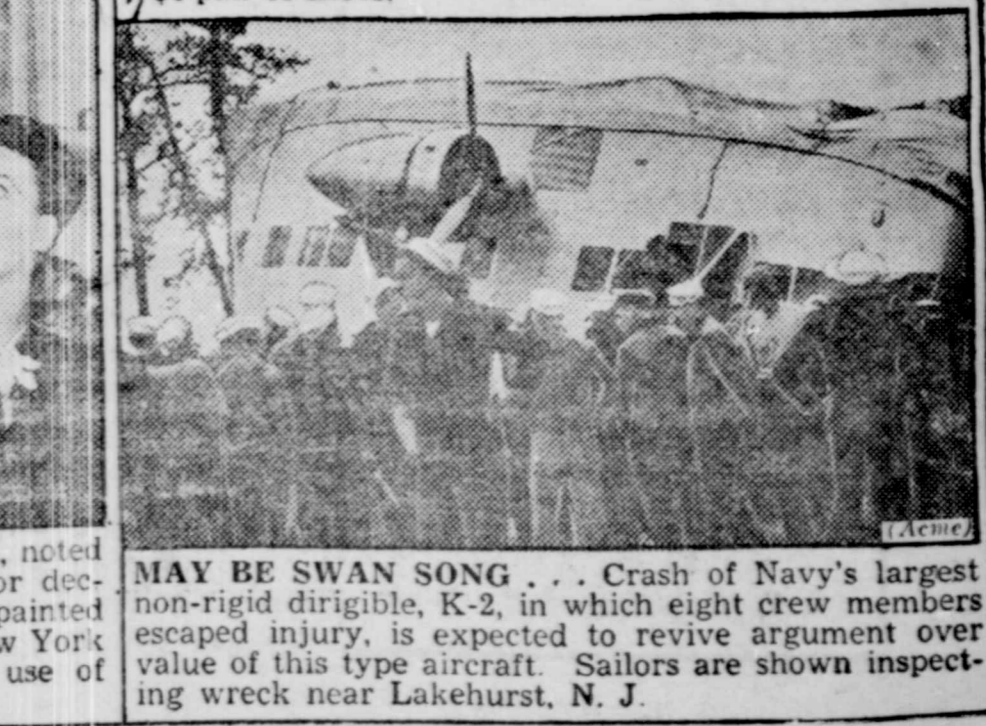

POLYNESIAN INFLUENCE... Trend toward South Sea beach fashions is obvious in this smart abbreviated suit, worn with wide-brimmed, off-the-face straw hat and linen sandals. Reef shell design used is one of many patterns inspired by gay colors and tropical beauty of the islands.

RUES INVISIBLE RUNS... Tillie, the average stenog, worries about potential runs in hose, and run-down heels when, according to National Consumers Tax Commission, she should worry about 58 hidden taxes that rip an 8-cent hole in dollar hose—and 112 taxes that add \$1.56 to every \$4 pair of shoes.

DECORATING TREND... Sheila Barrett, noted mimic, inspects something new in interior decorating, a plate glass mirror with mural painted on it—part of a model room display in New York illustrating the increasing emphasis on use of colored glass for decoration.

MAY BE SWAN SONG... Crash of Navy's largest non-rigid dirigible, K-2, in which eight crew members escaped injury, is expected to revive argument over value of this type aircraft. Sailors are shown inspecting wreck near Lakehurst, N. J.

TEXANS TODAY OUTSTANDING LEADERS ACTIVELY ENGAGED IN THE CONSTRUCTIVE DEVELOPMENT AND BUILDING OF "THE LONE STAR STATE"

