An Insalubrious season.
Spring is welcome, but not its diseases. We should be glad to have a bloom without its fogs, its vapors, its gloomy changes of temperature, and the agues, fits of indigestion, bilious attacks, and other harassing disorders which they engender. As this cannot be, it behooves all sensible people to do the best they can to escape such serious drawbacks on the poetry of the season. Ask your physician what the weak and delicate ought to do when miasm infects the air. The answer will be, "Eat and regulate the system." But how? That is the important question. A dozen medical men would probably recommend as many different medicines. On the other hand, the thousands who have tested the virtues of Hostetter's Stomach Bitters as an invigorant and alterative, will recommend but one, the wholesome preventive and restorative in which their own experience has taught them to trust. A course of this pure vegetable stimulant,

commenced now, would save many a pang to the feeble and debilitated. It would be wise economy too, for it would probably preclude the necessity for medical advice. Without disparagement to a profession which all intelligent men and women respect and honor, it is just as well, if possible, to keep out of the doctors' hands, and they would have comparatively few cases of fever and ague, dyspepsia, biliousness, nervousness, and general debility to attend to if this agreeable and healthful specific were in universal use.
A wealthy widow, advertising for an agent, was overwhelmed with applications, as the type, by mistake, made "a gent."

Progress.

In the invitations found elsewhere for proposals for fuel, storage, &c., for the Department, there is opened up a new field for every hardy, honest, hard working producer in our section. The old time forms, and ambiguous styles of invitations for bids, containing in its hidden depths invitations to speculate, have been cast aside, and the government, represented ably by GENERAL JAMES A. EGIN, in this section, has taken a stride in the direction of bringing the producer in immediate contact with the consumer.

In the invites for furnishing of supplies to this and across of other important posts, the desire is to receive bids from every farmer or planter, who will find plainly in the chance this extended him, practical encouragement for his labors, from the government itself. Heretofore farmers have been compelled with a now General in a clear, direct way, breathes a vitality into those forms, to act as a stimulus upon the efforts of every agriculturist and laborer in our State. What higher mission can this government fill, than by these acts, showing that it is desirous of fostering and protecting the producer's interests?

What can be fairer than this announcement, 'It is desired to purchase in the vicinity of each post, from the products of the neighboring ranches and farms; and bids for any portion of the above specified supplies will be considered.'

We know not under what nomenclature such action of the government will be classified, but we call it Progress. We see the mists of corruption of years ago, being dispelled by the encouraging sun of this innovation which says to every man we will assist you in reaping the reward of the sweat of your brow. As you labor in your strenuous toil, we are ready to encourage you by finding you a ready market, and one you can approach fearlessly, knowing that fair prices and fair treatment will be extended you.

Those of our citizens who remember the complaints and murmurings of a few years ago, of honest men, tricked by some unscrupulous officials, will feel in the new era of things a hopefulness that is just the forerunning of a prosperous future, wherein the interests of the people and the Government they help to support, are sympathetically blended. Whatever progress toward peace and harmony is Progress. It is a step in the perfecting of incomplete systems, and it bears with it assurances of thrift and advancement.

In years to come when our State has been redeemed from evils that have held sway for a score of years, the memories of progressive earnest men who were foremost in the work of redeeming us from ill and troubles, will be fondly cherished, and to name all the people who with more pleasure than that of the prudent, honest, incorruptible veteran GENERAL JAMES A. EGIN, whose every act in furtherance of National or Governmental interests contained the germ of some benefit to bring forth fruit to our State and community. We say this in no flattering spirit. We deem it but justice to recall to the people the benefits before them, and at the same time the zealous officer who creates and fosters them.

Gerold held to an earnest young gentleman who burned with a desire to see himself in print: 'Be advised by me young man; don't take down the shutters before there is something in the window.'

Texas Wool Industry.

