Boys Found Delinquent In Late Decision

Two to Reform School; One Paroled to Parents

Three 13-year-old Big Spring boys were found delinquent in a jury juvenile case here Tuesday. The jury remained out until 3:30 a.m. Wednesday morning before reaching their verdict.

The three boys are Nicky Rocha, Herman Lee Wright and Doyle Hail.

They were charged with being delinquent, along with Mike Martinez, 13, also of Big Spring, following the fatal shooting of Taylor Garrett, 54, here last May 8. The boys had stolen a car in Big Spring and were on the way to old Mexico. They stopped at the Gulf Station here and attempted an armed robbery, ending in the shooting of Garrett. Martinez admitted the shooting and was committed to the Gatesville School for Boys on May 17.

Wright and Rocha were committed to the Gatesville school until they reach 21 by juvenile judge G. C. Murrell. Hail, who was said to have been asleep in the back seat of the car at the time, was paroled to his parents until he is 21. He will have to report regularly to the juvenile officer and should he get into any other trouble, he will be sent on to Gatesville, it was said.

Representing the state at the hearing were Worth Durham, local county attorney and Jack Sessom, assistant district attorney from San Angelo.

Clyde Thomas and Wayne Burns, both of Big Spring, represented the boys. They made four motions which were quashed by Judge Murrell. They made motions for an open trial, a change of venue, a quash of the venue and a quash of the complaints. The state asked to try all three defendants together. That motion was granted.

Jurors in the case were Charlie Drennan, Ewing McEntire, W. L. Young, Rufus Foster, Charles Speck and Foster Conger.

Hearings for juveniles are closed to the public by existing law—except for those directly concerned in the hearings.

Cole-Dillard Marriage Last Saturday

Mrs. Marie Cole and Mr. J. R. Dillard were married last Saturday afternoon at 2:30 in the chapel of the First Methodist Church in San Angelo. The ceremony was read by the pastor, Rev. Ennis B. Hill.

Mrs. Wm. J. Swann and Bill Swann were the only attendants at the wedding. For the ceremony, the bride wore a black and white dress and the accessories were white. She wore a baby orchid corsage.

Following the ceremony, the couple left for a week's trip to Monterey, Mexico. They will be at home on the Cole ranch northwest of Sterling City. Mr. Dillard is the principal of the Sterling City grade school, and coach of the junior high age group.

HOSPITAL NOTES

Patients in the Sterling County Hospital on Thursday morning of this week included—

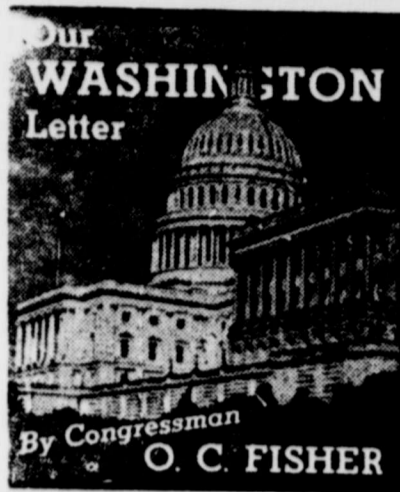

Mrs. Neal Reed
Neill Munn
Mr. and Mrs. D. P. Glass
Jack Mehl
Dismissals since Thursday morning of last week include—
Gerald Johnson
Mrs. Mattie Chaney
Mrs. Roy Foster
Jim Bailey
Mrs. Wayne Lowery and infant daughter, Tanya Elaine.

Laboratory Technician

Dr. Lloyd R. Hershberger, San Angelo is doing the laboratory work for the Sterling County Hospital at the present time.

Dr. Hershberger is tops in the field of lab and pathology work in this area.

Delbert Haralson, cashier of the First National Bank here, is in Goodfellow Field Air Base doing his stint as an Air Force Reserve.

THE SOCALLED CIVIL RIGHTS bill, now being debated in the House, injects something new into American jurisprudence: it deprives a citizen of the right of trial by jury for certain alleged violations of existing laws, and makes him subject to trial by a Federal Judge who would make the final decision of guilt or innocence.

That is proposed by a clever gimmick injected into the bill, making the United States a party to all lawsuits concerning any alleged violations of the law if enacted. When the U.S., even technically, is a party to a suit, then under existing law the right of trial by jury is automatically denied to a citizen who it is contended has violated an injunction issued by a Federal Judge. If, on the other hand, the United States were not a party to the suit, then the right of trial by jury would remain inviolate.