Advertisement for John Nance Garner featuring a large portrait and text: JOHN NANCE GARNER WAS BORN NOV. 22, 1869 - EDUCATED IN PUBLIC SCHOOL, LAW EDUCATION IN PRIVATE OFFICE. ADMITTED BAR 1890. EDITED UVALDE LEADER, PUBLIC LIFE BEGAN 1894 AS COUNTY JUDGE. TWO TERMS TEXAS LEGISLATURE. MARRIED MISS MARIETTE RHEINER, NOV. 25, '95 - ONE SON. ELECTED 58th CONGRESS 1903 - SERVING TO '35 - BECAME VICE-PRESIDENT SINCE START OF CAREER, MRS. GARNER HAS BEEN HIS SECRETARY IN WASHINGTON'S MOST REMARKABLE POLITICAL PARTNERSHIP. HE HAS BROAD COMPREHENSION OF NATION'S POLITICAL, SOCIAL AND ECONOMIC PROBLEMS, GAINED FROM SERVICE ON MOST IMPORTANT WARS AND HEARS COMMITTEE UNDER WOODROW WILSON. SOUND JUDGMENT AND UNEQUALLED LEADERSHIP. JOHN NANCE GARNER HAS ALWAYS BEEN CONSISTENT IN HIS EVERY ATTITUDE TOWARD NATIONAL POLITICS - AND THE INALIENABLE RIGHTS OF THE PEOPLE. HIS PHILOSOPHY OF GOVERNMENT IS SIMPLE. HE EXPRESSED IT IN HIS ACCEPTANCE SPEECH IN 1932: 'THERE ARE JUST TWO THINGS TO THIS GOVERNMENT AS I SEE IT, THE FIRST IS TO SAFEGUARD THE LIVES AND PROPERTIES OF OUR PEOPLE, THE SECOND IS TO INSURE THAT EACH OF US HAS A CHANCE TO WORK OUT HIS DESTINY ACCORDING TO HIS TALENTS, THIS INVOLVES PROTECTING HIM FROM BEING INJURED OR OPPRESSED BY THOSE OF SUPERIOR ACQUISITIVENESS AND PERHAPS LESS CONSCIENCE.'

LET'S QUIT ROWING IN CIRCLES —

### Behind the Scenes in American Business

NEW YORK, July 2—BUSINESS—Just ten years ago this month the Federal Reserve Board's adjusted index of industrial production reached its all-time peak of 125 per cent of normal. In gloomy 1932 the index averaged 64, then climbed slowly back to 121 in December, 1936. Today the index stands at about 90, 11 points under the 1939 high of 101 in January. There briefly, is the picture of how industry has fared during a decade of relative hardship for the whole country. Whither industry in the next decade is anybody's guess, but level-headed business leaders, who have lived through more than one depression, are quietly reassuring on the outlook for tomorrow.

Typical of young industries that are going places is plastics, output of which for this year is estimated at \$150,000,000 a four-fold increase since 1935. The rate of growth of the aviation industry is astonishing. Aircraft exports alone this year are expected nearly to equal the industry's total production of last year. Other industries that have sprung up largely since 1929, and from which much in the way of employment may be expected, include the manufacture of streamlined trains and diesel engines, artificial silk, television and prefabricated homes.

WASHINGTON—Congressional mail is loaded with shingles upon which messages are written, a pet device of lumbermen when concerned about impending legislation. This time passage is sought for the bill requiring identification of materials bought by the government or used on federally-financed construction as a domestic. Agitation is strong in the Northwest due to the Canadian trade treaty which is about to raise the quota limit on single imports, threatening shutdowns because of high wages paid in American mills. Pressure is also increasing from the "folks back home" for passage of a bill providing for federal government guarantee of bank loans to small business concerns, just as the Federal Housing Administration now guarantees mortgage loans by banks on small homes. The measure is conceded a fair chance with much depending on the degree of Administration support its sponsors can muster, and the length of time Congress stews over taxes and Social Security amendments.