From all the information we can glean, we learn that the interest in the production of good wool is fast increasing in Texas, and that a few years hence will have destroyed all the good effects now being laid down by the late George W. Kendall, and a few kindred spirits interested in the advancement of an enterprise, bearing in its train such wealth for the future. Such a result, and at such a stage of State prosperity will be indeed disheartening, and we hope that the surplus of the careful watch of Texas wool interests may lure out unfounded. The rich grasses and the sheltered valleys, and sloping hill sides of Texas afford her the reputation of being one of the finest adapted countries to wool growing in the world, while the success achieved by practical flock masters would seem to warrant an increase of interest in the business rather than a decrease, as is shown in the last year of 1870. We are afraid there has been too much of the speculative tendency abroad amongst the sheep raisers, which has made them less attentive to their flocks and thus allowed some of the finest to become of really inferior grade, producing a wool but little finer than that of the common Mexican sheep. We write this article in hopes that good practical men will take up the subject of wool growing, ascertain the causes of its decline, and if possible bring facts relative to the profit and advantages of good clippings, so put before the working people as to induce them to again place the wool interests in a promising aspect before the State. A year, or two at furthest, will find us connected with the great West; with the cities of Saint Louis and Chicago where an immense wool trade is centering; in fact the latter city was the chief rival of New York in the last years trade, and the amount of business done in that line exceeded considerably, that done in what has been considered the great Metropolis of the Western Hemisphere, New York. Connection with either of those cities by rail, will act as a large incentive to diversifying the products of our fields, farms or ranches, and the question of wool growing if properly handled will prove of as important a nature as to come second to the stock or cattle interests of our western region. Of late years, the wool market has lacked judicious buyers, and the growers for want of a proper stimulus of prices and competition, have grown careless. This is shown in where better, than in the absence of grading and sorting on the part of the producer. Fine and coarse wools have been banded in together, and in most instances the lower grades of wool have been more eagerly sought for than the fine grades. With railroad connection this existing chain of evils will be broken. Your keen sharp wool broker will speedily show the producer where his largest profit lies, and all possible encouragement lent to the grower to have his wools in good shape so as to meet a ready market and a paying price. If Australia, if Smyrna, if the Spanish provinces can reach an English market with wools, raised in a country with less natural advantages than ours, and find in that long reach for a market, profit, surely our practical men of West Texas can reach the American market, with its centre at Chicago with as much reasonable show of remuneration.

As regards the comparison of raising cotton or growing wool, the chances of over-ponderance largely in favor of the latter. What we want is for those new in the wool growing business to continue in it, and to improve by all means and at all times their flocks. Let them induce others in their region to take up the branch of enterprise, and encourage and foster the growing up of a wool trade that will serve to interest the great cities of the Mississippi valley in our welfare. Our Agricultural Society can do much, by not only offering premiums for the best display of ewes, rams, or lambs, but by offering a desirable premium for the best written essay on wool growing in West Texas.

It would be a burning shame to our people, to allow at this auspicious and promising hour, the wool interests to become neutralized by indifference and neglect. We trust our people will apply themselves with renewed zeal to the advancement of wool growing in our section.

SAN ANTONIO is to have the new bridges, as our people will see by a perusal of the minutes of the meeting of city council. The faces of property owners on learning the news, yesterday, were fairly radiant. Every dollar expended in such improvements, brings two in return to swell the value and importance of our rapidly advancing little city. Where new are the sore heads, and the charter opposition and marplots? We want to recall to their minds how Republican management changes.

The nice little fifty thousand dollars, they wanted to put in the shyster's pockets, in the railroad and coupon cases, we have by judicious use of attorneys, that understand the law, saved to expend to some advantage. These four new bridges will grace our city much better, than some swagging and bullying shyster riding around in his carriage, or guzzling krog and 'sich like' at the expense of this same city. The faults of our city council and executive administration, as enumerated by the mongrel Democracy, can be given in short order; they are Prudence, Economy, Honesty, Progress and a looking to the general welfare of the people of our city. Terrible crimes! (in Democratic eyes).

EMERT BECK. Sealed proposals will be received by the Chief Quartermaster for furnishing fresh beef to the following named posts, &c., &c.—San Antonio Herald.

If any brilliant (f) contemporary would read the Express, which blindness in the above would render him a fit subject for a lunatic asylum.

