Now that the new Constitution has destroyed all hope of Ever glorious Grattan! the best of the State encouragement to immigration, the motive for such an organization becomes still stronger The prospect of the early completion of the Pierce railroad to this city adds another motive. We should take our public interests along together. morning journal, that will soon be the qual of any in the State, to promote all these interests, all the opportunities pre-Our attention has been again called to this subject by a statement we find in the Auatin Statemen, by similar statements in other journals, and by cases of like import that come under our own observation

The Statesman has intervieved Mr. Peter

J. Heckard, a gentleman from Fulton sounty, Ililnais, and he confirms the reports constantly received of the wonderful tide of immigration that is pouring into Texas from the Northwest. He state that not less than one thousand limitgrants came through to Central Texas on the train with bim, one hundred and fifty pushed on to Austin. In his imprediate neighborhood fifty to one hundred to willes bave sold out, and are awaiting reports from him before taking up the line of march for a warmer clime, cheap lands and new bomes. In Illinois, he saye, there seems to be a general stagnation of business, a complete cessation of public enter prises, and in the lest three months money has tightened up much worse than ever before, and prices of stock, etc., have gone down to a song. The best of farm horses and extra readsters about the same price. Pork sel la there for five to seven centa beef two and a half to four cente, core twenty five cents a bushel, wheat seventy cents, and potatoes are to be had at from fifteen to twenty five cents a bushel, and other things in proportion, nothing being high but land, which brings, improxed from \$100 to \$150 an acre. He says that the people of that country are well posted in regard to the advantages of this country, stated through the papers, circulars private letters, ofc. Mr. Hockard bays that he finds the people of Texas sociable and hospitable, and expresses his surprise to see business and times apparently so good here when they are so distressingly tight in the North. He thinks of buying land and settling between Austin and Sar Marcos, where he can get good wild land at from three to five dellars and improved places at from ten to fifteen dollars. One thing that asionished him was the cheapness of travel between St. Louis and Aus tin, a first class ticket costing but twentyone dollars and forty cents. Three years age a trip to Austin from St. Louis would have nearly wiped out an hundred dollar

Now, we only need the railroad, a local immigration bureau, and a vigorous administration of it, to direct most of this immigration to Western Texas. Our lands are good, and they are cheaper than in portunity is now presented of getting cheap lands in West Texas before they are subanced in value by the railroad, and the people of the North-west ought to be fully advised of it. They would then come here by the hundreds of thousands, for we have the finest climate in the

> We have been induced to again direct attention to this subject from the developments of the wheat trade abroad. It is fact that Russia, and the other great wheat-growing countries, all combined, do not aggregate a larger export of wheat than the United States. England is the great wheat purchasing market. Her sup-ply in 1874 was obtained from the following sources—the value of the supply from each country being indicated in peaced stoching : Russia £3,130,723, Denmark £103,956, Germany £2,917,023, France £163,935, Austrian Territories £1,934, Turkey, Wallabachia and Moldavia: £364,082, Egypt £179,849, United States £14,178,-791, Chili £1,190,455, British North Amer. es £2,239,187, other countries £1,599,256 making a total in all of £25,201,962.

> It will be seen here that the United lates is not only the largest shipper, but that the product from our farmers is larger than that from all other countries

The following sensible article we take from the New York Herald: The growth of the order during the year now closing is in the highest degree satisfactory. The total uum ber of granges that have been or. hard virtues of Adams and Frank-ganized to date may not reach the lin should become fashionable, with figures of the enthusiastic and unreflecting members, who based their estimates upon the record of 1874; but it exceeds that of the more first President-Utica Herald thoughtful who looked, and almost in vain, for new fields of work. There are no means of knowing, postively, but the most careful esti mates that can be made place the total membership of the order at the present time at 1,440,000 -donble that of 1874. This increase of strength has come mainly from imi | ers can take such interests in their tations, (through the addition by the organization of new granges is no small fraction) and means that the order has been tried, and found to be good. The organization of granges proved merely that some thing was demanded differing from what the farmers had. The number organized showed merely how wide cating the utmost astonishment, spread was the dissatisfaction at and them addressed the owner, who spread was the dissatisfaction at was standing near, and asked bim the old order of things. The grange "if he made borses," "Made horse was an experiment, and nothing more. Despite their enthusiasm has thus far crowned their efforts, the leaders of the movement could not but feel at the last convention anxiety for the future.