Herald Ads Get Results

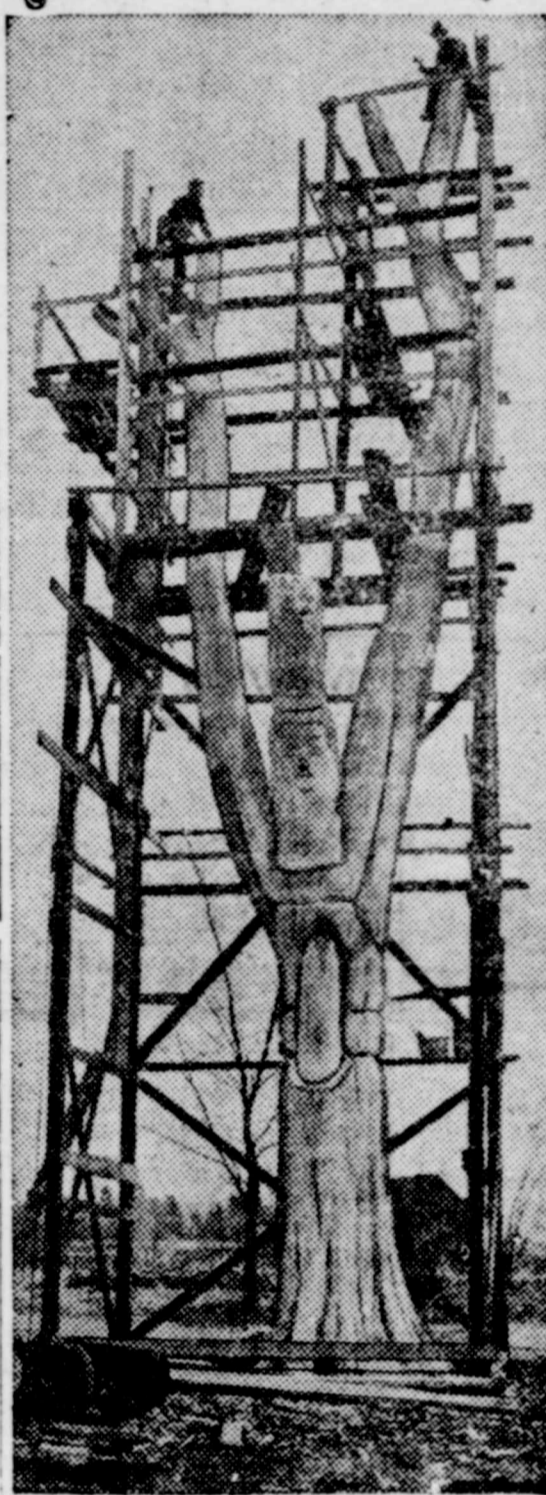

### QUESTION OF TONE

"What's the matter, Jenkins?" snapped a shoe store manager. "Can't you serve this customer?" "No, sir," replied the assistant. "He's trying to find two shoes which squeak in the same key."

### Savings Plan Spurred By New York Fair Interest

In at least thirty-eight States banking institutions are now operating New York World's Fair 1939 Savings Clubs, organizations for depositors which induce them to save stipulated sums each week for a trip to the Fair next Spring. This saving plan, announced just one year ago, has for its slogan, "Save Today to See the World of Tomorrow" and several banks have linked it to their Christmas and Vacation Clubs.

### TREE OF LIFE

New York—This is a picture of a 60-foot statue being carved from an elm tree at South Windsor, Conn., by Lawrence Tenney Stevens. It will symbolize a great ethereal spirit and, with two smaller companion pieces representing man and woman, is in a plaza at the New York World's Fair 1939.

### ROYAL WHISPERING

NEW YORK—Newspaper men who covered the visit of King George and Queen Elizabeth of England to the New York World's Fair are still wondering what the King said to his consort out of the corner of his mouth while he stood at attention during the playing of the two National Anthems in the Court of Peace. There wasn't a lip reader in the hundreds of reporters and photographers on the job.

### HAPPINESS

The happiness of today is as important as the happiness of tomorrow. You cannot postpone your enjoyments and lump them after you have gained a certain position or won a fortune. You must take them, if you take them at all, as you go along. The capacity to enjoy is not in human life. There comes a time when desire fails. A man may deliberately sacrifice his enjoyments and reap thereby great moral advantage, but he cannot postpone them.

### STATE FAIR PREMIUMS LISTS READY FOR MAILS

DALLAS, Texas, June 7—Listing more than \$100,000 in premiums for livestock agriculture, poultry and other awards, the State Fair of Texas is now ready to mail its annual premiums list. This will be the 51st mailing of the premium list, and this year's books shows an increase from a few thousand dollars to more than \$100,000.

In many cases premiums have been increased. Competition has again been taken from the county exhibits and instead each county with a creditable exhibit will receive \$125.

In addition to the regular premium list which shows every award offered by the State Fair of Texas, the fair has for distribution supplementary lists for

special shows, as the poultry shows, the 4-H Club Shows, Culinary and Textile, the school exhibits and contests and others.

### COLOR FOR LICENSE PLATES ARE SELECTED

Julian Montgomery, State Highway Engineer, Monday announced that the State Highway Commission had approved the colors to be used in the 1940 Motor Vehicle License Plates as follows: Passengers, purple and white; commercial, orange and black; farm truck, black on yellow. Tractor, trailer, dealer, motor bus, motorcycle, sidecar, gold on blue.

The 1940 plates will be manufactured by the Texas Prison System, and will be placed on sale by County Tax Collectors on March 1, 1940.

Mr. and Mrs. Ulysess Sawyer and their two lovely daughters, Misses Fern and Myrl, came in Thursday from Stamford, where Miss Fern captured high honors in the Stamford Rodeo.

Mr. and Mrs. Joe Patterson and Bobbie Joe, will leave the last of this week for Nashville, Tenn., to visit relative. They will be accompanied from Lubbock by Mr. Patterson's mother, Jean West of Levelland will be in charge of the Club Cafe while the Pattersons are away.

