AROUND
THE
COUNTY
by

ARTHUR BARLEMANN, JR. COUNTY AGENT

If you have been making the colorful paper "logs" to provide color in your fireplace during the coming holiday season, it's time to get started on the project. It takes several weeks to complete the process and dry the logs for use during the Christmas holiday.

To make the logs, roll newspapers into logs the width of a daily paper. Don't try to get many into the roll as the papers swell while soaking. The rolls should be tied with (rather loosely) heavy twine in two or three places. Wire ties will corrode in the soaking process so they should not be used.

The solution for soaking the logs is made by dissolving 4 pounds of copper sulfate and three pounds of rock salt in a gallon of water. Soak the paper logs in this solution for at least three weeks, turning them frequently. It will take a week or better for the logs to dry; once dry they are ready for use. They will produce a variety of colors in the fireplace when placed on the wood.

There is one precaution to be used in soaking the logs. Use a plastic container, enameled container, or something of this type for soaking. The solution is highly corrosive and will corrode galvanized or metal containers in a few days.

Another method of producing color in the fireplace is the use of chips soaked in various chemicals. With these, a desired color can be produced by using certain chemicals.

If you are interested in this method, contact the county agent's office. You will be provided with the instructions for this method.

The Tom Green County Pecan Show will be held in San Angelo on December 5 and 6. Sterling County residents are invited to participate in the pecan show and bake show both. For the past several years, entries from this county have done very well in the show.

An entry in the pecan show consists of one and a half pounds of pecans in the shell. Show officials will weigh out a sample of the pecans and shell them the night before the show to determine the number of nuts per pound and the yield. The shelled nuts along with those still in the shell will be judged.

If you have pecans that you would like to enter in the show, contact the county agent's office here and we will be glad to work with you in preparing the entries.

Screwworm activities lagged again during the past week in the county. For the second consecutive week, we have received no reports from the Mission laboratory either on screwworm cases or non-screwworm cases. All producers are urged to maintain their vigilance though. With the opening of deer season, there will be some wounded animals that get away. These could well become a reservoir for screwworms and cause problems.

BACK THE EAGLES. Go to Garden City tonight for the conference ball game between Garden City and Sterling City. Game time is 7:30.

In case of fire dial 8-4771.

Behind the 8-Ball

By the editor.

Well, the official canvas of votes by the commissioners Tuesday didn't change the votes here any. Nixon still got 170, Humphrey 151 and George Wallace 54.

All the state races stayed the same, and the local races all went to the candidates on the ballot. They had no opposition. There were one or two write-ins for local races, but none of any consequence.

The most any write-in candidate got was two.

8-BALL

Joe Stucke, the barber, of Eden, will be back in Sterling at the same old stand on Monday. He has bought out Richard Lawdermilk, who in turn, bought him out a few months ago.

Welcome back home, Joe.

8-BALL

Follow the Eagles to Garden City tonight for the conference game there tonight. It is a very important one.

We need to win it.

8-BALL

The Southwest Conference football picture is in a mess. Texas, SMU, Arkansas, and Tech are all tied for top spot.

A day of reckoning is coming, though. This weekend is sure to see a change of some kind.

Two or three teams from the Southwest Conference will, in all likelihood, go to bowl games somewhere.

Of course, one will go to the Cotton Bowl. One will likely go to the Gator Bowl and one could go to the Orange Bowl. May the best team win.

Beat Klondike 34-12 Last Friday Night

Coach George White's Sterling City Eagles came off on the top of the score of their first conference game here on last Friday evening with Klondike, 34 to 12. The Eagles controlled the game all four quarters and White used all of his players at times during the last half.

In the first quarter local quarterback Tim Duncan kept a sneaker and plunged over the one yard distance to make the first points for the locals. He then passed to Randy Peel for the two extra points. A little later, David Currington, local back, on a pitch out pass from Duncan, went eight yards for the second Eagle T.D. Ishmael Vargas ran over for the 2 extra points.

In the second quarter Tim Duncan, on an 18 yard rollout sortie, went about 20 yards for a T.D. The pass to Price for the extra points was no good. Later in the second, a screen pass to Currington paid off for another six points for the Eagles.

The score at half time was 28 to 0, favor of the Eagles.

In the third quarter, on a keeper, Ray Escobar went for about one foot for a T.D. The try for extra point failed.

