THE PRESIDENTIAL CAMPAIGN. - The Presidential campaign advancing upon us is fraught with the greatest interest. The effected effects of the present Congrees to oust from the national office halls the votaries of bribery and sorruption-to overturn the tables of money changers sed make a clean sweep of those who sold official influence for gold, has wrought a telling sevolution in the political arena. When the Republican equivention met in Cincinnati the other day, the majority of the press of that party, and many of its powerful leaders, believed that James G. Blains would be the party nominee for President. A majority of the delegates to that Convention left their respective States to cast their votes for Blaine. But no sooner had the Convention assembled, than a change came over the intentions of the delegations, wrought, as if by the magic influence of soom unsect power. But that influence was the moral spirit or will of the American nation. The people did not want a political ovster-they did not want the political hyena of the Republican party-they therefore cast him off. It was purely through the honest out-croppings of the public will that Mr. Blaine was defeated.

The same desire will be manifested at run the county of Travis, as Maverick St. Louisnext Tuesday. When the Democracy assemble to chose a standard-bearer, the ery will be, "give us a man against ruption will be blooted, and fall barruless We rejoice to feel assured, from the at his feet." PALLY HXPRESEL.

In those spacious but insignificant advertisements of C. Pratt & Co., they endeavor to convince the public that our STAR OIL and PEERLESS are identically the same, which they know, even better than we could ever attempt to convince them, is NOT THE CASE. Peerless is by no means one of the interior grades of oil; it in in every respect equal and fully up to the actual standard (not the advocated) of Astral, and is like the latter 12 degrees below the burning point of our STAR OIL. Now we propose to Furnish the Peerless, guaranteed equivalent in every respect to Astral, at One Deliar a case less than our STAR OIL, which we sell at the price of Astral, atthough our STAR OIL is 12 degrees better, hence safer, and consequently has, the preference of the consuming public.

In Addition to the certificate alkaded to, we herewith annex a certificate from Chemist Theo. Odet.

At your request, I have tested the samples of Star Oil taken from the store of George Dullnyr, and find the dashing point at one hundred and thirty-three (133) degrees Fahrenheit, the burning point at one hundred and foray-four (144) degrees Fahrenheit. Astral oil, taken from the store of E. Ketnh & Co., the flashing point at one hundred and twenty-one (121) degrees, and the burning point at one-hundred and thirty-two degrees Pahrenheit. I am of the opinion that the Star Oil is by all means the best and safest oil.

THE NAME OF TEXAS.

Pos. NEWS—I have read many fancillul conjectures as to the origin of the name of Texas, including that in the chorus of the nong of the "neutral ground" heroes: "When every other lamb ejects us, here is one that freely takes us." (Taxas.)

Judge Bürnet, whose authority is anquestioned, says the name was distived from an Indian tribe, belonging to the great Caddo family. The first mention of the tribe was by Corondo in 1541. His map locates them as Tayans, between Red River and the Canadian.
