POSTOFFICE NEWS STAND

How the bazooka was invented and how it received its name was narrated to this chronicler by Bob Burns...

"We members of the Van Buren Silver Cornet Band were practicing in Haymon's plumbing shop," he drawled...

Later, he changed the instrument so that it was made of two pieces of gas pipe and a whiskey funnel...

When a fellow did a lot of talking about himself, folks used to say he "blew his bazoo"...

Burns has a great friendship for Irvin S. Cobb, the Kentucky short story writer.

"When we were making 'The Arkansas Traveler', it was a wonder any scenes were ever made," Bob said...

Afterward, Cobb wrote to Burns: "I've been using your stories and they got lots of laughs..."

Cobb added, "I always give you credit at the end but I speak your name in such a low and reverent tone that I doubt if anyone hears it."

The Kentuckian invited the big, rawboned Arkansawyer to visit the Cobb home, explaining: "My wife has a morbid desire to meet you."

Incidentally, back in 1909, when Burns was riding around over the country on freights, he landed in Fort Worth...

Reports from Miss Sharleen Graves, who is visiting with her uncle, Clarence Hudgens...

W. M. Souter, familiarly known as Uncle Walter, and daughters, Sue Davis of Eliasville...

Mrs. C. R. Rambo is entitled to pass to see 'Five Came Back' at RIALTO Fri.-Sat.

John R. Gayle is entitled to pass to see 'TRAPPED' at RITZ, Fri.-Sat.

Preparation of Farm Grain For Hogs.

By Fred Hale, Chief Division of Swine Husbandry

In the fattening of hogs, methods of preparing and reeding farm grains affect the net result about as much as does the kind of ration fed.

According to our experiments it is not necessary to soak threshed whole milo for fattening hogs.

Another interesting point is that pigs will make as fast and as economical gains when fed whole milo or whole kafir grain in self-feeders, free choice, as they will when fed ground milo or kafir.

ger quantities of grain before masticating or grinding it with their teeth than they do when fed by the free-choice, self-feeder method.

If the self-feeder is placed where dust can blow into the feed, or if the pigs are permitted to carry mud on their feet and nose to the grain in the feeder, one cannot expect to get good results.

A simple mineral mixture composed of equal parts by weight of bone meal, ground limestone or oyster shell flour, and salt will usually furnish the necessary minerals.

PLAINS

Mrs. Dorsey McKee and children spent Monday morning with Mrs. John McKee. Mrs. J. W. Elmore and Mrs. John Smith and daughter of Seagraves visited their daughter and sister, Mrs. Aaron Morris Saturday night.

**RURAL EDITOR PREFERS HOME TO NEW YORK**

NEW YORK, Aug. 20.—The Country's "best country newspaperman" likes his home town of Madisonville, Texas (population 2,000), "because if you go into Will Black's barber shop without any money he'll let you pay later." "Here in New York, they'd probably call a cop—people are so suspicious," added young Henry Fox, editor of the Madisonville Weekly Meteor, who consented to come here only because he won the trip and \$500 in competition with 4,600 other rural journalists in the Country Home's fifth annual competition. He's been in New York before and is not particularly impressed.

Fox won on the basis of his editorials, which he modestly signs "J. A." (for jackass) and puts in the form of letters from "The Navoset River Philosopher." He panned a proposed Texas transaction tax of 1.6 per cent by having the philosopher try to swap a gallon of sorghum for a dozen eggs, thus: "As we figured it, 1.6 per cent of a gallon of sorghum, not counting the part the old woman spilled measurin' it up, would require considerable figurin', but when we got to 1.6 per cent of 12 settin' eggs, we give up, on account of we knew the only way to split a egg is to try it first..." The editorials have been reprinted by daily papers all over Texas.

Fox, 28, quit daily reporting on the Austin Dispatch and bought the Meteor two years ago because he likes country life and weekly newspapering better.

Madisonville, he says, has four jail cells, full only on occasional Saturday nights; one cop, who also is in charge of the water supply; and the last time the Meteor had a streamer headline was when they decided not to move the CCC camp away from there. No European crises, no king-and-queen visits, and the biggest current issue is the federal-state oil conservation program.

Fox's biggest editorial battle was with the local paper of nearby Frankston, edited by a girl, over a modernistic typographical makeup she instituted.