Thus, in an appeal for colored votes, the Attorney General, who drafted that bill, would deprive a citizen of rights which are as dear to him as any civil right ever conceived.

JUSTLY PROUD . . . A constituent after reading the results of the questionnaire recently wrote me a note which contained this comment, which I think is well worth repeating: "The altruism, good sense and sincere interest in the stability and welfare of the nation above selfish consideration as reflected by a large majority of your constituents in response to your questionnaire undoubtedly made you justly proud, and it was in the restraints of modesty no doubt that you referred to them as 'good, average Americans' when you know they are far above average; in fact as I see it, you enjoy the distinction of representing what remains of the true Americans."

Thanks to that constituent for a well-phrased and, I think, a well justified appraisal of the people in the 21st district.

A RECENT VISITOR was Mrs. Adelle D. Whitt of San Angelo, here attending a special course for two weeks at American University. She is brushing up on new techniques to use in an important position she holds with the General Telephone Company.

Daughter to the Wayne Lowerys

A daughter, named Tanya Elaine, was born to Mr. and Mrs. Wayne Lowery last Friday, the 7th of June at 5:55 p.m. in the Sterling County Hospital. The baby weighed seven pounds and thirteen ounces.

Papa Wayne works for the West Texas Utilities Co. here. The baby is a little red-head Mary the second. Grandparents are Mr. and Mrs. W. E. Williams of Childress and Mr. and Mrs. John D. Lowery of Memphis, Texas.

Return from Trip East

Mr. and Mrs. York Gruny and David returned home last Saturday from a two-week's vacation trip that took them to Hawthorne, New Jersey, where they visited York's parents, Mr. and Mrs. A. E. Gruny. They visited Coney Island, rode the New York subway, saw the statue of Liberty, the Empire State building and Radio City Music Hall while there.

mon to Texas, New Mexico, Arizona, Florida and California. They do move into Georgia, Alabama and South Carolina. They have moved further north during the last few years through the shipment of infected animals to other states.

The cost of screwworms to livestockmen is estimated to be between \$10 and \$15 million annually according to USDA.

The June issue of the Cattleman carries a question and answer article on this same information.

City Water Bonds Sold; Work To Begin

Lions Ladies Night and Installation of Officers June 25

Ted Norton, former minister at the Church of Christ here, was a speaker at the Lions Club luncheon Wednesday. Norton is currently doing the preaching at the meeting at the Church of Christ. He told of science and the Bible agreeing in context.

Horace Donalson acted as president in the absence of Delbert Haralson. Donalson, a city councilman, told of the meeting of a committee from the club with the commissioners court Monday in regard to the patching of the city streets.

Guests at the meeting were Norton, Jimmy Bauer, Tom Meadows, and David Gruny.

Ladies Night and Officer Installation June 25

It was announced that the new officers would be installed here on the night of June 25. The occasion would also be a ladies night. Joe Pickle of Big Spring is scheduled to be installing officer and a quartet of boy singers from Big Spring will bring the musical program.

To Spray Town For Flies

The club is preparing to spray the city with anew fly spray preparation, for fly and mosquito control. The club has bought the spray material and it is planned to ask the other clubs of the town if they will contribute to the cost of the spray material.

SHOWERS FALL HERE EARLY WEDNESDAY

Showers measuring .30 of an inch fell here early Wednesday at 3:30 a.m. Dark clouds and thunder and lightning made the threat of heavy rains seem imminent, but it moved on after dropping the .30 inch.

Last week was the first week in over a month that some rain had not fallen. The dry hot weather is drying out the moisture here in a hurry, and more rain is needed.

The Behind 8 Ball

Well, it went all last week without giving us our weekly rain. And that is hard to take, now that we were getting used to the weekly precipitation. And the country really needs it—bad. This hot West Texas sun shore does dry out the moisture in a hurry.

8-BALL

The usual Big Spring crowd of people showed up here Tuesday for the trial of the three boys in juvenile court. There was a bunch of character witnesses, etc. for the three boys on trial. Although such cases are held in closed court—no spectators and the like are allowed in the courtroom. A jury was finally selected and the trial got underway afternoon.

