AROUND THE COUNTY by

ARTHUR BARLEMANN, JR. COUNTY AGENT

As many ranchers and farmers already know, they will not be required to file a claim for the refund of the federal tax on gasoline used on the farm or ranch this year. Ordinarily, they have been required to make this filing between July 1 and October 1. This year, they will claim it as a credit on their income tax return.

The credit will be taken on the first return filed for a full year after June 30, 1965. If the return is filed on a calendar year basis, the credit will be taken on the return filed during 1966. It will include all tax on gasoline used on the farm or ranch operation since July 1, 1965, and through December 31, 1966. The refund will be claimed in a manner similar to credit for tax withheld on wages.

There are large numbers of grasshoppers in some areas of the county. There have been several questions as to controls for these pests where they might be damaging around the yard or garden. Recommended controls are sprays of Sevin, Toxaphene, Malathion, or Heptachlor. If these insecticides are used in the garden to control grasshoppers, remember that there are limitations on the use of products from the garden following these sprays. They vary for each of the insecticides but here are the times between application and use of vegetables. Toxaphene — 3 days; Sevin — 0 days; Malathion — 3 days; Heptachlor — not recommended for garden use after the edible parts of the plant begin to form.

Honeydew producing aphids are beginning to make their appearance in numbers sufficient to be a pest on pecan trees around town. Actually, the aphids can damage a tree if they become severe enough but the most damage usually is from the honeydew produced. It gets on the walks, cars, and anything else around or under the trees.

Several sprays are recommended for the control of the aphid. Malathion is recommended at the rate of three pounds of 25% wettable powder per hundred gallons of water. This will give excellent control of the aphid.

Another recommended insecticide is BHC. Use it at the rate of 1 pound of 12% gamma BHC per hundred gallons of water.

An old standby is 40% nicotine sulfate commonly known as Black Leaf Forty. It should be used at the rate of one pint of 40% nicotine sulfate plus three pounds of soap per hundred gallons of water. The soap is a sticking agent and helps break down the material into a better emulsion.

Malathion will also give some control of San Jose scale on the trees during the summer months. If your trees are affected with this pest, the malathion at the same rate will give control if the scaffolding, or trunk and branches, of the tree are sprayed.

The hot humid weather is bringing on another pest in some yards. Some flowers and shrubs are showing up with mildew. Mildew is a whitish or grayish, mold-like growth on the upper and lower parts of leaf, buds, and twig surfaces. It is produced by several different fungi.

Treatment of mildew consists of spraying with one of several fungicides available at nurseries, feed and seed stores, and garden centers. The recommended fungicides are Karathene, Phaltan, and wettable sulfur.

Blister bugs are causing some damage to garden plants.

## Baptists to Have Special Program

By Youth Group from Midland

A group of young people from the Fannin Terrace Baptist Church of Midland will be in charge of the evening worship services at the First Baptist Church here Sunday at 8 p.m., said pastor Andy Daniels this week.

These young people call themselves "The Crusaders" and go to different churches during the summer months holding services. They provide the preaching, choir and song leader and plan a fellowship hour for the young people following the service.

The public is invited to attend and enjoy the special program at 8 p.m. Sunday, July 17.

## Methodist Youth Emphasis Revival To be Next Week

The Rev. Bill Wiemers, Methodist pastor, has announced that the annual Youth Emphasis Revival will be held at the Methodist Church here next week. The Rev. Phil Roberson of Eden will be the visiting speaker. The program will begin on Monday night, the 18th.

Each night at 6 o'clock, the young people will meet at the church for a supper. From 6:30 to 7:30 the youth emphasis meeting will be conducted for the young people present with talks and questions and answers.

At 7:30 the worship service for everyone, every age, of the community will be held. Regular preaching services will be held and there will be special music, etc. each night. Everyone in town is cordially invited to attend, said Wiemers.

Then at 8:30 (following the regular worship service) there the planned affairs — including (1) movie and games, (2) swimming at Reed's, (3) hayride, (4) wiener roast and (5) ice cream supper.

Special music will be by a youth choir, by Stan Horwood, by an adult choir, by the visiting youth choir and by the visiting speaker.

Rev. Roberson, the visiting preacher, was born in San Antonio in 1938. He finished high school there and graduated from Texas A&M in 1960. He got a bachelor of divinity degree from Perkins School of Theology (SMU) in 1964.

