Ireland has accused Schleicher on little flurry and comment among the other candidates. Some others got to making propositions, and by the morning of the convention the most popular proposition seemed to be that of a man who proposed to make no assessment at all, and thus prevent the collector from collecting taxes. As he would have nothing to do, he did not ask any salary at all; allhe wanted was the office, or title.

The News draws a passible to the passible that the better course in the torn intermission and its consequent detriment to the says term, it seems that the better course in the interest of education would be for teachers to extend the free school term altowing a continued term instead of one with a ruinous intermission. If the pupils be taught one ment who months again next spring, it may be well understood that the tuition is almost valueless to the pupil. Before pupils are sincy started in studies their work is thus to be suspended, and the pupils we fairly started in studies their work is thus to be suspended, and the pupils be correct, Judge Ireland would have been the nown of available school revenue that may be applied, when authorized by law, to the support of public free schools for the declaration of a man who proposed to make no assessment at all, and thus prevent the collector from collecting taxes. As he would have nothing to do, he did not ask any salary at all; allhe wanted was the office, or title.

Each of titles dollars looked as large, too, as the moon looks to-night.

"Believe in traveling step by step; do not expect to get rich in a jump. Slow and sure is better than fast and flimsy. Perseverance by its distly gain enriches a man more than fits and starts of fortune and speculation. Every day a thread makes a skein in a year. Brick by brick houses are built. We should creep before we walk, walk before we rup, and run before we ride. In getting rich, the more haste the leas speed. Haste trips up its own heels. Don't give up a small business until you see that a large one will pay you better. Even crumbs are bread. Better a little furniture than an empty house. In these hard times, he who can sit on a stone and feed himself had better not move. From had to worse is a poor-investment. A crust is hard fare, but none at all is harder. Don't jump out of the frying-pan into the fire. Remember men hava dome well in very small shops. A little trade with profits is better than a large fire that burns you. A great deal of water may be gotten from a small pipe, if the bucket is there to eatch. Large bears may be caught in small woods. A sheep may get fat in a small meadow and starved in a large desert. He who understands too much succeeds in but little." Friday Morning, September 13, 1878. The Dunkards. A correspondent of the Albany Argus gives this account of this interesting people:

An annual gathering of this sect took place this week in the woods near North Manchester, Indiana, and your correspondent, impelled by a laudable desire to learn the tenets of their belief, and see their mode of worship, visited their encampment, and will embody in this letter the result of the day's except aware. will embody in this letter the result of the day's sojourn among them.

The annual gathering corresponds with the higher courts of other great religious bodies, in this, that is the place where dis-butes in the several districts, if any there be, are amicably settled, and where the genbe, are amicably settled, and where the general policy of the sect for the ensuing year is determined upon. It bears, however, more of a devotional and social character than the other couris referred to. The term "Dunkers" derived from the German word "Tunker"—to dip—was originally given as a nick-name on their organization in Schwarzenau, Germany, in 1708. Peracution drove them to this country, and their first settlements were made at Germansown. in Sohwarzenau, Germany, in 1708. Persecution drove them to this country, and their first settlements were made at Germaniown. Pa., in the early part of the last century. Their growth, however, was very slow until the beginning of this century, since when it has been more rapid, and they now claim to number about a thousand souls.

They are almost exclusively an agricultural community, their membership being principally in the five States of Indiana, Pransylvania, Ohio, Illinois, and Iowa, their only hold in the cities being in Germantown and Johnstown. Pa., and Baltimore, Md. They have no published confession of faith or creed, nor have they an educated ministry, but they endeavor to interpret the Bible simply and obey all its commands literally. Like the Quakers, most of the men wear broad brim hats, while the women wear the Shaker bonnet over a head drass or cap of plain white tulle, their body clothing being generally of the plainest description. Al. though this is a rule, the observance is not universal, but the women are not allowed to appear in church without the tulle cap, though they have a voice in the administration of affairs, are elected deaconesses, and cocasionally preach.

Like the Friends the Dunkers will not fight nor will they take oaths, or go to law, are unfill they take oaths, or go to law, are unfill year event the bounds of the market; but it is well and they not the proper in the restriction to the first that burns you. More Atd for the Yellow Fever Sufferers.

San Antonio has surely been a favored city in thus far escaping the ravages of the yellow fever, and while our citizens, grateful for being so favored, have responded nebly and liberally to the call for slid in behalf of those stricken with that dread disease, we should not become weary in the good work, but continue in our humanitarism efforts, to alleviate the sufferings of those living in the infected districts. The entertainment to be given at Krisch's Hall, on Saturday night, is for a most worthy object, and our citizens can enjoy a pleasant evening and aid these generous ladies and gentlemen in their efforts to increase the yellow fever fund.
