AROUND
THE
COUNTY
by

ARTHUR BARLEMANN, JR. COUNTY AGENT

Screwworms continued to increase in Texas with an unprecedented total of 106 cases during the first week of April. Program officials are unable to pinpoint any concentrated trouble spot within the infested area, but emphasize that thirty-six counties were involved in the week's total.

The present outbreak began several weeks ago with a gradual buildup in counties bordering Mexico in extreme South Texas and had hit a yearly total of 220 cases on April 7. Dr. M.E. Meadows, program director, pointed out that an extremely mild winter in Mexico enabled the screwworms to thrive and multiply in countless numbers in that country.

Production of sterile flies at the Mission plant has been stepped up from 100,000,000 flies a week to 160,000,000 in an effort to contain the northward spread of the livestock pests. The area known to be infested on April 7 was bounded by Hamilton County on the north, Brewster County on the west and Victoria County on the east.

On Monday of this week, we received a sheet with a total of twelve samples reported. Of this total, seven were screwworms and five nonscrewworms. One of the nonscrewworm samples was sent in from the Lester Foster Estate Broome Ranch by J.Q. Foster. These seven confirmed cases were not included in the 106 previously reported above.

All livestock producers are urged to maintain their vigilance in the screwworm fight. Check all livestock for possible cases, take a sample, and send it to the lab for identification. Now that shearing is underway, wounds are possible sources of worms and if these pests are missed early in the season, it could mean trouble. When things start to go wrong it seems they have a habit of continuing that way; the climatic conditions certainly are going wrong so let's try to prevent the screwworm situation from following his trend. We can't do anything about the weather but we can do something about the screwworm situation. If you need vials to carry in your pickup, get them at the county agent's office or the feed store.

If you value your horses, don't take chances with Venezuelan equine encephalomyelitis. A vaccination program for the deadly horse disease should be activated now before the mosquitoes which transmit the disease become too active.

Horses, mules and donkeys that should be vaccinated fall into four groups: (1) unvaccinated animals recently moved into the state; (2) foals born since last year's vaccination campaign; (3) foals vaccinated last year that were under six months of age; and (4) animals that were overlooked or never vaccinated.

Animals that were vaccinated last year need not be vaccinated again but if there is any doubt as to whether the animal was vaccinated, it is best to do it again.

This year, the owner must pay for the vaccination. Commercial vaccine is available and it must be given by a veterinarian. Even though

Midland Community Theatre

PICKWICK PLAYERS TO PRESENT SPRING PRODUCTION

Midland, Texas — It's fun nonsense as fresh as spring itself when Midland Community Theatre's Pickwick Players present **THE STINGY MR. PENNYPINCHER**, a bright new comedy written to be performed by young people and to entertain all ages.

The setting is the exciting New England of 1775, on the eve of Paul Revere's momentous ride. Colorful members of Professor Eustace McGargle's Traveling Troupe of Strolling Players discover that a barn's both a perfect refuge from an overly zealous sheriff troubled by their overdue accounts and an ideal stage, complete with audience, for their madcap production. A stage struck horse, long-time barn resident and late addition to this already picturesque cast, seeks hilarious stardom with his clarion call, **RUN FOR THE HILLS, THE BRITISH ARE COMING**. Meanwhile, the tightfisted Mr. Pennypincher, a spendthrift of humor, proves through a series of comical circumstances that the miser robs only himself. This happy celebration of wit also includes the inevitable romantic situation, suitably complicated by Mr. Pennypincher's avarice and certain to be resolved only thru some zany misadventures. Capping it all is the arrival of Paul Revere himself, intent on his mission and undeterred by the theatrical aspirations of his usually trusty steed.

Suggested by Moliere's *The Miser*, this spirit-raising spring offering will be the ninth original play for young people by Ed Graczyk, founder-director of the highly praised Pickwick Players.

Produced in conjunction with the Junior League of Midland, Inc. *The Stingy Mr. Penny-pincher* will play to all Midland seventh graders, who will be bused to the theatre for performances on April 10, 11, 12 and 13.

Performances for the public are scheduled for Thursday April 13 at 4:30 p.m., for Friday, April 14 at 4:30 p.m. and for Saturday, April 15 at 2:30 p.m. All seats are reserved and tickets are 75c for students and \$1.00 for adults. The box office will open on Monday, April 10 at 10 a.m. Call theatre box office, 682-2544, or write P.O. Box 4847, Midland, Texas, 79701, for reservations.

NOTICE—The Volunteer Service League meets every second Monday at 7 p.m. at the Sterling County Hospital and Nursing Home. Please arrange to be present.