Previously to his Eden pastorate, Bro. Roberson was minister at Veribest-Wall dual charge, and Eden-Pear Valley charge.

He and his wife, the former Beverly Kay Hien, have two daughters, Kimberly Koleen, 4, and Jennifer Joan, 8 months old.

In case of fire dial 8-4771

These bugs are well known for the fiery blisters they cause but occasionally they will damage plants such as tomatoes, peppers, and other in the garden. Favorite food of the pest is the common goathead or heelbur—these they are welcome to but when they attack garden plants, it is necessary to take preventive steps to control them. The best control, according to the latest recommendations, is dusting the bugs themselves with DDT. This is one case where dust works better than a spray. Where DDT is used in the family garden, five days must elapse between the time of application and using the vegetables. A good washing, of course, is also recommended.

## LIONS CLUB

The Lions Club met Wednesday noon in the community center. Collin Douthit was a guest.

Jim Davis told of the Diamond Jubilee committee meeting for Thursday night where final plans for the affair would be talked and acted on.

Jeff Davis suggested that the streets to and in the park needed paving to take care of the problem during the Jubilee barbecue and park meetings.

President D. Kirk Hopkins appointed a committee to select or recommend a club pianist and sweetheart. He named Jack Douthit, Skipper Lively and Roland Lowe.

## HOSPITAL NOTES

Patients in the Sterling County Hospital on Thursday morning of this week included—

Mrs. W. B. Atkinson  
Roy Foster  
Mrs. Maude Randolph  
Dismissals since Thursday morning of last week include:  
Mrs. Johnny Shields  
Hortencia Samaniego  
Mrs. Milton Tomlinson & infant daughter

## Missing Links to Play for Dance

Saturday, July 16, a combo, the Missing Links, will play for a dance at the community center from 8:00 to 12:00 p.m. The admission is \$1.00 per and everyone is welcome to attend, said a spokesman.

## TEMPLE HOSPITAL NOW FOR PUBLIC

A private hospital at Temple, Texas, which for 75 years was devoted to the care of Santa Fe Railway employees has been changed into an institution which now will permit care of public patients.

The new name adopted by the Trustees for the institution is the Santa Fe Memorial Hospital. The Board announced there would be no change in the method of handling railway employees.

The Trustees said after an intensive study aimed at expanding services to employees it was decided to lease the hospital to the new corporation which has been chartered by the state and also approved as a non-profit organization by the Internal Revenue Department.

The Trustees feel the change will improve the position of the hospital and service to association members and also improve its position in the community by ceasing to operate as a private institution.

Plans for the future include expansion of facilities to 142 beds with a long-range program intended to phase out old buildings.

The Memorial Hospital is licensed by the State Department of Health; approved by the Joint Commission on Accreditation and designated by the Social Security Administration as a provider in the Medicare program.

Members of the Association Board will continue on the new corporation board. They are: O. H. Osborn, Chicago, President; E. E. Fleming, Denver, Vice-President; trustees E. G. Manning, Temple; P. E. Johnson, Temple; L. R. Morrison, Cleburne; W. S. Kennedy, Amarillo; John W. Luke, Chicago, with the addition of Dr. Terrell Speed, Temple to the Board and another director to be named.

## Finishes Texas Tech

Lynda Allen, daughter of Mr. and Mrs. Worth Allen, finished her work on a degree at Texas Tech last Friday. She will be awarded the degree at exercises at Tech in August. Lynda, who attended Stephens College for two years, then Tech, majored in fashion and retailing. She was Miss Wool of Texas in 1964.

# Sterling To Hold Diamond Jubilee August 19-20

## Patrolman Leaving

Charles Williamson, State Highway Patrolman here the past two years, is leaving today for Harlingen. There he is joining the U. S. Border Patrol in a new job. The Williamsons have three children.

Bob Browne, now stationed at Ozona, will replace Charles here. He and Mrs. Browne have two small sons.

Jack Asbill will help the Williamsons move. He will drive a U-Haul truck-trailer for them, said Williamson.

## SHIRLEY PRICE MAKES HONOR ROLL

Shirley Price, daughter of Mr. and Mrs. Foster Sims Price, has been named to the Dean's Honor Roll at Abilene Christian College for the spring semester.