They settled the argument by Fox keeping his style of makeup and marrying the girl.

**Try a Want Ad for Results**

**Hospital Notes**

Notes from the Treadaway-Daniel Hospital as turned in Wednesday afternoon:

Miss Marguerite, daughter of Mr. and Mrs. A. M. Payne, of Seminole, had an appendectomy the 28th and is convalescing nicely.

Gussie Marie Stewart, daughter of Mr. and Mrs. Shorty Carroll underwent an appendectomy Tuesday night.

Mrs. P. W. Smith of Tokio had a major operation the 26th. She is doing nicely.

Mrs. H. P. French, Tokio, who was operated the 10th is now doing nicely.

Mrs. E. H. Jones of Meadow, and Mrs. T. J. Moore of Seagraves, both of whom were reported as undergoing major operations last week, are now improving after being very ill, according to hospital staff.

Mrs. R. W. Carter was admitted Wednesday for treatment.

Miss Lois Daniel of Seminole, sister of Dr. Alfred Danniell of the hospital staff, is improving from a mastoid operation.

Dorothy Jean, 4-year-old daughter of Mr. and Mrs. George Boyer, is being treated for minor injuries received Tuesday when she fell from the rear of a car.

The following have had tonsilectomies: Mrs. J. L. Gryder, Seagraves, the 28th. Master Ralph Fulton, son of Mr. and Mrs. Odell Fulton, the 28th. Peggy Jean Gordon, daughter of Mr. and Mrs. Roy Gordon, the 29th. Wayne Breenbough, of Tatum, N. M., the 29th.

Got an invite to eat some of the deep sea fish caught off the coast of Corpus Christi at the home of Sheriff Ches Gore, last Friday. They were red fish and mackerel, and almost equal fresh water fish in taste. Ches says they sure do fight for small fish.

Mr. and Mrs. Herbert Neill spent last week in Hobbs, visiting his sister, Mrs. J. R. Bruce.

**Babe Ritchie to Mix With Maxie Baer**

Here's a close-up study of the West Texas boy who will have his great opportunity to make good on the night of September 18 in the Lubbock Fair Grounds. He is Babe Ritchie, promising heavy-weight prize fighter and former football star at Lubbock High School. Ritchie will meet Madcap Maxie Baer, ex-world's heavy-weight champion and today's third ranking title contender, before an anticipated crowd of 20,000 people. It will be the biggest and

most colorful prize fight to be staged in Texas since the state legalized the sport several years ago. L. D. "Pup" Thomas, Lubbock business man, has guaranteed Baer ten grand to meet Ritchie. Ticket reservations may be made with "Pup" Thomas at 1011 Main st., Lubbock. Both fighters have been training over a month and both will move into Lubbock to taper off training ten days before the fight.

**PERITONITIS MAKES APPENDICITIS FATAL**

AUSTIN, Texas, Aug. 28.—"It has been estimated that an operation for acute appendicitis is performed every minute in the United States; moreover, that peritonitis, a result of this disease, takes the life of someone every twenty-nine minutes. Against this frightful toll may be placed the significant fact that if peritonitis does not occur the appendicitis operation fatality rate is but one in two hundred cases, emphasizes the Texas State Department of Health.

"The perforated appendix, which is the cause of peritonitis, is a preventable condition. Prevention lies in prompt recognition of acute appendicitis and prompt surgery. Though this fact is well known to the medical profession and has been definitely proved in hospitals throughout the land for years, the public is not yet sufficiently impressed with it. "Thus it happens that the high appendicitis mortality rate in this country (incidentally, the highest in all civilized nations) is not due to a lack of skill in diagnosis and surgery but to the American tendency toward self treatment with the accompanying factor of delay. "Appendicitis is essentially a disease of the young, seventy-five per cent of the twenty thousand persons who die annually from this cause in the United States being under the age of thirty, while only ten per cent are over forty.

"Hospital records disclose that delay in seeking medical advice was the outstanding reason for appendicitis deaths. An impartial survey of deaths from appendicitis in an Eastern state proved that 'the chances of dying are four times greater on the second than on the first, five times greater on the third, six times greater on the fourth day of the disease.' The tragedy of procrastination in the presence of appendicitis is enacted only too often."

Mr. H. Patterson of Denver City, who was brought in with a fracture of both bones in one limb last week, is resting nicely.