Paris, March 23.—No reinforcements made to the insurgents. General Le Comte and Thomas were wounded by Bonaparte's soldiers, who directed the operation.

Insurgents hold Hotel de Ville, Palais de Niles, Palais de Justice, Tuilleries and Place Vendome. Complete anarchy is displayed by the bourgeoisie.

The Generals were shot in a garden in the Rue des Rosiers. Thomas resisted vigorously, but General Le Comte was killed. A wall while his body was riddled with bullets.

Le Comte died with the utmost coolness, smoking a cigar and refusing a handkerchief over his eyes.

Many other executions have occurred. The government has telegraphed for 10,000 men at Camp Satory to come to Paris.

The Prussians at St. Denis will enter Paris if the garrison is increased beyond 40,000.

The city is full of Bonapartists. Agents have seen Cheyron, Conti, Rouher and Regnier.

Insurgents for some days past have received three francs daily, supposed to be furnished by these agents.

In every part of the leading thoroughfares of the city, barricades have been thrown up by the insurgents. They have gained strength since morning and are more defiant than ever.

Gen. Chanzy was sent with a large body of troops to Mont Matre to suppress the insurrection. The troops, however, for most part went over to the insurgents. Chanzy was made prisoner and taken to the garden of Rue des Rosiers, Mont Matre, where the Central Revolutionary Committee were sitting, and after a short trial shot.

The regular troops fraternized with the mob everywhere, and all army discipline seems gone. The mob law is triumphant and the city will be given up to pillage unless more determined measures are taken by the government.

An immense number of insurgents have left for Versailles with the intention of endeavoring to restore the assembly, which will sit to-morrow.

General Duval is at the head of the insurgents and leading them on their mad and wild career. The eighty-first and one hundred and twenty-sixth regiments were the first to join the insurgents.

It is reported that government has fled from Versailles.

ROUEN, March 20.—The people here are deeply excited over the news from Paris, but no outward demonstrations are being made.

The Mobiles are prohibited from crossing the right bank of the Seine. It is rumored that the German forces will occupy their former posts if disorder in Paris continues.

PARIS, March 21.—The mob was crying 'A Versailles.' The situation of the city is unchanged.

Napoleon is represented as confident of an early recall to France by the people.

LONDON, March 20.—Napoleon left Wilhelmshaven to-day, escorted by a guard of honor. He arrived at Denver today. An immense crowd was waiting for him, who cheered enthusiastically.

The Thiers government contemplates going to Tours. The Germans decline to interfere.

A report from Paris says that the gendarmes collected from the provinces by Vinoy, have deserted and joined the insurgents.

LONDON, March 20.—6 p. m.—In Paris this morning the situation was unchanged. The National Guards in obedience to orders of the Central Republican Committee, have taken up positions in various quarters of the city, meeting with no resistance. The majority of the National Guards are passive and quiet.

Preparations are being made at the voting places throughout the city for Communal elections, ordered by the Republican Committee. According to apportionment made, there is one representative to be chosen from every twenty thousand voters. Elections will be held Wednesday instead of Thursday.

The Assembly has declared hesitation inadvisable. Rumors of every description are in circulation. One says the Nationalists intend to march on Versailles, another that the Assembly will remove to Orleans, and are about to appoint General Fardier dictator.

All papers at the prefecture of police have been destroyed by the Nationalists.

LONDON, March 20.—9:30 p. m.—The Gaulois reports that overtures have been made to the government by Gen. Martre, of the insurgents, and that La Roche, Minister of Interior, had been fully empowered to grant liberal but legitimate concessions.

The windows of the Hotel de Ville are crowded with armed Nationalists. Chassepots are being distributed among the people and the cry of the mob is 'A Versailles.' The centre of the city, however, remains undisturbed.

WASHINGTON, March 20.—Washburne telegraphs to Fish from Paris under date of the 17th, that the National Guards committee is master of Paris.

The departments of the Interior, Justice and Police are occupied by the insurgents. General Vinoy, Thomas and Le Comte were murdered by the troops.

The election is to commence to-morrow. All members of the Thiers government have gone to Versailles. I follow with the whole department corps.

