

STERLING CITY NEWS-RECORD

VOLUME 61 PUBLISHED EVERY FRIDAY AT STERLING CITY, TEXAS. "Since 1890" FRIDAY, APRIL 6, 1951 No. 14

Two School Trustees To Be Named Here Saturday

There will be a school trustee election here Saturday for the purpose of electing two trustees of the Sterling School District. The election will be held in the district courtroom and Mrs. Sterling Foster is to serve as judge.

Hal Knight, president and Riley King, are the two members whose terms are expiring. Others members of the local board are Worth Durham, Robert Foster, David Glass, John Reed and Foster Sims Price.

Colorado City Lake To Open May 1st

A. W. Hubbard, president of the Mitchell County Sportsman's Club, has received a wire from State Senator Pat Bullock stating that Lake Colorado City will be opened to fishermen May 1, instead of July 1st as planned. Bullock states that the State Fish and Game Commission will meet April 13th and that he "has been assured" that the lake will be opened at that time.

The Sportsman's Club counts more than 500 members from Colorado City and the West Texas area, and has recently completed a clubhouse with large screened-in porch, which is located on 30 acres of land leased by the club. Caretaker's quarters are built into the club house and a caretaker is being sought at the present time. He will sell bait, tackle and groceries and rent boats. The club has built a concrete ramp into the water for loading and unloading boats and has built a ninety foot fishing pier and two floating rafts, both connected to shore.

Present plans call for planting shade trees, designating picnic grounds and building barbecue pits and making some improvements, according to R. B. Baker, club secretary.

"Membership is from March 1st to March 1st, each year, says Baker, and dues are \$25 for the first year and \$5.00 each succeeding year." The membership will include your family.

Should you care to join the club, mail your check or money order to MITCHELL COUNTY SPORTSMAN'S CLUB, Box 441, Colorado City, Texas.

Eighth Grade Club Meets

The Eighth Grade Club met Wednesday at 2:00 o'clock. The meeting was called to order by president Robert O'Dell. Johnny Ozee and Bill Wyze served refreshments of cold drinks, cookies, candy and sandwiches.

Truman Kennemer, reporter.

Grass Fires Numerous

There have been innumerable grass and trash fires the past two weeks, keeping the fire trucks on the go most of the time. About one half section was burned off Gordon Bird's ranch Monday of this week. Several trash fires in town have set adjoining grass afire, causing a run by the trucks. On Wednesday night of last week, the ranch house on J. T. Davis' Willow Ranch burned down. No one was present at the time and the fire was not discovered burning.

If the dry weather continues, along with the high spring winds, grass fires are going to be quite a menace to ranchers.

Tillerson To Christoval As Superintendent

G. W. Tillerson, coach and principal of Sterling High School for the past five years, resigned this week. He has accepted the position of superintendent of the Christoval school. He will assume his duties there next school year.

Tillerson came here after spending seventeen months in the army. He formerly was principal and coach at Iowa Park high school and Salem school, Troup, Texas.

Coach Tillerson has made an enviable record for a West Texas coach. His football teams have an overall record of 37 wins and 12 losses and one tie. In the five years his teams have lost only 6 conference games and won 30. They have scored 1422 points to the opponents 711, which is an average of 28 points per game to the opponents 14. Until their loss to Rankin this season, Sterling had won 13 straight conference games. His teams have won 3 District Championships and two Bi-District titles.

The Sterling basketball team has been above average each year and won their district in 1948. They have won a total of 19 beautiful trophies in the past four years. The girls basketball team, under his coaching, took the district championship this past season.

Tillerson is past president of the Texas Six-Man Coaches Association, and is now on the National Rules Committee advisory staff for six-man football. He has been invited to lecture at the Louisiana Six-Man Coaching School this summer. He is also one of the directors of the State Association now.

Coach Tillerson has been active in community affairs. He is, at present president of the Sterling City Lions Club. He has been an active member of the Baptist Church and the American Legion here.

Tillerson holds a degree from North Texas State Teachers College at Denton and is at present doing graduate work there.

"Covering the County"

By Gariyn Hoffman, Co. Agent.

Anyone wanting to use T.C.A. weed killer this summer call the County Agent so an order can be made up. T.C.A. is rather hard to get now. If an order can be made up for at least 100 pounds the price per pound will be reduced considerably. T.C.A. will control most all grass, shrubs and trees.