**The Cancer Problem**

AUSTIN, Texas, August 25.—"In spite of increased popular education on the cancer problem during the last decade, many false ideas regarding this disease still persist. Too often such conceptions are the basis of delay in diagnosis and treatment. Obviously, figures cannot be compiled, but it can be stated fairly that a fair proportion of the thirty thousand cancer deaths now occurring annually in the U. S. could be avoided if these mistaken notions were corrected," the State Health Department believes. "The following facts are pertinent: (1) Cancer is not conta-

gious; the victim cannot give it to any other person. (2) Cancer is not a blood disease. (3) Diet is not a cause or preventative of cancer; vegetarians and meat-eaters are equally susceptible. (4) Aluminum cooking utensils do not cause cancer. (5) Constipation does not cause cancer. (6) Mental worry will not influence the development of cancer. (7) No age is free from cancer; babies are born with it, and the oldest persons can be its victims. However, it is largely a disease of adult life, occurring chiefly between the ages of forty and seventy. (8) Self-medication is a waste of time and frequently fatal because of the delay involved. (9) Serums, vaccines, colored lights, patent medicines, pastes, salves, and diets are valueless. (10) Quacks and their super-claims, through false hopes and delayed diagnosis, cause many avoidable cancer deaths but do not effect cures. (11) No warning comes from pain. In the early stages and in the pre-cancerous condition, there is no pain or conscious health impairment. The one exception is the bone cancer. "It is true that any one of these symptoms may be caused by a condition other than cancer; however, this fact is no excuse for delay in diagnosis, so that prompt treatment procedures may be instituted, for if cancer is diagnosed above facts and the prompt seeking of medical advice when there are signs of cancer, it is conceivable that many thousands of deaths from this cause could be prevented.

"The danger signals are any lump in the breast or any other part of the body; any persistent sore, particularly on the face or mouth; any unusual discharge or bleeding from any part of the body such as vomiting of blood, passage of blood from the bowels, or unusual bleeding of any bodily passage, especially after middle age; and chronic indigestion. Procrastination in the fact of any of these signs is dangerous and may even be fatal.

**EARLY THANKSGIVING AND EARLY TURKEYS**

College Station, Aug. 28.—Texas turkey producers, faced with at least one early Thanksgiving have been warned to begin thinking about getting their birds ready for the market.

"I have handled a number of Texas turkeys recently and found many of them thin," Geo. P. McCarthy, poultry husbandman of the Texas A. & M. College Extension Service, has commented. "If they continue in this condition until market time it will be difficult to dispose of them on the eastern market."

Producers should start feeding their turkeys a complete ration by September 15, and have them on full feed not later than October 1. The recommended ration consists of a developing or fattening mash plus grain. Tender green feed will add to the finish of the birds.

Many turkey producers have found that it is a good practice to worm the birds before putting them on full feed. At the same time it may be advisable to vaccinate against pox, especially in localities where this has been a hazard around marketing time. McCarthy suggests the stab method in the web of the wing, and recommends the pigeon strain vaccine, which gives temporary immunity.

Birds wormed and vaccinated before October 1 will be completely over the treatment before marketing time.

**Behind the Scenes in American Business**

NEW YORK, Aug. 28.—BUSINESS—"Hold tight," has been the American businessman's tune during the recent weeks of cumulative crises. Although it is disheartening to have ominous war clouds hanging over an otherwise healthy business picture, the country's merchants and industrialists apparently realize that the moves on the European chess boards are out calm and tending strictly to their calm and tending strictly to their own knitting. As a consequence retail sales have shown no indication of slumping, and are expected to total \$37,500,000,000 for the full year. Production and sales of fine paper products are running about 6 per cent over last year, and wrapping paper sales are nearly 8 per cent above 1938. Lumber consumption in this quarter will equal that of the second three months of the year and the 1939 total is expected to be 10 to 15 per cent higher than 1938's.

WASHINGTON—More than at any other time the business man must now look to Washington for business and monetary stability during these trying days of crisis. How do the officials here feel about the situation? Generally speaking, they are confident. The

**Curlee MUST Be Right!**

Here's something you can tie to—that the Curlee label in any suit you buy is a guarantee of smart styling, quality materials and expert tailoring. This famous maker of clothes for American men has worked for more than a quarter century with one objective in mind—that every man who buys a Curlee Suit shall become a permanent Curlee customer.