Members of the Honor Roll must maintain a grade point average of 3.5 and must take a minimum of 12 semester hours.

Miss Price, a 1965 graduate of Sterling City High School, was a freshman student.

## Linus T. Gober Dies in Brownwood

Funeral for Linus T. Gober, 80 of Brownwood was Saturday, July 2, at Hewett Funeral Home chapel, the Rev. Ervin Gathings officiating. Masonic graveside services were held Saturday afternoon at East Lawn Cemetery in Brownwood.

Mr. Gober, who died July 1 in a Temple hospital, was employed by the Santa Fe Railroad for 62 years.

Surviving are his wife, Mrs. Ella Gober; a son, Harold Gober of Lubbock; a daughter, Mrs. Jane Mitchem of Dallas; a sister, Mrs. Paul Trawick of Florida; three grandchildren; two great-grandchildren; and a nephew, Dr. O. B. Gober of Temple.

Going to Brownwood that Saturday from here were Mrs. James McEntire and Mr. and Mrs. Bill J. Cole.

## Peddler's Permits

A Peddler's Permit is being printed to sell to all travelling salesmen, route men, etc. who sell regularly (or irregularly) in Sterling County. They will be good during the Diamond Jubilee year — 1966 and sell for \$1.00.

So, if you have route men calling on your place of business, see Loyd Murrell and get some of the cards to sell as permits.

## ROOTER CABLE KNOCKS OUT PHONE CIRCUITS

A roto-rooter at the new B&W construction job on West Beauregard in San Angelo was responsible for knocking out the toll long distance circuits from San Angelo to Sterling City on Wednesday, July 6.

Bob Cole, of the General Telephone Co., said the lines or circuits were out from 10 a.m. till 8:35 p.m. that day.

The rotoer plowed into the buried cable and caused the trouble.

Can you ride a horse — or have a wagon in the Jubilee Parade here on August 19-20? — DO SO!

S-Sgt. and Mrs. Donald R. Moore and their children, Rama Jo and Donna Jean, have gone to Germany for a three-year hitch with the Air Force. The Moores had been stationed in California before being transferred to Germany. They visited her parents, Mr. and Mrs. T. A. Gartman and other relatives here the past two weeks.

## Grow a Beard for Jubilee?

Sheriff Jim Cantrell might sell men and boys a permit to get by without growing a beard for the Diamond Jubilee Celebration here. He plans to sell the permits — to help pay off celebration expenses — if a person just doesn't want to grow a beard, goatee or moustache.

Some men plan on goatees. Some are talking of growing the mutton chop type beards, some are planning to grow the handle-bar moustaches — and others plan on side burn "plum down to their toes" — more or less.

The beards will help publicize the Sterling Diamond Jubilee a lot—if enough boys and men go for them.

Permits are for \$2.00 said Cantrell.

Will remove old buildings for the materials, leave lot clean. HU4-2254, Water Valley.

## Old Settlers & Former Residents Invited

Sterling County residents have decided to have a Diamond Jubilee of Sterling County's organization. It will be on August 19-20 and start at noon on Friday, the 19th, and end with a street dance Saturday night. A parade shortly after noon on Friday will start the celebration.

Jim Davis and Jack Asbill are co-chairmen for the event. Many committees have started working on plans for assignments. The invitation committee met Monday night in the home of Mrs. Nan Davis and worked on the invitation list.

The food committee met at a breakfast at the City Park Tuesday morning and named Mrs. Chesley McDonald and Mrs. Stan Horwood co-chairmen of that committee. A breakfast will be served Saturday morning for 75c at the Park. (Coffee and a doughnut only for 25c) The breakfast will be bacon and eggs, biscuits, coffee, etc. it was said. A barbecue supper will be served to the locals and former residents during the celebration.

Planned for the observance is a roping at the rodeo grounds, a saddle horse race, old time games and contests. The Sterling Volunteer Fire Department has called off their annual barbecue, and will cooperate with the Diamond Jubilee in every way. They plan to put on a "water polo" exhibition during the celebration — using fire hoses.

The street between Lowe Hardware and the courthouse will be roped off for the street dance, said sheriff Jim Cantrell.

A historical and research committee will work on some facts and history of the early county settlements.