FISH BY THE ACRE

Farmers or ranchers can grow fish by the acre of water just as they grow beef by the acre on grassland. This is the opinion of R. E. Callender, extension specialist in wildlife conservation of Texas A&M.

According to Callender, from 300 to 500 pounds of fish to the acre have been produced annually in well-managed fish ponds and he adds, many of the more than 100,000 farm and ranch ponds in Texas, which are maintained primarily for stock water, are suitable for growing fish.

Callender points out that an acre of water has a "carrying capacity", just as an acre of grazing land does. The amount of food produced in the water will depend upon the fertility of the land over which the water flows. Fertile land means a fertile pond of water.

Here are Callender's recommendations for fertilizing fish ponds.

As first choice, he suggests using a mixture of 400 pounds of cottonseed or soybean meal and 200 pounds of 20 percent superphosphate to the surface acre of water for one year. Broadcast half of this amount over the pond early in the spring, and apply the rest in 100-pound applications at four to six week intervals.

Callender's second choice is 500 to 600 pounds of any high grade fertilizer such as 4-12-4 or 5-10-5. Apply half of this early in the spring and follow with 100-pound applications at three or four week intervals until the amount for the year is broadcast in the pond.

Horse and cow manure also may be used as fishpond fertilizer. Apply 500 pounds to the acre at monthly applications, using two to three tons a season.

Weather damaged alfalfa hay also makes a good fishpond fertilizer when applied at the rate of 500 pounds to the acre at monthly intervals.

Callender warns that the fertilization program should be completed before extremely hot weather arrives. A heavy application of fertilizer late in the season may cause the fish to suffocate by bringing about a rapid decay of submerged vegetation which uses up the free oxygen supply in the water.

He suggests that farmers and ranchers contact their county agent for more information on fertilizing fishponds.

Lions Club Luncheon

Four were guests when the Lions club met for the regular luncheon Wednesday at the Community Center. They were Ray Baumgardner, eagle hunter, Ross Hardy of San Angelo, Alvie Cole, and Mrs. Val Melvin, both of Sterling City.

Mrs. Melvin, state representative for medical technologists, asked the club to back a pending state bill to set forth requirements for laboratory technicians. This the club voted to do. She pointed out that at present no educational requirements or other qualifications were required for one to practice laboratory work. Mrs. Melvin and the organization of technicians, feel that such people should have a certain education and pass a state examination before engaging in such work.

HOMEMAKING GIRLS WILL Observe "Hobo" Day Here Saturday

The Future Homemakers of America Club have declared Saturday, April 7, as "hobo" day. These girls will do odd jobs such as washing windows, dishes, or cars, cleaning house, baby sitting, or any other jobs in order to raise money for the annual spring banquet. For further details, contact Miss Jorene Shinn or any of the F.H.A. girls.

On Saturday, April 14, the girls will sponsor a bake sale. Further details will be in next week's paper.

The girls elected Patsy Davis and Charlene Drennan to represent Sterling City at a F.H.A. meeting in Fort Worth, which will begin May 1 and last through May 3. Charlene is the president of the Sterling City F.H.A. Chapter and Patsy is the district president for next year.

Darlene McEntire led the group in some songs and refreshments consisting of iced tea and canapes were served by the senior girls.

Attending 5th District Convention in San Antonio

Miss Ethel Foster, chairman of the budget, a member of the executive committee of the General Federation of Women's Clubs, a past president of the Texas Federation and a candidate for treasurer, General Federation, 1952, is attending the Fifth District (TFWC) Convention in San Antonio this week. Mrs. J. Howard Hodge of Midland, TFWC president, is also attending the session.

Presbyterian Church REV. ROBERT BRANNON TO PREACH AT PRESBYTERIAN CHURCH HERE SUNDAY

Rev. Robert Brannon, now a ministerial student in Austin, will preach at the local Presbyterian Sunday morning. Such announcement was made by Hal Knight this Wednesday. Dr. B. K. Tenny of Ft. Worth may preach Sunday night, said Knight.

All are invited to attend the services, and a cordial welcome is assured, said Knight.

\$706.40 RAISED IN RED CROSS DRIVE IN STERLING COUNTY

The Red Cross Drive has been officially closed for Sterling County and the \$706.40 sent in to headquarters. Such announcement was made by county chairman Chesley McDonald this week.