Bobbie Virginia Bowers had an emergency operation for appendicitis last Thursday night. She is doing nicely.

Mr. and Mrs. C. L. Aven, Jr., and small son, returned Monday from Hot Springs, New Mexico, where Mr. Aven took the baths for rheumatism. Mr. Aven is able to be up and about the house but is not able to be at his office at Shamburger Lumber Yard, of which he is manager.

Miss Ruby Nell Smith of Lubbock spent the week end to the 4th with her parents, Mr. and Mrs. Jess Smith and her sister, Mrs. Gutherie Allen.

Mr. and Mrs. Reed spent the 4th in Roby. Mr. Reed is market man at Piggly-Wiggly.

Mr. and Mrs. Homer Nelson and Children left Sunday for points in Arkansas and other places on their vacation.

Mr. and Mrs. Arthur Sawyer returned last Friday from an extended tour of northern and eastern states.

Cows milked twice a day produce only about five-sixths as much during a ten-month laceration period as they do when milked three times a day during the period or four or five times a day for the first five or six months and three times a day here after.

### BOY SCOUTS TROOP 49 TO GO TO CAMP

The Boy Scouts of Troop 49 are making plans to go to Camp at Weed, New Mexico, July 16th. If you haven't already done so, see Dr. R. B. Parish, Scoutmaster at once for full particulars. This is a wonderful place to go and you can have a delightful vacation trip with supervised play at small cost.

Weed is situated up in the mountains southeast of Cloudcroft right up among the tall pines and an ideal place to send your boy for a vacation.

Dr. and Mrs. E. C. Davis and Dr.'s sister and husband, Mr. and Mrs. Dudley Newton, of Cleveland, Ohio, came in last Friday evening from a trip to San Francisco, California, where they attended the Fair. They visited other places of interest in that state while away. The Newtons left early Saturday morning for home accompanied by Mrs. Davis and two children who will visit her mother and other relatives while away.

### ATTENDS FUNERAL OF RELATIVE IN STERLING CITY

Those from here attending the funeral of Miss Becky Ann Hornsby of Sterling City, Thursday afternoon were Mr. and Mrs. Dick Brownfield, Mrs. I. M. Bailey, Mr. and Mrs. Lee Brownfield, Lad and Jane Brownfield and Mrs. Roscoe Wilson and Mrs. Joe Bailey, of Lubbock, and Mrs. Lal Copeland of Ralls.

Miss Hornsby passed away Wednesday morning and was a relative of the above people.

Mrs. Charley Copeland of Yoakum county was admitted to the local hospital early Thursday for treatment.

Mrs. D. P. Carter came in this week from Fort Worth, where she has been visiting her daughters.

Bill Taylor of Denison is here visiting his sister, Mrs. Jack Stricklin, Jr.

A deep yellow egg yolk usually contains more vitamin A than a pale egg yolk.

### American Milk World Leader

Science double checks as tests are constantly being applied to milk to protect its purity and safeguard quality for the home.

DISTRIBUTION of milk in this country has grown to a point where it far outstrips any other country in the world in volume and sanitary protection of its product. When 30 million bottles of fresh milk are placed on the doorsteps of American homes every day this stupendous but unobtrusive daily service to consumers is so efficiently carried out as to be almost unbelievable to foreign milk experts. Daily distribution of milk by trained organizations is a distinctive American development, says the Milk Industry Foundation, as few consumers in foreign lands have a dependable protected supply of milk delivered daily at their doorsteps.

In most other countries milk dis-

tribution is generally an antiquated, although traditional, hit or miss affair. Dog carts, mules, hand tanks and other primitive means are used to make deliveries. As a rule milk is dipped from open containers in vessels supplied by the housewife. The modern equipment of the American milk distributor is in direct contrast to most foreign methods. Here the distributor is trained in the handling and processing of a perishable food and also serves as a guardian of the community health.

Pasteurizing, bottle-washing, bottling, capping, refrigerating, testing, safeguarding butterfat content, inspecting farms and the myriad details of delivery equipment, all of which protect the milk, are almost unknown to foreign milkmen.

### FRENCH PROVINCIAL STYLE OF FURNITURE IS REVIVED

French provincial furniture, now that it is being revived, is sure to be with us for a long time, for it is beautiful within itself, it is moderately priced, and it can be combined so well with early American styles. Many women, who like a variety in their rooms, will delight to find that the simple, graceful chairs of beachwood and of cherry in this French vein mix perfectly with maple tables and chairs.