8-BALL

My family (and of course me) all went down to the North Concho lake last Saturday afternoon for a short fishing trip and a picnic supper. I like to go for the supper part. Anyway, the boy caught a small perch on a perch hook and the distaff side of the family asked for it to use as bait on her rod and reel. Pretty soon she asked for help. She had hooked something big, and how! I reeled him in slowly and did not play him like a true fisherman would. But he pulled like a big log when he would turn and run. Anyway I got him to the bank and up on a safe part away from the water without losing him. I then lifted him up on the line. The hook (which wasn't very big) kinda straightened out and the little leader broke. But the fish was safe.

The kids had never seen such a big bass. They wanted to stop and weigh it. We stopped at Berry's Minnow Stand but they didn't have any scales and when we got home they put the fish on the bathroom scales. It weighed only between 4 and 5 pounds on the bathroom scales, but it was really a nice one. And it made a full and complete

Mrs. Taylor Garrett Is Named City Secretary

The \$160,000.00 water bonds of the City of Sterling City have been sold to Columbian Securities of San Antonio and the money for the bonds will be available soon, it is thought. The tax bonds portion (\$80,000) went at the interest rate of 5 1/4% and the revenue secured bonds went at 5 1/2%.

Virgie Garrett Named City Secretary

Virgie Garrett was sworn in as city secretary Saturday following her selection by the city council. She will serve as city secretary and city tax assessor-collector.

The city council met in regular meeting on Monday night of this week to set in motion the preliminaries of the water system. Present were Mayor John Walraven and Councilmen Fred Hodges, Horace Donalson, J. I. Cope, and R. T. Caperton. Also present were Hugh Dickson, engineer and the city secretary.

Minutes were read and dispensed with. It was suggested that the new secretary visit the city offices in Bronte and Robert Lee to seek advice, etc. to set up a city office. Also to find out just what furniture and supplies would be needed—in the way of desks, filing cabinets, typewriters, ledger, stationary, etc.

Since Bronte was given a large water storage tank by the Santa Fe railway system, it was thought that perhaps such a deal might be gotten for Sterling. The matter will be looked into before bids are accepted on a new tank for the system. Councilman Donalson called E. A. Tusha, general agent in Angelo for the Santa Fe, and he promised a look into the matter. If such a deal could be gotten as did Bronte, it would save about \$20,000 on the tank alone, said the engineer. The Bronte tank was donated by the railroad company and it was hauled into Bronte and erected for \$7,500, instead of a cost of \$28,000 for a new tank. A 50,000 gallon storage tank will be used and it will have to be 100 feet off the ground to meet with state fire insurance regulations. That is, if it is to get a reduction in fire insurance rates here, said Dickson.

The location of the water well was talked. Also the place for the erection of the tank and tower was discussed. The engineer said the best place would be near the center of the business district, so the water pressure would be greatest for fire protection, etc.

The location of a city hall took some time, and a place practically agreed upon.

With work starting as soon as can be under the time limit for bids, etc. it will be six months perhaps before the system will be well underway, it was estimated. Bids and specifications have to be prepared and advertised, it was said. A test well put down and tested for the water potential and purity—all of which takes time.

The Charles J. HARRises of Amarillo were week-end visitors here at Mrs. Harris' mother, Mrs. D. C. Durham and other relatives last week.

Coach Diddle Young took the Little Leaguers to Silver Monday night for the first away-from-home game. Silver took the game from the locals, who have not yet had much practice.

Billy Nelson McClellan and Finis Westbrook left Monday morning to take a Thunderbird car to Wisconsin for a Mr. Ellwood.

Church of Christ Meeting End Sunday

The eight-day meeting in progress at the Church of Christ will end Sunday. Dinner at the community center will be held following the morning service, it was said. Ted Norton, now of Snyder, is doing the preaching.

fish meal for our family when we had broiled fish for supper.

8-BALL

The Sterling School Alumni Association is getting set to have the annual get-together June 29 on the Nick Reed River Park.

Wheat farmers are reminded that next Thursday, June 20, is the date for voting on the 1958 wheat quotas. This is a national referendum and all wheat farmers over the nation will vote as to whether or not quotas will be in effect in 1958.

Sterling County wheat farmers will vote in the county ASC office between the hours of 8:00 a.m. and 7:00 p.m. on Thursday, according to Mrs. Roxy Brock, county office manager.

The state wool and mohair judging contest for 4-H Club members was held at San Angelo Junior College last Saturday. A Sterling County team was made up of Jerry Payne, Johnny Augustine, Davy Durham and Don McDonald attended and took part in the contest. This was the first time for any of them to take part in the contest and they did very well.