To achieve this goal, no effort has been too great. All materials that go in a Curlee Suit are carefully selected and rigidly tested. The line is authentically styled by expert designers. Skilled workmen build comfort and lasting good looks into every garment.

If you are interested in looking your best—and in getting the most for your money—come in and see our selection of Curlee Suits for Fall and Winter. There are models and styles you will like—in sizes to fit you—and they're all moderately priced.

**COLLINS DRY GOODS Co. Brownfield Texas**

monetary system, government sources believe is ready for any eventuality that an outbreak of hostilities might bring. About 6.6 billion dollars are held in this country by European interests, of which only 2.2 billion dollars are in the form of stocks and bonds. It is doubted that there would be any wholesale dumping of these stocks and bonds and felt that those which were offered for sale could be absorbed readily by the market. Officials are more worried about the panicky feeling which

might seize American investors. In the event of a collapse of the stock market, with the attendant crack in public morale, officials point out that the government now has the power to close all stock exchanges in an emergency—a power it lacked at the outbreak of the World War. Christ walking on the Sea of Galilee, and other Holy Land scenes will be depicted in a special exhibit which has been assured the 51st State Fair of Texas, Dallas, October 7 to 22.

**These Features Give You Better Power Corn Binder Performance**

- (1) Every part of the John Deere is built for heavy duty. High-grade materials and proper design throughout assure long life, light draft, and low upkeep costs.
- (2) Safety slip clutches on power shaft, gatherer drive shafts, butt chain drive shaft, and power bundle carrier prevent breaking should clogging occur.
- (3) Cutting parts are built sturdily to stand high-speed operation and heavy work. High-grade roller chain drives sickle.
- (4) Long, wide gatherers save the lodged and tangled corn. Six gatherer chains deliver it in easiest and most positive manner to binding attachment.
- (5) Accurate tying parts insure neat, well-made bundles in tall or short corn. Knotter parts are hardened for long life.
- (6) Twenty-eight anti-friction roller and ball bearing insure smooth running, light draft and long life.
- (7) Power bundle carrier saves you work as well as loose ears and leaves. It's a real improvement over foot power type of carriers.

**CHISHOLM HARDWARE**

**A GOOD SCOUT**

Again we pay tribute to the greatness of the organization of Boy Scouts. Due to their training the boy recently lost in a Maine wilderness, found his way to safety and life. We credit the lad for his resourcefulness, and we honor his clear thinking, but it was with the help of his scout lore that he fought his way home. The lesson, learned by a scout: "If you ever lose your way in the woods follow a stream and it will lead you some place." So this boy, lost eight days, found his way to a hunting camp. We salute the Boy Scouts of America; we have always felt them a worthy organization and so have all Howard county citizens. We credit the training and the noble deeds performed by the loyal scouts of a mighty worthwhile group.—Big Spring News.

**"FLOOR SEAL"**

College Station, August 28.—Dangers of highly polished floors can be largely eliminated with a new "floor seal," made of thin varnishes or bodied drying oils, according to Mrs. Bernice Clayton, specialist in home improvement for the A. & M. College Extension Service. This preparation, she says keeps the floor protected at all times, gives a moderately lustrous finish, and makes it possible for the housewife to clean and renew worn spots without moving all of the furniture out of one room.

**CARD OF THANKS**

I wish to thank the entire staff, (Jimmie included) of the Treadway-Daniell hospital for their sympathy, kindness and help to me during my recent illness. Also the many visiting friends and for the many pretty flowers, and everything that has been said or done for my comfort.

May God richly bless you every one is our prayer.

Your friend,  
Mrs. French & family

**LIKE TEACHER, LIKE SCHOOL**

The ancient empire before it went out of business left us the Roman law, an assortment of ruins, and a substantial part of their language.

Among the Latin words we still use are "educio" meaning "I lead out", and "evolvo", "I roll out." In more modern times educio has evolved into education and evolvo has been led into a lot of meanings.

So education originally means the process of leading. It has gathered a lot of barnacles on the voyage of time, but the power that drives it is still personal leadership.

To borrow another metaphor, we have built the log into a magnificent building and have required Mark Hopkins to have a university degree, but we can still never have schools any greater than the personalities of the teachers.