McDonald commended the Roll Call chairman, Sue Nelson, for her excellent work in carrying the drive to a successful conclusion. He said that the quota for the county was only \$399, which was less than half of the amount raised.

P.T.A. Next Monday

The Sterling City Parent-Teacher Association will meet next Thursday afternoon for the regular monthly meeting.

Following the opening song, Mrs. M. C. Reed will give the devotional. Entertainment will be by the 11th and 12th grades. Mrs. H. A. Chapple will discuss "How Leisure Hours Are Spent."

ALTHOUGH NOT WIDELY publicized, the recently reported offer of Spain to join a trilateral defense pact with the United States and Portugal, is considered highly significant in official circles, particularly the Pentagon.

Dictator Franco has an army of over 300,000. Spain guards the Gibraltar straits and controls that narrow neck of water separating Africa from Europe through which Atlantic - Mediterranean shipping must pass. It is the gateway to the Suez and the Middle East, and is considered one of the most strategic shipping passages in the world.

Then, too, the Pyrenees separate Spain from France and that rugged mountain range forms the only really effective natural barrier to the occupation of all Europe by the Russians, should they choose to march before the western defenses are perfected under General Eisenhower. If the worst comes to the worst, military leaders point out to the invaluable use that could be made of air fields in Spain from which to operate with more security.

That's why defense strategists have reportedly been pressing for more attention towards the Spaniards. The State Department, on the other hand, has balked at collaborating with Franco in the past on the ground that the Spanish dictator has a bad record, which is admitted, and should change his domestic policies before we play ball with him.

But the military viewpoint—which has strong backing in Congress—seems to be getting somewhere. An Export-Import loan to Franco, sanctioned by Congress last year, is shaping up. President Truman recently sent an Ambassador to Madrid, and now the Spanish government suggests a pact whereby she would go to war on our side if we should be attacked—and vice versa.

WHILE STILL A LONG WAY from a reality, the Spanish gesture may develop into a firm alliance. That would supplement the Atlantic Pact, composed of 12 countries. And it would undoubtedly be good news to General Eisenhower who has made no secret of the fact that he would welcome an acceptable deal with Franco's government.

The only catch is that the Spaniards will, if a mutual agreement is reached, expect Uncle Sam to provide military assistance so her armies can be better equipped and modernized. We are already doing that for Atlantic Pact countries and a few others.

The point is that if war comes we can't be too choosy who our friends are so long as they're lined up on our side. After all, not long ago we had one Joe Stalin for an ally. Now it happens that Franco—like Tito—is a dictator not to our liking, but it also happens that he—like Tito—is strongly anti-Russian and is, therefore, a potential friend of ours if the Kremlin should plunge the world into another war.

Levi Garrett Delegate To W.O.W. Convention in Fort Worth

D. D. (Levi) Garrett attended the National Convention of the Woodmen of the World that was held in Fort Worth last week. He was the delegate from the local W.O.W. Camp. C. L. Sinclair and Earl McElroy of San Angelo, also attended the convention.

ATHLETIC EVENTS

By Harry Blaneck

The Sterling Volleyball girls were beat both in an A and B game at Garden City Friday, Mar. 30. The A game score at half time was 19-17, final score, 41-22. The B game score at half time was 20-18, final score 47-43.

The Sterling track boys will attend the District Track Meet at Big Spring, Wednesday, April 11, at 10 o'clock a.m.

RAPE CHARGE FILED AGAINST LATIN AMERICAN

Christopher Herrera, 23-year-old Latin American from Colorado, has been charged with statutory rape of a 14-year-old Sterling City girl.

The charge was filed in 51st District Court here after the girl told her mother she had been intimate with a man she met in a movie. The bill will be considered when the grand jury meets here April 23, Dist. Atty. Ralph Logan said.

PAROCHIAL OIL CO. BADE ESTATE TO TEST TODAY

The Parochial Oil Co. of Midland plans to install pump today on the shallow test on the Bade Estate. The well bailed oil of improving amount and gravity when completed last Saturday.

The test is in section 22, block 22 H&T.C. survey.