The Jubilee Committee has asked the Commissioners Court to proclaim Aug. 19-20 as Jubilee and Reunion Days and has asked them to require every man to grow a beard and wear western clothes for the celebration.

The historical committee (W. R. Brooks, Mrs. Jim Bob Clark, Stan Horwood, Mrs. Tom Asbill, and Mrs. Fowler McEntire) wants to arrange an exhibit of old items of interest—pictures, clothes, papers, etc. in a museum exhibit. They are asking all who will loan such items to them to contact a committee member and the display will be put in a building on the main business block. (The exact building will be determined soon.)

The finance committee — Mrs. M. C. Reed, Horace Donaldson, D. Kirk Hopkins, Mrs. William Foster, Chesley McDonald, Hal Knight, Jeff Davis and H. L. Hildebrand — are taking donations toward the cost of putting on the celebration. Many ranchers and businessmen are making donations of money and livestock and time. If everyone pitches in and helps, said Jim Davis, the affair will be a success from every angle.

Said the chairman — "If you were not named on a committee, please volunteer your services—because it will take the work, money and cooperation of everyone to make the Diamond Jubilee a success."

## Son to the Larry Glasses

A son, named Robert David, was born to Mr. and Mrs. Larry Glass June 23 in the Hall-Bennett Hospital in Big Spring.

The baby weighed six pounds and ten ounces, and is the first child for the couple.

Grandparents are Mr. and Mrs. David Glass and Mr. and Mrs. Bob Ballenger.

### PROCLAMATION

By The  
County Judge of the County of Sterling

TO ALL TO WHOM THESE PRESENTS SHALL COME:

I, W. R. BROOKS, County Judge of Sterling County, Texas, do hereby proclaim and direct that a special celebration be held in and throughout the County of Sterling and in Sterling City, on the 19th and 20th days of August, A. D. 1966, for the purpose of commemorating the 75th anniversary of the organization of Sterling County.

A copy of this order shall be published in The Sterling City News-Record once each week until all proper proceedings shall be had to the end that such celebration may be held and enjoyed by all who may be there present and the results proclaimed in accordance with the spirit of this order.

IN TESTIMONY WHEREOF, I have hereunto signed my name officially and caused the Seal of the County of Sterling to be affixed thereto, this the 12th Day of July, 1966.

(Seal)

W. R. Brooks, Signature  
County Judge  
Sterling County, Texas

W. W. Durham, Signature

DR. NORMAN DURHAM  
DR. NORMAN N. DURHAM JOINS ATOMIC ENERGY COMMISSION

Dr. Norman N. Durham began an administrative position with the Atomic Energy Commission in Washington, D. C. on July 1st. He joined the AEC as administrator of educational and industrial research grants in molecular biology and cellular genetics.

He has been an Oklahoma State University faculty member since 1954, and has done research in protein and enzyme synthesis, mechanisms of antibiotic action, influence of metabolic regulators on cell growth and reproduction and genetic transformations, and has been program director for the microbiology graduate training grant awarded OSU by the U. S. Public Health Service.

He has been a consultant in biological science to the National Aeronautics and Space Administration, and has been a counselor of the American Society of Microbiology in 1962-1965. He was also recently awarded the Sigma Xi lectureship honor at Oklahoma State University for 1966-1967, which is awarded annually to recognize research achievements.

Dr. Durham's wife and four little daughters, accompanied by his parents, Mr. and Mrs. Harold Durham, of Eastland, were guests this past week of his grandmother, Mrs. D. C. Durham and of the Roy Morgans. They will join Dr. Durham in Washington later this month.

Write your friends and relatives about the Sterling County Diamond Jubilee Celebration on specially printed stationery for the affair. Little packets of stationery on sale at 50c at the News-Record. Big Red Lettering on the stationery and envelopes.

### SOCIAL SECURITY BENEFITS FOR STERLING

130 people in Sterling County received a total of 104,937.00 in social security benefits in 1965. J. G. Keen, social security assistant district manager in San Angelo, revealed today, an increase of \$20,052.00 and 12 people over the year before.