There is an oversupply of people with degrees who want to teach. We do not have too many real teachers. Men and women of faith, force of character, depth of soul, and teaching ability are worth their weight in gold. Regardless of how much money we spend, and we have spent much, the school will never be better than the teachers. Abilene Times.

Mr. and Mrs. R. P. Sessom, Mr. and Mrs. J W Brandon of this city and Mr and Mrs Clyde Sessom of Ralls, left last Friday for Llano county where they will visit R. J. Sessom's brother and fish on the Llano river. While there Mr. Sessom will visit his brother's mother-in-law who will be one hundred and one (101) years old next January. She is able yet to be about in the house and to wait upon herself.

BROWNFIELD — — — TEXAS

**WHY THE MANY SATURDAY-SUNDAY ACCIDENTS**

AUSTIN, Aug. 21.—State police today sought an explanation as to why nearly half the people killed in traffic are fatally injured on Saturdays and Sundays.

The death toll is far out of proportion to the volume of traffic these days, even though week-end travel is high.

Much of the blame, state police believe must be laid to the "week-end driver"—thoughtless, careless, joy-riding, sometimes drunk and often inexperienced. He must shoulder responsibility for an appalling toll which in five months this year has claimed 279 lives out of a total of 567 fatalities for that period, they declared.

The five-month survey disclosed that 49 per cent of the traffic deaths occurred on week ends, 26 per cent on Sundays, 23 per cent on Saturdays. But less than 34 per cent of all traffic moves on week ends—18 per cent on Sundays, 13.7 per cent on Saturdays, state officers pointed out. The volume of traffic was taken from average figures developed by the state-wide highway planning survey based on a year's actual count.

Week end fatalities were highest in January, when 73 lives were claimed on four Saturdays and five Sundays, and have declined appreciably since then, the survey showed. February had 56 deaths for four Saturdays and four Sundays; April 53 deaths for five Saturdays and five Sundays; and May, 47 deaths for four Saturdays and four Sundays.

Chief Ralph L. Buell of the state driver's license division described the week end driver thus:

"He is frequently the man who leaves the car with his wife all week, then takes it out on Sunday for a long drive on the highways. He is unprepared for heavy traffic and the emergency that takes split-second thinking and split-second reaction. Often he doesn't even know the rules of highway behavior, but you can't criticize him to his face. He thinks he's a wonderful driver.

"Frequently he is a student, pushing his car to the utmost to spend all the hours possible that week end with the home-folks—and the girl back home. Too often

**PLANS TO FEED OUT 5,000 TO 6,000 CATTLE**

SEAGRAVES, Aug. 28.—Ray Brownfield, of Brownfield, pioneer Terry county rancher, is planning to feed out 5,000 to 6,000 head of cattle, mostly yearling steers and heifers, in the Fred Snyder pens here. Last year he fed out 3,000 head.

Buying of green feed for cutting into ensilage and filling the many silos here is to start soon, according to Jim Williams, who is in charge of operations here. The ten or more silos have a capacity of 7,000 tons.

Had a card this week from Otis Draper, written from Edwards, Miss., where he has another bridge job with his company, and where he and family will be at home for some time. Thinks he will like, as the people are friendly and lots of fruit, but hot, and will be "a dandy place until he gets back to Texas." He is calling for this week's Herald.

Mrs. G. Z. Sherman accompanied her parents, Mr. and Mrs. C. Baldwin of Lamesa, to Artesia, N. M. on Wednesday to visit in the home of their son and brother, C. R. Baldwin.

**COTTON CLASSING SERVICE**

College Station, Aug. 28.—The number of Texas one-variety cotton groups applying for cotton classing service has now increased to 224 and will probably total 250 by September 1, the last date on which applications will be accepted, according to E. A. Miller, agronomist of the Texas A. & M. College Extension Service.

The service offered by the U. S. D. A. Bureau of Agricultural economists includes free classing by governmental classers and a current price on the various grades and staples.

he doesn't live to get there. "And frequently he is the 'hey-hey boy' who may be 20 or 60. The highway, to his way of thinking, is as good a place as any to take a drink, and it is no worry of his when he runs two or three other cars off the road and causes somebody else to have a bad smash-up."