Highway Work for Sterling Scheduled

The Texas Highway Commission, in their March meeting in Austin, approved the 1973-1974 Consolidated Highway Program.

J. A. Snell, District Engineer of San Angelo, stated that the new program provides funding totaling \$4,400,000 for purchase of right of way and construction of new projects in District 7, as well as additional finance for projects already approved.

A project in Sterling County that is included in this program is described as follows:

Purchase right of way and construct grading, structure and surfacing on State 11 from Coke County line, west a distance of 6.4 miles. Estimated cost—\$488,000.

BOYS RANCH ROUNDUP

Chairman for West Texas Boys Ranch of West Texas Boys Ranch has announced that W. Terry has been appointed Wagon Boss for Sterling County. Owens said—We are very fortunate to have a man like I.W. Terry working for the Ranch in Sterling County. West Texas Boys Ranch is presently caring for 72 boys who need our help, that's why we are so pleased to have Mr. Terry working with us in the Annual Roundup. West Texas Boys Ranch has served over 700 boys since it was organized in 1947. Of that number one boy has been from Sterling County.

West Texas Boys Ranch supported entirely by tax-deductible donations by the public and Annual Roundup is one of the most important money-raising events undertaken by volunteers for the Ranch. All proceeds from Roundup go into general operating funds to purchase bread and butter, shoes and socks, and to meet the operating expenses of the Ranch. Through Roundup livestock men are invited to donate livestock or cash to help maintain the Ranch as a home for the dependent and neglected boys of West Texas. The spring phase of Roundup was kicked off at a Wagon Boss meeting held in San Angelo on March 11. Arrangements to haul donated livestock will be made by local Wagon Bosses or the Roundup Chairman. Most area livestock commission companies do not charge commission on livestock donated to West Texas Boys Ranch.

LIONS CRIPPLED CHILDRENS' CAMP

Members of Lions Clubs throughout Texas this month are pausing to pay recognition to their camp for crippled children which has given over 12 thousand handicapped youngsters a new dimension since it was opened in 1953.

The camp, located at Kerrville in the Hill Country of Central Texas, is free to crippled, blind, deaf or mute children from the ages of seven through sixteen. The 17 permanent buildings and other improvements dotting the 504-hill-side acres represent an investment of more than \$700,000.

At the camp, these youngsters who have been denied a normal childhood through no fault of their own learn to shed their shyness imposed by their handicaps. By mutual association with other handicapped children and by skillful and gentle counseling, these youngsters have found the freedom to grow, mentally and spiritually, into useful citizens of tomorrow.

While the Lions are paying tribute to their camp, we would like to pay tribute to the Lions and their friends who have supported this great venture of the heart. We know a man never stands so straight as when he stoops to help a crippled child.

REWARD NOTICE

A reward of \$500.00 will be paid by the Texas Sheep and Goat Raisers Association to any person (other than law enforcement officers) giving information causing the arrest and final conviction of any person or persons found butchering or stealing any sheep or lambs or goats belonging to any Association member in good standing. When two or more persons give information, the above sum will be divided at the discretion of the Board of the Association. When two or more defendants are involved in a single crime, the total reward is limited to \$500.00, but the conviction of one defendant, even though the other defendants are acquitted will entitle the claimant or claimants to said sum of \$500.00. All claims must be submitted within ninety (90) days following conviction. If, upon conviction, a defendant confesses other thefts, no additional reward will be paid. All devisions concerning the payment of such reward and the conditions of payment will be made by the Board of Directors of the Association.

DISABLED WIDOWS BENEFITS

"Two years have passed and many persons are still not aware of the change in the social security law which provides monthly benefits for disabled widows at age 50," said J. M. Talbot, social security manager.

Since the law became effective in February, 1968, more than 32,000 disabled widows have qualified for monthly payments. Mr. Talbot estimated however that another 30,000 widows who might qualify for these benefits have never applied.

"The requirements for disabled widows' benefits are apparently not as well known as those for the more familiar widows' benefits at age 62, or reduced widows' benefits at age 60," Mr. Talbot continued.

To qualify for benefits a widow, age 50 to 60, must have an impairment so severe that it keeps her from engaging in any work. The condition must also be expected to last for at least twelve months.

The widow's disability must have begun before her husband's death or not later than seven years after his death. A widow who has previously been entitled to benefits if she becomes disabled before payments to the children end or within seven years after they end.

All interested persons are urged to attend and comment upon the proposed regulations.

Behind the 8-Ball

By the editor.

The Sterling High School One Act Play placed sixth in district competition Tuesday in Forsan. There were ten plays in competition.