A large part of the increase in payments resulted from changes made by the social security amendments of 1965, Keen said. Those changes which were in addition to the new program of health insurance for the aged, included a 7% increase in monthly benefits retroactive in January 1965; benefits for widows as early as 60; benefits for full-time students between 18 and 22 benefits for some divorced women; benefits for some people over 72 who hadn't worked long enough to get social security before; and the payment of disability insurance benefits to workers who are unable to work because of a disability that lasts 12 months or more.

"In addition to the people who began getting benefits in 1965 because of these changes," Keen continued, "a good many older people, upon applying for medicare, found they were eligible for regular social security benefits, too. All in all, the 1965 figures for Sterling County include 70 retired workers, 5 disabled workers, and 55 wives and children of retired, disabled, or deceased workers. The average monthly social security benefit for Sterling County beneficiaries amounted to \$67.00 in 1965." "These figures," Keen said, "show how wide the protec-

### To Get Art Scholarship

Lynette Murrell, daughter of Mr. and Mrs. G. C. Murrell of San Angelo, upon her graduation from high school, will be eligible for a scholarship to the Norman Rockwell School of Commercial Art in New York City because of her outstanding art work as a sophomore at Central High School.

### Accent on Health

HEALTH & SAFETY TIPS FROM THE AMERICAN MEDICAL ASSOCIATION  
High Blood Pressure

High blood pressure, more properly called arterial hypertension, is an abnormal state of the circulation that may be a cause of well as a result of arterial disease, says a pamphlet from the American Medical Association called "Your Blood Pressure".

Four of every five cases of persistently increased blood pressure are known as primary or essential hypertension, for which no underlying cause can be identified, says the AMA publication. It often occurs in those with a family history of increased blood pressure.

The other one-fifth of the cases are called secondary hypertension, which means that the cause of known to be some defect or disease.

Hypertension requires a lifetime of management. The patient and his doctor, working together, plan a living pattern, supplemented by various medical procedures, that will result in the longest and most useful life that the patient can live, even though the doctor may never know the cause of his patient's hypertension.

In untreated hypertension, the course from onset to death is approximately twenty years. The first two-thirds is without symptoms, and can go undiscovered unless the patient undergoes periodic health examinations, particularly in the middle years. The last one-third of the twenty years is complicated by failure of the heart, the brain or the kidneys, alone or in combination. Once organ failure begins, the average survival of the untreated patient is about six years. Under treatment, a longer and more comfortable life is to be expected.

Men usually present themselves for diagnosis at a more advanced stage of the disease than do women and have a higher incidence of coronary disease in men and of brain complications in women. Women tolerate elevated blood pressure better than men.

Among two comparable groups, three times as many of those treated than of those not treated were living after five years.

It is highly important that there be close rapport between the patient and his physician. It is essential that the patient understand his disease, know the need for continued treatment, and be willing to tolerate the occasional undesirable and unpleasant side effects of some of the drugs used. He must look to the long-term good to be obtained.

### SCIENCE SKETCHES

ACNE may be helped as much by a cordial relation with the family doctor as by treatment with antibiotics, according to Dr. Robert G. Crouse, University of Miami school of medicine. He said that sympathetic and enthusiastic physician-patient relationships can markedly benefit many acne patients even in the absence of active medication.

HYDROGEN PRODUCTION is being boosted with the help of catalysts, reports Girdler Catalysts, Louisville. Catalysts, substances that speed up or retard chemical reactions but remain relatively unchanged themselves are used to obtain a rapid reaction in hydrocarbons.

STANFORD University is studying wave formation with the aid of a new 115-foot-long glass and steel wind-and-water tunnel. It is one of the largest laboratory devices in the U.S. that combines both wind and wave effects.

**DISABLED MAY BENEFIT FROM SOCIAL SECURITY**  
 Some 3000 Texans who may be eligible for disability benefits under the new Social Security provisions, have not yet applied for them according to Floyd B. Ellington, district manager of the San Angelo Social Security office.  
 Under recent liberalizations of the law, persons with nonpermanent disability may now qualify for benefits. Ellington said that under the previous law a person was eligible only if he had a severe disability that was expected to last a long and indefinite time. Now benefits can be paid if the severe disability has lasted or is expected to last as long as 12 months by his doctors. There are also more liberal requirements for certain persons who are blind.

