LETTER FROM JUAREZ.

The Mexican papers publish the fol lowing letter from Benito Juarez, on matters relating to his re elevation to the Presidency:

Mexico, Aug. 11, 1867.
My Internet Peace seem at last to be dawning over our distracted country; and I shall indeed be glad when the elections are over and all discordant elements subdued. I forwarded you a clements subdued. I forwarded you a copy of my letter resign ng all claim to the Presidency; but so importunate have been the persuasions of my friends, and especially of Gen. Diaz and the army, that I have refuctantly consented to the use of my name in the coming elections. It would have been more desirable to me to have retired from a position the dation of which I have redespected faith. me to have retired from a position the duties of which I have endeavored faithfully to perform throughout those long dark years of oppression and misfortune. My only object in comenting to be a candidate is for the purpose of frostrating the wicked designs of men who care very little for the welfare and hap-

piness of our country. By the hands of Senor Don Guerra I send you several documents, which will show you what course I have been pursning in regard to the cuemies and trai-tors of Mexico. My sole ambition is peace for Mexico, and prosperity for her people. It matters not to me to what patriot hand its destinies are confided, so that our beloved and unfortunatenation is happy. Extremely auxious as I am to return to private life, I shall shrink from no duty confided to me by a brave

and suffering people.

I still hear of dissensions on our northern froutier. Advise our friends to abide by the decision of the popular will, to avoid lawlessness, and return to the business pursuits of life, for therein prosperity lies. Above all, assure citizens from the States who are abiding with you that the supreme Government of Mexico holds in high esteem the services of the great republic of the north in their behalf in the recent crisis, and

that its citizens shall be well protected. Now, farewell! My friend Senor Guerra will convey to you my high approciation of your friendship.

KANSAS ENTERPRISE.-TRADE WITH TEXAS.

A correspondent of the Chicago Tri-A correspondent of the Chicago Tri-bune, writing from Kansas, gives some interesting information concerning the region to be traversed by the Atchison, Topeka and Santa Fe Railway. Seventy miles southwest of Topeka are the great coal fields of Osage county, and a hun-dred miles further are the "salt plains" one hundred miles long and forty miles broad. These plains are complete-ly covered with a white grust of sait, of aufficient strength to barr up, without breaking or crumbling, an ordinary wa-gon load. Underneath this crust, a lit-tle below the surface, there is a stratum of solid rock salt.

The same writer gives an account of the trade with Western Texas and Mex-ico, as well as New Mexico. Last year brought the first train of twenty-three cons from Western Texas to Leavenworth for supplies of goods. There were three small trains, besides the one first mentioned, that came through last year they were loaded up with wool, pelts, furs and dressed skins, and loaded back

with goods of every description.

The seccess of last year has shown itself by the great increase this year. What was last year an ordinary trail is this year a splendid wagon road, over which trains are passing almost daily. This trade now goes to the Union Pacific road at Junction City and other

The cattle trade between Texas and The cattle trade between Texas and Kansas is another great wonder. This trade commenced three years ago, and has been on the increase until it has renched forty thousand head. Three years ago it had two thousand head; last year about eighteen thousand, and this year nearly forty thousand up to this time, with a prospect of reaching fitty thousand. fifty thousand.

Western Texas and parts of Mexico Western Texas and parts of Mexico are strictly a grazing country, and the man who owns and controls less than three thousand head is really a small operator. There are many men in Texas who own from twenty-five to fifty, and even eighty thousand head of cattle, and from the sale of these they receive their only income, many of them employing from one hundred to three hundred herders.

The sumy worm frosts do not injure it. The army worm made its appearance in the cotton fields about the first instant, and caused considerable apprehension in some sections for the safety of the crop. Potatoes are rotting badily in many of the large potato growing States and the yield will be less than last year, owing to the severe weather last winter. FAST PRINTERS -- After reading the following, we do not believe there is a printer in the land who will ever again post of being "swift." It everlastingly settler the matter:

In the office of a Wisconsin journal there is a compositor who sets type so rapidly that the friction of his move-ments foscs the leaden emblems in his ments foses the leader emblems in his atick, making them solid like a stero-type plate. The only, way to prevent this is to have his case submerged in water, and the rapidity of his movements keeps the water boiling and bubbling so that eggs have been frequently boiled in the spece box. Pipes load from the bottom of his case to a boile in the press room, and the steam generated by the fast compositor runs the power press. One day he set so much type that it took all hands, from editor to devil, two weeks to read the proof, and it wasn't his good day for type setting either.

IMPORTANT PENSION DECISIONS .- On a case arising under the eleventh section of the act of June 6th, 1866, the Commissioner held that said section was not retroactive in effect, and that the pen-sion provided for therein could not in any event begin anterior to the passage of said law. Decision affirmed on ap-peal to the Secretary of the Interior,

THE ELECTION NEWS

We give our readers the best we have, they can make the most of it; for our own part we are unable to discover which par y has won the day, and have concluded to bide our time until some thing more satisfactory comes.

THE SILVER LINING.

It was the custom of the traitor pres and particularly the Herald of this city, to keep continually telling their readers that they could see the "silver lining" to the cloud which hung over the fortunes of the Confederacy. One day the "silver lining" would appear with an enormous lie about the killing of ten thous and or more "Lincoln hirelings" or "Yankee hessians," their favorite namer for the Union soldiers; the next day the same "silver lining" would appear in and France had recognized the Confederate Government, and that now the "buffoon Lincoln" would be killed like a dog and the homes of the Yankees made desolate, and the "glorious banner of the Confederacy float in triumph from the State house at Boston.". The "silver lining" has been very scarce since the overthrow of treason. The Herald has dropped the "silver lining" and adopted "Behold, how brightly breaks the morning." This is almost as fantastic as the "silver lining." These fellows lose sight of the fact that it is only by the mercy of the Gogernment they did'nt get their necks broke.