**EDITOR'S BROTHER LOSES WIFE FRIDAY**

A. J. Stricklin received a phone message Friday night to the effect that his sister-in-law, Mrs. Z. M. Stricklin of near Grandview, Texas, had died suddenly that afternoon at 7:45. Her son, Benton, with whom he talked did not state whether or not his mother had been ill.

Annie was 60 years of age, and for several years had been in quite ill health, but we had understood that of late she had apparently been better. Funeral services were held Sunday afternoon at the Grandview Church of Christ, and burial in the Antioch cemetery followed immediately.

Besides her husband, she leaves two sons, Benton of Cleburne, Alton of Tulsa, Okla., and Miss Violet, only daughter, still at home.

Her mother, Mrs. J. Y. Benton also survives, also two brothers and three sisters, all of whom live in the Antioch section.

Naturally the news of her death came as a shock to us, and especially so since we made our home with our brother and wife for several years after coming to Texas from Tennessee at the age of 20.

Jim Williams and Mr. Cooksey of Seagraves, were transacting business here Wednesday.

Jess Smith and brother, M. B. Smith, visited their sister in Hedley, Texas last week.

Sheriff Ches Gore, Lee O. Allen and G. S. Webber returned last week from a fishing trip to Corpus Christi.

Mrs. Buck Hawkins and Mrs. Joe Patterson were in Lubbock, Monday.

Edna May Gandy of the Pleasant Valley section, is spending the week in the Dr. E. C. Davis home, the guest of Janet Davis.

**BEWARE OF MARIJUANA**

A big supply of home grown Marijuana was taken over by officers at Mertzton in two raids this week. This deadly weed when smoked in cigarettes makes the smoker crazy and the first thing he wants to do after he goes crazy is to kill someone. Three Sterling City Mexicans met death within 30 minutes of each other when a few years ago one of them smoked Marijuana cigarettes, went crazy, and shot and killed two of his neighbors and was himself killed while resisting arrest.

If you want to poison yourself, don't use Marijuana, but get a dose of strychnine and have it over with before you get crazy and kill somebody.—Uncle Bill in Sterling City News-Record.

**POOL**

All the sick in our community are improving at present.

Mrs. Frank Pool and son and daughter of Big Spring spent the week end with his brother, Mr. and Mrs. W. E. Pool.

Mr. and Mrs. J. J. Gunter gave a birthday dinner Sunday for their daughter, Glennas, and son, G. W. Also Mrs. Gunter's brother, Roy Chambliss.

The Methodist revival closed Sunday night.

Curtis Chambliss of Brownfield spent the week end with G. W. and D. W. Gunter.

Mr. and Mrs. Luther Rex of Hobbs, N. M. visited Mr. and Mrs. W. C. Aldridge Sunday.

Rev. and Mrs. Jesse Young spent Sunday with Mr. and Mrs. J. P. Rowe.

Katy Mae Candell visited Nita Harben Sunday.

Joyce Florence of Seminole spent the week end in the Pool community.

Dorothy Dean Newsom visited Wanda and Geneva Aldridge Sunday.

Audrey Rex is visiting her aunt Mrs. W. C. Aldridge this week.

Maxine Harben spent Sunday with Maurine Ticer.

Pearl Harben visited Edna Redding Sunday.

A. J. and Eugene Ticer have gone to California.

Mrs. Ora Bell Arnett and Mary Lou spent the week end in the Gunter home.

Our old friend, Sam Davison of Meadow called Tuesday afternoon and made his report, being the first time in a good while that we had seen him. Said it had been awfully dry in his section, and crops would be light. They had considerable rain a few weeks ago, but it has been so dry and hot since, that the effects of the rain are fast disappearing he stated.

Mr. and Mrs. Clifton Jones have moved back to Paducah, Texas, where he will manage a gin again this season, which we understand belongs to the West Texas Gin Co. Clifton is perhaps one of the youngest gin managers in West Texas, having finished high school here only about three years ago.

**Title I Loans From \$100.00 to \$2500.00.**  
**Title II Loans From \$2000.00 to \$5400.00.**

Why buy a stock home plan or a ready built home where the rooms and closets do not suit you, when your own home town dealer will make your plans, specifications and arrange all details for a home that each room and closet will suit your own notion, at no extra cost to you.

You pay nothing to us until you are ready to move into your home.

We have 35, 75x140 foot lots or will build it on a lot you now have or may secure.