**SMOOTH SELLING**  
 by George N. Kahn, Marketing Consultant  
**TAKING A RISK**  
 Copyright—George N. Kahn

Several years ago I knew a young advertising man who quit his job to open his own agency.  
 My friend, Don Larick, was long on drive and imagination but short on capital. He needed at least one big client to really get on a firm footing.  
 Then his chance came. He bid for the account of a leading coffee firm.  
 But Don's heart sank at his first interview with the company's advertising manager. He learned that other agencies, including some of the city's largest, had submitted elaborately prepared presentations. Don, who was barely meeting his rent, could not hope to duplicate them.  
 He thought fast.  
 "I don't work with elaborate portfolios," he told the ad manager casually.  
 "But how else can we tell if you can do the job?" the manager asked.  
 Don knew that the final decision would be made by the company's board of directors.  
 "Do you think your board would appreciate a good idea if they heard it?" he asked.  
 Assured that it would, Don requested an audience with the board.  
 My friend made a brilliant oral presentation with the aid only of a few notes on the back of an old envelope! He got the account and went on to become one of the most successful advertising practitioners of his time.  
 Don acted boldly, a step that salesmen might well emulate.

**Are You Playing It Too Safe?**  
 The old adage "nothing ventured nothing gained" is a good one for a salesman to remember.  
 It's easy to play it safe. In this way you attain a nice level of mediocrity. Your children may not be able to attend college or you won't get that Bermuda vacation, but you will be safe. Too many salesmen seek this way out. The pity is that this is supposed to be a dynamic profession. Our whole economy literally moves on salesmanship.  
 The "safe" salesman rarely if ever breaks new ground in his territory. He never goes after the really big ticket if it means sacrificing any time from his "tried and true" routine. He is fearful of pushing a new product that may have great potential. He would never dream of correcting a customer, even though the latter would have more respect for him. He dreads taking over a new territory.  
 The risks I suggest are along the line of intelligent business practice. Of course it may be safer to spend two hours with an old and assured account, but sometimes devote one of those hours to calling on a tough but potentially productive prospect.  
 It may be safe to stay with proven principles, but new selling ideas are being developed almost every day. Experiment with some of them. It may be the best thing you ever did for yourself.  
 Some salesmen are so faint-hearted they won't even take a chance when they have nothing to lose.  
 Bart Harman once took over a well-established territory. He had been told that one particular customer, ABC Company, had been buying 10 gross of the product every call for many years. At his first call on the firm, Bart introduced himself.  
 "The buyer was dumb-founded," Nick said. But he finally managed to say to Ted: "You're taking an awful chance, young man. My answer will probably be no after you've made your presentation."  
 "Ted went ahead anyway," Nick continued. "For the next month he gave up a virtually assured income to research and prepare a bangup presentation for Spinner. When it was ready, he called for an appointment and was told to come around the next day."  
 "Ted delivered a masterful presentation," Nick went on. "He knew that department store inside and out and made such convincing points that Spinner could not help but give him an order—and a whopping one. That store was our customer from then on. And Ted tripled the income he had lost in that month. He took a gamble and won. But the stakes were big and he knew it."  
 This is the kind of courage and cool headedness that pays off for a salesman. Even when you're taking a beating, don't be afraid to try something new or take a chance.  
 Here is a self test to let you see if you are sufficiently aggressive to take a risk if the situation calls for it.  
 You should get at least five "yes" answers.

1. Do you occasionally vary from your sales routine? Yes  No
2. Does the idea of taking a gamble interest you? Yes  No
3. Do you sometimes tell a prospect or customer that he's wrong? Yes  No
4. Do you ever make a really hard stab at getting the big order? Yes  No
5. Are you open to new suggestions and ideas in salesmanship? Yes  No
6. Do you emulate successful salesmen in your firm? Yes  No
7. Do you avoid playing it safe? Yes  No

**Way to Advancement**  
 The bold and enterprising salesman will always catch the eye of his superiors.  
 Nick Kaib, sales manager for a huge Mid-West appliance manufacturer, tells of one bright lad who scooped up an order from under the noses of veteran colleagues who had been trying for years to snag it.  
 "I was district manager then," Nick recalled, "with a force of 25 men."  
 REPRINTS AVAILABLE... each article in this series is expanded to approximately 2000 words—includes a self-evaluation quiz—is printed in 2 colors in a 4 page format, on white glossy paper and is 3-hole punched to fit any standard 3-ring binder... prices are as follows:  
 1 to 9 copies (of each article)..... 50 cents each  
 10 to 49 copies (of each article)..... 37 1/2 cents each  
 50 to 99 copies (of each article)..... 25 cents each  
 100 or more copies (of each article)..... 15 cents each  
 The entire series may be pre-ordered or individual articles may be ordered by number... address orders to: George N. Kahn Co., Marketing Consultants, Sales Training Division, Department NP, Empire State Building, New York, N. Y. 10001. Article titles are:

**AS IT LOOKS FROM HERE**

By Omar Burleson, Member of Congress, 17th District

Washington, D. C. — What child has not had fun catching lightning bugs but experienced disappointment the next morning to find the brilliance turned to a drab gray.

Meaningful lessons might be drawn such as a midsummer night's dream or like many things of beauty which fade when we try to imprison them or look too closely.

The object of this essay is not one of philosophy but on the uniqueness and value of the firefly in this day of nuclear energy and rapid scientific advancements.

Scientists have never come up with an explanation as to how the firefly produces his cold light. It remains a mystery — just as it was to us as children.

To relate the insect's usefulness to science somewhat degrades the romantic legend of Latin American ladies wearing little lamps in their hair for ornaments and the story of the military doctor, William Gorgas, performing an operation by the light of a bottle of fireflies.

The National Aeronautics and Space Administration's Flight Center at Greenbelt, Maryland, is not especially interested in the firefly as yielding a soft summer magic which makes all the world seem young. It is interested in scientific and medical research. The lantern in the firefly's tail is what the scientists are trying to figure out. They say the light is produced by combining something called adenosine triphosphate (referred to as ATP) with chemicals in its tail. Evidently, this is quite a trick.

It seems man can turn out ATP, a basic protein of life converted into energy, but he fails to turn it into light as a firefly can. How it is done,

they do not know, and the firefly's secret remains its own.

The reason a firefly collecting company in New Jersey pays children a cent apiece for fireflies is to furnish them to the Greenbelt Laboratory for research. The reason of the research is to determine the action of ATP in red blood cells. As it is understood by the layman, the firefly can be used to measure the amount of ATP in red blood cells, which may result in detecting energy problems and possibly produce answers about diseases like cancer.

The scientists say that there is ATP there is earth-like life. That is where the Goddard Space Flight Center comes in. Late this year or early next, Goddard will launch its first rocket with a life-detection instrument (called firefly) which will contain extract of firefly lanterns. If the rocket encounters live micro-organisms in the upper atmosphere, the extract will glow. It will trigger an electronic system so sensitive it can detect one-quadrillionth of a gram at ATP. The information will be radioed back to earth.

The naval weapons laboratory at Dahlgren, Virginia, a sophisticated scientists center, also ponders space age problems and is calling for 25,000 fireflies for a study of their light-producing materials. The Center also offers a dollar a hundred for fireflies.

Understandably there is a concern that pesticides will eradicate the lightning bug, as well as the mosquitoes and other undesirable insects. And, too, it looks as if insects and bugs may not only be sterilized under the method used for the eradication of the screwworm but will be deafened too. Experiments with certain soundwaves at a continuous low hum destroyed 75 percent of moth eggs, and of those which hatched, half died the first day. Adults lived a shorter life. It is sort of comforting to know there are still things the scientists can not figure out and that they have to run for help to small boys and small bugs.

**REWARD NOTICE**

A reward of \$500.00 will be paid by the Texas Sheep and Goat Raisers Association to any person (other than law enforcement officers) giving information causing the arrest and final conviction of any person or persons found butchering or stealing any sheep or lambs or goats belonging to any Association member in good standing. When two or more persons give information, the above sum will be divided at the discretion of the Board of the Association. When two or more defendants are involved in a single crime, the total reward is limited to \$500.00, but the conviction of one defendant, even though the other defendants are acquitted, will entitle the claimant or claimants to said sum of \$500.00. All claims must be submitted within ninety (90) days following conviction. If, upon conviction, a defendant confesses other thefts, no additional reward will be paid. All deviations concerning the payment of such reward and the conditions of payment will be made by the Board of Directors of the Association.

Include phone number.