718 LICENSE PLATES SOLD

Tax assessor-collector Henton Emery said this week that 718 license tags had been sold in this county. A breakdown of the plates issued is as follows:

Trucks	110
Farm Trucks	135
Truck Tractor	8
Trailers	25
TOTAL	718

BENNETT Special Water Well Pump. Seats in old barrel. Practical in wells from 150 feet to 1,500 feet deep. For particulars, call or write Bennett Supply Company, Iraan, Texas.

HEALTH TALKS

Health Talks Prepared by The State Medical Association of Texas

Infectious diseases usually settle in one particular part of the body first and then sow their seeds or poisons of discontent that spread to other parts of the body. Treatment in many diseases consists of routing out the germ where it first set up housebreaking and then helping the rest of the body get rid of the remains.

Anthrax usually shows up on a hand, face, arm or neck when the germ is spread from livestock to a human being. At first it's just a round red spot, then it rises up into a blister with other blisters surrounding it. When the blister breaks the rim of the sore gets red and the middle of the sore fills up with an ooze then dries into a black scab. And the whole thing starts swelling.

The infection tries to spread from that sore into the body by way of the lymph glands; these may swell up while they are forming a dam against the spread of the disease, but if they are successful in holding that dam, the sore of anthrax will start disappearing with the swelling going down, the scab dropping off, and leaving a scar behind which soon disappears. Special kinds of medicine applied to the outside of the sore will help those glands in side keep the infection from spreading.

This same sore may start in the lungs or in the intestinal tract and it is then more serious.

There is no such distinguishing sore when the disease is botulism, the kind of food poisoning you can get from improperly canned food. With this disease, it is the food which is poisonous even before you eat it. The germ which causes the

food to be poisonous is seemingly quite safe as long as it gets plenty of air; you eat it on fresh foods without ill effects. But when that germ is left alive in a spot without air, like in a can, it starts brewing up a poison. High pressure canning kills the germ; it has been over 25 years since a case of botulism was reported from the eating of a commercially canned product. Improper home canning without keeping the moist heat high enough for the time required to kill the germ is the main cause of botulism.

Botulism doesn't always show up in the looks of food. Naturally, if the food looks spoiled or smells funny, you should not eat it but should throw it out without even tasting it. Otherwise if it has been properly canned, boil the food for at least ten minutes before serving it.

That poison that the germ makes in the food is known as a toxin. A different brand of germ goes about the business of creating the disease of diphtheria in pretty much the same way. In diphtheria, the germ latches on to some part of the body, usually the throat, builds a leathery patch over itself and starts making a poison out of the juices and tissues of your body. The germ itself doesn't move, but the poison digs downward into the blood stream and flows through the body. This poison, or toxin, makes a bee-line for certain nerves or maybe the heart or other nerves or and interferes with their proper function.

When the doctor finds that leathery patch, he knows that means diphtheria. So he removes the patch to keep any more poison from being manufactured and gives you medical and bedrest treatment aimed at keeping the poison from doing harm before the body gets rid of all of it.

Since diphtheria is contagious, other people are kept away from anyone who has it. Anthrax is spread only by animals and botulism is spread only by poisoned food so they don't require isolation from other people.

The two types of dysentery are spread among other people in areas where sanitation is not so good. They do not affect animals, just

people, so that proper health measures among mankind would cut down on the number of dysentery cases.

Bacillary dysentery, caused by plant-life germ, is not as serious or as prolonged as amebic dysentery, caused by animal-life germ, but is more easily spread. Towels, eating utensils, and food handled by a person with bacillary dysentery or the germ which causes it may spread it to others. Within a day it makes itself known by cramping of the intestines, fever, and watery bowel movements.

Bacillary dysentery can usually be controlled by proper treatment within one to four days without any after-effects outside of an occasional attack of arthritis.

Amebic dysentery, on the other hand, doesn't usually make you suddenly sick; it starts off with minor cramps in the abdomen, alternate periods of loose bowels and constipation, and slight fever if any; but there is usually some weight loss and a general feeling of illness along with flecks of blood and mucus in the stools.

It may affect other organs of the body, especially the liver, and may become quite serious.

It is spread only by direct con-

tact with the germ passed from another's body so that proper sewage disposal could prevent its spread.

Variation in D

By Betty Barclay
D is for delicious—and delicious sweet potatoes. And, since variation is the key to good eating, as well as of life, this recipe for Glazed Sweet Potatoes is bound to be one of your best variations on a popular theme.