Our company and ourselves are interested in the community as a citizen and as a taxpayer.

Investigate our costs in obtaining these loans and be convinced that we are doing more for your money.

## Instrument Made to Find Gravel, Caliche

AUSTIN, Texas, August 16.—Recently an electrical instrument for determining natural formations of the earth to the depth of 100 feet or more below the ground surface has been developed by the Public Roads Administration. The Texas Highway Department has been experimenting with the use of this instrument in Texas for locating hidden deposits of caliche, gravel and rock, suitable for pavement base courses and is effecting economies through the use of it. Hidden deposits of suitable materials have been found adjacent to construction projects, and where they were not previously known to exist. This instrument, with its accessories, is as easily transported as an engineer's transit or level, and with practice can be operated rapidly. Examples of savings which have been made with this electrical resistivity instrument are as follows:

1. In one district a search by digging test holes had uncovered no suitable material in the vicinity of the project and it appeared that base material would have to be hauled quite a long distance. A search was then started with the electrical resistivity instrument and a large deposit of suitable material was located only one-half mile from the highway project. It is estimated that \$5,150.00 in haul was saved by the finding of this local deposit with the electrical instrument.
2. On another construction project the nearest known deposits of gravel for pavement base course was 10 miles from the job. Sub-surface explorations with the electrical resistivity instrument revealed an abundance of concealed good road gravel 2 miles from the highway. The difference between the cost of the 10-mile gravel haul and the 2-mile haul was \$1,156.00 per mile of highway to be built.
3. During the latter part of 1938, 200,000 cubic yards of base material were located in a county where such material had been very scarce, and a material saving was effected over the cost of shipping materials from another source.

Preaching Sunday at 3:00 p. m. John A. Tabor guest minister. You are invited.

### WHAT WE THINK ABOUT IT

We know full well before typing this article that few people care a whoop what we think, but never-the-less we think anyway and this is our way of getting our thoughts out in the open and off our minds. So, dear reader, whether you read this or not, we are getting it out of our system. When Congress adjourned after cutting the national relief appropriations asked for by the President, the rejoicing among the financial highbinders was nationwide. From their expressions of glee one would naturally suppose big business and big industry would at once begin a campaign of expansion which would quickly absorb every man and woman as the nation had never witnessed before. But to date not an extra man has been employed above the natural demands of the season. The army of unemployed is now being augmented by the women who were employed in the sewing rooms over the nation, and the number was counted by the tens of thousands. The men employed on the various government projects that covered everything from road building up and down are being checked out just as fast as possible and few if any are being absorbed by big business or the industrial plants of the nation. Right here in the little town of Jayton the pinch is already being felt and the demands for assistance to the Red Cross office, the City and the County has become distressing. It is now utterly impossible for the local organizations to meet the demands being made upon them. As the cry of the distressed increases with the coming winter months those who have to deal with the situation are going to sweat blood, unless their hearts are made of stone and they are absolutely indifferent to human sufferings. When congress opened their ears to the blandishments of the money powers and closed their ears, eyes, and hearts to the distress, suffering and sickness of the unemployed millions, communism, so-

Static problems of West Texas ginners are being studied by M. E. Heard, head professor of textile engineering at Texas Technological College, and W. L. Johnson of Atlanta, Ga., authority on humidifying and a sales engineer of the American Moistening Co. Checking of static in gins, caused by lack of humidity in the atmosphere at this high altitude, will save thousands of dollars annually in losses to gin owners. Each individual gin will be treated as a separate problem, according to Johnson. Plans include the installation of an atomizer humidifier designed to provide sufficient moisture to get rid of static in one plant might be greater or less than in another.

Static problems of West Texas ginners are being studied by M. E. Heard, head professor of textile engineering at Texas Technological College, and W. L. Johnson of Atlanta, Ga., authority on humidifying and a sales engineer of the American Moistening Co. Checking of static in gins, caused by lack of humidity in the atmosphere at this high altitude, will save thousands of dollars annually in losses to gin owners. Each individual gin will be treated as a separate problem, according to Johnson. Plans include the installation of an atomizer humidifier designed to provide sufficient moisture to get rid of static in one plant might be greater or less than in another.

Head-on collisions with another vehicle were responsible for more than 27 per cent of fatal highway crashes. The percentage drops to a little more than 18 per cent when urban traffic is added to the picture.