TOM FOOLERY.

No State or country is truly great and strong, whatever its natural resources may be, when agriculture and manufactures are neglected. Texas may be rich in native excellence, its hills may be embowered with the wild grape, its forests furnish the finest nut crop in the world, its prairies wave in perrenial harvests of grass, its rivers dash in a thousand cascades to the sea, and its people live in idle blissfulness amidst their herds of cattle, and yet it will never be a State worthy of the name until the soil is made to produce all the appetite of man can desire, and until the great bulk of the articles used by its citizens are made in its limits. With our myriads of cattle we import our butter and cheese, with our thousands of cotton bales we import all or almost all our cotton goods, with our hundreds of thousands of fine sheep we send abroad for all or almost all our woollen goods; all our canned and dried fruits come from abroad : we drink mean liquors brought from a long distance in the midst of a natural grapeland; gobble down lager beer made from foreign hops, while our valleys would grow the hop to perfection; all our earthen ware comes to us from abroad; all our pickles, jams, jellies, clothes, and agricultural instruments. Our silks come from China when we live in a country well 'adapted to the production of silk. We even eat bread raised in distant States, and for all this we send away a few hides and all our raw wool and cotton.

Instead of getting rich we must be-come poor, our imports being greater than our exports. How can we remedy this, is the question; we answer by simply stopping our tom foolery. Instead of clinging to the "lost cause" form an ardent attachment to the United States Government, reconstruct our State and forget the States Rights tom fooolery. Build railroads and establish common schools big enough to educate every foolery of fancy institutes for the propogation of tour fool notions about Southorn aristocracy. Instead of tom fool tournaments, at which the "Knight of the Bloody Shirt" crowns the Queen of Love and Beauty, establish in every county in the State an agricultural society, offering premiums for the largest ton sweet potatoes raised on any given aren of land; for the best specimens of sorgho or other molasses or sugar, for the finest cow, horse, mule, hog or sheep; for the most perfect specimens of manu-

should be received in good society who does not follow some honorable or useful avocation, to anable him to secure a livelihood. A perplution must be effected over the entire south in favor of honest manual labor, and then will railroads be built, manufactures established, and, all departments of industry flourish, and our State begin its march of greatness. But we must get rid of our Southern tom

THE GRASSHOPPER ARMY.

From the Des Moines (lows) Register, September .18.

The grasshoppers and dog-fennel are about taking lows; and would probably succeed but for the fact that the former are "death" on the latter, and gobble it up "root and branch" as fast as they can get to it. Having rollicked around over western and southwestern Iowa until they have grown tired of the scenery and a change of pasture, they are com-ing "thisward;" and the advance guard ing "thisward;" and the advance guard of the chattering hosts are only twelve miles from our city gates. In conversation with Mr. Gedfrey Jerue, of Guthrie county, one of the wounded heroes baptised in his own blood at Missionary Ridge, and a perpendicular Radical who draws a weekly draught of sound doctrine from the Register, we learned yesterday that the locusts are literally swarming over Beaver, Thompson, and Guthrie Centre townships of that county. They are of the small, gray pattern, and seem to have no particular "tooth" for corn blades, and have in many fields atripped the stalks entirely, leaving nothing but the "bare pole" and the ears which make a most awkward appearance dangling "alone in their glory." Icdangling "alone in their glory." stead of being a damage to the stead of being a damage to the corn, they are a benefit to it, as they eleck its growth and hasten the maturity of the grain. Mr. Jerue arrived in this city vertex are more distributed in the city vertex description. city yesterday morning, having come straight through from Guthrie Centre by the Adel road. Around Adel they are the Adel road. Around Adel they are doing no damage, but seem to be having a general hopping around time without harming anything. Our informant states that he could see them all along the road until within eleven or twelve miles of Des Moines. With fair winds they will probably reach here soon, when they will be able to tell their own

A private note from Green county says in regard to the grasshopper crop of that

region:

"Grassboppers by thousands of millions have invaded this region, and are making their mark deeply and widely upon every species of vegetable matter r which they have a taste. Corn, turnips, cabbage and tomatoes are apparently their favorites."

This locust army has been traveling from the West for years. Steadily they have been bearing down upon us, and while we have yearly read of their ravages in the trans-Missouri region with the same spathy of personal indifference that we read of a war of the Thugs, they have been circling near and are now at our very doors. Whether they intend to "winter over" with us and play have with our next year's crop, we shall have

to wait to next year to see.

It is said that the Digger Indiae turn them into good account by eating them and consider them quite a recherche dish; and in doing so they offend nothing but our probably super-delicate notions about what "wittles" shall go into our fastidious stomachs. Those of you who are as fortunate and as properly constantly on your writing deek, can, by turning to the book of Leviticus, read in the eleventh chapter the two following verses, which, as you see, gives you full permission to have grasshoppers for

A Page county (Iowa) letter says:

"Just now the grasshoppers are very bad with us. You have no idea how abundant they are. The ground is perfectly alive with them; they fill the air for many hundreds of feet upward; they strike you as you walk to and from your mesls; the public and private buildings are black with them; they infest everything. Corn is almost out of the reach of their destruction, but still here and there is a field that will be stripped. Cabbage will be completely caten up by them, and in consequence of their pressure no fall wheat will be sown. The West is full of them, and they are journeying Eastward. Like the death-aogel, nothing can stay them or their ravages." A Page county (Iowa) letter says:

This is the same army that is at proent invading our State, and we wish the people of Iowa had taken the advice of the Register and esten them, because they threaten to est us up.