In wool and mohair judging the contestants are required to judge four fleeces of wool, one against the other and check their reasons. They do the same thing on mohair.

In addition they are required to classify twenty samples of mohair and twenty fleeces of wool. The classification of the mohair consists of grading it such as No. 1 Kid or No. 2 grown or whatever it might be on the basis of fineness. The wool has a little more to it since it consists of three parts. First they are required to put it into the proper blood grade such as fine, 1/2 blood, 3/4 blood or whatever it might be. Then it must be classified as to length, that is staple, combing, or clothing. The third part consists of determining the shrink of the fleece as heavy, medium or light. In addition to all other things that they must do, the contestants must be on the lookout for kemp

in wool or hair, and must also check the wool for tender spots or breaks.

All in all the contest is a good way for a boy or girl to learn a few things about wool and mohair. Since a club member has to check the reasons on the judging classes, the element of chance and guesswork is pretty well removed. In the classification there are many factors to be considered and again there is little room for guessing.

The next place the team plans to do more wool and mohair work is at the Sonora Wool and Mohair Show next Wednesday and Thursday.

Many ranchers say that they can't remember screw worms being as bad as they are this year. The big reason of course is the fact that climatic conditions are favorable for the development of the flies that are the adult stage of the screw worm. For the first time in years, there is moisture which is necessary to the fly.

The adult fly which lays the egg starts laying eggs at the age of six days. She can lay 250 eggs on a wound at that time and these of course hatch into the worm or maggot in a day. After five or six days in the wound, the maggots drop out to the ground where they pupate developing a hard, dark coating. After a week of summer weather such as we are having, they emerge as the adult fly and start the cycle over again.

Even if all livestockmen treated every wound, we would still have screwworms since they also infect wildlife. Any warmblooded animal is prey for the screwworm and it is going to be very hard to rid the country of them. They are com-

DISABLED PEOPLE TO GET SOCIAL SECURITY CHECKS

More than one hundred thousand severely disabled people in communities all over the nation will receive their first social security disability insurance checks in August, announced Floyd B. Ellington, district manager of the San Angelo social security office today. But many other eligible disabled workers 50 to 65 years of age, some of them no doubt living in this area, have so far failed to make application to their social security offices. Those who have been disabled for work a long time must apply before June 30, Mr. Ellington pointed out, or they will lose their rights to these new benefit payments.

Any severely disabled person who has worked under social security for at least 5 years and who has been disabled for 6 months or more should get in touch with his social security office right away, the social security district manager said. If he is between 50 and 65 years of age, he may be eligible for monthly disability insurance benefits. If he is under 50, he may be eligible to have his social security record frozen to protect his future right to disability payments, and also his and his family's right to old-age and survivors insurance benefits.

"Unfortunately there is a lot of misunderstanding," Ellington said, "as to how a disabled worker has to be to get social security disability insurance benefits of to have his social security record frozen. The rules in the social security law for deciding whether a person is 'disabled' are different from the rules in some other Government and private disability programs." To be found "disabled" under the social security law, he said, a worker must have a disability which, in the words of the law, makes him unable "to engage in any substantial gainful activity." It must be the kind of physical or mental condition which shows up in the medical evidence, including his doctor's report, hospital reports, or special tests, and it must have lasted for at least 6 months and be expected to continue for a long and indefinite time.

In general, he said, "substantial gainful activity" means the performance of a substantial amount of work with reasonable regularity in employment or self-employment. A person does not have to be completely helpless to qualify under the social security disability provisions, Mr. Ellington emphasized. Consideration is given to all of the facts in the individual's situation both medical and nonmedical.

First consideration is, of course, given to the severity of his condition as shown by the medical evidence. This evidence must show that the person has a condition which makes him unable to perform significant functions such as moving about, handling objects, hearing, speaking, understanding, or reasoning, so that he cannot with his training, education and work experience engage in any kind of substantial activity.

"Examples of some impairments which would ordinarily be consid-

ered severe enough to prevent substantial gainful activity are:

1. Loss of use of two limbs.
2. Progressive disease, such as diabetes, multiple sclerosis, or Buerger's disease, which has resulted in the physical loss or atrophy of a limb.

3. Disease of heart, lungs or blood vessels which has resulted in major loss of heart or lung reserve as evidenced by x-ray, electrocardiogram or other objective findings so that, despite medical treatment, it produces breathlessness, pain or fatigue on slight exertion, such as walking several blocks, using public transportation or doing small chores.