**WO-HE-LO To Everybody!**

Dressed in her ceremonial Camp Fire Girls costume, Denae Kimball, of Houston, Texas, points to the spot where 1,000 teen-age Horizon Club girls will spend three weeks learning about our Latin American neighbors.

The Horizon Club Conference Afloat, first international sea and land conference of its kind sponsored by a national youth agency, was planned to give girls in the senior program of Camp Fire Girls an exposure to other cultures and experiences in sharing.

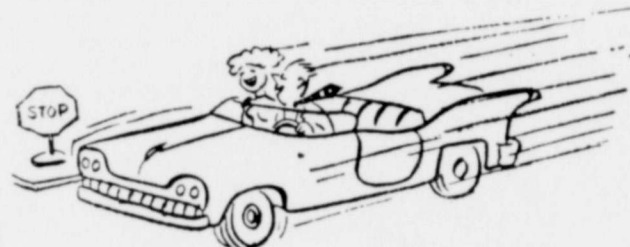

The Conference will combine the usual pleasurable aspects of a sea voyage with a full program of workshops and seminars to reinforce previous studies in the history, geography and culture of Latin America and the Spanish language.

At ports of call — San Juan, Puerto Rico, Cartagena, Columbia, and Kingston, Jamaica — the girls will meet governmental officials, visit girls' camps, rural communities, industrial plants and native homes, where several will spend time as house guests. The Horizon Club girls also plan to entertain their Latin-American counterparts aboard their ship, the M/S Aurelia.

The thousand girls, representing 35 states, have been working in after-school jobs for two years to defray most of the cost of the voyage. They will be accompanied by a professional staff of 100, including three chaplains.

"WO-HE-LO," — Work, Health, Love — is the watchword of the Camp Fire Girls organization.

**Land Banks Have 50th Anniversary**

For some 10,000 people who make their living from agriculture in Coke, Irion, Reagan, Sterling & Tom Green counties, July will be a month-long testimony to the fact that they—and most other farmers—have turned out to be good businessmen.

It will be "Land Bank Month", the 50th Anniversary of the Farm Loan Act which helped put farming on a business basis in the U. S. for the first time in history. Farmers at last were able to borrow money on reasonable terms and put it to work as a production tool.

R. H. Emery, manager of the Federal Land Bank Association of San Angelo, said that farmers at the turn of the century were regarded as poor business risks. "No one would lend them money to operate the way a businessman must if he is going to grow and contribute to his community," he said. "Interest rates for farmers were twice as high as for city businessmen, and the loans were for very short terms."

"Three Presidents—Theodore Roosevelt, Taft, and Wilson—studied the problem and finally the Farm Loan Act was signed by Woodrow Wilson on July 17, 1916. This Act created the Federal Land Bank System, through which farmers could make long-term, low-cost real estate loans from their own organizations."

The Federal Land Bank Association of San Angelo was created in 1917. It is one of seventy-three associations in the Federal Land Bank district of Houston, which in turn is one of 12 Federal Land Banks that serve the 50 states.

"Altogether," Mr. Emery said, "the Federal Land Bank System nationally has loaned its farmer-members more than \$12 billion. The Land Bank of Houston has loaned Texas farmers more than 1.1 billion dollars. Our own association has loaned \$20,000,000.00 over the 49 years it has been in business."

Not only have farmers proved to be outstandingly good loan risks—Land Bank foreclosures are almost unheard of today—but, given money to work with they have proved to be production geniuses of a quality rarely found anywhere in American business, Mr. Emery said.

"There are half as many farmers today as there were 50 years ago, and they're feeding a population that has doubled in this century," he said. "They rank among the greatest users of technology the world has ever known. Anyone who doubts it should visit a modern farm today."

"What goes on there—in new breeding, feeding, and other production techniques—makes many of the rest of us look as if we and not the farmers are living in the horse and buggy days."

"I don't know of another industry in the country that is producing today with 1975 methods and selling—for the most part—at 1955 prices."

Mr. Emery said that 350 farmers currently hold Land Bank loans in the five counties his association serves. Most of the loans have been used to expand, improve and modernize farm and equipment. The largest category of borrowers (who are also Association members) produce livestock, feed and cotton. The average size of the loan made by the Association in 1965 was \$22,600.00, compared with an average loan of \$18,800.00 in 1964.