For the same perfection in preparing "sweets" in a manner, use maple-blended syrup. It provides a gourmet touch, easy to do but hard to beat.

Glazed Sweet Potatoes
¾ cup maple-blended syrup; ¼ cup butter; 6 medium-sized canned or cooked sweet potatoes.
Simmer syrup and butter together in skillet 2 minutes. Add sweet potatoes. Cook over low heat, uncovered, 10 minutes, turning sweet potatoes frequently to glaze. Makes 6 servings.

Mother of Two Praises Hadacol

HADACOL Supplies Deficient Systems With Vitamins B₁, B₂, Niacin and Iron

Mrs. Elmer Hise, 3225 2nd Ave., Council Bluffs, Iowa, is a good mother, and like all good mothers she keeps a careful watch for the welfare of her two young children. And when little four-year-old Lucille Hise wasn't feeling as her mother knew she should do something about it, Mrs. Hise gave Lucille HADACOL, because she had heard how much it was helping children who had poor appetites and stomach distress caused by deficiencies of Vitamins B₁, B₂, Iron and Niacin. It helped her so much that now Mrs. Hise gives HADACOL to both of her children.

Here is what Mrs. Hise says: "My daughter has taken two bottles of HADACOL and she has been eating more than before and also sleeps better. I think HADACOL is the best thing for children who do not have an appetite. My daughter is four years old. Before taking HADACOL, my daughter complained of her stomach hurting her, and I got her a bottle of HADACOL and she says her stomach doesn't bother her any more. I think HADACOL is wonderful. I am also giving HADACOL to my three-year-old daughter."

HADACOL is So Effective
An important thing about HADACOL is that you get Vitamins B₁, B₂, Niacin and Iron in liquid form, which means that they are quickly absorbed and dispatched to the blood stream, ready to go right to work. HADACOL helps build up the hemoglobin content of the blood (when iron is needed) to carry these precious Vitamins and Minerals to every part of your body.

"Is Our Climate Getting Warmer?"

Although there is plenty of evidence that our climate is getting warmer, some weather experts still doubt it. Birds are gradually migrating northward, glaciers are shrinking. Don't miss this authoritative, beautifully-illustrated article, in the American Weekly, that great magazine distributed with next Sunday's Los Angeles Examiner.

I WILL DO IRONING IN my home.
Mrs. Carol Reed.

WITH a bird's-eye view or a close-up would show these Chocolate Birds Nests to be pretty attractive; but no bird will have a chance of moving in and setting up house-keeping, because the nests will be all "taken" in no time—chosen on the spot by any one who discovers they are a mouth-watering concoction of creamy rich chocolate, tender shredded coconut, and crisp roasted peanuts.

Chocolate Birds Nests

1 package (8 squares) candy-making chocolate; 1 cup roasted peanuts, skinned; 1 cup coconut, toasted; ½ cup coconut, untoasted; Jelly Beans.

Heat chocolate over boiling water until partly melted; then remove from boiling water and stir rapidly until entirely melted. Add nuts and toasted coconut; stir until peanuts and coconut are completely coated with chocolate. Drop from tablespoon on waxed paper. Shape with 2 teaspoons to form nests. Cool until firm. Fill nests with plain coconut and jelly beans. Makes 14 nests.

Note: If desired, drop by teaspoon on waxed paper. Makes 2½ dozen clusters.

YOU know what a new hat does to make your wardrobe look newer and more attractive. Well, a new "topper" gives added zest to some of the old stand-bys in the food department, too. Take that family favorite, chocolate tapioca pudding, for example. Very good of itself, but dress it up as suggested here, and what have you got! Something pretty tempting, you'll find!

Spring Temptation

Prepare chocolate tapioca pudding as directed on the package. Turn into sherbet glasses and chill. Garnish with Pistachio Topping.

To make Pistachio Topping, whip ½ cup chilled heavy cream with 1½ teaspoons sugar and ¼ teaspoon each vanilla and almond extract. Add a few drops of green coloring. Serve on chilled pudding and sprinkle with pistachio nuts.

News-Record

SHE HAS HER HANDS FULL TODAY

Your telephone operator has a tremendous job on her hands today. The record number of telephones now in operation has sent telephone traffic soaring far beyond the busiest wartime peaks. So, if you have a few seconds' wait when calling, please be patient. Your operator will serve you as quickly as she can.