Mr. Clayton is coming here before receiving the news that the Nationalists have reported in favor of Mr. Hamilton, of Texas. This denotes the claims of Gen. Reynolds to a seat. The other news will be reported on Monday.

Mr. Adams telegraphed to the Congressional delegation that the State authority is unable to punish outrages on the northern border of the State.

WASHINGTON, March 19.—The admission of Hamilton, of Texas, against Reynolds, elected upon the day and by the legislature, designated by Federal law.

WASHINGTON, March 19.—Senator Mr. Sherman's resolution, instructing the Judiciary Committee to report on the Ku Klux bill, was dismissed all day.

Mr. Sherman, supporting his resolution, said the Southern States public condition was one of unparalleled horror and anarchy.

Davis, Stevenson, Johnson and Lewis spoke. Lewis said Virginia was as peaceful as any State. He denied the existence of Ku Klux organizations there. Johnson supported his colleague. Sherman replied he could substantiate the assertions of the preamble to the resolution, which asserts in effect the subversion by armed, disguised, and lawless men, mainly soldiers of late rebel armies, of all civil authority in large parts of the insurrectionary States. Persons and property are unsafe, the rights of citizens denied, and the courts perverted by organized perjury to punish crime.

Sherman went to give an epitome of evidence elicited by the Outrage Committee.

WASHINGTON, March 20.—The latest news from Paris says that Vinoy, with gendarmes, withdrew to the left bank of the Seine, leaving the Nationalists to maintain order on the right bank. The general tenor is that the Nationalists and insurgents will fraternize. Two generals, abandoned by their troops, were executed by insurgents.

The World's special, dated Paris, Saturday night, gives the following account: At a council of war yesterday, M. Thiers presiding, it was resolved to attack the insurgents at 2 o'clock. The 17th, Chassepots and three regiments of the line advanced on Mont Martre another body on Lavolette, another on Belleville. The troops were successful at Mont Martre and Lavolette, but at Belleville the people refused to allow the troops to enter the Rue de Paris. The gendarmes charged, but were compelled to retreat under volleys from the insurgents.

At Lavolette the troops fraternized with the insurgents, and General Vinoy was killed and killed at Mont Martre. Gen. Pallidans is a prisoner at the insurgent headquarters. Gen. Le Comte has been sentenced to death, and Gen. Soreville was killed. Many gendarmes were killed.

Gen. Thomas' last word was 'Cowards.' He fell at the third discharge. Thiers is true but full of grief. Vinoy's indignation is boundless.

The mob virtually possesses the city. Only wine shops are open and drunkenness rampant. Women are armed.

Gen. Chanzy was arrested upon his arrival at Paris by the Mont Martreists. It is said he is to be shot to-day.

All persons propose dying from Paris. The corpses of the murdered generals were mutilated.

HAVANA, March 20.—Tobacco has been destroyed in portions of the Yucala Abajo district.

TESTIMONIALS. From Genl C. Scott's 'Report of Fashions.' Residing at the fountain-head of American enterprise, and knowing the interests of the tailoring business from many years' experience, we most unhesitatingly pronounce the Shuttle-stitch, latest invented sewing machine of Grover & Baker, one of the best machines—if not the very best—in the world for tailors' use, or for the use of any trade requiring a tight seam in cloth or leather. We have used the Grover & Baker Shuttle Machine No. 1, and find it admirably adapted to our business. It runs lighter, makes less noise, and is in every way preferable to the Singer machine for either light or heavy manufacturing. JOSEPH SCOTT, Manufacturer of Clothing, No. 24, Broadway, New York.

I am the fortunate possessor of one of your new Shuttle Machines, which you designate as No. 1. I have used many different machines in my business during the past eight years, and I give you great pleasure in asserting that this one is far superior in all points to any that I have ever used. I want no better. BRADFORD B. BROWN, Boot and Shoe Maker, 124 South 2d Street, St. Louis Mo.

Having used the different kinds of Sewing Machines in the market, including 'Singer' maker's and others, have finally adopted the No. 1 Grover & Baker Machine; and having used it the past two years, can truly say that it proves to be the best machine, and superior to any we have used.