4. Cancer which is inoperable and progressive.

5. Damage to the brain or brain abnormality which has resulted in severe loss of judgment, intellect, orientation, or memory.

6. Mental disease (e.g., psychosis or severe psychoneurosis) requiring continued institutionalization or constant supervision of the affected individual.

7. Loss or diminution of vision to the extent that the affected individual has central visual acuity of no better than 20-200 in the better eye after best correction, or has equivalent concentric contraction of his visual fields.

8. Permanent and total loss of speech.

9. Total deafness uncorrectible by a hearing aid.

Ellington said most individuals with such serious disabilities are unable to work. There are cases, however, where a person with such a severe disability is working or able to work, because of his special knowledge and skills. He would not be eligible under the social security disability provisions, the district manager said, because he would be able to engage in substantial gainful activity. On the other hand, a person might work

occasionally or intermittently but this would not necessarily mean that he was able to engage in substantial gainful activity. Both the nature of the work and the amount of money he earned would have to be considered.

PERSONALS

I AM NO LONGER RESPONSIBLE FOR MY WIFE'S ACTIONS

(Since she got her new kind of Ford)

"If she is unbelievably happy at 7:00 A. M. every morning, I now hold her 1957 Ford responsible. If she is off for the day at 7:02 A. M., I suggest that it is the power of Ford's Thunderbird V-8 engine. If she appears vastly more style-conscious, it is the longer, lower lines of her new kind of Ford that have made her so.

"If she arrives home remarkably refreshed, I refer you to the lower, more comfortable seats, the wider wrap-around windshield and the other peace-of-mind features of her new "Inner Ford." If she's just a bit more spoiled, don't blame her. With optional power steering, power brakes, power windows and seat—who wouldn't be?"

"And if she is constantly raving about the savings her new car brings her, she's merely confirming what I've been telling her about Fords for years! Sure, we're a two-Ford family now. But even having one Ford in the family was more fun than you can imagine! Try a new '57 Ford at your house. It's Terrific!"

CATTLE MOVEMENT UNDER WAY FOLLOWING FLOODS
 FORT WORTH—The arrival of more than 11,000 cattle and calves at Fort Worth Monday signaled the start of the summer shipping season, which has been hampered by rain, mud and flood in recent weeks. The big movement followed the first few days of dry weather

following the record breaking rains of April and May.
 For the record it was the largest offering in four years and approached the numbers recorded October 21, 1946 before the day was over.
 Grass cattle prices weakened under the impact, but strong stocker and feeder demand held the price break to relatively minor proportions. Grainfed steers, yearlings and heifers held steady. Bulls sold 25 cents lower. Cows, slaughter calves and plain to medium grade stockers were around 50 cents lower. Grasser yearlings and heifers shared the 50c decline. Good or choice quality stockers and feeders held firm.

Good and choice steers and yearlings bulked at \$19.50 to \$23.50, with a fed individual steers to \$25. Plain and medium butcher sorts bulked at \$12 to \$18.50. Fat cows drew \$12.50 to \$15.50, and some heiferish cows reached \$16 and were consigned by C. T. White of Brady, who also had some young fat dry females at \$16.75, that weighed around 1,050.
 Slaughter lambs averaged around 50c lower at Fort Worth Monday.

Trade was uneven, with some spots off more and others off less. Feeder lambs were around 50c lower, with some sales \$1 under last week's best. Slaughter ewes and muttons sold steady.

PLOWING—Garden work and weed mowing done with tractor. See Roy Martin, phone 8-2721.

PARAMOUNT

EVAPORATIVE Air Cooler

You can be COOL and COMFORTABLE

Yes, you can be cool and comfortable with modern evaporative air cooling. Your home or office will be just as refreshing as an ocean breeze after you install a Paramount Evaporative Air Cooler — that cools with fresh, washed, clean air, circulating ever so gently. Investigate a Paramount Cooler now. Ask us to explain its many advantages. Ask us to tell you about fingertip Controlled Cooling. Ask us to show you the Comfort Selector. Ask us to explain the famous "No-Clog Sta-Fresh" filter that doesn't clog and restrict cooling, and whose redwood impregnation keeps fresh air sweet and clean — always. Ask us to prove that a Paramount Evaporative Cooler is the best cooler money can buy.