Debbie Hopkins was named to the all-star cast and Lisa Horwood got honorable mention by the judges.

We understand that the play will be put on at the P.T.A. next Monday night at the auditorium.

8-BALL

It go hotter'n a pistol here this week. Too hot for April. One air conditioner did not cool things off right and even car air conditioners seemed to goof off. This 100 degree plus weather is just to early in the year to suit me.

8-BALL

Thometimeth the etheth get thuck on the linotype and it ith heck. The E ith the moth popular and commonly uthed letter in printing, but the etheth are important too.

But when a linotype geth over a quarter of a century old, then one can expect a few little malfunctionth. One time I thet up a long ethory without any etheth and it gave theveral people quite a kick. Thometimeth in the future I plan another one.

NOTICE OF INTENTION TO ENGAGE IN WEATHER MODIFICATION ACTIVITIES

Notice is hereby given, that Meteorology Research, Inc., 464 West Woodbury Road, Altadena, Calif. 91001 (State of Texas Weather Modification License No. 72-3), intends to engage in an operation to change or attempt to change by artificial methods the natural development of any and all atmospheric cloud forms or precipitation forms which occur in the troposphere, for and on behalf of the Texas Water Development Board located at P.O. Box 13087, Austin, Texas 78711, and will conduct a program of weather modification involving research, development, and associated investigations in atmospheric water resources leading to application of practical procedures for beneficially managing precipitation in Texas and other Southern Plains and Gulf States areas as follows:

1. Area in which equipment will be operated; In the vicinity of San Angelo, Texas, within the area bounded by Ballinger westward along State Highway 158 to the west boundary of Glasscock County; thence southward to the southwest corner of Reagan County; thence southeastward to the southeast corner of Crockett County; thence eastward to the southeast corner of Sutton County; thence northward to Menard County, then along the south and east boundaries of Menard County; thence northeast to Brady, and along Highway 283 to the Colorado River; thence northwest along the river to Ballinger. The area includes portions of the counties of Runnels, Coke, Sterling, Glasscock, Reagan, Irion, Tom Green, Concho, McCulloch, Menard, Schleicher, Crockett, and Sutton.

2. The primary target area will be: Concho River Drainage.

3. The areas adjacent to target area which may be subject to effects of the operation are: Those lying within 25 miles of the operating area described above.

4. The materials and methods to be used in conducting the operation are: A ground network consisting of rain-gages, a weather radar, and a radiosonde set for taking upper-level atmospheric measurements; a cloud seeding aircraft equipped with pyrotechnic racks and silver iodide flares for below-cloud seeding, and a dispenser for seeding small quantities of hygroscopic materials below smaller clouds; and additional instrumented research aircraft for making meteorological measurements in clouds.

The operation will extend during the period beginning about 1 June 1972 and ending about 1 August 1972.

Individuals who consider that their interests will be adversely affected by the operation proposed in this Notice of Intention may communicate their objections for consideration to:

Weather Modification Activities Coordinator
Texas Water Development Board

Spotlight on HEALTH
PROFILE OF A COLD VICTIM

What are your chances of catching cold? According to a booklet on the subject, they're especially good if you're female, live in a large city in the western or north-eastern part of the U.S., and are the mother of a child under 6 years of age. Young children are the greatest cold-spreaders. Your chances are further enhanced if you're going through a period of stress and strain. "Contentment preserves one even from catching a cold," the great philosopher, Nietzsche once said.

The booklet, which discusses the common cold, is distributed by Winthrop Laboratories, the makers of Neo-Synephrine nose drops and nasal spray that are widely used in the U.S. and abroad.

Keeping up one's resistance helps to avoid the common cold, according to the publication, which advises getting sufficient fresh air and exercise, well-balanced meals, and as much sleep as possible in a well-ventilated bedroom. In cold weather areas, an extra hour a night is recommended.

Early stages of the common cold are the most contagious. Every sneeze fills the air with thousands of virus-laden droplets. To help prevent spreading a cold to the rest of the family, to friends and to co-workers, everyone should have his own glass, cup, silverware and towels. Hands should be washed thoroughly and often, preferably with a liquid antibacterial skin cleanser, phisoHex is the one that is used in most U.S. hospitals to help prevent spread of infections. Particularly during the cold season, it is wise to keep a handwashing preparation in the kitchen, as well as in the bathroom.

Your chances of catching a cold will be reduced if precautions are taken. However, the Winthrop booklet also states that it is not completely possible to avoid a cold. Just breathing the air that someone with a cold has merely talked into offers the possibility of infecting a healthy person.

Sooner or later they're going to develop a computer so human that it will blame its mistakes on other computers.