There are charming upholstered armchairs, too, from which to choose, and many little occasional tables, some of tiered variety, others with sunken receptacles for plants, and still others for bedside use and for service for afternoon tea or coffee.

Whether you are doing an entire room, or merely investing in a piece or two, you'll have no difficulty in finding charming furniture in French provincial style.

A kilowatt hour is the equivalent of 1,000 wats used for one hour.

The U. S. Bureau of plant industry warns that many of our wild flowers will be extinct in 25 or 50 years unless steps are taken to conserve and increase them.

Mrs. Jim Graves, and brother, Marlin Hayhurst left last week for Rush Springs, Okla., to visit their parents.

Separating the cockerels from the pullets give the latter a much better chance at the feed hoppers. Cockerels usually grow faster and get more than their share of the feeders.

As a rule, all permanent poultry buildings should face toward the south and be on land that slopes gently the same way.

Mr. and Mrs. A. W. Turner and Lance and Wanda Ruth, left Sunday for points in Colorado on their vacation.

Mr. and Mrs. Mon Telford, Mon Jr., and their niece, Miss Ouida Butler and Mr. and Mrs. M. G. Tarpley and family, spent the 4th in Lubbock.

Mr. and Mrs. J. C. Rhader returned from their wedding trip Monday and spent Monday night with Mrs. Rhader's parents, Mr. and Mrs. Lence Price.

Mrs. Anna Cobb and Joe and Edna Cobb, went to Graham for the 4th.

Mrs. A. V. Taylor of west Terry, was in Saturday shopping.

Mr. and Mrs. W. L. Collins and Mr. and Mrs. Bruce Knight and two children left Tuesday for Yellowstone National Park on their vacation.

Mr. and Mrs. Pat Patterson visited Mrs. Patterson's parents in Roscoe, the 4th.

Mr. and Mrs. W. T. Ince are expected in this week from Corpus Christi, where they went on their vacation.

Carl Hyatt and wife, of the Ralls Banner, were pleasant callers at the Herald office Wednesday.

Mr. and Mrs. Bennie Smith have returned from a vacation at Colorado Springs and reported a fine time.

Jack Shepherd, employee of Montgomery Ward and Co., of Baton Rouge, La., is here visiting his mother, Mrs. S. A. Shepherd and family.

Pat Brothers is running the Cruce Store on the highway while he and family take their vacation.

### TROUBLES AT HOME, TOO

Nowadays the serpent that bites man's heel is in nine cases out of ten microscopic.—Prof. J. A. Thomsen.

Men love to hear of their power, but have an extreme disrelish to be told their duty.—Burke.

### A City Farmer

NEW YORK—A cameraman recently snapped Grover A. Whalen, President of the New York World's Fair 1939, in overalls. He was inspecting a wheat field—the first to be planted in New York City in 65 years. It is a part of a foods exhibit.

Two things the traveler easily forgets—his umbrella and the truth.

### Behind the Scenes in American Business

By John Craddock

NEW YORK, June 19—BUSINESS—While trade and industrial production last week continued along the gradual upward path of recent weeks, the Department of Commerce and National Industrial Conference Board released final figures on the results of 1938 business effort. Averaging their estimates, national income was \$63,250,000,000, representing a cut of 10.5 per cent for the American people from 1937 income. The significant highlights of the reports were that the stockholder's share of the 1938 national income dropped precipitously, and the wage earners' share was highest in history. About \$35,425,000,000, or 56 per cent of 1938 income, was spent in retail stores, the Commerce Department estimated. But fully \$5,500,000,000 of this retail figure was spent for indirect taxes instead of merchandise, according to the National Consumers Tax Commission. Comparing these taxes shifted to the consumer by business and industry with the nation's total tax bill last year of \$14,155,738,838 the NCTC calculates that the consumer paid 39 per cent of the total federal, state and local tax burden.

### New Tax Bill

WASHINGTON—When the new federal tax bill comes before the House this week an effort will be made to permit financially weak corporations to buy in their intangibles without incurring tax liability. The purpose would be to enable corporations in financial distress to improve their positions by reducing fixed charges. Thousands of companies should thus be aided. Under present law a company buying in its obligations at less than par must pay income tax on the difference between par and the price at which the obligations were bought in. For example, if a textile manufacturer's six per cent bonds are selling at 40 cents on the dollar, and he buys \$1,000,000 par value of bonds in the market for \$400,000 to save \$600,000 a year interest, he has to pay a tax on the \$600,000 difference.