In the fourth and final quarter Klondike scored two T.D.'s. Lynn Davis pushed over for 1 yard for a score and Joe Cozart ran 12 yards for Klondike's second score.

THE SATURN ROCKET must be fed fuel pressurized by compressed helium, which is inert and will not react with the propellant or plumbing. Philadelphia Forge, Philadelphia, which machined containers to hold the helium, says the light weight gas is stored in aluminum "bottles" 211.8 inches long, 19.1 inches in diameter and 0.90 inches thick. Despite their size the four containers required for a firing are almost lost inside the rocket's huge liquid oxygen tank.

HOW DOES IT WORK?

THE LASER

THE LASER IS A LIGHT SOURCE BILLIONS OF TIMES BRIGHTER THAN THE SUN. IT IS UNLIKE ANYTHING SEEN BEFORE ON EARTH.

BECAUSE IT IS COHERENT, LASER LIGHT CAN TRAVEL GREAT DISTANCES IN A CONCENTRATED BEAM, UNLIKE ORDINARY LIGHT.

MANY MATERIALS CAN BE MADE TO "LASE" (EMIT COHERENT LIGHT). THERE ARE THREE MAJOR TYPES OF LASERS DEPENDING ON MATERIAL USED: SOLID, GAS AND SEMICONDUCTOR.

LASER BEAMS ARE CREATED BY DISCHARGING AN ENERGY SOURCE, EITHER LIGHT OR ELECTRICAL, INTO THE MATERIAL. AS THE ENERGY IS ABSORBED, THE MATERIAL IS EXCITED TO AN EXTREMELY HIGH DEGREE. THIS CAUSES THE MATERIAL TO GENERATE LIGHT, WHICH IS REFLECTED BACK AND FORTH WITHIN THE MATERIAL, RESULTING IN FURTHER RELEASE OF THE ENERGY. BY THIS MEANS, THE ORIGINAL ENERGY IS CONVERTED TO COHERENT LIGHT OF HIGH INTENSITY WHICH IS EMITTED FROM THE LASER.

THE ENERGY CAN BE CONCENTRATED TO BLAST A HOLE IN A DIAMOND OR SPOT-WELD METAL. A CONCENTRATED LASER BEAM HAS EVEN BEEN REFLECTED OFF THE SURFACE OF THE MOON.

"In spite of the continuing industrial boom and apparent prosperity," he continues, "the young people show their frustration and dissatisfaction by frequent demonstrations and violence."

Social Security Tips

Want to get that first social security on time?

"Everyone does, but not enough people do anything about it," says Ted F. Moellering, District Manager of the San Angelo Social Security Office.

According to Mr. Moellering, every person who files an application for social security benefits will be asked to present certain proofs. Most applicants will also be asked to give the exact amount of earnings for the past year and for the current year.

Most persons do not bother to find out ahead of time exactly what they will need. "George waits until the day he files an application," said Mr. Moellering. "Then he has to go back home and dig around for records, or write letters requesting the necessary documents, causing a delay in the processing of his claim."

A claim for social security benefits may be filed as early as three months before entitlement to benefits.

Mr. Moellering suggests that claimants get in touch with the social security office several months before this three month period to find out ahead of time what proofs and information will be needed.

"The satisfied applicant," continued Mr. Moellering, "is the one who does this, and consequently has all necessary proofs and information with him. The result—everything is completely taken care of during this one visit at the social security office, and he gets that first check right on time."

For further information, contact the Social Security Office at 3000 West Harris Ave. in Sa Angelo, Texas, or see the representative when he is in your area.

SOCIAL SECURITY CHILDREN'S BENEFITS

The children of a deceased woman worker now have the same right to social security payments on their mother's account as they do on the account of the father, says Ted F. Moellering, District Manager of the Social Security Adminis-

"This change is the result of a new definition of 'dependency' in the Social Security Act," Mr. Moellering explained. "Of course, the deceased mother must have worked on social security jobs long enough to be insured. In some cases, children whose mother died as early as 1947 can now be paid."

"An application for the child's benefits must be filed," he said. "We would like for anyone who believes he may be eligible to receive the payments to get in touch with the social security office without delay."

This applies especially to those whose applications were denied at the time of their mother's death. Detailed information can be secured from the Social Security Administration located at 300 West Harris in San Angelo, Texas, or see the representative when he is in your area.
