Lieu so to do by the Chicago fire, Mr. G. H. Knight writes to a Philadelphia newapaper a letter about home architecture, and preposes the following improvements: 1. An arched sub-way for every atrees, for drainage, gas, and water, which will save the upper parament from distuntance. 2. Edifices built upon the principle of association, and having common means of warming, vanilation, and for the prevention of fire and other paisances. 3. There are to be no single chimnegs, but stacks simulating towers, companiles, pagedas, &c., 4. Lath and plaster finish of the interior is to be abandoned, for by this a man builds one house for himself and two for the rats. 5. Shingle roafs to be entirely given up. These are but hints. Building will continue to be the appropriam of our civilization, unit we hit upon some plan by which we may have houses entire if fire proof. It is well enough to please the eye and the taste in our exections, and general comfort and convenience are certainly to be desired; hull we had westly better submit to a little tolerable, than to be roasted alive, or to fire, in constant danger of finding ourselves without house or home at all.

It is said that if a pull of air were to be hown into a vein of an animal, death would instantaneously follow, because circulation would be stopped. The blood makes the entire circuit of the human body overy seven minutes, and whenever this circulation is impeded or any of its channels are clogged by impurities which ought to be carried off, disease follows—fever, or a disorder of liver or kindeys, or serofula, or disappata. To get at and remove the source of the difficulty, use the old and infallible blood purifier, DR. WALKER'S CALIFORNIA VENDUAR HETCH.

THECAUSE AND CURE OF CONSUMPTION.—The primary cause of Consumption
is derangement of the digestive organs.
This derangement produces deficient and
rition and assimilation. By assimilation.
I mean that process by which the aufiment of the food is converted into blood,
and thesees into the solids of the body.
Persons with digestion thus timpsized,
having the slightest pre-disposition to
pulmonary disease, or if they take cold,
will be very lable to have Consumption,
of the Langs in some of its forms; and I
bedd that the will be impossible for cure any
case of Consumption without first rentoring a good digestion and healthy assimilation. The very first thing to be done is to
cleanise the stomach and bowels from all
diseased nuters and sline, which is degging these organs so that they cannot perform their functions, and then rose up and
restore the liver to a healthy setter. For
this purpose the surest and best rehardy is
Schenck's Mandrake Pills. These Pills
clean the stomach and bowels of all the
dead and morbid alime that is causing
disease, and decay. In the schola, system.
They will clear out the liver are thus
cleaned by the use of Schenck's Mandrake
Pills; but there remains in the stomach
as excess of scid, the organ is torpid, and
like appetite poor. In the bowels the
lactuals are weak, and requiring strengthand amport. It is in a condition like this
that Schenck's Seaweed Tonic proves to be
the most valualle remedy ever discovered.
It is alkaline, and its use will neutralize
all excess of scid, the organ is torpid, and
the appetite poor. In the bowels the
schenck's Appetite, and prepare the
nyetem for the first process
of consumption is the fice and preceiving use of Schenck's Mandrake
Pills; but there remains to cure most
traction, and ultimately make good, healthy, living blood. After this preparatory
treatment, what remain to cure most

monto Syruy, rhui all ulcers and cavities are healed up sound, and my patient is enred.

The essential thing, to be done in curing Consumption is to get up a good hypetite and a good digestion, so that the body will grow in fresh and get etrong. If a person has diseased lungs,—a cavity or abscess there,—the cavity cannot beal, the matter cannot ripen, so long as the system; is below par. What is necessary to cure a new order of things,—a good supprite, a good sutrition, the body for grow in flesh and get fat; then Nature is helped, the matter will ripen and be thrown off in large quantities, and the person regain health and strongth. This is the trae and only plan to cure Consumption, and if a person by vary ball, if the lings are not direly destroyed, or even if one lung is additively gone, if there is enough vitality left in the other to heal up, there is hope. I have seen many persons cured with only one cound lang, live and enjoy life to a good old ago. This is what Schenck's Medicines will do to cure Consumption.

They will clean out the stomach, awesten and attemption it, age up a good digestion and gine Nature the assistance she needs to clear the system of all the disease that is in the lungs, whatever the form may be. Medicines, cure should be exercised not to take cold; keep la-doors in cold and damp weather; a wood highe als, and take out

mentiones, care agount we exercised not to take cold; keep in-doors in cold and damp weather; avoid highs air, and take out-door exercise only in a gouist and warm

weather; avoid hight six, and take outdoor-service only in a gould and warm
smeshine.

I wish it distinctly understood that
when I recommend a patient to be careful
in regard to taking cold, while using my
Modicines, it do so for a special reason. A
man who has but partially recovered from
the effects of a bad cold is far more liable
to a relapse than one who has been eating
y cured; and it is precisely the same in
regard to Cunsumption. So long as the
lungs are not, perfectly heated, just to long
in there imminist danger of a full return
of the disease. Hence it is that I so sizemonstly cantion primonary potients
against exposing themselves to an atmosphere that is not genial and pleasant.
Confirmed Constitutives large are a mass
of sores, which the least change of atmosphere will inflance. The grand accuss as
my ability to subdue inflammation instead
of provoking it, as many of the faculty do.
An inflamed lung cannot, with asfety to
the partent, be exposed to the bising blasts
of Winter or the chilling winds of Spring
or Antonn. It should be capefully shielddeform all irritating influences. The utmost caution should be observed in this
particular, as without it a cure maker almost my circumstances is an impossibilty.

fored to it the natural quantity of flesh and strength.

I was myself cured by this treatment of the worst kind of Consumption, and have lived to get fit and hearly those many years, with one lung mostly gene. I have oursel thousands since, and very minny have been cured by this treatment whom I have never seen.

About the First of October I expect to take possession of my new building, at the Northeast Corner of six she and Act Streets, where I shall be pleased to give advice to all who may tequire it.

Full directions accompany all my Remodics, so that a person in any part of the world only he madely suindely a street observance of the nithe.
